# Quality Control Summary

Client Name: Hampton-Clarke Veritech
Reported: 10/23/2017 14:39

Group Number: 1857935

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

# Quality Control Summary

Client Name: Hampton-Clarke Veritech
Reported: 10/23/2017 14:39

Group Number: 1857935

Surrogate recoveries which are outside of the QC window are confirmed unless attributed to dilution or otherwise noted on the Analysis Report. For dual column analyses, the surrogate (at least one surrogate for multi-surrogate tests) must be within the acceptance limits on at least one of the two columns.

# Sample Administration Receipt Documentation Log

Doc Log ID: 196157

Group Number(s): 1857935

Client: HAMPTON-CLARKE, INC. ;

## Delivery and Receipt Information

| | | | |
|---|---|---|---|
| Delivery Method: | UPS | Arrival Timestamp: | 10/03/2017 9:35 |
| Number of Packages: | 1 | Number of Projects: | 1 |
| State/Province of Origin: | NJ | | |

## Arrival Condition Summary

| | | | |
|---|---|---|---|
| Shipping Container Sealed: | Yes | Sample IDs on COC match Containers: | Yes |
| Custody Seal Present: | No | Sample Date/Times match COC: | Yes |
| Samples Chilled: | Yes | VOA Vial Headspace ≥ 6mm: | N/A |
| Paperwork Enclosed: | Yes | Total Trip Blank Qty: | 0 |
| Samples Intact: | Yes | Air Quality Samples Present: | No |
| Missing Samples: | No | | |
| Extra Samples: | No | | |
| Discrepancy in Container Qty on COC: | No | | |

*Unpacked by Ruth Shank (12390) at 12:13 on 10/03/2017*

## Samples Chilled Details

*Thermometer Types: DT = Digital (Temp. Bottle) IR = Infrared (Surface Temp) All Temperatures in °C.*

| Cooler # | Thermometer ID | Corrected Temp | Therm. Type | Ice Type | Ice Present? | Ice Container | Elevated Temp? |
|---|---|---|---|---|---|---|---|
| 1 | 32170023 | 2.2 | IR | Wet | Y | Loose | N |

**To:** Conrad Burkholder; !us19_dp39_Unassigned
**Subject:** RE: TAT and Data Package Question

Hi Conrad- Please enter as N-8. We notified the client that we are unable to offer an expedited TAT at this time. I'm not certain about the DP, we will have to confirm with the client. Please enter with an SDG code, and we will update with the DP scans if the client determines one is needed.

Thanks,
Stacy

Subject: FW: TAT and Data Package Question

Hello,

Is the TAT correct for this? Also, does this require a data package?

Thanks,
Conrad

# Explanation of Symbols and Abbreviations

*The following defines common symbols and abbreviations used in reporting technical data:*

| | | | |
|---|---|---|---|
| **BMQL** | Below Minimum Quantitation Level | **mg** | milligram(s) |
| **C** | degrees Celsius | **mL** | milliliter(s) |
| **cfu** | colony forming units | **MPN** | Most Probable Number |
| **CP Units** | cobalt-chloroplatinate units | **N.D.** | non-detect |
| **F** | degrees Fahrenheit | **ng** | nanogram(s) |
| **g** | gram(s) | **NTU** | nephelometric turbidity units |
| **IU** | International Units | **pg/L** | picogram/liter |
| **kg** | kilogram(s) | **RL** | Reporting Limit |
| **L** | liter(s) | **TNTC** | Too Numerous To Count |
| **lb.** | pound(s) | **µg** | microgram(s) |
| **m3** | cubic meter(s) | **µL** | microliter(s) |
| **meq** | milliequivalents | **umhos/cm** | micromhos/cm |

| | |
|---|---|
| **<** | less than |
| **>** | greater than |
| **ppm** | parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas. |
| **ppb** | parts per billion |
| **Dry weight basis** | Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis. |

**Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.**

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" are not performed within 15 minutes.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

# Data Qualifiers

| Qualifier | Definition |
|---|---|
| C | Result confirmed by reanalysis |
| D1 | Indicates for dual column analyses that the result is reported from column 1 |
| D2 | Indicates for dual column analyses that the result is reported from column 2 |
| E | Concentration exceeds the calibration range |
| J (or G, I, X) | Estimated value >= the Method Detection Limit (MDL or DL) and < the Limit of Quantitation (LOQ or RL) |
| P | Concentration difference between the primary and confirmation column >40%. The lower result is reported. |
| U | Analyte was not detected at the value indicated |
| V | Concentration difference between the primary and confirmation column >100%. The reporting limit is raised due to this disparity and evident interference. |
| W | The dissolved oxygen uptake for the unseeded blank is greater than 0.20 mg/L. |
| Z | Laboratory Defined - see analysis report |

Additional Organic and Inorganic CLP qualifiers may be used with Form 1 reports as defined by the CLP methods.
Qualifiers specific to Dioxin/Furans and PCB Congeners are detailed on the individual Analysis Report.

### Parks

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 1.1 | 8 | Exterior Changes | Joe Roediger | | | Open |

**Description:**
Ownership is responsible for getting all changes approved by City Hall and Parks Dept.
CP suggests not to present PDC with piecemeal submissions but three separate packages: roof, exterior elevation, and kitchen.
If the potential exterior awning for outside kitchen area is a temporary, seasonal structure, then it becomes a non-issue, does not need to be approved by PDC.

JCS Construction Group, Inc.

# Meeting #10

## DEC

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 2.1 | 1 | Stock Pile | Justin Shaw **(JCS Construction Group, Inc.)** | | | Open |
| | **Description:** Review current stock piles and confirm approach for securing them. | | | | | |

## Architectural

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 3.1 | 1 | Submittals | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:** Review Submittal Log | | | | | |
| 3.6 | 1 | Bluestone | Ron Rainone **(Hart Howerton)** | | | On Hold |
| | **Description:** Currently waiting on approved samples. | | | | | |
| 3.7 | 7 | Roof Trusses | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:** JCS requests additional securing detail on the wood stringers. JCS to send RFI about the Simpson ties that have a maximum impact of 5/16"<br>JCS to send RFI regarding the detail shown on the truss shops calling for rigid insulation on the bottom of the trusses but there is no corresponding drawing or note in the plans to show this. | | | | | |
| 3.8 | 7 | Kitchen | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:** - As drawn by Jim Bailey, the New Exterior Bar/Kitchen design doesn't work because the column line is 11' from the building and isn't in Hart Howerton's design scope. AF to provide pricing to determine whether HH, JCS, and Ownership wants to proceed. | | | | | |
| 3.9 | 9 | Millwork | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:** JCS Millshop requires at least 2 weeks after reciept of control sample and final approved interior drawings in order to create the next round of shops for approval. Upon approval, fabrication will begin. | | | | | |

### Parks

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 1.1 | 8 | Exterior Changes | Joe Roediger | | | Open |
| | **Description:**<br>Ownership is responsible for getting all changes approved by City Hall and Parks Dept. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Parks has submittal package. Ron sent a description and explanation to Parks on why we had to do everything, along with Ownership's letter. Waiting on submittal status and response.<br><br>Timing for response from Parks is unknown. Detailed Bid Set for bar grill roof, all revised i | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | tems. All equipment is pretty much what was in the drawings that JCS has already received. Exception: the 6-burner stove stop has been replaced with a 4 burner. Size of the outside sink was condensed to accommodate decrease in size from 13 to 11 feet. Hand sink is known, but would we need a three-compartment sink? Engineer to advise but per RR, as long as all dishes are sterilized inside building only handwash is needed. JCS needs to know whether there is going to be a grease trap going outside, three-compartment. JG requests a call with Sam Tell to sort out issues, but ownership needs to determine the extent of their outside scope. Pair of cold plates, refrigeration unit for the island, storage, drain boards…<br><br>JCS needs to know whether the floor drain going into the grease line or not.<br><br>Per JR, there will not be a three-compartment sink in outdoor bar. Theoretically, being that there is cooking going on in that area, someone could dispose of grease in the handwash sink, but the ultimate determination is the engineer's call.<br><br>Sam Tell and JCS to put together some budgetary numbers for this scope.<br><br>Front stairs are built per the changed (and, as of yet, unapproved) drawings so if PDC decides that they don't like that, we are going to have to do something about that. Per JG, and embellished by RR in his submittal to PDC, these changes were made based on the abundance of safety concerns.<br><br>Driveway and Exterior Bar will require a formal submission, most likely in mid-November. Drainage changes and other smaller changes do not require formal submission review by Parks. Parks provide suggestions versus a flat no. There will be a formal letter/endorsement by Parks accompanying the submission. Ownership hopes to have something to give to Caitlin for the driveway in under a week. Per CP, be thorough in explanation because if changes are logical they are more likely to pass. | | | | | |
| 1.2 | 11 | Earthwork | Dave Keil **(Maser Consulting P.A.)** | | | Open |
| | **Description:**<br>Compaction tests and Soil test results | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>JCS did receive the plumbing permit from the DOB. Backfilling is ongoing.<br>Regarding the Shaping layer test results, Maser is still waiting on the Dioxin and Furon analyses, which will be available on the 24th.<br><br>Maser has not yet released their final letter on Soil Compaction to F&P but anticipates doing so today. Nothing to worry about in Maser's opinion. Team to push for an approval because we are beyond the point of return when it comes to this stone. JG to get on a call with Joe Tierney at F&P after the meeting. 88% to 98% compaction results.<br><br>Maser requests documentation on the quality of the stone that is being shipped from the quarry. | | | | | |

| 4.1 | 13 | Roof Trusses | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>JCS requests additional securing detail on the wood stringers. JCS to send RFI about the Simpson ties that have a maximum impact of 5/16"<br>JS: detail pertaining to through-bolts (versus welded bolts)<br>JCS requires direction from F&P | | | | | |

## MEP

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|

## Schedule

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|

| | | | | | | |
|---|---|---|---|---|---|---|
| 6.1 | 1 | Two Week Look Ahead | Justin Shaw **(JCS Construction Group, Inc.)** | | | Open |
| | **Description:**<br>Review two week look ahead. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Woodard and Curran conferenced in: SSDS pit is not yet on schedule. JCS just got the required information from the structural engineer and will put a schedule together.<br>Schedule: JCS will redo two-week look ahead now that we have some structural direction from F&P. Backfilling, plumbing, electrical underground, drainage, concrete and anchor bolt repairs are ongoing; we will schedule surveyors and inspections as soon as possible | | | | | |

