EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

The Map ID column refers to the Map ID-Focus Map(s) of the listed site.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 6 RCRA-LQG sites within the searched area.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 15 RCRA-SQG sites within the searched area.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 21 RCRA-CESQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there are 193 RCRA NonGen / NLR sites within the searched area.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/20/2015 has revealed that there are 46 US AIRS sites within the searched area.

STATE AND LOCAL RECORDS

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/17/2016 has revealed that there are 45 NY LTANKS sites within the searched area.

EXECUTIVE SUMMARY

Facility Id: 2-285196

NY HIST AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database.

A review of the NY HIST AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 337 NY HIST AST sites within the searched area.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within the searched area.

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 05/17/2016 has revealed that there are 340 NY Spills sites within the searched area.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 159 EDR Hist Auto sites within the searched area.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 45 EDR Hist Cleaner sites within the searched area.

DEC Memo:	"5/6/2015 - Feng - Duty Desk. Informed by K. Patel that he talked to Vick St Juste as Vick called the spill phone and the call forwarded to Patel's phone. The tank is leaking. He asked Ryan Piper to conduct an site inspection. Talked to Kevin Ferguson of Slomins (1-800-252-7663 x2207). They will send out a mechanical field person. He shall be there in an hour. Ryan responded to the spill. Spill is assigned to R. Piper. 4/6/15- DEC Piper resopnded to site. Small overfill out vent though top of tank is leaking from gauge. FDNY was on scene put 1/2 bag of drysall on floor. Corner of rug was soaked in oil and needs tobe removed alond with a couple porous items. Wood sheet rock wall. Milro is en route to remediate. DEC Piperreceived closure report. based on work to date, this spill is closed. "
Remarks:	"275 gal agt in basement/tank is leaking after Slomins oil made delivery/home owner reported spill to Slomins"

DEC Memo:	"8/15/05 - Haggerty - caller (718)-733-0328 was neighbor to property in question and called in due to petroleum odor. According to the neighbor the property has since been sold. Left message for Morningside oil (718)-220-2200, but never recieved any info from them, doubtful if they would have records dating back that far----requires additional info, site visit 11/21/05, SA: Found the current property owner of 34 West 184th Street. Issued a letter (certified mail) to the owner to contact me within 30 days with information regarding efforts taken to clean the area, including any available environmental sampling data. 12/09/2005: John Grathwol and I visited this site on 12/08/2005 at around 12:50pm. No one was present in the house. Talked to the neighbour (lady next door, 30 West 184th st.). She doesn't smell any odor of petroleum product. Knocked the door of other side neighbour (32 West 184th st.), no one responded. There is a filling pipe on the wall of 32 West 184th st. residence. No oil mark or stain on the wall or floor. Took pictures.

Map ID	Site	Database(s)	EPA ID Number

34 WEST 184TH ST (Continued) **S102238393**

Not able to inspect the basement. Need to contact owner of 32 West 184th st. Spill to remain open. (Sadique) 01/03/2006: Called Steven Heimann's residence (718 584 4328) and left message to call me back. Issuing letter to the owner of 32 West 184th st., Steven Heimann. (Sadique) 01/11/2006: Mr. Steven Heimann called today. He informed that very little amount of spill happend during that time and cleaned long ago. He requested for inspection by the department. Still the tank is in service. (Sadique) 01/20/2006: John Grathwol and I visited the spill site on 01/17/2006 at 1:15pm. No one present at home. Left message on the voice mail for owner of 32 West 184th Street. Mrs. Heimann called back at 2:05pm. At 2:15pm we went to the location again. Mrs. Heimann admitted that a small amount of heating oil spilled from the out side filling pipe to her neighbours door steps during a delivery time. Inspected the basement. There was a big toy train all over the basement and much stuff. Could not clearly see the above ground tank. Though basement was not properly maintained, there was no oil mark or sheen and no odor or smell of oil observed. Took photos inside the basement, out side spill location and filling pipe. Spill location was clean and no smell of oil. No reply received from current owner of 34 West 184th Street in response to Nov 21, 2005 letter. Spill can be closed. (Sadique) 01/20/2006: Spill closed. (Sadique) "

Remarks: "comp came home and reports that there is an oil spill on her neighbors front steps and down the wall of her neighbors house - now she can smell oil fumes comming up from the drain in her basement and is afraid "

DEC Memo:	"12/26/06-Hiralkumar Patel. spoke with Dan at Atlas fuel. he mentioned that someone installed new boiler at residence. he checked city records and haven't found any application for such installation. he also mentioned that during this installation, owner/plumber moved 275 gal tank and disconnected lines from tank. as per Dan, they never received stop delivery order. driver delivered 26 gals before he stopped delivery. delivery crew checked inside house and found lines diconnected from tank. tank room floor in bad condition. Atlas fuel has sealed fill port with cement. Dan doesn't know who did cleanup at site. one family living upstair at subject site. asked Dan to send delivery ticket copy. spoke with Ramone, owner of building. he will meet at site at 3 PM. received delivery ticket from Atlas Fuel. 12/27/06-Hiralkumar Patel. visited site yesterday. met Ramone, owner of building. smelled oil inside basement. basement floor, where spill happened, was broken. asked Ramone to hire contracctor to remove this contamianted material. no vapor complaints from tenant living upstairs. Ramone has contacted Eastmond for estimates. onwer has switched heating system to gas. couldn't see floor clearly as entire floor was broken and had so much debris. told Ramone that after removing broken concrete, it may require soil excavation/soil sample based on condition. asked him to submit disposal manifests and other documents regarding oil cleanup. he will call back once he decides contractor who will going to remove contamination. 12/29/06-Hiralkumar Patel. received cal from Rene. he has finished work. has removed broken concrete and some soil. he will send closure report. received fax from Rene with closure report. based on closure report, case closed."
Remarks:	"A plumber or someone put a gas boiler in - cut the tank out and left it disconnected. On automatic delivery - Driver discontinued the delivery when he didn't hear the 'whistle' immediately - owner stated to the fuel company that he stopped automatic delivery - Fuel company has no record of such. Fuel company does not believe they are responsible. Spiller contact is the homeowner - he does not live

DEC Memo:	"06/22/10 - changed Lead DEC to JMOCONNE (JOC) 1/16/2013 - Raphael Ketani. This spill case has been assigned to me. The spill consisted of the discovery of oil in a manhole near an apartment building at 2291 Martin Luther King Boulevard in the Bronx. The oil was discovered and reported on 5/25/06. The spill report lists it as #2 oil, but there is no information to verify that the material was #2

Map ID	Site	Database(s)	EPA ID Number

MANHOLE (Continued) **S107788442**

oil. There is no paper file, no case notes, nor any e-docs. I tried to contact the person in charge of the spill case for the NYC DEP, but I could not contact this person or leave a message. There are 3 other spill cases for the building at 2291 MLK Blvd. Two are earlier spill cases, #9713073 and #9713077, and one is a later case, #1002813. The #9713073 spill case (and the later number for the same spill - #9713077) involved the discovery of oil in the manhole in front of 2291 MLK Blvd. The report date is 2/23/98. The oil was reported to be seeping into the manhole from a drain. It was believed that the oil could possibly be from a leaking tank in the nearby building. Three gallons of oil were collected from a sump. The manhole was cleaned up and the drain sealed. The case was closed on 2/12/03. The #1002813 spill case was opened up on 6/11/10. It involved the spilling of 6 gallons of #2 oil onto a paved surface. The spill was cleaned up and the case was closed on 6/21/10. The building at 2291 MLK Blvd. has a PBS registration #2-187372 for an active 3,000 gal. AST in contact with the soil. The AST contains #2 oil and was installed on 4/7/58. 7/10/13 - Raphael Ketani. I made an unannounced site visit to see the manhole. I found one manhole near the building at 2291 MLK Blvd (about 20 feet away). The manhole sat over a catch basin which was under the sidewalk. Both the manhole and the catch basin were at the front of a driveway to the neighboring building at either 2293 or 2295 MLK Blvd. I stuck the nose of my PID meter into the catch basin, but did not detect any vapors. I walked to the front of 2291 MLK Blvd. and saw a fill port and vent pipe stickup which appeared to be operational. As the stickup for a vent pipe is usually close to the location of a tank, I estimated the distance from the tank to the manhole to be about 30 feet. I could not get into the building to see who the management company was. So I took some pictures and left. Once back at my desk, I checked for any open or closed spill cases that belonged to either 2293 or 2295 MLK Blvd. However, I didn't find anything. As spill case #9713073 did not indicate whether the sealed drain had belonged to the apartment building or the home next door, I could not be certain who may have been responsible for the spill. Also, as the drain had been sealed, it was not clear how the oil could again get into the manhole during the 2006. The best I could estimate was that the oil had collected in the manhole as a result of rain washing oil that had leaked onto the street from vehicles. However, someone could also have dumped used oil down the catch basin during 2006. Though after 7 years of rain, it is unlikely that one would find any fresh oil in the sewer. As no additional information could be obtained from the NYC DEP regarding the spill, and as the PID meter did not detect any oil vapors emanating from the catch basin, and as 7 years worth of rain has probably washed out the manhole, I have determined that there is no threat to the public or the environment. Therefore, I am closing the spill case effective today. "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

Map ID	Site	Database(s)	EPA ID Number
	CON EDISON SERVICE BOX: 27281 (Continued)		**1017775621**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Spoke to ECO Galvin on site, a contractor for Wallmart was washing out paint brushes (water based paint) and runoff entered a storm drain that went to a lake, tickets will be issued, nfa - mm 10/28/08: As per Cathy Quinn, RCDOH: CQ responded. Conversed with DEC john o'mara and En Con Officer. Painting contractor washed water based paint compound into storm drain which is flowing into retention pond for the N. DeBaun Housing west of Walmart, then wrapping around first set of those housing buildings and into wetland area. from there would generally move parallel to north side of 59 to Mahwah River. Tallman FD, Ramapo PD and D Greeley present. Water is milky white, this during rain event. Downstream municipalities advised. Not recoverable. RCDOH is closing our involvement. DEC (En Con Galvin and Fetterman present at scene) will take enforcement action. "
Remarks:	"Rockland County Health and ECOs on scene."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "06/14/06 - See e-docs for Con Ed report detailing cleanup and closure. 162567. 17-Jan-2006 14:42. Supervisor E. Lynch 10864 reported while on location for a street light complaint pumping out water from SB-3794 discovered 3 gallons of unknown oily water was accidentally pumped to the street/asphalt with a 1/2 gallon of unknown oily water still in the service box. No smoke or fire is/was involved. No sewers, waterways, or private property affected. The spill is contained and cleanup is in progress associated with the street. A pcb and oil id will be taken for the structure and Env tag will be placed pending cleanup. D. Rohrer 12788 "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY SITE HAS ONGOING PROBLEM OF WATER COMING INTO BSMT; SUMP PUMP BROKE AND BSMT FLOODED, STRONG GASOLINE ODOR AND SHEEN ON WATER. THERE'S AN OLD 550 GAS TANK UNDER BSMT FLOOR, BUT NOT CLEAR HOW OR IF WATER GOT INTO TANK. FIRE DEPT. PUMPED OUT STANDING WATER; PLUMBER REPLACED SUMP PUMP; OPEN DOORS AND FAN ALLEVIATED STRONG ODOR. KOLLEENY WENT TO SCENE, FLOOR STILL DAMP, LIGHT GASOLINE ODOR. SPOKE WITH BATTALION COMMANDER CHIEF KEENE; ALSO SPOKE WITH KIRKYLA & REMEZA, CM FOR SITE, ASKED THEM TO EXPEDITE PROPER CLOSURE OF TANK AND INVESTIGATE FOR CONTAMINATION. WILL UPDATE. TANK WAS CLOSED IN '98; GW GRAB SAMPLE FROM TANK PIT HAD MODERATE CONTAM., URS IMPLEMENTED GW MONITORING USING 3 WELLS INSTALLED IN '97. AS OF OCT. 2001, ALL WELLS HAVE NOW MET STANDARDS FOR AT LEAST TWO CONSECUTIVE SAMPLING EVENTS. THERE HAVE BEEN NO FURTHER ODOR COMPLAINTS FROM FIRE DEPT. PERSONNEL. "

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR MINOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region

DEC Memo:	"7/13/05 mt//ttf letter sent//// 5,000 gal UST, borings around the tank, three borings around tank showed clean soil, one boring above the tank found contaminated soil. Gasket was replaced a year ago. Mr. Mort, the owner, said the report will be sent to the Department for review. 1/9/2006 - JZ: As per Randy's direction, this spill is reassigned to Feroze. 03/15/06. Spill is transferred from Feroze to Kumer Patel. 04/06/06-Hiralkumar Patel. Spoke with Mr. Mort. he will call back with more information. Received call from Mr. Mort. as per him, they are planning to remove the tank, which is burried outside of building, and install new 5000 gal tank inside the building. when they take out old tank, they will remove all pipings associated with that and will remove any contaminated soil. as per the report he has, they found some contamination at vent pipe location and he thinks it only reached couple of feet in ground. i told him that this case will be closed when he submit endpoint sample results after tank removal. he will call me once he start working removing tank from location. he has submitted the report to DEC_Zhoe. 05/05/06-Hiralkumar Patel. Spoke to Mr. Mort (718-601-2000). they haven't start tank removal yet. will start in couple of weeks. 06/05/06-Hiralkumar Patel. spoke to Mr. Mort. they are working at another site in Manhattan. once they done there, they will remove tank from this location. 07/31/06-Hiralkumar Patel. spoke with Mr. Mort. they will finish work by end of August. 08/31/06-Hiralkumar Patel. spoke with Mr. Mort. Mr. Mort mentioned that he was dealing with DEC Leszek. he will send me copy of letter from Leszek. now Mr. Mort is planning to remove contaminated soil and to use same tank. received copy of letter sent by Leszek. old spill# is 0210857. this was also reported as tank test failure. spoke with Mr. Mort and asked to submit all documents to Leszek. spoke with DEC Leszek. he will work on this case under older spill case. Refer spill#: 0210857."
Remarks:	"Tank test failure. Vent line will have to be repaired. Unsure who will be fixing the vent line."

DER Facility ID: 80427
DEC Memo: "11/13/07 - Zielinski ABC Tank Repair and Lining, Inc., sent a report, dated November 9, 2007, that shows no VOCs contamination next to the previously used fill box. SVOCs analyses indicate chrysene 100 ppb, fluoranthene 2100 ppb, pyrene 2200 ppb. Previously taken four soil samples next to the tank were below TAGM # 4046 with exception of benzo(a)anthracene - 884 ppb. The tank was replaced by an AST on April 25, 2007. EDOCs contain above-stated information and also results of tank testing, DEC letter of August 24, 2006, two faxed information from Home Company (the operator of the tank). The case is closed. 08/27/07 - Zielinski Spoke with Mort Yuter; he said that within one, two weeks he would hire a company to remove contaminated soil and perform analyses of endpoint soil samples. 08/24/06 - Zielinski Leszek Zielinski is assigned to this case. Faxed a letter to the owner of the tank requesting retesting the tank immediately. file transferred to co 7/05, assigned to Jarratt. Contacted M. Yates of Home Company who informed us the tank is being replaced. DEC should check back in Dec '05 for update. 12/29/05: called Home Company (718) 601-2000. They are still negotiating for the tank replacement. 08/31/06-Hiralkumar Patel. refer notes from spill # 0504353, as these both cases are for same site."
Remarks: "tank failed the test."

DEC Memo:	"12/03/13-Hiralkumar Patel. alternate address: 2188-2192 Jerome Ave no PBS or other spill found. 3:12 PM:- spoke with Jill. she mentioned that an UST found inside the building. she will call back with more information. 12/04/13-Hiralkumar Patel. 10:38 AM:- received call from Jill. during a Phase I investigation, as part of property sale, one of the sanborn map showed four (4) 550 gal USTs. during GPR survey and test pit investigation, these tanks are found under the warehouse floor. during test pit investigation, contamination was noted above the tanks. GCI will remove these tanks. asked Jill to submit copy of Phase I report, contact details of property owner/buyer and work schedule for tank removal. 11:37 AM:- received email from Jill including phase I. abstract: - property includes two lots # 10 (2184-2186 Jerome Ave) and 12 (2188-2192 Jerome Ave) on block 3186 - site has one stories with mezzanine and a partial cellar - elevation of subject site is approx. 93 ft - 1950 Sanborn map shows one story glass warehouse and three (3) one-story auto storage building with four (4) 550 gal gasoline tanks - 1977 Sanborn map shows one story commercial glass warehouse and one story commercial warehouse - there is a 300 gal #2 oil AST on legs, located in the cellar of building 2184 - no leaking noted from the #2 fuel tank 2:13 PM:- spoke with Jill and scheduled a site inspection at 9:30 AM tomorrow. 12/05/13-Hiralkumar Patel. 9:00 AM:- visited site. met Jill, Jim (GCI), Brandon Himmel (real estate agent), Bob Kent (current owner) and Ron Gilbert (buyer). Jim mentioned that they recently removed one (1) 550 gal UST, which was located in northcentral location in building 2190. the 550 gal tank was located within a concrete containment. based on settings, it looks like this one 550 gal tank was used for waste oil storage. found groundwater at the bottom of excavation, which is about 9-10 ft bg. no stains or petroleum odors or sheen noted in excavation sidewall soil or groundwater in bottom. Jim mentioned that they have collected endpoint soil samples. asked Jim to collect groundwater sample also for analysis. the four 550 gal

Map ID	Site	Database(s)	EPA ID Number
	BOB KENT (Continued)		**S116155251**

USTs are located in central portion of building 2190. the tanks are located in east-west direction. Jim mentioned that they will remove the four tanks and any associated contamination. asked Jim/Jill to call for site inspection, once remaining tanks are out of ground. approved backfilling of excavation of one 550 gal tank, to facilitate safe removal of remaining tanks. informed Mr. Kent and Mr. Gilbert that the department may require additional investigation/remediation based upon review of endpoint soil/groundwater sample results. DEC Memo:	"30-November-2004 15:29 Hrs. Splicer Justino Ventura, 85945, reported he found 4 ounces of dielectric fluid from a faulted cable, (fault No. 7873, d-fault tag 00346). that leaked and spilled to floor of the manhole where it is contained. No sewers, waterways, or private properties affected. Environmental Tag 40561 applied. Sample was not taken due to d-fault and inaccessiblity of oil from the street. Cleanup pending de-energizing feeder and test results. Lab Sequence Number: 04-10183-001 - Total PCBs < 1 ppm 09-Dec-2004 05:15 hrs Flush Operator, John Maloney (05863) reports structure was double washed with Bio-Gen 760 detergent. CFS tanker removed 100 gallons of waste water that was generated. The vactor truck removed 50 lbs of lead hazardous solid debris from the structure. The defective 3c PILC joint has been cut out by UG splicers. The environmental tag # 40561 has been removed from the manhole. Clean up is complete."
Remarks:	"HAVE TO DEENERGIZE FEEDER PENDING CLEANUP. See 156413."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis 130531 March 23, 2000 Joe Graci reports 1 quart dielectric fluid spill from leaking joint in manhole # 16912. Dry hole, sump in hole but spill isn't near pit. No waterways or sewer appears to be affected. Sample taken, manhole tagged #09467. Cleanup will start as soon as results received. -001 SAMPLE TYPE: OIL None <1.00 PPM 03/25/00 @ 08:00 Hrs. Initial report referred to manhole as # 15912, The actual manhole should read as # 16912, and that conduit plate 26-H-1 indicates a sewer connection at this location. March 27, 2000 Clean up complete at 19:15 hours by G. Lopriore and T. Murphy. Supervisor R. Ashraf wraped the leaking joint with pads. 20 gallons of water and 1 quart of oil was removed by the corporate tanker, the flush truck power washed manhole 16912 with cleaning solution twice. . The crew also sealed the sump, sump was concrete. No solid waste was generated. Environment tag number 09467 was removed. 03/28/00 @ 06:25 Hrs. Reviewed reports and closed out. 27-JAN-2003 10:04 As per field inspection performed on 1/21/03, leaking joint was replaced. "
Remarks:	"leaking joint caused spill in a dry manhole - samples taken and clean up pending results - con ed #130531 spill is actually 1 qt"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 132423: Quality Assurance Inspector Grassi reports he found 1 pint of unknown oil in MH 31552...Conduit plate 25 H-4 indicates no sewer connection...There is no water in manhole...Sample taken Clean up pending test results. Lab Sequence Number: 00-06892 PCB <1 ppm 7/26/00 Clean up pending crew to dig test pit to find obstructed duct, so leaking cable can be removed. The cable is leaking from up in the duct, but can not be pulled due to obstruction. CA&I are working with contractor to locate the obstructed duct. 8/4/00 Supervisor L. Fischer reports that cable ends have been sealed ...removed oil and soil there was no liquid in manhole."
Remarks:	"caller reporting a spill of material from an unk source coned#132423 samples taken clean up pending lab results no callback necessary"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 9/19/05 - Obligado -Spill transferred from Vought to Obligado 12/1/05 - Obligado - Review Baseline Assessment Report, submitted by Delta, 10/3/02. At time of investigation, site was an active Gasoline service station with 3 4000 gallon unleaded gasoline USTs installed in 1974 and 2 550 gallon used oil USTs. Sensitive receptor survey shows Harlem River 3200 ft NW of site. NO supply wells. 3 schools located approximately 1000 ft from site. Apartment building basements across Jerome Ave to east, Cafe located across W.181st street to north. 3 Story Apartments to the southwest, Tire repari show adjacent to south, Pre-K afterschool program south of tire repair. Bedrock and weather rock at 17 and 11 ft bgs. Groundwater located between 11 and 14 ft bgs. Based on site history, there the NYCFD requested a recovery well be installed for spill number 8201287. No data on whether it was installed. Between Dec 01 and Jan 02 there were 4 soil borings advanced at site. No VOC exceedences. Four ground water wells installed, sampled on 8/7/02 GW REsults in ppb: MW4 - 224 benzene, 1860 toluene, 491 ethylbenzene, 4090 xylenes, 6665 BTEX, 630 MTBE, 169 Napthalene, 9597 Total VOCs MW5 - 314 MTBE MW6 - 34.1 benzene, 21.1 ethylbenzene, 19.1 xylenes, 1250 MTBE. RCRA Metals - 642 Chromium, 2410 Cadmium, 641 Chromium, 253 Lead, 52.8 Silver. 12/8/05 - Obligado - Meeting with DEC, ASR, GAseteria. Plan to install wells during the summer of 2006. 4/23/10 - Obligado - I reviewed an Investigation Work Plan, submitted by JC Broderick on behalf of Gaseteria. The work plan proposes to sample any existing wells and install 3 additional monitoring wells. I sent an email to STeve Muller requesting that they first do a site visit to determine if any

Map ID	Site	Database(s)	EPA ID Number
	JEROME (Continued)		**U000396473**

of the wells are still existing, and resubmit a work plan within 30 days based on what they find. 6/2/2010 - Obligado - I reviewed the revised Investigation Work Plan. The plan proposes to install 5 monitoring wells at the site. A report will be submitted in 90 days. I sent an approval letter for the plan. 2/16/11 - Obligado - DEC/Gaseteria meeting. They advanced soil borings but hit refusal on bedrock. They will return to the site with a air rotary equipped geoprobe to complete the investigation. A report by the end of July 2011. 7/3/13 - Obligado - I reviewed the Remedial Investigation Report and subsequent monitoring data. 13,000 ppb BTEX in MW5 in the southern portion of the property. All other wells MW1 through MW4 were at or close to groundwater standards. Bedrock was encountered between 5 and 10 ft bgs. Groundwater flow is to the east. Additional delineation is necessary south and east of MW5. 10/3/13 - Obligado - I reviewed the 2Q13 report. BTEX is as high as 5,617 ug/L in MW5. I emailed Steve MUller and requested him to resubmit the Investigation Work Plan. 11/6/14 - Obligado - Gasteria Oil Corp met with DEC at our office to discuss spills sites including Jerome Ave. I informed Gaseteria that the work plan was acceptable. 10/21/15 - Obligado - Gaseteria Meeting with DEC. The additional wells were installed. The plume appears to be well delineated and the maximum BTEX is 1,229 ppb in MW1 and the VOC concentration trends are downward. 11/17/15 - Obligado - I received a Spill Closure Request. I have reviewed all the available information for this spill. Ground water monitoring over the course of 17 quarters demonstrated a consistent downward trend from 13,028 ppb BTEX in MW-5 in 2011 to 474 ug/l BTEX in MW5 in 2015. Off-site migration is minimal, with 111 ug/L BTEX in down gradient well MW6 in the sidewalk along Jerome. The 2005 Delta Baseline assessment report and the 2011 JCB Remedial Investigation Report did not identify any VOCs above CP51 in on-site soil borings. There were low level SVOC hits in a couple shallow soil borings which may be attributable to historic fill. There is likely some residual contamination in the weathered bedrock fractures, which is slowly leaching to groundwater, however, this spill appears to be attenuating naturally and is expected to continue to degrade over time. This spill no longer appears to be a threat to human health or the environment, and additional remediation is not warranted. Spill closure is approved. 12/15/15 - Obligado - I emailed spill closure letter to Steve Muller, cc Vought, Tomasello, Porcelli."

