EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

EAST MIDTOWN
NEW YORK, NY 10022

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 SEMS site within approximately 0.075 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 30 RCRA-LQG sites within approximately 0.075 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 270 RCRA-CESQG sites within approximately 0.075 miles of the target property.

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 03/28/2016 has revealed that there are 46 ERNS sites within approximately 0.075 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/17/2016 has revealed that there are 50 NY LTANKS sites within approximately 0.075 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, and dated 03/29/2016 has revealed that there are 31

EXECUTIVE SUMMARY

NY UST sites within approximately 0.075 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 3 NY CBS AST sites within approximately 0.075 miles of the target property.

Records of Emergency Release Reports

HMIRS: The Hazardous Materials Incident Report System contains hazardous material spill incidents reported to the Department of Transportation. The source of this database is the U.S. EPA.

A review of the HMIRS list, as provided by EDR, and dated 06/24/2015 has revealed that there are 12 HMIRS sites within approximately 0.075 miles of the target property.

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/17/2016 has revealed that there are 560 NY Spills sites within approximately 0.075 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there are 504 RCRA NonGen / NLR sites within approximately 0.075 miles of the target property.

TSCA: The Toxic Substances Control Act identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. The United States Environmental Protection Agency has no current plan to update and/or re-issue this database.

A review of the TSCA list, as provided by EDR, and dated 12/31/2012 has revealed that there are 114 TSCA sites within approximately 0.075 miles of the target property.

RAATS: The RCRA Administration Action Tracking System contains records based on enforcement actions issued under RCRA and pertaining to major violators. It includes administrative and civil actions brought by the United States Environmental Protection Agency. The source of this database is the U.S. EPA.

A review of the RAATS list, as provided by EDR, and dated 04/17/1995 has revealed that there is 1 RAATS site within approximately 0.075 miles of the target property.

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 04/09/2009 has revealed that there are 117 FTTS sites within approximately 0.075 miles of the target property.

MLTS: The Material Licensing Tracking System is maintained by the Nuclear Regulatory Commission and contains a list fo approximately 8,100 sites which possess or use radioactive materials and are subject to NRC licensing requirements.

A review of the MLTS list, as provided by EDR, and dated 03/07/2016 has revealed that there are 12 MLTS sites within approximately 0.075 miles of the target property.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 116 HIST FTTS sites within approximately 0.075 miles of the target property.

FUSRAP: DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

A review of the FUSRAP list, as provided by EDR, and dated 03/11/2016 has revealed that there is 1 FUSRAP site within approximately 0.075 miles of the target property.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/20/2015 has revealed that there are 55 US AIRS sites within approximately 0.075 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/20/2015 has revealed that there are 1022

EXECUTIVE SUMMARY

FINDS sites within approximately 0.075 miles of the target property.

EXECUTIVE SUMMARY

ECHO: ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

A review of the ECHO list, as provided by EDR, and dated 09/20/2015 has revealed that there are 1022 ECHO sites within approximately 0.075 miles of the target property.

FUELS PROGRAM: This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.

A review of the FUELS PROGRAM list, as provided by EDR, and dated 02/22/2016 has revealed that there are 8 FUELS PROGRAM sites within approximately 0.075 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 99 EDR Hist Auto sites within approximately 0.075 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 47 EDR Hist Cleaner sites within approximately 0.075 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all

