Registry ID: 110008088489

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 10/9/02 9:52 Spoke to Nick Recchia He is working for the owner/developer: Ismael Fernandez c/o Michael Wengroff WR Capital Advisors, LLC 61 West 74th Street - Suite 2B NY, NY 10023 He received results from soil borings performed across a vacant lot. There are no known tanks. He encountered contaminated soil from 10-13' below grade, then clean soil until bedrock at 17'. Groundwater was not encountered. He ID'd the petroleum as Weathered Fuel Oil. Phase II Results will be mailed to Vought. OD/JMR. 11/27/2002-Vought-Left mesaage for Joan Tally (NYCHA-212-227-9374) that I had not received report as of yet (she called inquiring about review status). Also left message for Nick Rechia (516-746-4400) that I have not received report as of yet. 8/4/2003-Vought-File review by Vought: 4/2002-Phase I Site ESA-EEA-Property is an 11,000 square foot rectangular vacant lot covered by asphalt. Dry cleaners operated between 1977 and 1981. A phase II was conducted in 5/01 through the collection of six soil samples from depths of 10 to 20'. Typical drycleaning products and their breakdown products were not included in laboratory analyses . Phase I recommends soil samples be taken for drycleaning constituents. 7/2002-Phase II ESA-EEA-purpose of Phase II was to investigate possible impact of dry cleaning operations. Analyticals

Map ID	Site	Database(s)	EPA ID Number

SPILL NUMBER 0207086 (Continued) **S106008244**

indicated no drycleaning constituents above TAGM 4046 requirements. Four soil borings were performed in area of former drycleaning operations. Soil samples were obtained at depth of 17' below grade and also below all fill materials . No drycleaning constituents in soil however up to 10000ppb napthalene(B3), 24000ppb 1,3,5-trimethylbenzene(B3) and 210ppb benzene(B4). 9/2002-Phase II ESA-EEA-purpose of Phase II was to determine extent of petroleum impacted soil. Ten soil borings performed on-site using Geoprobe. Groundwater was not encountered in any of the borings. Contamination found at depths ranging from 8 to 15'. Sample analyicals were not submitted with report. 10/18/02-Workplan for soil Remediation-EEA-Workplan proposal of soil excavation and subsequent collection of endpoint samples. 11/27/02-Vought-Sent email to Nick Recchia approving of soil excavation. 12/4/2002-Vought-Sent letter to EEA approving workplan with additional requirments of 1)Endpoint samples (EPA method 8270) 2)delineation of soil and groundwater contamination 3)Surrounding property sketch 4)analyticals from ten soil borings peformed on 9/02. 6/18/2003-Vought-Received Soil Investigation Summary from Jeffrey Shelkey (EEA-516-746-4400). On 7/12 soil samples were collected from two test pit excavations on-site for off site disposal documentation. Test pits were dug to maximum equipment reach (16-18' below grade). Contaminated soil found in TP-2. Soil samples were collected from 6' below interior spread footing for the building. EEA will continue with delineation of soil and groundwater contamination as required in a 12/4/02 NYSDEC letter. TPH analyticals indicate contamination is #2 fuel oil.
7/03-Vought-Spill Closure Report-EEA-Remedial action of soil excavation completed. Twelve endpoint soil samples collected. A total of 95.06 tons of soil were removed from site (disposal manifests provided). Report recommends no further action.
8/8/2003-Vought-NYSDEC requires 1)delineation of soil contamination to the east and west of former area of petroleum contamination (no endpoints or borings were collected from directly east or west of soil contamination) 2)submission of soil analyticals from ten soil borings performed on 9/2002 3)surrounding property sketch to scale including adjacent streets 4)Placement of former soil contamination area and all previous borings on site plan. 9/15/2003-Vought-Letter from EEA(Jeff Shelkey) to DEC. Your request for soil borings on Townsend Avenue ...is not justified. Soil samples collected from the bottom of the excavation at SS-2 and SS-10 on the west side are sufficient to delineate the extent of contamination .
10/15/2003-Vought-email from Alan Serpa(EEA) to DEC Rommel that she review the site data with Vought for NFA reconsideration. Rommel required the following be addressed 1)submission of disposal analtyicals to indicate severity of contamination 2)reason for no samples on west side and 3)submission of analyticals from ten soil borings performed on 9/2002. 10/16/2003-Vought-Phone conversation with Shelkey to convey review with Rommel and requirements of 10/15/2003. 10/17/2003-Vought-Fax from Shelkey including 6/17/03 letter above describing test pits which were used for disposal characterization. Analyticals show no TAGM 4046 Soil Cleanup Objective exceedances. 10/18/2003-Vought-Spoke with Shelkey to inquire about submission of ten soil boring analyticals from 9/2002. Shelkey stated that the only soil sample that was sent for analysis was from boring SB5. Vought also inquired about reason for no samples directly on east and west side of contamination. Shelkey replied that endpoint samples were collected (four bottom and eight sidewall).

Map ID	Site	Database(s)	EPA ID Number

SPILL NUMBER 0207086 (Continued) **S106008244**

10/22/2003-Vought-Revied site data with DEC Rommel and spill closed at per Rommel due to clean endpoint sample analyticals which pass TAGM 4046 Soil Cleanup Objectives (excluding minor PAH exceedances attributable to fill material). Spill closed by Vought on 10/23/2003.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

VOUGHT 9/19/05 - Obligado - Spill transferred from Vought to Obligado 12/1/05 - Obligado - Review Baseline Assessment Report submitted by Delta on 10/2/02. At time of assessment, site was owned and operated by Gaseteria Oil Corporation. On 1/3/02 Independent Testing Laboratories advanced 4 borings (SB1, SB2, SB3, SB5. Depths from 11 to 61.3 ft bgs. Seven soil samples collected. On 2/20/02, Delta advanced two more borings, SB6 and SB7. Soil boring analytical results show only one impact, 750 ppb MTBE at SB2 (10-10.5'). Four soil borings converted to temporary monitoring wells, samples collected on 1/3/02 and 2/2/02. GW results at MW1 show 162 ppb MTBE; at MW-6 show 1440 ppb ethylbenzene, 4350 ppb xylenes; at MW7 show 3370 ppb MTBE. RCRA metal exceedences at MW3 including 346 ppb Arsenic, 982 ppb Chromium, 2200 ppb Lead. Wells resampled on 8/7/02. GW results at MW1 show 4.62 ppb benzene, 920 L ppb MTBE; at MW6 show 73.7 ppb benzene, 836 ppb toluene, 58600 L ppb ethylbenzene, 210000 ppb xylenes and 485790 ppb total VOCs; at MW7 show 2050 L ppb MTBE. RCRA metals show Arsenic 161 ppb, Chromium 319 ppb, and Lead 213 ppb at MW7. Estimated 8 inches of product identified in MW6 on 8/7/02. Fingerprint analysis indicate premium grade highly weathered/degraded gasoline that has probably been in the subsurface an extended period of time. Soil is consists of sand, silty sand, and clay. PID readings of 2500+ at SB6, groundwater located at 15 ft bgs. 12/7/05 - Obligado - Tank pull scheduled for 12/20. Wells need to be installed next year. 1/27/06- Obligado - Spoke to Steve Muller, he said tank pull was completed. A UST Closure report will be submitted to the DEC. 4/3/06 - Obligado - Review UST Closure report. Two 4000 gallon gasoline USTs removed in Dec 2005. No pitting, holes, or excessive deteriaoration. Product fill, supply and vent lines were excavated, cut and capped. all product supply lines to pump islands and vent lines to building roof were excavate and removed. Five sidewall and 1 bottom sample collected. Results in ppb: North - 8800 xylenes, 13000 1,2,4 trimethylbenzene South - 3600 xylenes East - 22000 1,2,4 trimethlybenzene West - 33000 xylenes, 40000 trimethlylbenzene, 16000 1,3,5 trimethlybenzene Summary - the operation of this site as a gaoline service station has caused impact to the suburface soils....A remedial Action Plan (RAP) will be submitted to the NYSDEC for approval. 4/11/06 - Obligado - Called Steve Muller to discuss site and possibly add to the 2Q06 Delineation schedule. 7/19/06 - Obligado - Meeting with ASR, DEC, and Gaseteria. ASR will submit a schedule for work to be done. 9/12/06 - Obligado - Emailed on multi-site Stip to Gaseteria on 9/8/06. Sent original on 9/12/06. Due date for ISR according to Corrective Action Schedule is 11/1/06. 12/15/06 - Obigado - Reviewed Subsurface Investigation Summary Report dated October 2006, submitted by ASR, received by Department 10/30/06. Report documents installation of 3 additional monitoring wells. Approved workplan was for 4 wells. No explanation as to why only 3 wells were installed. No well installed adjacent to former tank area as proposed. No soil results above standards. GW results showed: MW1 - 77 MTBE MW2 - 1300 1,2,4 trimethylbenzene, 410 1,3,5 trimethyl benzene, 100 isopropylbenzene, 500 n-Propylbenzene MW3 - ND Sent email to Steve Muller and cc Porcelli: The Department requires additional wells to be installed to complete the delineation of the site. Please submit a workplan to complete the delineation to the Department within 30 days of receipt of this email. A map is attached showing approximate locations where the Department requires 3 additional well installations. Please submit the Supplemental Investigation Workplan by January 16, 2006. 1/17/07 - Obligado -

Map ID	Site	Database(s)	EPA ID Number

BP AMACO (Continued) **S108130448**

Received Additional investigation workplan. 2/12/07 - Obligado - Reviewed Additional investigation workplan. Proposed the installation of 1 additional monitoring well south of pump island. Sent email approval letter. FISR due 4/12/07. 6/1/07 - Obligado - Final summary report submitted. 7/30/07 - Obligado - 1 Additional well was installed as per the RAP. Ground water was ND for BTEX in all for wells. One well had minor exceedences of 1,2,4 trimethylbenzene (69 ppb), isopropylbenzene (28 ppb), Napthalene (18 ppb), Npropylbenzene (140 ppb), sec-butylbenzene (44 ppb). Sensitive receptor survey was previously completed by DElta in 2002. According to this survey, no potable wells or surface bodies in immediate vicinity of the site. Nearest surface water body is harlem river, 3500 ft west of the site. The closest school is 800 ft northeast of site site (upgradient). Data from this site do not indicate potential adverse impacts to human health and the environment. I discussed this site with Joe Sun. We agreed to close this spill. I emailed an NFA letter to Gaseteria. "
Not reported

Remarks: "Contaminated soil and groundwater found. Data reported to DEC by Delta despite knowledge by Gaseteria since 8/5/2002."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "8/29/2011 - Sangesland spoke to Pete at Riteway Tank. They opened up the sidewalk to replace the fill line and found contaminated soil. They will remove all contaiminated soil, take end point samples and take photographs of the hole. Once they get clean endpoints, they'll install a new fill line and repour the cement sidewalk and submit a full report to Mr. Ketani. 8/30/11 - Raphael Ketani. The site is an apartment building at 1711 Davidson Avenue, Bronx, 10453 (block and lot 2867/47). According to the 3/6/92 deed, the owner is 1711 Davidson Avenue Housing Development Fund Corporation (HDFC). The PBS is #2-467367. There is an active 5,000 gal. AST on soil with #6 oil. The contact is James Gay (718) 299-7060. Rightway Tank Maintenance (718) 855-7272 is conducting the remediation work. I checked the Spills database, but I did not find another spill case with this address. 9/16/11 - Raphael Ketani. I spoke to Peter Mirabile (mi-ra-bi-lay) (718) 855-7272 about the site. He said that the contaminated soil had been removed. The hole is still open. He is waiting on the soil analytical results before filling in the hole and writing the closure report. 10/20/11 - Raphael Ketani. I tried to contact Mr. Mirabile (718) 855-7272 regarding receipt of the closure report, but I could only leave a message. Later, Dave Chan from Riteway Tank sent me an e-mail stating that he will put together the closure report very quickly. 10/28/11 - Raphael Ketani. Mr. Chan sent me the closure report dated 10/27/11 and pictures depicting the remediation. I reviewed the documents. The soil analytical results were almost entirely non-detect for VOCs and SVOCs. Two manifests were included in the closure report for the soil that was removed. Based upon the data in the closure report, I have determined that the great majority of the soil contamination has been removed and the fill pipe has been replaced. Therefore, the residual contamination is not a threat to the public or the environment. I closed the spill case effective today. "
Remarks: "stained soil located from faulty fill pipe when removing a sidewalk"

MOUNT HOPE HOUSING COMPANY (Continued) **S108467817**

Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 327473
DEC Memo: "Sharif spoke with Mr William Silveri @(212)221-7822, he told me that 5000 gallon tank has been removed and bottom excavation looked dirty.End point sample was taken, results will be sent to DEC Jeff Vought. 6/6/07-Vought-Received call from Gunnar Fridiksson (Mount Hope Housing Company 718-299-2051x14 cell 646-206-1857). Gunnar working with remediation contractor (Ambient Group -Shawn Wallace will be sending in report for review by Vought).
06/27/07-Vought-Received call from Fridiksson who is looking for review of remedial action plan. Preliminary review of plan calls for excavation and dewatering but no mention made of endpoint sampling. Fridiksson will call DEC on 6/29 for update of review status and with more information on collection of endpoint samples.
07/02/07-Vought-Vought received call and spoke to Shawn Wallace (Ambient). Vought reviewed Request for NFA from Ambient Group dated 6/14/07. Site is vacant lot that is proposed to redeveloped with community center and residential housing. RAP submitted to NYCDEP. Two USTs onsite. Ambient requested No Further Action. Enclosed in report is Remedial Action Plan by TRC Environmental dated June 2005 that was submitted to DEP. Groundwater depth at 20' and proposed foundation is 10' below grade. RAP also includues provisions for PID monitoring during excavation, dust supression, management of dewatered groundwater. Copy of DEP Negative Declaration also submitted. Six soil borings installed and samples collected from 5-17'bg show: 996ppb sec-butylbenzene(SB5), 375ppb isopropyltoluene(SB5). Concentrations below TAGM 4046 RSCO's however SSDS still required for precaution. Soil excavation will be required for installation of basement. DEC requires: 1)vapor barrier 2)SSDS 3)endpoint sampling at foundation depth 4)PBS registration 5)notification upon reaching of limits of excavation. Wallace requested 30 day deadline. Letter should be addressed to: Gunnar Fridiksson Mount Hope Housing Company 2003-05 Walton Avenue Bronx, NY 10453 Fax: (718) 299-5623 Vought sent letter with 30 day deadline to above address with cc to Wallace and DEP Wuthenow.
07/9/07-Vought-Received and reviewed site plan with proposed boring locations and groundwater analyticals. Soil borings were performed as part of 7/02/07 No Further Action request referred to above. The current plan is to remove the top 8' of urban fill in area approximately 50'x50' measured from the southeast corner of the lot. This should put us near or slightly below the level of the foundation. At this point end-point samples will be taken. The groundwater is clean and the foundation depth for the new building will be approximately 10' feet below the sidewalk level. The ground surface on the lot is currently about 5-6' below sidewalk level thus we do not anticipate disturbing the soil below 10' of ground surface. At this level the soil is all loose urban fill with results below TAGM 4046 guidelines. Notification will be made to DEC for site excavation when limits of foundation are reached. Soil analyticals from six soil borings show no TAGM 4046 Soil cleanup Objectives. Requirements from above 7/2/07 entry still apply. This site address also listed as 1785 Walton. 08/09/07-Vought-Received call from and spoke to Wallace who inquired if SSDS would be needed under enitire footprint as per EPA Guidance. Vought required SSDS to be installed as per Guidance. During excavation, a six foot diameter tank (above 1100-gallons) was discovered. Unsure of soil contamination under UST.

