Re: Lenox Hill Hospital
Block 1411, Lots 1 and 113 and Block 1412, Lots 9, 10, and 11
CEQR # 23DCP079M

Dear Ms. Barron:

The New York City Department of Environmental Protection, Bureau of Sustainability (DEP) has reviewed the June 2022 Phase I Environmental Site Assessment (Phase I) and the June 2023 Subsurface (Phase II) Investigation Sampling Protocol (Work Plan) and Health and Safety Plan (HASP) prepared by AKRF, Inc. on behalf of Lenox Hill Hospital (LHH) (applicant) for the above referenced project. It is our understanding that the applicant is requesting a series of discretionary actions from the New York City Department of City Planning (DCP) including a zoning map amendment to rezone from a C1-8X district to a C1-9 district and from an R8A district to a C1-8 district; zoning text amendments; special permits; and a zoning authorization. The Proposed Actions would facilitate the enlargement and modernization of the existing LHH hospital and the creation of a purpose-built hospital complex that would address critical infrastructure challenges and space needs (Proposed Project). The proposed hospital building would allow LHH to meet current standards of healthcare delivery, including single-bedded patient rooms, as well as address projected future needs for an expanded emergency department, new and larger state-of-the-art surgical suites (ORs), and other essential clinical and support spaces. The Proposed Project would be built on Projected Development Site 1 (Block 1411, Lots 1 and 113) bounded by Park and Lexington Avenues and East 76th and East 77th Streets in Manhattan Community District 8. The Proposed Project would include a new approximately 771,000 gross square foot (gsf) building on Lexington Avenue and 56,000 gsf of additions to the existing hospital; it would include an emergency department, operating suites (including ORs and support space), and thirteen floors of patient rooms. Portions of the existing hospital complex would be renovated to accommodate connections to the new hospital building and create four new truck docks and a new ambulance bay for six ambulances inside the structure. The Proposed Project would also provide a new entrance and lobby for the Mother-Baby Hospital on Park Avenue as well as a new emergency stair on the Park Avenue frontage. The Reasonable Worst Case Development Scenario also considers the as-of-right

development of 111-115 East 77th Street between Lexington and Park Avenues (Block 1412, Lots 9, 10, and 11) (Projected Development Site 1a) as part of the Proposed Project. Projected Development Site 1a would be redeveloped with an approximately 46,000-gsf six-story, 75-foot-tall building to house hospital support functions. It would be connected to Projected Development Site 1 by a utility tunnel under East 77th Street.

The June 2022 Phase I report revealed that historical on-site and surrounding area land uses consisted of a variety of residential and commercial uses including a hospital complex, commercial/office buildings, schools, churches, dwellings, outbuildings, stables, a farrier, auto houses, dry cleaners, garages, dyers and cleaners, etc. Regulatory databases identified 5 underground storage tank sites, 76 aboveground storage tank sites, 3 historical auto sites, and 21 historical cleaner sites within 1/8 mile; 14 dry cleaners within 1/4 mile; 116 leaking storage tank sites, 1 brownfields site, and 556 spills within 1/2 mile; and 2 manufactured gas plant sites within 1 mile of the subject property.

The June 2023 Work Plan proposes to advance 15 soil borings (SB-01 through SB-15). To the extent feasible, borings will be advanced to approximately 12 feet below the basement (borings SB-01 and SB-13 through SB-15) and up to 7 feet below the sub-basement (borings SB-02 through SB-12) (e.g., the 2-foot interval below the anticipated new foundation excavation depth). Up to two soil samples will be collected from each for laboratory analysis. Samples selected for laboratory analysis will be biased towards any intervals containing urban fill material or evidence of contamination (e.g., staining, odors, elevated photoionization detector readings). Absent any such signs, a shallow sample will be collected from the 0 to 2-foot interval and a deeper sample will be collected immediately above the groundwater or bedrock interface or at the bottom of the boring (i.e., the two-foot interval below the anticipated excavation depth). A second sample will only be collected from borings that can be advanced beyond 5 feet. If groundwater or bedrock is encountered at a shallower depth than the proposed maximum excavation depth during borehole advancement, the deeper subsurface soil sample will be collected from the two-foot interval above the groundwater interface or bedrock. Groundwater samples will be collected from six temporary well points installed in select borings (TW-01, TW-05, TW-10, TW-12, TW-13 and TW-14). Soil and groundwater samples will be analyzed for volatile organic compounds (VOCs) by United States Environmental Protection Agency (EPA) Method 8260, semi-volatile organic compounds (SVOCs) by EPA Method 8270, pesticides by EPA Method 8081, polychlorinated biphenyls (PCBs) by EPA Method 8082, and Target Analyte List (TAL) metals by EPA Methods 6010 and 7471 (filtered and unfiltered for groundwater samples). Ten soil vapor samples will be collected from approximately 12 feet below the basement and up to 7 feet below the sub-basement (the anticipated foundation depth) or the 2-foot interval above the water table or bedrock interface (if shallower). Soil vapor samples will be analyzed for VOCs by EPA Method TO-15.