SONY MUSIC ENTERTAINMENT - 550 MADISON A (Continued) **1016087280**

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Sangesland spoke to Rob Hill at Castle Oil. He said the driver overfilled the tank in the basement during the final blow out of the fill line. Approx 5-7 gal of oil spilled from a breather on the top of the tank onto the basmenet floor. Some cardboard boxes were impacted. Castle cleaned the area and removed the boxes. Cleanup is now complete."
Remarks:	"DRIVER OVERFILL: SPILL CREW ON SCENE AND IS CONTAINED TO BASEMENT"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL DEC Inspector notes: Mike Kessler, ERT-- 285 gallon capacity transformer. Historical data of 10 ppm. Sample taken to Astoria for confirmation. Transformer has been de-energized. Drain leads to sump in adjacent manhole. Will pull other manhole to check-- will check sewer trap for product. Crew was on site last week. Transformer read above min. Apparently released over weekend. Relayed info to Enzo Catanzaro, NYCDEP he has someone en-route. 8/17/99, Spill #, 101 East East 56th St. 265 gallon capacity transformer in vault released contents. Possible connection to sewer or to adjacent bldg. house trap. On scene: Nancy Barsoum, DEP Mike Kessler, Con ed entered bldg. to check house trap with in tenance personnel. DEP IWCS called to check sewers. Confusion arose regarding <50 vs. >50 tankers. Con ed had under 50 tanker on site to vac out vault. DEP said until confirmatory samples read, must use over 50 tanker. My understanding is that part 364 <50 tankers are not permitted to take >50 ppm. Kessler checked with Con ed permitting group. was told all tankers (>50, <50) are 364 part permitted to take all waste. They are identified <50 and >50 for con ed's purposes of waste stream mgmt. 1 told Kessler to use over 50 tanker today and 1 would confirm permitting issue with Albany and also let Enzo C.(DEP) know. Con ed e2mis notes: Found approx 100 gallons of transformer oil on the floor in vault, the vault has a drain with sewer connection. There is no visable movement of the oil at this time. There is no water, no visable cracks, no smoke or fire. No sump pump, a sample was taken. Installed spill tag, have a tanker enroute. Nany Badsoum on location 1005 hrs. Requested the under 50 tanker be replaced with over 50 tanker. 49 gallons of oil and water removed from floor. The capacity of transformer is 286 gallons. Floor was cleaned and debris removed using 1 solid wasted drum (55 gallon). Jane O'Connell from the DEC on location at 1330 hours, questioning if the oil entered the water way. She was told due to the clogged drain we do not suspect any oil release into the sewer. Lab Analysis #99-08590, pcb 9ppm, AROCLOR 1260, drained 273 gallons of dielectric fluid from transformer in vault 2831 into corporate transportation tanker and sent to Astoria yard. Partial clean up is completed. Pending replacement of transformer. Final cleanup completed using <50ppm vactor truck. Generated and removed one 55 gallon <50ppm solid waste drum. Waste was transported to 700 E. 16 St. Cleanup was started on 9-4-99 at 10:30 hrs and completed on 9-4-99 at 13:50 hrs. I&A cleanup crew was R.Bracco, G. Johnson, F. Castor, and T.Conway. Requested from Lou First to clarify suspected release into water way. Jane O'Connell from the DEC, inspected Customers traps from the basement of 101 E 56th st. and found no oil in traps. Drain from vault enters Customers sewer line. It was contained in vault and did not enter water way, as per Robert Biliski Operating Supervisor. "
Remarks:	"about 100 gals still in vault with some getting into the sewer system - cleanup crew is on the way "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 151875: 1-25-04 @ 11:32 discovered 100 gallons of unknown oil in the concrete sump of the structure. No evidence sewer or waterway affected. Conduit plate 30-i-1 shows no sewer connection. Sump pump has been disconnected. 2 liquid samples have been taken. Update 1-25-04 @ 12:50 the trap was taken apart and there is no evidence of oil in the trap. He will place oil absorb (speedy dry) to contain the spill. He also states that if we are going to clean this as an over 50 ppm cleanup , we will need a tanker to evacuate the oil. Lab Sequence Number: 04-00570-001 PCB <1 ppm Lab Sequence Number: 04-00569-001 Analysis indicates the presence of a substance similar to a lubricating oil. Cleanup was completed at 21:00 hrs by R Hardin #18320 i&a splice and crew. Remove 100 gal of water/oil mixed, Double wash with slix. pressure tested the transformer and the unit held pressure. They also indicated that there was 100 gallons of an oil and water mixture NOT 100 gallons of oil as originally reported."
Remarks:	"Spill occured inside a transformer vault. Unknown oil from an unknown source. Cleanup has not begun as of yet. Caller unsure who will be doing the cleanup. Spill was onto concrete."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

CON EDISON VAULT: 4737 (Continued) **1017771676**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"01/10/08 - See eDocs for Con Ed report detailing cleanup and closure. 162799. On 2/1/06 at 12:26 M. Argueta # 02927 I&A supervisor called to report that at 12:00 G. Shea # 39916 of the I&A found a spill of unknown oil. He states that in vault-7156 he found 1 gallon

VAULT 7156 (Continued) **S107522694**

of an unknown oil on top of 100 gallons of water. This is located at 26 E. 53 St. He was there to make repairs and working on acct # G3483. He is going to hang a tag # 49337. Also he took 2 samples 1 for PCB and 1 for ID with a chain of custody # EE-19825. There was no sewers or waterways affected. No smoke or fire was involved. No private property was affected. No injuries were related to the spill. R. Bruns # 21106 Lab Sequence Number: 06-01149-001 < 1.0 ppm G Anelli 14059 2-1-06 21:00hrs. Lab Sequence Number: 06-01150-001 Oil Identification No oil extracted to perform oil identification. Update 02/03/06 @ 17:13 hrs. R.Hardin 18320 reports that he and his partner I.Velz 14975 have done a partial clean up at this location. The tanker removed 125 gallons of liquid from vault, it was power washed with flush truck and washed twice with Bio-Gen 760. Yellow Tag # 49337 went up vactor tube, and a new tag #15441 has been placed. Final clean up pending removal of unit. Logger F.Curtis 38078 Update 2/3/06 19:15. Status changed due to partial cleanup & unit to be removed at a later date. CIG Haynes notified at 19:15. Logged by D. Gaynair 20079 "