## Civil

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 7.2 | 9 | For Construction Drawings | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>JCS has yet to receive Civil drawings For Construction. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Hernan has yet to respond to the question of DOB-approved electrical drawings. JCS is still waiting on civil, landscaping, structural, landscaping or electrical. The title block sheet still does not accurately reflect the current drawings. JG called Hernan during the meeting with no response. | | | | | |
| 7.3 | 12 | Front Driveway | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Additional/Changes to Design and Scope | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Front drive: JS would like to buy all hardscape material in one shot. JS requests entry driveway plans (based on potential exterior changes) to determine how to set up the site. Would be ideal to work our way out of the site so that after steel goes up we can set grades, JCS needs to know what height to set the grade.<br>The proposed changes need to be approved by PDC, the cost needs to be approved by Eric. JG to do tissue sketch, for which Hart Howerton is not responsible because this is a landscape and civil drawing change and this all going to cost more money. No catch basins in the way if we open up the bottom. Bag drop, extra electrical and all of the stuff that is not currently on drawings, which JR and JG advised Eric would be an extra charge.<br>JS inquired how we will be proceeding with these types of changes: are we doing drawings, are we doing RFIs, are we doing things on the fly? JG says that he will draw a tissue sketch to give to PDC prior to spending the money to reengineer.<br>Per conversation between JS & F&P, JCS will submit based on plans and then modify the submittals based on site conditions. Submittals to be marked up after the fact. | | | | | |
| 7.4 | 12 | Pro Shop | | | | Open |
| | **Description:**<br>Interior Design | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Terry Young working between Gia and Tanya on the fixture and retail needs of the design of the Pro-Shop. The current floor plan is the only For Construction drawing of the Pro Shop, and Ownership bought JCS based on installing all the perimeter fixtures in the POS station. Plan is to have a combination of metal and millwork. The metal supplier is one that TY/GS have worked with previously on other Pro Shops. The concept involves freestanding millwork that anchors on the wall, going about 12' high, discussing potential of | | | | | |

| | |
|---|---|
| | a rolling ladder going across a fixed shelf at about 8' and another 4' of shelving on top of that. Fixture finish still to be determined. Per JG, we cannot go over the dollar value assigned to the Pro Shop without GS going in front of Eric and requesting additional funds.<br><br>JCS' scope includes anything that would be attached to a wall and the cash wrap station. Free standing floor fixtures are predominantly metal with the exception of wooden tables. This metal is not in JCS' scope. Integrated millwork that attaches to the wall with some flexibility. TY can send drawings. TY had been working with JF at JCSMS, who has the original schematic drawings for the Pro Shop which was designed to look like the Bar. Interior design team to simplify the details but use the same wood.<br><br>Would be ideal to have JCS build the millwork component. JF's perimeter drawings to be the driving force of design and construction, TY to insert what he wants into these Millwork shop drawings, rather than the opposite. JG to be cc'd on all correspondence. TY/GS' drawings for Interior Layout and elevations are almost complete for this. Eric would not want the mirrors cladded on the columns in the Pro Shop to obscure the view. Cladding Columns in white raised millwork panels. TY to provide JF with any details and dimensions that he would need to input into his drawings. |

## Parks

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 1.1 | 8 | Exterior Changes | Joe Roediger | | | Open |
| | **Description:** Ownership is responsible for getting all changes approved by City Hall and Parks Dept. | | | | | |
| | **Previous Meeting Minutes:** **10/25/2017:** *(None)* | | | | | |
| 1.2 | 11 | Earthwork | Dave Keil **(Maser Consulting P.A.)** | | | Open |
| | **Description:** | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | Compaction tests and Soil test results | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>DK received the shaping materials test results during the meeting. Preliminary glance looks ok. JCS will get report from Maser and forward to W&C | | | | | |
| 1.3 | 13 | Landscape | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>JG brought Sponzilli's the first-round draft of landscape drawing, LP-1. New design will allow for functional, safer traffic flow and increased ADA compliance at driveway. Undecided where the bag drop will be. This drawing has been sent to Ron. On first glance, Joe Conforti of NYC Parks agrees that this is a more functional design but will need to bring it to PDC for formal approval. Trump to take one more step on their end then they will push it back to landscape architect to do a more formal presentation that will then go to PDC. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:** *(None)* | | | | | |

## DEC

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|

## Architectural

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 3.1 | 1 | Submittals | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>Review Submittal Log | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:** *(None)* | | | | | |
| 3.2 | 1 | Bluestone | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>Currently waiting on approved samples. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Back paving area: JCS will not set the catch basin for now, will determine location later. Elevation issue is, as of yet, unresolved. Staging area for carts is undetermined.<br>Exterior changes include: Grill, Bar, Back of Clubhouse/staging area, venting, roof changes and locations, grill is now going underneath the overhang, Horseshoe bar ties into the columns and has been approved by Eric Trump | | | | | |
| 3.3 | 9 | Millwork | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>JCS Millshop requires at least 2 weeks after reciept of control sample and final approved interior drawings in order to create the next round of shops for approval. Upon approval, fabrication will begin. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Exterior bar to be white painted Azek. | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | Wood Finish:<br>Oak control sample provided by GS, Millshop can now provide samples for color selection, which will go to Eric Trump for final approval.<br>• Fire retardant wood will change finish color. Does code for NYC require this? Per GS, she is legally required to write this in her specs, but it just has to abide by local code. Whoever is doing the case goods will figure that out. Per JS and JS, because the building is sprinklered this is unnecessary.<br>• Interior designer no longer wants walnut, does not care what species it is, defers to JG<br>Plain sawn white oak stained to match color of sample given to JCS, whichever species of wood doesn't matter to GS. GS wants full grain. Will not be going with full fill, so the specs provided will be revised and distributed by EOD. Once GS determines spec, this will be the control sample for all wood. | | | | | |
| 3.5 | 13 | Stone Tops | Giavona Sullivan **(The Trump Organization)** | | | Open |
| | **Description:**<br>There is no extra material at Ivanka's. GS brought with her the Calcutta stone sample.<br>Per JG, Breccia being held in Italy for the locker rooms.<br>GS rejected the 2 synthetic marble samples provided by JG. Synthetic is a quartz material, considerably cheaper, durable, doesn't have the salt and peppering that one gets with Calcutta, considerably cheaper alternative. Outdoor stone/Marble spec would be used for front bar, back bar, cash wrap/check-in, all tops in pro-shop. JG's concern is the durability. GS suggests a protective membrane, but this will peel over time. GS will initial the Calcutta. Chip in marble is a safety/liability. GS prefers waterfall edge if she can get ET to approve. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:** *(None)* | | | | | |
| 3.6 | 13 | Chandeliers/Fixtures | | | | Open |
| | **Description:**<br>GS received sections from HH and measured chandeliers to fit 18' ceilings.<br>Ballroom ceilings and Grill Room ceilings are 18'.<br>Hang chandeliers on highest coffer/beam of the ceilings<br>Specified chandeliers are $15K per quote acquired by Melissa Noto and weigh 750 lbs. The trusses will not support this weight. The flat ceilings in the pro shop can support the weight but the ceilings in the other locations may not.<br>176 lbs (3x) Chandeliers will come with a threaded rod, secure with air craft cable to prevent the fixture from coming loose. Spread a Kindorf inside a gem box, threaded rod through the gem box and run the aircraft cable with the wires into the ceiling.<br>GS spoke to Isabella at HH who confirmed that HH is not contracted to do any interior fit out work, as per plans and specs, so there are no RCPs.<br>JF has created the roof and ceiling details.<br>Interior columns are big enough to hang chandeliers, all they need to be is big enough to hold a gem box.<br>Pro Shop chandeliers to be Schonbek.<br>Need to have a section in the ceiling that is removable so that the HVAC equipment can be accessed as needed.<br>Per JG, instead of an access panel, Justin will design something that can come apart fairly easily so that it doesn't impact the location of the fixtures. This fixture will be 60" by 60" by 60". | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:** *(None)* | | | | | |
| 3.7 | 13 | Coordination PLans | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Since HH isn't contracted to do elevations, the Millwork shop drawings show the locations and look of the crown moldings which were sent to GS for approval (still pending, as GS needs to set up Procore account to approve/markup submittals and access all drawings and RFIs). GS to markup Millwork bar shops to reflect the locations and coordination of GFI wired lamps.<br>GS to provide a sample of bar lamp.<br>Per GS/JG, electrical contractor to use millwork drawings as his plans for wiring the GFI at the bar.<br>GS and JCS to create a laundry list of items that need to be specified, and what is needed from either side, as the coordination plans are not in anybody's scope and this has not been talked about.<br>As per their previous experiences in Trump projects, it will fall on GS & JG to get the coordination issues squared away. Submittal workflow will move from RR to JG/GS.<br>GS/JG to sign off on Millwork drawings. Markups to include every detail from epoxy, drink rail, USB ports, etc. | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | **Previous Meeting Minutes:**<br>**10/25/2017:** *(None)* | | | | | |
| 3.8 | 13 | Carpet | Giavona Sullivan **(The Trump Organization)**,<br>John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Carpet installation, GS and JG specify double stick. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:** *(None)* | | | | | |

## Structural

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 4.1 | 13 | Roof Trusses | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>JCS requests additional securing detail on the wood stringers. JCS to send RFI about the Simpson ties that have a maximum impact of 5/16"<br>JS: detail pertaining to through-bolts (versus welded bolts)<br>JCS requires direction from F&P | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Jim Falk sent out drawings for cupola trusses, which JS sent to RR for initial approval. After RR provides feedback, JS will send these out as official. Basically, if we remove the top chord and make them all a 3x8 and then extend it all the way through ad then scab on ½" plywood to make up the difference in the truss width and then gusset the two together then we have at least a full rafter tail on the entire thing, then we don't have to do different connections.<br>Connection detail for plate locations and bolt locations is approximately 4000 holes, and would require framer to shoot the Hilti nails into the steel, mark it, countersink and drill a hole to put a bolt on it. RR said last week to countersink the plate but this is not a viable solution. | | | | | |

## MEP

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|

## Schedule

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 6.1 | 1 | Two Week Look Ahead | Justin Shaw **(JCS Construction Group, Inc.)** | | | Open |
| | **Description:**<br>Review two week look ahead. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Rebar guys didn't show up due to forecasted rain, which will potentially push back Maser's rebar inspection.<br>Still waiting on F&P to release compaction approval. Friday plumbing inspections, Wednesday EAI is starting work | | | | | |

| Civil | | | | | | |
|---|---|---|---|---|---|---|
| **No** | **Meeting Origin** | **Title** | **Assignment** | **Due Date** | **Priority** | **Status** |
| 7.2 | 9 | For Construction Drawings | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>JCS has yet to receive Civil drawings For Construction. | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Hernan has yet to respond to the question of DOB-approved electrical drawings. JCS is still waiting on civil, landscaping, structural, landscaping or electrical. The title block sheet still does not accurately reflect the current drawings. JG and JR called Hernan during 10/18 meeting with no response. | | | | | |
| 7.3 | 12 | Front Driveway | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Additional/Changes to Design and Scope | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Front drive: JS would like to buy all hardscape material in one shot. JS requests entry driveway plans (based on potential exterior changes) to determine how to set up the site. Would be ideal to work our way out of the site so that after steel goes up we can set grades, JCS needs to know what height to set the grade.<br>The proposed changes need to be approved by PDC, the cost needs to be approved by Eric. JG to do tissue sketch, for which Hart Howerton is not responsible because this is a landscape and civil drawing change and this all going to cost more money. No catch basins in the way if we open up the bottom. Bag drop, extra electrical and all of the stuff that is not currently on drawings, which JR and JG advised Eric would be an extra charge.<br>JS inquired how we will be proceeding with these types of changes: are we doing drawings, are we doing RFIs, are we doing things on the fly? JG says that he will draw a tissue sketch to give to PDC prior to spending the money to reengineer.<br>Per conversation between JS & F&P, JCS will submit based on plans and then modify the submittals based on site conditions. Submittals to be marked up after the fact. | | | | | |
| 7.4 | 12 | Pro Shop | | | | Open |
| | **Description:**<br>Interior Design | | | | | |
| | **Previous Meeting Minutes:**<br>**10/25/2017:**<br>Millwork drawings to be reviewed and marked up for approval by GS and JG | | | | | |