Work Plan

- DCP should instruct the applicant that as per the updated *City Environmental Quality Review Technical Manual* (2021 Edition), a minimum of two soil samples should be collected from each test boring/probe. One shallow soil sample should be collected from the upper two feet of soil (typically the 0-2 feet bgs interval). A second soil sample

should be collected from the two-foot interval below the proposed maximum excavation depth(s). If groundwater or bedrock is encountered at a shallower depth than the proposed maximum excavation depth during borehole advancement, the subsurface soil sample should be collected from the two-foot interval above the groundwater interface or bedrock. Soil borings must be screened for evidence of gross contamination (based on visual/olfactory evidence of impacts and/or elevated soil screening readings obtained using accepted field instruments). Where screening indicates contamination at an intermediate interval(s) in a soil boring, i.e. between 2 feet bgs and the proposed maximum excavation depth, an additional soil sample(s) should be collected for analysis. If groundwater is encountered in a test boring/probe within five feet of surface grade, only one soil sample per boring may be warranted as long as adequate upgradient and downgradient groundwater samples are collected. Soil samples collected should be discrete (grab) samples.

- DCP should instruct the applicant that where the water table is less than 30 feet beneath the deepest level of existing or proposed on-site basement or slab-on-grade foundation, groundwater samples should be collected for laboratory analysis.

- DCP should instruct the applicant that soil vapor sampling should typically be performed, at a minimum, to the two foot interval below the depth of the project excavation.

DEP finds the June 2023 Phase II Work Plan and HASP for the proposed investigation acceptable, as long as the aforementioned information is incorporated into the Work Plan. DCP should inform the applicant that upon completion of the investigation activities, the applicant should submit a detailed Phase II report for DEP review and approval. The report should include, at a minimum, an executive summary, narrative of the field activities, laboratory data and conclusions, comparison of soil, groundwater, and soil vapor analytical results (i.e., New York State Department of Environmental Conservation (NYSDEC) 6 NYCRR Part 375, NYSDEC Water Quality Regulations, and the New York State Department of Health October 2006 Guidance for Evaluating Soil Vapor Intrusion in the State of New York), updated site plans depicting sample locations, boring logs, and remedial recommendations, if warranted.

Future correspondence and submittals related to this project should include the following CEQR # **23DCP079M**. If you have any questions, you may contact me at (718) 595-4358.

Sincerely,

Wei Yu

Re: Lenox Hill Hospital
Block 1411, Lots 1 and 113 and Block 1412, Lots 9, 10, and 11
CEQR # 23DCP079M

Dear Ms. Barron:

The New York City Department of Environmental Protection, Bureau of Sustainability (DEP) has reviewed the December 2023 Environmental Impact Statement Hazardous Materials Chapter, the November 2023 Phase II Subsurface Investigation (Phase II), the December 2023 Remedial Action Plan (RAP), and the November 2023 Construction Health and Safety Plan (CHASP) prepared by AKRF, Inc. on behalf of Lenox Hill Hospital (LHH) (applicant) for the above referenced project. It is our understanding that the applicant is requesting a series of discretionary actions from the New York City Department of City Planning (DCP) including a zoning map amendment to rezone from a C1-8X district to a C1-9 district and from an R8A district to a C1-8 district; zoning text amendments; special permits; and a zoning authorization. The Proposed Actions would facilitate the enlargement and modernization of the existing LHH hospital and the creation of a purpose-built hospital complex that would address critical infrastructure challenges and space needs (Proposed Project). The proposed hospital building would allow LHH to meet current standards of healthcare delivery, including single-bedded patient rooms, as well as address projected future needs for an expanded emergency department, new and larger state-of-the-art surgical suites (ORs), and other essential clinical and support spaces. The Proposed Project would be built on Projected Development Site 1 (Block 1411, Lots 1 and 113) bounded by Park and Lexington Avenues and East 76th and East 77th Streets in Manhattan Community District 8. The Proposed Project would include a new approximately 771,000 gross square foot (gsf) building on Lexington Avenue and 56,000 gsf of additions to the existing hospital; it would include an emergency department, operating suites (including ORs and support space), and thirteen floors of patient rooms. Portions of the existing hospital complex would be renovated to accommodate connections to the new hospital building and create four new truck docks and a new ambulance bay for six ambulances inside the structure. The Proposed Project would also provide a new entrance and lobby for the Mother-Baby Hospital on Park Avenue as well as a new emergency stair on the Park Avenue frontage. The Reasonable Worst Case Development Scenario also considers the as-of-right

development of 111-115 East 77th Street between Lexington and Park Avenues (Block 1412, Lots 9, 10, and 11) (Projected Development Site 1a) as part of the Proposed Project. Projected Development Site 1a would be redeveloped with an approximately 46,000-gsf six-story, 75-foot-tall building to house hospital support functions. It would be connected to Projected Development Site 1 by a utility tunnel under East 77th Street.

During the September and October 2023 fieldwork, nine soil borings were advanced. Shallow subsurface soil (from 0-2 feet below basement grade) was collected from two borings (B-12 and B-15). Subsurface soil was not encountered in the remainder of the borings installed during the investigation prior to refusal on apparent bedrock and/or concrete foundations. Groundwater was not encountered in any of the borings advanced during this investigation. One groundwater sample (MW-1) was collected from an existing geotechnical monitoring well in the East 76th Street sidewalk immediately south of the hospital. Soil and groundwater samples were analyzed for volatile organic compounds (VOCs) by United States Environmental Protection Agency (EPA) Method 8260, semi-volatile organic compounds (SVOCs) by EPA Method 8270, pesticides by EPA Method 8081, polychlorinated biphenyls (PCBs) by EPA Method 8082, and Target Analyte List (TAL) metals (total and dissolved for groundwater samples). Nine soil vapor samples (SV-1, SV-3, SV-5, SV-7, SV-8, SV-9, SV-10, SV-12, and SV-15) were collected and analyzed for VOCs by EPA Method TO-15.

The soil analytical results revealed that VOCs, SVOCs, and PCBs were either non-detect (ND) or below their New York State Department of Environmental Conservation (NYSDEC) 6 NYCRR Part 375 Unrestricted Use Soil Cleanup Objectives (SCOs). One pesticide (4,4'-DDT) and several metals (cadmium, copper, lead, mercury, nickel, and zinc) were detected above their NYSDEC 6 NYCRR Part 375 Unrestricted Use SCOs and/or Restricted Residential Use SCOs.

The groundwater analytical results revealed that VOCs, SVOCs, and PCBs were either ND or below their NYSDEC Technical and Operational Guidance Series (TOGS) 1.1.1 Class GA Ambient Water Quality Standards and Guidance Values. One pesticide (endrin) and several metals (iron, manganese, and sodium) were detected above their NYSDEC TOGS 1.1.1 Class GA Ambient Water Quality Standards and Guidance Values.

The soil vapor analytical results revealed that several VOCs (1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, 1,4-dioxane, 2,2,4-trimethylpentane, 2-butanone, 2-hexanone, 4-ethyltoluene, 4-methyl-2-pentanone, acetone, benzene, bromodichloromethane, carbon disulfide, chloroform, chloromethane, cyclohexane, dibromochloromethane, dichlorodifluoromethane, ethanol, ethylbenzene, heptane, isopropanol, methylene chloride, n-hexane, o-xylene, p/m-xylene, styrene, tertiary butyl alcohol, tetrachloroethene, tetrahydrofuran, toluene, trichloroethene, and trichlorofluoromethane) were detected.