Remarks: "1 gallon of unknown oil spilled in 100 gallons of water. No to the 5 questions. 162799"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"10/26/10 Spoke with Mike Borrelo. AST 5,000 gallon.Faulty pump gasket caused the spill of approx 25 gallon #2 oil.Spill contained in the pump room.No drain on the floor.Clean up crews on their way. Report will be sent to Veronica Zhune with pictures of the cleaned floor. ** No pbs record found on the AST**(sr) 12/02/10-Zhune. Environmental Building solutions, LLC emailed a closure report dated November 9,2010. Degmor, Inc. of New York, New York provided petroleum spill remediation services. On October 26, 2010 during repairs to the fuel system for the building s new emergency generator system, by Heritage Mechanical, Inc. in conjunction with Tishman Construction, Inc., a gasket failed causing a spill on the C-level of the subject property. Approximately 25 gallons of #2 fuel oil impacted the C-level of the subject property. No floor drains or sewers were impacted as a result of the spill. Degmor, Inc. responded to the site to provide petroleum spill remediation. Degmor, Inc. response included the following: 1. Removal and containerization of all petroleum from the affected area. 2. The application of a decontamination bio-degreasing solution to the affected area. The bio-degreaser was allowed to react with any residual petroleum for approximately 30 minutes. 3. Finally, the affected area was

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated

AMETEK INC (Continued) **1004569602**

Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and

TARTARIC CHEM CORP (Continued) **1004570311**

it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is

135 EAST 54TH ST CONDOMINIUMS (Continued) **1016048380**

used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

VAULT #2880 (Continued) **S106470543**

O'CONNELL e2mis no. 154123: 16:40 hrs. found a spill of transformer oil (dielectric fluid) in vault-2880. He states that there is 15 gallons of oil on the floor of the vault that had leaked out of the bottom of the transformer. He tested the unit & states that it does not hold pressure. The history of the unit is PCB 1 PPM sampled on 3/8/04. Lab Sequence Number: 04-05129-001: Analysis indicates the presence of a substance similar to a dielectric fluid. Lab Sequence Number: 04-05128-001: TOTAL PCB 4 ppm Update: O.S.G.Liguri 14084 reports that a partial clean up was done at this location. Tankrer removed 25 gallons of oil and water mix from floor and 500 gallons from unit. Oil absorbant put down and final clean up pending removal of transformer. 08/1/04 5:00 Cleanup in V2880 was completed. This was a final cleanup. There was approx. 15 gallons of water, oil and dirt mixed removed via vactor truck. The cleanup method was double washed with slix. The leaking transformer was removed and a new transformer was installed in V2880. The cleanup was completed on 08/01/04 at 14:15hrs."

Remarks: "CLEAN UP IS PENDING: FAULTY TRANSFORMER"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the