### Parks

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 1.1 | 8 | Exterior Changes | Joe Roediger | | | Open |
| | **Description:**<br>Ownership is responsible for getting all changes approved by City Hall and Parks Dept. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>Regarding outdoor grill, we will need to pipe to old location and new location in case PDC says no to proposed plans. Ron to forward files to F&P and then Hernan will get those plans approved by the City. JG does not want to wait for PDC approval before sending these to the city. | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | | | | |
| 1.2 | 11 | Earthwork | Dave Keil **(Maser Consulting P.A.)** | | | Open |
| | **Description:**<br>Compaction tests and Soil test results | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>Everything for W&C has been satisfied. We have fill and compaction approvals, everything soil related has been approved<br>Underslab SSDS piping scheduled for Thursday so if W&C wants to be here they need to have someone onsite to do witness. Maser is going to be present throughout the process. EAI is also laying the pipes. Maser to send out DFPs per usual for Parks & W&C to review.<br>Shaping layer material: Material to be brought in as needed so as not to jam-up the site. Trucking manifest for each load of soil signed by driver, source generator, Maser to sign manifest stating that they did a PID scan and a visual scan. W&C to provide a manifest template to Maser. | | | | | |
| 1.3 | 13 | Landscape | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>JG brought Sponzilli's the first-round draft of landscape drawing, LP-1. New design will allow for functional, safer traffic flow and increased ADA compliance at driveway. Undecided where the bag drop will be. This drawing has been sent to Ron. On first glance, Joe Conforti of NYC Parks agrees that this is a more functional design but will need to bring it to PDC for formal approval. Trump to take one more step on their end then they will push it back to landscape architect to do a more formal presentation that will then go to PDC. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:** *(None)* | | | | | |

## DEC

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|

## Architectural

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 3.1 | 1 | Submittals | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>Review Submittal Log | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:** *(None)* | | | | | |
| 3.2 | 1 | Bluestone | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>Currently waiting on larger samples from the supplier | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:** *(None)* | | | | | |
| 3.3 | 9 | Millwork | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>JCS Millshop requires at least 2 weeks after reciept of control sample and final approved interior drawings in order to create the next round of shops for approval. Upon approval, fabrication will begin. | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>GS' sample is reddish while the inspiration pictures are a darker brown/mocha.<br>Soffit Detail: JG provided a contact for Melton Classics who can cast corbels if necessary. Chuck Hicks: (770) 963-3060 mike@meltonclassics.com<br>Typical Millshop Details: GS' comments Instead of beadboard GS wants V-Groove. Either MDF or poplar board. This can just be flipped over to show the V-Groove. Corbel rejected. JG to review submittals with GS today and get that back to JCS. | | | | | |
| 3.5 | 13 | Stone Tops | Giavona Sullivan **(The Trump Organization)** | | | Open |
| | **Description:**<br>There is no extra material at Ivanka's. GS brought with her the Calcutta stone sample.<br>Per JG, Breccia being held in Italy for the locker rooms.<br>GS rejected the 2 synthetic marble samples provided by JG. Synthetic is a quartz material, considerably cheaper, durable, doesn't have the salt and peppering that one gets with Calcutta, considerably cheaper alternative. Outdoor stone/Marble spec would be used for front bar, back bar, cash wrap/check-in, all tops in pro-shop. JG's concern is the durability. GS suggests a protective membrane, but this will peel over time. GS will initial the Calcutta. Chip in marble is a safety/liability. GS prefers waterfall edge if she can get ET to approve. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>Final specification still needed. | | | | | |
| 3.6 | 13 | Chandeliers/Fixtures | | | | Open |
| | **Description:**<br>GS received sections from HH and measured chandeliers to fit 18' ceilings.<br>Ballroom ceilings and Grill Room ceilings are 18'.<br>Hang chandeliers on highest coffer/beam of the ceilings<br>Specified chandeliers are $15K per quote acquired by Melissa Noto and weigh 750 lbs. The trusses will not support this weight. The flat ceilings in the pro shop can support the weight but the ceilings in the other locations may not.<br>176 lbs (3x) Chandeliers will come with a threaded rod, secure with air craft cable to prevent the fixture from coming loose. Spread a Kindorf inside a gem box, threaded rod through the gem box and run the aircraft cable with the wires into the ceiling.<br>GS spoke to Isabella at HH who confirmed that HH is not contracted to do any interior fit out work, as per plans and specs, so there are no RCPs.<br>JF has created the roof and ceiling details.<br>Interior columns are big enough to hang chandeliers, all they need to be is big enough to hold a gem box.<br>Pro Shop chandeliers to be Schonbek.<br>Need to have a section in the ceiling that is removable so that the HVAC equipment can be accessed as needed.<br>Per JG, instead of an access panel, Justin will design something that can come apart fairly easily so that it doesn't impact the location of the fixtures. This fixture will be 60" by 60" by 60". | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>Final specification still needed. | | | | | |
| 3.7 | 13 | Coordination PLans | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Since HH isn't contracted to do elevations, the Millwork shop drawings show the locations and look of the crown moldings which were sent to GS for approval (still pending, as GS needs to set up Procore account to approve/markup submittals and access all drawings and RFIs). GS to markup Millwork bar shops to reflect the locations and coordination of GFI wired lamps.<br>GS to provide a sample of bar lamp.<br>Per GS/JG, electrical contractor to use millwork drawings as his plans for wiring the GFI at the bar.<br>GS and JCS to create a laundry list of items that need to be specified, and what is needed from either side, as the coordination plans are not in anybody's scope and this has not been talked about.<br>As per their previous experiences in Trump projects, it will fall on GS & JG to get the coordination issues squared away. Submittal workflow will move from RR to JG/GS.<br>GS/JG to sign off on Millwork drawings. Markups to include every detail from epoxy, drink rail, USB ports, etc. | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | **Previous Meeting Minutes:**<br>**11/01/2017:** *(None)* | | | | | |
| 3.8 | 13 | Carpet | John Gruber **(Trump Ferry Point LLC)**,<br>Giavona Sullivan **(The Trump Organization)** | | | Open |
| | **Description:**<br>Carpet installation, GS and JG specify double stick. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>Final specification still needed. | | | | | |

## Structural

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 4.1 | 13 | Roof Trusses | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>JCS requests additional securing detail on the wood stringers. JCS to send RFI about the Simpson ties that have a maximum impact of 5/16"<br>JS: detail pertaining to through-bolts (versus welded bolts)<br>JCS requires direction from F&P | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>Connection detail for the tube steel plate. As it is, we would have to shoot everything 12" on center, countersink, and then drill a main hole through the countersunk hole, which is 3 steps to do a one-step thing. The tops of the beams are okay—they will be bolted. JCS to issue an official RFI pertaining to the tube steel specifically. Staggered 12" on center (per details on S-500.00).<br><br>JCS to obtain 2009 code compliant calculations for the cupula changes from the manufacturer.<br><br>No one is providing the permanent bracing plan, this has not been requested as a submittal form the engineers. | | | | | |

## MEP

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 5.1 | 14 | Plumbing Fixtures | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>JG is meeting with Kohler rep immediately after this meeting to discuss plumbing fixtures. Will be using floor mounted flush valve toilets. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:** *(None)* | | | | | |
| 5.2 | 14 | Plumbing Drawings | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Amended Plumbing drawings need to be signed and sealed and submitted for processing by DOB. Design team needs to bubble changes. | | | | | |

| | |
|---|---|
| | **Previous Meeting Minutes:**<br>**11/01/2017:** *(None)* |

## Schedule

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 6.1 | 1 | Two Week Look Ahead | Justin Shaw **(JCS Construction Group, Inc.)** | | | Open |
| | **Description:**<br>Review two week look ahead. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>Maser spoke to manufacturer of liquid boot who said that the boot can be poured at 35F and rising.<br>JS might try to box the bar and kitchen areas because we need to have that inspected and we cant put the plumbing in for it now until the inspection on Friday so we cannot do the plumbing until Monday. | | | | | |

## Civil

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 7.2 | 9 | For Construction Drawings | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>JCS has yet to receive Civil drawings For Construction. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>Hernan Rojas brought a set of drawings stamped by the DOB. DOB does not require stamped electrical drawings onsite because the electrician files his own plans with the DOB and pulls his own permits with the city, which are then approved separately from the rest of the drawings/scope.<br>Sprinkler, Public Assembly and Fire Alarm to be filed separately.<br>Whatever civil drawings we may have were a part of the original drawings that included a basement. These plans have changed since we received approval from DOB, JG to determine how to go about having the revisions approved/submitted.<br>Still need Structural and Civil from HR.<br>Two-week turn around for drawings that have not been received by the DOB. Steel erection is scheduled for the 15th and inspections will need to be called in for the end of the month.<br>Civil, structural, plumbing, electrical, sprinkler, HVAC. RR to print the full-sized set and bill JR from the electronic copy HR sent to JR. | | | | | |
| 7.3 | 12 | Front Driveway | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Additional/Changes to Design and Scope | | | | | |
| | **Previous Meeting Minutes:**<br>**11/01/2017:**<br>JR and JG to go over the exterior redesign one more time, incorporating ET's comments and then have Sponzilli redraw it. Need to create some kind of podium and determine the material (wood frame vs. masonry, canvas vs. hard roof?) and location. Need to bring power and communications out there, where IT closet is currently located, put two 2" adjacent to that and bring it out to podium from there for lighting, computer and maybe heating. Maybe need 2-3 circuits. | | | | | |
| 7.4 | 12 | Pro Shop | | | | Open |
| | **Description:**<br>Interior Design | | | | | |

| | |
|---|---|
| | **Previous Meeting Minutes:**<br>**11/01/2017:** *(None)* |

### Parks

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 1.1 | 8 | Exterior Changes | Joe Roediger | | | Open |