Remarks: "contaminated groundwater found. Data reported to DEC by Delta despite knowledge of Gaseteria since 8/5/2002."

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"5/20/2014 - Feng - Duty Desk. Talked to FF Reder of FDNY HAZMAT (347-203-6886). Something is not functioning and caused the leak in the basement. It is #6 oil, about 50 gallons. About 10-20 gallons went to the sump and the rest on the floor in the basement. The floor

Map ID	Site	Database(s)	EPA ID Number

BASEMENT (Continued) **S109205909**

is in concrete. The majority of the spill has been cleaned up by the FDNY HAZMAT and the rest will be cleaned up by the cleanup company. The boiler has been shutdown. The tank and the pipe are not leaking. FDNY stated that nothing is leaking now. The residents complain about vapor which they can smell it from the first floor. Called Robert Evans (212-643-2063). No information regarding the spill could be obtained. Provide super's contact information. Called the building superb, Fernando (347-836-0060). Due to the language difficulty, he asked a lady to translate. Told the lady about the spill and we are sending a spill responder to inspect the site. Dispatch runner S. Mahat. Assigned the spill to Mahat. 5/20/14 :Mahat Site Visit : DEC Mahat made a site visit. Spill took place during the repair of the feeder line. Speedy Dry was deployed on the spill. Sum pump was turned off. Boiler company is still working on the boiler to heat the water. It is a commercial building with 70 units. Management: Robert Evan 212.643.2063 Email : evanrobertny@aol.com Issa Evan 347.495.3973 Michael Professional Cleanup Company Inc. 917.714.4583 A power wash is schedule on 5/21/14. Michael will keep the Department in the loop with the clean up process. Following things were missing during the site visit : 1. Registration was not on the site 2. Tank room was not maintained properly. 5/21/14: Mahat T/C : DEC Mahat received a call from Mr. Robert Evan requesting for a time to perform a power wash on the basement. The permission is granted because he confirmed that there is no vapor/odor complaint from tenants. Mr. Evan will notify the Department once the contractor is retained to perform the task. 8/19/14: Mahat A voice message was left to Mr. Evan to submit the report for closure. 9/26/14: Mahat Michael from Professional Cleanup Company Inc. performed the clean up of the spill. Super Fernando cleaned the tank room. Based on the site visit and observation spill case does not need any further investigation. Hence, the spill will be closed in the spill data base. "

Remarks: "40-50gal spilled in a basement some made it a sump in the basement. Clean up is in progress. Oil company is on the scene."

BOILER ROOM - APT BUILDING (Continued) **S113817610**

Street New York, NY 10018 Attn. Evan Roberts **property manager** Ph. (212) 695-3510 5:30 PM:- vistied site. met with Issa (347-495-3973), maintenance person at the site. Issa mentioned that the boiler at the site has problem for some time and they are working on it. he mentioned that there are 70 apartments in the building, but only one tenant in apt. 2C has complained to city agencies multiple times. during inspection by NYC DOH inspector earlier today, inspector noticed improper opertion of the boiler and has ordered to turned it off. due to violation issued by DOH, boiler repair company has locked the boiler room and took key with them to avoid access by unauthorized person. so there was no access to boiler room to confirm spill incident. building is located on west side of Harrison Ave. the on-site building is divided in two sections: north and south sections. the two sections are connected in back. Issa mentioned that the boiler is located in basement underneath the western portion of the building, where two sections are connected. Issa mentioned that there is minor dripping when boiler is in operation. as boiler is off now, there is no more spill. checked ground floor lobbies in both sections of the building and found no odors. Apt. 2C is located in south section of the building. discussed with DEC Austin. as there was no odors noted in building and no complaints from any other tenants, he asked to reschedule the site inspection.
06/06/13-Hiralkumar Patel. 10:00 AM:- visited site. met with boiler repair crew. found floor around the boiler covered with speedy dry with small pool of oil in one corner. minor odors in boiler room, only in close proximity to the boiler. as per repair crew, valve was leaking on the supply line. boiler repair crew will cleanup spill on floor. no odors noted in other part of boiler room or basement. the 5,000 gal #6 oil AST sitting on soil in vault with access.
06/12/13-Hiralkumar Patel. 10:15 AM:- visited site. met Issa. inspected boiler room. spill cleaned up and floor was re-painted. found some minor spill under the boiler, happened during filter change today. super will cleanup. boiler room floor found in good condition. found a drain at the end of boiler room ramp, which is in area previously impacted by spill. found minor oily liquid in drain. asked Issa to cleanup oil from drain. Issa mentioned that drain ends into sewer system. no petroleum odors noted in boiler room. Issa mentioned that product grade was changed from #6 to #4 oil about two years ago and tank system was tested at that time. informed him that PBS record must be updated and tank system test result must be submitted for review. 12:41 PM:- sent email to DEC Leszek regarding incorrect information in PBS record. 12:51 PM:- spoke with Mr. Roberts. he mentioned that the building is still using #6 oil and they are in process of changing grade from #6 to #4 oil this summer. informed him about some oil noted in drain and asked to clean it. based on observations during site visits, case closed."

Remarks: "NYC Health Dept was on site responding to complaint of vapor smell and found 4 buckets of oil in the boiler room, 100 sq ft of oil covered floor and ongoing leaking from the boiler."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Registry ID: 110009472052

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"3/8/11 - Raphael Ketani. The spill took place today. I spoke to firefighter Radovic (347) 203-6886 of Hazmat 1. He said that they were working on the fuel system piping in the basement and the oil company came and made a delivery. Before the oil company realized it, 100 gals. of #2 oil had been poured into the basement. I asked Firefighter Radovic about the vapors. He said that he had readings of 81 ppm in the basement. He will get back to me regarding ventilation and any oil to the sump or drains. The building contact is Stanley Epps (646) 401-7193. A representative from HESS Oil, Eric Sutphen (732) 750-6637 is on the scene. HESS will hire someone to do the cleanup. Firefighter Radovic called me back. He said that no drains, sumps or sewers were affected. c/o Veritas property Management 212-799-2365 Mr.Jane Maistri Property Manager same phome # or Mr. Wellington Property Manager. Tenant: Jose Pagan 646-775-1026 03/08/11-Zhune visited the site 05/08/11. Overflow caused the spill. Spill came by the weephole of the tank. Approximately 100 gallons of #2 fuel oil spilled onto the boiler room and into an appartment located behind the wall of the boiler room in the basement. The Fire Department called the Red Cross. Red cross relocated Jose Pagan, his wife and three children one of them is one week old in a hotel for two days. They occupied the appartment in the basement impacted with oil. Vapors in apartment located in basement are strong. Some areas in the upper floors (first, second, third and fouth floor) were likely impacted by vapors. Riteway cleaned spill in the boiler room. 03/09/11-David Chan from Riteway Cleanup Company) sent the following e-mail today 03/09/11. With regards to the spill at 1966 University Ave, the following was the chain of events that took place: Delivery of #2 oil was made. System had a faulty gauge. Oil escaped from the gauge line, at the tank (approximately 100 gallons). Oil traveled down side of tank, through weep holes, onto boiler room floor and into an apartment located nearby (the apartment had laminated wood floors) . All floors were water and chemical (biodegradable degreaser) washed, then vacuumed up with our vac truck. Although surface contamination has been clean, there may be sub-surface contamination that needs to be addressed. The owner said that he was

Map ID	Site	Database(s)	EPA ID Number

APARTMENT BLDG (Continued) **S105056392**

going to address the apartment floor himself. Riteway has not been requested to return as of yet. I believe the spill was originally called in by HESS. 03/09/11- Zhune spoke to Mr. Joe Ostrowski with Riteway As per Mr. Joe they only wiped up and washed the apartment's floor. Floor is wood and is soaked with oil. 03/10/11- Eric Sutphen 732-750-6637 from Hess(Oil Company) sent the following e-mail. As previously discussed here is a summary for the spill information at the site listed above Tuesday, 3/8/11, The customer called and placed the order for the same day stating their was only 100 gallons of inventory. The gauge was very low when the driver arrived he delivered a 999 of 1000 gallon delivery. The driver made contact with the super, checked the gauge before made the delivery, and the super signed the ticket when the driver left. He never heard a whistle but the delivery was made not dependent upon a whistle but rather upon a gauge reading. The super was with the driver the entire time and not a drop of oil exited the vent. Per the super the mechanics from Heat performance (Their burner service) worked on Saturday to make repairs. When I arrived the fire department was already on site and I found that the return line was piped into the vent line, the petrometer was not connected to the tank, and the connection where the petrometer should be connected to the tank and drop leg instead was exposed 2 opening. The oil exited the tank at that point and ran across the skin of the tank beneath the insulation out the weep holes at the base of the insulation as agreed upon by the fire department as well. 03/10/11- Mr. Pagan called and said that Red Croos asked him something in writting to help him to extent his relocation. 03/10/11- Randy Austin and Jame Maistri had a conference phone called. Randy requested to Mr. Maistri proper relocation of residents of apartment impacted with oil. Notification of relocation By COB Friday, March 11, 2011 and clean up of all areas impacted by oil (Floor and walls). 03/10/11- A CSL letter was fax and mailed to Mr. Maistri property manager of Veritas Property Mngement. The letter requested the following: 1.-Summary of Work Performed Conditions of Concrete, Effects on Sewer/Drains and Sealing of Basement Floor. 2.-Installation of a Basement Ventilation System 3.-Performeance of Indoor Air Monitoring and 4.-Relocation of the residents of basement apartment impacted by oil. 03/11/11-Mr. Wellington property manager from Veritas Property Management left a message. He said today 03/11/11. I have been here at the building since 9:00 am in the morning when the cleanup company showed up to clean Mr. Jose Pagan department. the floor is not wood. It's steicky tile over concrete floor. They were able to picked up all oil on top of the tile. They said some have seeping through the wall. They took off at the bottom broke the sheetrock a little bit. Little bit penetrate through the wall. We can close that up that will be no problem. Everything is open up and air up. There is no sense of oil in the basement apartment right now. I wanted to let you know that we are working right now. Also I am in comunicaton with Red Cross to see what type of notification they need in writting to see if they put Mr. Pagan and his family in a hotel for two more days. If you have any question call me to my office phone #. 04/08/11-Zhune visited the site met property manager Mr. Wellington. There are still odors in the boiler room. Absorvent material arround the tank. Contamination under the tank that need to be removed. Did not noticed any odor in the apartment located in the basement. Mr. Wellington informed me that a tenant from floor 2N is complaining of vapors in his apartment. I tried to inspect apartment 2N but Mr. Wilson (tenant) denied access

Map ID	Site	Database(s)	EPA ID Number

APARTMENT BLDG (Continued) **S105056392**

to his apartment. 04/14/11- The NYCDOH inpected apartment 2N today 04/14/11 at 9:05am. DEC-Zhune, Lizzette (Eastmond), Mr. Wellington (Property manager) were in the site at time of Apt 2N was inspected. The NYCDOH inspector Mr. Clouidus Wickham 212-442-3372, 917-295-5862 determined that levels of reading (0.8 ppm) inside the apartment of Mr. wilson are not any threat. It's very mild. He recommended the following to the property owner; 1.- Instalation of ventilation system in the boiler room and apartment in the basement. 2.- Remove absorbent material arround the tank 4.- Remove contamination under the tank 3.- Open door from roof. Yolanda Rivera 212-828-2670 Ext. 203 6/13/14- Yolanda Rivera sent the following email. He (Mr. Pagan) is no longer residing in the building. Apt. is vacant at this time. Legal action was taken to evict him. 6/13/14- Eastmond sent the spill closure letter. Tthe letter stated the following. Upon researching our paper file for the above referenced location several work tickets were found describing the spill clean clean-up. The clean-up started 3/8/2011 with all related work completed on 6/10.2011 At the time of the spill the tank was jacketed with concrete block and was next to a basement apartment. The clean up consisted of removal of the concrete block tank covering, removal of contaminated floor tiles (100 sq/ft) and sections of partition walls in the apartment living room as well. The tank was disconnected, raised and set on steel saddles, reconnected and returned into service. Our work tickets state the following: 3/8/11- approximately 50 to 110 gallons of oil was removed from the floors 3/21/11 80 bags of contaminated debris were removed 3/23/11 100sq/ft of floor tiles were removed from the living room to include portions of existing apartment walls 3/24/1211 additional clean-up continued 3/30/11 The concrete block jacketing covering the tank was removed 3/31/11- 60 bags of contaminated debris were removed to include pressure washing the area clean 4/27/11 80 additional bags of debris were removed 5/2/11 another 80 bags were removed from beneath the existing tank 6/1/11 Temporary tanks were installed and the existing tank emptied 6/2 and 6/3/11 The existing tank was raised and three steel saddle supports were installed 6/6, 6/7 and 10th/2011 The raised tank was re-piped 6/8/11 Removed the temporary tanks On March 13, 2014 we performed an inspection of the tank and the basement and found that the existing 3,000 gallon tank is operating and is now in its own containment vault and is resting on three steel saddle supports elevating it off the floor. The tank floor is painted with an epoxy to include having a fresh coat of paint on the tank. Upon checking our disposal log I ve included the nearest disposal scale thicket that I assume covered the soil disposal. Spill Closed."

Remarks: "Overfill by oil comopany. FD on scene containing and will be attempting cleanup. Oil Co Rep on scene."

DEC Memo:	"03/2/11/2009-Vought-Vought performed site visit and FDNY Lt. Cassidy(Ph:718-476-6288 Fax:718-476-8261) onsite with two trucks. Spill caused by leaking supply line to boiler resulting in #2 heating oil to fill boiler itself and then run down onto concrete floor and into sump with dirt on the bottom and metal sides. FDNY drummed approximately 45 gallons from the puddle on the floor (suggesting no infiltration supported by concrete with no cracks other than sump itself) and also piggybacked the supply and return lines so that the spill stopped. Vought spoke with super (Edwin 917-529-4698) and he learned of spill at 4am when he received odor complaint from tenants in apartment 1A. Site is five story apartment building. At 6am the super smelled oil himself and found puddle of oil on floor and immediately shut down sump and boiler. FDNY notified DEP Hazmat with respect to spill in sump. Edwin provided number of managing agent contact (Lilian cell:917-567-0256 Fax:718-701-0503). Vought inspected apartment 1A and spoke to tenant who stated that odors had abated during spill and Vought left contact information in case further odors should arise. Vought called and left message for Lilian that floor must be powerwashed, sump must be cleaned and to return call immediately to DEC. Vought received callback later during the day from Lilian that she was hiring ABC tank to do the cleanup and they were already onsite and Vought discussed scope of work. 2/12/09-Vought-Called and spoke to Lilian and told her to call DEC Vought when ABC back onsite to continue cleanup. Vought received callback from Lilian who confirmed that ABC was site and powerwashing and cleaning sump as well. Lilian also confirmed that 2071 Walton Avenue Realty Corp was indeed owner. Vought sent CSL to below address as per Acris: 2071 Walton Avenue Realty Corp. 1509 Popham Avenue #5 Bronx, NY 10473 Attn: Lilian Fax:(718)701-0503 DEC requires CSL with one month due date and: 1)cc to FDNY Cassidy 2)updating of PBS registration with current contact information 3)powerwashing of floor 4)removal of contaminated soil from sump and possible collection of endpoints if soil bottom. 02/18/09-Vought-Received call from and spoke to Lilian Baez who called ABC and is awaiting invoices. 03/02/09-Vought-Called Lilian (917-567-0256) and she will be faxing ABC invoices today and submitting PBS registration as well. 03/04/09-Vought-Received fax from Lilian Baez including invoice from

Map ID	Site	Database(s)	EPA ID Number

2071 WALTON AVE (Continued) **S107783488**

Tanks A Lot including cleaning of sump pit. Vought called Lilian to confirm PBS registraton submission and she has not filled it out yet. Vought informed her that case would be closed upon receipt of confirmation of PBS registration. 6/10/10-Vought-Checked PBS registration and confirmed that DEC received and processed updated registration. Spill closed by Vought. 2/26/16-Vought-Called and Lilian in relation to this spill and open spill 1503530 and phone number no longer in service. Vought called PBS contact for same site (PBS 2-604399) and left message with summary of ongoing issues with this spill and possible reopening of closed spill 0812278 and request to return call. "

Remarks: "Caller states oil is leaking in the basement of above building. No further info available. FD is trying to contact an oil company."

DEC Memo:	"7/1/2015 - Feng - Duty Desk. Talked to Zeb Youngman of Zeb Environmental (516-807-6896, ZYoungman@ZebEnvironmental.com). It is a development site. It is one of the Housing Preservation projects. NYCDEP has approved the work plan and they started the excavation. An investigation has been done before the development and no petroleum impacts had been identified. The site is about 6,000 square foot and the excavation has been done to 4,000 square foot already. The excavation is at 14 feet at water table and product was observed on the water table. It appears to be very old spill. No strong odor. They have collected product sample and did a product ID. Endpoint samples were also collected. Test pit was done in the area where product was found but nothing was found. They claim there is no onsite source to the spill. They suspected that the building north of the site there it got huge fuel oil tank might be related to this. They plan to remove the impacted soil and water and collect endpoint and groundwater samples. Sent email to Zeb Youngman for the investigation report and the owner/developer's contact information. Talked to V. Zhune and assigned the spill to her. 1/8/16-Zeb Youngman from ZEB Environmental Solutions,Inc. sent the following email to DEC Feng dated 7/2/15. attached is the subsurface investigation report for 2065 Walton Ave. I will also be sending you the DEP approved RAP. As I had mentioned, the majority of this site is being excavated to a depth of 14' below sidewalk grade. This elevation is just above the groundwater table. Once the site is sheeted and shored we will excavate impacted soils in the smear zone, just below the groundwater table. I will keep you updated and let you know when will be the best time for a site visit. Currently the contractors are removing overburden material and preparing for sheeting and shoring. 2/1/16-Vought-Received call from and spoke to Dave Yudelson in early January (Sive Paget and Risel Ph:212-421-2150 email: dyudelson@sprlaw.com) with regards to spill and Vought requested that Spill Report be sent to Vought as Vought will take on spill to assist DEC Zhune. Yudelson sent Vought an email on 1/28/16 that noted Jeff This is the site we spoke of before your vacation with no onsite source. Please let me know if you need anything else and please send confirmation the spill has been closed. Dave Attached to email was ZEB Environmental Solutions Spill Closure Report dated 1/27/16 and within Report was ZEB Environmental Solutions Remedial Action Plan dated 11/5/14. Vought added Report and enclosed Plan to D2. Vought inspected Spills Database and noted adjacent closed Spill #0812278 at 2071 Walton that was for a #2 fuel oil spill to basement and basement soils. Vought noted no other spills at 2065 Walton. Vought searched PBS database and noted no open or closed PBS records for site. Vought received prior emails from DEC Zhune and listed below in chronological order: Email from ZEB Youngman to DEC Zhune-7/2/15. Email that June, attached is the subsurface investigation report for

I will keep you updated and let you know when will be the best time for a site visit. Currently the contractors are removing overburden material and preparing for sheeting and shoring. Vought added Subsurface Investigation Report dated 10/2/14 to D2. Email from ZEB Youngman to DEC Zhune-7/2/15. Please confirm your receipt Attached to email was Revised RAP dated 11/5/14. Note that this is same Revised RAP that is part of Spill Closure Report noted above. Email from Greenberg Taurig (Evan Preminger Ph:212-801-2189) with cc to Steve Russo sent to DEC Mintzer-1/29/16. Email that Ms. Mintzer, See attached for a copy of the spill incident report (#1503530) for 2065 Walton Avenue, Bronx and the testing results provided by American Environmental Solutions, Inc. Please let me know if you need any additional information. Email from DEC Mintzer to DEC Zhune-1/29/16. Email that Veronica I got a call from counsel for contractors who are currently working on this site and have been encountering contaminated groundwater. Apparently, the contractors were not advised that a spill had been reported back in July 2015 by the site owner. Have you had any contact with the owner regarding addressing this spill? Please let me know the status. Karen Attached to email was American Environmental Solutions Groundwater Sampling report dated 1/14/16. Vought added report to D2. 2/1/16-Vought-Sent email to DEC Mintzer with cc to Zhune, Yudelson, and RSE that Karen, On 1/28/16, I had received a call, and then a separate email, from Sive, Paget & Risel (Dave Yudelson, copied above) that had an attached ZEB Environmental Solutions Spill Closure Report dated 1/27/16 and a request for review. We also had never received the AES Groundwater Sampling Report that was attached to your email below so I am grateful that we have it now to review as well. In an effort to assist Veronica, and due to the high visibility of the case, I will be taking over the project and will get back to you as soon as I review the Reports and file, which should be in the next day or two. Thanks. Yudelson replied via email to Vought and Mintzer that Jeff, Karen - Can you send me a copy of theAES report? . Vought replied Dave, My apologies and I know we spoke about this before but so that Karen may be informed, who are you representing again? We need this info just to be sure an expedited FOIL Request should be completed. Yudelson replied that The developer. Bell urban and B&b supportive. . Vought discussed with DEC Mintzer and as developer is new owner, no FOIL required. Vought sent email to Yudelson with cc to Mintzer that Dave, The AES Report is attached and I will keep you posted on the status of my file review. Vought received call from and spoke to Yudelson who noted that Greenberg Taurig was representing contractor and as noted before Yudelson noted that he was representing owner. Yudelson noted there was a dispute between the contractor and owner and NYCDEP involved as site underwent SEQR review as the future use will be a residence for homeless veterans. Complete File Review by Vought: Subsurface Investigation Report (ZEB Environmental Solutions)- 10/2/14. Report prepared for: B&B Supportive, LLC. 419 Park Avenue South, 18th Floor New York, NY 10016 Investigation included collection of soil, groundwater and soil vapor samples. Site is currently a vacant asphalt parking lot and surrounded by Rite aid to the east, apartment buildings to the north, Montifiore Medical