Map ID	Site	Database(s)	EPA ID Number

MOUNT HOPE HOUSING COMPANY (Continued) **S108467817**

Layer of clay at 12' down with some discoloration and slight odor. DEC will receive one report with endpoint analyticals, SSDS plans and vapor barrier specs by 10/1/07. DEC will receive notification when limits of excavation are reached for possible site visit. 08/13/07-Vought-Spoke to Wallace and received email from Wallace with site plan and proposed SSDS system and Wallace inquiring if proposed SSDS is sufficient. Vought cannot give approval until excavation is complete (and true soil conditons are known). Vought called Wallace and required that he submit site plan with boring locations from 6/14/07 report. Site has to AOCs (one from tank in sidewalk and other from new area discovered on 8/9/07). Vought required PBS registration and collection of endpoints before final approval can be given of SSDS and sent email with above and email also noted that further delineation may be required upon submission of endpoint samples from two AOCs. 08/20/07-Vought-Received site maps with boring locations via email from Wallace. DEC requires: 1)vapor barrier 2)SSDS 3)endpoint sampling at foundation depth 4)PBS registration. Attached to email was site plan with boring locations and endpoint sampling locations. Site plan has area to be excavated for foundation, potentially impacted by tank (50'x50'). 08/23/07-Vought-Email request from Wallace for approval to begin construction of foundation and vapor barrier. During the course of the excavation for footings on the east side, where the UST was located that precipitated this spill number, contaminated soil was removed. Samples from this pile did show some VOCs. DEC requires: 1)submission of VOC analyticals for endpoint samples. 1)subission of vapor barrier and SSDS specs including site plan 3)endpoint sampling at foundation depth for VOCs 4)PBS registration. Vought sent email of above requirements and requirement of formal report before approval for construction is given. 09/14/07-Vought-Received specifications of SSDS from Croxton Collaborative Architects PC (212-683-199) including negative pressure throughout entire sub-slab area, installation of vapor barrier and suction fan at roof. Vought also received plans for SSDS. Vought also received and reviewed NYSDEC Closure Report submitted by Ambient Group dated 8/30/07. Depth of endpoint samples was 38-40'bg. Report request No Further Action. Endpoint samples from initial tank removal only showed chrysene exceedences. Borings performed in June 2007 showed contamination at B1 (12'bg), B3(12'bg), B4(12'bg). B5(12'bg), B6(12'bg), B7(8'-12'bg). The clay layer with odor resides at approximately elevation 38' and thus will not be disturbed during foundation excavation, except for areas of footings. Site plan shows collection of 21 endpoint samples, analytical results are for six soil borings. Soil analyticals show:360ppb n-butylbenzene(SB5 15-17'), 996ppb sec-butylbenzene(SB15 15-17'bg), 375ppb isopropylbenzene(SB5 15-17'bg) DEC requires: 1)groundwater sample from sidewalk next to tank 2)placement of soil borings and endpoint samples results on SSDS plan 3)endpoint sample analytical submission before SSDS approval can be given 4)collection of soil samples from under former tank locations. 9/14/07-Vought-Called Eileen (Ambient) and Sean on vacation. Vought left message for Sean and also left message for Fredrickson with above requirements. 9/26/07-Vought-Teleconference with Sean Wallace, Keith Cleversy (Ambient) and Darron Hapa (architect). Groundwater sample was collected from adjacent to tank location and analyticals submitted in 8/30/07 Closure Report and show no TOGs 1.1 Groundwater Quality exceedences. Groundwater sample collected from topographically downgradient location. Endpoint samples were also placed on figure

MOUNT HOPE HOUSING COMPANY (Continued) **S108467817**

submitted in 8/30/07 Closure Report and sample analyticals also submitted for VOCs in same report. Soil analyticals show no TAGM 4046 Soil Quality Objective exceedences and these samples were also collected from bottom of UST excavations. Spill closed by Vought and No Further Action Letter sent by Vought."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "08/18/09 - See eDocs for Con Ed report detailing cleanup and closure. Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #146226: 03-Decemver-2002 13:24 Hrs Flush Mechanic Tom Brown, 44432, reports while flushing debris from TM403 after a 500 Kva network transformer was removed for replacement due to an internal fault at the corner of Davidson Avenue and 174th Street, Bronx, finding approxmately 4 gallons of an unknown oil mixed into the flush debris contained in the manhole. No fire or smoke is/was involved. No sewers, waterways, or private property affected. No injuries involved. Sample being taken for analysis. Environmental tag 29838 applied. Some oily debris was sucked into Flush truck 60588 before the oil was observed and the truck will be quaranteened until lab sample is processed in case oil contains hazardous levels of PCBs. Chem Lab reports lab sample may take longer than 24 hours to process because oil needs to be extracted from soil. Cleanup will be performed pending lab results, and spill will be tracked as a reportable spill because lab results may take longer than 24 hours to process."
Remarks: "4 gals unk oil mixed with sand and debris - confined to manhole con ed 146226 "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"4/26/05-Vought-Site visit by Vought. On scene were FDNY Hazmat(Mike Ripoll), NYPD, NYCDOS and NYCFD. Two trucks involved in accident with no bodily injury. Spill on concrete and to storm drain. NYCDEP (Andrew Wood) arrived on site at 1am. As per NYCDEP no further action required on spill to storm drain. Spill cleaned using speedy dry and sand. Two (30-gallon) drums of adsorbent material generated. Tow company (Auto Rama 718-585-7100 718-585-8680) agreed to pick up drums. Vought called Autorama and drums were picked up and are at Autorama. Spill closed by Vought."
Remarks:	"ACCIDENT BETWEEN TWO TRACTOR TRAILERS RESULTED IN FUEL SPILL ONTO PAVEMENT AND SOME INTO A STORM DRAIN. SADDLE TANK ON BOTH TRUCKS RUPTURED. SPILL IS STOPPED AND CONTAINED."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "5/26/15 TJD DeMeo contacted Ray from PTC - he states spill is on the roof of the school - overfill of day tank (smaller than 275 - unknown size at this time). Concrete tiles cover a membrane roof - product under tiles - estimated area of impacts is 20ft x 8ft. Product entered roof drain but has not shown in basement sumps - a trap (elbow) is preventing the migration of product from drain to sump - dry weather. PTC crews are actively working on cleanup and have called for vac truck to recover product from affected drain. Cause of discharge is under investigation. Patel dispatched to spill location. 05/26/15-Hiralkumar Patel. alternate address: 1594-1598 Townsend Ave no other spills found. PBS #: 2-606269. as per PBS record, the site has following tanks: - one (1) 3,000 gal #2 oil AST on saddles, in-service, installed in Jan. 1993 - one (1) 275 gal diesel AST on saddles, in-service, installed in Jan. 1993 - one (1) 50 gal diesel

Map ID	Site	Database(s)	EPA ID Number

PS # 170 (Continued) **S117973670**

AST on saddles, in-service, installed in Jan. 1993 12:20 PM:- left message for Ray. 1:00 PM:- visited site and met Adriel (718-716-2161), school custodian. Adriel mentioned that based on inventory record, approx. 25 gal of diesel spilled from a day tank in secondary containment located on building roof. day tank leaked into the secondary containment over the long weekend and overflowed onto roof. oil spilled onto porous insulation tiles on roof. PTC crew was removing impacted tiles. noted membrane underneath the tiles. some oil got into roof drain and collected into the trap. no signs of oil in sumps in basement. no signs of oil dripping or stain or odors in two classrooms right underneath the spill location on roof. as PTC crew was using an elevator to transfer contaminated material outside the building, there was some odors noted in the elevator and first floor lobby. asked Adriel to stop transfering contaminated material through elevator until school ends. spoke with Ray at PTC. they are responding with vac truck to remove product from the drain trap. 1400 TJD Spoke with Ray @PTC - principal has requested PTC suspend cleanup until end of school day due to odors. Spill cause is cracked 50 gallon AST (day tank). Updated Patel - he has departed site - insulation tiles cover roof, then membrane - then concrete. Membrance appears to have prevented migration of product. Classroom beneath spill area are free of petroleum impacts and odors. 05/28/15-Hiralkumar Patel. 8:39 AM:- spoke with Ray. they have pumped out drain trap and removed most of the contaminated material. asked Ray to check basement sumps and classrooms underneath the spill location. 08/07/15-Hiralkumar Patel. 9:41 AM:- left message for Adriel. 10/30/15-Hiralkumar Patel. 11:30 AM:- left message for Adriel. 11:34 AM:- spoke with Sonia Acevedo Suarez, acting principal at the school. she confirmed that spill cleanup was completed in May and there are no petroleum odors in the building. case closed based on observations during the site visit and discussion with the principal."

Remarks: "on roof - down drain to basement - cleanup in progress"

FINDS:

Registry ID: 110008088461

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and

Map ID	Site	Database(s)	EPA ID Number

INWOOD MEDICAL PRACTICE (Continued) **1007734751**

it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

COMPLIANCE AND EMISSIONS REPORTING

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- DEC Memo: "10/12/05 - Raphael Keaton. I spoke to Amy Fontana of Shaw Environmental ((845) 492-3100) regarding the spill. The client is the City School Construction Authority. She said that the gasoline was discovered while doing soil borings at the site. She said that a phase 1 was done a couple of months ago and the phase 2 investigation plan was submitted to the Construction Authority just recently. However, no phase 2 work has taken place yet. Ms. Fontana said that Shaw did find some Sanborne Insurance maps which showed 2 550 gal. tanks on site. However, when they did a ground penetrating radar survey of the area, they didn't find the tanks. I asked Ms. Fontana for a copy of the proposed phase 2 site investigation plan. She said that she would speak to her client and see whether one can be sent to the DEC. 12/21/05 - Raphael Ketani. I tried to call Ms. Fontana, but could only leave a voice mail message. 1/4/06 - Raphael Ketani. I

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

spoke with Ms. Fontana. She said that the phase 2 investigation plan was sent to the City School Construction Authority in 11/05. I asked her to contact them and find out whether the plan is alright and when they will start. 1/5/06 - Raphael Ketani: Ms. Fontana called me and said that I should talk directly with Drew Lent of the NYCSCA (718) 752-5609. I called Mr. Lent and he said that 1526-1532 Inwood Ave. is actually part of a larger site composed of 10 other lots (the other lots have the Jerome Ave. address - spill #0412633). These lots are owned by the Settlement Housing Fund. However, he said, the spill is on the 1526-1532 lot. He said the spill is gasoline contaminated soil with analyses in the 10s of PPBs (up to about 67ppb) of various volatiles. Mr. Lent added that the investigation plan is done, but it is being reviewed by his higher ups. As soon as it is approved, he will send me a copy. The plan for the site is a school and he said there would be some kind of vapor management system below the school. 08/31/06: This spill is transferred from Mr. Koon Tang to Q. Abidi. Called Ms. Amy Fontana (Shaw Environmental) at (845)492-3100 and left message to call me back regarding information of spill. -QA 10/25/06: Called Ms. Amy Fontana (Shaw Environmental) regarding information of spill. Ms. Fontana called me back she said first she will talk to client then she will call me back. -QA 04/18/07: Reviewed report which is sent by Shaw Environmental. Soil sample and groundwater sample is still contaminated. Called Ms. Fontana and asked about remedial work plan for this site. She said she will find out about it and then she will call me back. -QA 04/26/07: Called Amy Fontana (Shaw Environmental) regarding Remedial Plan she was not there, left message to call me back. -QA 08/27/07: Sent e-mail to Mr. Andrew Lent, that I have reviewed the Remedial Investigation Work Plan dated August 13, 2007 for the site, submitted by Shaw Environmental. In the report, groundwater flow direction is assumed without supporting data. The department requires installation of permanent groundwater monitoring wells to determine groundwater flow direction and for ongoing groundwater monitoring. Also, an additional permanent monitoring well should be installed near temporary well location GW-4, which had groundwater contamination when it was sampled. After addition of the above, submit a revised Remedial investigation work plan for approval. -QA 09/12/07: Reviewed revised Remedial Investigation Work Plan [in eDocs as report dated 9/4/07]. They will make three temporary wells and three permanent wells for soil and groundwater sampling. permanent wells will be used for future monitoring. I approved work plan and send letter to responsible party. Entered letter in e-Doc. -QA 10/12/07: Inspected site. Shaw Environmental started drilling at this site, borehole GW-12 drilled down to a depth of 30 ft' there is no odor in the soil PID reading is zero. only at the depth of 18 ft' PID reading is 1.2, water level struck at 18 ft'. They lowered the screen 17 ft' above the water level and rest to the down. They will make this permanent well for groundwater monitoring. -QA 11/08/07: Drew Lent of NYC School Construction Authority sent email with attached data tables, figures, boring logs and well logs from draft supplemental phase II investigation (in eDocs), in preparation for meeting with DEC on 11/9/07. Email stated: Attached are laboratory data summary tables, logs and selected figures for Settlement Housing Fund K-12 Campus in preparation for tomorrow's meeting. Associated spill cases for this project are 04-12633, 05-08302, and 07-07535. Data for 04-12633 and 05-08302 spills have previously been submitted to DEC. Thank you in advance for meeting with SCA to discuss this important school and

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

community center project. - J. Kolleeny 11/09/07: The meeting was conducted with School Construction Authority and SCA's consultant Shaw Environmental at the same date regarding spill. The area is still contaminated which was contaminated in the year 2005. SCA's consultant Shaw Environmental will prepare a brief work plan for additional investigation and submit to us in one or two weeks for approval. [Vadim Brevdo also requested any information SCA may have concerning citizen participation with this site. - JK] -QA 11/19/07: Drew Lent of SCA sent email with attached document that includes a work plan by Shaw Envt'l for additional site investigation, as discussed at 11/9/07 meeting, plus excerpts from SCA's State Envt'l Quality Review (SEQR) Negative Declaration and Environmental Assessment Form (in eDocs). Email stated: Thank you for meeting with SCA and Shaw Envt'l regarding proposed Settlement Housing K-12 school and community center on Friday November 9th. Attached please find copy of letter and SEQR documentation requested at meeting. As indicated during meeting, Shaw is planning to start investigation on Monday, December 3rd. I will provide exact starting date early next week. If you have any questions regarding letter please do not hesitate to contact Kirk Babcock of Shaw Envt'l or myself. - J. Kolleeny 11/28/2007: This spill case was transferred to A. Doronova. - AD Reviewed a submitted additional investigation work plan. The plan proposes installation of seven new monitoring wells and advancement of two soil borings to better delineate on and off site residual contamination. The proposed locations for soil borings and monitoring wells satisfy DEC requirements which were discussed at the meeting. Soil sampling depth intervals should be modified. AD 11/29/2007: Sent a letter to Ms. Lee Guterman with the work plan approval. Requested modifications for soil sampling depth intervals. (cc: J.Kolleeny-DEC; A.Lent-NYCSCA; A.Fontana-Shaw; K.Babcock-Shaw; file). AD Same day: Received a call from A. Lent of NYCSCA. He was disagree with our modifications for soil sampling and asked me to explain such requirements. I told him that we would like them fully delineate soil contamination as well as groundwater contamination. Soil sampling from required intervals are necessary to learn the soil quality at the well boring locations. At the end it was agreed that NYCSCA will implement requirements regarding soil sampling. AD 11/30/2007: Received an email from L. Guterman of NYCSCA. It says that NYCSCA will start investigative activities on December 3, 2007. Asked J. Kolleeny about possible site visit on December 4, 2007. Will verify it with A. Lent. AD 12/03/2007: Received verification email from A. Lent. Sanjay Sharma (geologist of SHAW) will be at the site with a crew. 12/04/2007: Visited the site with J. Kolleeny to observe drilling activities. Split-spoon soil samples collected from the 5 7 and 7 9 foot intervals showed no field indications of contamination. Fieldwork will continue throughout the week. AD 02/01/2008; Spoke with Drew Lent of NYCSCA. He said that they completed site investigation and now they are preparing summary report. Also Mr. Lent asked for scheduling another meeting with DEC to discuss next course of actions for this site. Requested submission of the summary report prior the meeting. Mr. Lent agreed to submit to us e-copies of labdata results and site diagram with locations of newly installed wells. Scheduled the meeting with NYCSCA for Friday, February 8, 2008. AD 02/08/2008: J. Kolleeny and I attended the meeting with NYCSCA and Shaw. Discussed proposed remedial actions for this site. In general, Shaw plans to excavate contaminated soil into the water table. They also plan to remove existing ASTs and USTs from the site.