**Description:**
Ownership is responsible for getting all changes approved by City Hall and Parks Dept.

**Previous Meeting Minutes:**

**11/15/2017:**
Final package of rear outside changes have been sent to Parks, the front has not been submitted to Parks.\

| | | | | | | |
|---|---|---|---|---|---|---|
| 1.2 | 11 | Earthwork | Dave Keil **(Maser Consulting P.A.)** | | | Open |
| | **Description:**<br>Compaction tests and Soil test results | | | | | |
| | **Previous Meeting Minutes:**<br>**11/15/2017:**<br>Maser to continue to send erosion control reports along with DFRs.<br>W&C and Maser have not received the letter from F&P.<br>W&C owes Maser templates for soil manifests. Soil not needed onsite at this time. Will be delivered as needed.<br>Maser's reports on SSDS should continue to document any and all deviations from drawings, re3dline drawings/as-builts. Sign off on deviations from F&P as the original designer of the SSDS. This will be in the cert report but it is not something that Maser is certifying.<br>JG and DK to coordinate this with F&P. | | | | | |
| 1.3 | 13 | Landscape | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>JG brought Sponzilli's the first-round draft of landscape drawing, LP-1. New design will allow for functional, safer traffic flow and increased ADA compliance at driveway. Undecided where the bag drop will be. This drawing has been sent to Ron. On first glance, Joe Conforti of NYC Parks agrees that this is a more functional design but will need to bring it to PDC for formal approval. Trump to take one more step on their end then they will push it back to landscape architect to do a more formal presentation that will then go to PDC. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/15/2017:**<br>ET is going to be onsite on Friday. JS can meet with ownership and ET to discuss location of transformer in relation to the turning circle and associated elevations. | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | **Description:**<br>JCS Millshop requires at least 2 weeks after reciept of control sample and final approved interior drawings in order to create the next round of shops for approval. Upon approval, fabrication will begin. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/15/2017:**<br>Interior millwork sample of flat-sawn ash has an open cathedral grain and, per JG, looks similar to the furniture used throughout other Trump properties so will mostly be approved. | | | | | |
| 3.5 | 13 | Stone Tops | Giavona Sullivan **(The Trump Organization)** | | | Open |
| | **Description:**<br>There is no extra material at Ivanka's. GS brought with her the Calcutta stone sample.<br>Per JG, Breccia being held in Italy for the locker rooms.<br>GS rejected the 2 synthetic marble samples provided by JG. Synthetic is a quartz material, considerably cheaper, durable, doesn't have the salt and peppering that one gets with Calcutta, considerably cheaper alternative. Outdoor stone/Marble spec would be used for front bar, back bar, cash wrap/check-in, all tops in pro-shop. JG's concern is the durability. GS suggests a protective membrane, but this will peel over time. GS will initial the Calcutta. Chip in marble is a safety/liability. GS prefers waterfall edge if she can get ET to approve. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/15/2017:**<br>Final specification still needed. | | | | | |
| 3.6 | 13 | Chandeliers/Fixtures | | | | Open |
| | **Description:**<br>GS received sections from HH and measured chandeliers to fit 18' ceilings.<br>Ballroom ceilings and Grill Room ceilings are 18'.<br>Hang chandeliers on highest coffer/beam of the ceilings<br>Specified chandeliers are $15K per quote acquired by Melissa Noto and weigh 750 lbs. The trusses will not support this weight. The flat ceilings in the pro shop can support the weight but the ceilings in the other locations may not.<br>176 lbs (3x) Chandeliers will come with a threaded rod, secure with air craft cable to prevent the fixture from coming loose. Spread a Kindorf inside a gem box, threaded rod through the gem box and run the aircraft cable with the wires into the ceiling.<br>GS spoke to Isabella at HH who confirmed that HH is not contracted to do any interior fit out work, as per plans and specs, so there are no RCPs.<br>JF has created the roof and ceiling details.<br>Interior columns are big enough to hang chandeliers, all they need to be is big enough to hold a gem box.<br>Pro Shop chandeliers to be Schonbek.<br>Need to have a section in the ceiling that is removable so that the HVAC equipment can be accessed as needed.<br>Per JG, instead of an access panel, Justin will design something that can come apart fairly easily so that it doesn't impact the location of the fixtures. This fixture will be 60" by 60" by 60". | | | | | |
| | **Previous Meeting Minutes:**<br>**11/15/2017:**<br>Final specification still needed. | | | | | |
| 3.7 | 13 | Coordination PLans | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Since HH isn't contracted to do elevations, the Millwork shop drawings show the locations and look of the crown moldings which were sent to GS for approval (still pending, as GS needs to set up Procore account to approve/markup submittals and access all drawings and RFIs). GS to markup Millwork bar shops to reflect the locations and coordination of GFI wired lamps.<br>GS to provide a sample of bar lamp.<br>Per GS/JG, electrical contractor to use millwork drawings as his plans for wiring the GFI at the bar.<br>GS and JCS to create a laundry list of items that need to be specified, and what is needed from either side, as the coordination plans are not in anybody's scope and this has not been talked about.<br>As per their previous experiences in Trump projects, it will fall on GS & JG to get the coordination issues squared away. Submittal workflow will move from RR to JG/GS.<br>GS/JG to sign off on Millwork drawings. Markups to include every detail from epoxy, drink rail, USB ports, etc. | | | | | |

| | | | | | | |

| | **Previous Meeting Minutes:**<br>**11/15/2017:** *(None)* | | | | | |
| 3.8 | 13 | Carpet | Giavona Sullivan **(The Trump Organization)**,<br>John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Carpet installation, GS and JG specify double stick. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/15/2017:**<br>Final specification still needed. | | | | | |

## Structural

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 4.1 | 13 | Roof Trusses | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:**<br>JCS requests additional securing detail on the wood stringers. JCS to send RFI about the Simpson ties that have a maximum impact of 5/16"<br>JS: detail pertaining to through-bolts (versus welded bolts)<br>JCS requires direction from F&P | | | | | |
| | **Previous Meeting Minutes:**<br>**11/15/2017:**<br>Cupula framing issue: everything aesthetic solution that JCS sends to design team as a means of remedying the off-center rafters is returned with an off-center structural review/notes. Original design didn't work, new designs work from a structural standpoint but not aesthetic. JCS submitted an on-center option. Truss manufacturer will not certify trusses that are not designed by their team. | | | | | |

## MEP

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 5.1 | 14 | Plumbing Fixtures | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>JG is meeting with Kohler rep immediately after this meeting to discuss plumbing fixtures. Will be using floor mounted flush valve toilets. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/15/2017:**<br>Plumbing fixtures will be left in warehouse and delivered to site in JCS' care as needed. | | | | | |
| 5.2 | 14 | Plumbing Drawings | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Amended Plumbing drawings need to be signed and sealed and submitted for processing by DOB. Design team needs to bubble changes. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/15/2017:** *(None)* | | | | | |

## Schedule

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 6.1 | 1 | Two Week Look Ahead | Justin Shaw **(JCS Construction Group, Inc.)** | | | Open |
| | **Description:** Review two week look ahead. 3-4 Weeks | | | | | |
| | **Previous Meeting Minutes:** **11/15/2017:** Liquid boot installation has begun. Boot, pouring back slab and wall adjacent to the loading dock, steel tentatively still schedule for next week. Rest of the slab is still scheduled for next week as well, along with all stairs but pouring the ramps is on hold due to potential changes in elevations. Assume the back grade is not changing, although JR might want to change it, Grades still not established for cart paths to be installed per JG 11/14/17 Wood framing is ongoing. There will potential hold ups if submittals are not reviewed and returned by the proper parties in a timely fashion. | | | | | |

## Civil

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 7.2 | 9 | For Construction Drawings | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Description:** JCS has yet to receive Civil drawings For Construction. | | | | | |
| | **Previous Meeting Minutes:** **11/15/2017:** *(None)* | | | | | |
| 7.3 | 12 | Front Driveway | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:** Additional/Changes to Design and Scope | | | | | |
| | **Previous Meeting Minutes:** **11/15/2017:** JR and JG to go over the exterior redesign one more time, incorporating ET's comments and then have Sponzilli redraw it. Need to create some kind of podium and determine the material (wood frame vs. masonry, canvas vs. hard roof?) and location. Need to bring power and communications out there, where IT closet is currently located, put two 2" adjacent to that and bring it out to podium from there for lighting, computer and maybe heating. Maybe need 2-3 circuits. | | | | | |
| 7.4 | 12 | Pro Shop | | | | Open |
| | **Description:** Interior Design | | | | | |
| | **Previous Meeting Minutes:** **11/15/2017:** *(None)* | | | | | |

## Parks

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 1.1 | 8 | Exterior Changes | Joe Roediger | | | Open |

**Description:**
Ownership is responsible for getting all changes approved by City Hall and Parks Dept.

**Previous Meeting Minutes:**

**11/29/2017:**
Front entrance was discussed. RR to add his notes for JG to submit to ET. Sponzilli to provide an updated CAD drawing and F&P to modify grades. RR to coordinate.
RR to provide revised locations and details on railing, ramps, stairs based on PDC comments.

| | | | | | | |
|---|---|---|---|---|---|---|
| | Trump to determine how to screen windows, how to proceed with exterior bar glazing.<br>Trump to determine access to septic tank, ejector pump | | | | | |
| 1.2 | 11 | Earthwork | Dave Keil **(Maser Consulting P.A.)** | | | Open |
| | **Description:**<br>Compaction tests and Soil test results | | | | | |
| | **Previous Meeting Minutes:**<br>**11/29/2017:**<br>DK to send a copy of his working manifest to W&C for review and approval since it doesn't look like W&C will be able to provide in time. | | | | | |
| 1.3 | 13 | Landscape | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>JG brought Sponzilli's the first-round draft of landscape drawing, LP-1. New design will allow for functional, safer traffic flow and increased ADA compliance at driveway. Undecided where the bag drop will be. This drawing has been sent to Ron. On first glance, Joe Conforti of NYC Parks agrees that this is a more functional design but will need to bring it to PDC for formal approval. Trump to take one more step on their end then they will push it back to landscape architect to do a more formal presentation that will then go to PDC. | | | | | |
| | **Previous Meeting Minutes:**<br>**11/29/2017:** *(None)* | | | | | |

## DEC

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |

Fiona Rooney Sent Tue Feb 6, 2018 at 08:46 am EST
Please advise on the status of the lighting plan:

**Q:**
Interior:
Lighting detail for blacked out windows
Sconces
Ceiling-mounted fixtures

Exterior: Bollards
Uplighting on building facade

**Q:** Mark Smithson Sent Fri Jan 26, 2018 at 10:46 am EST
Please provide detail for the cross section in the 4 locations.

**A:** Ron Rainone (Hart Howerton) Responded Tue Jan 30, 2018 at 10:02 pm UTC
See attached sketches for the requested Dining Room Ceiling Details. Work these details with submittal package 46.2 provided by JCS.

**Q:** Justin Shaw Sent Fri Dec 8, 2017 at 12:03 pm EST
At yesterday's meeting a chandelier hanging from cupola was discussed as was mounting of a camera outside on the top. I believe both of these will need to be detailed and cleared by structural engineer.

**A:** Justin Shaw (JCS Construction Group, Inc.) Responded Fri Dec 8, 2017 at 10:59 pm UTC
These details will need to be provided by Owner and this RFI shall remain open until it is completed. Thanks

**A:** Ron Rainone (Hart Howerton) Responded Fri Dec 8, 2017 at 09:50 pm UTC
Please provide sketch of desired location of chandelier, hanging type and whether it will be on a motor (otherwise forget about changing bulbs). Also provide fixture product cut, dimensions and weight. The camera detailing is not our dicipline and needs to be done by A/V or security vendor.

**Q:** Justin Shaw Sent Tue Nov 7, 2017 at 04:05 pm EST
Please provide a connection detail from the C joists to the metal framing for the upper roof area.

**A:** Justin Shaw (JCS Construction Group, Inc.) Responded Wed Dec 6, 2017 at 06:23 pm UTC
I mean bar room ceiling.

**A:** Ron Rainone (Hart Howerton) Responded Fri Nov 10, 2017 at 05:26 pm UTC
See attached response from structural engineer.