The December 2023 RAP proposes transportation and off-site disposal of soil in accordance with all applicable federal, state and local regulations; in the event that unknown petroleum storage tanks are identified or encountered at the Site, the tanks and any appurtenances will be cleaned, removed and disposed of in accordance with accepted industry standards and applicable federal, state, and local regulatory agency requirements; stockpiled soil will be covered with polyethylene sheeting; dust control; air monitoring; any dewatering activities would be

conducted in accordance with a New York City Department of Environmental Protection Bureau of Wastewater Treatment Wastewater Quality Control Permit; if future construction plans are modified to include any landscaped or grass-covered areas (excluding sidewalk or rooftop planters), these areas of the Site would have a "soil cap" consisting of two feet of DEP-approved imported clean fill; installation of a vapor barrier as part of the new building foundation beneath the building slab, below and around any elevator pits, and outside of the sub-grade foundation sidewalls for each building consisting of GCP Applied Technologies (GCP) 46-mil PREPRUFE 300R membrane or equivalent, on the underside of the foundation slab and GCP PREPRUFE 32-mil 160R membrane, 73-mil Precon membrane, or equivalent along the outside of sub-grade walls (this vapor barrier system will be used unless an alternative is approved by DEP). The November 2023 CHASP addresses worker and community health and safety during construction.

Based upon our review of the submitted documentation, we have the following comments and recommendations to DCP:

RAP

- DCP should instruct the applicant that a site-specific plan view showing the location, and typical design sections of the proposed vapor barrier system installed beneath the building slab and outside of all subgrade foundation sidewalls for each building should be included in the RAP.

DCP should instruct the applicant that a revised RAP and CHASP should be submitted for DEP review and approval. Future correspondence and submittals related to this project should include the following CEQR # **23DCP079M**. If you have any questions, you may contact me at (718) 595-4358.

Sincerely,

Wei Yu

Re: Lenox Hill Hospital
Block 1411, Lots 1 and 113 and Block 1412, Lots 9, 10, and 11
CEQR # 23DCP079M

Dear Ms. Barron:

The New York City Department of Environmental Protection, Bureau of Sustainability (DEP) has reviewed the March 2024 Remedial Action Plan (RAP) and the November 2023 Construction Health and Safety Plan (CHASP) prepared by AKRF, Inc. on behalf of Lenox Hill Hospital (LHH) (applicant) for the above referenced project. It is our understanding that the applicant is requesting a series of discretionary actions from the New York City Department of City Planning (DCP) including a zoning map amendment to rezone from a C1-8X district to a C1-9 district and from an R8A district to a C1-8 district; zoning text amendments; special permits; and a zoning authorization. The Proposed Actions would facilitate the enlargement and modernization of the existing LHH hospital and the creation of a purpose-built hospital complex that would address critical infrastructure challenges and space needs (Proposed Project). The proposed hospital building would allow LHH to meet current standards of healthcare delivery, including single-bedded patient rooms, as well as address projected future needs for an expanded emergency department, new and larger state-of-the-art surgical suites (ORs), and other essential clinical and support spaces. The Proposed Project would be built on Projected Development Site 1 (Block 1411, Lots 1 and 113) bounded by Park and Lexington Avenues and East 76th and East 77th Streets in Manhattan Community District 8. The Proposed Project would include a new approximately 771,000 gross square foot (gsf) building on Lexington Avenue and 56,000 gsf of additions to the existing hospital; it would include an emergency department, operating suites (including ORs and support space), and thirteen floors of patient rooms. Portions of the existing hospital complex would be renovated to accommodate connections to the new hospital building and create four new truck docks and a new ambulance bay for six ambulances inside the structure. The Proposed Project would also provide a new entrance and lobby for the Mother-Baby Hospital on Park Avenue as well as a new emergency stair on the Park Avenue frontage. The Reasonable Worst Case Development Scenario also considers the as-of-right development of 111-115 East 77th Street between Lexington and Park Avenues (Block 1412, Lots 9, 10, and 11) (Projected Development Site 1a) as part of the

Proposed Project. Projected Development Site 1a would be redeveloped with an approximately 46,000-gsf six-story, 75-foot-tall building to house hospital support functions. It would be connected to Projected Development Site 1 by a utility tunnel under East 77th Street.

