Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

FINDS:

Registry ID: 110060249468

Environmental Interest/Information System
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID: 110036017618

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"8/13/10 - Raphael Ketani. Oil contaminated soil was discovered digging at the site. It was called in by Charles Gouder of TRC (212) 221-7822. I spoke to Mr. Gouder. He said that they were digging below the level of a former foundation to a previous building. They were at 10 to 15 feet below grade when they discovered the contamination. The affected area is about 25 feet square. All of the contaminated soil will be excavated. The site will become PS 133K. The site address is

FUTURE PS 133K (Continued) **S110488354**

375 Butler Street in Brooklyn. The contact information is: Lee Gutterman, Deputy Director IEH NYC School Construction Authority 30-30 Thompson Avenue LIC, NY 11101 A CSL was sent out to Ms. Gutterman. 08/24/10-Hiralkumar Patel. 2:31 PM:- received call from Lindsey McCabe from TRC. she mentioned that two endpoint samples were collected and found only Toluene in only one sample. she requested approval for excavation backfilling. asked her to send lab data, site plan with sampling location and brief description of project. 08/25/10-Hiralkumar Patel. 12:46 PM:- received email from Dave Glass from TRC. Dave mentioned that during excavation for new school foundation, petroleum contaminated soil was identified in two areas in the vicinity of grid boxes S9 and S16 and in the vicinity of grid box S18. they have removed contamianted soils from area of grid boxes S9 and S16. access to grid box S18 is currently restricted by stockpiled soil and will be excavated at a later date (anticipated 08/30/10). the area of excavation in grid boxes S9/S16 was approx. 14 ft by 16 ft and 13 to 17 ft bg. following excavation, no evidence of contamination remained in boxes S9/S16. two endpoint bottom samples were collected from grid boxes S9/S16 area at 17 ft depth. sidewall samples were not collected because adjacent soils had been or will be removed from the surrounding area as part of ongoing construction. Dave requested approval to backfill excavation in grid boxes S9/S16 to continue excavation in other areas. Dave mentioned that he will submit final report by end of 09/13/10. David S. Glass TRC Ph. (212) 221-7822 ext. 112 (516) 330-2671 (C) Fax (212) 221-7840 email: dglass@trcsolutions.com 4:15 PM:- sent email to Dave approving excavation backfilling in area of grid boxes S9/S16.
08/30/10-Hiralkumar Patel. 3:58 PM:- received call from Charles from TRC. they backfilled excavation in grid boxes S9/S16 and excavated area in grid box S18. found contamination to water table. excavation measured 25 ft long by 17 ft wide and 23 ft deep where groundwater was found. Charles mentioned that no sheen was observed on water in excavation. asked Charles to check soil below water table (by removing one or two more buckets under water level) for any contamination. Charles mentioned that three of the sidewalls looks clean, but the southwest sidewall, which is along 4th ave, still has some odor in it, but they can't dig more as area close to 4th ave. Charles will collect four sidewall soil samples and one bottom groundwater sample. informed Charles that excavation should be backfilled immediately after collection of endpoint samples, if it is not safe to leave open. Charles will submit endpoint sample results once available. also submit a remedial action plan, if any contamination found in endpoint samples. 09/08/10-Hiralkumar Patel. 2:41 PM:- received email from Charles including results of endpoint soil and groundwater samples from excavation of grid S18. James mentioned that petroleum impacted soil was found in an area of approximately 17 by 25 and was removed to the approximate elevation of the water table (23 bgs). on August 31, 2010, TRC collected four (4) sidewall soil samples and one (1) groundwater sample from the bottom of the excavation. no VOC contamination found in soil or groundwater sample. found some minor SVOC contamination in soil sample from south sidewall only. Charles will submit complete closure report by 09/30/10. 09/30/10-Hiralkumar Patel. 10:50 AM:- received email from Charles including spill closure report. based on available information, case closed."

Remarks: "Contaminated soil during excavation."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Tank Info:

Tank Number:	001
Tank Id:	61265
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

G02 - Tank Secondary Containment - Vault (w/access)
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
L00 - Piping Leak Detection - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
E00 - Piping Secondary Containment - None
I02 - Overfill - High Level Alarm
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None

BKLYN HS OF THE ARTS (OLD S J HL BROOKLYN(K655) (Continued) **A100178501**

B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/2001
Capacity Gallons:	10000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	DMPOKRZY
Last Modified:	04/14/2017

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

APARTMENT BLDG (Continued) **S111456952**

prepared closure report.Four subsurface soil samples were collected from the boiler room. During the investigation, soil was screened with PID. CES did not observed visual or olfactory evidence(odors,staining,sheen or PID response) of petroleum impacts.The soil sample analytical data indicates typical detection of semi volatiles,SVOCs associated with historic urban fill.(sr)"

Remarks: "stong smell of oil in buildings from a spill at listed address."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "12/12/2011 Responded to the site on 12/11/2011 evening. Two 275 gallon AST in the basement. Oil delivery was made on 11/18/11 approx. 204 gallon, as per home owner Shirley Tam. On 12/11/2012 morning they discovered oil smell in the basement and called Petro Oil. Petro came to the site and found oil all over the concrete. Petro put down some speedy dry and identified the cause of the spill as nozle failure at the bottom of the tank. Home owner called Milro Environmental to clean up the spill. Milro did not show up during my presence,they were en route. Home owner(9174428735) was at the site waiting for Milro. I called Shirley Tam this morning and she said Milro came to

TAM RESIDENCE (Continued) **S111456936**

the site and recovered all free prodcuct. Milro sending proposal to remove all contaminated debris.(sr) 5/30/14 - Austin - Spill transferred from Rahman to Mahat for followup to assure cleanup was completed - end 6/5/15: Mahat DEC Mahat talked to the Home Owner (Shirley Tam @ 917.442.8735) confirming that the clean up was performed on the basement and there is no on going issue with on the basement. No further investigation is warranted by the Department. "

Remarks: "all over concrete - cleanup pending -"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

SPARTAN DISMANTLING CORPORATION (Continued) **1016079437**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"09/07/10-Hiralkumar Patel. spoke with Richard (at 10:05 AM on 09/04/10). Richard mentioned that a broken machine was located in

IESI (110 5TH ST.)(SPARTAN DISMANTLING INC) (Continued) **S110540477**

front of 22 2nd ave. this machine was leaking fluids. and then someone moved that machine to in front of 110 5th street and leaked fluid along the way. visited site this morning. met Richard. found an old excavator in front of 110 5th Street. found strech of oil stains on asphalt street from the intersection of 5th street and 2nd ave to the location of excavator in front of 110 5th street. found minor oil spill around tracks of the excavator. spoke with Hasan, person working in the garage at the 110 5th street site. Hasan mentioned that when he left garage friday evening, nothing was there, but the excavator was in front of garage on saturday morning. as per Richard, Jack Marmursteio (718-875-8200) owns the exacavator. but Jack denied that and doesn't know who owns it. found information written on machine which includes 'Precinct 76' and 'Row Tow' with date 09/03/10. spoke with operator at precinct 76 (718-834-3211), who confirmed that they had received a complaint of an abandoned machine and they put tag for tow company to remove it. as per retire NYPD officer, generally sanitation department removes these kind of abandoned vechicles to junk yard. but looks like someone moved the machine before sanitation removes it. spoke with NYPD operator again and informed him about new location of machine. he confirmed that machine will be removed, but doesn't know when. after discussing with DEC Austin, case closed."

Remarks: "Caller advised that approximately 10 gallons of hydraulic oil and 10 gallons of diesel fuel spilled onto roadway spanning a 2 block area from 22 2nd ave to 110 5th st."