VENO FINE CHEMICALS IND (U.S.A.), INC. (Continued) **1004566691**

Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

ICIS (Integrated Compliance Information System) is the Integrated

PROCHIMIE INTERNATIONAL INC (Continued) **1004569878**

Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ e2mis no. 140913: 1 pint of dielecrtic fluid mixed with dirt on the concrete floor of MH-38725. The source of the spill was the uncapped joint ends. Two samples will be taken for PCB & ID. Lab Sequence Number: 02-00359-001 PCB 3440 ppm. Update: 01/15/02 @ 01:15 Operating Supv. J.Selesky #20525 reports that as of 0:00 hrs clean up complete. Mr Selesky was advised tthat Chem. Lab was called and will be on location to take grid wipe samples. 01/15/02 13 Received lab results, lab sequence # 02-00367-001 (Wipe samples) WIPE #1 TOTAL PCB 14 ug/100cm^2 WIPE #2 TOTAL PCB 36 ug/100cm^2 WIPE #3 TOTAL PCB 10 ug/100cm^2 UPDATE: 1/15/02 Environmental Desk made arrangements for this manhole to be re-cleaned on the 3 to 11 pm shift since two of the wipe samples failed. An Over 50 tanker, underground crews and a Flush truck was ordered. Lab Sequence #02-00402-001 to -021 Point #13 failed since the criteria is < 10 ug/100 cm^. The manhole will have to be recleaned again just at test point #13 to either side of the point. Environmental Desk made arrangements for the cleanup on the 7 to 3 pm shift on 1/18/02 and a Chemist to take the wipe sample. Update 1-18-02 @ 14:15 . M Melendez #11285 reports that the cleanup is complete as of 13:45. Chemist took wipe samples, closing of this incident is pending lab results. Triple washed with slix and flushed, remaining liquid removed by tanker. 75 gallons of liquid and 1 drum ppe and debris removed. Tag to remain in place pending lab results. Lab Sequence No.02-00519-00 Date Approved: 1/19/2002 Test Pt. #13 Aroclor = 1254 Result = 8.4 ug/100 cm^2 The wipe sample passed and the manhole can therefore be considered clean."
Remarks: "emp cut cable and left ends uncapped clean up in progress 140913 pcb=3444ppm 0900 determined test results not completed"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis 140414 Kim Fondo #866, I&A Supervisor, reported at 11:45 hrs. that Mike Zaccardo #11549, I&A South, found at 11:40 hrs. approx. 2 gallons unknown oil and approx. 5 gallons water in vault V9376. He found the oily substance in the sump pit and on the floor by the side of the transformer adjacent to the sump pit. The I&A is unable to verify a possible bottom leak at this time. The source of the spill is unknown but may be from the transformer. The cause is unknown but may be a possible bottom leak. There was no fire involved and there is no evidence at this time of release to sewer or waterway. The sump pump was found unplugged and not running. There was no substantial cracks found. Two liquid samples for PCB and Oil Id will be taken from the spill by Mike Zaccardo. Prior PCB historical data indicates 37 ppm as per lab sequence #95-00961023 dated 2/22/1995. Transformer is a 2500 kVA GE unit, serial number H397094. It was not pressure tested but appears to be under negative pressure. Initial cleanup action consisted of placing absorbent pads down on the floor adjacent to the sump pit. Kim Fondo reported at 13:00 hrs. that Spill tag #17096 was installed. Also the fluid transformer capacity is 720 gallons. Update: As of 15:50 kim Fondo reports that after investigating has found that unknown fluid has been found also in the trap of V-9376. According to conduit plate 30-J-1 it is showing no connection drains or sewers. As of 16:00 EPA# NYP 004 093 126 was issued by ERT. lab sequence # 01-11336-001 TOTAL PCB 20 ppm 11/28/01 19:20 L. Roman # 27270 I&A (cleanup) supervisor reported that a partial cleanup was done in V-9376 at 18:30 . The over 50 tanker removed 10 gallons of oil out of the sump pit. A 50lb bag of oil absorbant was put in the pit as well as on the floor to absorb the remaining oil. lab sequence 3 01-11335 -001 Analysis indicates the presence of a substance similar to a dielectric fluid. UPDATE: 4/18/02 @ 5:00 hrs. As per Spill Updating & Completed Cleanup Form discovered at Manhattan Environmental Desk the following is the details of the cleanup: Ed Higgins #18537, Cable Supervisor, reported at 06:40 hrs. on 1/03/02 that the cleanup in vault V9376 was completed at 05:30 hrs. on 1/03/02. 3 cubic yards of solid debris was generated and removed. The structure was double washed with orange Riptide and rinsed with the Flush truck. Environmental spill tag #17096 was removed."
Remarks:	"2 gals unk oil on 5gals water confined to vault - sample taken clean up pending results - con ed 140414"

Classification:	Conditionally Exempt Small Quantity Generator
Description:	Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

disposition of such surficial contamination: how it was cleaned up and > disposed of. > > I also need to know the current conditions in the hotel: do you have any > petroleum staining on the floors, any petroleum odors, have any complaints > been made about petroleum odor, etc. > > I would appreciate your feedback on this important matter at your earliest > convenience. > > Respectfully, > > > Vadim Brevdo > > > > > Vadim Brevdo, P.E. > Environmental Engineer > Section Chief > NYS Dept. of Environmental Conservation > Division of Environmental Remediation > Remediation Section B > 47-40 21st Street > Long Island City, NY 11101 > > Tel. 718-482-4928 > Fax. 718-482-6358 > e-mail: vxbrevdo@gw.dec.state.ny.us Based on communication with Mr. Wilson and lack of any evidence of contamination at the site spill is closed effective 02/08/2012. Brevdo 02/08/2012 - Brevdo e-mail to Mr. Wilson, Head of Engineering at Omni Hotel: February 8, 2012 Dear Mr. Wilson: Based on the information provided to date, the New York State Department of Environmental Conservation (the Department) has closed the spill case referenced above. All monitoring wells associated with this site should be properly closed in accordance with the Department's Groundwater Monitoring Well Decommissioning Procedures. The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the Department's spill case closure, which indicates the corrective action was not sufficiently protective of human health and/or the environment. IV. Fraud in obtaining this spill case closure determination. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely. Please contact me if you have any questions regarding this matter, Respectfully, Vadim Brevdo "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