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

We agreed that the proposed actions are likely to improve site conditions, and made some suggestions and recommendations to the plan. Following the meeting, I closed one of two open spill numbers for this site to consolidate tracking of progress under one spill number, which will apply to all areas of concern at the site. A Remedial Action Plan will be soon submitted to DEC. Spill #0707535 was closed in DER database and referred it to this spill case. AD 03/27/2008: Received an email from A. Lent of NYCSCA. They would like to do additional pre-design investigation before RAP implementation: ...As we discussed earlier today, Dvirka and Bartilucci on behalf of the New York City School Construction Authority (NYCSCA) is planning to conduct additional pre-design investigation sampling at the proposed Settlement Housing Fund School and Community Center project located at 1521 - 1531 Jerome Avenue Bronx, New York (Spill Number 05-08302) beginning on Saturday, March 29, 2008. The seven proposed soil boring and five monitoring well locations are provided in the attached figure. Monitoring wells DBMW-2 - 3 will be installed with the screened interval across the water-table. Monitoring wells DBMW-1, DBMW-4 - 6 will be installed as bedrock monitoring wells screened across the anticipated water-table. Field work is scheduled to begin at bedrock monitoring wells DBMW-4, 5 and 6 on the Lot 90 portion of the Site on March 29 - 30th and April 5 - 6, 2008. Soil samples will be collected utilizing the same criteria as listed in the November 29, 2007 investigation approval letter. I will provide you with a more detailed scope of work letter and schedule as soon as it is available. The site plan with locations of the proposed borings and wells was attached. RAP will be submitted after completion of the pre-design investigation. Spoke with J. Kolleeny of DEC regarding this plan. AD 04/01/2008: Received pdf version of the investigation plan. Downloaded in eDocs. 05/08/2008: Received a conference phone call from Drew Lent and Lee Guterman of NYCSCA. They finished pre-design investigation and found few gasoline 1000-gallon USTs, hydraulic lifts and free product in newly installed monitoring wells. They plan to excavate and remove the USTs and lifts. i told Mr. Lent that they should notify us prior any fieldwork at the site and mentioned that they need to register the found UST before their removal. AD 05/09/2008: Received a hard copy of Supplemental phase II Environmental Site Investigation report, prepared by Shaw Group, Inc. Will review. AD 05/14/2008: Received a phone call from D. Lent of NYCSCA. They started remove concrete UST slabs and hydraulic lifts. PBS applications for USTs removal were filed. After NYCSCA will complete PBS registration, USTs will be removed from the site. Told D. Lent to inform us prior to USTs removal. AD 05/2008: Spoke with D. Lent. He said that they are in a process of UST removal. Asked him to take pictures. RAP will be submitted shortly. AD 06/18/2008: Received RAP Memorandum I and II. Downloaded in eDocs. Will review. Spoke with Brian Veith of Dvirka and Bartilucci (D&B). AD 06/19/2008: Reviewed the RAP. It summarizes the findings of the pre-design investigation. It included advancing of soil borings, installation of monitoring wells, collection of soil and groundwater samples. 10 USTs and 3 hydraulic lifts and a network of underground piping were removed off the site. Significant soil and groundwater contamination was detected in Lot 68 and Lot 20. Free phase product was observed in existing well GW-18 (mixture of gasoline and kerosine) in Lot 77 and B-19 (paint thinner) in Lot 90. Oleophyllic socks were placed in these two wells to recover the product. Additional soil borings and temporary wells installations revealed free-phase product within the central

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

portion of Lot 20. The fingerprint analysis of the product identified it as a gasoline. Based on the pre-design investigation results, the extent of the product is approximately 40 by 30 feet area. To address the free-product four recovery wells were installed The product will be recovered using a pumps and/or bailing. Recovery activities will be conducted every other day for a period of up to 2 months. The submitted RAP proposes to perform three rounds of RegenOx application via 100 injection points on Lot 20, using a grid network spacing of 12.5 feet. For each injection round, the location of injection point will shifted approximately 6 feet to provide maximum coverage. The ORC supplement will be added to last application round of RegenOx to provide a long-term oxygen source. In addition, once soil has been excavated to the necessary depth for construction as well as for planned removal of the impacted soil, ORC will be spread across the surface of the excavation to enhance bioremediation. AD 06/20/2008: Sent an approval letter to L. Guterman - NYCSCA with the request to install two additional off-site wells to better delineate plum boundaries. (cc: J.Kolleeny-DEC; A. Lent-NYCSCA; B.Weith-D&B) AD 07/21/2008: Received a call from D. Lent. He would like to schedule a meeting with us to discuss the RAP. Spoke with J. Kolleeny. Scheduled the meeting for August 8, 2008. Left a message to D. Lent. AD 08/12/2008: Visited the site with J. Kolleeny. Met at the site with B. Vieth of D&B. Observed the RegenOx injections. Due to the tight soil formation in the area of RegenOx application, they are able to complete only 6 injection points per day. Totally D&B plans to accomplish 70 IPs. 30 IPs have been completed. Groundwater monitoring round will be conducted at the end of the August, D&B will also samples in this round newly installed off-site wells. Also discussed the possibility to check contents of remaining USTs, if they are acting as a source of contamination. AD 08/18/2008: Sent an email to Lee Guterman saying: Dear Ms. Guterman: DEC requests to inspect the USTs remaining in the building along Jerome Avenue to see how they were closed in place, and if the tanks are found to be filled with liquid, it should be pumped out to prevent it from acting as an ongoing source of contamination. If you have any questions or comments please fill free to contact me. AD 10/14/2008: Spoke with D. Lent of NYCSCA. USTs weren't inspected yet due to some technical and financial issues. NYCSCA already included removal of the tanks in a building contract, as Mr. Lent explained to me, and they don't want to do double spending on them. He said that they performed GW monitoring round and are recovering free product. VOC concentrations still high, but show some decreasing trend. They demolished garage on Lot 20 (near free product recovery wells) and plan to investigate the area in a few weeks. Site status update report will be submitted shortly. AD 11/20/2008: Received a phone call from D. Lent of NYCSCA. He asked for a meeting with DEC to discuss performed remedial activities and future course of actions. Scheduled the meeting on December 2, 2008. Requested to submit the site status update report before the date of the meeting, for review. According to D. Lent, the report will be submitted on November 24, 2008. AD 11/24/2008: Received a hard copy of the progress report. Will review. To request PDF copy. AD 11/28/2008: Reviewed the report. It states that the following activities were implemented at the site: Product recovery activities were conducted appr. three times a week in the former garage area.Through October 31, 2008, a total of 286 gallons of free product were recovered from the site's wells DBMW-17, DBMW-27, DBMW-28, DBMW-29, DBMW-31, DBMW-32, DBMW-36 and DBMW-37; The

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

remaining garage structure was demolished on October 10, 2008 to allow full access to the area impacted by free product; On October 21 and October 22, 2008, nine temporary monitoring wells (DBMW-38 - DBMW-46) were installed to the top of the weathered bedrock on the area of the former garage to fully delineate the extent of the free product; The evaluation of the product thickness and product recovery rates indicates that a majority of the recoverable free product has been removed from this area; The first round of Regen-Ox injection was completed in the non-product area in July 30, 2008. A total of 94 injection points were done; The second round of Regen-Ox injection was completed in the non-product area on August 19, 2008. A total of 78 injection points were completed. D&B plans the following actions to be implemented: Additional product recovery activities will continue to be conducted two-three times per week until the free product is no longer present; Two additional recovery wells will be installed to enhance the product recovery rates; A third round of Regen-Ox injections will be implemented in the non-product area; Up to four injection rounds planned for former garage area; Removal and closure of the eight remaining USTs located beneath the building along Jerome Avenue; Approximately 30,000 cubic yards of soil will be excavated and properly managed. Soil in the vicinity of the former USTs and south of the former garage will be excavated deeper that it is necessary for the construction needs to ensure that contaminated soil is removed from the site; ORC will be applied across the surface of the excavation in the non-product and former garage areas; A gas vapor barrier will be installed beneath the building to prevent soil vapor intrusion; An active sub-slab depressurization system will be installed beneath the building. AD 12/02/2008: J. Kolleeny and I attended the meeting with NYCSCA and D&B. Issues discussed included, end-point sampling locations, and post-remediation groundwater monitoring and frequency of groundwater monitoring. A progress report with November GW monitoring results and free product recovery logs will be submitted in January 2009. Removal of USTs, which located along Jerome Avenue, to be implemented approximately in February-March 2009. AD 04/2009: Spoke with D. Lent. They completed additional investigation in the area with free product. He asked for a meeting to discuss their findings and further actions. Scheduled the meeting for April 20, 2009 at 10:00 AM. AD 04/20/2009: J. Kolleeny and I attended the meeting with L. Guterman and D. Lent of NYCSCA and their consultant Dave Glass of TRC. New remedial approach for Lot 20 was discussed. TRC proposed remedial excavation till bedrock, dewatering if applicable and application of ORC. Discussed post-excavation end-point soil sampling intervals. DEC requested post-remedial groundwater monitoring. New RAP will be submitted shortly for review and approval. AD 05/01/2009: received a Remedial Investigation report prepared by TRC, Inc. Will review. AD 05/08/2009: The report states that free product is present in the overburden in the vicinity of Lot 20 and that ongoing product removal activities are not sufficient, and more aggressive remedial action is required. TRC proposes to remove the source of contamination by excavating the affected area to approximately three feet into the weathered bedrock. A post-excavation soil sampling plan will be provided to the Department approximately one week before collecting the samples. Chemical oxidant will be applied to the bottom of the excavation to promote degradation of any residual contamination. Quarterly post-remedial groundwater monitoring will be conducted for a year to ensure the effectiveness of the remediation. A summary

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

report will be prepared and submitted to the Department. AD 05/14/2009: Discussed the recommendations with J. Kolleeny of DER. Issued and sent an approval letter with a comment that, DEC may require to continue groundwater monitoring beyond proposed one year period, based on monitoring results. DL pdf copy to eDocs. AD 05/15/2009: Received an e-mail from D. lent saying: Dear Ainura, Attached is the progress report update for the LNAPL removal activities at petroleum spill site 05-08302 completed in January and February 2009 for your information. If you have any questions or need additional information please contact me at (718) 752-5609. Sincerely, Drew Lent NYCSCA\\IEH Division (718) 752-5609 DL to eDocs. Will review. AD 07/2009: Received a phone call from D. Lent of SCA. He said that the building along Jerome Avenue was demolished and they preparing for USTs removal. He will inform me in advance about the work schedule. AD 07/29/2009: Received an e-mail from Mr. Lent saying: Dear Ainura, The UST Removal effort is scheduled to begin on Thursday, July 30th and Kevin Boger of TRC will be on-site to observe the remediation activities. Kevin's cell phone number is (631) 617-0087 and my cell phone number is (347) 452-3870. As a reminder, please bring a hard hat, safety vest and work boots to the Site. Sincerely, Drew Lent NYCSCA\\IEH Division (718) 752-5609 AD 07/30/2009: Visited the site. Met there with D. Lent of SCA and Kevin Boger of TRC. They removed one 1,000-gallon gasoline UST from area of Lot 21. The tank was in good condition, no soil staining or odor were noted. The highest PID reading in the excavation pit was - 65 ppm. Eight 550-gallon gasoline USTs were removed from former building area. The tanks were in good condition, the highest PID reading was - 75 ppm. Four additional 550-gallon USTs were found and removed along Jerome Ave. No PID readings were detected in the excavation pit. No end-point soil samples were collected at this time due to the fact that the final depth of excavation will be 22-23' bgs according to the building plan. The end-point soil samples will be collected later at this depth. AD 08/21/2009: A letter was issued upon DDC request, which confirmed that end-point soil samples from the UST excavation pits will be collected after excavation will reach its final proposed depth of 23' bgs. A work plan with proposed locations for end-point sampling will be provided to DEC for review and approval. DL the letter to eDocs. AD 09/11/2009: Received a Project Progress Report for a period of April-August 2009. DL to eDocs. Will review. AD 10/09/2009: Received an e-mail from D. Lent of SCA saying: Dear Ainura, Attached is a letter with the proposed post-excavation sampling locations that TRC stated would be provided to the SCA as per the April 2009 RI Report. The SCA anticipated that portions of the Site located beyond the Northwest Remediation Area will be excavated to contract grade within approximately two weeks. If you have any questions or need additional information please contact me at (718) 752-5609. Sincerely, Drew Lent NYCSCA\\IEH Divisio DL the letter to eDocs. Will review. AD 10/16/2009: Received a phone call from D. Lent of SCA. He requested a meeting with DEC regarding depth of excavation along the southern property border of Lot 20. Discussed this with J. Kolleeny of DEC. Scheduled the meeting on October 19, 2009. AD 10/19/2009: J. Kolleeny and I met with Drew Lent of SCA and Charles Guder of TRC to discuss depth of excavation in Lot 20 and post-excavation end-point soil sampling intervals. It was agreed that the area along southern border of the property adjacent to neighbor building will be excavated to the elevation of the building foundation footings (approximately elevation 28 feet). The length of

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

this area will be 40' and width will be 10'. Two bottom end-point soil samples were proposed to be collected in this area. Seven additional end-point soil samples were requested by DEC to be collected along site property line, especially in the area of environmental remediation (Lot 20). A work plan with revised end-point soil sampling locations will be submitted to DEC for review and approval. AD 10/21/2009: Received an e-mail from C. Guder of TRC saying: Dear Ainura, Attached is a letter detailing the Remedial Investigation Report Addendum and the proposed post-excavation sample locations. The Contractor has informed us that the final grade elevation will be reached in the area of the underground storage tanks (USTs) along Jerome Avenue on Thursday, 10/22/09. TRC will be on-Site to collect endpoint soil samples at 2:00 P.M on Thursday, 10/22/09. If you have any questions or need additional information please contact me at (212)-221-7822 x103. Sincerely, Charles Guder Senior Project Manager TRC Engineers, Inc. 1430 Broadway, 10th Fl. New York, NY 10018 212.221.7822 (office) 646.660.1020 (mobile) Reviewed the revised end-point soil sampling locations. DL the Remedial Investigation Report Addendum to eDocs. Issued and send an approval letter to SCA. AD 12/09/2009: Received a phone call from D. Lent of SCA. He said that they plan to collect some soil samples tommorow after 1:30 PM. Will visit the site. AD 12/10/2009: 11:00 AM - D. Lent called and informed me that soil sampling was postponed till December 11, 2009 due to technical issues with PID. Will re-schedule the site visit. AD 12/11/2009: Visited the site. Met at the site with Dreww lent of SCA. TRC was performing soil sampling. The whole property is excavated approximately 20-22' bgs. The depth of excavation in the area of Lot 20 also around 20' bgs. Some rain water is accumuleted in the excavation pit. No product sheen was detected. There are two air quality monitors at the site. VOCs on monitors are from 0 to 0.6 ppm. Two soil samples were collected along the southern border of Lot 20. PID soil screening results were ND. This area will be excavated down to the bedrock. Took some pictures of the site. Progress report will be submitted to DEC when all soil samples will be collected and analyzed. AD 02/19/2010: Received an e-mail from D. Lent of SCA saying: Dear Ainura, The soil remediation work is continuing at the Settlement Housing construction site and we anticipate that three sidewall samples are scheduled to be collected along the southern portion of the Northwest Environmental Remediation Area (NWERA) as noted in our October 20, 2009 correspondence on Tuesday, February 23rd. As required in the NYSDEC approved Remedial Report ORC is scheduled to be applied in the extreme southeastern portion of the NWERA following collection of the subject samples. Attached is a sketch of the subject area for your information. As final elevations are reached during this construction effort over the next several weeks additional notice will be sent to your attention. If you have any questions or need additional information please contact me at (718) 752-5609. Sincerely, Andrew D. Lent NYCSCA\\IEH Division e-mail: alent@nycsca.org Tele: (718) 752-5609 AD 02/23/2010: Received another e-mail from D. Lent: Dear Ainura, Due to inclement weather and a change in the construction schedule the next round end point sampling at the Settlement Housing construction site has been rescheduled to Tuesday, March 2nd. Sincerely, Drew Lent NYCSCA\\IEH Division e-mail: alent@nycsca.org Tele: (718) 752-5609 AD 08/27/2010: Received a hard copy of Project Progress Report by TRC. Will review. AD 03/24/2011: Received a letter from Charles Guder of TRC with a request to replace monitoring well GW-8 with GW-13 in the