RESIDENCE OF ADAM STEIN (Continued) **S121119921**

Spiller Name:	ADAM
Spiller Company:	HOMEOWNER
Spiller Address:	163A 14TH ST
Spiller Company:	999
Contact Name:	ADAM
DEC Memo:	"10/24/17 TJD Follow-up call to property owner went straight to voicemail. No answer at Petro line - no voicemail set up. 10/25/17 TJD Teleconference with Elvira at Petro. No alternate number available for property owner - no further information available at this time. Confirmed current status - 2 gallon leak to basement floor - leak stopped and Milro retained for pump-out of tank - unknown status. Another call to property owner went straight to full voicemail. AH Secondary (Lakhani) was dispatched to location for inspection. Received call from 516.512.3258 - wanting to know who was calling - caller identified herself as Shiva and requested DEC to call another number for Adam Stein (646.306.8046). Spoke with Adam - he is owner/absentee landlord - does not have much information - his tenant (Juan Pablo 773.517.8230) called due to odor and Adam called Petro - he has no further updates. Advised Adam that DEC responder was enroute for inspection due to lack of information regarding complaint. Adam states there are no children or at risk individuals at this residence. He confirms that his tenant is complaining of odors. Heat and Hot water are separate - only heat is affected. Property owner will be following up with Petro for tank replacement. AH Primary (DeMeo) updated Lakhani on new information and provided tenants contact information. Lakhani is enroute for inspection. 10/25/17 - Lakhani DEC Lakhani visited the site to conduct an inspection. Juan Pablo, the tenant (773-517-8230), informed me that the spill was noticed on 10/24/17 at 6:00 PM. Upon inspection of the basement, where the tank was located, there was minor oil staining on the floor that suggested that no more than 2 gallons had leaked to the concrete. There is no more leak. The concrete is intact. The oil seems to have affected a drain, however the drain is not piped and is sealed with concrete. There is a holding tank outside in the front yard to which Milro pumped the oil to. Speedy dry was spread onto the affected concrete area. Juan stated that minor odors were noticed in the home. Spoke to Milro Dot and she informed that they just pumped the tank out into a temp tank located in the front yard of the property. DEC Lakhani informed Dot that no cleanup is required on Milro's end. DEC Lakhani asked Dot to contact the owner only for a tank replacement. Spoke to Adam, the owner (646-306-8046), and informed him that he can complete the cleanup himself. He informed that he will either replace the tank or convert to gas. Adam will inform DEC Lakhani which option he chooses. 11/07/17 - Lakhani Spoke to Adam Stein and he informed that he has chosen to replace the tank. A temporary tank has been set up on the property. He expects a tank to be installed on 11/08/17 by Petro. 11/08/17 - Lakhani Milro Dot called to inform that upon their site visit, one of the tenants were complaining of odors in the home. DEC Lakhani called Juan and he informed that there is a faint odor in the home that has been affecting Juan's wife. DEC Lakhani visited the site and met with all of the tenants of the building (Stephanie, Juan, Ken) since they were all complaining of odors. Stephanie complained about observing odors as she enters the building. Those odors could very well be attributed to the temporary tank that was installed in the front yard beside the stairs leading to the entrance. Ken is the tenant that lives in the upstairs unit with his wife. Ken's wife complained about odors. Odors

RESIDENCE OF ADAM STEIN (Continued) **S121119921**

has dissipated since the complaint. Neither Stephanie and Juan nor Ken are experiencing odors in their respective apartments. DEC Lakhani informed Adam of the complaints and asked him to take appropriate measures to mitigate odors in the future. 11/15/17 - Lakhani Adam Stein called to inform that the cleanup is complete. The cleanup was completed by Royal Painting. Called Milro Aileen to allow a replacement tank to be installed. Milro will schedule a date with Adam. 11/29/17 - Lakhani Milro informed that the tank installation was scheduled today. Two (2) 120 gallons tanks are being installed on the property. 12/04/17 - Lakhani Milro sent the tank installment contract. Tank installation was completed on 11/29/17. Two (2) 120 gallon ASTs were installed in the basement along with new lines, oil filter, and 2 vent. The fill was repiped and the product was transferred to the new tank. The 275 gallons tank was removed from the property. Adam sent a picture of the newly installed, manifold 120 gallon tanks. Spill is closed."

Remarks: "mill ro en route for pump out. active leak."

DER Facility ID:	247328
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 8/23/99 - Sangesland spoke with owner Miki . She said she is trying to sell the building and the tank failed. She is taking the tank out and switching to gas heat. She has hired D&D Plumbing & Heating (718-436-6698) to remove the tank and switch to gas. Sangesland told Miki to call the DEC 1 or 2 days before work will be done. DEC needs to see the hole after the tank is removed and before it is backfilled. 9/1/99 - Jim from State Environmental said he opened the tank and tested the tank and the lines seperate. He found the problem in the neck of the tank. There was a bad weld, but since it was on the top of the tank there was no leak of oil to the ground. He saw no evidence of soil contamination in the area that was dug away. Sangesland asked him to submit a statement saying 1) The tank past the soundness test, 2) The problem was a weld line in the neck of the tank, 3) no contamination was found. Sangesland gave permission to close out the tank in place. The building is being converted to natural gas heat. 9/22/99 State Environmental sent an afidavit saying no contamination was found and the site is clean. Closed"
Remarks:	"GROSS FAILURE. TANK WILL BE PUMPED OUT AND RETESTED."

FINDS:

Registry ID: 110067708715

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number:	001
Tank Id:	16562
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

L09 - Piping Leak Detection - Exempt Suction Piping
E00 - Piping Secondary Containment - None
C00 - Pipe Location - No Piping
J00 - Dispenser - None
I04 - Overfill - Product Level Gauge (A/G)
F06 - Pipe External Protection - Wrapped
G00 - Tank Secondary Containment - None
F02 - Pipe External Protection - Original Sacrificial Anode
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"1/17/2008 - Obligado - Desk Duty - I spoek to Mr. Mark Elmendorf 516 398 9066. They were doing due diligence soil broings. At 15 ft bgs, there is indication of petroleum contamination in one boring location. There used to be tanks in that area. They will be doing more investigation to delineate the extent of the contamination. Morleff Realty is the RP. He will submit RP info tomorrow morning. 1/22/18 - Obligado - I called Mr. Mark Elmendorf. He will email the report to Hiralkumar Patel. 01/31/18-Hiralkumar Patel. 11:33 AM:- received email from DEC Andre including email from Mark with copy of Phase II report. 12:31 PM:- sent email to Mark and asked him to submit Phase I report for review. 12:58 PM:- received email from Mark including link to Phase I report. summary of Phase I report dated 11/30/2017: - subject Phase I study included following lots on block

MORLEF REALTY - PHASE II (Continued) **S121463874**

#: 198: 47, 22, 23 and part of 48 (approx. 175 ft of the eastern end of the lot 48 to be retained) --------- - site consists of a parking lot for taxis (western half of lot 48) and small vacant lots under residential zoning (lots 47, 22 and 23) - eastern half of lot 48 is utilized as 1-story commercial building consisting of a taxi garage with a full-service mechanic shop with a spray chamber - three 4,000 gal USTs and four 550 gal USTs that were removed from the property (which lot/location??) ---------- - visual inspection of two ASTs (possibly one active and one inactive), located on a concrete platform on outside of the site building - staining was noted around the active AST on the concrete platform it is sits on - grade at the site slopes to the west-southwest - median elevation of the site is approx. 29 ft above mean sea level ---------- - nearest surface water body is the Gowanus Canal, 0.5 miles to the southwest - site was developed as currently configured by sometimes prior to 1965 and once included residential listings noted as early as 1888 - the taxi garage/repair shop is in operation since at least 1976 - repair shop contains a spray chamber on eastern end of the shop - seven hydraulic lifts, with seven underground tanks, are located in auto body shop ---------- - there are two gasoline tanks depicted on Sanborn maps, inside the garage adjacent to the Bergen St, from 1926 through 2007 ---------- as per tank removal affidavit included in Phase I report, three (3) 4,000 gal USTs were removed on 10/11/2004. ---------- summary of Phase II report dated 01/22/18: - seven (7) soil borings (SB-1 through SB-7) were installed - soil boring locations were hand cleared to a depth of 5 ft bg - borings SB-1, SB-5, SB-6 and SB-7 were installed to a depth of 15 ft bg and one composite soil sample (from 5 to 15 ft bg) was collected from each of these borings - no sings of contamination noted in borings SB-1, SB-5, SB-6 and SB-7 except 33 ppm on PID at about 4 ft bg in boring SB-1 - borings SB-2, SB-3 and SB-4 were installed to a depth of 20 ft bg - two soil samples were collected from borings SB-2, SB-3 and SB-4: one composite samples from 5 to 15 ft interval and second sample from 15 to 20 ft interval - field observations (PID/olfactory) suggests presence of contamination in borings SB-2, SB-3 and SB-4 - site is underlain by historic fill material to a depth of at least 15 ft bg --------- - temporary wells were installed in borings SB-2 (at 20 ft bg), SB-3 (at 25 ft bg) and SB-4 (at 25 ft bg) - no groundwater found in temporary wells in borings SB-2 and SB-4 - found colored liquid with a strong hydrocarbon odor in temporary well at boring SB-4 ---------- - liquid from boring SB-4 was collected but not sent for lab analysis ---------- - groundwater sample was collected from temporary well at boring SB-3 - soil samples were analyzed for SVOCs, VOCs, metal, PCBs and pesticides - groundwater sample was analyzed for VOC only soil analyticals (in ppb):
----------SB-1----------SB-4----------SB-4 5-15 ft 5-15 ft 15-20 ft
Benzene----------320----------260
Toluene----------2,400---------2,000
Ethylbenzene----------2,300---------5,500
Xylene----------11,000--------12,000
1,2,4-Trimethylbenzene----------6,800--------29,000
1,3,5-Trimethylbenzene----------1,700---------5,900
Naphthalene----------15,000---------2,000---------4,300
groundwater analyticals (in ppb): ----------SB-3
Benzene----------820 Toluene----------400
Ethylbenzene----------2,000 Xylene----------8,300