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

Center to the west, and commercial retail building to the south. Proposal for a ten story residential building with a basement to 14'bgs that will house laundry room, mechanical rooms,and common space (storage rooms, offices, and utility rooms). The first floor will contain a lobby, residential units, and common spaces. The proposed building will occupy the majority of the lot, with the exception of a courtyard area (2,300sf) in the rear of the building, which will be capped with impervious pavement or two feet of clean fill material. Site is a vacant lot since 1980 as per prior Phase I performed by ZEB (not in file) dated March 2014. Site historically had a six story plus basement residential apartment building and then used for parking after building was demolished in 1980. Geotechnical study performed in March 2014 noted bedrock at 47-59'bg and groundwater at 15'bg. Expected groundwater flow to the southwest. AKRF prepared a Subsurface Investigation Sampling Protocol and Health and Safety Plan which was approved by NYCHPD. Plan proposed soil borings with collection of soil vapor, soil and groundwater samples. Seven soil borings were installed with collection of fifteen soil samples, three groundwater samples, and four soil gas samples. Continuous sampling performed to groundwater. Soil samples were collected at highest PID and deepest dry samples. Soil vapor samples collected at 14'bg. Soil vapor analyses show: 7ug/m3 PCE(SV-1), 115ug/m3 toluene(SV-1), 31ug/m3 PCE(SV-2), 64ug/m3 TCE(SV-2), 154ug/m3 toluene(SV-2), 24ug/m3 PCE(SV-3), 6ug/m3 TCE(SV-3), 5ug/m3 DCE(SV-3), 151ug/m3 toluene(SV-3), 53ug/m3 PCE(SV-4), and 224ug/m3 toluene(SV-4). Report notes that chlorinated solvent concentrations do not appear to be the result of an onsite source of contamination and that Chlorinated VOC concentrations were generally detected below the NYSDOH Matrices for soil vapor intrusion concerns, with the exception of trichloroethene, which was detected in sample SV-2 (63.95ug/m3) and SV-3 (6.34 ug/m3) . Report concludes that In order to address the historic fill material and slightly elevated concentrations of SVOCs, pesticides and metals detected in the soils, a Remedial Action Plan (RAP) and Construction Health and Safety Plan (CHASP) have been developed for the site. These plans have been prepared to support the proposed re-development of the site and detail the best management practices to be employed during construction. These reports have been submitted under separate cover. 2/2/15-Vought-Vought searched Google Maps and no adjacent drycleaners or other suspected source of chlorinated solvents due to site usage at time of Google photos (summer as per clothing on subjects in photos). Received email from OGC Mintzer inquiring about when property was sold to developers and Vought sent reply with cc to RSE and RHWRE that Karen, I see that Dave is working his contacts here at DEC lol. The Spill was indeed called in this summer on 7/1/15 by the owner s (B&B Solutions LLC) environmental consultant (ZEB Environmental) who Dave is working closely with as he has submitted their reports to me in recent days. NYC Property Tax records indicate B&B Solutions, who Dave is working for, purchased the property in June 2014, a year before the spill was called in by his consultant. Dave noted the consultant was initially hired as part of a SEQR review and that is the reason for the initial investigation. I was hoping this would be an easy closure as we have a contractor owner dispute with Dave Yudelson on one side and Steve Russo on the other and with yourself in between. I am currently reviewing and will discuss with you before I move forward but I have already seen chlorinated solvent impacts to soil vapor possibly in mitigate range

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

as per our decision matrix. This will necessitate NYSDOH review as the site will be used as a residence for homeless veterans. NYSDOH, in my experience and upon reviewing my summary email which I will need to draft and send, will likely require design and installation of a sub-slab depressurization system to alleviate the soil vapor issue to the future occupants. They will also likely performance of indoor air sampling or a check of system diagnostics after the residence is constructed to ensure the system is working effectively. Due to the above we will probably not be able to close the spill until the building is constructed and the above is performed. I will complete my review and discuss with Randy and Jane (due to the hazardous chlorinated solvents issue), and then with you, before I or we respond to any legal counsel. Thanks again for your help . Vought discussed site with Mintzer as well in person. 2/3/16-Vought-Received call from and spoke to Yudelson and requested copy of Phase I. OGC Mintzer also noted that she had received additional calls from both Russo and Yudelson regarding spill and Vought noted file was still under review. Vought received Phase I via email and Vought sent reply to Yudelson with cc to Mintzer that Dave, Thanks for the Phase I as requested. I will incorporate it in my review and we will get back to you after I complete the file review and have some internal discussion here at the DEC. I am hoping this will be tomorrow or Friday as I still have the Phase I, Remedial Action Plan, and Spill Closure Report to review. Vought received another email from Yudelson that The slab is about a foot above water and there will be a double slab with a liquid boot vapor barrier between the two and up the side. I will get a drawing. Vought replied with cc to DEC Mintzer that Dave, Thanks for the information below and if the development specifics are not in any of the reports submitted to date, then please submit more details along with the drawing and please send them as soon as possible so that we may incorporate them into our review. Vought received email from Yudelson with cc to RHWRE with pdf of proposed building. Vought added Phase I and PDF of proposed footings to D2. Continued File Review by Vought: Phase I Environmental Site Assessment (ZEB Environmental Solutions)-March 2014. Prepared for B&B Supportive, LLC. ZEB did not recommend further investigation or sampling at the site at this time of report. Site an asphalt parking lot at time of Phase I. Estimated depth to water is 15’bg. Site had a multi-story residential building from 1927-1950 and no tanks on Sanborn Maps. Maps from 1950 show a plating facility to the west and an auto sales shop to the northwest. Site currently owned by B&B Supportive, LLC. Phase I concludes that there are no recognized environmental conditions, no historical recognized environmental conditions and no contained recognized environmental conditions. Remedial Action Plan (ZEB Environmental Solutions)-11/5/14. Prepared for B&B Supportive LLC. Vapor barrier installation is proposed to prevent the potential future vapor intrusion into the planned building structure. In addition, soils excavated onsite will be properly removed off site and disposed of at a permitted facility. However, historical (1950-1998) land use maps identified potential off-site sources of contamination including an auto sales/service/repair shop adjacent (Northwest) to the Site, and an electroplating works adjacent (west)to the site. Geotechnical study in March 2014 showed groundwater at 14’bg. Plan notes that The project developers propose to build a 10-story residential building, with 92 units. Ninety-one (91) will be studios for persons earning less than 60% of area median income, including 58 homeless veterans.

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

The Plan also notes The proposed building will be constructed with a basement (~14-feet bgs), that will house a laundry room, mechanical rooms, and common space (storage rooms, offices, and utility rooms). The first floor will contain a lobby, residential units, and common spaces. The proposed building will occupy the majority of the lot, with the exception of a courtyard area (2,300sf) in the rear of the building, which will be capped with impervious pavement or two feet of clean fill material. Groundwater, which has been identified at approximately 15 feet below grade, is not expected to be encountered during construction. Although, the basement slab will be constructed at or slightly above the groundwater table. Plan notes permits will be obtained from NYCOER for dewatering permits. The proposed development includes a courtyard area in the rear of the site. This area is proposed to be capped with impervious pavement. The impervious pavement will provide a barrier to prevent contact with site soils. Although not proposed, all uncapped areas (landscape areas or lawn) will be covered with a minimum of two feet of clean fill material . As mentioned above, the groundwater table exists at approximately 15 feet below grade at the site. The basement slab will be constructed just above the groundwater table. A Grace Preprufe 300 vapor barrier is proposed to be installed beneath the building. The Preprufe 300 membrane will act as a vapor barrier to prevent the potential future vapor migration into the planned building structure. Manufacturer s specifications for the vapor barrier, including permeability and chemical resistance information is provided in Appendix C. The membrane will cover the entire footprint of the building and will be installed over a sub grade free of sharp rocks, roots or other protrusions, which may cause puncturing. In addition, vapor barrier material will be installed on subgrade foundation walls. Plan proposes submission of a Remedial Action Completion Report to NYCDEP for review. 2/4/16-Vought-Vought called ZEB Environmental Solutions and spoke with Mike and he noted that site excavation and piling installation had begun and Vought requested that he or Zeb submit an email with the current site status. Vought also left message that SSDS may be needed as per NYSDOH and that no further development should occur until feedback received from the Department. Vought also called and spoke to OER Chawla who noted that site was not under any OER Programs including the NYC BCP or the E-designation program. Continued file review by Vought: Spill Closure Report (ZEB Environmental Solutions)-1/27/16. Additional sampling performed on 7/1/15 due to suspected fuel oil impacts identified at the groundwater table interface on the northern edge of the Site during excavation for redevelopment. The Site has been substantially excavated lot line to lot line to approximately 14 feet below grade and no contaminated soil or other petroleum source (tanks, pipes etc.) has been identified. The suspected impacts at the smear zone are indicative of an old, highly weathered offsite source. It is not practical or feasible to remove the smear zone and, thus, based on the lack of any current or historical source on the Site, we respectfully request that this Spill be closed and a no further action letter be issued. The property is 7,643 square feet in size and is currently being developed/remediated under a NYCDEP approved Remedial Action Plan (RAP) with the supervision of ZEB. The groundwater table exists at approximately 15 feet below sidewalk grade and was exposed during the removal of a historic concrete footing that extended into the groundwater table. It is anticipated that the remaining requirements detailed in the RAP, will be

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

completed within the next 8-12 weeks. Summary contains soil and groundwater data from previous investigation. Groundwater Sampling report (American Environmental Solutions(AES))-1/14/16. ...AES collected one groundwater sample from two drill holes..... on 1/7/16. Report notes workers should be advised for potential to exposure to contaminated groundwater that may be encountered during construction activities. Report also notes that ...the groundwater must be treated prior to discharge to the NYC Sewer . NOTE: No site plan with sample location or description of location of water sample provided in AES Report. Groundwater analyses show: 120ppb phenol(GW1), 61ppb acetone(GW1), 110ppb phenanthrene(GW1). 2/4/16-Vought-Vougth received call from and spoke to Zeb Youngman (ZEB Environmental) and he noted that SSDS may not be needed as plans has changed and all soils were being removed to the water table. Vought requested that he submit a clarification to DEC as soon as possible. Discussed site with RHWRE and reviewed summary site plans. RHWRE noted that as chlorinated solvents non-detect in soil or groundwater and their was no historical site use that related to the discharge of chlorinated solvents, that DEC would not require further investigation with respect to the soil vapor. Also discussed phenol concentrations and Vought/RHWRE agreed they were of no further concern due to: 1)prior soil and groundwater sampling data from Subsurface Investigation Report, which included fifteen soil samples and three groundwater samples distributed across the site, were non-detectable for phenol; the reported concentrations from the AES report are within natural attenuation ranges; there is no historical site use of phenol as per the Phase I Environmental Site Assessment and additional reports submitted. Vought and RWHRE also discussed that, as per Vought's recent conversation with ZEB Environmental, that the site would be developed into the water table and as such all soils would be removed to the water table resulting in possibly no DOH requirement of an SSDS. Vought noted awaiting submission of development clarification from ZEB as per discussion earlier today. Received email from Yudelson that Jeff The soil gas was taken 14 +- feet bsg while the site had paved and with a building for all of time. It is now excavated to +- 14 feet. No chlorinateds have been found in water. Is it an option to do another round of soil gas and if its negative there is not reason to involve DOH? . 2/5/16-Vought-Copied on email from Russo to RWHRE with cc to OGC Mintzer that I called Jeff. I just wanted to know whether DEC deems it permissible to move groundwater that does not have any visible Petroleum Product to other similar excavations on the Building as a way to dewater while installing the pile caps, as suggested by owner and its counsel Dave Yudelson. It is important to my client that the Department be okay with any proposed additional work involving the groundwater. That is what I wanted to discuss. Received Vapor Barrier Details report from ZEB via email with cc to Yudelson and email that Good afternoon Jeff, Please see attached letter as requested. Have a great weekend. Vought added letter to D2. Vought copied on email from Russo to RHWRE where he requested to RWHRE's number to discuss site and RWHRE replied there was nothing to discuss until NYSODH reviewed the soil vapor issue. Vought sent email to Russo with cc to all that Steve, My apologies for missing your call. I have been quite busy today with the crane collapse in lower Manhattan. I will discuss the below with the Division of Water on Monday to see if there are any objections to the proposal below and let you know. OGC Mintzer sent email to Russon with cc to RWHRE, DEC Southwell and Vought that Jeff conferred with

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

water staff and it s permissible to move groundwater that does not have any visible petroleum product to other similar excavations in the building as a way to dewater while installing piling caps. Any discharges to NYC sewers must in accordance with NYCDEP regulations.With respect to the spill review, Jeff is reviewing documentation re the development plan and is drafting a file summary email to NYSDOH. He will copy you once it is sent.
2/8/16-Vought-Spoke with RWHRE and DEC Selvin Southwell and reviewed groundwater analyses and DEC has no objections to Russo's proposal above. Vought sent email to OGC Mintzer for review and possible forwarding to Russo with draft reply to Russo approving proposal and note that file summary being prepared to NYSDOH. Vought reviewed Vapor Barrier Details: Vapor Barrier Details (ZEB Environmental Solutions)-2/5/16. Groundwater at the site varies between 14+ and 15 feet below grade. The site has since been excavated to just above water table and nearly the final grade of the bottom of the slab. The basement slab is proposed to be constructed at a depth of 14 . Grace Preprufe 300R had been proposed beneath the basement slab and Grace Preprufe 160R had been proposed for all subgrade sidewalls as a waterproofing system and as a vapor barrier. This system, however, has been modified to now provide for Liquid Boot to be applied beneath the basement slab. The construction plans detailing this installation are attached hereto. It has been suggested that a sub-slab depressurization system (SSDS) be installed beneath the basement slab. However, due to the high groundwater table, which exists at the basement slab elevation, an SSDS will be ineffective at this site as it will be below the groundwater table. However, it should be noted that the substantial waterproofing/vapor barrier system to be installed will prevent the potential for vapor intrusion. Attached please find the vapor resistance specifications for Liquid Boot and Preprufe 160. It is respectfully suggested that an SSDS is not only unwarranted here because of the data and excavation, it is also not appropriate from an engineering perspective due to the slab being potentially submerged in groundwater at times. It has been our consistent experience that the relevant agencies, including NYSDOH, have not required SSDS in these hydrogeological conditions. If it would alleviate any lingering concerns, we are amenable to resampling soil gas in the soil above the water table to confirm no TCE is present. . Russo sent email to OGC Mintzer requesting and update on request to move water on site.
2/18/16-Vought-Email review to date and actions taken by date review by Vought as Vought was out of office on extended family sick leave. Email from George Constantopes (GKC Industries email:gconstantopes@gkcindustries.com Ph:516-767-1100ext101) to Vought-2/10/16. Email that We are the General contractors for the project located at 2065 Walton Ave. I would greatly appreciate it if you could call me at your earliest convenience regarding the site and the contaminated ground water issues. I am getting conflicting feedback on the severity of the contaminated water and the DEC dewatering requirements. The safety of the site personnel and people in the surrounding areas is our top priority. I can be reached on my cell @ 917-533-6043. Thank you in advance for your attention to this matter. Email from Vought to GKC Constantopes with cc to OGC Mintzer-2/10/16. Email that Mr Constantopes,I apologize for not getting back to you sooner but my mother has been in the hospital all week and I am still out of office. Please send the following with respect to an inquiry on dewatering last week on the above referenced

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

site. Jeff conferred with water staff and it's permissible to move groundwater that does not have any visible petroleum product to other similar excavations in the building as a way to dewater while installing piling caps. Any discharges to NYC sewers must in accordance with NYCDEP regulations.With respect to the spill review, Jeff is reviewing documentation re the development plan and is drafting a file summary email to NYSDOH. He will copy you once it is sent. I plan on being in the office tomorrow if you have any additional questions. Thanks. Vought received approval with edits from OGC Minzter on draft email to NYSDOH. Email from GKC Constantopes to Vought with cc to OGC Minzter and Russo-2/11/16. Email that Jeff, Thank you for the taking the time to talk to me today. Attached are the photos as discussed. Clearly there is oil in the water and floating on the water. Floating water was visible in in approximately 70 holes throughout the site thus far. The grade is currently excavated just above the existing water level. Furthermore, some of the field workers complained of the strong odors emanating from the excavated areas causing some of them to complain about headaches. I appreciate the clarification per the below. What was proposed on this site, is for the floating oil to be skimmed and then locally pumped from one part of the site to the other. Obviously, this is problematic. I will send you the analytical list and attachments via separate email. Hoping the best for your mom. Vought added six attached photos taken from August to October 2015 to D2. Vought reviewed site photos on 2/18/16 with RSE and photos are from test pits of unknown locations and show water with turbid brown water with dark liquid on top. No clear signs of petroleum such as fresh red color or heavy black viscous oil however identification of substance cannot be confirmed via site photos. Vought to perform site visit. Email from GKC Constantopes to Vought-2/11/16. Email that Jeff, Please see attached analytical. I will send you more as they become available soon. Also, my office is working on the scaled site plan with the photo locations. Vought added attached analyses to D2. Vought reviewed groundwater analyses and they were non detectable for petroleum VOCs including BTEX and MTBE. Soil sample analyses (unknown depth) show: 17ppb xylenes, 440ppb p-isopropyltoluene which are both under PART 375 Unrestricted SCOs. Method Modified 8100 analyses on test pit water grab sample showed 1960ppm #2 fuel oil/diesel. Method Modified 8100 analyses on test pit soil sample showed 14,800ppm #2 fuel oil/diesel. Note that development plans as per ZEB include removal of all on-site soils to the water table as per vapor barrier details letter. Email from GKC Constantopes to Vought-2/11/16. Email that Hi Jeff, Attached is a photo with site plan. We do have more photos and are in the process of preparing the site plan. We will send that out to you tomorrow. Vought added site plan to D2. Email from GKC Constantopes to Vought-2/11/16. Email that Jeffrey, Per your request, see attached scaled site plan with the corresponding photos. Hope your mother is doing well. Enjoy your weekend. Vought added Picture Location Map to D2. 2/16/16-Vought-Site visit by Vought. Onsite Vought met ZEB Daniel D'Arcy and B&B Urban Elisa Barnes (elisa@BandBUrban.com Ph:646-484-5700x10). Entire site was excavated to a depth of approximately 12' below grade. Ongoing rain during site visit resulting in puddled water on top of soil across majority of site and no sheen or free product noted and no olfactory detections of petroleum as well. No sheen in puddled water in agreement with lack of soil contamination noted in prior soil boring and well installation investigation. ZEB D'Arcy noted that another two feet

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

would have to be excavated to hit the water table and as such Vought noted that another DEC site inspection would be performed upon excavation of the site to the water table so that any reported product could be observed directly. Vought later spoke to ZEB Youngman and noted that DEC would also be requiring collection of one bottom groundwater grab sample from the water table when the site is excavated in entirety to the water table. 2/18/16-Vought-Email from GKC Constantopes to Vought with cc to OGC Mintzer and Russo that Jeff, Thank you for visiting the site yesterday. I understand the visible water yesterday was surface water from the rain and melted snow. The current elevation of excavation is approx 6-12 inches above the ground water level. Per your discussion with Paul Rivera and Jim Spence of GKC Industries; we will commence the excavation process for the trenching of the pile caps and grade beams next week. At the time you will be able to see the floating potroluem product. I will notify you when the open trenches with the visible ground water will be ready for your review. We will conduct further testing as well once the trenches are open. Of course we will send you the results of such tests. I also want to highlite the levels of #2 fuel oil/Diesel shown pages 6 & 7 (in bold) of the analytical report I sent you last week. An additional copy is attched for your convenience, and the referenced pages pasted below. Thank you in advance for your help in this matter. Vought sent reply that George, The Department looks forward to examination of the excavation upon reaching the water table and any corresponding test results. I have also reviewed the analyses you referred to below and will issue requirements, if any, after the site visit is performed and the results are discussed internally. Thanks. 2/19/16-Vought-For possible future planning purposes for contingency if product was found in excavation, Vought examined closed spill 0812278 at adjacent property (spill responded to, and closed by, Vought) that reportedly abuts the seepage location. Spill 0812278 was caused by a reported one-time spill event that resulted in a loss of #2 fuel oil to the concrete floor and soil bottomed sump in the basement of 2069-2071 Walton Avenue. Invoices submitted by Tanks A Lot showing that sump had been cleaned. Spill 0812278 may be reopened if product is present during inspection. Vought reviewed PBS Registration 2-604399 for site and it has a 5000-gallon AST that as such does not require routine tightness testing. If product is noted on water table, reopening of Spill 0812278 will be considered. Vought called and spoke to ZEB Youngman and he noted there was already a contingency plan in place of product was found in excavation. Youngman will inquire as if he can send Vought the contingency plan. Vought received email from Youngman that Jeff, See attached. Give me a call if you have questions. Ownership says that you don’t need to speak with Yudelson any more and you shouldn’t have to speak with GKC or their attorneys. Have a good weekend. I will be on vaca next week but available by email . Vought then received another email from Youngman that noted Jeff,Please disregard the last email attachment I had sent. Apparently, it was never provided to GKC. However, this one attached was provided to GKC and Steve Russo on 2/4 or 2/5. Vought sent reply that Zeb,Thanks for the info and good to know there is a contingency plan in place if product is found once the development excavation reaches the water table. Looking forward to receiving your notice that the site has been excavated to that point so that I can perform the inspection. Vought added the dewatering MOU dated 2/4/16 to D2. Vought also noted the MOU is not signed. The unsigned MOU notes that if visible

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

suspected petroleum sheen or product (Petroleum Product) is encountered on groundwater in the excavation for Specified Building Components, Contractor shall immediately notify Owner and Owner shall, at its sole costs and expense, arrange for the removal and lawful disposal of the Petroleum Product either by vacuum type truck or by manually removing it via absorbent pads and/or booms . Vought sent reply to Youngman that Zeb, I just reviewed the contingency plan MOU and the MOU is not signed by both parties so I am assuming there is no current agreement on the plan if product is found. As such after my site visit, if product is noted, I will return to the office and discuss internally before issuing any possible recovery requirements. Vought sent request to OGC Mintzer to have meeting to discuss updates on project. 2/25/16-Vought-Teleconference with OGC Mintzer and Yudelson to discuss status of site. Yudelson noted that contractor is behind schedule and requested a that a Stipulation Agreement be issues to the owner. OGC Mintzer and Vought replied that as the contamination could not be confirmed to date, that the Stipulation would have to be the standard STIP (albeit Yudelson was requesting and abbreviated CAP). Yudelson to follow up with OGC Mintzer and Vought via email. 2/26/16-Vought-Received email from Constantopes with cc to all that Jeff,Due to the weather and site logistical constraints, our excavation/concrete subcontractor has not commenced with the excavation this week as initially anticipated. We expect to have the excavation started next week. I will notify you once the excavation has commenced and the contaminated ground water is visible for examination. I am also attaching a video of the ground water in a small area of the site when we had a tanker truck dewatering. I have tried sending this to you before, but, it bounced back. The attached is a condensed version of the video. Called old contact on closed spill #0812278 and Lilian and phone number no longer in service. Vought called PBS contact for same site (PBS 2-604399) and left message with summary of ongoing issues with this spill and possible reopening of closed spill 0812278 and request to return call. 2/29/16-Vought-Received email from Yudelson to call his cell phone as he will be at Walton this afternoon. He noted it would be a good time to meet at site unannounced and unattended... by rest of group. He noted we should be able to have contractor perform test pits to inspect for water table condition and collect samples if necessary. Vought called and spoke to Youngman and noted that due to teleconference with Mintzer/Yudelson on 2/26 as well as involvement of site by Russo and nature of reported groundwater contamination, that Vought did not want to perform a test pit inspection announced and would have to discuss with OGC and would likely need representatives of both contractor (Constantopes) and owner (Zeb) at during any DEC test pit inspection. Youngman noted that he was no longer requesting site visit today as they will be performing excavation of part of site for pile cap installation and he was currently buying absorbent pads and boom in case product was found. Vought noted that if product was found then it would have to be recovered and as noted before, a dissolved groundwater sample would have to be collected along with site plan. Photo shows excavation with groundwater flowing into it, with a dark liquid, possibly degraded fuel oil. 3/4/16-Vought-Email review to date by Vought: Email from GKC Constantopes to Vought with cc to all parties-3/1/16. Email that Jeff, We have commenced our trenching yesterday and the ground water table is now exposed. The area that we have started to excavate does have visual floating petroleum product and smell of oil