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

post-remediation monitoring well network. Discussed this request with J. Kolleeny of DEC. Changed site priority to P2. AD 04/14/2011: Called and spoke with Mr. Guder regarding their request. Told him that DEC can not approve it due to the difference in historical VOC concentration data in these wells. AD 04/20/2011: Received an e-mail from Mr. Guder saying: Ainura - Thank you for speaking with me last week regarding our letter request (dated March 24, 2011) to replace monitoring well GW-8 with GW-13 in the post-remediation monitoring well network. You had indicated that the NYSDEC would like to have GW-8 reinstalled due to the contaminant concentration differences in groundwater between well GW-8 and GW-13. Could you confirm this via email? Thank you, Charles Guder Senior Project Manager TRC Engineers, Inc. 1430 Broadway, 10th Floor New York, NY 10018 212.221.7822 x103 (office) 646.660.1020 (mobile) Later sent the response e-mail to Mr. Guder: Dear Mr. Guder: The Department has received a letter request pertaining to the above-referenced site, submitted by TRC Engineers, Inc. (TRC) on behalf of the New York City School Construction Authority, and dated March 24, 2011. In this letter TRC states that groundwater monitoring wells MW-8 was destroyed during the school construction and recommends using monitoring well MW-13, which is located across Inwood Avenue, as a replacement well in post-remediation quarterly groundwater monitoring program. The Department disapproves this recommendation based on the historical data associated with these wells. A new well should be installed to replace the monitoring well MW-8. Please feel free to contact me if you have any questions or comments. AD 06/20/2011: Received an e-mail from Mr. Guder of TRC dated May 25, 2011: Ms. Doronova, On behalf of the New York City School Construction Authority (NYCSCA), TRC Engineers, Inc. (TRC) has prepared this email in order to provide an update on the post remediation quarterly monitoring activities associated with Spill Case No. 05-08302 at the New Settlement School and Community Center located at 1501 Jerome Avenue, Bronx, New York (the Site). A figure showing the quarterly monitoring well location plan is presented as Figure 1 and is attached to this email. In connection with completing remediation of the Site as recommended in the New York State Department of Environmental Conservation (NYSDEC) approved Remedial Investigation (RI) Report and the RI Report Addendum, quarterly monitoring of monitoring wells GW-8, GW-11, and GW-18 was proposed for a period of one year following completion of Northwest Environmental Remediation Area backfilling. Backfilling of the Northwest Environmental Remediation Area was completed in July 2010. A recent inspection of the monitoring well network on February 9, 2011 revealed that monitoring well GW-8 has been damaged during construction work. TRC and its drilling subcontractor Aquifer Drilling & Testing, Inc. (ADT) mobilized to the Site on Tuesday May 3, 2011 in order to re-install monitoring well GW-8. Due to on-going construction activities at the Site, the proposed location for the new replacement monitoring well GW-8 would be approximately 10 from its original location. Below is a summary of the findings of TRC s activities at the Site on Tuesday May 3, 2011. Site Activities on May 3, 2011: TRC and its drilling subcontractor ADT mobilized to the Site on Tuesday May 3, 2011 in order to re-install monitoring well GW-8. Three attempts were made to re-install monitoring well GW-8 with the use of a track-mounted hollow stem auger drill rig. The first attempt to re-install monitoring well GW-8 was located approximately 10 to the north-east of GW-8 s original location, the second attempt was located approximately 5 to the north of GW-8 s original location, and

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

the third attempt to re-install monitoring well GW-8 was located approximately 5 to the north-west of GW-8 s original location. An attempt could not be made in the area of GW-8 s original location or to the south of GW-8 due to building scaffolding that is erected in the area. The attached Figure 1 shows the location of the three attempts. [Side note: My apologies for misspeaking during our conversation when I indicated that we attempted a location south of GW-8 (I misunderstood what I was being told from field personnel).] Attempt #1: Refusal was encountered approximately 25 below ground surface (bgs). Bedrock consisting of white quartz with black schist was encountered at this depth. Split spoon samples and drilling spoils indicated that overburden material consists of stone with no visual indications of contamination. Field screening (PID) readings were non-detect. Groundwater was not encountered. According to the SCA Project Officer, this area was excavated during remediation of the Northwest Environmental Remediation Area and stone was used as backfill. Attempt #2: Refusal was encountered at 25 bgs. Bedrock consisting of white quartz with black schist was encountered at 25 bgs. Groundwater was not encountered. The soil from attempt #2 is as follows: 0 - 10 bgs: Stone, no visual indications of contamination, field screening (PID) readings were non-detect. 10 - 16 bgs: Brown/orange medium to fine micaceous sand with gravel, no visual indications of contamination, field screening (PID) readings were non-detect. 16 - 25 bgs: Gray silty sand, no visual indications of contamination, field screening (PID) readings were non-detect. Attempt #3: Refusal was encountered at 25 bgs. Bedrock consisting of white quartz with black schist was encountered at 25 bgs. Groundwater was not encountered. The soil from attempt #3 is as follows: 0 - 1 bgs: Concrete (sidewalk) 1 - 10 bgs: Dark brown coarse to fine sand with gravel, pieces of red bricks (FILL), no visual indications of contamination, field screening (PID) readings were non-detect. 10 - 16 bgs: Brown/orange medium to fine micaceous sand with gravel, no visual indications of contamination, field screening (PID) readings were non-detect. 16 - 25 bgs: Gray silty sand, no visual indications of contamination, field screening (PID) readings were non-detect. Depth to groundwater measurements were also recorded from monitoring wells GW-13, GW-15, and DBMW-34. Depth to groundwater measurements ranged from 19.8 bgs to 21.1 bgs. Monitoring wells GW-11 and GW-18 were inaccessible due to on-site construction activities. The sidewalk area south of well GW-8 will be inaccessible to drilling equipment until the scaffolding is removed (approximately one year). We are available at your convenience to discuss. Thank you, Charles Guder Senior Project Manager TRC Engineers, Inc. 1430 Broadway, 10th Floor New York, NY 10018 212.221.7822 x103 (office) 646.660.1020 (mobile) AD 07/14/2011: Discussed this issue with J. Kolleeny of DEC. Replacement groundwater well should be installed on the corner of Inwood Avenue and Goblle Place instead of well MW-8 if feasible. Called and spoke with C. Guder regarding sampling of all currently existing wells at the site, and then according to the received data we will decide on installation of the replacement well. He agreed to this. Later recieved an e-mail from Mr. Guder saying: Ainura Thank you for the phone call today. In accordance with our conversation, we will gauge and sample the following wells: GW-18; GW-11; GW-15; DBMW-34; and GW-13 We will perform this work next week. If any of the wells require re-development, we will do so and postpone the sampling for a week to allow the wells to re-equilibrate. Please contact me with any questions or comments. Thank you, Charles Guder Senior

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

Project Manager AD 09/15/2011: Called and left a message to Mr. Guder regarding GW monitoring report submission. AD 10/21/11: Called and left a message to Mr. Guder regarding GW monitoring report submission. later received a call from Mr. Guder. He told me that report was submitted to DEC via e-mail on September 20, 2011. Informed him that the report was not received. The e-mail address he used to submit the report was incorrect. Mr. Guder will re-submitt the report. At 11:30 AM received the report via e-mail. DL the report to eDocs. Will review. AD 11/02/2011: Reviewed the report. It states that groundwater monitoring well installation, product recovery, and groundwater sampling were conducted at the site between May 3, 2011 and August 31, 2011. Wells GW-8, GW-11, and GW-18 was proposed for a period of one year GW monitoring following completion of remediation. On February 3, 2011, groundwater monitoring well GW-8 was found to be damaged as a result of construction activities. Attempts to re-install well GW-8 were delayed due to the presence of building scaffolding in the area of GW-8. On May 3, 2011, three attempts were made to re-install well GW-8, approximately 5 - 10' northeast, north, and northwest of the original location. All three attempts were advanced to bedrock [approximately 25' bgs]. Groundwater was not encountered above bedrock in any of the borings. An attempt could not be made in the original location of GW-8 or south of the original location due to building scaffolding erected in the area to support new school construction. On August 4, 2011, following scaffolding removal, well GW-8 was successfully re-installed approximately 5 - 10 feet south of the original location. The bottom of the new monitoring well was installed to a depth of approximately 40' bgs, which is the top of bedrock. Groundwater was found at approximately 23' bgs. As part of an evaluation of the condition of the post-remediation groundwater monitoring well network, TRC inspected well GW-18 on July 20, 2011 and approximately 0.36 feet of LNAPL was measured in the well. Since LNAPL was encountered, TRC returned to the site on August 4 and 12, 2011 to gauge and remove LNAPL. On August 4, 2011, approximately 0.50 feet of LNAPL was measured in GW-18 and approximately 300 mL of LNAPL were removed and containerized in a 55-gallon drum. On August 12, 2011, approximately 0.32 feet of LNAPL was measured in GW-18 and approximately 200 mL of LNAPL were removed and containerized in a 55-gallon drum. Additionally, on August 12, 2011, an oil-absorbent sock was installed in GW-18 to facilitate LNAPL removal. On August 12, 2011, groundwater samples were collected from monitoring wells GW-8 and GW-11. Eight petroleum-related VOCs (1,2,4-trimethylbenzene-75ppb, 1,3,5-trimethylbenzene-21ppb, ethylbenzene -150ppb, m,p-xylenes-400ppb, naphthalene, n-propylbenzene, o-xylene-210ppb, and toluene-92ppb) were detected at concentrations greater than NYS GWQSGV in the sample collected from well GW-8 (TVOCs - 975ppb). There were no VOCs detected in the groundwater sample collected from GW-11. Planned activities: " Quarterly sampling of monitoring wells GW-8 and GW-11 will be performed for additional quarters. Progress Report No. 5 will be submitted to the NYSDEC following the next round of groundwater sampling. " The oil absorbent sock in monitoring well GW-18 will be checked every 30 days. The sock will be removed and replaced when saturated. LNAPL thickness will also be recorded every 30 days. LNAPL thickness measurements and recovery totals will be included in Progress Report No. 5. If there is no measurable product at the time of the next sampling event, a groundwater sample will be collected from monitoring well GW-18 and analyzed for VOCs. AD 01/19/2012: Sent

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

an e-mail remainder to Mr. Guder regarding submission of the next monitoring report. Later received an e-mail from Mr. Guder saying: Ainura Please see attached Progress Report #5 for New Settlement School and Community Center - NYSDEC Spill No. 0508302. Please review and contact me with any questions or comments. Thank you, Charles Guder Senior Project Manager DL the report to eDocs. Will review. AD 02/24/2012: Reviewed the 5th Progress Report. It states that field activities were conducted at the Site between November 7, 2011 and November 11, 2011. During this period the following activities were completed: - a LNAPL recovery bail down test; - fingerprint analysis of the LNAPL in monitoring well GW-18; - implementation of monthly LNAPL recovery actions; - groundwater sampling. Prior to measuring DTP and DTW in well GW-18, the oil absorbent sock was removed, it was found to be saturated with oil, and was containerized in a 55-gallon steel drum. After removal of the oil absorbent sock, a LNAPL thickness of 0.40 feet was measured. A submersible pump and dedicated polyethylene tubing were used to remove the LNAPL from the well. Approximately 0.25 gallon of oil was removed from GW-18. LNAPL thickness measured in GW-18 after pumping was - 0.04 feet. DTP and DTW measurements were then recorded eight times over an 8-hour period (after 2 minutes, 4 minutes, 10 minutes, 30 minutes, 1 hour, 2 hours, 4 hours, and 8 hours). DTP and DTW were also recorded on November 8 (after 24 hours) and on November 10 (after 72 hours). Based on the data, the average recovery rate, is 0.02 gallon/day, and it can be concluded that LNAPL recovery at GW-18 is below a rate at which active LNAPL skimming would be practical and that continued use of absorbent socks is recommended. Two new one inch diameter by 16 inch long oil absorbent socks were installed in GW-18 after completion of the LNAPL recovery bail down test on November 10, 2011. A sample of the LNAPL was collected from GW-18 on November 7, 2011 for petroleum hydrocarbon fingerprint analysis. The analytical results identified the sample from well GW-18 - as gasoline. Two LNAPL recovery events have been performed on well GW-18 on November 7 and November 17, 2011. LNAPL thicknesses measured during these events ranged from approximately 0.21 feet to 0.5 feet. After removal, examinations of the oil absorbent socks indicate that the socks were saturated with LNAPL. A total of apprx. 1.65 liters of LNAPL have been removed from GW-18 during all recovery events and eight oil absorbent socks have been removed and replaced to date. On November 17, 2011, groundwater samples were collected from monitoring wells GW-8 (550ppb), which is decrease from 975ppb in August 2011; and GW-11 (12ppb) which is slight increase from ND in August 2011. Quarterly sampling of monitoring wells GW-8 and GW-11 will be continued. Monthly monitoring well gauging and LNAPL recovery with the use of oil absorbent socks at well GW-18 is proposed. On a monthly basis, the sock will be removed, examined, and replaced (if saturated). LNAPL thickness will also be recorded on a monthly basis. LNAPL thickness measurements and recovery totals will be reported in Progress Report #6. If there is no measurable LNAPL at the time of the next sampling event, a groundwater sample will be collected from monitoring well GW-18 and analyzed for VOCs. AD 03/16/2012: Received an e-mail from C. Guder of TRC saying: Ainura Attached is progress report #6 for Spill Case 05-08302 for the New Settlement School and Community Campus. A hard copy will be submitted to your office. Please contact me with any questions or comments. Thank you, Charles Guder DL the report to eDocs. Will review. AD 04/12/2012: Reviewed the report. It states that field activities were conducted at the Site between December 16,