MORLEF REALTY - PHASE II (Continued) **S121463874**

1,2,4-Trimethylbenzene-----2,500 1,3,5-Trimethylbenzene-------600 Naphthalene------------------570 result shows presence of contamination in borings SB-3 and SB-4 which were installed south-central section of lot # 48, along Bergen St. Mark Elmendorf Roux Associates, Inc. Ph. (631) 232-2600 (631) 630-2384 (516) 398-9066 (C) email: melmendorf@rouxinc.com 02/02/18-Hiralkumar Patel. alternate addresses for involved lots: - lot 22: 336 Dean Street - lot 23: 338 Dean Street - lot 47: 343 Bergen Street - lot 48: 311-341 Bergen Street as per NYCDOB record, lots # 47 and 48 have 'hazmat' environmental restriction. ---------- as per NYCDOB record, a permit application was approved on 12/12/2012 for lot # 48 for installation of a spray paint booth on first floor. ---------- as per NYCDOB record, a permit application was approved on 05/04/2000 for lot # 48 for removal of three (3) existing USTs and associated piping, and installation of two (2) new 4,000 gal USTs and piping. ---------- PBS #: 2-247685 for lot #: 48. as per PBS record, lot #48 has/had following tanks: - two (2) 4,000 gal gasoline USTs, removed in Jun. 2000 - one (1) 4,000 gal gasoline AST (10% or more underground), removed in Jun. 2000 - three (3) 275 gal lube oil ASTs in contact with soil, in-service, installed in Sept. 1982 - one (1) 275 gal waste oil AST on legs, in-service, installed in Mar. 2009 other spill # 9706573 was reported for lot # 48 on 09/02/1997 as 20 gal gasoline spilled due to overfill. case closed. site has 'e' designation for 'hazmat'. Morlef Realty Corp. **owner for lot 48** 341 Bergen Street Brooklyn, NY 11217-1909 Attn.: Warren Prosky Ph. (718) 858-3502 email: w1234p@aol.com R.A.L. Realty Corp. **owner for lot 22, 23 and 47** 2:21 PM:- left message for Mark. 2:34 PM:- received call from Mark. inquired him about reason for conducting Phase I/II investigations, PID values listed in boring log for SB-4 (which reads 15 000 ppm below 5 ft depth), reason for not analyzing liquid sample from SB-4, DOB permit application for installation of two new 4,000 gal USTs, former UST location and tank closure report. property owner has conducted subsurface investigation to know site conditions and there is no plan of selling or redeveloping the site at this time. Mark will check field notes to confirm soil screening results during installation of SB-4. he mentioned that liquid collected from soil boring SB-4 was not sufficient and had strange characteristics. as such, liquid sample was not analyzed in the lab, but they are planning to install a permanent monitoring well at boring location SB-4 to further investigate this. he is also planning to install soil borings around SB-4 to delineate soil contamination. Mark stated that owner had not installed the two USTs and now use off-site facility to fuel their vehicles. Mark has asked property owner for tank closure report, but owner could only find tank removal affidavit. property owner claims that samples were collected after removal of three USTs. the former USTs were located in south-central portion of the site, along Bergen St, in area where soil borings SB-3 and SB-4 were installed. informed Mark, that based on review of available information , the Department requires complete delineation of soil and groundwater contamination via installation of soil borings and minimum of three permanent wells. suggested him to install one well at the former boring location SB-4, and two other wells on Bergen Street sidewalk (one towards eastern side and one towards western side of the property). Mark will discuss with client and will submit a written work plan. 3:11 PM:- sent email to Mark and asked him to submit following: - correct boring log for SB-4 - scaled site plan including boring locations and current/former tank systems

MORLEF REALTY - PHASE II (Continued) **S121463874**

including piping - delineation work plan email copied to Mr. Prosky. 02/12/18-Hiralkumar Patel. 2:36 PM:- received email from Mark including an investigation work plan proposing: - installation of five soil borings in the former tank grave - hand clearing of boring locations to a depth of 5 ft bg - collection of one composite soil sample from each boring - collection of additional soil samples, if soils exhibits evidence of impact (elevated PID/odor/staining) - installation of three (3) 2-inch monitoring wells: one in former tank grave and two on sidewalk - collection of groundwater samples from proposed wells - 8260/8270 analyses of soil and groundwater samples a revised work plan is needed as the submitted work plan is considered incomplete for following reasons: - no specifications on depth interval for composite samples - plan assumes boring depths will be less than 20 ft, but contamination was noted at 20 ft depth in boring SB-4 - no discussion about soil screening or sampling during installation of monitoring wells 02/13/18-Hiralkumar Patel. 9:39 AM:- spoke with Mark. he confirmed that 15,000 ppm was recorded on PID in soil boring SB-4. asked him to submit a revised boring log. asked Mark about square boxes noted on eastern side of lot # 48. he mentioned that as per property owner, there were smaller tanks located in that area and boring SB-2 was installed to investigate any impact from the former tanks. no contamination was found in boring SB-2. inquired Mark about soil screening procedure during subsurface investigation. he mentioned that they screen soil in 5 ft intervals and collect composite samples from one or two 5 ft intervals depends on field screening results. asked Mark to collect soil samples from highest PID/field indication of contamination, and from a deepest dry zone. asked him to screen and sample soil during installation of both soil borings and monitoring wells. informed him that the department requires complete delineation of contamination. as such, borings may need to be installed beyond proposed 20 ft depth (vertical delineation) and additional borings/wells (horizontal delineation) may be needed. Mark stated that a scaled site plan (instead of an aerial pic) will be submitted with the investigation report. 9:56 AM:- sent email to Mark and asked him to submit a revised work plan including following: - clarification on soil screening procedure - soil screening during installation of soil borings and monitoring wells - collection of soil samples from soil borings and monitoring wells: one at the highest PID/field indication of contamination and second from deepest dry zone - collection of groundwater samples from soil borings were contamination extends to water table, and from three proposed monitoring wells - complete delineation of contamination which may require additional soil borings/wells, and soil borings beyond assumed depth of 20 feet below grade - well survey to define site-specific groundwater flow direction 11:49 AM:- received email from Mark including a revised work plan. 12:31 PM:- sent work plan approval letter to Mr. Prosky. letter emailed to Mr. Prosky, Mark and DEC Zhune. case assigned to DEC Zhune (day-time runner on 01/17/18). **e-designated site.** 2/19/16-NYSDEC Requested Delineation Investigation. Following the spill report, The NYSDEC requested that the contamination found on Site be delineated. The requested scope included seven additional soil borings and three permanent groundwater permanent wells. Roux complete this work February 19 through 21, 2018 and sample the monitoring wells on March 5, 2018. Contaminated soil was found in SB-8, SB-10, SB-11 and SB-12. No exceedances were detected in soil from MA-2, MW-3 and SB-9. 5/14/18-The New York State Department of Environmental Conservation