## Schedule

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 6.1 | 1 | Two Week Look Ahead | Justin Shaw **(JCS Construction Group, Inc.)** | | | Open |
| | **Description:**<br>Review two week look ahead. | | | | | |
| | **Previous Meeting Minutes:**<br>**02/21/2018:** *(None)* | | | | | |
| 6.2 | 26 | Schedule Delay | John Gruber **(Trump Ferry Point LLC)**,<br>Giavona Sullivan **(The Trump Organization)** | 02/ 01/ 2018 | High | Open |
| | **Previous Meeting Minutes:**<br>**02/21/2018:** | | | | | |

| | |
|---|---|
| | All open change orders and lack of approvals on the follow will incur corresponding schedule delays:<br>Interior doors package<br>Dining room ceiling<br>Bar<br>Lighting plan: JG to send comprehensive delineation of the lighting plan scope by TO and JCS. Including specs for recessed downlights. Which fixtures are by owner? Does the quantity stay the same? Added lights will be $105/recessed and $70/box labor if TO provides fixture.<br><br>According to JG, the plan is to hold all change orders until the team has one, comprehensive change order "package" (ie: HVAC, doors, millwork, PDC exterior package, lighting plan, etc) to present to ET for approval. As pointed out by JR, this desire to adhere to protocol will exacerbate delays in schedule |

## Civil

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 7.1 | 9 | For Construction Drawings | Ron Rainone **(Hart Howerton)** | | | Open |
| | **Previous Meeting Minutes:**<br>**02/21/2018:**<br>Due to open Exterior PDC submission, JCS has yet to receive Civil drawings For Construction and final Grades are still not established | | | | | |
| 7.2 | 12 | Front Driveway | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Description:**<br>Additional/Changes to Design and Scope | | | | | |
| | **Previous Meeting Minutes:**<br>**02/21/2018:**<br>Due to open Exterior PDC submission, JCS has yet to receive these drawings for Construction/Pricing. | | | | | |
| 7.3 | 27 | Telecom | John Gruber **(Trump Ferry Point LLC)** | 02/ 21/ 2018 | | Open |
| | **Description:**<br>Earthwork | | | | | |
| | **Previous Meeting Minutes:**<br>**02/21/2018:**<br>Backcharge for damage to conduit to be backcharged to Atlas. JCS received one of two invoices for the BC. Credit to be issued through PCCO.<br>American Integrated Security Group was in attendance to discuss the radar at cupola and consult on suggested means of pricing, powering and installing this item.<br>Lightning Protection is desired by TO and requires the use of the highest point, which is the desired location for the radar due to maximum visibility, but the lightning Protection is pointless if not at peak.<br>Is threaded rod enough support for lightning protection? | | | | | |

## Change Orders

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 8.2 | 20 | PCCO #012 | John Gruber **(Trump Ferry Point LLC)** | 01/ 02/ 2018 | High | Open |

### Parks

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 1.1 | 8 | Exterior Changes | Joe Roediger | | | Open |

**Previous Meeting Minutes:**

**03/29/2018:**
03/14/18:
Approved by PDC
JCS needs the placement for slab and stone at the gazebo now in order to install pull box from the planting bed for conduit now
What is the cover detail for planting bed?
Pre-package top soil does not require testing.
Backfill with shaping layer to sub grade of -1ft, pour 1ft sand on top of that, dig a 2x2 hole and backfill with bagged material to top of sand does not require Maser or IEM present, W&C requests heads up to be in compliance with Parks requirements.

### Parks

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |
|---|---|---|---|---|---|---|
| 1.1 | 8 | Exterior Changes | Joe Roediger | | | Open |
| | **Previous Meeting Minutes:**<br>**05/16/2018:** *(None)* | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | **TREX**<br>RR to determine if the standard 36" Trex railings can be used instead of the specified 42" height. RR responded saying that the conditions as built do not require the 42" rail by code so the 36" stock railing kits are acceptable. | | | | | |
| 3.2 | 9 | Millwork | Ron Rainone **(Hart Howerton)** | | | On Hold |
| | **Description:**<br>JCS Millshop requires at least 2 weeks after receipt of control sample and final approved interior drawings in order to create the next round of shops for approval. Upon approval, fabrication will begin. | | | | | |
| | **Previous Meeting Minutes:**<br>**05/16/2018:** *(None)* | | | | | |
| 3.3 | 19 | Exterior Door Hardware | Giavona Sullivan **(The Trump Organization)** | | | Open |
| | **Previous Meeting Minutes:**<br>**05/16/2018:**<br>Exterior lanterns, shower seats, grab bars are all onsite. Plumbing trim not delivered but is avail. All Interior hardware by Omni including closers are due Thursday or Friday. Exterior is mainly push-pulls, mortise locks and closers and are being delivered in the next couple of days. Carpenters to install four hinges per the metal doors. JG to check on Von Dubran. | | | | | |
| 3.4 | 23 | Attic Windows | Ron Rainone **(Hart Howerton)** | 01/ 31/ 2018 | | Open |
| | **Description:**<br>See RFI #64 | | | | | |
| | **Previous Meeting Minutes:**<br>**05/16/2018:**<br>The window treatments for the blackout windows: curtains have been installed, JG to put up a temporary light to determine how to proceed with permanent fixtures but will likely proceed with porcelain socket.=. This item will remain open until Mock-up of Window Blackout detail is complete: there is no lighting behind the windows AS YET due to absence of any lighting plan, RCP, energy calculations etc.<br><br>Per JG, we can add the lights at a later date because we do not need the attic windows illuminated right away and once we get the approval we can proceed | | | | | |
| 3.5 | 39 | Masonry | John Gruber **(Trump Ferry Point LLC)** | | | Open |
| | **Previous Meeting Minutes:**<br>**05/16/2018:**<br>Bluestone Patio:<br>Exterior Landscape, siding grading, seams of the bluestone needs to get cut and ground down.<br>MC does not like the bluestone installation because of the irregular, thickness of the seams and surfaces, etc.; this couldn't be helped because of the nature of the source from which the stone was quarried. Seams need to be sawed down.<br>Masons to cut the thickness of the stone down (and hadn't been onsite due to 90% thunderstorms predicted). | | | | | |
| 3.6 | 39 | Carpentry | | | | Open |
| | **Description:**<br>Window Trim detail: The reveal is approved, mockup was poor, lack of consistency on the trim dimensions look odd (1x4 all the way around and then a stool with the 1x2 and 1x6). The TO should provide a trim detail. Carpenters need to tighten up their miters. | | | | | |

| | |
|---|---|
| | **Description:**<br>Sprinkler and Duct are the only trades that need to be working overtime/making use of extended hours HVAC equipment to be delivered to site before 5/18/2018. Bentzi to do layout when equipment,<br>Regarding the hatch above the mezzanine, since this is not a coordinated design by the engineers, will need to be laid out on the mezzanine and lasered up to determine locations of mechanical equipment on roof.<br>Kitchen equipment can be delivered, preformed metal curbs to sit on EPDM<br>Hatch in Proshop (JCS doesn't have detail for this, how does TO want this done? Previously discussed option of not doing the roof hatch and cutting the roof as needed if we need to get equipment out. Need to cut a 4x5 hole to get the equipment in, so the same hole would serve to remove the equipment as needed later on, but this would also result in an enormous hole in the ceiling and they do not make 5x5 access panels that are attractive for this purpose.<br>Perhaps JCS can fabricate a custom access panel for the oversized hatch door? |
| | **Previous Meeting Minutes:**<br>**05/16/2018:** *(None)* |

## Schedule

| No | Meeting Origin | Title | Assignment | Due Date | Priority | Status |

# HC Case Narrative

**Client:** Maser Consulting
**Project:** Trump Links

**HC Project:** 8081617

*This case narrative is in the form of an exception report. Method specific and/or QA/QC anomalies related to this report only are detailed below.*

## Volatile Organic Analysis:

Methylene chloride was recovered in sample AD05999-001 due to possible laboratory contamination.

The Method Blank Spike for batch 70991 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

The Matrix Spike and Matrix Spike Duplicate for batch 70991 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

## TCLP Volatile Organic Analysis:

The Method Blank Spike for batch 70993 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

The MS/MSD RPD, Matrix Spike and Matrix Spike Duplicate for batch 70993 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

## Base Neutral/Acid Extractable Analysis:

The Method Blank Spike for batch 69957 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

The MS/MSD RPD, Matrix Spike and Matrix Spike Duplicate for batch 69957 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

## PCB Analysis:

Data conforms to method requirements.

## Pesticide Analysis:

Data conforms to method requirements.

## Herbicide Analysis:

Data conforms to method requirements.

## Metals Analysis:

The Matrix Spike and Matrix Spike Duplicate for batches 70604 and 70605 had recoveries outside QC limits. Please refer to the applicable Form 5/7 for the recoveries.

The RPD between the QC sample and the Method Replicate had recoveries outside QC limits in batch 70604. Please refer to the applicable Form 6/9 for the recoveries.

The serial dilution for batches 70604 and 70605 is outside QC limits for one or more analytes. Please refer to the applicable Form 6/9 for the recoveries.

## TCLP Metals Analysis:

Data conforms to method requirements.

## Wet Chemistry Analysis:

Data conforms to method requirements.

## Subcontracted Analysis:

Please refer to attached subcontracted laboratory report. Sample AD05999-001 was submitted to Pace Analytical for TCDD Scan (1613) analysis and PCDD/PCDF (8290) analysis.

Please refer to attached subcontracted laboratory report. Sample AD05999-001 was submitted to TestAmerica for Parathion (8141) analysis.

# HC Reporting Limit Definitions/Data Qualifiers

## REPORTING DEFINITIONS

**DF** = Dilution Factor

**MDL** = Method Detection Limit

**RL*** = Reporting Limit

**ND** = Not Detected

**RT** = Retention Time

**NA** = Not Applicable

**Samples with elevated Reporting Limits (RLs) as a result of a dilution may not achieve client reporting limits in some cases. The elevated RLs are unavoidable consequences of sample dilution required to quantitate target analytes that exceed the calibration range of the instrument.*

## DATA QUALIFIERS

**A-** Indicates that the Tentatively Identified Compound (TIC) is suspected to be an aldol-condensation product. These compounds are by-products of acetone and methylene chloride used in the extraction process.

**B-** Indicates analyte was present in the Method Blank and sample.

**d-** For Pesticide and PCB analysis, the concentration between primary and secondary columns is greater than 40%. The lower concentration is generally reported.

**E-** Indicates the concentration exceeded the upper calibration range of the instrument.

**J-** Indicates the value is estimated because it is either a Tentatively Identified Compound (TIC) or the reported concentration is greater than the MDL but less than the RL. For samples results between the MDL and RL there is a possibility of false positives or misidentification at the quantitation levels. Additionally, the acceptance criteria for QC samples may not be met.

**R-** Retention Time is out.

**Y-** Indicates a contaminant found in the blank at less than 10% of the concentration of a contaminant found in the sample.