The March 2024 RAP proposes transportation and off-site disposal of soil in accordance with all applicable federal, state and local regulations; in the event that unknown petroleum storage tanks are identified or encountered at the Site, the tanks and any appurtenances will be cleaned, removed and disposed of in accordance with accepted industry standards and applicable federal, state, and local regulatory agency requirements; stockpiled soil will be covered with polyethylene sheeting; dust control; air monitoring; any dewatering activities would be conducted in accordance with a New York City Department of Environmental Protection Bureau of Wastewater Treatment Wastewater Quality Control Permit; if future construction plans are modified to include any landscaped or grass-covered areas (excluding sidewalk or rooftop planters), these areas of the Site would have a "soil cap" consisting of two feet of imported clean fill; and installation of a vapor barrier as part of the new building foundations beneath the building slab, below and around any elevator pits, and outside of the sub-grade foundation sidewalls for each building consisting of GCP Applied Technologies (GCP) 46-mil PREPRUFE 300R membrane or equivalent, on the underside of the foundation slab and GCP PREPRUFE 32-mil 160R membrane, 73-mil Precon membrane, or equivalent along the outside of sub-grade walls.

Based upon our review of the submitted documentation, we have the following comments and recommendations to DCP:

- The proposed project would include engineering controls which should be monitored through an institutional control. Therefore, an (E) Designation should be placed on Projected Development Site 1 and Projected Development Site 1a for the proposed action to ensure that the engineering controls are properly monitored and maintained through oversight by the Mayor's Office of Environmental Remediation (OER). Further hazardous materials assessments should be coordinated through OER. OER may have additional requirements.

Future correspondence and submittals related to this project should include the following CEQR # **23DCP079M**. If you have any questions, you may contact me at (718) 595-4358.

Sincerely,

Wei Yu

Re: Phase I Environmental Site Assessment
Lenox Hill Hospital Redevelopment – Manhattan, New York
AKRF Project Number: 12317

Dear Mr. Cogswell:

AKRF, Inc. is pleased to submit this Phase I Environmental Site Assessment Report for the above-referenced Property. This report includes the findings of a reconnaissance of the Property, an evaluation of reasonably ascertainable historical information and selected environmental databases and electronic records. AKRF, Inc. met the requirements of American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 unless noted otherwise in Section 8.0: "Limitations and Data Gaps".

We appreciate the opportunity to provide you with our services. If you should have any questions, please do not hesitate to contact us.

Sincerely,
AKRF, Inc.

Neoma Chefalo, MPH
Senior Environmental Professional

Axel Schwendt
Vice President

EXECUTIVE SUMMARY

AKRF, Inc. (AKRF) was retained by Lenox Hill Hospital (LHH or the "Client") to perform a Phase I Environmental Site Assessment (ESA) of LHH's existing campus on the block bounded by Park and Lexington Avenues and East 76th and East 77th Streets (Block 1411, Lots 1 and 113) (aka Projected Development Site 1) and three buildings on the north side of East 77th Street across from the main hospital complex (Block 1412, Lots 9, 10, and 11) (aka Projected Development Site 1a) in Manhattan, New York (collectively, the Property). The LHH hospital complex (Projected Development Site 1) has a total area of approximately 82,753 square feet (sf) and contains ten adjoining buildings on Lots 1 and 113. These buildings were developed separately between the late 1800s and mid-1970s and have been interconnected to function as a single hospital facility, with two ancillary (mainly vacant) former residential structures on the southeastern portion of the hospital campus. The three ancillary 3-story office buildings located on the north adjacent block (Projected Development Site 1a) are used mainly for an emergency medical services (EMS) office, file storage and medical offices by LHH. The Phase I ESA was conducted to provide preliminary environmental information as part of due diligence for the proposed redevelopment and renovation of the Property buildings and facilities.