MORLEF REALTY - PHASE II (Continued) **S121463874**

(the Department) has received and reviewed the NYSDEC Requested Additional Phase II Environmental Site Assessment and the Remedial Action Work Plan (the RAWP) dated May 3, 2018, submitted by Roux Environmental Engineering and Geology, for the above referenced site. The Department does not approve the RAWP and requires resubmission within 30 days from the date of this letter including the following: 1. The Department recommends additional injection points around MW1 with geoprobe. 2. Quarterly groundwater sampling for 1 year minimum post application. 3. Provide ORC dosing spreadsheet. 4. Follow EPA UIC notification protocol. 5. ORC pellets should mixed into the soil with excavator to promote contact If you have questions or comments please contact my supervisor Andre Obligado at 718-482-612 or via email at andre.obligado@dec.ny.gov. 6/11/18 - Obligado - Roux provided an amended RAP which addressed the above comments. I sent a RAP approval letter. 5/25/2018-Mark Elmendorf email-Roux Associates, Inc. has revised the referenced RAWP and provided a reply to each of your comments below. Please contact me if you have any questions. Thank you. Comment- The Department recommends additional injection points around MW1 with geoprobe. Reply- The RAWP includes installation of ORC Advanced Filter Socks will be installed within MW-1. The filter socks are permeable fabric filled with ORC Advanced controlled-release oxygen material designed to localize treatment for low-level, dissolved-phase petroleum hydrocarbons. Ten feet of socks will be installed to cover the ten-foot screen within MW-1. This action will address potential residual contamination in MW-1. The treatment will continue for 1-year. Comment- Quarterly groundwater sampling for 1-year minimum post application. Reply - Agreed Comment- Provide ORC dosing spreadsheet. Reply- The spreadsheet is provided Comment - Follow EPA UIC notification protocol. Reply- A review of the action and discussions with EPA indicate this is not applicable to the scope of the RAWP. Comment - ORC pellets should be mixed into the soil with excavator to promote contact. Reply- Agreed 7/11/1-Mark Elmendorf email- The schedule for the RAWP is to start site prep on July 16, 2018. Excavation should start on the 17th or 18th once asphalt is removed from area. 10/1/18-Roux sent the Remedial Action Report dated 8/23/18. The report stated that On July 16, 2018 Roux began excavation within the delineated area with the greatest levels of contamination at the site. The excavation consisted if two areas approximately 20 feet by 40 feet to a depth of 15 feet. The excavation was sampled and backfilled. Roux field personal applied Regenesis ORC Advanced Pellets a bioremediation additive, prior to back filling the excavation areas. The pellets were mixed into the soil using the excavator bucket to promote contact with groundwater, after which oxy-hydroxide based ORC advanced pellets produce a control release of molecular oxygen (up to 15% by weight) for periods of up to 12 months on a single application. Oxygen is required by microorganisms to transform organic (such as petroleum hydrocarbons) into carbon dioxide, water and microbial cell mass. To further address the contamination found within the work area, ORC Advanced Filter Socks were installed within MW-1. As requested by the NYSDEC, post excavation soil samples were collected and sent to Alpha Analytical. All samples were analyzed for volatile organic compounds (VOCs)via USEPA Method 8260 and semi volatile organic compounds (SVOCs)via USEPA Method 8270. The analytical results indicate the following VOCs above the standard (EP-1 Total Xylene 465 ug/kg),(EP-4 2200 ug/kg), (EP-5 1,2,4 Trimethylbenzene 270000 ug/kg, 1,2,5 Trimethylbenzene 74000 ug/kg, benzene 2700 ug/kg, Ethylbenzene 7400,

MORLEF REALTY - PHASE II (Continued) **S121463874**

Naphathalene 4900 ug/kg, T.Xylene 500000 ug/kg, (EP-6 Ethylbenzene 3400 ug/kg, benzene 140 ug/kg, T. Xylene 5400. (EP-7 Ethylbenzene 5100 ug/kg, T, Xylenes 38900 ug/kg). One year of quarterly groundwater sampling has been scheduled following of the ORC Advanced Pellets to monitor groundwater conditions at the site. The first sampling event is to be completed on August 24, 2018. 10/29/18- Mart Elmendorf emailed the first quarterly groundwater monitoring dated October 18, 2018. As noted higher concentrations of VOCs(1,2,4 trimethylbenzene, benzene, ethylbenzene, isopropylbenzene, T. Xylene, naphatalene, n-propylbenzene, toluene) were observed in MW-1 and MW-2. The second quarterly groundwater monitoring event will take place in November 2018. 11/5/18- A letter dated 11/2/18 with the following requirement was sent to Roux Asosciated. 1. Installation of two wells one well downgradient of monitoring well MW2 in the siewwalk across the street and one well west to MW2. "

Remarks: "during soil borings contamination was found. No tanks in place."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 4/23/03 TJD Site visit. Failed suction line cause discharge of approx. 20 gallons #2 Fuel Oil to be released onto dirt basement floor at above private residence. 275 AST at this location. Owner of property lives in Texas (Mrs. Dechillo 512 327 7996). Mrs. Dechillo was contacted at her Texas home and notified of situation. She was instructed to retain a contractor to remediate soil contamination from petroleum release. Super/Mgmt. Agent: Lino (718 243 1135) called Demeo for guidance. Lino purchased ventilation fans from Home Depot to mitigate petroleum vapors in 1st floor Tenants apartment. Tenants are Michael and Sara and their 6 week old son (718 237 3009). PTC has been retained for dig out, work to begin 4/24/03. 11/17/05 spoke to Lino who said PETRO replaced tank and he would get a copy of the report to me. J Lister 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Rahman) for review and closure - end 06/17/09 Performed site visit on 06/17/09, could not get access as nobody was home.Fill line and vent pipe IFO of the building. Need to send CSL.(sr) 06/18/09 CSL was sent to De Chillo Joan L (address taken from property shark) 8334 Talbot Ln Austin, TX 78746-4915 07/01/09 Rec'd call from Avelino Tubio-cid.His cell phone # is (917)916-1903. He called me on behalf of his sister, who is the owner of the property.He will forward me the available spill clean up

RESIDENTS (Continued) **S106013417**

documentation.(sr) 07/17/09 Performed site visit this morning. Mr. Avelino(917-916-1903) showed me the AST and spill area. There was no visual or olfactory evidence of spill present at the time of my inspection. Basement floor is exposed. Mr. Lino indicated that they removed all contaminated dirt and repaired the old suction line when the spill occurred in 2003. Case closed.Invoice in edocs.(sr)"