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

is prevalent upon excavation. However, it does not appear to have as much floating oil as shown in the pictures and video I have sent you previously. This seems to be best case scenario. We had samples taken this morning and anticipate receipt of the test results in the next 2-3 days. I will forward you the results when they are received. Please let me know your availability for a site visit so that I can meet you there. You can contact me on my cell @ 917-533-6043. I will also try calling you later this afternoon to coordinate. Thank you in advance for your help in this matter. Email from Vought to All Parties-3/3/16. Email that Gentlemen, Unfortunately I was in training all day yesterday and could not return the multiple emails sent with regards to a site visit. I am available all day today and the morning tomorrow this inspection. I would suggest the following possible times: Today (3/3/16) at 1p Tomorrow (3/4/16) at 10am. With regards to attendees to this meeting, I respectfully request that we just keep the attendees to property owners, contractors, and consultants. Due to the high level of counsel involvement, if they are present the site visit, we will likely not be able to freely discuss and brainstorm any possible issues in detail which is needed in a timely fashion so the project can progress. If counsel prefers, (and feel free to let us know via this email), we can keep the site visit solely focused on observations and postpone issuance of any requirements until a teleconference is held including all parties and counsel as well. Thanks and please let me know which of the above time is acceptable for your entities Email from Constantopes to Vought with cc to all-3/3/16. Email that Jeff, GKC Industries (the contractor) is fine with either proposed times below. Jim Spence, our site representative is there all day today and tomorrow. Furthermore, we are ok with having a site meeting without attorneys. On another note. Be advised that Steve Russo of Greenburg Traurig is no longer handling this matter for us. Chris Georgoulis is our attorney for this and other matters relating to this project (he is cc d on this email). Also, Jim DeMartinis (Seacliff Environmental) is our environmental consultant and Ariel (AMC engineering) is our dewatering engineer who are both cc d on this email. Email from Yudelson to Vought with cc to Mintzer and Youngman-3/3/16. Email that Russo was no longer working on case and that Zeb Youngman would be there at 1pm. Email from GKC Constantopes to Vought-3/3/16. Email that Hi Jeff, Please see the attached results from the sample we pulled a couple of days ago. Vought added attached results to D2 electronic filing system. Report notes that The lab report indicates a few hits related to aged fuel oil contaminants. All parameters met the DEP BWT s discharge to sewer criteria. The following parameters were found in the groundwater which are associated with aged fuel oil. Fluorene(18 ppb), Phenanthrene(29ppb), Phenol(9.2ppb), and Pyrene(22ppb). Vought noted that these contaminants are not VOCs and they are also within natural attenuation ranges and as such require no further action with respect to DEC. Vought sent copy of this note entry to Constantopes on 3/4/16 and received reply that Jim Demartinis of Seacliff Environmental would review the results as well. Email from Vought to OGC Minzter-3/3/16. Email with draft language of the results of Vought's site visit on 3/3/16 and request to review and edit prior to sending to all parties. Vought later received her suggested edits and incorporated into following email. Email from Vought to all parties including NYSDOH-3/3/16. Email that To All, The Department performed a site inspection on 3/3/16 at 1pm and met with the site owner, Zeb Youngman from ZEB Environmental, and

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

Jim Spence from GCK Industries. During the inspection, the Department noted no recoverable free product in the excavations which ran along the northern boundary of the site, adjacent to the closed spill at 2071 Walton Avenue. As discussed onsite, the Department requires recovery of free product, if found during excavation activities, and has no objections to the use of absorbent pads and boom as a primary method. If significant product is encountered during excavation, such as anything larger than a 5 x 5 patch, then the Department requires notification via a call to my cell phone (917-577-1728) so that a Department site visit may be performed and reopening of the spill at 2071 Walton Avenue may be considered. The Department requires no further investigation of the site at this time due to the numerous prior investigations by independent parties including multiple rounds of ground groundwater sampling that showed no detections of petroleum VOCs. Furthermore, any residual product, if found, would likely be related to the 6 year old spill at 2071 Walton Avenue. Due to the age of that spill, it is likely that any fractionation of dissolved groundwater contamination out of the reported one time spill event would have taken place, also resulting in the observed non-detections of petroleum VOCs. I will be drafting a summary email to NYSDOH (copied above) with attachments and copied to you all to ensure that they have no objections to the development as proposed. Upon NYSDOH review and approval, and assuming no unexpected developments, the Department will consider Spill closure. Thanks. 3/4/16-Vought-Sent email to NYSDOH Hughes/Walz and NYCDOH D'Andrea/Friedman with cc to all parties that Mike/Nathan, As noted in my prior email today that you were copied on earlier, I am hoping NYSDOH will be able to review and comment on the development plans and associated vapor/moisture mitigation efforts for the above referenced site. Attached above are my summary site plans, abbreviated pertinent reports, and the spill report with a chronological history. A site summary is as follows:The site was used an asphalt parking lot since 1980 and before that it contained a six-story residential apartment building similar to the neighboring adjacent building. Currently the majority of the site has been excavated to a depth of 13 below grade with the installation of shoring as a part of site development with a proposed ten-story residence for homeless veterans. The proposed veteran s residence has also undergone a City Environmental Quality Review (CEQR) and to date there have been no indications of NYCDOH review of development plans. Groundwater at the site is 15 below grade and development plans are for a basement foundation at a depth of 14 below grade. Due to the proximal water table, the consultant is proposing use of Grace PrePrufe moisture barrier as efforts for vapor and moisture mitigation. Reports submitted to date show no soil contamination at the site above CP-51 Unrestricted Soil Cleanup Objectives and multiple rounds of groundwater sampling were non-detectable or within natural attenuation ranges for petroleum VOCs. Chlorinated solvents were, however, detected in soil vapor samples but were not detected in soil or groundwater samples. Spills Unit discussed this with the Hazardous Waste Unit and no further investigation was warranted for the chlorinated solvent contamination in soil vapor. Reports submitted to date show no prior use of chlorinated solvents at the site and there are also no historical spills or tanks registered at the site. The Department has received reports of olfactory petroleum odors and photos of possibly residual degraded fuel oil flowing into the site excavation likely from a formerly closed heating oil spill located at 2071 Walton Avenue. The site excavation was extended to

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

groundwater adjacent to 2071 Walton and on 3/3/16, the Department performed a site inspection and noted no recoverable free product.The Department in the past, on other sites, has received documentation from Grace that their PrePrufe vapor barrier is compatible with petroleum. The Department requires no further soil, groundwater, or soil vapor investigation of the site at this time due to the numerous prior investigations by independent parties including multiple rounds of groundwater sampling that showed no detections of petroleum VOCs. Furthermore, any residual product, if found, would likely be related to the 6-year old spill at 2071 Walton Avenue. Due to the age of that spill, it is likely that any fractionation of dissolved groundwater contamination out of the reported one time spill event would have taken place, also resulting in the observed non-detections of petroleum VOCs. As always I thank you for your time and if you have any additional questions, comments, or need the reports in full, please let me know. 3/7/16-Vought-Email from Zeb Youngman to All Parties. Email that Good morning Jeff, Attached are the laboratory analytical results from the groundwater samples collected from two excavations on March 2, 2016. As shown, no VOCs or SVOCs were detected above NYSDEC Groundwater Standards. We look forward to closure of the Spill File. Thanks again, Vought added attached PDF of analyses to D2. Two groundwater samples collected, no locations specified, are all under TOGS 1.1.1 Groundwater Standards. Youngman resent email with NYSDOH attached. 3/9/16-Vought-Received email inquiry from ZEB Youngman with respect to status of NYSDOH review and Vought sent email to NYSDOH Walz who noted that he was reviewing DEC email and data today. Email from GKC Constantopes to all parties including NYSDOH that Jeff,Please see attached letter that has been sent to the owners this morning. We are requesting ownership provide an updated DEP approved CHASP and expanded EPA Method 8260. This expanded VOC analyses would assist the owner, and us as the general contractor, to protect our workers and the local community going forward. I addition, we are in the process of drafting a letter to ownership requesting the required formal written out plan to deal with the groundwater and soil encountered during excavation (an addendum to the RAP approved by DEP). The reason for this that VOCs were detected in previous investigations and are still being detected in groundwater, however, the floating product was truly not anticipated and certainly is not mentioned in the RAP. I thought you might want to be aware this. Vought sent email to NYSDOH Walz/Hughes with cc to OGC Mintzer with preliminary response and notes and will discuss with OGC Mintzer to see if a reply to Gary is warranted as it was not requested. NYSDOH Walz replied via email asking what future use of basement was and Vought sent reply with basement future use as per Remedial Action Plan which noted The proposed building will be constructed with a basement (~14-feet bgs), that will house a laundry room, mechanical rooms, and common space (storage rooms, offices, and utility rooms). 3/9/16-Vought-Received message from NYSDOH Walz with cc to all parties (as per Vought's request) including Mintzer, Georgoulis, Yudelson, Constantopes that Jeff, I have reviewed the reports and the Remedial Action Plan for the above reference site. Based on my review, I understand that there are non-detect (ND) concentrations of petroleum and chlorinated volatile organic compounds (VOCs) detected in on-site groundwater and low level to ND concentrations in soil. Soil vapor samples results indicated petroleum and chlorinated VOCs were detected, however, not at levels that would be of concern for impacts to indoor air. Furthermore, no

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

on-site vapor source exists and the Remedial Action Plan calls for inclusion of a continuous vapor barrier across the entire footprint of the building along with a two part slab that would prohibit potential future vapor migration into the building. Based on the information above I believe the Remedial Action Plan is protective of public health. If you have any questions regarding my comments please give me a call. Thanks. Vought sent reply that Nate, Thank you for your expeditious review of the development plans and reports. I will discuss the results of your review, today s email from GKC, and possible spill closure with our Regional Attorney and keep you posted. 3/15/16-Vought-Email review to date: Email from Youngman to Vought-3/9/16. Email that GKC requiring revisions to CHASP which he was revising to include petroleum section and he is also working with DEP Winter. Youngman requested notification when spill was closed. Email from GKC P Rivera to Yudelson/Vought/Geourgoulis/DeMartinis/Constantopes-3/14/16. Email that Elisa: Please be advised that GKC Industries has retained Frederick Eisenbud of Campolo, Middleton & McCormick LLP to represent us on all matters related to contaminated water at 2065 Walton Avenue. Please copy Mr. Eisenbud on all future communications regarding contaminated water (feisenbud@cmmllp.com). Vought forwarded email to OGC Mintzer. CMMLLP Frederick Eisenbud replied to all parties that Thank you. My contact information is below. I request that I be copied on all communications sent to any GKC representative by the owner or anyone acting on behalf of the owner. Vought forwarded email to OGC Mintzer. Email from GKC P Rivera to B&B Urban Barnes with cc to all parties from 3/14/16 email above-3/14/16. Email that Elisa:With regard to the contaminated water at 2065 Walton Avenue, please provide copies of the following: 1.Spill closeout application and documentation submitted to DEC 2.Results of groundwater samples taken by ZEB Environmental on 3/10/16 3.Results of any/all samples taken by ZEB Environmental since NTP was issued 4.Copy of all ZEB Environmental Safety Meetings to date 5. We request that the Revised CHASP and RAP be given to us for our attorney and consultants to review before submittal to DEP. Email from Yudelson to Vought-3/14/16. Email requesting status of spill closure. Email from ZEB Youngman to Vought-3/14/16. Email requesting status of spill closure. 3/16/16-Vought-Discussed above emails with OGC Mintzer on 3/15. Spill closed due to the following: no detections of petroleum compounds in soil above CP-51 Unrestricted Soil Cleanup Objectives; no petroleum VOCs detected in groundwater; removal of all soils at site to 6’ above water table; design of future homeless veteran’s residence with a Grace PrePrufe petroleum compatible moisture barrier that will prevent any impact to future occupants of residence; review and no objection to development plans and moisture/vapor mitigation plans by NYSDOH; unfeasibility of further investigation and remediation of closed spill at 2071 Walton Avenue due to depth of groundwater and one time reported spill event, no threat to the wider community as per direction from DEC Central Office; lack of onsite sources such as tanks or former spills; oversight of DEP Winter likely including possible discharge to drains; no significant recoverable free product at area of petroleum contamination to soil immediately adjacent to 2071 Walton Avenue evidenced only by olfactory senses during DEC site visit; ability to reopen spill if conditions change as per Spill Closure letter to be sent; no objections by OGC to Spill Closure. Vought sent standard spill closure letter to: Mrs. Elisa Barnes B&B Supportive, LLC. 419 Park

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

Avenue South, 7th Floor New York, NY 10016 Letter sent with cc via email to:R. Austin/K. Mintzer Esq. (NYSDEC), N. Walz/M. Hughes (NYSDOH), C. D Andrea/A. Friedman (NYCDOH), Z. Youngman (ZEB Environmental), D. Yudelson Esq. (Sive, Paget & Risel), C. Georgoulis Esq. (Greenberg Taurig), J. DeMartinis (Seacliff Environmental), G. Constatopes (GKC Industries), F. Eisenbud Esq. (Campolo, Middleton & McCormick). Letter added to D2 as well and original sent to Barnes via US Mail. Vought received reply from B&B Barnes that Dear Mr. Vought: hank you very much for your careful work on this matter. Best 3/22/16-Vought-Received call from and spoke to from ZEB Youngman that there were no concerns by the contractor with regards to new set of groundwater analyses and that he was going to email the data to Vought. Vought received email from Youngman with cc to B&B, GKC, Seacliff, Yudelson, Georgoulis and others that Jeff, Please see attached. This includes recent groundwater samples collected from the pile cap excavations. Vought added attachments including letter and data to D2 in one document and reviewed attachments: Letter from Eisenbud (Campolo, Middleton and McCormick) to Yudelson-3/21/16. Letter notes that The disconnect between this response and the reality on the ground is that approximately 82 piles were driven recently over a period of weeks, and in virtually every case a petroleum sheen and globules were visible, and noxious vapors caused workers to complain of headaches , It was agreed by Owner and GKC to take additional groundwater samples, which was done on March 16, 2016. Groundwater samples were taken at the above site from three locations... , The observations made at the site reported to us coupled with the lab results requires that the RAP and CHASP be revised prior to the resumption of excavation , We are aware that on March 16, 2016, DEC, after consulting with DOH, closed the spill number associated with the site. The issues we raise are not impacted by this decision, which was made without consideration of the samples taken the same day the spill was closed. Further, the spill closure was made without regard to the impact on employees of GKC and its subs caused by vapors released during excavation. GKC assumes its concerns can be resolved quickly without having to bring the new test results to the attention of the DEC, and without asking that DEC reopen the spill , The sooner Zeb Environmental can forward its test results and the revised RAP and CHASP to GKC for review and comment, the sooner barriers to GKC resuming excavation so pile caps and grade beams can be installed will be eliminated. GKC will work expeditiously with Owner and its representatives to reach agreement on the changes required by the petroleum contamination on the site. Attached groundwater analyses show VOC's all within attenuation ranges and no reason to reopen spill. Email from Youngman to DEP Winter with cc to all-3/22/16. Email that Maurice,As discussed, ZEB has revised the NYCDEP Approved RAP/CHASP to address petroleum impacts identified at the site. NYSDEC had opened a Spill file in 7/1/15 after petroleum impacts were identified on the shallow groundwater table during excavation for foundation construction. Several rounds of soil and groundwater sampling have been performed, along with several site inspections by NYSDEC personnel. The spill file was closed in March 2016 as it was determined that there is no onsite source of petroleum impact. We have revised the RAP/CHASP to address the petroleum impacts onsite. In addition, we have included the NYSDEC Spill Closure Letter and procedures from NYSDEC to address sheen/product which may be identified on shallow groundwater. A copy of the revised RAP/CHASP is attached. Please let me know as soon as

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

possible if you would like to review the revisions or if we are authorized to continue work. Email from DEP Winter to Youngman with cc to all parties-3/22/16. Email that Good morning Zeb, Thanks for the update and the revised RAP/CHASP. DEP have no objection on this development project. Please note that a Closure Report must be submitted at the completion of the project. Thanks 3/22/16-Vought-Sent email to Youngman with cc to all parties that Zeb, Thank you for the additional groundwater results. The Department has reviewed and added them to our electronic files and continues to have no objections to development and the Spill will remain closed. As always, feel free to keep the Department copied on any future analyses associated with site. Thanks. 3/22/16-Vought- Received email from Eisenbud to Vought with cc to all parties that My firm was retained by the general contractor, GKC Industries, as environmental counsel because of issues arising after the start of the project relating to the discovery of contamination. We are aware that you closed the DEC Spill Number on March 16, 2016, the same day that GKC s environmental consultant, Seacliff Environmental (Jim DeMartinis) and a representative of the project owner s consultant, Zeb Environmental, took groundwater samples from three locations on the property. We are also aware that Zeb Environmental forwarded to you today my letter of March 21, 2016 to Mr. Yudelson, along with the results of the samples taken by Seacliff Environmental, and that you concluded there was no basis to reopen the Spill Number. We agree that the Spill Number should be closed because the source of the petroleum contamination apparently is from an off-site source. Nevertheless, the observations made by Mr. DeMartinis of soil conditions (black soil above the water table) along with the lab results showing some VOCs and many SVOCs above standards raises questions with regard to your approval of the Remedial Action Plan, and the need for a SPDES permit for dewatering if the water is recharged on-site. We understand that the revised RAP proposes the use of booms and absorbent pads to remove any sheen or floating product, and a VAC truck if needed. We have three questions as to your conclusion that no SPDES permit is required to recharge water on-site: 1.)GKC has driven approximately 82 piles within the past month, and in each case a sheen was evident on the groundwater, as were strong odors which caused employees to complain of headaches. The latter will be addressed in our comments to DEP on the revised CHASP. Your assumption appears to be that eliminating a sheen using absorbent pads and a boom prior to commencement of dewatering will avoid contaminated water from being recharged. Owner has made it clear that the general contractor will be held liable if the recharge of water causes otherwise clean soil to become contaminated. Our question is, shouldn t you assume, based on the above, that as soon as pumping begins, surrounding water will be drawn in from below the booms, and that will include the same product causing the sheen in the first place. 2.)In addition, even if no floating product is drawn into the excavation being dewatered, won t dissolved product in the groundwater contaminate the soil where it is being recharged? 3.)Further, because the soil above the water table is black, and likely soaked with degraded petroleum, won t the inevitable dislodging of soil into the excavation being dewatered cause new contamination that will be pumped out and recharged? If you are confident that the procedure outlined in the revised RAP is sufficient to avoid contamination of soil and groundwater in the area where the water is being recharged, and you can assure the Owner and

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

project manager that Owner will not be required in the future to remediate the area that is receiving the water being recharged, then we can discuss with Owner who will bear the risk of future liability. Thank you for your prompt attention to the issue raised. Very truly yours. Vought to discuss with OGC Mintzer and DEC Southwell as to appropriate response. Vought discussed with OGC Mintzer and DEC Southwell and drafted response to be reviewed and sent by OGC Mintzer. Email from Eisenbud to DEP Winter with cc to all-3/22/16. Email that Dear Mr. Winter: My firm was retained by the general contractor, GKC Industries, as environmental counsel because of issues arising after the start of the project relating to the discovery of contamination. We are aware that the closed DEC Spill Number on March 16, 2016, the same day that GKC s environmental consultant, Seacliff Environmental (Jim DeMartinis) and a representative of the project owner s consultant, Zeb Environmental, took groundwater samples from three locations on the property. We are also aware that Zeb Environmental forwarded to Mr. Vought at DEC today my letter of March 21, 2016 to Mr. Yudelson, along with the results of the samples taken by Seacliff Environmental, and that Mr. Vought concluded there was no basis to reopen the Spill Number. Surprisingly, you were not copied on that email, and thus were not provided with my letter or the results of sampling on March 16th. Copies of my letter and the test results are attached.We just sent an email to Jeff Vought at DEC, a copy of which was sent to you. We did not question the closing of the Spill because the source likely is off-site, but we did question the conclusion that groundwater can be pumped out to dewater excavations and recharged on-site without a SPDES permit.We have reviewed the revised CHASP, and your response of today s date that you have no objections to the project. Because your conclusion was not based on the groundwater samples taken on March 16th, or the observations of the General Contractor and the GC s environmental consultant which demonstrate that the revised CHASP does not address important health and safety issues of the workers on site, we ask you to review more carefully the revised CHASP based on the following.GKC has driven approximately 82 piles within the past month, and in each case a sheen was evident on the groundwater, as were strong odors which caused employees to complain of headaches. On March 16, 2016, when an excavator was used to dig down to the water table in three locations, Mr. DeMartinis observed that the soil above the water table was black, clearly the result of degraded petroleum, and that noxious odors were evident. The actual groundwater test results show exceedances of groundwater standards for some VOCs, many more SVOCs, and the presence of numerous SVOCs that are not regulated by DEC. Nevertheless, the revised CHASP continues to state in Section 4.4 that It is expected that site work will be performed in Level D. Given the headaches reported by workers whenever there has been on-site excavation, we do not understand why DEP is not requiring Level C protective equipment. The proposed use of a PID to monitor vapors is not going to identify the SVOCs that are causing the noxious odors that are impacting the workers. GKC s experience on the site is that, wherever they dig, water with a sheen flows into the excavation. Without proper protective equipment, it is likely that the clothing of the workers will become heavily contaminated with petroleum. When the workers return to their homes, the SVOCs causing their headaches will go with them, and the water from home washing machines will be discharged into City treatment plants. The CHASP does not recognize this concern. If the CHASP is revised to require

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

Level C protective gear with the procedures associated with Level C set out in the CHASP, the issues we are concerned about regarding worker health and safety will be resolved.We would appreciate it if you review the CHASP with the observations of GKC and its consultant, and the results of the March 16, 2016 groundwater sampling, in mind. At a minimum, a greater level of protective equipment should be required to protect the health and safety of the workers, and this should not be left to discussions at daily meetings.Thank you for your consideration. 3/24/16-Vought-Vought drafted reply for OGC Mintzer to above after forwarding email to, and consultation with, DOW Southwell on three questions regarding SPDES Permit. DOW Southwell noted that SPDES Permit was still not needed after review of email. On 3/23/16, Mintzer sent email to Eisenbud/Vought/Youngman with cc to all parties including DEP Winter that Mr. Eisenbud The spill was closed by the Department after review of reports and sampling data, several site visits and consultation with DOH. We have previously advised that no SPDES permit is required to recharge water on site. In response to your email below, we note the following. No exceedances of TOGS 1.1.1. Groundwater Standards have been documented in any of the reports submitted to the Department. The Department has previously instructed that trace free product that is encountered during excavation activities must be recovered, and the Department has no objections to the use of absorbent pads and boom as a primary method. If significant product is encountered during excavation, then the Department must be notified via a call to Jeff Vought s cell phone (917-577-1728) so that a Department site visit may be performed and reopening of the spill at 2071 Walton Avenue may be considered. The Department does assume that as soon as pumping begins, surrounding water will be drawn in from below the booms, but also considers any potential mobilization of possible groundwater contamination to be insignificant. Similarly, any potential soil contamination caused by remobilization of possible dissolved product is considered insignificant. Finally, potential groundwater contamination caused by desorption of soil contamination into the water table is also considered insignificant, unless free product is generated, in which case it must be recovered and reported as stated above. The Department is confident that the revised RAP is sufficient to avoid significant contamination of soil and groundwater in the areas where water is being recharged and will not require further investigation or remediation of these areas or the Site, except as set forth in the Department s Spill Closure Letter dated March 16, 2016. We aware that there is an underlying contractual dispute between your client and the site owner. We hope that your client and the site owner will resolve any further issues between themselves, without further involvement by the Department, unless significant new circumstances arise. Karen 3/25/16-Vought-Email from Eisenbud to OGC Mintzer on 3/24 that Dear Ms. Mintzer:Thank you for your response. We are puzzled by your statement that No exceedances of TOGS 1.1.1. Groundwater Standards have been documented in any of the reports submitted to the Department. Seacliff Environmental s samples taken on March 16, 2016 were analyzed and a number of VOCs, and many more SVOCs, were found at levels that exceed standards. Please review the data summarized in the annexed spread sheet which we previously provided to DEC.All of your other conclusions are helpful, and we do not question them here. Assuming the attached will not alter your conclusions, we are hopeful that the health and safety issues we raised will be resolved at a site meeting which, it appears, will