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

2011 and February 1, 2012. During this period, implementation of monthly gauging, LNAPL recovery actions, and groundwater sampling were completed. DTW and LNAPL thickness measurements were recorded in groundwater monitoring well GW-18 on December 16, 2011, January 17, 2012, and February 1, 2012. LNAPL was not identified in groundwater monitoring well GW-18 on December 16, 2011, January 17, 2012, and February 1, 2012. The oil absorbent sock which was previously located in monitoring well GW-18 to recover oil was permanently removed in January 2012. On February 1, 2012, groundwater samples were collected from monitoring wells GW-8 and GW-18. A groundwater sample was not collected from groundwater monitoring well GW-11. Groundwater monitoring well GW-11 could not be located on February 1, 2012 as a result of school construction activities associated with new sidewalk construction. The February 2012 groundwater sampling event indicates that the VOC concentrations in monitoring well GW-8 are decreasing (292ppb). VOC concentrations are also lower in monitoring well GW-18 (5,179ppb) compared to the last aqueous sampling in July 2009. Quarterly sampling of monitoring wells GW-8, GW-11 (if not damaged), and GW-18 will be continued. Progress Report #7 will be submitted to the NYSDEC following the next round of groundwater sampling, which will be performed in May 2012. 07/18/2012; Sent an e-mail to Mr. Guder with a reminder to submit monitoring report. AD 08/07/2012: Called and spoked with Mr. Guder of TRC regarding progress report submission. He said that it is ready and under review by client. he will contact the client and ask to expedite its review. AD 08/09/2012: Received the following e-mail from Mr. Guder; Ainura, Attached is Progress Report #7 for Spill Case No. 050832 associated with New Settlement School and Community Campus. Please review and contact me with any questions or comments. Thank you, Charles Guder Senior Project Manager Will review. AD 09/19/2012: Reviewed the report. It states that field activities were conducted at the Site between March 7 and May 2, 2012. Implementation of quarterly groundwater sampling in monitoring wells GW-11 and GW-18 was not performed by TRC as part of the work performed for this Progress Report. Monitoring wells GW-11 and GW-18 could not be located and are assumed to have been destroyed during school construction activities. It should be noted that light non-aqueous phase liquid (LNAPL) had not been detected in monitoring well GW-18 since December 2011. On May 2, 2012, a groundwater sample was collected from monitoring well GW-8 only. Six petroleum-related VOCs: (1,2,4-trimethylbenzene, ethylbenzene, m,p-xylenes, o-xylene, toluene, and total xylenes) were detected at concentrations greater than NYS Groundwater Water Quality Standards and Guidance Values (Class GA Values) in the sample collected from monitoring well GW-8. A comparison of the results of the historic groundwater sampling events (conducted in 2009 to 2011) to the May 2012 groundwater sampling event indicates that the VOC concentrations in well GW-8 are generally decreasing (308ppb) but are consistent with the previous sampling event performed in February 2012 (292ppb). The following activities are planned by TRC: - Completion of the sub-slab depressurization system (SSDS) construction, including installation of SSDS accessories, and testing to verify proper operation of the SSDS. - Monitoring wells GW-11 and GW-18 could not be located and are assumed to have been destroyed during school construction activities. VOCs have not been detected in monitoring well GW-11 since 2009. Therefore, TRC does not propose replacement of this well. TRC does propose replacement of monitoring well GW-18. TRC is coordinating with the school construction

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

contractor for the schedule for replacement of monitoring well GW-18, which will be constructed in a similar manner to the original well. The NYCSCA will provide at least one week prior notice to the NYSDEC of the well replacement effort. - Following installation of the replacement monitoring well GW-18, quarterly sampling of monitoring wells GW-8 and GW-18 will be continued. Progress Report #8 will be submitted to the NYSDEC following the next round of groundwater sampling, which will be performed following reinstallation of monitoring well GW-18. AD 11/21/2012: Received Progress Report #8. DL the report to eDocs. Will review. AD 12/27/2012: Reviewed the report. It states that the field activities were conducted at the Site between September 18 and October 8, 2012. During this period, environmental activities performed consisted of groundwater monitoring well installation and groundwater sampling. Monitoring wells GW-11 and GW-18, which were destroyed during school construction activities, were re-installed on September 18, 2012. Both monitoring wells were re-installed in a similar manner to the original wells and in close proximity to their original locations. - Soil boring/monitoring well GW-11 was advanced outside of the Site building (northeast of the Site building) to approximately 30 feet below sidewalk grade surface (bgs), above bedrock. Soil samples were not collected for laboratory analysis. Groundwater was encountered in overburden soil at approximately 22 feet bgs in GW-11. - Soil boring/monitoring well GW-18 was advanced outside of the Site building (southeast of the Site building) to approximately 55 feet bgs (bedrock well). Soil samples were not collected for laboratory analysis. Groundwater was encountered in bedrock at approximately 39 feet bgs in GW-18. On October 8, 2012, groundwater samples were collected from monitoring wells GW-8, GW-11, and GW-18. No light non-aqueous phase liquid (LNAPL) was detected in any of the monitoring wells. GW data - TVOCs (ppb): 1. MW-8 - 30; 2. MW-11 - ND; 3. MW-18 - 9,600. A comparison of the results of the historic groundwater sampling events (conducted from 2009 to 2012) to the October 2012 groundwater sampling event indicates that the VOC concentrations in monitoring well GW-8 are decreasing. The VOC concentrations in monitoring well GW-18 have decreased when compared to the sampling event performed in July 2009. Additionally, TRC states that LNAPL has not been detected in the former or current monitoring well GW-18 since December 2011. TRC will continue quarterly sampling of monitoring wells GW-8 and GW-18. Quarterly sampling of monitoring well GW-11 will be discontinued since petroleum related VOCs have not been detected in the well since monitoring was initiated in 2009 (other than a single occurrence of naphthalene in November 2011 which was attributable to blank contamination). Progress Report #9 will be submitted to the NYSDEC following the next round of groundwater sampling which is scheduled for January 2013. AD 02/27/2013: Received the following e-mail from C. Guder: Ainura Attached is progress report no. 9 for spill case # 05-08302 associated with the New Settlement School and Community Center. A hard copy and a CD will be submitted to your office via Fed Ex. Please review and contact me with any questions or comments. Thank you, Charles Guder Senior Project Manager DL the report to eDocs. Will review. AD 03/11/2013: Reviewed the report. It states that field activities were conducted at the Site on January 31, 2013 and consisted of quarterly groundwater sampling. Groundwater samples were collected from permanent monitoring wells GW-8 and GW-18 on January 31, 2013. Based on the recommendations made in previous

Map ID	Site	Database(s)	EPA ID Number

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

Progress Report #8, dated November 20, 2012, sampling of monitoring well GW-11 was discontinued after the October 2012 sampling event since there have been no petroleum related VOCs detected in GW-11 above Class GA Values since 2011. LNAPL was not detected in monitoring wells GW-8 or GW-18. GW-8: The results of the analysis of groundwater sampling indicate benzene was the only VOC detected at a concentration exceeding the corresponding Class GA Values. GW-18: The results of the analysis of groundwater sampling indicate ten (10) petroleum-related VOCs (1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, benzene, ethylbenzene, m/p-xylenes, naphthalene, npropylbenzene, o-xylene, toluene, and total xylenes) were detected at concentrations exceeding their corresponding Class GA Values. GW data - TVOCs (ppb): 1. MW-8 - 2.3 (only Benzene); 2. MW-18 - 1,450 a decrease from previous - 9,600. According to TRC, a comparison of the results of the historic groundwater sampling events (conducted from 2009 to 2012) to the January 2013 groundwater sampling event indicates that the VOC concentrations in monitoring wells GW-8 and GW-18 have decreased significantly. The concentrations of total VOCs in GW-8 have decreased over 99% since 2009 (20,875 parts per billion (ppb) total VOCs in 2009 compared to 3 ppb total VOCs in 2013). The concentrations of total VOCs in GW-18 have decreased over 93% since 2009 (33,755 ppb total VOCs in 2009 compared to 1,450 ppb total VOCs in 2013). TRC will continue quarterly sampling of monitoring wells GW-8 and GW-18. Progress Report #10 will be submitted to the NYSDEC following the next round of groundwater sampling which is scheduled for April 2013. AD 06/12/2013: Received the following e-mail from C. Guder: Ainura Attached is Progress Report 10 for spill case # 05-08302 associated with the New Settlement School and Community Center. Please review and contact me with any questions or comments. Thank you, Charles Guder Senior Project Manager DL the report to eDocs. Will review. AD 08/15/2013: Reviewed the report. It states that field activities were conducted at the Site on April 25, 2013 and consisted of quarterly groundwater sampling. Groundwater samples were collected from permanent monitoring wells GW-8 and GW-18 on April 25, 2013. Based on the recommendations made in Progress Report #8, dated November 20, 2012, sampling of monitoring well GW-11 was discontinued after the October 2012 sampling event since there have been no petroleum related VOCs detected in GW-11 above Class GA Values since 2011. GW data: GW-8: The results of the analysis of groundwater sampling indicate three (3) petroleum-related VOCs (ethylbenzene, m/p-xylenes, and total xylenes) were detected at a concentration exceeding the corresponding Class GA Values. GW-18: The results of the analysis of groundwater sampling indicate eight (8) petroleum-related VOCs (1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, benzene, ethylbenzene, m/p-xylenes, o-xylene, toluene, and total xylenes) were detected at concentrations exceeding their corresponding Class GA Values. A comparison of the results of the historic groundwater sampling events (conducted from 2009 to 2013) to the April 2013 groundwater sampling event indicates that the VOC concentrations in monitoring wells GW-8 and GW-18 have decreased significantly. The concentrations of total VOCs in GW-8 have decreased over 99% since 2009 (20,875 parts per billion (ppb) total VOCs in July 2009 compared to 42 ppb total VOCs in April 2013). The concentrations of total VOCs in GW-18 have decreased 99% since 2009 (33,755 ppb total VOCs in July 2009 compared to 372 ppb total VOCs in April 2013). Based on the remediation work performed at the location of the New Settlement

NYCSCA - NEW SCHOOL SITE (Continued) **S107415935**

School and Community Center, associated with Spill Case No. 05-08302, TRC concludes the following: - Remediation was performed in accordance with the NYSDEC approved Remedial Investigation (RI) Report for the Northwest Environmental Remediation Area of the New Settlement School and Community Center Site (the RI Report), dated April 30, 2009, and the NYSDEC approved RI Addendum for the Northwest Environmental Remediation Area of the New Settlement School and Community Center Site, dated October 20, 2009. - Approximately 18,000 cubic yards of soil and decomposed/weathered bedrock were excavated, transported and disposed of as petroleum-contaminated material. Excavation depths ranged from approximately 8 to 40 feet below sidewalk grade and extended significantly below the observed water table (present approximately 20 feet below sidewalk grade). - In accordance with the NYSDEC-approved RI Report, 8,575 pounds of Oxygen Release Compound (ORCA) was applied in the Northwest Environmental Remediation Area at the terminal depths of excavation. - Approximately 949,570 gallons of petroleum-contaminated groundwater were treated and removed from the Northwest Environmental Remediation Area during excavation work. - A gas vapor barrier and active sub-slab depressurization system (SSDS) were installed during construction of the new school. The SSDS is currently operating as designed and TRC has verified, through vacuum monitoring, that there is a differential pressure between the sub-slab and building interior. An Operations and Maintenance Plan which describes the inspections, maintenance, and reporting requirements for the engineering controls has been prepared and is being implemented. Post-remediation groundwater monitoring has shown a 99% or greater decrease of total VOCs in all wells. Based on the above, TRC requests, on behalf of NYCSCA, that NYSDEC Spill Case No. 05-08302 be closed. Will discuss spill closure request with J. Kolleeny of DEC. AD 09/13/2013: Discussed the spill closure report with J. kolleeny. Based on the most recent GW data and the extensive remedial actions performed at the site (described above), it was decided to approve spill closure request. Issued and sent an approval letter to L. Guterman of NYCSCA. DL pdf copy of the letter to eDocs. Case closed. AD -"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 3/30/07 - Austin - Trasferred to Rahman for further review - end 07/12/10 Performed site visit on 07/08/10. 1490 Jesup Ave does not exist.There is huge building at 1510 Jesup Ave. Next to it is a parking lot, then a vacant lot and next is 1476 Jesup Avenue.Again, in the spill report, Joy Construction was reported as the company who did the work at 1490 Jesup Avenue.I spoke with Joy Construction, Michael @ (212)766-9651 and he told me that they have worked on 1510 Jesup Avenue Site.Therefore, it is possible that the spill was associated with 1510 Jesup Avenue. Moreover, at 1510 there is a 7,000 gallon tank ID displayed on the wall.Spill location is changed from 1490 Jesup Ave to 1510 Jesup Ave.(sr) No information found on the contamination from 2004.Managing agent does not have any record of what happened in 2004.Contact: Jonathan Echararria, HighBridge CDC, 1465 Nelson Ave#8, Bronx, NY 10452; (646)287-2281. DEC Memo:	"NYC sca owns the land and Shaw is doing boring work as part of planning for a new school. One soil boring found some waste oil type contamination. Problem seems to be very isolated. Shaw will do additional borings around this location to determine the size of the problem. Gasoline contamination was previously found on another section of the large property 2 years ago. That work is being managed by DEC already under spill #0508302 02/08/2008: This spill case was transfered to A. Doronova. AD This spill case was closed and referred to the spill # 0508302."
Remarks:	"FOUND CONTAMINATED SOIL DURING SOIL BORINGS"

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE CALL DEP>(DEPT OF BLG BOILER INSPECTOR CALLED IT IN TO THE DEP. NAME MR. WILLIAMS MCGIVNEY 212-312-8277). 2-601153 REG. EXPIRED SEE ALSO SPILL 9712250 Miss Loney & June Felix, HPD. 5k tank in vault filled with debris which may be contaminated. Could not access vault because of debris. One of vault doors removed & closed up with sheet

Map ID	Site	Database(s)	EPA ID Number

CITY OF NY DEAPARTMENT OF H.P.D (Continued) **U003396028**

rock. Vault no longer holds 110%. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 2/7/2012 - changed Lead DEC from Joe O'Connell to JFeng. 1/15/2013 - respond to Mary Manto of Tenen-Env. No information is available for this site. Recommend them to talk to previous owner, current owner, superb or anymore has knowledge on this, and come up with a plan to address the spill. see eDoc 3/27/2013 - Reviewed Investigation of AST Location Work Plan, dated 2/18/2013. Discussed with Raphael Ketani and provided comments to Tenen Environmental. 1) DEC requires more vapor points around the apartment building, a site plan with the intented location is attached. 2) the work plan didn't specify the trigger for soil sampling. So they may need to go back for soil sampling upon DEC review the investigation report. 3) explain the 80 feet of groundwater depth. 4) correct the PBS record. Respond next week. 5/3/2013 - reviewed Spill Closure Report, dated 4/23/2013, by Tenen Environmental. On April 22, 2013, Tenen completed the soil vapor screening at the site. The slab thickness ranged from 6 inches to 2.75 feet. PID readings were zeor ppm in all location, except SV8 which was 2.2 ppm. The soil was observed for evidence of petroleum impacts and screened with the PID. The results of the soil vapor and soil screening indicate that there are no elevated and/or widespread impacts associated with this spill record. A PBS record correction has been submitted and a copy of this application is attached in the report. Tenen request for spill closure. Discussed with Jeff Vought. The tank was an Aboveground Storage Tank and has been removed. The vapor screen indicated that no PID reading in most of the location. No evidence of subsurface soil contamination has been identified. Spill clsoed. "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 2/7/03 TJD Site visit. Vaulted 4,000 gallon tank failed. No PBS registration. Approximately 6 inches of petroleum accumulated in boiler room of building. Pump with hose found connected discharging directly to building sewer trap. Pump disconnected and DEP notified (575091). DLE (ECO Mat) notified and responded to location. Summons issued to building owner (Lee Feverier-Burton @ (347)204 1599). Eastmond tank cleaners responded to site to pump basement of product. Tank must be registered, repaired and tightness tested prior to being put back in service. sampling of soils beneath boiler room floor is also required. 2/27/03 TJD - telephone conversation with building owner, requesting copies of disposal documents. Owner was again informed of the need to register tank and perform sub-surface investigation. Tank is to be replaced. 4/10/03 MT - Site visit revealed petroleum seeping through both laid up stone foundation wall behind tank grave and boiler pad indicating subsurface contamination. Spoke with Renee Lewis indicating that at a minimum, a collection/seperation system be implemented to prevent contaminated water from entering the city's wastewater system. The tank and boiler room resides in a sub-basement, therefore limiting the expected impact to neighboring structures. 8/5/03 Tipple Spoke with building personnel and re-stated that the contamination must be addressed. The tank can be replacced, but the subsurface petroleum contamination must be remediated, requested an update for future remedial activities. 3/30/07 - Austin - Trasferred to Rahman for further review - end 08/05/09 Performed site visit on 07/29/09. This site has numerous violations. A 4,000 gallon tank in the basement boiler room, totally covered with cinder block with no weep holes.Fill line runs below ground approx 100'. Registration expired in 2008(PBS:2-608918). Tightness testing also due.Spill case open since 2003.Mailing address is same as PBS.Case referred to central office DLA(Scott Owens).Aparently, no visual evidence of oil spill exist at this time in the boiler room, but subsurface contamination unknown.(sr) 10/29/09 Letter asking spill investigation report was sent out to