OIL LINE UNDER CONCRETE (Continued) **S109829181**

Spiller Address:	Not reported
Spiller Company:	999
Contact Name:	AUGUST SPIELER
DEC Memo:	"08/31/09-Vought-Primary off hours responder. Vought called and spoke to homeowner (Mr. August Spieler 646-223-0366) and hot water for builing was no longer functioning and as a result Petro was called and Petro replaced fuel line that runs under concrete with line that runs above concrete. Spieler indicated that he was not onsite however he had not received any odor complaints from tenants to date. Spieler indicated he was very busy and asked Vought to return call on Monday. Vought spoke to Spieler who went to site and new line was put in. Spieler also plans to convert to gas from oil that is going to start on 9/21. Entire basement is concrete. No major losses invetory. Tank is 275-gallon #2 fuel AST. Vought discussed jackhammering of concrete during conversion to natural gas and site visit by Vought to inspect trench for exacavated supply/return line. DEC requires: 1)CSL with two month due date. CSL sent to: August Spieler 114 West 29th ST 3rd Floor New York, NY 10001 email:jspieler@stoneparts.net 09/04/09-Vought-Received email from Spieler that excavation of the line was completed and he would like to schedule site visit. Vought called and spoke to Spieler and arranged tentative time and date of today at 2pm. Spieler will return call to Vought with confirmation. Vought received confirmation from Spieler and site visit to be performed by DEC Patel due to proximty enroute to home. 09/04/09-Hiralkumar Patel. 2:30 PM:- visited site. met Spieler. old supply line was about 6 inches below surface. no sign of leak or subsurface contamination observed along old supply line. Soil under line had no staining or olfactory signs of spill. 09/15/09-Vought-Mr. Spieler arrived at DEC offices requesteding SCL letter due to refinancing. Vought completed letter and gave original to Spieler."
Remarks:	"Oil line leaked under concrete pad. Customer August would like a call back."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHITOMIRSKY 4/10/03 transferred from tipple to Zhitomirsky, ddc project 10/06/05 Dual phase system is operating at the site. AZ 8-1-2007 Reviewed Monitoring Report for October 2006-March 2007 dated May 24, 2007. The report stated that the previous round of gw sampling conducted by LirO on November 16, 2005, indicated that VOC soil contamination was successfully remediated and that SVOC soil contamination was removed to the residual levels. The residual low-level VOCs and SVOC remaining in MW-20 (less than 200 ppb) can likely be attributed to an offsite source as this well is located in the extreme southern corner of the site and is side-gradient. Free phase was detected only in MW-19 (separate phase of transmission oil). The source of transmission oil is most likely from the current tenant(a private bus company).The product first appeared after the bus company commenced operations at the site. At the meeting with Greyhawk on May 30, 2007, DEC requested from DDC a memo summarizing site activities and information obtained on the new contaminant (transmission fluid). AZ 11-9-2010 Based on the LiRo report and investigation it was concluded that NYCDDC successfully remediated this spill. However, there is a new spill at the same property which will be remediated by another responsible party (spill#0601840). After consultation with J. Urda spill #0000664 is closed and further remediation will be tracked under spill#0601840. the following e-mail was sent to V.Brevdo, J. Urda, Fatemeh Ashkan and S. Frank: Dear Steve, Based on the LiRo report dated May 2007 and DEC's investigation, it was concluded that NYCDDC successfully remediated spill #0000664. However, there is another spill (spill#0601840) associated with the same property which will be remediated by another responsible party. After consultation with J. Urda, spill #0000664 is closed and further remediation will be tracked under spill#0601840. The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I.The off-site migration of petroleum contaminants that was not addressed by this evaluation. II. Environmental conditions related to the Site which were unknown to the Department at the time of this approval. III.Information received, in whole or part, after the Department s approval for inactivation, which indicates that inactivation decision and/or corrective action is not sufficiently protective of human health for the reasonably anticipated use of the site. IV.Fraud in obtaining this approval for inactivation. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use. The Department s files regarding this release may not be maintained indefinitely. AZ "

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

1/11/2016: Mahat Owner's Information ***** Source DOB Website Name:RAFAEL MANOR Relationship to Owner: Business Name:316 CARROLL STREET VILLA LLC Business Phone:718-355-8877 Business Address:124-06 METROPOLITAN AVENUE KEW GARDENS NY 11415 Fax:718-441-1926 E-Mail:MREMOD2014@GMAIL.COM 1/12/16: Mahat Site Visit: DEC Mahat responded to the site and perform an investigation on the chemical smell complaint. No chemical, oil, gasoline or other nuisance odor was observed. Site used to be a Motorcycle repair shop and it is under redevelopment for a 4 stories residential building. DEC Mahat interviewed Mr. Dayshaun Williams (Guard - 929.341.7141) on the site. Based on the site visit, the Department does not warrant any further investigation. Pictures from the site visit will be uploaded on D2 for reference. Spill case is closed on NYSDEC Spill Database. "

Remarks: "New Construction, used to be a gas station. Smells like chemicals."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MILLER 07/03/08: This spill case transferred from S. Miller to J. Kolleeny. Spill was called in by Dan Weissman of DEC, no contact information available for occupant of residence where vapors were detected. Based on absence of additional complaints about this site over past 13 years, it seems unlikely there is any long-term impact. After conferring with supervisor Vadim Brevdo, this spill is closed. - J. Kolleeny "
Remarks:	"VAPORS IN RESIDENCE"

Description:	Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

DEC Memo:	"11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 7/11/13 - Raphael Ketani. I made a site investigation today in order to check and see whether oil was still seeping into the station. I tried to find column #344 + 40. However, there are 2 Atlantic Avenue stations in downtown Brooklyn. At first, I checked the station served by the B,Q,2,3,4,5 trains. I walked all 3 platforms, but didn't find the column. The few column numbers I did find started with 1 - as in 156 or such. However, there were no signs of oil leakage. I went over to the station served by the D,N,R trains. Once there, I met a NYCT

ATLANTIC AVE STATION-BARCLAY CENTER (Continued) **S106968135**

worker who showed me where the #4 track was. However, there were no column numbers. I looked up at the ceiling over track #4 and saw two large dark areas. They appeared to be oil stains and the stains descended down the wall separating this track from the adjacent one. One stain was entirely black, but the other had orange coloration. This suggested that groundwater had also been seeping into the subway at this location. I took four pictures. I then went to the platform on the other side of this wall and saw another large dark stain which ran from the ceiling over the track and down the separating wall. I took a picture. The stain also contained some orange coloring which suggested that groundwater had also been seeping through the ceiling. At all three locations, there were no signs of current seepage. Also, at all three locations, the tracks and their beds were free of oil. There were no oil odors, either. 7/19/13 - Raphael Ketani. I made an unannounced site visit to the street above the Atlantic Avenue station. I looked at both sides of 4th Avenue in the vicinity of the intersection of 4th Avenue and Pacific Street. I did not see any fill ports or vent pipes. I assumed that every store had gas service. 8/7/13 - Raphael Ketani. I presented the spill case for closure to Hassan Hussein, E.E. III and head of Unit C in Region 2. I explained to him what I had found during my inspections and that the seeping was not presently active and that the source had never been found. He gave me permission to close the spill case. As the spill had stoped flowing from wherever the source had been, and as no oil was presently impacting the public or the physical structure of the station, I determined that there was no threat to the public or the environment. Therefore, I closed the spill case effective today. "

Remarks: "COLUMN # 344 + 40: APPEARS TO BE COMING OUT OF THE EAST WALL AND ABOUT 20 FEET UP;"

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHITOMIRSKY 7/7/2005 Reviewed Quarterly Monitoring Report. Numerous extraction wells and sections of the header piping are plugged and require replacement. LiRo has installed the new extraction wells and prepared a design and bid out the connection of the new wells to the header piping. AZ 8/8/2005 Reviewed a Monitoring Report for the above referenced site received on July 15, 2005. The report presented remedial system performance and groundwater monitoring data. The report stated that based on the site monitoring data, the MPE system is effectively treating contamination. LiRo recommended that several extraction wells be turned off in order to increase the system?s vacuum influence in the remaining area of soil contamination. However, the report did not include a map showing the area of soil contamination. Future requests to shut down extraction wells should be accompanied by such maps. At this time, the Department concured