Map ID	Site	Database(s)	EPA ID Number

FUTURE VETERANS RESIDENCE/CURRENT APSHALT LOT (Continued) **S117975054**

Remarks: take place on Tuesday. Very truly yours,. Vought spoke with OGC Minzter who then sent to reply to Eisenbud that Mr. Eisenbud To clarify, no exceedances of VOCs routinely associated with petroleum were documented above TOGS 1.1.1. Groundwater standards. Karen " "found contamination during excavation/samples taken, investigation underway"

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2006
Site name: OKEAN CLEANERS
Classification: Conditionally Exempt Small Quantity Generator

Date form received by agency: 07/14/1999
Site name: OKEAN CLEANERS
Classification: Small Quantity Generator

Date form received by agency: 03/05/1985
Site name: OKEAN CLEANERS
Classification: Large Quantity Generator

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND

F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

FINDS:

Registry ID: 110002442161

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY e2mis 143805 05-July-2002 13:21 Hrs. Field Operator George Justi, #18598, reports while locating fault on feeder 3x77 in vault 3161 finding a defective transformer reading below min. and 7.5 gallons of dielectric fluid had spilled in the vault and is contained in the sump. No fire or smoke is/was involved. No sewers, waterways, and private property affected. Sump pump not operating and has been disconnected. Sample taken (COC 05866). Environmental Tag 30688 applied. Cleanup can not be completed within 24 hrs because clean up requires trasnformer removal which can not be scheduled at this time due to extreme heat conditions. Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 4.4 ppm EPA 608/8082 08-JUL-2002 10:18 I&A Planner B. Markert reports transformer pressure tested and held pressure 7/6/02. Unit is scheduled to be replaced due to an internal failure. Cleanup scheduled for 7/8/02 @ 14:00. 08-July-2002 22:21 Hrs. Flush Mechanic Tom Brown, 44432, reports partial cleanup complete at 17:45 hrs, final cleanup pending transformer removal so area underneath the transformer may be cleaned. Tag remains in-place. 100 pounds of flush debris was removed from structure by Bx/W Flush Truck. 150 gallons of oily water was removed from structure by CFS Tanker. Transformer removal planned. 16-July-2002 05:00hrs. Environmental Flush Mechanic J. Maloney # 05863 Rreports, the transformer has been removed and the CFS. tanker removed all liquids from the manhole. Double washed hole and removed the yellow Environmental tag # 30688. No solid debris generated. Cleanup complete."
Remarks:	"clean up can not start until the transformer is removed - no sewer, waterways or private property affected - ref #143805"

DEC Memo:	"11/25/09- Zhune spoke to Millie Lopez from Castle oil. She said gage defected caused the spill. spill is contained outside and inside. Approximately 20 gallons went to the soil and 10 gallons to the tank room. a Castle Oil's crew is there. PTC is on the way. ED Miller Building Manager Lemle & Wolff, Inc. 718-884-7676 Jose Molina Super 347-392-6868 1:42PM. PTC office said PTC got the site. 11/30/09- Zhune. Ed Miller owner called to say that as far as he knows the spill was cleaned up. he will get paper works and send it. 04/19/10- Zhune. Petroleum Tank Cleaners sent the report dated Apri 14, 20010. Petroleum Tank Cleaners was contracted by Castle Oil Corporation on November 25, 2009 to respond to a #6 fuel oil spill. Due to an overfilled of the tank system, approximately twenty (20) gallons spilled out of the vent pipe onto soil below and approximately ten (10) gallons spilled in the tank room. As part of the cleanup PTC, excavated oil contaminated soil from the impacted area beneath the vent pipe. While inside, six bags of speedy dry were needed to clean the tank room. the area was previously epoxy painted. On March 23, 2010 PTC collected two(2)soil samples from beneath the fill line in the courtyard to detemine if sufficient soils were removed. Sample # 1 was collected at 6'BG and #2 at 6'BG. Laboratory analytical indicated no detectable analytes for VOC's in both samples and only three SVOC's (Benzo(a) anthracene 1700 ug/kg, Benzo(a) pyrene and Chrysene 3950 ug/kg, were exceeding the NYSDEC TAGM # 4046 Soil Cleanup Objectives. Spill Closed. "
Remarks:	"caller states an overfill of approx 30 gallons of #4 fuel oil. caller states 20 to soil, 10 to concrete. clean up pending."

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL CON ED E2MIS REPORT 4-12-01 15gals.of unknown oil found on 20gals. of water in SB 15081. Sample taken, tag installed, cleanup

Map ID	Site	Database(s)	EPA ID Number

SB 15081 (Continued) **S105056499**

pending test results. DEP representatives St. Jean at location informed Sup. that he was issuing a Commisioners Order for this job because we did not take samples direclty to lab but brought them back to Van Nest tool room and had them take samples to lab. Flashpoint 174 degrees we notified Sup. to have tanker start to drain S/B at 1345hrs. Cleanup has been completed and the environmental stop tag removed. 250gals. of oil and water was generated and was transported via tanker truck. Structure was double washed using Bio Gen 760. Cleanup complete."

Remarks: "15 gals unk oil on 20 gals of water - clean up in progress no smoke or fire, no private property affected con ed #136407"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT PBS registration is expired - owner was notfied and will file renewal. DEC Sigona contacted Mystic who referred to County Oil who owns the account. Spoke to Morris at 718-626-4161 at County Oil who provided name of property owner- Mike at (347)885-0028, who said the spill was being cleaned up. DEC (Vought) is responding to investigate the cleanup. DEC Vought arrived at approximately 1 PM found oil residue in basement and evidence of oil washed down street. DEC Vought to contact Mystic for action. 4/4/2003-Vought-Site visit by Vought. Spill out of vent onto concrete sidewalk which also ran down set of concrete stairs into tankroom. Floor of tankroom was sealed and no cracks found. Spill cleaned by Mystic using biolsolve. No sewers or drains affected. Spill closed by Vought."
Remarks:	"Mystic is performing the cleanup which is currently underway."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT e2mis no. 128658: 10/26/99 @ 14:15 hrs. Mechanic R. Mercado reports approximately (1) gallon of unknown oil in dirt on floor of manhole # 23915. Conduit plate 24-H-2 indicates no sewer connection at this location. He took (2) samples, one for PCB, and one for oil identification. He placed environmental tag # 09475. Clean up pending sample results. 10/28/99 @ 15:15 hrs. Lab Sequence Number: 99-11326 PCB 26 PPM 10/28/99 @ 15:15 hrs. Lab Sequence Number: 99-11327 ANALYSIS INDICATES THE PRESENCE OF AN OILY SUBSTANCE SIMILAR TO A HEAVY FUEL OIL. Cleanup completed on 11-8-99 at 1430 hours. 1-gallon oil and 200 gallons water removed via tanker. PCB 26 PPM. Manhole flushed. No sewer connection. Tag Removed. 21-MAR-2002 @ 10:00 Hrs Flush Operating Supervisor Charlie D'Alisera and EH&S Sr. Specialist Jim Grahan inspected MH's 23914 & 23915 on Wednesday 3/20/02 and found both manholes were dry and there was no oil present. Supervisor D'Alisera remembers that these holes were found to have heating oil in them do to the apartment building filler neck being broke. Contractor repaired and problem was corrected."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY e2mis Notes: 1 pint unknown oil in MH23914 with no water in manhole. Conduit Plate #24-H-2 indicates no sewer connection. Sample taken and returned 68ppm PCBs. Clean Harbors was called to do cleanup because results for flashpoint will not be back soon enough. harlie D'Alisera reports Clean Harbors did cleanup in manhole but was unable to remove tar like substance from floors and walls. Flush crew will soda blast hole. Flashpoint results <212degF. Flush Maechanic J. Rohr reports 1 pint of oil and 50gal water removed. Flush soda blasted and double washed manhole. Cleanup completed 50-499ppm at 12:15. KMF 4/11/01"
Remarks:	"con ed # 134528 spill is confined in the man hole clean up pending lab results "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Description:	Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "DECPiper repsponded ot site. Tank was overpressurized and patch on top blew off. Patch is 2' x 2'. Oil spilled in tank room and soaked into debris .Speedy dry was down. Vapors were high in unfinished basement. 15 ppm in hallway and 5ppm in 1st floor apt. I entered apt and vapors were only existant near door as it was open. I instructed tennant to keep door closed. Milro to perform surface cleanup and set up ventilation. I spoke with Milro in am. Floor was in poor condition and borings will need to be taken. Bases of walls need to be cut out as well. DECpiper recveived closure report. Based on work to date, this spill is closed. See e-docs if warranted. "
Remarks: "Wooden Floor in basement-clean up ordered."

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"4/28/15-Zhune spoke to Gabe Arlia from MB Fuel Transportation (718)401-2230. He said the tank overfilled. Approximately 2-3 gallons of #2 fuel oil came by the vent pipe into a planter. Sprague Energy (Oil Comapany) cleaned the planter. Aprague Energy Richard Clifford 718-579-3410 4/28/15-Zhune spoke to Richard. He said the planter has no plants it was only soil. approximately 2-3 gallons of #2 fuel oil went into the planter. They are in the process to remove the soil contaminated. 5/8/15- Richard Clifford sent the following email dated 5/4/15. On 4/28/15 our carrier had 3 gallon #2 oil spill from vent into a soil planter that is in front of the building. There was no spill in the basement. There were no spills during the 5/2/15 delivery to this location. On 4/28/15 Sprague Operating Resources LLC spill personnel removed the contaminated soil and placed this soil into a 55 gallon drum for disposal. Disposal manifest to be provided when this drum is shipped off site to Waste Recovery Solutions Inc., 343 King Street, Myerstown, Pa 17067. New soil was added to the planter to replace the contaminated soil. Before and after photos are attached. Spill Closed."
Remarks:	"above ground planter affected clean up in progress"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

alternate address, there is one previous spill on this site #8805383 from 1988 which was closed in 1989 (no dec remarks) however caller remarks say: DEC(sigona) at site. Gaservice inc. Removing Tanks on site. Surface contaminated soil, contractor to remove. PBS# 2-188492 was found for Fordham Auto Repair Shop located at site address, they have 12 550 gallons gasoline tanks that are underground vaulted with no access for inspection (all of which are status 6), they also have 1 550 gallon underground tank that has product code of 9999 (also status 6) as well as a 4000 gallon underground gasoline tank (also status 6) and a 550 gallon used oil underground tank (only in service tank listed). Called Greg twice, no answer, spill will be assigned to Kumar as per Jeff. 12/22/15-Hiralkumar Patel. alternate address: 2409-2411 Jerome Avenue PBS #: 2-188492. as per the PBS record, the site has/had following tanks: - twelve (12) 550 gal gasoline USTs, closed prior to Mar. 1991 - one (1) 550 gal other product UST, closed prior to Mar. 1991 - one (1) 4,000 gal gasoline UST, closed prior to Mar. 1991 - one (1) 550 gal waste oil UST, in-service the PBS registration expired on 04/16/2006. other spill # 8805383 was generated by DEC Sigona. he was on-site during removal of tanks and noted surface contaminated soil. case closed. as per NYC DOB record, a permit application was approved on 01/20/2010 for permanent closure of 550 gal UST and installation of 275 gal AST. but PBS record does not include any information about closure of 550 gal tank or installation of 275 gal tank. ---------- 2:13 PM:- spoke with Julio Cabrera at Fordham Auto Repair, on-site tenant. asked him about waste oil tank size and location. he purchased the business in 2005 and they have an underground waste oil tank. Mr. Cabrera doesn't know the tank size. Julio Cabrera Fordham Auto Repair **on-site tenant** 2409 Jerome Avenue Bronx, NY Ph. (718) 365-2492 email: cabrera475@hotmail.com 2:37 PM:- spoke with Greg at Langan. he mentioned that property owned by Monroe College and has auto repair shop as tenant. now property owner is planning to redevelop the site as an academic building. Langan collected samples on 12/18/15 for lab analysis. they are also in process of preparing Phase I report. asked Greg to submit reports, once available. 2:46 PM:- spoke with David Dimond, property owner's representative. he mentioned that property is owned by 2409 Jerome Inc. and Stephen Jerome is the company president. the property is part of Monroe College and they are planning to redevelop the site with acedamic building for the college. reminded Mr. Dimond to submit copy of Phase I and Phase II reports, once available. also informed him about expired PBS registration for waste oil tank on the site. 2409 Jerome Inc. **property owner** 434 Main Street New Rochelle, NY 10801 Attn.: David Dimond Ph. (914) 740-6436 email: ddimond@monroecollege.edu 3:38 PM:- sent email to Mr. Dimond and Mr. Cabrera including copy of PBS application and asked them to immediately renew PBS registration. email copied to DEC Leszek. 02/04/16-Hiralkumar Patel. 12:37 PM:- spoke with Greg. he mentioned that draft Phase I and Phase II reports were submitted to client who hasn't replied back yet. Greg also mentioned that property owner is planning to apply in BCP. 12:40 PM:- left message for Mr. Dimond. 02/11/16-Hiralkumar Patel. 3:15 PM:- left message for Greg. 02/12/16-Hiralkumar Patel. 10:15 AM:- received call from Greg. he mentioned that client is still reviewing the draft reports and reports can be submitted in two weeks. 03/28/16-Hiralkumar Patel. 1:20 PM:- left message for Mr. Dimond. 1:22 PM:- left message for Greg. 05/10/16-Hiralkumar Patel. 3:48 PM:- left message for Greg. 3:50 PM:- left message for Mr. Dimond.

Map ID	Site	Database(s)	EPA ID Number

COMMERICAL PARKING LOT - PHASE II (Continued) **S118460595**

05/11/16-Hiralkumar Patel. received message from Ilkay (at 4:20 PM on 05/10/16) from Langan requesting call back. 8:37 AM:- left message for Ilkay. 9:13 AM:- received call from Ilkay. she mentioned that their client is planning to apply for BCP and they were discussing about remediation plan. informed Ilkay that environmental reports must be submitted immediately for review. she is out of office and will send reports by tomorrow morning. 10:11 AM:- received email from Greg including GPR survey report, site plans and sample result summary tables. the GPR survey identified scattered anomalies located throughout the site. based on their rates and proximity, these anomalies were inconsistent with any USTs. the noise on site was such that distinguishing anomalies that could be potential USTs was not possible. based on submitted site plans, two lots (#106 and 113) on block #: 3199 are included in the investigation. searched NYC DOB record, but could not find physical address for lot # 113.
05/12/16-Hiralkumar Patel. received email from Greg including link for Phase I and Phase II reports. abstract of Phase I: - block #: 3199 / lot #: 106 and 113 - subject property is comprised of a 25,200 sq. ft. property containing an asphalt-paved parking lot and two (2) 1-story structures used for automotive repairs - the former and current tenants of the subject property include a greasing and auto laundry facility (circa 1945 to 1989), filling station (circa 1927 to 1989) with thirteen (13) closed 550 gal USTs and one (1) closed 4,000 gal gasoline UST, and auto repair facility (circa 1989 to the present) ---------- - as per Sanborn maps, lot 113 was occupied by a parking lot from circa 1945 through circa 2007; lot 106 was operated by greasing and auto laundry facility, a filling station and an auto repair facility - according to USGS maps, the subject property is about 150 ft above mean sea level - based on geotechnical investigations completed by Langan in a nearby site, depth to bedrock ranges from a few feet to about 16 ft bg - based on geotechnical investigations completed by Langan in the surrounding area, the depth to groundwater is estimated to be at about 10 ft bg and generally found within the bedrock - groundwater at the subject property is expected to flow to the west towards the Harlem River, which is located about 3,000 ft west of the subject property - train tacks were shown to the east of the site in the 1924 aerial photograph - the one-story building on the northwestern portion of the site contains a single-car-capacity garage used for auto painting operations, a four car capacity garage used for auto repair operations, a lobby and a storage room - the temporary metal structure on the northeastern portion of the site is constructed with two shipping containers and used for tire changing operations - the southern portion of the site used as a parking lot - fifteen (15) hydraulic car-stackers run along the western portion of the parking lot - ten decommissioned vent pipes associated with former gasoline USTs were observed on the north wall of the building - a manhole providing access to the city sewer was observed inside the garage of the one-story building - ten (10) 55-gal drums of antifreeze were observed at the site - a waste oil UST was located in the four-car-garage - a 50-gal transmission fluid AST was observed in the single car garage - a home heating oil tank and gasoline USTs were located at the site in past - a closed-in-place hydraulic oil tank used to power hydraulic jacks is located within the one-story building - five drycleaners were identified at surrounding properties within 1/4 mile - three of the five drycleaners were located more than 1,000 ft, hydraulically cross- or down-gradient from the subject

Map ID	Site	Database(s)	EPA ID Number

COMMERICAL PARKING LOT - PHASE II (Continued) **S118460595**

property - two drycleaners located up-gradient of the subject property: 2438A Jerome Ave - approx. 350 ft east; 2439 Creston Ave - approx. 860 ft east abstract of Phase II: - the proposed redevelopment plan (now on hold) would include the demolition of the existing structures and the construction of a 4-story academic building with a partial cellar for Monroe College - the proposed development will require excavating the southwest corner to a depth of upto 10 ft bg to accommodate the partial cellar - conducted geophysical survey - advanced eight soil borings (SB01 through SB08) to depths ranging from 4 to 16 ft bg - the stratigraphy underlying the asphalt layer includes a layer of historic fill material overlying till (glacial deposits) followed by bedrock - the historic fill generatlly extends from about 1.5 to 4 ft bg and is composed of varying amounts of sand, silt, clay, gravel, brick, concrete, asphalt, glass and coal fragments - the underlying till layer is composed of varying amounts of clay, silt and sand - according to geotechnical investigation conducted in Dec. 2015, bedrock is present at about 9 to 18 ft bg across the site ---------- - visual, olfactory and/or PID evidence of petroleum contamination was identified in borings SB01, SB02, SB03, SB04 and SB06 - collected two soil samples from each boring, except boring SB05 due to refusal at 4 ft bg - evidence of product smearing was observed on the liners extracted from borings SB01 and SB04 ---------- - soil sample at 10-11 ft depth from SB01 was analyzed for hydrocarbon fingerprint analysis; material appears to be petroleum in nature and is identified as gasoline ---------- soil analyticals:
----------SB01------SB03------SB03----SB04------SB04 -----SB06------SB08 depth (ft) 10-11 1-2 10-11 0-2 10-11 11-12 0-2
Benzene----------24,000-------230-----6, 100-----200----------280-------110
Toluene----------700,000-------250---100, 000----------1,900
Ethylbenzene----------570,000----------80, 000----------5,200

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"5/6/2015 - Feng - Duty Desk. Informed by K. Patel that he talked to Vick St Juste as Vick called the spill phone and the call forwarded to Patel's phone. The tank is leaking. He asked Ryan Piper to conduct an site inspection. Talked to Kevin Ferguson of Slomins (1-800-252-7663 x2207). They will send out a mechanical field person. He shall be there in an hour. Ryan responded to the spill. Spill is assigned to R. Piper. 4/6/15- DEC Piper resopnded to site. Small overfill out vent though top of tank is leaking from gauge. FDNY was on scene put 1/2 bag of drysall on floor. Corner of rug was soaked in oil and needs tobe removed alond with a couple porous items. Wood sheet rock wall. Milro is en route to remediate. DEC Piperreceived closure report. based on work to date, this spill is closed. "
Remarks:	"275 gal agt in basement/tank is leaking after Slomins oil made delivery/home owner reported spill to Slomins"

DEC Memo:	"8/15/05 - Haggerty - caller (718)-733-0328 was neighbor to property in question and called in due to petroleum odor. According to the neighbor the property has since been sold. Left message for Morningside oil (718)-220-2200, but never recieved any info from them, doubtful if they would have records dating back that far----requires additional info, site visit 11/21/05, SA: Found the current property owner of 34 West 184th Street. Issued a letter (certified mail) to the owner to contact me within 30 days with information regarding efforts taken to clean the area, including any available environmental sampling data. 12/09/2005: John Grathwol and I visited this site on 12/08/2005 at around 12:50pm. No one was present in the house. Talked to the neighbour (lady next door, 30 West 184th st.). She doesn't smell any odor of petroleum product. Knocked the door of other side neighbour (32 West 184th st.), no one responded. There is a filling pipe on the wall of 32 West 184th st. residence. No oil mark or stain on the wall or floor. Took pictures.