DEC Memo:	"DEC Piper spoke with Abe, managing agent. He will meet DEC Patel onsite at 9-930 on 1/9/14. Abe cell- 917-440-2845 See also Spill 1205834, ttf leaking fill line. 01/08/14-Hiralkumar Patel. alternate address: 1465-1469 Jesup Ave PBS #: 2-339245. as per PBS record, the site has one 5,000 gal #6 oil AST in contact with soil. the tank was installed in June 1984. other spill # 1205834 was reported on 09/12/12 due to line test failure. fill line failed a test. DEC Demeo sent letter on 12/13/12 requiring submission of report, but no response yet. Jesup Realty Group LLC. 2392 Nostrand Ave Brooklyn, NY 11210 Attn.: Abe Pultmen **property manager** Ph. (718) 258-6590 (O) (917) 440-2845 (C) email: abep500@aol.com 01/09/14-Hiralkumar Patel. 9:15 AM:- visited site. met Mr. Pultmen and Mr. Ramreiz. site has one 5,000 gal #4 oil AST, sitting on floor. the tank is located in a secondary containment room, located along western side of the building, in backyard. tank room floor found in good condition. no signs of petroleum spill or petroleum odors noted in tank room, except old stain on wall on south end of the tank. based on location of stain near fill line elbow, it could be result of oil spray from leaking fill line in past. there are storage rooms on east and south of the tank room. inspected storage room towards the south of the tank room. no signs of spill or odors noted in south storage room. found aboveground fill line (approx. 1 ft off the floor) and vent line (running along ceiling) in the south storage room. boiler room is located on north side of the tank room. boiler room is at lower elevation than the tank room. boiler room sump located along tank room wall. no signs of oil seepage noted through wall between tank and boiler room. no oil noted in boiler room sump either. all lines are aboveground, except portion of fill line that runs under the alley floor from south storage room to the curb. the vent pipe is located in alley, just outside the south storage room. inspected apartment of Mr. Ramreiz, which is located along the alley where fill line runs. no petroleum odors noted in apartment. no signs of oil seepage/stains noted around tank or along piping. found a concrete patch in alley, near a floor drain, along fill line path. Mr. Pultmen mentioned that after a fill line failure in 2012, ABC tank found leak in fill line near the drain location and fixed the leak. informed Mr. Pultmen that documents regarding repair of leaking line, cleanup of any contaminated material and result of tank system test after fill line repair must be submitted for review. suggested Mr. Pultmen to relocate the vent pipe near fill port location. also suggested him to install secondary containment around the underground portion of fill line. Daniel Rameriz **building super** Ph. (646) 353-6549 (C) after discussing with DEC DeMeo, case closed based on observations during the site visit. **refer spill # 1205834 also.**"

(646) 353-6549 (C) 9:40 AM:- spoke with Donna at ABC and asked her to submit report for review. **refer spill # 1309766 also.** 12/9/14 TJD Site inspection. Met onsite with property manager(Mike Rubin 347.865.0376)and contractor (AARCO - Steve Plofker). New owners at property since summer 2014. Leaking underground fill pipe was determined to be cause of system test failure. AARCO was retained for cleanup and excavated contaminated soil/rock from the area of piping failure. A new fill box with all aboveground piping has been installed at location. Following repairs to tank system a system tightness test was performed and passed on 10/23/14. Area of fill pipe failure was open at time of inspection - bedrock surfaces were exposed. At time of inspection there were heavy rains which caused flooding of open excavation - no sheen observed. No petroleum odors

Map ID	Site	Database(s)	EPA ID Number

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Property owner could not be found 1/5/06 - Raphael Ketani. Spoke to Drew Lent, project and team manager of NYCSCA (718) 752-5609. He said this property is owned by the Settlement Housing Fund and is part of the large group of vacant lots. One lot is spill case #0508302. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. 08/27/2007 - Received call from Jill Guerra of GCI. Jill wants spill closure and wants to submit a letter which supposedely Koon Tang wanted explaining why they did not take groundwater samples. I explained that I do not see any project-related documentation in e-docs and need a report (including PDF format on CD for e-docs)which would present history of spill, results of investigation and remediation, evaluation of any potential impacts (or lack of thereof) to the off-site sources and other relevant information supporting spill closure. Jill agreed to work on it and submit information/report. VB 10/29/2007 - Hard copies of Phase II Investigation Report dated January 31, 2006; Remedial Action Report , dated January 19, 2007; and a Request for Spill Closure letter dated August 10, 2007 were received from Jill K. Guerra of GCI consultants (1-800-842-5073 or 631-851-1600) Aforementioned documents are under review. VB 12/17/2007 - A Phase II Subsurface Investigation report, dated January 31, 2006, was prepared for the subject site by GCI. Please note that the Phase II Subsurface Investigation included the entire parcel, known as 1501-1509 and 1513 Jerome Avenue, identified as Blocks: 2859, Lots 68, 73, 77, 89 and 90. The results of Phase II Subsurface Investigation indicated the presence of contamination (SVOCs) in the area of one hydraulic lift (soil Boring SB-11). The DEC was notified and Spill No. 04-12633 was assigned to the subject site. Based on the findings of the Phase II Subsurface Investigation, it was determined that remedial action would be required at Lot 68, specifically including the excavation and removal of the three single piston underground hydraulic lifts, the three dual trench underground hydraulic lifts, and associated hydraulic lift trenches, the one oil-water separator, and three former floor drains. On April 26, 27 and 28, 2006 the excavation work, the soil removal work, and soil sampling were conducted at the site. The one oil water separator, the seven hydraulic lifts, and three floor drains were excavated and removed. A total of 47.81 tons of contaminated soil was removed from the site. Four 55 gallon drums with waste oil were removed from the site. The excavated areas were backfilled and re-graded with the existing on-site soils. A total of nineteen representative soil samples were obtained and analyzed for VOCs, SVOCs, and for PCBs. The analytical results of these samples revealed that there were no VOCs, or PCBs detected at concentrations which exceed the respective NYSDEC Recommended Soil Cleanup Objectives. Five of the nineteen soil samples had slightly elevated levels of SVOCs detected above DEC RSCOs. The slightly elevated levels of the SVOCs do not represent a signigicant environmental concern. Based upon the field data and analytical data, it appears that the areas of the oil water separator, underground hydraulic lifts, and the floor drains have been properly remediated. The work conducted satisfied recommendation of the Phase II Subsurface Report dated January 31, 2006. No further remedial work is required at this time. Spill can be closed and NFA letter can be issued. (VB) 12/24/2007 - Spill is closed and NFA letter issued on December 24, 2007. (VB) "

Remarks: "FOUND CONTAMINATED SOIL IN AREA OF A UNDERGROUND HYDRALIC LIFT:"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number:	001
Tank Id:	3652
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

H00 - Tank Leak Detection - None
A00 - Tank Internal Protection - None
I00 - Overfill - None
L09 - Piping Leak Detection - Exempt Suction Piping
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
C00 - Pipe Location - No Piping
D00 - Pipe Type - No Piping
G03 - Tank Secondary Containment - Vault (w/o access)
J02 - Dispenser - Suction Dispenser

Tank Location:	6
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	3000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	05/22/1998
Register:	True

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the

Map ID	Site	Database(s)	EPA ID Number

NEW YORK AUTO CLINIC (Continued) **1000136906**

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: "06/09/08-Hiralkumar Patel. spoke with Chris on 06/07/08. he asked to contact site super. spoke with Albert (646-542-6036), building super. site has 5000 gal tank at site. super mentioned that leak was found in return line which is running totally aboveground on basement concrete floor. leak developed around 2 AM and they turned off supply/return lines. Castle oil responded for initial cleanup. as per super, no odors in living space upstairs. no cracks on floor. received call from technician from Castle oil. he mentioned that about 5 gal oil reached to sump, but sump pump was disconnected. spoke with Kevin from Castle oil, today. he mentioned that floor in not in good condition. Christopher Perez **property manager** Beneson Funding Corp. 20 West 55th Street, 6th Floor New York, NY 10019 Ph. (212) 752-2670 Ext. 301 (O) (347) 739-1693 (C) email: chris@benensonfunding.com PBS #: 2-201294. found PBS registration expired. <---------- 06/10/08-Hiralkumar Patel. visited site. met Albert. found oil in sump, next to boiler and as per Albert, oil leaked from return line in area next to boiler. found floor around spill is in bad condition. inspected tank vault. tank is sitting on floor. found product on front end of tank and also product on floor near front end of tank. asked Albert to keep sump disconnected until sump gets cleaned up. sent letter to Mr. Perez requiring PBS renewal, tank test, soil delinetaion and endpoint samples. letter emailed to Mr. Perez with copy of PBS renewal form. 06/16/08-Hiralkumar Patel. received message from Mr. Perez. left message for Mr. Perez. 06/19/08-Hiralkumar Patel. spoke with Mr. Perez. he mentioned that they hired environmental company, but doesn't know the name. Mr. Perez asked to talk to his supervisor Kerry Hoffman. left message for Kerry. Kerry Hoffman Beneson Funding Corp. Ph. (212) 752-2670 email: kerry@benensonfunding.com 06/23/08-Hiralkumar Patel. received call from Ms. Hoffman. they hired PTC for required work. 08/04/08-Hiralkumar Patel. spoke with Ms. Hoffman. she mentioned that PTC has finished work. asked Ms. Hoffman to submit report. 08/05/08-Hiralkumar Patel. received call from Mark from PTC. he mentioned that they powerwashed the boiler room floor around sump. told Mark that based on condition of the floor around boiler and also inside tank room, the department requires complete soil delineation alongwith tank test and possible endpoint samples. PBS registration renewed. spoke with Ms. Hoffman. asked her for soil delineation and tank test. copy of previous letter, dated June 10, 2008, emailed to Ms. Hoffman and Mr. Perez. asked to submit complete report according to the letter, by the end of Sep. 05, 2008. 08/08/08-Hiralkumar Patel. received message from Mark from PTC. they will do further investigation and cleanup. Mark asked for deadline extension. left message for Mark to provide updates regularly and based on work progress, the department may extend deadline to submit report. 09/03/08-Hiralkumar Patel. received fax from PTC with tank test result. tank system found tight during test. 09/17/08-Hiralkumar Patel. visited site on 09/15/08. met building super. inspected boiler room. found old pit in front of boiler where spill was reported originally. found oil inside pit. spoke with Mark at PTC. he mentioned that they will clean out pit and will drill hole to see any contamiantion under pit. 10/03/08-Hiralkumar Patel. received message from Mark from PTC. they are going to take endpoint samples today and will submit report once gets sample analyticals. 11/04/08-Hiralkumar Patel. received closure report from PTC. they removed contaminated soil from underground pit in front of boiler. found free product in

Map ID	Site	Database(s)	EPA ID Number

1447 MACOMBS RD ASSOCIATES, LLC (Continued) **U001834342**

sump and was removed. found concrete bottom in the pit. collected four endpoint corner samples from sidewalls above concrete bottom. also cleaned out spill inside tank room, in front of tank. collected one endpoint soil sample, six inches below tank room floor in area where spill noticed. no contamination found in any samples. visited site to confirm cleanup. found boiler room pit open. a sump exist inside pit. found two locations on excavation sidewalls, under existing boiler, from where oil was seeping into this pit in front of boiler. old boiler parts found in excavation sidewall under existing boiler. inspected tank room. found clean area in front of tank where oil was found earlier. spoke with Mark at PTC. asked him to backfill excavation as no further excavation possible and then asked for soil delineation around existing boiler to depth of at least five ft below previous pit bottom. mentioned to Mark that no further investigation required inside tank room. 11/05/08-Hiralkumar Patel. sent letter to Mr. Perez requiring soil delineation around an existing boiler. letter emailed to Mr. Perez and Mr. Hoffman at Beneson funding. letter faxed to Mark at PTC. 11/14/08-Hiralkumar Patel. received message from Mark. spoke with Mark. to avoid any confusion about sampling for soil delineation, Mark requested a site visit during drilling. asked Mark to setup site visit next week with property owner. Mark will call back. 11/24/08-Hiralkumar Patel. visited site. met Mr. Perez and building super. found more oil coming out from old boiler location, into excavation pit in front of new boiler. asked Mr. Perez for soil delineation via soil sampling around existing boiler. received call from Mark from PTC after site visit. he met with Mr. Perez and discussed about possible remediation, if any contamination exists. Mark mentioned that after that, owner choose to replace existing boiler and to excavate any contamiated soil underneath it. 11/25/08-Hiralkumar Patel. spoke with Mr. Perez. Mr. Perez mentioned that owner has choose to replace existing boiler to complete any remediation in one shot (if shallow). will notify about progress. 12/17/08-Hiralkumar Patel. received call from Mr. Perez. they hired boiler company, who backfilled excavation in front of boiler and opened two pits in back of boiler to see any contamination. no contamination found in any pits. Mr. Perez asked if any samples needed from these pits. asked Mr. Perez to hire environmental consultant to collect soil samples from two pits behind boiler. asked him to collect samples atleast six inches to one ft below bottom of these pits. also asked him to submit site map with location of boiler, previous excavation and recent pits with approx. distance between boiler and pits (to see if needs any more samples). Mr. Perez will contact Mark at PTC for soil sampling. 12/22/08-Hiralkumar Patel. received call from Mark. he collected samples from excavated test pits and will submit result. 01/27/09-Hiralkumar Patel. received letter from Mark. two soil samples collected: one from each pits. no contamination found in pits. site plan shows pits were located in back (west side) of the boiler. no pit on south side of boiler. 02/10/09-Hiralkumar Patel. visited site on 02/05/09. met Mr. Perez and Mark from PTC. observed two pits towards back of boiler. ealier excavation was backfilled. inspected open pits and found clay under boiler room floor. based on following informations case closed: - #6 oil spilled from leaking supply line - no contamination found in endpoint bottom samples - found minor seepage of #6 oil from excavation sidewall, along existing boiler and found old boiler parts under existing boiler, which indicates that old boiler was never removed and might have some