BROOKLYN NORTH 02 DOS -DDC (Continued) **S110612335**

with the shutdown of wells EW-2 and EW-3. AZ 11-7-2005 New extraction wells were added and significant increase in influent VOCs has been achieved. AZ 12-13-2005 Reviewed system monitoring report dated 10/11/2005. Facility is located next to Gowanus Canal. GW and soil sampling are scheduled for November. EW-11,9 and 10 remained blocked. Water level in the extraction wells dropped below the level of drop tubes reducing the quantity of gw being treated. AZ 2/13/2006 Reviewed system monitoring report dated 11/16/2005. Facility is located next to Gowanus Canal. EW-11,9 and 10 remained blocked. Induced vacuum measuremnts at monitoring wells inside the estimated area of contamination ranged from 0.1 to 0.3 inches of water. LiRo recommends continued operation of the remediation system. AZ 4/5/2006 Reviewed system monitoring report dated 3/23/2006. Facility is located next to Gowanus Canal. EW-11,9,12 and 10 remained blocked. Induced vacuum measuremnts at monitoring wells inside the estimated area of contamination ranged from 0.02 to 0.11 inches of water. LiRo is no longer responsible for this site as of the end of December 2005. The site was transferred to Grayhawk. AZ 6/8/2006 At the meeting with DDC/Greyhawk/Roux on 5/23/2006 CM informed DEC that the system is shut down. CM will use the system to pump out transmission fluid from MW-19 and then monitor for the free phase for 2-3 weeks. MW-20 has 341 ppb total VOC (increase over last two years). AZ 7/7/2006 Received a correspondence from Andy Leddins.The current tenant is: 15 2nd Avenue Corp. 1 Second Avenue Brooklyn, NY 11215 Mr. Levin @ (718) 917-8215 On June 20, 2006 Greyhawk field team became aware that the existing wells on the north westerly side of the building were covered by a newly paved parking area. This pavement has covered both extraction wells as well as monitoring wells and is preventing contractors from executing our required monitoring efforts and maintenance of the existing remedial system. At this point they cannot access the existing extraction wells to assess if any damage has been done to the system. Greyhawk, therefore, has been forced to suspend the operation of a remedial system. It was Greyhawk intent to suspend the operation of this system in accordance with DDC/DEC May 23, 2006, meeting and petition that the system can be shut down. In the meantime the system will be secured and made ready to restart if necessary. In the meantime, Greyhawk/ROUX will also move forward on the NYSDEC directed task of removing as much hydrocarbon as possible (transmission oil) from MW-19 located within the building. After a collective review of the proposal during the May 23 meeting, NYSDEC suggested that Greyhawk/ROUX: Petition to suspend operations of the existing remedial system; Based on the groundwater contaminant levels identified ORC would not be necessary; Continue gauging the floating hydrocarbons in MW-19 and if necessary use enhanced fluid recovery to remove the floating product. Petition for closure of the site. (Note: If transmission fluid keeps appearing in MW 19 NYSDEC stated that it would consider issuing a new spill number to the existing tenant) Greyhawk/ROUX is presently executing the tasks recommended by NYSDEC at May 23rd meeting. AZ 12/12/2006 Reviewed Monitoring Report dated November 10, 2006, and received on November 20, 2006. The report covers period for July through September 2006. In compliance with the DEC's request to recover transmission fluid in monitoring well MW-19, on June 30, 2006, approxilamtely 70 gallons of fluid (of which less than one gallon was transmission fluid) were recovered using EFR. Potential point sources for transmission fluid observed in MW-19 are two vehicle maintenance pits located immeadiately downgradient of the well. The MPE sytem was shut down. Monthly well gauging is

BROOKLYN NORTH 02 DOS -DDC (Continued) **S110612335**

perfrommed. At NYSDEC's request, transmission fluid in MW-19 will continue to be recovered. MW-19 had 0.25' of product on August 9 and 0.15' on September 5, 2006, and it was fingerprinted as transmission fluid. 10 monitring wells were not sampled for a variety of reasons: 2 wells could not be found, 6 wells were paved over, one was located under a tire pile. VOCs were detected in six of the nine monitoring wells. MW-05 had total VOC concentration of 190 ppb. Benzene was detected in 5 wells and ranged from 1 ppb to 26 ppb. In MW-05 MTBE was the only VOC detected at a concentration of 190 ppb. The MPE system was hampered by mineral and silt build-up. Existing extraction and monitoring wells on the northwest side of the garage were paved over. GReyhawk proposed: permanently shut down MPE system, reduce frequency of sampling from quarterly to semi-annual, reduce gaugung to quarterly., inspect the vehicles maintenance pits and condition of the concrete floor adjacent to MW-19 to confirm whether the pits are a potential source of transmission fluid. Recommended also that DEC close out the existing spill and issue a new spill number to the current tenant for the transmisson fluid in MW-19. Remove MW-01R, MW-11 and MW-16R from the sampling program since no VOCs or SVOCs were detected in these wells for the last two consecutive sampling events. AZ 2/23/2007 Responded to Roux request regarding reducing sampling frequency. An e-mail was sent to Brian Morrissey (Roux): Sampling program could be reduced to semi-annual. Wells MW-01R, MW-16R, MW-02R and MW-17R could be removed from the sampling program. AZ 8-1-2007 Reviewed Monitoring Report for October 2006-March 2007 dated May 24, 2007. The report stated that the previous round of gw sampling conducted by LirO on November 16, 2005, indicated that VOC soil contamination was successfully remediated and that SVOC soil contamination was removed to the residual levels. The residual low-level VOCs and SVOC remaining in MW-20 (less than 200 ppb) can likely be attributed to an offsite source as this well is located in the extreme southern corner of the site and is side-gradient. Free phase was detected only in MW-19 (separate phase of transmission oil). The source of transmission oil is most likely from the current tenant(a private bus company).The product first appeared after the bus company commenced operations at the site. At the meeting with Greyhawk on May 30, 2007, DEC requested from DDC a memo summarizing site activities and information obtained on the new contaminant (transmission fluid). AZ 4-7-2008 Reviewed Monitoring Report for April-September 2007 dated December 21, 2007. Gauging and sampling was performed on August 3, 2007. 2.15' of transmission fluid was detected in MW-19. Approximately 0.1 gallon of transmission fluid was recovered from MW-19 using a peristaltic pump. According to Roux, the source is likely from the current tenant (a private bus company) since the product first appeared after the bus company commenced operations at the site. Roux detected transmission fluid in March 2006 but it had not been detected in this well since at least April 2005, which according to Roux indicates that the spill occurred sometime between April 2005 and March 2006. Potential point sources for the spill are two vehicle maintenance pits located immediately downgradient of the well. Wells MW-06R,MW-07R, MW-08, MW-09, MW-10, and MW13R have been paved over. MW-03R could not be located and MW-11 and MW-18 were inaccessible.The highest MTBE concentrations were encountered in MW-05 350 ppb. Roux will conduct semi-annual gw sampling. Install ORC sock in MW-05. Roux suggested permanently shut down MPE system and issue a new spill number to the current tenant. I have discussed the site with Brian Morrissey (Roux). DEC reiterated

BROOKLYN NORTH 02 DOS -DDC (Continued) **S110612335**

its request that a separate Memo to be submitted to DEC summarizing the information obtained on transmission fluid including detailed history of the site ownership, chronology of transmission fluid appearance, details of fingerprint analysis and the age of the spill and to clarify the address of the current owner. The site was discussed with John Urda and Vadim Brevdo. It was decided that upon receiving additional information from DDC regarding the transmission fluid spill and depending on its content, a new spill will be opened with a new responsible party will be opened. Also, a STIP will be sent to the bus company. AZ 4-7-2008 E-mail from B. Morrissey: As discussed earlier today, Greyhawk and Roux Associates will prepare a supplemental report regarding operations at the former Brooklyn North 2 Department of Sanitation (DOS) facility. The report will include a summary the following information: *Existing groundwater conditions *Remedial activities/ system operation *Product recovery activities/ EFR events *Details on discovery and monitoring of transmission fluid in monitoring well MW-19. *History of site ownership *History of DOS presence at site *Name of current owner and tenant We will prepare the technical information based on available information from our periodic monitoring and also from reports prepared by prior CMs on this project. In addition, we will send a request to the NYCDOS to obtain specific ownership information. The goals of this exercise are to close out spill number 9614826 and have a new spill number issued to the current tenant at the site for the transmission fluid detected in monitoring well MW-19. AZ 4-18-2008 e-mail from Roux: Greyhawk and Roux are preparing the requested letter report. We expect to send the report on Bklyn 2 to you by May 2, 2008. AZ 1-23-2009 Reviewed semi-annual report covering the period of October 2007 through June 2008. The report states that the transmission fluid detected in monitoring well MW-19 was most likely caused by the current property tenant due to poor housekeeping practices. Roux detected transmission fluid in MW-19 in April 2006. Several EFR (enhanced fluid recovery) events took place (June 30-2006 and February 9, 2007). Less than one gallon of transmission fluid was recovered each time. Total dissolved VOCs were encountered in 4 wells (total VOC concentrations were less than 200 ppb). I have discussed the site with Vadim Brevdo and Brian Morrissey (Roux). Next week Roux will submit additional info regarding the history and attribution of the transmission fluid spill to DEC. AZ 11-9-2010 Based on the LiRo report and investigation it was concluded that NYCDDC successfully remediated this spill. However, there is a new spill at the same property which will be remediated by another responsible party (spill#0601840). After consultation with J. Urda spill #0000664 is closed and further remediation will be tracked under spill#0601840. the following e-mail was sent to V.Brevdo, J. Urda, Fatemeh Ashkan and S. Frank: Dear Steve, Based on the LiRo report dated May 2007 and DEC's investigation, it was concluded that NYCDDC successfully remediated spill #0000664. However, there is another spill (spill#0601840) associated with the same property which will be remediated by another responsible party. After consultation with J. Urda, spill #0000664 is closed and further remediation will be tracked under spill#0601840. The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I.The off-site migration of petroleum contaminants that was not addressed by this evaluation. II. Environmental conditions related to the Site which were unknown to the Department at the time of this approval.