**Additional Notes**

**Comments, Notes, Special Requirements, HAZARDS**

Indicate if low-level methods required to meet current groundwater standards (SPLP for soil):
- [ ] BN or BNA (8270D SIM)
- [ ] VOC (8260C SIM or 8011)
- [ ] SPLP (BN, BNA, Metals)
- [ ] 1,4 Dioxane

For NJ LSRP projects, indicate which standards need to be met:
- [ ] NJDEP GWQS
- [ ] NJDEP SRS
- [ ] NJDEP SPLP
- [ ] Other (specify):

Check if applicable:
- [ ] Project-Specific Reporting Limits
- [ ] High Contaminant Concentrations
- [ ] NJ LSRP Project (also check boxes above/right)

Cooler Temperature: 2.3°

Please note NUMBERED items. If not completed your analytical work may be delayed.
A fee of $5/sample will be assessed for storage should sample not be activated for any analysis.

Internal use: sampling plan (check box) HC [ ] or client [ ] FSP#

# CONDITION UPON RECEIPT

Batch Number AD05999 Entered By: Frantz
Date Entered 8/16/2018 1:07:00 PM

| | | |
|---|---|---|
| 1 | Yes | Is there a corresponding COC included with the samples? |
| 2 | Yes | Are the samples in a container such as a cooler or Ice chest? |
| 3 | No | Are the COC seals intact? |
| 4 | T0056 | <--- Thermometer ID. Please specify the Temperature inside the container (in degC).<br>3.3 |
| 5 | Yes | Are the samples refrigerated (where required)/have they arrived on ice? |
| 6 | Yes | Are the samples within the holding times for the parameters listed on the COC? IF no, list parameters and samples: |
| 7 | Yes | Are all of the sample bottles intact? If no, specify sample numbers broken/leaking |
| 8 | Yes | Are all of the sample labels or numbers legible? If no specify: |
| 9 | Yes | Do the contents match the COC? If no, specify |
| 10 | Yes | Is there enough sample sent for the analyses listed on the COC? If no, specify: |
| 11 | Yes | Are samples preserved correctly? |
| 12 | Yes | Was temperature blank present (Place comment below if not)? If not was temperature of samples verified? |
| 13 | NA | Other comments ...Specify |
| 14 | NA | Corrective actions (Specify item number and corrective action taken). |

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration usea*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

*Flags*

*a - failed the min rf criteria*

*c - failed the minimum correlation coeff criteria(if applicable)*

*Note:* Avg Rsd: 7.36

*Corr 1 = Correlation Coefficient for linear Eq.*

*Corr 2 = Correlation Coefficient for quad Eq.*

*Fit = Indicates whether Avg RF, Linear, or Quadratic Curve was used for compound.*

**Internal Standard Areas**

Upper Limit = + 100% of internal standard area from daily cal or mid pt.

Lower Limit = - 50% of internal standard area from daily cal or mid pt.

**Flags:**

A - Indicates the compound failed the internal standard area criteria

R - Indicates the compound failed the internal standard retention time criteria.

**Retention Times:** Limit = within +/- 0.5 min of internal standard retention time from the daily cal or mid pt.

*Flags*

*a - failed the min rf criteria*

*c - failed the minimum correlation coeff criteria(if applicable)*

*Note:* Avg Rsd: 10.4

*Corr 1 = Correlation Coefficient for linear Eq.*

*Corr 2 = Correlation Coefficient for quad Eq.*

*Fit = Indicates whether Avg RF, Linear, or Quadratic Curve was used for compound.*

*Flags*

*a - failed the min rf criteria*

*c - failed the minimum correlation coeff criteria(if applicable)*

*Note:* Avg Rsd: 10.4

*Corr 1 = Correlation Coefficient for linear Eq.*

*Corr 2 = Correlation Coefficient for quad Eq.*

*Fit = Indicates whether Avg RF, Linear, or Quadratic Curve was used for compound.*

Method: EPA 8260C

**Internal Standard Areas**

Upper Limit = + 100% of internal standard area from daily cal or mid pt.

Lower Limit = - 50% of internal standard area from daily cal or mid pt.

**Flags:**

A - Indicates the compound failed the internal standard area criteria

R - Indicates the compound failed the internal standard retention time criteria.

**Retention Times:** Limit = within +/- 0.5 min of internal standard retention time from the daily cal or mid pt.

Worksheet # 477023 **Total Target Concentration** 0 ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration used*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

**Internal Standard Areas**

Upper Limit = + 100% of internal standard area from daily cal or mid pt.

Lower Limit = - 50% of internal standard area from daily cal or mid pt.

**Flags:**

A - Indicates the compound failed the internal standard area criteria

R - Indicates the compound failed the internal standard retention time criteria.

**Retention Times:** Limit = within +/- 0.5 min of internal standard retention time from the daily cal or mid pt.

***Flags***

c - failed the initial calibration criteria(if applicable)

***Note:***

Col = Column Number
Mr = MultiPeak Analyte 0=single peak analyte, >0=multi peak analyte (i.e. pcb/chlordane etc.)
Fit = Indicates whehter Avg RF, Linear, or Quadratic Curve was used for compound
Corr 1 = Correlation Coefficient for linear Eq.
Corr 2 = Correlation Coefficient for quad Eq.

All Response Factors = Response Factors / 10000
Initial Calibration Criteria: either %RSD <=20 or Corr >= .995
Columns: Signal #1 db-1701 ; Signal #2 db-608

^Lvl: These compounds use a single pt calibration as specified by the method. The file used to update this calibration point is listed in the header under level #

# Form 6

Worksheet #: 477243

***Total Target Concentration*** 0

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration used*

*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

***Flags***

c - failed the initial calibration criteria(if applicable)

***Note:***

Col = Column Number
Mr = MultiPeak Analyte 0=single peak analyte, >0=multi peak analyte (i.e. pcb/chlordane etc..)
Fit = Indicates whehter Avg RF, Linear, or Quadratic Curve was used for compound
Corr 1 = Correlation Coefficient for linear Eq.
Corr 2 = Correlation Coefficient for quad Eq.

All Response Factors = Response Factors / 10000
Initial Calibration Criteria: either %RSD <=20 or Corr >= .995
Columns: Signal #1 db-1701 ; Signal #2 db-608

^Lvl: These compounds use a single pt calibration as specified by the method. The file used to update this calibration point is listed in the header under level #

# Form 6
## Initial Calibration

8081617 0147

Method: EPA 8081B

Instrument: GC_5

***Flags***

c - failed the initial calibration criteria(if applicable)

***Note:***

Col = Column Number
Mr = MultiPeak Analyte 0=single peak analyte >0=multi peak analyte (i.e. pcb/chlordane etc..)
Fit = Indicates whehter Avg RF, Linear, or Quadratic Curve was used for compound.
Corr 1 = Correlation Coefficient for linear Eq.
Corr 2 = Correlation Coefficient for quad Eq.

All Response Factors = Response Factors / 10000
Initial Calibration Criteria: either %RSD <=20 or Corr >= .995
Columns: Signal #1 db-1701 : Signal #2 db-608

^Lvl: These compounds use a single pt calibration as specified by the method. The file used to update this calibration point is listed in the header under level #

ORGANICS HERBICIDE REPORT

Sample Number: AD05999-001
Client Id: SS-1
Data File: 12G18748.D
Analysis Date: 08/20/18 13:40
Date Rec/Extracted: 08/16/18-08/17/18
Column: DB-17/1701P 30M 0.32mm ID 0.25um film

Method: EPA 8151A
Matrix: Soil
Initial Vol: 50g
Final Vol: 10ml
Dilution: 1
Solids: 95

**Units: mg/Kg**

| Cas # | Compound | RL | Conc | Cas # | Compound | RL | Conc |
|---|---|---|---|---|---|---|---|
| 93-76-5 | 2,4,5-T | 0.011 | U | 93-72-1 | Silvex | 0.011 | U |
| 94-75-7 | 2,4-D | 0.011 | U | | | | |

Worksheet #: 476800

***Total Target Concentration*** 0

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration used*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

ORGANICS HERBICIDE REPORT

Sample Number: SMB69832
Client Id:
Data File: 12G18744.D
Analysis Date: 08/20/18 12:22
Date Rec/Extracted: NA-08/17/18
Column: DB-17/1701P 30M 0.32mm ID 0.25um film

Method: EPA 8151A
Matrix: Soil
Initial Vol: 50g
Final Vol: 10ml
Dilution: 1
Solids: 100

**Units: mg/Kg**

| Cas # | Compound | RL | Conc | Cas # | Compound | RL | Conc |
|---|---|---|---|---|---|---|---|
| 93-76-5 | 2,4,5-T | 0.010 | U | 93-72-1 | Silvex | 0.010 | U |
| 94-75-7 | 2,4-D | 0.010 | U | | | | |

Worksheet #: 476800

***Total Target Concentration*** 0

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration used*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

***Flags***

c - failed the initial calibration criteria(if applicable)

***Note:***

Col = Column Number
Mr = MultiPeak Analyte 0=single peak analyte, >0=multi peak analyte (i.e. pcb/chlordane etc..)
Fit = Indicates whether Avg RF, Linear, or Quadratic Curve was used for compound.
Corr 1 = Correlation Coefficient for linear Eq.
Corr 2 = Correlation Coefficient for quad Eq.

All Response Factors = Response Factors / 10000
Initial Calibration Criteria: either %RSD <=20 or Corr >= .995
Columns: Signal #1 db-1701 ; Signal #2 db-608

^Lvl: These compounds use a single pt calibration as specified by the method. The file used to update this calibration point is listed in the header under level #

# FORM 4
## (ICSA/ICSAB Summary)

Date Analyzed: 08/24/18
Data File: S22993A3
Prep Batch: 70604
Reporting Limits Used: 6010D, 6020B, 7470A, 7471B
Instrument: PEICP3A
Units: All units in ppm except Hg and icp-ms in ppb
Project Number: 8081617

Lab Name: Hampton-Clarke
Lab Code:
Contract:
Nras No:
Sdg No:
Case No:
ICSA/ICSAB: SOURCE: SCP Science

| Analyte | Spk Amt | ICSA V-285079-10 | Rec | Rec | Rec | Rec | Rec | Rec | Rec | Rec |
|---|---|---|---|---|---|---|---|---|---|---|
| Aluminum | 500 | 484.78 | 97 | | | | | | | |
| Barium | 0 | U | | | | | | | | |
| Calcium | 500 | 466.513 | 93 | | | | | | | |
| Chromium | 0 | U | | | | | | | | |
| Cobalt | 0 | U | | | | | | | | |
| Copper | 0 | U | | | | | | | | |
| Iron | 200 | 184.355 | 92 | | | | | | | |
| Lead | 0 | U | | | | | | | | |
| Magnesium | 500 | 494.143 | 99 | | | | | | | |
| Manganese | 0 | U | | | | | | | | |
| Nickel | 0 | U | | | | | | | | |
| Vanadium | 0 | U | | | | | | | | |
| Zinc | 0 | U | | | | | | | | |

**Notes:** a-indicates absolute value of the concentration > 2 * Reporting Limits In the ICSA
b-indicates absolute value of the concentration above Reporting Limits but < 2 * Reporting Limits in the ICSA
c-indicates the recovery failed the Qc Criteria in the ICSAB
u-indicates the absolute value of the concentration was below the reporting limit

**Qc Limits:** 200.7, 6020B < 2 * Reporting Limit
6010D < Reporting Limit

# CASE NARRATIVE

## Client: Hampton-Clarke Veritech

## Project: 8081617

## Report Number: 460-162840-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

**RECEIPT**
The sample was received on 8/17/2018 9:25 AM; the sample arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 0.9º C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

**ORGANOPHOSPHOROUS PESTICIDES (GC)**
Sample AD05999-001 (460-162840-1) was analyzed for Organophosphorous Pesticides (GC) in accordance with EPA SW-846 Method 8141B. The samples were prepared on 08/22/2018 and analyzed on 08/23/2018.