Map ID	Site	Database(s)	EPA ID Number

34 WEST 184TH ST (Continued) **S102238393**

Not able to inspect the basement. Need to contact owner of 32 West 184th st. Spill to remain open. (Sadique) 01/03/2006: Called Steven Heimann's residence (718 584 4328) and left message to call me back. Issuing letter to the owner of 32 West 184th st., Steven Heimann. (Sadique) 01/11/2006: Mr. Steven Heimann called today. He informed that very little amount of spill happend during that time and cleaned long ago. He requested for inspection by the department. Still the tank is in service. (Sadique) 01/20/2006: John Grathwol and I visited the spill site on 01/17/2006 at 1:15pm. No one present at home. Left message on the voice mail for owner of 32 West 184th Street. Mrs. Heimann called back at 2:05pm. At 2:15pm we went to the location again. Mrs. Heimann admitted that a small amount of heating oil spilled from the out side filling pipe to her neighbours door steps during a delivery time. Inspected the basement. There was a big toy train all over the basement and much stuff. Could not clearly see the above ground tank. Though basement was not properly maintained, there was no oil mark or sheen and no odor or smell of oil observed. Took photos inside the basement, out side spill location and filling pipe. Spill location was clean and no smell of oil. No reply received from current owner of 34 West 184th Street in response to Nov 21, 2005 letter. Spill can be closed. (Sadique) 01/20/2006: Spill closed. (Sadique) "

Remarks: "comp came home and reports that there is an oil spill on her neighbors front steps and down the wall of her neighbors house - now she can smell oil fumes comming up from the drain in her basement and is afraid "

DEC Memo:	"12/26/06-Hiralkumar Patel. spoke with Dan at Atlas fuel. he mentioned that someone installed new boiler at residence. he checked city records and haven't found any application for such installation. he also mentioned that during this installation, owner/plumber moved 275 gal tank and disconnected lines from tank. as per Dan, they never received stop delivery order. driver delivered 26 gals before he stopped delivery. delivery crew checked inside house and found lines diconnected from tank. tank room floor in bad condition. Atlas fuel has sealed fill port with cement. Dan doesn't know who did cleanup at site. one family living upstair at subject site. asked Dan to send delivery ticket copy. spoke with Ramone, owner of building. he will meet at site at 3 PM. received delivery ticket from Atlas Fuel. 12/27/06-Hiralkumar Patel. visited site yesterday. met Ramone, owner of building. smelled oil inside basement. basement floor, where spill happened, was broken. asked Ramone to hire contracctor to remove this contamianted material. no vapor complaints from tenant living upstairs. Ramone has contacted Eastmond for estimates. onwer has switched heating system to gas. couldn't see floor clearly as entire floor was broken and had so much debris. told Ramone that after removing broken concrete, it may require soil excavation/soil sample based on condition. asked him to submit disposal manifests and other documents regarding oil cleanup. he will call back once he decides contractor who will going to remove contamination. 12/29/06-Hiralkumar Patel. received cal from Rene. he has finished work. has removed broken concrete and some soil. he will send closure report. received fax from Rene with closure report. based on closure report, case closed."
Remarks:	"A plumber or someone put a gas boiler in - cut the tank out and left it disconnected. On automatic delivery - Driver discontinued the delivery when he didn't hear the 'whistle' immediately - owner stated to the fuel company that he stopped automatic delivery - Fuel company has no record of such. Fuel company does not believe they are responsible. Spiller contact is the homeowner - he does not live

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT NO REGISTRATION FOR 2376.3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 7/20/04-Vought-Changed site address from 2376 to 2375 Jerome Avenue. File review by Vought: See also closed spills: 9604011, 9606024, 9613200 and 9613206 at same location. Letter from DEC ODowd to Getty (Hanley)-2/11/97. The Department is mandating that the following work be done within 10 days: 1)full system precision testing of existing underground storage tanks 2)pumping out of product from service station drainage ports 3)an underground injection control investigation to determine the endpoints of the drains 4)determine if any 550 gal USTs exist at this site, their status and registration of them with the PBS Unit. Emergency Spill Response Report-Feb 1997. NYFD responded to complaints made by residents of nearby buildings of gasoline odors. Spill as result of a fuel delivery overfill. In order to mitigate a hazardous condition at the time fo the spill, the excess fuel was flushed through drains and ultimately found it's way into the municipal sewer system . Operational tanks include two (4000-gallon) and one (2000-gallon) gasoline USTs, Twelve (12) 550-gallon underground storage tanks previously abandoned in place are located to the east of the station building adjacent to Jerome Avenue. Two pump islands located along Jerome Avenue. A dye test and sewer inspection were performed. Storm drains on property had solid walls and bottoms . The discharge from both storm drains showed dye entering the sewer manhole located on west 184th Street . Tank tests were performed and passed for

Map ID	Site	Database(s)	EPA ID Number
	GETTY (Continued)		**S102232691**

operational USTs. Letter from NYFD to Getty (Hanley)-3/18/97. You are therefore ordered to discontinue all motor fuel deliveries until approval has been =iven by this Department to resume . Tank Closure Report (Tyree)-August 1998. Reason for tank closure was property divestment. Apartment buildings located adjacent to the site to the west and a commercial building located to the north of the site . Removal of one (550-gallon) waste oil UST, two (4000-gallon) gasoline USTs and one (2000-gallon) gasoline UST. Twelve endpoint soil samples were collected. No soil for disposal was generated during the tank closure work . Soil analyticals show 171ppb MTBE(CTB2), 9930ppb ethylbenzene(DTB1), 24900ppb xylene(DTB1), 8480ppb MTBE(DTB1), 7061ppb xylene(DTB1) and 15700ppb MTBE(DTB1). Soil analyticals also show minor SVOC exceedences attibutable to fill material. Quarterly Monitoring Report (Tyree)-June 1999 thru June 2001. Four monitoring wells onsite. Groundwater at depths of 9-11' below grade and flow to the west-southwest. Total Phase High Vacuum Extraction performed monthly on all four wells from Jan 2000 thru Dec 2000. June 2001 groundwater analyticals show 7.25ppb benzene(W2), 764ppb MTBE(W2), 107ppb benzene(W3), 71.6ppb benzene(W4), 20.4ppb toluene(W4), 169.8ppb xylene(W4) and 149ppb MTBE(W4). Request for No Further Action (Tyree)-9/6/01. Quarterly Monitoring Report (Tyree) July 2001 thru Dec 2002. Quarterly gauging and sampling and semi-annual reporting. Four monitoring wells onsite. Groundwater at depths of 9-11' below grade and flow to the west-southwest. Request for No Further Action (Tyree)-7/9/02. Tyree will continue monitoring activities on a quarterly basis until said letter is received . Semi-Annual Monitoring Report (Tyree)-Jan 2003 thru June 2004. Four monitoring wells onsite. Groundwater flow to the west and at depth of 9-10' below grade. Semi-annual gauging and sampling. Current site status is Perez Communications and Electronics . Parking lot to the north, commercial property to the east and residential apartment buildings to the west and south . Geoprobe Workplan (Tyree)-5/27/04. Proposal for the installation of 7 or more borings: from the former underground, gasoline storage tanks and throughout the site property . Soil and groundwater samples will be collected. Unless you indicate otherwise, Tyree will proceed with the work mentioned above on June 4th 2004. 7/22/04-Vought-File review continued: Investigation Report (Tyree)-6/28/04. Three Geoprobe borings performed. Groundwater encountered at 10'. Only three out of eight borings (B-2, 5 and 6) were installed because the manager of the property was not cooperative and would not let us advance the other five borings (B-1,3,4,7 and 8). If additional work is required, Tyree also requests that a letter be sent to Mr. Perez at: Mr. Perez Perez Communications and Electronics, Inc. 2375 Jerome Avenue Bronx, NY 10468 Ph 718-329-2744 Vought called Perez from phone number obtained via public information. Phone number disconnected. Vought spoke to Dave Pachan and he has same number as information. 7/23/04-Vought-Left message for Pachan inquiring as to Mr. Perez's first name for failure to cooperate letter. Vought also sent cooperation letter to Perez Electronics and cc'd Getty Properties. 9/3/04-Vought-Sent Stipulation Agreement with due date of 10/04/04 which includes requirements of: 1)well installation downgradient of B5/B6, adjacent to southern pump island, at proposed boring location B3, B7 and B8 from 5/27/04 proposal 2)surrounding area site plan. 10/15/04-Vought-Sent Tyree Delta email for STIP status. 12/1/04-Vought-Received email from Paul Lindell. Developer contact info is Joey Rishty (732-897-0400, 908-309-882). The delay in

Map ID	Site	Database(s)	EPA ID Number

GETTY (Continued) **S102232691**

executing the Stipulation Agreement for this site is due to the pending construction plans of Joey Rishty . Since we dont not know the exact location of the proposed structure and the foundation details, we cant move forward with a subusrface investigation since we wont know where to place our borings/wells, how much if any impacted soil will be encountered and how construction will affect our remedial plans for this site . Vought called Rishty for contact information and was told to call back. 12/2/04-Vought-Called Rishty for contact information and left a message to return call. 12/3/04-Vought-Received message from Rishty requesting copy of DEC's requirements. Vought faxed him copy of 9/3/04 Stipulation Agreement and required him to call back upon review. 12/14/04-Vought-Called Rishtey for address to send letter requiring stip compliance prior to development: Joseph Rishty CTK Realty LLC. PO Box 77 Allenhurst, NJ 07711 ph: 732-897-0700 cell:908-309-8822 Fax: 732-897-0475 Vought faxed copy of Getty Stipulation and requirement letter and sent hardcopy via mail. Getty cc'd on requirement letter to Rishty. Vought sent email and fax to Delta and Tyree requesting status of overdue Stip and site meeting. Vought also sent letter to developer requring adherence to STIP prior to developement. 1/21/05-Vought-Quarterly Monitoring Report (Tyree)-Four monitoring wells onsite. Groundwater at depth of 9-10' below grade and apparent groundwater flow to the west. Site on semi-annual monitoring. Groundwater analyticals show 10.5ppb benzene(MW2), 956ppb MTBE(MW2), 53.2ppb benzene(MW3), 118ppb MTBE(MW3), 39.3ppb benzene(MW4), 20.4ppb toluene(MW4), 50.1ppb ethylbenzene(MW4) and 265.2ppb xylene(MW4). DEC requires: 1)quarterly monitoring reports (as opposed to semiannual) 2)Well installation at former boring locations B3, B7 and B8, adjacent to southern pump island and downgradient of B5 and B6 3)surrounding property sketch 4)determination of actual groundwater flow 5)development schedule and properties intended use 6)signing of STIP 7)vapor barrier/passive ventilation system. Site visit on 1/21/05 with Lindell, Hatcher and Rishty. Meeting resulted in: 1)Getty will sign Stipulation 2)Getty will perform hotspot excavation of soil and associated endpoint sampling 3)no basement will be included in retail stores and foundation depth will go to 3'bg 4)vapor barrier will be installed onsite 5)Getty will install four monitoring wells in sidewalk (two in Jerome and two downgradient on West 184th Street) 6)Quarterly reports will be submitted 7)groundwater flow submitted (to the west) is actual groundwater flow. DEC no longer requires well installation at B3, B7,B8 and adjacent pump island due to soil excavation of hotspots, development plans and agreement to install downgradient wells from these locations. Vought sent Lindell and Hatcher copy of NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York dated October 2004. 2/18/05-Vought-Stipulation implemented by Kunkel with 2/10/05 date. Vought faxed and sent copies to Shea, Lindell and Hatcher. 7/6/05-Vought-New file review by Vought: Groundwater Investigation (Tyree Cunningham)-4/6/05. Eight geoprobe borings, collection of soil and groundwater samples and seven soil gas samples. Soil gas analyticals show max of 706ppb benzene(SG5), 34ppb toluene(SG2), 100ppb ethylbenzene(SG6), 104ppb xylene(SG2), 980ppb MTBE(SG3). Soil analyticals show: 101000ppb ethylbenzene(B1 9-10'bg), 256000ppb xylene(B1 9-10'bg), 398ppb benzene(B2 9-10'bg), 17500ppb toluene(B2 9-10'bg), 121000ppb ethylbenzene(B2 9-10'bg), 782000ppb xylene(B2 9-10'bg). Excavation Report (Tyree Cunningham)-6/30/05. No samples were collected from the bottom of the excavation due to the presence of groundwater in the hole . No bottom

Map ID	Site	Database(s)	EPA ID Number
	GETTY (Continued)		**S102232691**

samples were collected due to groundater. A total of 1016.5 tons of soil were removed from the site. Soil analyticals show: 46500ppb ethylbenzene(EX1 South), 24140ppb xylene(EX1 South), 569ppb MTBE(EX1 South), 8820ppb ethylbenzene(EX2 North), 9668ppb xylene(EX2 North), 1280ppb benzene(EX2 South), 32000ppb toluene(EX2 South), 951000ppb xylene(EX2 South), 19800ppb ethylbenzene(EX2 East), 57600ppb xylene(EX2 East), 10800ppb toluene(EX2 West), 44900ppb ethylbenzene(EX2 West), 306000ppb xylene(EX2 West). DEC requires: 1)Submission of RAP prior to building approval so that remedial system (if necessary) can be located. 2)installation of vapor barrier and mitigation system due to soil gas detections of BTEX in areas not excavated 3)delineation of groundwater contamination. Vought called Lindell to discuss and sent email with same. Vought called Rishtey who assured Vought that no construction will take place prior to DEC approval. 7/22/05-Vought-Received message from Rishtey that additional 500 tons of soil are going to be excavated by Tyree. Vought called Rishtey and agreed to additional excavation. 8/8/05-Vought-Notified Rishtey, Lindell and Hatcher that Imdad Islam will be new PM. Vought spoke to Rishtey who said that excavation has already taken place. 8/22/05- Responded as follows to Paul Lindell's email asking for Dept. permission to proceed with the site development work for constructing residential building at the site: Dear Mr. Lindell, In reponse to your email and as a follow up of and further to our telephone discussion today, pls make a note of the following issues: 1. The site's historical investigation results show that both soil and groundwater at the site have been impacted by petroleum-related contamination. Some contaminated soil has been excavated and removed so far from the site, and it appears more contaminated soil may exist. 2. Even though the groundwater contamination was detected long time ago, no remedial measures have been taken other than monitoring. However, the monitoring data reveals that dissolved phase residual contamination still exist. 3. A complete and precise delineation of the extent of petroleum contamination to soil and groundwater has not been done as yet. 4. Under the above situation and as per signed Stipulation Agreement, the Dept. requires a detailed Investigation Summary Report along with a proposed recommended Remedial Plan both for soil and groundwater. 5. The Dept. may not allow to proceed with any development work on the site without any approved and pragmatic remedial system in place. Pllease contact me if you have any questions or concerns. Sincerely, Imdadul Islam 8/24/05- Went for a site visit today and met Paul Lindell (Delta), Paul Hatcher & Scott Cunningham (Tyree) at the site. Issued a letter requiring ISRP submission by the end of Sept./05.-II 9/8/05- Received the followng email from Paul Lindell. Imdad- We are in receipt of your letter dated August 24, 2005. Tyree is nearly complete with its remedial proposal and is attempting to get the required ground water delineation drilling conducted next week. I hope to have their draft of the proposal tomorrow. Once I have completed my review of the remedial proposal I will forward for your review and comment. At this point, we will most likely base our remedial proposal on the most recent ground water data obtained from the wells on site. We can validate the proposal once the delineation data is in. Regarding the deadlines associated with the Stipulation Agreement, we kept Jeff Vought appraised on the progress of this investigation and the various hurdles we encountered with moving this investigation forward. He acknowledged the difficulties and appreciated the updates and was fine with the delays encountered. I

GETTY (Continued) **S102232691**

and Tyree will continue the updates going forward. Regards, Paul 11/14/05- The site being Getty's property, spill case is reassigned to Rui of Joe-Sun's group. 12/8/2005 - Feng - Email from Paul Lindell (Delta) inquired the status of this site. They submitted the RAP. This site was issued a violation for excavation at the site by Department of Building. And asked for recommendations and comments for the submitted RAP before new year. 12/14/2005 - Feng - Reviewed the file. The site will be developed as a commercial building on top of the site. There are 2 (30 FT DIAMETER) CRATERS APPROX 6-8 FT IN DEPTH CAUSING REMAINING LEVEL PAVEMENT TO CRACK & (FORMER GAS STATION) SINK. REMEDY: MAKE ALL REPAIRS . A. In the Subsurface Investigation Report, dated June 28, 2004, Tyree stated that three (3) borings were performed on 6/14/2004. B-5 and B-6 which located downgradient from the former pump island were found high BTEX concentration in groundwater. The groundwater sample collected from B-5 indicated to have 268 ppb Benzene, 54.8 ppb Toluene, 1,960 ppb Ethylbenzene and 5,909 ppb Total Xylenes. Furthermore, groundwater sample collected from B-6 was detected to have 27 ppb Benzene, 17 ppb Toluene, 2,260 ppb Ethylbenzene and 7,610 ppb Total Xylenes. B.In the Subsurface Investigation Report, dated April 6, 2005, Tyree mentioned that they performed a groundwater investigation consisting of eight (8) soil borings . In fact, only soil and soil gas samples analytical results were presented in the report. The soil samples collected from locations B-1 and B-2 at depth of 9-10 feet below grade revealed extremely high concentration. C.In Post Excavation Report, dated June 30, 2005, Tyree reported has performed a limited contaminated soil excavation on the property on June 15, June 16, and June 20. Soil samples taken from Ex-2 South at eight (8) feet below grade on 6/20/2005 revealed elevation of 1,140,410 ppb BTEX. D.In Post Excavation Report, dated August 9, 2005, Tyree reported has performed a limited contaminated soil excavation on the property on July 22 and July 25, 2005. Soil samples taken from Ex-2 South at eight (8) feet below grade on 7/25/2005 revealed elevation of 1,014,720 ppb BTEX. E.In the Subsurface Investigation Report, dated September 29, 2005, nine (9) borings were performed on 9/21/2005. Among these borings, five (5) were around the property and four (4) on the sidewalk. Up to 1,300 ppb MTBE found in GP-3 groundwater sample, and 1,176 ppb BTEX found in GP-8 groundwater sample. 12/16/2005 - Feng - Email to Scott Cunningham (Tyree) with comments above and requested: 1) Groundwater/soil concentration locate where the future building will be locate, i mean the samples collected upon reaching the terminus of the foundation excavation. 2) Groundwater/soil concentration or endpoint samples of the excavations, i mean when removing the contaminated soil off the site. 3) Dimensions of the excavations. 4) Construction detail and vapor mitigation of the building, like vapor barrier and ventilation system design. 12/21/2005 - Feng - Email from Scott Cunningham (Tyree) and said would send the monitoring reports over. 12/29/2005 - Feng - Formally rejected the RAP (proposed MNA). Received the monitoring reports. Reviewed RAP and the entire file that submitted by Tyree. Tyree proposed Monitored Natural Attenuation for the site. This site is going to develop and a commercial building will be on top of it. Basically, this site has not enough groundwater information for the area where the future building locate, extremely high soil concentration was observed even after excavation. RAP rejected and requested: 1) delineation of the groundwater contamination on where the building locate. 2) construction detail and vapor mitigation design. 3) propose another RAP. (RJF) 1/4/2005 -

Map ID	Site	Database(s)	EPA ID Number

GETTY (Continued) **S102232691**

Feng - Quarterly Monitoring Report, 8/2005 - 10/2005. 3 monitoring wells locate in 3 corners of the site. W-2, 14.4 ppb BTEX and 949 ppb MTBE. W-3, 8.98 ppb BTEX and 86.6 ppb MTBE. W-4, not accessible. 2/13/2006 - Feng - Reviewed the construction details (drawings submitted by Just Architecture) on 2/10/2006. Emailed to Scott Cunningham (Tyree) requested vapor barrier specification since it wasn't on the drawings. And asked about the status of extending passive venting pipe to Ex.1 and application of ORC. (RJF) 2/24/2006 - Feng - Approve via email the installation of Passive Vapor Extraction System in area of Ex 2 (letter 1/19/2006, drawing attached), and the application of ORC in area of Ex 1 (letter 2/22/2006) to address the soil contamination in these area that couldn't be removed off the site anymore due to location problem. Still need the vapor barrier detail, thickness and material, etc. and the weight of ORC that going to be used. (RJF) 3/17/2006 - Feng - Approve the installation of vapor barrier system Griffolyn Type-65 and thickness of 8 mil (email from Just Architecture, 3/14/2006). Since there is no basement, and contamination is mainly in the soil below south sidewalk which cannot be removed, and water table at 10'-12', so thickness of 8 mil was approved. letter sent to Kevin Shea (Getty Properties) and CC to Tyree. (RJF) 8/28/2006 - Feng - Update from Paul Lindell (Delta), the remedial work is held by the developer now. The NYC Buildings Dept has issued another violation because of the property condition. Getty could only do their work when the developer has done certain things on his site. (RJF) 10/17/2006 - Feng - Quarterly Monitoring Report, 5/2006 - 7/2006, 7/2006, by Tyree. DTW 9.49' to 10.57' bg, flow direction west. No LNAPL. BTEX range from non-detect to 367.1 ppb. MTBE range from non-detect to 245 ppb. (RJF) 11/13/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 10/2006, 10/2006, by Tyree. Groundwater sampled and gauged 9/25/2006. 2 monitoring wells. MW-1, MW-2, MW-3, MW-4, MW-5 and MW-6 were destroyed during the excavation 6/2006 and 8/2006. DTW 10.71' to 11.20' bg. Flows to west. No LNAPL. MW-7, 1,016.44 ppb BTEX, 4.81 ppb MTBE. MW-8, BDL. (RJF) 1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. Construction started. PVES will be installed after developer constructes the proposed building on the site. 9/19/2006 ORC Advanced solution applied to the contaminated soil. (RJF) 5/10/2007 - Feng - Spoke to D. Madigan (Tyree). The building is up and the vapor barrier was installed. A passive well was installed and will be connected to the building this week. (RJF) 11/6/2007 - Feng - Reviewed the spill closure request, letter from Tyree dated 6/14/2007. Tyree performed the ORC application and the installation of the PVES at the proximity of north sidewalk of West 184th Street. Vapor barrier installed for the new building. But the latest submitted quarterly report of 10/2006 indicated the groundwater concentration of 1,016 ppb BTEX in the MW-7. Spill closure request denied and additional work required to conduct at the MW-7 area. Work plan due 12/21/2007. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. Monroe college campus is opened onsite. Tyree will grab water samples (GeoProbe) from MW-7 area. (RJF) 8/6/2008 - Reviewed the Subsurface Investigation Report dated January 2008, by Tyree, pdf copy via email. On 12/3/2007, 2 soil borings were advanced in the vicinity of former MW-7 using GeoProbe. Soil was screened began at 5 feet bgs until groundwater was met at 11 feet. No PID readings. 2 soil samples were collected at 5'-10' bg. Soil analyticals are ND. 2 groundwater samples were taken and slight VOCs exceedances were detected. B-1,

Map ID	Site	Database(s)	EPA ID Number

GETTY (Continued) **S102232691**

2.2 ppb benzene. B-2, 11.6 ppb benzene, 11.4 ppb MTBE. Tyree requested spill closure. (RJF) 9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. Need old hydrographs. Will review the closure petition. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. Petition for closure with updated maps, contours and hydrographs for historical data by 1/2009. (RJF) 12/14/2009 - Reviewed Spill Closure Request, dated 6/12/2009, by Tyree. Email Tyree comments, in eDoc. Resubmit the closure request by 1/2010. (RJF) 11/2010 - (KGH) Getty Petitions R2 for Spill Closure 12/2011 - (KGH) Central Office BTS(Hale)is requested to assist OGC with coordination of DEC response to Notice of Bankruptcy Filing: Chapter 11, CaseNo.: 11-15606 Getty Petroleum Marketing, Inc.,et al. BTS is also provided with a list of 15 spill numbers for which Getty has petitioned but not yet received closure. KGH begins review of files available in EDOCs. 2/1/2012 - KGH meets with R2 staff to discuss Getty Bankruptcy Case and closure petitions. Consensus of senior staff is that Spill # 97-02759 has been addressed to the extent feasible and it was appropriate to consider closure. 2/8/12 - KGH - an overfill during delivery in 6/1997 caused a surface spill of gasoline into the sewer system which resulted in vapor impacts to neighboring buildings. This was quickly resolved by NYFD. Subsequent investigation by DEC identified significant petroleum soil contamination which was excavated in 2005 to the extent feasible. Approximately 1500 tons of soil was removed. The site was redeveloped in 2007 and vapor mitigation (barrier and passive vent) was engineered into the new construction. Inaccesible residual soil contamination may remain but will biodegrade over time. GW concentrations have steadily decreased since source removal and were very close to drinking water standards when last sampled in 2008. The Department is requiring No Further Action at this time. Spill is being closed as currently Not Meeting Standards. Additional data may be submitted in the future for consideration of an upgrade in closure status. NFA"

Remarks: "AREA IS GOING TO BE EXCAVATED AND TESTED."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

Map ID	Site	Database(s)	EPA ID Number
	CON EDISON SERVICE BOX: 3111 (Continued)		**1017773630**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Map ID	Site	Database(s)	EPA ID Number

TM 359 (Continued) **S104653189**

O'CONNELL e2mis no. 131628: 8 gallons of oil in the dirt around transformer TM-359. Mr. Guion states that this is a dry transformer vault and that the dirt is packed solid around the transformer, Conduit plate 27-I-2 indicates a sewer connection for this vault. Mr. Guion states that the oil is in the packed dirt around the transformer and did not migrate to the sump pit, which is packed solid with dirt. Clean up pending sample results. Mr. Guion states that the transformer oil level is indicatting below minimum, and that the feeder will be taken out of service on an emergency so the transformer can be replaced. Historical data indicates oil to be 39 ppm PCB dated 10/18/85. Lab Sequence Number: 00-05270 PCB 48 ppm 6/1/00 Flush operator T. Brown reports that the clean up in transformer vault # 359 is complete. The I&A removed the transformer, and the flush crew removed approx. 1500 lbs of solid debris. The structure was power washed twice and the wash water was removed via the vactor truck. Mr. Brown reports that the sump is concrete and that there is no sewer connection. The transformer was drained on Wednesday 5/31/00. Operating supervisor T Guion reports that the oil capacity of the transformer is 210 gallons, and 200 gallons was removed."