BROOKLYN NORTH 02 DOS -DDC (Continued) **S110612335**

III.Information received, in whole or part, after the Department s approval for inactivation, which indicates that inactivation decision and/or corrective action is not sufficiently protective of human health for the reasonably anticipated use of the site. IV.Fraud in obtaining this approval for inactivation. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use. The Department s files regarding this release may not be maintained indefinitely. Also spill#9614826 remediated by NYCDDC is closed. All further remediation for this site will be tracked under spill#0601840 (Responsible party - MCIZ). An e-mail was snet to S.Frnak, J. Urda and F.Ashkan: Steve, Spill #9614826, remediated by NYCDDC, is also closed (as well as spill#0000664). Contamination at this site will be tracked under spill#0601840 with a different responsible party. AZ "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

NYC DEPT OF SANITATION - J SCHIAVONE (Continued) **1000140989**

environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 8/13/2002 - Sangesland spoke with Mr. Sam Spirgel, attorney for homeowner (fax 212-732-6746) Mr. Spirgel requested information about this spill event. No notes or file appears to exist beyond the original spill report. Note the time gap between the spill and the call to DEC. (1/20 - 2/9). Mr. Spirgel stated that a partial clean up was conducted by Petro, but the homeowner still believes there is additional contamination which needs to be addressed. Sangesland suggested bringing in a contractor to finish the cleaning. The job should include a power wash of the basement floor & walls in the area of the spill and a two part epoxy paint job of the floor and wall areas impacted. 7/29/2003 administrative closure"

MOSQUE (Continued) **S109063554**

PM. its six story commercial building. met with building owner Mr. Awad. Mr. Awad mentioned that they are converting to gas heating system and are removing 3000 gal #2 oil tank (which found unregistered). Mr. Awad hired P&T Home Improvement for required work and P&T hired PBG Construction to remove tank. Marvin from PBG removed leftover oil from tank and to remove sludge from bottom, he was cutting piece of tank using torch and fire broke out. FDNY extinguished fire and due to oil fumes/smoke inside building, they cut power supply. found oil/water mix inside tank and boiler room inside basement. as per Marvin tank is sitting on floor along foundation wall along Atlantic ave. and boiler is about 15-20 ft away from tank. fill/vent pipes running aboveground and found no sign of leak under these pipes. no information about supply/return lines as area around tank and boiler was flooded with oil/water and as no power in basement. owner sealed fill port. NYC DOB Boiler division ordered to evacuate the building until they perform safety inspection of the site. Mr. Falnnery from Boiler division asked owner to hire another contractor and asked not to allow PBG construction again for futher work (tank removal). at the end of site visit, Boiler division asked owner to pump out oil/water from basement only, so they can perform safety inspection. NYC DOB Boiler division don't want any other work performed inside building until they inspect the building. tank must be removed once DOB inspect the site and approves further work. visited site this morning (06/06/08). met with Ali, member of owner's corp. they hired Recovery Environmental. met Tom from Recovery environmental. asked him to remove oil/water only from tank/boiler room and to notify the department once they done. Tom will either collect oil/water into drums and store in building for later disposal or will collect it into vacuum truck. received call from Tom. he mentioned that there is a water leak from main water line inside boiler room. Tom requested to turn off water supply. spoke with Ali. he asked for help to have water supply turned off. spoke with Garcia (212-689-1520) at NYC DEP. he asked to contact Jemmy (718-391-7610/7615), incharge of boiler division in brooklyn area. spoke with Jemmy. he will send crew after 4 PM, as other crew members are busy. NYPD is at site since 8 PM yesterday night to secure the site. met Mr. Thein from OSHA at the site. Islamic Brotherhood INc. **property owner** Amin Awad President 265 Flatbush Avenue, Apt. 2 Brooklyn, NY 11217 PH. (718) 857-6311 Omar Ali Tresurer of Islamic Brotherhood INc. PH. Austin asked to visit site only after DOB boiler division gives ok after their safety inspection. 06/09/08-Hiralkumar Patel. visited site. met

MOSQUE (Continued) **S109063554**

Tom from Recovery environmental. they removed all stuff from tank/boiler room. walked into boiler and tank room and found both room floors in good condition. no cracks noticed. no odors noticed during site visit. Tom mentioned that they pumped out total 1500 gal of oil/water from tank room, boiler room as well as from tank itself. as per Tom, tank had oil in it and 6-8 inches thick sludge at the bottom. asked Tom to seal all drums which are filled with contaminated material and asked to wait for DOB inspection prior to powerwash. visited site at 2 PM. met Mr. Awad at site. he mentioned that inspector from NYC DOB boiler division inspected site before i reached to the site and DOB gave them ok to occupy the building again. gave Mr. Awad PBS registration form and asked him to register tank prior to any tank removal. met Mr. Anton, insurance adjuster. informed him the same. Joseph Anton Anton Adjustment Co., Inc. Ph. (718) 641-5700 (O) (516) 624-0541 (C) Fax (718) 641-5691 06/10/08-Hiralkumar Patel. discussed with DEC Austin and DEC Vought regarding investigation under tank, once tank removed. Austin mentioned that as no cracks found in floor anywhere else in tank and boiler room, he believes that tank must have installed on solid concrete and he doesn't believe any cracks in floor. DEC Austin asked to close the case once gets tank registered. 06/17/08-Hiralkumar Patel. received cleanup report from Recovery environmental. 06/24/08-Hiralkumar Patel. spoke with Mr. Awad about tank registration. he mentioned that tank has been removed from site and he doesn't know company's name who removed the tank. Mr. Awad asked to contact Omar Ali. spoke with Todd at Recovery environmental. he didn't removed tank. 06/25/08-Hiralkumar Patel. visited site. tank has been removed. inspected visible area only in tank room (as no light in tank room) and found floor in good condition. no odors noticed. received call from Ali. asked him to register tank. sent email to Ali (ahmedels@hotmail.com) with PBS form and instruction. spoke with Marvin from PBG construction, who removed the tank. this is the same company who was cutting tank when fire broke out. Mrvin mentioned that NYC DOB allowed them to remove tank (NYC DOB asked them not to enter into building again for tank removal after fire incident). 06/27/08-Hiralkumar Patel. received call from Mr. Davis, attorney representing property owner. explained him to register tank. asked him to provide PBS number to close the case. Tarik Davis **owner's attorney** Ph. (718) 783-6819 email: swatgus@msn.com 07/11/08-Hiralkumar Patel. received call from Abraham from mosque regarding tank registration. asked him to contact DEC Jacob with tank questions. 08/20/08-Hiralkumar Patel. discussed with DEC Austin and DEC Jacob regarding unregistered tank. both agreed to issue Notice of Violation. visited site. met Mr. Awad at the site at 3:30 PM. issued Notice of Violation. Mr. Awad refused to sign NOV. left white copy of NOV to the site. settlement conference has been set for 09/25/08 at 10:30 AM. 08/27/08-Hiralkumar Patel. received message from Jerry from recovery environmental. spoke with Jerry at recovery environmental. he was contacted by mosque and claimed that further cleanup required by the department. explained to Jerry that the department requires registration of previous tank and thats why the department issued a notice of violation. and this is not regarding spill cleanup. Jerry will talk to mosque people. 10/09/08-Hiralkumar Patel. found tank registration for the site. PBS #L: 2-610927. case closed."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BROWNFIELDS:
Program: BCP
Site Code: 563661
Acres: 0.31
HW Code: C224266
SWIS: 2401
Town: New York City
Record Added Date: 10/30/2017
Record Updated Date: 03/16/2018
Update By: BXANDERS
Site Description: Location and Site Features The Site is located in Gowanus, a mixed-use urban area of Brooklyn, New York, which includes residential, commercial, and manufacturing areas. The Site consists of one lot (Block 1003, Lot 11) totaling approximately 13,500 square feet (sf) or 0.31 acre. The Site is a vacant concrete and gravel covered lot and is fenced. The northern portion of the Site is approximately one to two feet lower in elevation in comparison to the southern portion of the lot and a concrete ramp located on the east-central portion of the lot connects these two areas for vehicle access. The Site is bordered to the north by 8th Street followed by a two-story commercial building and three-story residential buildings; to the east by three- and four-story residential buildings; to the west by a one-story institutional building (American Legion Hall) with a parking lot followed by a one-story commercial building with a parking lot (Enterprise Rent-A-Car) and four-story residential buildings with one first-floor commercial tenant; and, to the south by 9th Street followed by a one story commercial building (Top Notch Auto Repair) and three-story residential buildings. Beyond the properties immediately adjacent to the Site, property uses are commercial, residential, institutional, and manufacturing. Current Zoning and Land Use According to the New York City Department of City Planning (NYCDCP) Zoning Map 16C, the Site is zoned for residential use (R6A for the southern portion of the Site and R6B for the northern portion of the Site). Residential districts permit community facilities such as schools. The Site has been vacant for approximately 25 years and there are no structures on the Site. Past Use of the Site Historic records indicate that the Site was first developed as farmland. A residential building, which was demolished in the late 1800s, was present on the southern portion of the Site. From the late 1800s to the early 1900s, the Site was occupied by an ink manufacturer (1888 to 1906), a storage facility (1906 to 1926) with a gauge manufacturer (circa 1917), a chemical laboratory (1926),