No difficulties were encountered during the pesticides analysis.

All quality control parameters were within the acceptance limits.

**PERCENT SOLIDS/PERCENT MOISTURE**
Sample AD05999-001 (460-162840-1) was analyzed for percent solids/percent moisture in accordance with EPA Method CLPISM01.2 (Exhibit D) Modified. The samples were analyzed on 08/23/2018.

No difficulties were encountered during the %solids/moisture analysis.

All quality control parameters were within the acceptance limits.

## Qualifiers

### GC Semi VOA

| Qualifier | Qualifier Description |
|---|---|
| U | Indicates the analyte was analyzed for but not detected. |

## Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|---|---|
| ¤ | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| PQL | Practical Quantitation Limit |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |

Note: Since laboratory accreditations are subject to change, TestAmerica Laboratories, Inc. places the ownership of method, analyte & accreditation compliance upon out subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/tests/matrix being analyzed, the samples must be shipped back to the TestAmerica laboratory or other instructions will be provided. Any changes to accreditation status should be brought to TestAmerica Laboratories, Inc. attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said complicance to TestAmerica Laboratories, Inc.

# REPORT OF LABORATORY ANALYSIS FOR TCDD/TCDF

**Report Prepared Date:**
August 30, 2018

**Report Information:**

**Pace Project #: 10443876**
**Sample Receipt Date: 08/17/2018**
**Client Project #: 8081617**
**Client Sub PO #: N/A**
**State Cert #: MN002**

**Invoicing & Reporting Options:**

The report provided has been invoiced as a Level 2 PCDD/PCDF Report. If an upgrade of this report package is requested, an additional charge may be applied.

Please review the attached invoice for accuracy and forward any questions to Nathan Boberg, your Pace Project Manager.

**This report has been reviewed by:**

August 31, 2018
Nathan Boberg, Project Manager

Fax: 612.607.6444

## DISCUSSION

This report presents the results from the analysis performed on one sample submitted by a representative of Veritech. The sample was analyzed for the presence or absence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (2,3,7,8-TCDD) and 2,3,7,8-tetrachlorodibenzofuran (2,3,7,8-TCDF) using USEPA Method 1613B. The reporting limits were set to correspond to the lowest calibration points and were adjusted for sample amount.

The recoveries of the isotopically-labeled TCDD/TCDF internal standards in the sample extract ranged from 63-66%. All of the labeled standard recoveries obtained for this project were within the target ranges specified in Method 1613B. Also, since the quantification of the native congeners was based on isotope dilution, the data were automatically corrected for recovery and accurate values were obtained.

A laboratory method blank was prepared and analyzed with the sample batch as part of our routine quality control procedures. The results show the blank to be free of 2,3,7,8-TCDD and 2,3,7,8-TCDF at the reporting limits.

Laboratory and matrix spike samples were also prepared using clean reference matrix or sample matrix that had been fortified with native standard materials. The recoveries of the native compounds ranged from 104-118% with relative percent differences of 1.7-2.0%. These results were within the target ranges for the method.

# Reporting Flags

A = Reporting Limit based on signal to noise

B = Less than 10x higher than method blank level

C = Result obtained from confirmation analysis

D = Result obtained from analysis of diluted sample

E = Exceeds calibration range

I = Interferencepresent

J = Estimated value

L = Suppressive interference, analyte may be biased low

Nn = Value obtained from additional analysis

P = PCDEInterference

R = Recovery outside target range

S = Peak saturated

U = Analyte not detected

V = Result verified by confirmation analysis

X = %D Exceeds limits

Y = Calculated using average of daily RFs

* = SeeDiscussion

## EAI Inc. letter to Maser Consulting P.A. re: "Vapor Remediation System Installation, Ferry Point Clubhouse, Ferry Point Park, Bronx, NY" dated October 18, 2019

**Zarah Thanasides <zaraht@eaienviro.com>**

# Liquid Boot Spraying Temp

1 message

**Matt Geary** <matt.geary@mineralstech.com> Thu, Nov 9, 2017 at 9:31 AM
To: Zarah Thanasides <zaraht@eaienviro.com>

Hi Zarah,

As per our recent conversation, regular Liquid Boot specifications call for ambient temperature to be 45 F during spraying, however down to 35 F may be acceptable and that decision is left to experienced applicators and inspectors based on field observations. When proper curing is observed spraying can continue. Below 35F and down to 25F Liquid Boot Low Temperature formulation must be used or the area being sprayed has to be heated.

Thanks,

**Matt Geary**

**Re: Vapor Remediation System Installation**
**Ferry Point Clubhouse**
**Ferry Point Park**
**Bronx, NY**

Dear Mr. Keil,

This letter serves to inform you that the Vapor Remediation System at the above referenced site has been completely installed. Installation was performed in accordance with manufacturer specifications, contract documents and approved submittals.

System components included Fluid-Applied Gas Vapor Barrier, Sub-Slab Depressurization System, Sub-Slab Depressurization System Accessories and Methane Gas Detection and Alarm.

If you have any questions, please contact me at (201) 395-0010 x229. Thank you.

Sincerely,

Robert Carvalho, PG
President/CEO

# DAILY FIELD OBSERVATION REPORT

**M T W TH F SA SU** **Weather:** Weather **Wind:** 0-5 mph **Humidity**
**Date:** 8-24-2018 **Time:** 7:30 (High Med Low)
**Temp:** 90+

**Name of Project:** Trump Links Golf Course - Ferry Point **Municipality:** Bronx, NY **Job No:** 17002426C

**Site Contractors:** Bellisimo Masonry & Construction (Anthony)

**Active Site Work Areas:** Proposed Gas Main installation & excavation

**Site Work Progress:** Arrived on-site at 7:30am

8:00am - Was informed by that excavation cannot commence until umbrella insurance issue is resolved.

9:00 am laying down plywood and began digging up the telecom line.

10:30am - met with Joe Rodinger. He explained that the demarcation barrier is a caution that says the msw is approximately 1-4 feet below that.

Standard SOP (according to Joe) is that we can dig to depth, replace demarcation barrier with a new one and then sand, pipe, etc.

Demarcation barrier varies from 10"-24". Barrier closest to road has no shaping material on top.

13:15 - Called and spoke to Anthony of Bellisimo, was told I was not needed anymore today.

**Remarks:** N/A

**Site Photographs:** Yes **Additional Action Required by Project Mgr. or Eng.: (YES NO)**

# DAILY FIELD OBSERVATION REPORT – ENVIRONMENTAL

**M T W (TH) F SA SU** **Weather: Partly sunny** **Humidity**

**Date: August 30, 2018** **Time: 6:50am** **Temp: 91** °F (High) Med Low

**Name of Project: Trump Golf Links – Ferry Point Park** **Municipality: Bronx, NY** **Job No: 17002426C**

**Site Contractors: Bellisimo Masonry & Construction**

**Active Site Work Areas: Construction site for new six-inch gas line**

**Activities included: Trenching**

**Site Work Progress: From the endpoint of trenching on 08/29/2018, ~ 100 feet of trenching to a depth of ~ 2 feet was completed along the north side of the 6th fairway cartpath. Sawcutting the asphalt cartpath so that the gas lines crosses over to the inside of the cartpath was postponed to next week. ~ 75 feet of trenching to a depth of ~ 2 feet was then completed on the other side of the cartpath toward the maintenance area (parallel to the 7th tee boxes). Two obstructions (large rock and large piece of formed metal) remain in the 6th fairway trench and are planned prior to laying the gas line.**

**At regular intervals, the trench bottoms were checked with a 4-gas QRAE Meter. The meter alarm is triggered if concentrations of carbon monoxide, hydrogen sulfide, oxygen or methane (as Lower Explosive Limit) are above OSHA exposure limits; the alarm was not triggered for these four gases during today's activities.**

**Remarks: Site activities concluded at 1430.**

**Site Photographs:** (Yes) No

**Additional Action Required by Project Mgr. or Eng.:**

**YES (NO)**

**Observed By: Don Bowman**

# DAILY FIELD OBSERVATION REPORT – ENVIRONMENTAL

**M T W TH (F) SA SU** **Weather: cloudy** **Humidity**

**Date: August 31, 2018 Time: 0710** (High) Med Low

**Temp: 75** °F

**Name of Project: Trump Golf Links – Ferry Point Park** **Municipality: Bronx, NY** **Job No: 17002426C**

**Site Contractors:** **Bellisimo Masonry & Construction**

**Active Site Work Areas: Construction site for new six-inch gas line**

**Activities included: Trenching**

**Site Work Progress: From the endpoint of trenching on 08/30/2018 (i.e. near the landfill gas well adjacent to the cartpath leading to the maintenance area), ~ 500 feet of trenching to depths ranging from 2-3 feet (~20-24 inches wide) was completed to near the fire hydrant at the end of the cartpath by the greens nursery and maintenance garage. Irrigation lines were uncovered during excavation at two areas, and a few additional obstructions were discovered that are planned for removal prior to laying the gas line.**

**At 1300 a ConEd representative (Kevin) arrived on site, and observed the length of the trenching to date (beginning at Schley Avenue), escorted by a Trump Organization representative. The ConEd representative stated that laying the gas piping will begin on Tuesday 09/04/2018 or Wednesday 09/05/2018; 40-foot pipe sections will be fused then laid in the trench with tracer wire and marker balls, then tested (long sections) with 150 psi of air pressure and (upon satisfactory testing results) the trench can be backfilled.**

**At regular intervals, the trench bottoms were checked with a 4-gas QRAE Meter. The meter alarm is triggered if concentrations of carbon monoxide, hydrogen sulfide, oxygen and methane (as Lower Explosive Limit) are above OSHA exposure limits; the alarm was not triggered for these four gases during today's activities.**

**Remarks: Site activities were nearing conclusion at 1515.**

# DAILY FIELD OBSERVATION REPORT

**M T (W) TH F SA SU** **Weather:** Weather **Wind:** 0-5 mph **Humidity** (High) Med Low)
**Date:** 9-5-2018 **Time:** 7:30 **Temp:** 90+

**Name of Project:** Trump Links Golf Course - Ferry Point **Municipality:** Bronx, NY **Job No:** 17002426C

**Site Contractors:** Bellisimo Masonry & Construction (Anthony)

**Active Site Work Areas:** Proposed Gas Main installation & excavation

**Site Work Progress:** Arrived on-site at 7:30am

Upon arrival, gas meter located in Chris' office was not working. Called Pine Environmental and had them deliver a new one.

7:45am - Began preliminary observations, asphalt in front on maintenance garage has been saw cut, had to offset in fron of bay door No. due to natural gas cap.

8:30am - ConEd arrived on-site.