Remarks: "transformer reported below minimum (low fluid) that caused the spill. "

DEC Memo:	"Spoke to ECO Galvin on site, a contractor for Wallmart was washing out paint brushes (water based paint) and runoff entered a storm drain that went to a lake, tickets will be issued, nfa - mm 10/28/08: As per Cathy Quinn, RCDOH: CQ responded. Conversed with DEC john o'mara and En Con Officer. Painting contractor washed water based paint compound into storm drain which is flowing into retention pond for the N. DeBaun Housing west of Walmart, then wrapping around first set of those housing buildings and into wetland area. from there would generally move parallel to north side of 59 to Mahwah River. Tallman FD, Ramapo PD and D Greeley present. Water is milky white, this during rain event. Downstream municipalities advised. Not recoverable. RCDOH is closing our involvement. DEC (En Con Galvin and Fetterman present at scene) will take enforcement action. "
Remarks:	"Rockland County Health and ECOs on scene."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

AMOCO-65425671005 (Continued) **1004567140**

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Summary from Investigation Summary Report(Delta, 4/26/04): 4/15/97 Crompco performed an integrity test on reg, silver and premium grade gas lines. Premium failed. 4/16/97 Alvin identified the source and repaired the line. Impacted soil surrounding the line in the vicinity of dispenser #5 was excavated. 4/30/97 Baltec screened the soil by PID and collected two endpoint samples. BTEX and MTBE were detected. 1/98-1/01 Baltec initiated EFR and conducted 36 events. Approx 12gal of LNAPL, 20,042gal of groundwater and 5,064lbs of VOCs were recovered and treated. 8/21/01-8/22/01 Delta advanced two borings, one on-site and one off-site, to depths between 20 and 21.5 ft. Fractured schist bedrock was between 10.5-12'bgs. Groundwater was encountered at approx 12'bgs in MW-5 and 10.5'bgs in MW-6. The borings were completed as cased bedrock monitoring wells. Soil samples collected were above cleanup values for xylenes and MTBE in MW-6(10-10.5'). 4/24/02 Baltec advanced four borings between 8-12'bgs. Continuous samples were collected. No significant PID readings were recorded in SB-1, SB-2 and SB-4. PID readings in excess of 1,999ppm were detected in SB-3 at 5-8'bgs. Two soil samples were collected from SB-3 at 5-8'bgs and at 8'bgs. BTEX and MTBE were detected above cleanup values at 8'bgs. 5/6/02 Delta conducted a soil gas survey. PID readings were from ND to 2,000ppm. Maximum soil gas concentrations were located at two locations, one near the tank mat and one west of the pump islands. 12/02 Seismic refraction survey was conducted to determine the topography of the bedrock surface beneath the site. Depth of competent bedrock was determined to vary between 3-14'bgs. Bedrock slopes from northeast to southwest. 6/16/03-6/18/03 MW-6 was reconstructed and installed to 25.5'bgs as an open borehole well. MW-2 was scheduled for rehab, however it was repeatedly collapsing and was determined to have been installed within the UST cavity, in gravel. It was not actually a bedrock well. MW-1, MW-2, MW-3, MW-4 and MW-5 were abandoned on 6/16/03 due to unknown

Map ID	Site	Database(s)	EPA ID Number

BP AMOCO STATION #654 (Continued) **S102560571**

construction and/or no significant impacts. They present a risk of cross contaminating deeper strata. 7/1/03 Borehole geophyisical logging of bedrock well MW-6 was performed to determine the orientation of productive bedrock fractures in the well. Two large cavities and two fractures were identified to a depth of about 18'bgs. A productive fracture occurs at 16'bgs and dips 57degrees to the east. The other fracture is not productive. 3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 6/10/03 Received 2Q02 monitoring report. 7/3/03 Received monitoring well abandonment report from Delta. MW-1, MW-2, MW-3, MW-4 and MW-5 were abandoned. MW-6 remains in place for geophysical investigation and groundwater monitoring purposes. 12/3/03 Reassigned from Vought to Foley. 12/8/03 Received 1Q03(data from 3/11/03)monitoring report. Concentrations of BTEX and MTBE in excess of groundwater quality standards were detected. The monitoring well system should be reinstalled. 12/16/03 Received Second Quarter 2003 (12/8/03) monitoring report. MW-6 is the only well on-site. Total BTEX is 2446ppb and MTBE is at 3090ppb. Concentrations were above groundwater standards when wells were abandoned. 1/15/04 Sent out STIP. Due back 2/23/04. Requires delineation and remedial action/maintenance plan. 2/24/04 STIP fully executed. 4/27/04 Invesigation Summary Report reviewed. Future plans include a system upgrade(w/ some source removal), replacement of MW-3 with MW-8 next to dispenser #5, and installation of MW-7 near tank mat(in a productive bedrock depression). See PIN 2767, spill #8201287, 8710420 at adjacent property 2318 Jerome Ave (now Gaseteria). 5/7/04 Portfolio meeting: Intermittent spikes of MTBE detected. Will be upgrading and excavating impacted soils. To delineate with 2 additional wells. CAP expected 3Q04. 6/21/04 3Q and 4Q03 monitoring reports received. Only one well remaining on site with BTEX/MTBE at 2417/1000ppb and 2156/788ppb respectively. 8/6/04 Received SHAR addendum for installation of MW-7 and MW-8. Completed to 10.5' and 11.5' respectively. DTW 8.81' and 8.34' respectively. MW-7 soil clean. Total VOCs in soil at MW-8(8-9') at 236,750ppb. 8/9/04 1Q04 monitoring report received. MW-6 shows 2071/1100ppb BTEX/MTBE. 8/23/04 2Q04 monitoring report received. Two additional wells, MW-7 and MW-8. All three sampled on 6/3/04. 0.03' LNAPL detected in MW-8. BTEX from 3401ppb(MW-6) to 48240ppb(MW-8). MTBE from ND(MW-7) to 59400ppb(MW-8). 4/27/05 Portfolio meeting- Although spill was originally associated with dispenser #5, Delta suspects that there have been tank issues at the site. Shallow bedrock. MW-10, MW-11 installed for planned pilot test on 5/2/05 - 5/3/05 for MPE. Will probably propose a mobile MPE system. Working with BP to install containment at tank areas. 5/31/05 Received subsurface hydrocarbon assessment report dated 5/26/05. Installed three permanent, on-site MWs (MW-9, MW-10, MW-11). Soil collected from MW-11(8-8.5'bgs) contained 19240ppb total BTEX, 2410ppb MTBE. GW samples collected from MW-9, MW-10. Insufficient water was in MW-11. Total BTEX was 414ppb(MW-10) and 69ppb(MW-9). MTBE was 419ppb(MW-10) and 3870ppb(MW-9). 6/16/05 Approved investigation. RAP due within 45 days. 6/30/05 4Q04- BTEX from 9ppb(MW-7) to 73470ppb(MW-8). MTBE from ND(MW-7) to 52000ppb(MW-8). 7/26/05 3Q04- 0.11' LNAPL in MW-8. BTEX from 877ppb(MW-7) to 1403ppb(MW-6). MTBE from ND(MW-7) to 631ppb(MW-6). DTW 8-9'bgs. MW-6 is a bedrock well, MW-7 & MW-8 are overburden wells. 8/2/05 Pilot testing and Analysis Report for Multi-Phase Extraction received. 8/10/05 Remedial Action Plan received. MPE pilot ran for 24.5hr on 6/2-6/3/05. 10hp liquid ring pump at 100% capacity induced an avg of 16.7 in Hg at extraction well

Map ID	Site	Database(s)	EPA ID Number

BP AMOCO STATION #654 (Continued) **S102560571**

MW-8, an avg airflow of 38.6SCFM and achieved an ROI of 40'. Drawdown was observed in MW-10 and MW-11 (10.8' and 20.5' away respectively from MW-8). Mobile MPE unit will be utilized for 8hr events semi-monthly. After four events, Delta will reevaluate the removal efficiency. 8/12/05 Approved RAP. To be implemented within 45 days. 11/10/05: Quarterly monitoring report dated 10/7/05. Five wells sampled on 6/1/05. No LNAPL present. MW6 is a bedrock well. Max BTEX 26470ppb(MW8), max MTBE is 2810ppb(MW9). Elevated train downgradient. Fluctuating contaminant concentrations. 11/25/05 3Q05 - DTW 7.91-9.39'bgs. BTEX from 118ppb(MW-9) to 3208ppb(MW-8). MTBE from 115ppb(MW-8) to 3440ppb(MW-10). MW-7 and MW-11 not sampled. 3/3/06 4Q05- DTW 6.77-8.89'bgs. Six wells sampled 12/7/05. No LNAPL. BTEX from 37ppb(MW-9) to 4088ppb(MW-8). MTBE from ND(MW-7) to 40600ppb(MW-11). 3/6/06 November 2005 MPE O&M report received. 8hr MPE events have been completed every two weeks since 9/26/05. Extracting from MW-8. Cumulative recovery from influent vapor stream was 24.24lbs BTEX, 3.14lbs MTBE and 369.44lbs TPH. 3/16/06 Met with BP and Delta. Shallow bedrock with tanks in depression. Intermittent LNAPL in MW-8. From 9/05 to 12/05, 374lbs VOCs and 703gal GW treated. MTBE spiked in MW-11 which may have been due to MPE pulling in. MPE conducted every other week. Upgrades to spill containment to be done. Will reevaluate effectiveness of MPE. 6/8/2006 - Feng - project reassigned to RJFeng. (RJF) 9/26/2006 - Feng - Quarterly Monitoring Report, 1Q2006, 8/17/2006, by Delta. Sampled on 3/3/2006. DTW 6.81' to 8.75' bg. Flows to northwest. No LNAPL. BTEX from 0.49 ppb (MW-7) to 1,569 ppb (MW-6). MTBE from ND (MW-7) to 1,180 ppb (MW-10). MW-8 was not sampled due to the runoff from snow melt flooding the well. MW-11 was not sampled because it was dry. (RJF) 9/29/2006 - Feng - Portfolio meeting with BP and Delta. MPE conduct biweekly, no LNAPL recovered. Change MPE event to monthly for a few months and then evaluate the effectiveness. Re-classified to P2. (RJF) 12/28/2006 - Feng - MPE Operation and Maintenance report, January 2006, 11/14/2006, by Delta. MPE events conducted on 1/16/2006 and 1/30/2006. 1/16/2006, 11 Hg, 41 SCFM, 8 hours, removal rate 0.1251 lbs/hr BTEX, 0.0115 lbs/hr MTBE, and 2.05 lbs/hr TPH. 1/30/2006, 19 Hg, 52 SCFM, 8 hours, removal rate 0.1727 lbs/hr BTEX, 0.017 lbs/hr MTBE, and 2.48 lbs/hr TPH. As of 1/30/2006, total of 29.61 lbs BTEX, 3.61 lbs MTBE, and 467.40 lbs TPH have been removed. 12/28/2006 - Feng - MPE Operation and Maintenance Report, February 2006, 11/14/2006, by Delta. MPE events conducted 2/16/2006, and 2/27/2006. 2/16/2006, 21 Hg, 22 SCFM, 8 hours removal rate 0.0417 lbs/hr BTEX, 0.0051 lbs/hr MTBE, and 0.84 lbs/hr TPH. 2/27/2006, 20 Hg, 58 SCFM, 8 hours, removal rate 0.1788 lbs/hr BTEX, 0.0167 lbs/hr MTBE, and 2.4127 lbs/hr TPH. As of 2/27/2006, a total of 31.28 lbs BTEX, 3.75 lbs MTBE, and 496.45 lbs TPH have been removed. 12/28/2006 - Feng - MPE Operation and Maintenance Report, March 2006, 11/14/2006, by Delta. MPE event conducted 3/14/2006. 19 Hg, 46 SCFM, 8 hours, removal rate 0.1107 lbs/hr BTEX, 0.0118 lbs/hr MTBE, and 1.92 lbs/hr TPH. As of 3/14/2006, a total of 31.25 lbs BTEX, 3.75 lbs MTBE, and 499.69 lbs TPH have been removed. 12/28/2006 - Feng - MPE Operation and Maintenance Report, April 2006, 11/14/2006, by Delta. MPE events conducted 4/10/2006, and 4/24/2006. 4/10/2006, 14 Hg, 69 SCFM, 8 hours, removal rate 0.2475 lbs/hr BTEX, 0.0269 lbs/hr mTBE, and 3.80 lbs/hr TPH. 4/24/2006, 15 Hg, 67 SCFM, 8 hours, removal rate 0.2891 lbs/hr BTEX, 0.035 lbs/hr MTBE, and 4.00 lbs/hr TPH. As of 4/24/2006, a total of 35.41 lbs BTEX, 4.14 lbs MTBE, and 569.72 lbs TPH have been removed. 12/28/2006 - Feng - MPE Operation and Maintenance

Report, May 2006, 11/14/2006, by Delta. MPE events conducted 5/11/2006. 17 Hg, 58 SCFM, 8 hours, removal rate 0.2545 lbs/hr BTEX, 0.0312 lbs/hr MTBE, and 3.65 lbs/hr TPH. As of 5/11/2006, a total of 36.33 lbs BTEX, 4.22 lbs MTBE, and 588.02 lbs TPH have been removed. 12/28/2006 - Feng - MPE Operation and Maintenance Report, June 2006, 11/14/2006, by Delta. MPE events conducted 6/5/2006 and 6/21/2006. 6/5/2006, 16 Hg, 67 SCFM, 8 hours, removal rate 0.1168 lbs/hr BTEX, 0.024 lbs/hr MTBE, and 2.56 lbs/hr TPH. 6/21/2006, 17 Hg, 67 SCFM, 8 hours, removal rate 0.2628 lbs/hr BTEX, 0.0442 lbs/hr MTBE, and 2.85 lbs/hr TPH. As of 6/21/2006, a total of 40.28 lbs BTEX, 4.80 lbs MTBE, and 647.72 lbs TPH have been removed. (RJF) 2/6/2007 - Feng - 2Q2006, 11/27/2006, by Delta. Groundwater sampled 6/13/2006. 6 monitoring wells. DTW 6.49' to 8.58' bg. Flows northwest. No LNAPL. MW-6, 1,024 ppb BTEX, 227 ppb MTBE. MW-7, BTEX ND, less than 1 ppb MTBE. MW-8, 15,560 ppb BTEX, 15,000 ppb MTBE. MW-9, 56.5 ppb BTEX, 766 ppb MTBE. MW-10, 55.88 ppb BTEX, 788 ppb MTBE. MW-11, 896 ppb BTEX, 14,400 ppb MTBE. (RJF) 2/8/2007 - Feng - MPE Remedial Event Report, July 2006, 12/20/2006. MPE events conducted biweekly on MW-8, 8-hour on 7/5/2006 and 2.5-hour on 7/17/2006. As 7/17/2006, a total of 44.63 lbs BTEX, 5.34 lbs MTBE, and 716.04 lbs TPH have been removed. 2/8/2007 - Feng - MPE Remedial Event Report, August 2006, 12/13/2006. MPE events conducted biweekly on MW-8, 8-hour on 8/14/2006. As 7/17/2006, a total of 46.88lbs BTEX, 5.71 lbs MTBE, and 745.06 lbs TPH have been removed. (RJF) 4/19/2007 - Feng - Portfolio meeting with BP and Delta. There is alternation to the RAP. Delta will conduct bi-monthly MPE event due to the low recovery of MPE events. MW-2 was installed in the tank mat. MW-1, 4 and 5 were not installed probably for there is no casing which act like a conduit to the subsurface. DEC agree on bi-monthly MPE events but still need to have an alternative to address the contamination. We will see how the MPE results for 2 more quarters. (RJF) 6/18/2007 - Feng - 3Q2006, 3/20/2007. Groundwater sampled 9/15/2006. All 6 monitoring wells were sampled. DTW 7.55' to 9.05' bg. Flows to northwest. No LNAPL. MW-6, 810 ppb BTEX, 105 ppb MTBE. MW-7, 0.68 ppb BTEX. MW-8, 16,117 ppb BTEX, 7,150 ppb MTBE. MW-9, 85.2 ppb BTEX, 1,350 ppb MTBE. MW-10, 44 ppb BTEX, 2,300 ppb MTBE. MW-11, 73.6 ppb BTEX, 980 ppb MTBE. (RJF) 8/14/2007 - Feng - 1Q2007, 7/11/2007. Groundwater smapled 2/28/2007. 5/6 monitoring wells were sampled. DTW 7.55' to 9.32' bg. Flows to southwest. No LNAPL. MW-6, 1,227 ppb BTEX, 152 ppb MTBE. MW-7, ND. MW-8, 3,159 ppb BTEX, 160 ppb MTBE. MW-9, 14 ppb BTEX, 494 ppb MTBE. MW-10, 13.6 ppb BTEX, 386 ppb MTBE. MW-11, not sufficient water volume, not sampled. (RJF) 10/10/2007 - Feng - Portfolio meeting with BP and Delta. The site was sold in August 2007. All the tanks, pipes and pump islands were removed and additional impacted soil was removed. All the wells onsite are destroyed. Delta submit the IRM report for the EFR work, quarterly water monitoring, and the result of source removal. And Delta will re-establish the well network probably in 1/2008, and collect 4 quarter groundwater for baseline to evaluate for the RAP. The RAP will be submitted in 2009. (RJF) 12/7/2007 - Feng - Call from Kevin Kleaker (Impact Environmental). Putting together a tank closure report and will submit to DEC. (RJF) 12/12/2007 - Feng - 2Q2007, 9/5/2007. Active service station. The monitoring well network was gauged and sampled on 5/21/2007. The site is being remediated via the execution of EFR events on regular basis. 6 monitoring wells were gauged. DTW 5.49' to 8.69' bg. Flows to southwest. No LNAPL. 6 monitoring wells were sampled. BTEX range ND to 1,742 ppb (MW-8). MTBE range ND to 500 ppb (MW-8). (RJF) 3/4/2008

BP AMOCO STATION #654 (Continued) **S102560571**

- Feng - Reviewed the Tank Closure Assessment Report, 12/7/2007, by Impact Environmental. Before the tank removal, groundwater samples were taken to establish the baseline and VOCs detected. From 9/10/2007 to 10/29/2007, 2 (4,000-gallon) double wall steel gasoline USTS, 3 (4,000-gallon) single wall steel fiberglass coated gasoline USTs, 6 associated gasoline dispensers, all associated piping and appurtences and 1 hydaulic lift fluid reservoir were properly removed from the site by Felix and Son Storage Tank Corp. Petroleum impacted soil was excavated subsequent to the USTs removal to the extent necessary/possible and loaded onto trucks from transport to an offsite disposal facility. Over-excavation was performed on the site vertically to bedrock and horizontally to where no petroleum impacted soil was detected or where site structual conditions limited any further excavation. The excavation was extended to the site boundary to the north, site boundary/bedrock to the east, and to where no petroleum impacted soil was detected on the entire southern extent of the property. Total 3,846.84 tons of non-hazardous petroleum contaminated soil was transported and disposed at Soil Safe, Inc in Logan Township, NJ. Groundwater encounted at the bottom of excavation, and on 9/17 and 9/18/2007, a total of 4,060 gallons of non-hazardous petrochemical impacted liquids were removed from the site. 11 endpoint samples and 5 sidewall samples were taken. Analytical results reveal clean soil encountered. On 11/13/2007, Impact Environmental collected groundwater sample from GWP-1 and MW-1. No VOCs in GWP-1. VOCs detected in MW-6. Remedial activities will be continued by BP/Delta, including replace the destroyed monitoring well network and quarterly monitoring. (RJF) 3/20/2008 - Feng - eDoc Quarterly Monitoring Report 3Q2007. (RJF) 6/25/2008 - 3Q2007, 2/25/2008. Active service station. The monitoring well network was gauged and sampled on 8/8/2007. The site is being remediated via the execution of EFR events. Remediation events occur at the site on a regular basis. 4/6 monitoring wells were gauged. DTW 7.02' to 8.98' bg. Flows to southwest. No LNAPL. BTEX range 4.17 ppb (MW-9) to 2,123 ppb (MW-6). MTBE range ND to 766 ppb (MW-10). (RJF) 7/29/2008 - Remedial Activities Report, dated 5/16/2008, by Delta. The report summarizes the remedial activities, i.e. MPE events and soil over-excavation at the site. Between September 2005 and August 2007, 31 MPE events were conducted and recovered 3.9 lbs of benzene, 51.26 lbs of BTEX, 6.07 lbs of MTBE and 823.27 lbs of TPH. Between September 14 and October 29, 2007, 3,846.84 tons (117 truckloads) of petroleum impacted soil was excavated and removed from the site during the UST system replacement and station raze and rebuild activities. The soil removal activities were performed across the entire site. Soil was over-excavated down to bedrock or to a depth where the petroleum impacts were no longer in evidence. BP will re-establish the onsite monitoring wells network during 2008. Email BP for the reason why no endpoint were taken and the new monitoring wells installation report. (RJF) 7/29/2008 - Spoke with Eric Larson (BP). The over-excavation was essentially to remove the petrouleum impacted soil, it was screened with PID and observation sense in determining the removal of the impacted soil. The over-excavation was not sufficient toward spill closure, that's why endpoint were not collected. The new wells were installed in June 2008 and groundwater was sampled in July 2008. DEC asked for the installation report to be submitted. (RJF) 12/17/2008 - Reviewed the letter investigation work plan attached with Site Plan and Bedrock contour map, dated 12/4/2008, submitted by Delta. 3 wells are proposed. Comments were