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"12/28/06-Hiralkumar Patel. left message for Ray. 12/29/06-Hiralkumar Patel. spoke with Ray. they filed to removed three 550 gal tanks from site. and during tank removal they found three more 550 gal tanks. Ray will modify PBS registration. they have excavated to feasible limit and took endpoint samples. asked Ray to send owner's contact info. Ray will email me that and once he receives sample analyticals from lab, he will forward it to the department. 01/09/07-Hiralkumar Patel. spoke with Ray. he gave following contact info for propery owner. 1415 Cromwell LLC 55 Kinderkamack Rd Emerson, NJ 07630 contact: Sal Vergopia Ph. (201) 265-7700 (O) (201) 370-6206 (C) Ray believes there might more contamination under sidewalk. they have sent samples to lab on 12/26/06 and waiting for analysis result. once he gets it, he will send report to DEC Vought. 8/3/07 - Austin - Transferred from Vought to Ketani for further review and action - end 8/24/07 - Raphael Ketani. The PBS record is #2-610434. It shows 6 550 gals. gas tanks closed and removed. I reviewed the February 2007 UST Closure Report produced and submitted by ESPL Environmental Consultants. I found the report to be acceptable. Based upon the soil sample results in the UST Closure Report and the PBS registration, I am closing the spill case. "
Remarks:	"DURING TANK REMOVAL CONTAMINATED SOIL WAS DISCOVERED: THIS SITE USED TO BE A REPAIR SHOP: SOIL WAS COLLECTED AND WILL REMOVED:"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE YK talked to Harvey Rottenberg form Unitex Uniform on 10/31/01. Told him to install temp. tank and pumpout old leaking tanks A.S.A.P. 10/31/2001 TIPPLE DISCUSSED SITE WITH FRANK COVELESKY, THE SITE ENGINEER. THE CORPORATE PE WILL BE ON SITE THURSDAY, IF IT IS POSSIBLE THE TANKS WILL BE ISLOATED AND RETESTED. IF ONE TANK PROVES TO BE SOUND, THE SITE WILL RUN THE OPERATION ON ONE TANK EMPTYING THE OTHER WHILE CONVERTING THE ENTIRE OPERATION TO GAS. REMEDIATION OF THE SPILL WILL OCCUR CONCURRENTLY WITH THE CONVERSION TO GAS. FRANK WILL KEEP DEC UPDATED. SEE SPILL 0101513 04/02/2002 MERRITT ENGINEERING HAS TAKEN OVER CLEANU, A PROPOSAL IS TO FOLLOW 2/1/05 site visit ..soil in exc. appears to be clean. 2/8/05 a third tank was revealed when a ramp to backfill was constructed 10/02/2003 SUBMITTAL FROM TYREE TO CONTINUE INVESTIGATION. The last site visit by Tipple revealed a minimum of one foot of #6 oil below concrete slab. The closure request from c. Stewart//Harbor Environmental photos revealed the one foot of #6 oil still there, stockpile of contaminated debris still stockpiled in parking lot. 4/7/04 THE LAST SITE VISIT IS SCHEDULED////PHOTO DOCUMENTATION AND ANALYTICALS WILL BE REQUIRED FROM THIS POINT ON. 6/24/04 Tipple updating/// document from Langen Eng. Unitex to raize building and dig out any residual contaminants////. 3/7/05 report reviewed, minor some exceedances, asphalt and coal found in excavation which could have caused those exceedances.. The site was excavated to below the water table at that location....NFA....MT// //////////////////////"
Remarks:	"CALLER STATES HE DISCOVERED 2 5000 GALLON UNDERGROUND TANK SHOWING EVIDENCE OF FAILURES AND ARE LEAKING - AT THIS TIME IT IS AN UNKNOWN AMOUNT OF LEAKAGE - CLEANUP COMPANY CONTACTED FOR THE JOB. SEE ALSO SPILL # 0101513."

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT ECO Mike Bellow dispatched to site. ~~~~~~~~~~~~~~ E2MIS NOTES 121089 K SLEDGE BX I&A RPTS OIL/WATER MIX IN V1866 WYTH AV W/S 36' S/O E171 ST..APPROX 5 GAL OIL IN APPROX 15 GAL WATER..SPILL IS CONTAINED AND NO WATERWAYS/SEWERS AFFECTED...SAMPLE TAKEN..PENDING TAG...SUMP PUMP IS DISCONNECTED. CLEANUP PENDING SAMPLE RESULT AVAILABILITY. TAG NUMBER 20051 HUNG...DEP C HAAS ON LOCATION AT 1230 HRS..MEETING WITH R EATON...CONDUIT PLATE 19E4 INDICATES A SEWER CONNECTION. EATON ALSO STATES THAT HE NOTICED A HIGH WATER MARK ON THE WALL OF THE VAULT..INDICATING POSSIBLE LIQUID LOSS TO THE SEWER. 06-NOV-1998 15:35 HRS O.S. R.EATON REPORTED FROM THE LOCATION THAT NYS DEC INSPECTOR MIKE BELLO ARRIVED ON SITE AT 14:40 HRS. DEC BELLO INTERVIEWED EATON AND HIS CREW. HE INFORMED EATON THAT ADDITIONAL FORCES HAVE BEEN DISPATCHED TO THE SITE TO TAKE SAMPLES. AN OVER 50 TANKER IS IN ROUTE TO THE LOCATION FOR THE CLEANUP. CLEANUP WILL BE CONDUCTED AS 50-499 PPM. PLANS HAVE BEEN MADE TO REMOVE THE TRANSFORMER FROM THE STRUCTURE TOMORROW SO THAT A COMPLETE CLEANUP CAN BE PERFORMED. 15:39 HRS: EATON REPORTS THAT DEC ENVIRONMENTAL ENGR C.ENGELHARDT IS ON LOCATION. EH&S J.GRAHAM HAS BEEN NOTIFIED OF THIS INCIDENT. HE WILL REPORT TO THE LOCATION. 16:03 HRS: O.S. R.EATON REPORTED THAT UPON ADDITIONAL INVESTIGATION OF THE STRUCTURE, THEY FOUND THAT THE DISCHARGE PIPING FROM THE SUMP PUMP WAS NOT CONNECTED TO THE SEWER LINE. THIS INFORMATION WAS PASSED ONTO THE DEP AND DEC PERSONNEL ON LOCATION. DEC ENGELHARDT NOTED THAT THE WALLS/FLOOR OF THE STRUCTURE WILL HAVE TO BE INPSECTED ONCE THE CLEANUP IS DONE. 11/06/98 1813 HRS. RESULTS 1242 AROCLOR --- 5 PPM DEP C HASS REQUEST A SLUG SAMPLE TAKEN FROM STRUCTURE. ROY EDEN CALL TO LET US KNOW. DEP RECEIVED A HARD COPY OF TEST RESULTS 11/07/98 UPDATE BARRELS WERE PICK UP BUT TAG WAS LEFT IN PLACED. 09-NOV-1998 O.S. R.EATON CALLED WITH SOME ADDITIONAL DETAILS ASSOCIATED WITH THIS INCIDENT. EATON NOTED THAT THE DEP INSPECTOR BELLO EXPECTED A 1 TO 3

Map ID	Site	Database(s)	EPA ID Number

TRANFORMER VAULT #V1866 (Continued) **S103573992**

HR TURNAROUND ON THE SAMPLE RESULTS. DEC ENGELHARDT WANTED THE TOTAL NUMBER OF GALLONS LOST FROM THE TRANSFORMER. EATON CALCULATED THE TOTAL AMOUNT LOST TO BE 40 GALLONS. EATON LEFT A MESSAGE ON ENGELHARDT'S VOICE MAIL WITH THIS INFORMATION AT APPROX 10 AM THIS MORNING. ALSO, DEP BELLO WARNED EATON SEVERAL TIMES THAT HE WOULD ISSUE A COMMISIONER'S ORDER IF BELLO WASN'T SATISFIED WITH OUR RESPONSE EFFORTS. THIS ORDER CONSISTS OF FIVE ITEMS WHICH MUST BE COMPLIED WITH. EATON WILL SEND ME AN EMAIL ABOUT THE COMMISSIONER'S ORDER, AND WE'LL TRY TO GET MORE INFORMATION ON IT. 05-NOV-2004 10:47 From: Markert, Bruce Sent: Friday, October 22, 2004 7:41 AM To: Fischer, Lawrence Cc: McCabe, James; Hedeman, Walter Subject: RE: V-1866 (Wythe Place & E171 St) Larry, CINDE records indicate that V-1866 was replaced on 11/9/98. -----Original Message----- From: Fischer, Lawrence Sent: Friday, October 22, 2004 7:18 AM To: Markert, Bruce Cc: McCabe, James; Hedeman, Walter Subject: V-1866 (Wythe Place & E171 St) Bruce, This is an Oldie (06-Nov-1998) clean up that was sent to the DEC for closure but is missing a few items. Can you have your area look up in your files for the following information? 1- Was transformer removed/replaced on /or/about 11-Nov-1998 Just e-mail me your findings. Thanks, Larry Fischer 05-NOV-2004 10:54 Sample results Lab Sequence Number 98-12232 indicate 5 ppm PCB. 05-NOV-2004 10:55 EH&S Representative Chris Blaich inspected this structure and reports no oil present. The inspection indicates that the cleanup was correctly performed when this spill occured in 1998 and confirms that the transformer was replaced."

Remarks: "con ed ref #121089 - spill is contained"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

State:	NY
Zip Code:	10002
Country Code:	001
Phone:	(212) 228-4336
EMail:	Not reported
Fax Number:	Not reported
Modified By:	NRLOMBAR
Date Last Modified:	2015-08-19

Tank Info:

Tank Number:	001
Tank Id:	56934
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
L00 - Piping Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)

Map ID	Site	Database(s)	EPA ID Number

152-156 E. 171ST STREET REALTY, LLC. (Continued) **A100154005**

B01 - Tank External Protection - Painted/Asphalt Coating
H00 - Tank Leak Detection - None
F00 - Pipe External Protection - None
I05 - Overfill - Vent Whistle
C01 - Pipe Location - Aboveground
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
J02 - Dispenser - Suction Dispenser
K00 - Spill Prevention - None

Tank Location:	3
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	04/15/1987
Capacity Gallons:	6000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	NRLOMBAR
Last Modified:	08/19/2015
Material Name:	Not reported

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 133395: Glenford Patterson, Employee # 51055 reported that while doing pipe survey a leak developed in heavily corroded area on pipe causing an oil leak at the rate of approximately 1 gallon per hour; approximately 5 gallons of oil is presently in sump. The pipe was being surveyed for damage caused by corrosion. A high pressure crew is presently on site with clamps and pads. Bucket placed under leak. Temp clamp was installed at 11:00 9/14/00 but clamp not holding 100% due to pipe corrosion. Safeway on site excavating outside wall and wall broken out. Custom 6'7 barrel fabricated on9/15/00 and installed on 9/16/00. Corroded bypass line replaced also. All liquid contained in manhole and was pumped out be Con Ed tanker. Loss estimated to be 170 gallons of dielectric fluid (from pumphouse readings). Chem lab reported 00-08896 <1 ppm PCB."
Remarks:	"leaking feader pipe. clean up will be done when leak is clamped. ref #133395."

MANHOLE #23914 (Continued) **S104508947**

(3) gallons of heating oil and approx. (75) gallons of wash water were removed by corporate tanker, solid debris was placed in (3) plastic bags and taken to the Van Nest Service Center to be disposed as NON-HAZARDOUS waste. There was no sewer connection in this manhole to seal, and sump is concrete. Mr. Rohe removed environmental tag. Mr. Rohe reports that the oil is home heating oil from a recently dug up fuel tank in the vicinity of this manhole. 21-MAR-2002 @ 10:00 Hrs Flush Operating Supervisor Charlie D'Alisera and EH&S Sr. Specialist Jim Grahan inspected MH's 23914 & 23915 on Wednesday 3/20/02 and found both manholes were dry and there was no oil present. Supervisor D'Alisera remembers that these holes were found to have heating oil in them do to the apartment building filler neck being broke. Contractor repaired and problem was corrected."

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: "Sangesland spoke to Zeb at PW Grosser. He said the heating old tank had been pulled several years ago. The client hired them to do test borings around the former tank area. Only one boring had some minor hits above standards. PW Grosser has prepared a report which will be sent to DEC Piper for review. In addition, Zeb said the property owner is planning construction work on the site in the next few months and will probably be digging out the contaminated area at that time. 12/14/10- DECPiper recieved closure report. All petroleum-contaminated soils were removed from the vicinity of P.W. Grosser boring SB-2 where petroleum contaminated soils had previously been encountered. Laboratoryanalysis of confirmatory endpoint soil samples from the excavation walls and floor documented the absence of VOCs or PAHs at concentrations above guidance levels. CLosed. See edocs if warranted."
Remarks: "unknown amount lost to unknown size tank. Tank has been removed. Clean up pending."

BRONX LEBANON FULTON OPHTHALMOLOGY (Continued) **1007734765**

Facility Name: BRONX LEBANON FULTON OPHTHALMOLOGY
Address: 2015 GRAND CONCOURSE
Tribal Indicator: N
Fed Facility: Not reported
NAIC Code: Not reported
SIC Code: 8011

FINDS:

Registry ID: 110018922772

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: "12/30/05. Mr Feroze talked with James Mcgoldwick (718-206-2000 347-452-3866), he informed that the system is fine and he will send DEC the tank test result soon. TTF also sent: Samaritan Village Inc, 138-02 queens Blvd, Briarwood, NY 11435. 01/18/06 . Feroze received a fax from Lee Selinger (631-360-8901, 516-330-8170) of WINDMILL Oil Tank service. He mentioned that he will change the fill & vent pipe. He is requested to submit manifest and tank test result to DEC. PBS of this Spill 2-349542. 02/22/06 . Feroze received a letter from Lee Selinger (631-360-8901, 516-330-8170) of WINDMILL Oil Tank service. He mentioned that they excavated the top of the tank and replaced the vent and fill line. They will change gaskets of undisclosed manhole cover and will test the tank. 02/06/06, Feroze talked Lee Selinger (631-360-8901).They wiil submit DEC the manifest to change the fill and vent lines. 03/13/06 Feroze , Mr. James Mcgoldrick e-mailed me that they will submit tank tightness test result within a week. 03/14/06 Feroze. Received the passed tank tightness test result and manifest regarding change of fill and vent lines. The spill is closed. "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED TO I. ISLAM 8/23/05- The site's soil and GW are under remediation by LiRo Engineers by excavating the two highly soil contaminated areas followed by bio-nutrient slurry application through injection wells in 2003.Reviewed the semi-annual monitoring report ending May/05. A pilot test results revealed infeasibility of an SVE system application at the site to remediate the contaminated soil in between two excavated areas where excavation could not be done due to heavy underlying utility lines. Low level GW contamination persists in six of the nine on-site monitoring wells. Natural attenuation will continue and monitoring will be done on semi-annual basis. Soil samplings in between the earlier excavated areas are due during the next monitoring period via three borings (GP-15, 16 and 17). Filed the report in the eDoc folder.- II 3/09/06: This spill

Map ID	Site	Database(s)	EPA ID Number

NYC DEPT OF SANITATION - J SCHIAVONE (Continued) **1000140999**

transferred from I. Islam. to Q. Abidi. 08/18/06: Trasnferred to SK. According to the URS Bi-monthly update report, during a November 10, 2005 meeting it was suggested that BioRem Product injections be considered as a remedial action. It is unknown if LiRo considered any design. URS sampled the GW on June 29, 2006 and will prepare a report with recommendations for further actions based on the results. - SK 10/27/06 Spill case transferred from S. Kraszewski to J. Maisonave. - JAM 1/29/07 On January 19, 2007, URS requested in an e-mail correspondence that additional contaminated soil be excavated in between areas previously excavated by LiRo (Areas 1 and 2). LiRo did not excavate the 10' by 12' area reportedly due to the presence of utilities (a water line). URS believes the area could be excavated carefully without damaging the water line. I sent an email today approving the additional excavation. - JAM 10/07/08 Reviewed the Excavation and Groundwater Sampling Results/Request for Spill Closure Report submitted by URS and dated September 12, 2008. Between June 23 and July 1, 2008, Franklyn and URS excavated approximately 53.52 tons of petroleum contaminated soil from an area measured approximately 17.5 feet by 11 feet and 10 feet deep. The excavation depth was modified during field work so as not to undermine the structural stability of the building. At a depth of 4 feet against the wall of the building a 45 degree slope was extended to a target depth of 10 feet. As a result approximately 10 cubic yards of soil were left in place. Farnklin applied 1,260 pounds of RegenOx to the exposed soil to address any residual contamination. End point soil samples were collected from the east wall, the west wall and the bottom. The north and south walls were not sampled because the excavation extended to the clean backfill from the LiRo excavations. Some residual soil contamination remains beneath the street to the east and the building to the west. Further excavation was not feasible. Groundwater samples were collected from all accessible monitoring wells. Only very minor dissolved phase contaminated was observed. URS report is uploaded to eDocs. Since all accessible contaminated soil was removed, the residual soil contamination is not affecting groundwater conditions, and there are no apparent exposure pathways, this spill case poses no threat to human health or the environment. This spill case was close and an NFA letter was issued on 10/07/08. - JAM"

Remarks: "UPON TANK REMOVAL SOIL CONTAMINATION WAS DISCOVERED-SOIL BEING REMOVED AT THIS TIME."