9:15am - Orange Demarcation barrier is being laid down in trench (See attached map for location) (BLUE AREA)

9:20am - 3" of sand is being laid on top of orange demarcation barrier (Checking with measured broom stick handle)

10:00am - Anthony (Bellisimo) began removal asphalt layer from north and east side of the maintenance garage.
10:10am - Measured trench in asphalt - ranged from 36"-42"

**Remarks:** N/A

11:00am - Spoke to ConEd workers, they explained the bonding process. 20 min of intense heat (400-450 degrees) to bond two sections together and 20 minutes for the pieces to cool down before they can be placed in trench.

11:15am - Anthony (Bellisimo) began trenching across golf cart path (See attached map, YELLOW AREA). Steel plate placed over trench.

11:40am - Pine Environmental delivered new gas meter

12:00pm - ConEd front loader broke down, need to replace with new one

13:30pm - New front loader arrives and bonding continues
14:30 - Anthony (Bellisimo) was trenching along east side of maintenance garage. Exposed current 4"gas line (See attached map, GREEN AREA)

15:40pm - Orange demarcation barrier has been laid with 3" of sand on top from Buttrick Avenue to where the trench first crosses the golf cart path (See attached map)

15:45pm - 8 sections of new 6" gas pipe has been bonded and placed in trench.

16:30pm - Trenching has ended for the day

**Site Photographs:** Yes **Additional Action Required by Project Mgr. or Eng.: (YES (NO)**

# DAILY FIELD OBSERVATION REPORT – ENVIRONMENTAL

**M T W (TH) F SA SU** **Weather: Sunny/Slightly Cloud** **Wind: light to mild** **Humidity**

**Date: September 6, 2018** **Time: 0900 - 1630** High (Med) Low

**Temp: 90** °F

**Name of Project: Trump Golf Links – Ferry Point Park** **Municipality: Bronx, NY** **Job No: 17002426C**

**Site Contractors: Bellisimo Masonry & Construction (Anthony), Con Edison, RECONN**

**Active Site Work Areas: Gas Main Installation pipeline: saw cutting, trenching, and backfilling in the maintenance area**

**Piping welded from Buttrick & Schley Ave to southern golf trail for pipeline installation by Con Edison.**

**No PID or four gas meter measurements above background levels.**

**Site Work Progress: Northeastern and northwestern sides of the maintenance building trench backfilled with a minimum of 3" of clean fill. Thickness of the fill measured every 10' throughout an estimated ~170 LF trench. Trench extended on the northwestern side extended ~10 – 20 LF by cutting asphalt and excavating soil material nearby.**

**Con Edison welding and installing plastic 6-inch pipe at the trench on the northside of the golf course . Note: Areas with <18" of soil above the pipe require steel section above the pipe.**

# DAILY FIELD OBSERVATION REPORT – ENVIRONMENTAL

**M T (W) TH F SA SU** **Weather: Cloudy/Slightly Rainy** **Wind: light to mild** **Humidity**

**Date: September 12, 2018** **Time: 0900 - 1700** (High) Med Low

**Temp: 60 - 70** °F

**Name of Project: Trump Golf Links – Ferry Point Park** **Municipality: Bronx, NY** **Job No: 17002426C**

**Site Contractors: Bellisimo Masonry & Construction (Anthony)**

**Active Site Work Areas: Gas Main Installation pipeline - Backfilling in the Trenches North of Maintenance Garage**

**Piping welded around trench bends for pipeline installation by Con Edison.**

**No 4-gas meter measurements above background levels.**

**Site Work Progress: Various locations of trenchs were backfilled north of the maintenance building. Toward the northern end of the course near Buttrick & Dewey Ave prior backfilling and near the maintenance building area, clean cover sand was backfilled to a minimum of 3" thick above the gas pipe and shaping material soil was covered over. Areas near the intersection of the golf course were backfilled with a minimum of 3" thick clean fill sand at the base of the trench. Thickness of the clean fill above and below pipes were measured every 10' throughout the trench.**

**79,500 lbs of clean cover fill from Ranco Sand & Stone was delivered to the site at the maintenance building.**

**Con Edison welded and installed plastic 6-inch pipe at trench bends near the trail intersection of the gas installation .**

**Site Photographs:** (Yes) No

**Additional Action Required by Project Mgr. or Eng.:**

**YES (NO)**

**Observed By: John Fortunato**

# DAILY FIELD OBSERVATION REPORT – ENVIRONMENTAL

**M T W (TH) F SA SU** **Weather: Cloudy/Slightly Rainy** **Wind: light to mild** **Humidity**

**Date: September 13, 2018** **Time: 0800 - 1500** High (Med) Low

**Temp: 60 - 70** °F

**Name of Project: Trump Golf Links – Ferry Point Park** **Municipality: Bronx, NY** **Job No: 17002426C**

**Site Contractors: Bellisimo Masonry & Construction (Anthony)**

**Active Site Work Areas: Gas Main Installation pipeline – Excavating Trenches South of Maintenance Garage toward clubhouse**

**Piping welded around trench bends for pipeline installation by Con Edison.**

**No 4-gas meter measurements above background levels.**

**Site Work Progress: Roughly 500' of trench south of the maintenance building from the rear entrance along the path to the clubhouse was excavated. Trench depth ranged from 30 – 40" below ground surface. Near the fence line of the trench, gravel, plastic piping, and plastic liner was encountered. Roughly 10' of perforated pipe was damaged during the disturbance. The contractor (Anthony) was notified to repair the drainage area. Unmarked utilities were also encountered, but were not damaged beyond the casings. All materials were stocked onto plywood panels along the trench. Shaping layer soil was placed on the far end of the trench, while cover sand soil was placed near the trench for backfilling.**

**Remaining shaping layer soil from backfilling activities around the maintenance building was stockpiled toward the northwest end of the maintenance building.**

**Con Edison continued welding and installing plastic 6-inch pipe at trenches north of the maintenance building.**

**Site Photographs:** (Yes) No

**Additional Action Required by Project Mgr. or Eng.:**

**YES (NO)**

# DAILY FIELD OBSERVATION REPORT – ENVIRONMENTAL

**M T W TH (F) SA SU** **Weather: Cloudy/Slightly Sunny** **Wind: light to mild** **Humidity**

**Date: September 14, 2018** **Time: 0800 - 1500** High (Med) Low

**Temp: 60 - 70** °F

**Name of Project: Trump Golf Links – Ferry Point Park** **Municipality: Bronx, NY** **Job No: 17002426C**

**Site Contractors: Bellisimo Masonry & Construction (Anthony)**

**Active Site Work Areas: Gas Main Installation pipeline – Excavating Trenches South of Maintenance Garage toward clubhouse, Backfilling Trenches North of Maintenance Garage**

**Piping installed in southern trenches by Con Edison.**

**No 4-gas meter measurements above background levels.**

**Site Work Progress: Roughly 400' of trench south of the maintenance building along Hutchinson the path to the clubhouse was excavated. Trench depth ranged from 30 – 40" below ground surface. Near the fence line of the trench, gravel, plastic piping, and plastic liner was encountered. Roughly 2' of perforated pipe was damaged during the disturbance. The contractor (Anthony) was notified to repair the drainage area. Portions of the trench were primarily composed of gravel from the runoff drainage system and will be backfilled. Asphalt was cut and concrete was broken up on the eastern rear gate prior to trenching. All materials were stocked onto plywood panels along the trench. Shaping layer soil was placed on the far end of the trench, while cover sand soil was placed near the trench for backfilling.**

**Roughly 20' of clean cover soil was backfilled over piping in trenches north of the maintenance building to a minimum thickness of 3". Caution tape was placed on top of the backfilled sand.**

**Con Edison performed a pressure test at the rear gate entrance of the maintenance garage. The test was successful with no leaks in the system. Plastic 6" pipe at trenches south of the maintenance building were installed. The trench was not backfilled with 3" minimum of bedding. Anthony and Con Edison were notified that clean cover sand must be backfilled on the bedding of the trench either prior to installation or worked around the piping. Con Edison responded that the bedding will be installed.**

# DAILY FIELD OBSERVATION REPORT – ENVIRONMENTAL

**(M) T W TH F SA SU** **Weather: Sunny/Slightly Cloudy** **Wind: light to mild** **Humidity**

**Date: September 13, 2018** **Time: 0800 - 1500** **Temp: 60 - 70 °F** High (Med) Low

**Name of Project: Trump Golf Links – Ferry Point Park** **Municipality: Bronx, NY** **Job No: 17002426C**

**Site Contractors: Bellisimo Masonry & Construction (Anthony)**

**Active Site Work Areas: Gas Main Installation pipeline – Excavating Trenches South of Maintenance Garage toward clubhouse, Backfilling Trenches North of Maintenance Garage**

**Piping installed in southern trenches by Con Edison.**

**No 4-gas meter measurements above background levels.**

**Site Work Progress: Roughly 250' of trench south of the maintenance building along Hutchinson the path to the clubhouse was excavated. The trench was generally excavated on the inner fence line limits within the surface water drainage system area, which consisted of gravel, perforated ppe, and geotextile. The trench was generally ~36" below ground surface. Roughly 6' of perforated pipe was observed to be damaged during the trenching and scattered geotextile pieces. The contractor (Anthony) was notified to repair the drainage areas prior.**

**Asphalt was cut and concrete was broken up on the eastern rear gate prior to trenching the area in preparation of Con Edison's pipe installation. Broken up asphalt and concrete were stockpile separately for disposal. Remaining materials were stockpiled onto plywood panels along the trench or across the asphalt trail, as applicable.**

**Roughly 80' of clean cover soil was backfilled over piping in trenches north of the maintenance building to a minimum thickness of 3". Caution tape was placed on top of the backfilled sand.**

**Plastic 6" pipe at trenches south of the maintenance building were installed. The trenches were not initially backfilled with 3" minimum of bedding. Anthony and Con Edison are aware that clean cover sand must be backfilled on the bedding of the trench either prior to installation or worked around the piping. Con Edison responded that the bedding will be installed.**

# DAILY FIELD OBSERVATION REPORT – ENVIRONMENTAL

**M (T) W TH F SA SU** **Weather: overcast & warm** **Wind: calm** **Humidity**

**Date: October 9, 2018** **Time: 1000 - 1500** **Temp: 70- 75 °F** (High) Med Low

**Name of Project: Trump Golf Links – Ferry Point Park** **Municipality: Bronx, NY** **Job No: 17002426C**

**Site Contractors: Bellisimo Masonry & Construction (Anthony), Con Edison, RECONN**

**Active Site Work Areas:Bellision Construction worked the gas pipeline route along side Fairway #6 adding sufficient cover material and grading. Additional landscaping work was conducted in from of the "Trump Links' sign. Con Edison workers were staged on the roadway north of the golf course-opening the roadway in preparation to make the connection with the gas main at Schley and Buttrick.**

**No 4-gas meter measurements above background levels.**

**Site Work Progress: Most of the cover material along side Fairway #6 was placed above the new gasline-elevating the area as per the design specifications. Excavations in the road north of the golf course were slow and meticulous due to the abundance of underground utilities.**

**Site Photographs:** (Yes) No

**Additional Action Required by Project Mgr. or Eng.:**

**YES (NO)**

**Observed By: Dave Keil** **Reviewed By:**
**Date:**

**Photo: 1 Cover material at pipeline route adjacent to Fairway #6.**