Map ID	Site	Database(s)	EPA ID Number

BP AMOCO STATION #654 (Continued) **S102560571**

provided to Delta, that a complete work plan is required. (RJF) 3/4/2009 - 3Q2008, 10/29/2008, by EnviroTrac. Active BP service station. The monitoring well network ws gauged and sampled on 8/1/2008. 4 wells were gauged. No LNAPL. DTW 6.52' to 6.85' bg. Flows to southwest. 2 wells were sampled. MW-13 and MW-15 were dry. Max benzene 3.3 ug/L (MW-12). Max BTEX 48.1 ug/L (MW-12). Max MTBE 7.4 ug/L (MW-14). 4Q2008, 1/26/2009, by EnviroTrac. Active BP Service station. The monitoring well network was gauged and sampled on 11/5/2008. 4 wells were gauged. No LNAPL. DTW 6.31' to 6.48' bg. Flows to southwest (historical). 2 wells were sampled. MW-13 and MW-15 were dry. Max benzene 4.7 ug/L (MW-12). Max BTEX 60.9 ug/L (MW-12). Max MTBE 4.5 ug/L (MW-14). (RJF) 5/20/2009 - Reviewed Investigation Work Plan, dated 3/31/2009, by Delta. Delta proposes to install 3 wells. Work plan is approved. SHARA within 90 days, August 20, 2009. (RJF) 11/2/2009 - Reviewed Subsurface Hydrocarbon Assessment Report Addendum, dated August 21, 2009, by Delta. On June 28, 2009, EnviroTrac, on behalf of Altantic Richfield, advanced 3 soil borings MW-16, MW-17 and MW-18 using Geoprobe 6610 hollow-stem auger and direct push, macro-core sampling unit. All borings were advanced to refusal. 2 soil samples were collected. MW-17 (9.5-10'), 140 ug/kg benzene, 820 ug/kg MTBE, 4,170 ug/kg total VOCs. MW-18 (5.5-6'), 216 ug/kg total VOCs. A soil sample could not be collected from MW-16 given that a refusal surface was encountered during the hand clearing process. 2 2-inch monitoring wells (MW-16 to 4.25 feet and MW-17 to 13 feet) were installed. A monitoring well was not installed in the MW-18 due to a lack of saturation in the overburden. The wells were surveyed on August 12, 2009. And on August 6, 2009, groundwater samples were collected from MW-12, MW-13, MW-14 and MW-17. MW-15 and MW-16 were not sampled due to insufficient water. MW-12, 200 ug/L BTEX. MW-13, 236 ug/L BTEX. MW-14, 22 ug/L BTEX. MW-17, 1,000 ug/L benzene, 5,500 ug/L Toluene, 1,800 ug/L ethylbenzene, 7,400 ug/L xylene, 230 ug/L MTBE, 21,292 total VOCs. (RJF) 11/6/2009 - email to ARCADIS for an investigation work plan within 30 days to delineation crossgradient and downgradient of MW-17. (RJF) 11/12/2009 - 3Q2009, 11/10/2009, pdf, by EnviroTrac. Active BP service station. The monitoring well network was gauged and sampled on August 6, 2009. The well network was re-surveyed on August 12, 2009. 6 wells were gauged. NO LNAPL. DTW 5.31' to 7.54' bg. flows to southwest (historical), or west (inferred). 4 wells were sampled. MW-15 and MW-16 were dry. Max benzene 1,000 ug/L (MW-17). Max BTEX 15,700 ug/L (MW-17). Max MTBE 230 ug/L (MW-17). (RJF) 2/11/2010 - Reviewed Investigation Work Plan, dated 12/4/2009, by ARCADIS. ARCADIS proposes MW-18 and MW-19 to be installed at the Jerome Ave sidewalk where the north and south of MW-17. Comments to ARCADIS, 1) question about SB-18, and 2) soil sampling location. Revision within 30 days. (RJF) 4Q2009, 1/19/2010, by EnviroTrac. Active BP service station. The monitoring well network was gauged and sampled on 11/17/2009. 6 wells were gauged. NO LNAPL. DTW 5.70-8.49' bg. Flows to southwest historically and inferred to flow northwest. 4 wells were sampled. MW-15 and MW-16 were dry. Max benzene 4,100 ug/L (MW-17). Max BTEX 29,400 ug/L (MW-17). Max MTBE 510 ug/L (MW-17). Letter from ARCADIS, dated 1/20/2010. MW-12 to MW-15 were gauged once a month since 1/2009, and MW-16 and MW-17 were gauged monthly since 6/2009. NO measurable LNAPL has been observed in any of the wells during the past year. ARCADIS requests the gauging frequency be reduced to quarterly to coincide with groundwater monitoring events. 2/23/2010 - Reviewed Revised Investigation Work Plan, dated

Map ID	Site	Database(s)	EPA ID Number

BP AMOCO STATION #654 (Continued) **S102560571**

2/17/2010, by ARCADIS. Work plan is approved. Report due 5/2010. (RJF) 4/20/2010 - email from Andy Korik (ARCADIS). The drilling is scheduled for Monday April 26. 5/21/2010 - 1Q2010, 3/25/2010, by ARCADIS. Guaged and sampled on 2/3/2010. DTW 6.86-8.85' bg. MW-13, MW-15, MW-16 were recorded as dry and not sampled. NO LNAPL. Flows to northwest. Max benzene 5,000 ug/L (MW-17). Max BTEX 31,900 ug/L (MW-17). Max MTBE 670 ug/L (MW-17). ARCADIS requests reduce monthly gauging to quarterly. The 2 wells installation are scheduled for 4/2010. 7/26/2010 - 2Q2010, 6/11/2010, by ARCADIS. Gauged on 4/12/2010 and 5/12/2010. DTW 5.23 to 8.91' bg. Flows to west at hydraulic gradient of 0.33 feet per foot. LNAPL in MW-17 (0.01'). Sampled on 5/12/2010. Max BTEX 7,430 ug/L (MW-18). Max MTBE 9.00J ug/L (MW-18). 10/29/10: This spill case transferred from R. Feng to J. Kolleeny. - JK 02/03/11: Reviewed Results of 3rd Qtr 2010 GW Monitoring rpt dated 10/20/10 and GW Monitoring and Analysis Rpt 4th Qtr 2010 dated 1/20/11, both by ARCADIS (both in eDocs). Results of 3rd Qutr 2010 GW monitoring presents Aug. 2010 sampling results, showing signifant impacts in three wells in sidewalk along Jerome Ave., along west side of site: MW-17 had 22,300 ug/L total BTEX and 120 ug/L MTBE (down from 31,900 ug/L and 670 ug/L resp. when last sampled in Feb. 2010; had 0.02 ft of free product in May 2010); MW-18 had 2,380 ug/L tBTEX (down from 3,130 ug/L in May 2010); and MW-19 had 710 ug/L tBTEX, up from 259 ug/L in May 2010. Rpt states monthly well gauging & quarterly sampling will continue, with next sampling event in Nov. 2010. GW Mon & Analysis Rpt for 4th Qtr 2010 presents results of GW sampling in Nov. 2010; samples were also collected from 3 most impacted wells in Oct. 2010 for geotechnical analysis. Results show MW-17 had 16,100 ug/L total BTEX & 140 ug/L MTBE in Oct. 2010 and 19,200 ug/L tBTEX & 120 ug/L MTBE in Nov. 2010; MW-18 had 2,380 ug/L tBTEX in OCt. 2010 and 3,190 ug/L tBTEX in Nov. 2010; MW-19 had 62 ug/L tBTEX in Oct. 2010 and 53 ug/L tBTEX in Nov. 2010. Rpt states monthly well gauging & quarterly sampling will continue, with next sampling event in Feb. 2011; also states they will prepare a RAP and submit by end of Feb. 2011. - JK 03/18/11: Reviewed Remedial Action Work Plan for Anaerobic Biological Oxidation by ARCADIS, dated Feb. 2011 (revised 3/4/11, per disk w/pdf file, uploaded to eDocs). RAWP proposes injection of sulfate via 3 new injection wells, to enhance bioremediation and address persistent GW contam along west side of site. After 1st injection, one or two rounds of performance monitoring will be performed to determine frequency of addt'l injections. I sent letter (in eDocs) to Jon Armstrong of BP, cc's to Andrew Korik & Gene Choquette of ARCADIS, approving plan but requesting install'n of addt'l mon well in sidewalk to north of well MW-18 to better delineate plume and that if impacts are found in new well, to add another (4th) injection well between MW-18 and new mon well. Also, asked that 1st round of follow-up GW samples be analyzed for full list of gasoline-related VOCs, not just BTEX + MTBE. - JK 04/08/11: On 4/5/11, received email from Andrew Korik of ARCADIS: We are scheduled to install injection wells starting April 19th per RAWP approved by you. We will also attempt to install another delineation well north of MW-18. If evidence of significant impacts are observed at proposed delineation well location, then we will also attempt to install a 4th injection well between MW-18 and new delineation well. Please contact me if you have any questions and thank you for quick review of RAWP. - J. Kolleeny 4/11/2011 - Spill transferred back to JFeng. 4/14/2011 - email from Andrew Korik of ARCADIS We are tentatively scheduled to install injection wells during the week of

Map ID	Site	Database(s)	EPA ID Number

BP AMOCO STATION #654 (Continued) **S102560571**

April 25 per the approved Remedial Action Work Plan. We were going to do this next week, but had to postpone to get additional info to MTA for permits. 4/21/2011 - email from Andrew Korik We are scheduled to begin work at the 2350 Jerome Ave site (installation of injection wells per approved RAWP) on Monday April 25th. The first day will be hand-clearing to 6.5 feet. Drilling/well installations would not commence until Tuesday. Be advised that per your conditional approval of the RAWP, we will be attempting to install an additional delineation well north of MW-18. If impacts are encountered then a fourth injection well will be installed as shown on the attached figure. 4/28/2011 - spoke with Andy Korik of ARCADIS. They installed 3 injections wells IW-01 through IW-3 and could not hand clear the possible of MW-20 as to delineate the south of MW-18. They moved closer to MW-18 and got the well in. Impacts was found (1,000 ppm PID) so they installed the well as IW-4 in case to treat the impacts. Multiple attempts were made to advance wells/soil borings in the north of MW-18 but not successful. DEC concerns if there is enough wells to monitor the sulfate injection. Requests switch from monthly gauging to quarterly gauging also. JF 5/4/2011 - email to Andy Korik of ARCADIS Andy, We are ok to switch from monthly gauging to quarterly gauging. And we are still thinking about the delineation of the site. In the meantime, please hold on the sulfate injection for now because we don't want to see injections without enough wells to monitor. thanks, June JF 6/14/2011 - email from A. Korik of ARCADIS June please see the attached letter which transmits our notification that four sulfate injection wells were installed at the above referenced site. As you may recall, the original WP specified 3 injection wells, but you had requested that we attempt to delineate further north along the sidewalk (past MW-18) and to install an additional monitoring well and a 4th injection well if impacts were encountered. We had shallow refusal at our attempt at a monitoring well, so we stepped back toward MW-18 (from the north) were able to advance a boring to 13.5 feet. Since we encountered impacts at this location, we installed an injection well (IW-04). Are you available to talk about this site and also site 17782? We have just received our USEPA injection permits. eDoc the letter. 6/21/2011 - email from A. Korik June: Here is the second quarter report for spill # 9700644. We should discuss this when you get a minute. The injection wells are installed and I have permission from USEPA to begin sulfate injections. Thank you. Andy eDoc 2Q2011 report. 9/23/2011 - Reviewed the Sulfate Injection Well Installation Notification, dated 6/13/2011, by ARCADIS. The installation of the injection wells took place on April 25 and 26, 2011. In approving the RAWP, DEC required one additional monitoring well in north of MW-18 and additional one shall be installed if petroleum impacts are encountered. A new monitoring well labeled as B-MW-20 was attempted at 17 feet north of MW-18 and due to shallow refusal, a well was not installed at this location. Another location was tried and was advanced to 13.5 feet. PID readings were hit and field evidence of petroleum impacts were observed and thus the well was installed as an injection well IW-04. Due to refusal on bedrock at approximately 10 feet, injection wells IW-02 and IW-03 were installed to 9.5 feet, but still intersecting the saturated zone. Will notify the DEC one week in advance of the injection events. 9/26/2011 - 2Q2011, 6/20/2011, by ARCADIS. The well network was guaged and sampled on May 19, 2011. 7 wells were gauged and sampled. The water depth was around 4.31 to 7.52 feet bg. Water elevation is 0.25 to 0.77 higher than the February 2011 gauging

Map ID	Site	Database(s)	EPA ID Number

BP AMOCO STATION #654 (Continued) **S102560571**

event. High BTEX in multiple wells. MW-17, 21,000 ug/L BTEX, 39 ug/L MTBE. IW-04, 18,000J ug/L BTEX, 9.00J ug/L MTBE. MW-18, 2,700 ug/L BTEX, 11 ug/L MTBE. Low BTEX and MTBE in the rest of the wells, MW-12, MW-13, MW-14, and MW-19. ARCADIS recommends continue quarterly monitoring and next round will be in August. EPA has granted the permission for magnesium sulfate heptahydrate injection and ARCADIS recommend fthat the initial injections into IW-01 through IW-04 begin as soon as possible. 11/21/2011 - email from Andy Korik We are planning to conduct the first round of injections at 2350 Jerome Ave. starting on December 7th. We expect the work to last about 10 days. Please call me if you have any questions. Thank you. 5/8/12 - Raphael Ketani. Mr. Korik submitted a proposal to the DEC on 5/1/12 requesting to use sodium nitrate in place of sodium persulfate for treating the groundwater contamination at the site. After review by our technical staff, a number of comments and requests were submitted to me for forwarding to Mr. Korik. I put the comments and requests in a draft letter for the review of Hassan Hussein, EE III at Region 2 DEC. In brief, the letter approved the use of sodium nitrate and requested bacteria culture information, dosing information, nitrate enriched groundwater management information, that the groundwater must be kept anoxic and a warning regarding the regulated use of sodium nitrate. Mr. Hussein approved the letter and it was sent out today. 5/9/12 - Raphael Ketani. Mr. Korik sent me copies of two letters that were sent to the EPA regional office regarding the intent to perform sodium nitrate injections. The letters were dated 5/5/11 and 2/29/12. 5/30/12 - Raphael Ketani. Earlier, Mr. Korik had sent me an ARCADIS 5/23/12 response letter to the Department’s 5/7/12 conditional approval letter regarding the use of sodium nitrate in place of sodium persulfate. I reviewed the response letter which addressed the 7 comments the Department had made. Their responses were as follows: 1) ARCADIS sent a letter dated 2/29/12 to the EPA indicating that they will use sodium nitrate in place of the sodium persulfate. However, they haven’t had a response from the EPA. 2) The amounts of sodium nitrate that will be on site will be less than the 400 pound limit. For this site, 120 lbs. of the material will be stored on site at any given time. 3) Dosing information was presented and was deemed appropriate. 4) Quantitative polymerase chain reaction was used to evaluate the presence of Dichloromonas species bacteria. 5) By using appropriate amounts of the sodium nitrate chemical, the nitrate concentrations will be maintained in order to keep the groundwater environment anoxic. 6) The push pull method will be used to extract any groundwater. This method doesn’t cause the reorientation of the soil grains which would result in a loss of the efficiency of the injections. They state that there will be minimal groundwater displacement. 7) The nitrate concentrations will decrease in two ways: first, nitrate reducing bacteria and reduced minerals will change the nitrate to nitrite and eventually to nitrogen gas. Secondly, the nitrate will be diluted by the downgradient groundwater. Estimates of the distance traveled by 1000 ppm nitrate groundwater until it becomes 10 ppm nitrate groundwater were included in a table. The nitrate enriched groundwater under the site will have to travel 30 feet in order to reach CP-51 levels. Later today, a conference call took place between Mr. Korik, other staff from ARCADIS, staff from BP and myself. The proposed use of sodium nitrate was discussed. Specifically, the ARCADIS 5/1/12 sodium nitrate proposal, the Department’s comments in our 5/7/12 response letter and the information in the ARCADIS 5/23/12 response letter. I stated that

Map ID	Site	Database(s)	EPA ID Number

BP AMOCO STATION #654 (Continued) **S102560571**

the Department considered that ARCADIS, and thereby BP, had adequately responded to the Department's comments with the exception of item #7, monitoring nitrate concentrations in the groundwater. Mr. Korik explained that, for BP station #00654, there were monitoring wells in the sidewalk downgradient of the injection locations. I stated that this was sufficient for monitoring the groundwater. The ARCADIS 5/23/12 response letter was found to be acceptable with the only comment being that they will have to frequently sample the groundwater in order to be sure that it does not exceed the CP-51 standards. If they find that the standards are exceeded, then they will have to propose a means for managing the excess nitrate. ARCADIS must submit a letter plan with a work schedule by June 29, 2012 for conducting the injections and submitting quarterly groundwater monitoring reports. I drafted a letter for the review of Hassan Hussein, EE III and head of the Hazardous Materials Unit. 5/31/12 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out. 6/19/2012 - meeting with ARCADIS. Do the pilot in the injection well and monitor MW-16, MW-17 and MW-18. Propose a bedrock well at the former MW-2 area at DEC Ketani's request. Will follow the bedrock well installation protocol. 6/26/2012 - Reviewed Supplemental Letter Work Plan for Nitrate Injections, dated 6/19/2012, by ARCADIS. The Work Plan is intended to fulfill the Department s requirement of specific information (i.e. monitoring, reporting and injection details) regarding the injections as part of the Department s approval of the proposal to use sodium nitrate to treat the contamination on May 30, 2012. ARCADIS proposes to inject 5,300 gallons, 8,000 gallons, and 5,300 gallons of sodium nitrate solution at a concentration of 0.3% by weight into the injection wells for Site 654, Site 5082, and Site 17782, respectively. A groundwater monitoring program will be implemented subsequent to the application. Approves the Work Plan after discussed with Raphael Ketani. Report by 12/2012. 8/1/2012 - 1Q2012, 4/17/2012, by ARCADIS. Groundwater was sampmled 2/1/2012. DTW 5.47 (MW-12) to 7.98 (MW-17) below TOC. MW-17, 34,000 BTEX, 29 MTBE. MW-18, 1,100 BTEX, 5J MTBE. MW-13, 270 BTEX, 3 MTBE. The next sampling will be in 5/2012. Recommend replacing magnesium sulfate heptahydrate with sodium nitrate. 10/18/2012 - 2Q2012, 7/26/2012, by ARCADIS. Groundwater was sampled on 5/10/2012. DTW 5.14 (MW-12) to 8.09 (MW-17). Flows to west to north northwest at a hydraulic gradient of 0.067 feet per foot. A groundwater well will be installed in bedrock near the location of former MW-2. MW-19, 96 BTEX. MW-17, 15,000 BTEX, 13 MTBE. MW-18, 700 BTEX, 6 MTBE. 12/13/2012 - 3Q2012, 10/24/2012, by ARCADIS. Groundwater was sampled on August 2, 2012. Groundwater flows to west to north-northwest at hydraulic gradient of 0.035 feet per foot. MW-17, 16,000 BTEX, 16 MTBE. MW-18, 550 BTEX, 7 MTBE. MW-13, 24J BTEX, 1.0 MTBE. email dataed 2/20/2013 from Andy Korik We have been able to schedule the installation of the bedrock well at BP site 00654 for Monday and Tuesday of next week. Matt Bell of ARCADIS will be supervising. 4Q2012, 1/31/2013. Quarterly monitoring on 11/13/2012. DTW 5.68 (MW-13) to 8.28 (MW-17). NO LNAPL. MW-15 and MW-16 were dry during the 4Q2012 sampling. MW-17, 12,000 BTEX, 14 MTBE. MW-18, 470 BTEX. ARCADIS recommended continue quarterly monitoring. A bedrock well near the fomre MW-2 will be installed and the well will be sampled and the results will be evaluated prior to the implementation of calcium nitrate injection. the bedrock well is scheduled for installation in late 2/2013. email dated from Andy Korik, dated 3/21/2013 I have attached the groundwater results from the bedrock

Map ID	Site	Database(s)	EPA ID Number

BP AMOCO STATION #654 (Continued) **S102560571**

well recently installed at BP site 00654. The results are non-detect for most STARS VOC compounds and below TOGS criteria for MTBE and 1,2,4 trimethylbenzene. The well was installed just above (west of) the current and former tank pad, at the location very close to where previous bedrock well MW-2 is shown. We will be providing you with a well construction diagram in the forthcoming Q report. Based on this data we would like to proceed with calcium nitrate injections at this site. Thank you. Reviewed lab report. Sample BR-1A, dated 3/13/2013. low/ less than 5 ug/L. 5/8/2013 - 1Q2013, 4/26/2013. quarterly monitoring on 2/5/2013. DTW 5.64 (MW-13) to 8.24 (MW-17). MW-19, 57J BTEX. MW-17, 16,400 BTEX. MW-18, 713 BTEX. The bedrock well BR-1A was installed on 2/26-27/2013. Petroleum impacts were not observed while hand clearing the boring and groundwater was not encountered in the overburden. DTW 7.11 prior to development and 7.26 after development. The well was sampled on 3/13/2013. MTBE was estimated 5 ug/L. 1,2,4-trimethylbenzene to be 3 ug/L. ARCADIS believes that the installation of additional wells is unnessary and the calcium nitrate injection as should begin immediately in accordance of the approved RAP. ARCADIS recommended continue quarterly monitoring. the new bedrock well will be incorporated into the monitoring program. Will begin planning for implementation of the calcium nitrate pilot injection program. 8/21/2013 - met with ARCADIS. The bedrock well BR-1A has showed nothing in the last two quarters. ARCADIS requests for closure of BR-1A to eliminate an open conduit of contamination to the bedrock in the middle of a gas station. DEC agreed on the closure of BR-1A. ARCADIS will go ahead with the calcium nitrate injection into IW-2, IW-3 and IW-4 without IW-1. 5/13/2014 - email from A. Korik of ARCADIS MW-15 and MW-16 have been dry during our entire time working on this project. I would like to abandon them so that they are not a potential conduit into the subsurface. We have also been made aware of an old monitoring well in the sidewalk, that appears to be MW-6 based on old site figures. This well is damaged below grade and is also indicated to be a bedrock well based on old boring logs. I would like to also abandon this well as soon as possible as we do not want a conduit into the bedrock. 8/26/2014 - 2Q2014, 8/8/2014, by ARCADIS. Groundwater was sampled on 5/29/2014. MW-17, 11,000 BTEX. MW-18, 350 BTEX. 8/26/2014 - Well Decommissioning Report, 8/21/2014, by ARCADIS. on 8/14/2014, ARCADIS decommissioned monitoring wells, MW-6, MW-15 and MW-16 in accordance with CP-43. in DecDocs. 12/19/2014 - 3Q2014, 12/5/2014. Monitoring on 8/22/2014. DTW 6.98 (MW-14) to 9.27 (IW-4). MW-19, 46J BTEX. MW-17, 20,000 BTEX. MW-18, 390 BTEX. 2/24/2015 - 4Q2014, 2/24/2015. Monitoring on 11/20/2014. DTW 5.30 (MW-12) and 8.12 (MW-17) feet. MW-17, 18,000 BTEX, 19 MTBE. MW-18, 560 BTEX. 9/30/2015 - 1Q2015, 6/11/2015. Monitoring on 3/16/2015. DTW 5.58 (MW-17) to 7.12 (IW-4) feet. MW-13 was dry during the current sampling event. MW-19 was not found and was not gauged or sampled. New well was installed in the sidewalk on the west side of Jerome Ave on 5/26/2015. A 2nd well was attempted but not successful. New well will be sampled in 6/2015 sampling event. MW-17, 16,000 BTEX. MW-18, 3,700 BTEX. 2Q2015, 9/9/2015. New well MW-21 was installed in the sidewalk on the west side of Jerome Ave on 5/26/2015. Monitoring on 6/8/2015. DTW 5.35 (MW-12) to 8.58 (MW-21). MW-19, 23 BTEX. MW-12, 13J BTEX. MW-17, 16,000 BTEX. MW-21, 6 n-propylbenzene. MW-18, 2,900 BTEX. ARCADIS proposed to abandon MW-13 due to its dryness and its historical low concentration. 3/30/2016 Feng - This spill is transferred from J. Feng to J. Vought as per J. Vought. "

Registry ID: 110043655372

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Spill Record Last Update:	2008-09-16
Spiller Name:	MICHAEL WORDEN
Spiller Company:	UNKNOWN
Spiller Address:	JEROME AVE BTW E.184TH ST & NORTH ST
Spiller City,St,Zip:	BRONX, NY
Spiller Company:	999
Contact Name:	MICHAEL WORDEN
Contact Phone:	(646) 584-5800
DEC Memo:	"09/12/08-HRAHMED-Duty Desk- Called Michael Worden of DEP (646 584 5800). DEP pumped out anti freeze and the drum flipped over and spilled some waste oil on the street. Michael said it can affect the nearby catch basin. The drum was empty and DEP called sanitation to pickup the drum. DEC Ahmed told him to call sanitation to sand the road where the spill happened. Michael called sanitation and they are on their way to sand the road. Ahmed told him that he can call DEC if he need any help from DEC. This case is closed. "
Remarks:	"CALLER STATES THAT THERE IS A 55 GALLON DRUM THAT WAS FULL OF WASTE OIL AND ANTIFREEZE THAT WAS FULL AND SPILLED INTO THE ROADWAY. CALLER STATES THAT IT MAY HAVE AFFECTED THE SEWER. CLEAN UP HAS NOT BEEN DONE."