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: "8/27/2015 - Feng - Duty Desk. Talked to Michael Marsicano of WhiteStone Associated (908-668-7777, MMarsicano@WhiteStoneAssoc.com). His client is doing due diligence for the property transaction and they have actually closed the deal already. About 15 soil borings have been installed and one soil boring show PID reading and PCE (5.2 ppm) is above standard in soil at 3.5-4 feet in the former drain area inside the current building. The deepest soil boring was advanced down to 25 feet and no groundwater has been encountered. The owner/developer plan to demo everything, excavate for basement, then build a self-storage building. Sent email request the owner/developer contact information and the Phase 2 report. Site owner: CS 169th Street, LLC 1350 Broadway Suite 1010 Manhattan, New York 10018 Attention: Mr. James Coakley (732-978-0216). Received site plan and analytical results. The spill is assigned to the runner T. DeMeo. 8/28/2015: Rashad - Spill reassigned to Rashad as per DeMeo's request. According to NYC building records 1297 Cromwell Avenue has no alternative addresses (address was corrected in spill report, it was written as Crombwell). No additional spill reports or PBS reports found. From Google Maps the property was an auto repair shop. As per subsurface exploration summary soil boring samples were taken as far deep as 13 feet below grade surface (ftbgs) and groundwater was not reached, boring no. B-5 went to a depth of 10ftbgs and the highest PID reading was 9.8 ppm from 2-4ft. Boring no. E-09 went to a depth of 13ftbgs, soil directly under concrete was indicated to have a petroleum odor and the highest PID reading was 16ppm at around 2.5ftbgs. Boring no. E-10 went to a depth of 10ftbgs, soil directly under concrete was indicated to have a petroleum odor and the highest PID reading was 8ppm at around 1ftbgs. Soil boring E-11 went to a depth of 10ftgbs and the highest PID reading was 1.5ppm on surface level. All soil borings were taken within building as per site plan. Soil borings which recorded the highest PID readings were in the middle of the building. As per email to June from Michael Marsicano The spill represented by soil sample S1 (collected from boring B-5). Summary of S1 sample collected from boring B-5 shows Tetrachloroethene at 5.2ppm at 3.5-4ftbgs. Sample taken from boring E-09, at depth 11-11.5ftbgs has Mercury, Aluminum, Calcium, Chromium, Copper, Iron, Lead, Vanadium, and Zinc over unrestricted use levels. Lead was recorded at 470ppm, chromium was recorded at 40ppm, and Mercury was recorded at 1.7ppm. Soil boring E-09A which was taken in the same location as E-09 but at depth 4.5-5ftbgs recorded no elevated contaminants. Boring E-10 has elevated levels of Mercury, Aluminum, Calcium, Copper, Iron, and Vanadium. Mercury was recorded at 0.29ppm. Soil boring E-11 recorded no elevated contaminants. Soil boring E-12 sample was collected at 3-3.5ftbgs, elevated contaminants consisted of various PAH's the highest value was 8.1ppm. Email sent to Michael: I have reviewed the data you submitted to June for 1297 Cromwell Avenue and this case has been reassigned to me. I would like to request the following information: Report with background information as well as recommendations and conclusions for data received on 8/27/2015. Site and development plans for future use of

Map ID	Site	Database(s)	EPA ID Number

VACANT COMMERCIAL (Continued) **S118260927**

property. 9/28/2015: Rashad Received email from Nicole Perkins of Whitestone Associates with Remediation Work plan, it has been uploaded to D2. The report summary is as follows: Background/site use indicated the subject property consists of an occupied 2 story structure with a basement that is used as a daycare on the first floor and a residence on the second floor, and a one-story automobile repair shop with 4 car storage garage. During redevelopment the existing structures will be demolished and a four story, zero lot line, about 22,400 sq ft self storage facility will be constructed. The self storage facility will have two cellar levels, an office, loading dock area accessible from 169th street to the floor, and the upper levels will be used for self storage. The construction of the cellars will include the excavation of soils across the entire site to depths of approximately 10.5 ftbgs to up to 19 ftbgs. Seven soil borings were completed to a maximum depth of 13 ftbgs, groundwater was not encountered during the Phase 2 activities. The proposed remedial actions are as follows: 1. Excavation of contaminated soil (contaminant being PCE) and off site management. Whitestone assumes a maximum of 150 tons of non hazardous, PCE impacted soil (15 feet x 15 feet x 11 feet deep) will be encountered in the hot spot area. Contaminated soils will be excavated and sent for off site disposal (excavation area is shown in Figure 1 where concentrations were recorded around drain). 2. Subsurface evaluation in area of soil sample S1/B-5 following contaminated soil excavation. The subsurface evaluation will consist of classifying soils by texture, field screening with PID, and post excavation soil sampling. The PID screening and post excavation soil sampling will be utilized in lieu of further Remedial Investigation. 3. Whitestone will prepare a Remedial Action Report (RAR) and, if necessary, a Remedial Investigation/Remedial Action Workplan for submittal to NYSDEC upon completion of the Remedial Actions above. The reports will summarize the contaminated soil removal activities, provide the results of Whitestone s soil sampling efforts, and recommend no further action or additional RI and/or Remedial Actions, as appropriate. 9/30/2015: Rashad As per Jeff Report Receipt and Review Letter is being prepared and sent to owner and consultant, the proposed remedial actions have been approved and the letter has been uploaded to D2. DEC Possibly Requires/Questions: 1. Future use, site development plans 2. Report with background information, recommendations and conclusions for data received on 8/28/15 3. Endpoint samples at development depth for full list VOC's"

Remarks: "Discovered during phase 2 in soil borings."

SERVICE BOX #5667 (Continued) **S106009353**

Environmental Mechanic, Bill Silkowski, #82003 reports that while performing a routine flush of clean water from SB. 5667 he noticed an oily substance mixed in with the solid debris at the bottom of the SB. No oil or sludge was sucked up into the line and the flush operation was stopped immediately. There is 2 gallons of oil mixed with 100 lbs. solids and 10 gallons water. No sewers, waterways or private property was affected. No smoke or fire is/was involved. Crew will take a sample and install an environmental Tag (number to follow). To be cleaned as a 24 hr. deminimus spill. 18-NOV-2002 18:46 Environmental Flush Mech. A O Negron reports that spill is not contained, the floor of the structure is only partially sealed. After pumping the water in the structure to >50 ppm PCB tanker the crew determined there was not a continuous floor in the structure. This spill will be changed to reportable. Cleanup to continue. Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082 18-NOV-2002 22:25 Environmental Flush Mech A O. Negron 18400 and Mech B. M. Derasmo 86558 report cleanup complete structure was double washed and rinsed and steam cleaned. Contaminated soil was removed from the area of the service box that was not concrete. 2 55-Gallon drums of assumed 50-499 ppm PCB waste generated and 50 gallons of assumed >50 ppm PCB liquid removed by tanker and transported to Astoria WWTP. Walter Hedeman 84455 20-NOV-2002 18:10 Environmental Flush Operating Supervisor L. Fischer 55784 reports the floor of the structure has been sealed and cemented. The structure number was originally reported as SB 5667, this is incorrect. The correct structure information is SB 2660. This was confirmed by Mr. Fischer in the field and on the electrical plates.This has been corrected in the Location and Description window of this report. Walter Hedeman 84455 20-NOV-2002 18:23 Gentlemen, Incident # 146058 (opp 1310 Cromwell Ave- SB2660)..... The Service Box floor has been cemented. There is no trace of oil in the structure. The E2MIS report needs to be updated. The original report reads sb5667. The structure is located on Edward L. Grant Highway. This is incorrect. The correct structure is sb-2660. This is located opposite 1310 Cromwell Ave. This is the structure that I cemented the floor."

Remarks: "NO SEWERS OR WATERWAYS AFFECTED NOR PRIVATE PROPERTY- NO SMOKE OR FIRE-CLEANUP IN PROGRESS-MATERIAL DID END UP ON SOIL-CON ED #146058 "

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"12/9/14-zhune spoke to Richard Clifford from Castle Oil 718=579-3419. Richard said customer complaint oil leak. They found oil leaking from a broken line. The line runs underneath the basement floor. Approximately 10 gallons of oil in the sump pump. The oil came from the basement floor and entered to the sump pump. Daryl Barry Maintenance supervisor 718-293-2390 12/9/14-Zhune spoke to Daryl. He will call back with the information of the contrator that is going to clean the spill. 12/10/14-Daryl called and said WCD Group (RND Services) is cleaning the spill. 12/23/14-Zhune spoke to Daryl. Daryl said thye are still doing work at this site. They are in the process to collect samples from the excavation. 9/25/15-Daryl is no longer with Sienna House Rectory. The receptionist said call sister Mary Doris or Secilia. 9/28/15-Zhune spoke to sister Mary. She said she will truck down who is responsible to send the documentation to the DEC. Marydoris285@gmail.com 10/7/15-Jonattan Vargas Owner of the property 718-293-2766 Scott Robinson Contractor. 10/7/15-Scott Robinson sent the following email Good evening Veronica, I represent the Archdiocese. I am working on a project you are familiar with. It is regarding the oil spill at Siena House in the Bronx. It is my understanding that you need the document number from the contractor. I have contacted them and waiting for a response. I will follow up now and see if I can get this information and other pertinent info. Please let me know what else you require. 10/7/15-Scott Robinson sent the following emailPer the below email please forward me your phone number as I had it previously but cannot seem to find it in my files. My cell number is 917-474-9906. 11/16/15-Zhune spoke to Jonattan Vargas. He said R&D in the process to drill boring. Sharima Ryan from R&D 845-348-6355."
Remarks:	"loss from fill line to floor and sump, c/u pending by another contractor"

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

Map ID	Site	Database(s)	EPA ID Number

SHELL OIL-ANGAMA AUTO CTR INC (Continued) **1000694477**

redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"12/4/10-Vought-Primary off hours responder. Called and spoke to NYCDEP Celeste Oloke (cell:347-672-6059) who was on-scene. As per Oloke building was being renovated which resulted in an oil spill from an AST located in the basement. Oloke noted that numerous city agencies on-site in addition to NYCDEP including FNDY, NYCDOB and that OEM was en-route. Oloke also noted that vapors were present in the building which was partially occupied and that the super was onsite but was unable to make decisions regarding contractors or spill cleanup. Vought told Oloke that he would call RSE for authorize site visit and return call. Vought called and spoke to RSE who authorized site visit by secondary responder (DEC Zhune). Vought called Zhune and ETA was 30-45 minutes. Vought informed her of status and called Oloke and informed him of her ETA. Oloke noted that owner information as per super was: Dragreis Realty Sam Simone Ph: (718)972-5010 Cell: (917)939-9922 and that he called but did not leave message on answering machine. Vought called Simone Realty at office (no cell number yet on hand) and left message of spill, possible fines and penalties by DEC if callback not received ASAP as well as fact that numerous city agencies were at building. Vought called Zhune and RSE and informed them of same. Vought received callback from Zhune who noted that spill was #6 and that was from top of AST and that vapors were minimal. Vought requested that she call RSE and inform him of same and seek further instruction. Vought received call later from RSE who noted that building was evacuated by

Map ID	Site	Database(s)	EPA ID Number

BRAGREIS REALTY CORP (Continued) **U003388473**

OEM due to NYCDOB violations and possible FDNY egress violations (not due to spill). 12/5/10-Vought-Received call from spoke Simone at approximately 6pm who had been informed of evacuation and also of spill at site and that he was willing to comply with any and all Department requests. Simone provided cell number contact above. Vought informed him that he would inform RSE and Zhune of call and Zhune would return call tomorrow with possible DEC requirements. 12/6/10-Vought-Vought changed spill material to #6 fuel oil from #2 fuel oil(later confirmed by DEC Zhune who performed authorized site visit as per RSE). Note also PBS#2-277126 for site that shows an onsite 5000-gallon #6 fuel oil AST (in contact with soil). Vought informed RSE and Zhune of call from Simone on 12/5 and need to call him back with Department requirements. 12/4/10-Zhune responded to this site. Spoke to super Nelson Ruiz 646-372-4374. The pump that supply with oil to the boiler was leaking a month ago. This pump was replaced but they did not clean the spill. There is oil #6 on the floor of the tank room along the tank. The Fire Department covered the spill with speedy dry. The AST 5000-gallons is on a platform of concrete. the floor of the boiler room is in very bad condition. As per the super the building is been renovated. They will renovate this floor and the tank room. Zhune Spoke to HPD City NY supervisor Anthony Amalfitano 917-517-9105. he said agencies were call because of the bad conditon of the building not because of the spill. During inspection the Fire Departemnt found this old oil spill then they notified DEC. The Fire Department issued vacant the building because no secondary means of Egreas. Mary O' Shaughnessy from Red Cross 212-787-1000 Ext. 1 said aproximately 30 people are going to be relocated. The Red Cross will provide with shelter and food. MTA will porvide busses. As per Mary they will be taking to PS 114 that night. If it's going to be a long term evacuation they will decide where they are going to be taking. Mary also said Red Cross, HPD and another agencies will take care of the Bill. 01/06/11- Benie Bauer from NYC Tank test 718-731-7011 called. He said they clean oil arround the tank. They took three samples. Report will be send next week. 02/23/11- New York City Tank Testing, Inc sent the report dated 02/04/11 . Letter stated the following: This letter is to inform you that Dagreis Realty contacted us in reference to an old oil pump seal leak causing a spill. Scope of work that was performed: Tank room floor was dug up on both sides of the oil tank, the approximate area of excavation on the north side was 4'X 2'and up to a depth of 9 ,on the south side was 12'X 3'and up to a depth of 3', we filled a total of 22 drums. Soil samples were taken from walls and bottom of the excavations. The soil analitycal results show VOC's and SVOc's below the Recommmended Soil Clean Up Objectives. Spill Closed. "

Remarks: "Caller advised found leaking oil tank at Apt building at address given. Clean up is pending."

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 7/24/2000 Northeast Environmental Solutions Inc (Matthew Schneck 631-979-5946) sent in a spill closure report. Shows the tanks were pulled in early 1998. 4 wells on site are clean (non detect) for MTBE and BTEX. There are some elevated levels of PAH in the bottom of the Used Oil Tank pit. Because of this, RWA instructed Sangesland to request a Risk Assessment on the site. Sangesland requested Matt Schneck to work with Shell to prepare a Risk Assessment showing that the PAH will not come in contact with people. Also a statement that the owner is aware that if any excavation is to occur on the site, the owner is responsible for preparing a Health & Safety Plan for the excavation process. Property owner is listed as Caroline Rubinstein. 10/3/2000 - Northeast Environmental Solutions, Inc (631-979-5946) Submitted a Risk Assessment and Site Closure Report including a signed statement from the property owner (Caroline Rubinstein) acknowledging the requirement for a health and safety plan if the site is ever excavated (due to elevated PAH's) Based on this report there are no easy pathways for human contact (PAH's are at least 5 ft deep). Also other BTEX & MTBE levels are well below standards. Therefore the spill case is Conditionally Closed Closed - Subject to the requirement that any future site excavation will require a health & safety plan for PAH contact."
Remarks:	"tank removal encountered contaminated soil has been removed as far as 12 ft deep. 17 tons of soil removed. samples taken. ***Spill closed 10/3/2000-Health/Safety Plan needed if excavated*** "