168 8TH STREET (Continued) **S121933776**

and a machine works facility (1928 to 1934). In the mid- to late-1900s the Site was occupied by a garage and a gasoline station (from approximately 1926 to at least 1951), a plumbing supply/metal products manufacturer (1945 to 1965), and a textile factory (1976 to 1992). A fire occurred on the Site in the early 1990s and the lot has been vacant since approximately 1992. Site Geology and Hydrogeology The geology of Kings County consists of unconsolidated glacial deposits overlying crystalline bedrock. The subsurface geology for the Site property likely includes the following formations: Pleistocene upper glacial deposits, Gardiners Clay, Jameco Gravel, Cretaceous Raritan Formation consisting of sands and clays, and crystalline bedrock. Bedrock was not encountered in the soil borings or trench excavations advanced at the Site as the depth to crystalline bedrock for the area is estimated to be 200 feet below ground surface (bgs). Fill material consisting of brown sand, silts with fine gravel, coal, and brick fragments was encountered at the Site to a maximum depth of approximately 10 feet bgs. Deeper, native material consisting of sand, silt and clay was encountered to 20 feet bgs. Based on topography in the area and review of the USGS Hydraulic Conditions Map for Long Island, NY, 2013 (USGS Groundwater Conditions on Long Island, New York in 2013), it is expected that the predominant direction of groundwater flow is northwesterly; however, groundwater flow direction will be confirmed during implementation of the Remedial Investigation. Based on information gathered during the Phase II Environmental Site Investigation (ESI), the depth to groundwater at the Site ranges from approximately 13 to 19 feet bgs.

Env Problem:

Between 2011 and 2013, TRC conducted a Phase 1 Environmental Site Assessment and Phase II Environmental Site Investigation (ESI). Additionally, since the Site has been identified by local community groups as a potential burial ground for Revolutionary War soldiers, an archaeological investigation was completed by AKRF Engineering, P.C. in June 2017. The results from the investigations include the following: SOIL - Three metals (chromium, mercury, and nickel) were detected in shallow soil (1 to 4 feet bgs) at concentrations above the Restricted-Residential Use Soil Cleanup Objectives (RRSCOs). Trichloroethene (TCE) was detected in one shallow soil sample with the concentration of 8.44 ppm from 3.5 to 4 feet bgs above the Protection of Groundwater SCO of 0.47 ppm. TCE was lower than RRSCO value of 21 ppm. GROUNDWATER - Cis-1,2-dichloroethene (cis-1,2-DCE) was detected above the NYSDEC Class GA Value in two locations at a maximum concentration of 18 ug/L and TCE was detected above the Class GA Value in three locations at a maximum concentration of 99 ug/L. Three metals (magnesium, manganese and sodium) were detected in filtered groundwater concentration exceeding Class GA values. SOIL VAPOR - Chlorinated solvent-related VOCs were detected at elevated concentrations in soil vapor samples. A comparison of maximum concentrations of exceedances for TCE (16,000 ug/m3), cis,1-2-DCE (110 ug/m3), and PCE (940 ug/m3) respectively with the NYSDOH Vapor Intrusion Matrices indicates the recommended action would be mitigation for further development purposes for indoor air and sub-slab conditions. Several petroleum-related VOCs were detected at elevated concentrations in soil vapor samples. Additional Environmental Conditions - The Site is listed in the NYSDEC PBS tank database (PBS Registration No. 2-612781) for three gasoline underground storage tanks (USTs) encountered during the archaeological investigation. As part of the remedial action for the Site, the USTs will be closed and removed in accordance with NYSDEC

168 8TH STREET (Continued) **S121933776**

	regulations and guidance. An at-risk IRM was completed in November 2017 (prior to application to the BCP) in the northern portion of the site to remove potential source material. Activities of the IRM included removal of drainage features and piping, excavation, and sampling.
Health Problem:	People who enter the site could contact contaminants in the soil by walking on the soil, digging or otherwise disturbing the soil. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the soil vapor may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant, inhalation of site contaminants in indoor air due to soil vapor intrusion does not represent a concern for the site in its current condition. Additional investigation is needed to evaluate the potential for soil vapor intrusion off-site.

DEC Memo:	"Sangesland spoke to homeowner Cynthia Amos. She said the fill line leaked and oil came through the basement wall into the basement. She said the oil company (Petro) was going to schedule a time to dig out and install a new fill line within the next few days. Sangesland told

AMOS HOME (Continued) **S109061904**

Ms. Amos to do the following work: 1) Dig out all contaminated soil when they replace the fill line. 2) Take a photograph of the clean hole before they back fill 3) Have the company send in a closure report to DEC 4) Call Sangesland when the appointment is made to do the work 4.22.08- DEC Piper - I performed site visit. Petro was on scene replacing fill line. a small amout of contamiantion was found due to th ehole in the line being at the wall. The affected area on the wall is approx 2 x2 feet. I instructed the owner to scrub wall and epoxy paint. No digout warranted as gross soil cont was not observed. closed."

Site name: MENTRON INC
Classification: Large Quantity Generator

MENTRON INC (Continued) **1000420139**

. Waste code: D000
. Waste name: Not Defined

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 08/29/2016
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: EPA

FINDS:

Registry ID: 110004443745

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND

CADET CLEANERS (Continued) **1004756957**

1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Registry ID: 110028280946

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Land type:	Facility is not located on Indian land. Additional information is not known.
Classification:	Conditionally Exempt Small Quantity Generator
Description:	Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

CVS HEALTH PHARMACY 16969 (Continued) **1023968607**

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 08/24/2017
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/11/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/11/2019

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

LIENS 2: CERCLA Lien Information
A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers
Source: Department of Health
Telephone: 212-676-2444

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

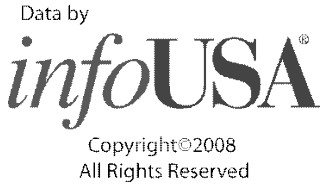
Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



RESEARCH SUMMARY

BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

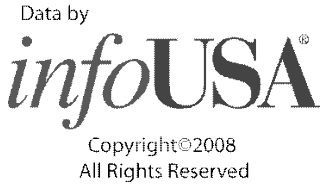
Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Year	Source	TP	Adjoining	Text Abstract	Source Image

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