The proposed redevelopment of the Property would entail demolition of portions of the current hospital and renovations of existing structures for a new state-of-the-art hospital facility (to occur in multiple stages).

The development would include a new approximately 771,000 gross square-foot (gsf) building on Lexington Avenue and 51,000 gsf of additions to the existing hospital, including an emergency department, operating suites, and thirteen floors of patient rooms (the Proposed Project). The Proposed Project would also include renovations to portions of the existing hospital complex to accommodate connections to the new hospital building, as well as new truck docks inside the building and off-street parking for ambulances and the installation of below grade utilities beneath the East 77th Street roadway. The Proposed Project would provide a new lobby and emergency stairwell for the Mother-Baby Hospital on Park Avenue. The Proposed Project would also include the redevelopment of Block 1412, Lots 9, 10, and 11 on the north-adjacent block (Projected Development Site 1a) with an approximately 46,000-gsf, 75-foot-tall building to house hospital support functions. LHH also proposes to provide improvements to the 77th Street subway station.

This Phase I ESA was performed in conformance with ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice* (the Standard). Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC, Controlled REC and *De Minimis* Condition.

A summary of the assessment findings is presented below:

Recognized Environmental Conditions

- The Property (Block 1411, Projected Development Site 1) was registered with the New York State Department of Environmental Conservation (NYSDEC) Petroleum Bulk Storage (PBS) Program (PBS# 2-606498) with one in-service 20,000-gallon diesel aboveground storage tank (AST) located within a basement-level concrete tank room, two (2) 317-gallon day tanks within a sub-basement-level emergency generator room, and an ancillary 330-gallon diesel AST (also supplied by the 20,000-gallon AST) located on the roof of the Uris building. The tanks are currently used to fuel the LHH emergency generator systems. No spills were listed in regulatory database information in connection with the

ASTs; however, undocumented releases from historic bulk petroleum storage operations may have affected environmental conditions at the Property.

- The LHH main hospital (Block 1411, Projected Development Site 1) is registered as a small quantity generator (SQG) and historic Large Quantity Generator (LQG) of hazardous wastes typically associated with medical facilities, including: formaldehyde, xylene, chromium, spent non-halogenated solvents, corrosive wastes, ignitable wastes, pharmaceutical wastes, silver, mercury, and chloroform between approximately 1992 and 2018. Several prior violations were cited for the facility (as documented in a February 2011 Notice of Violation issued by NYSDEC) under the descriptions of "Generators Pre-transport," "Universal Waste —small quantity generators," and "Treatment, Storage, and Disposal facilities (TSDs)—Interim Status (IS) preparedness and prevention" that were subsequently resolved/closed (these closed status violations were not indicative of environmental concerns).
- Historical land use maps and city directories indicated that the current ancillary hospital buildings on the north-adjacent block (Block 1412, Projected Development Site 1a) contained three dwellings since at least 1898 and were noted to include several commercial and automotive uses between circa 1911 and 2005, including auto storage houses, offices, and a farrier (subsequently a garage) at 113 East 77th Street. Historic garage uses were also noted at the 111 and 115 East 77th Street buildings. Such uses may have included petroleum and/or solvents and mercury (associated with the former farrier).
- Historical land use maps, city directories and the regulatory database review identified nearby uses between circa 1896 and 2005, including automotive garages on blocks south, northeast, and west of the Property, and several drycleaners on the surrounding blocks. The regulatory database information indicated two closed-status spills documenting petroleum contaminated soil and groundwater at 122 East 78th Street (immediately north of Projected Development Site 1a). Nearby off-site facilities may have affected regional subsurface conditions.

Business Environmental Risks (including items outside the scope of ASTM E1527-13 such as asbestos containing material [ACM], lead-based paint [LBP], and/or polychlorinated biphenyls [PCBs] in building materials or fill/debris)

- Based on the age of the buildings, electrical equipment, caulking, hydraulic equipment and lighting fixtures may include polychlorinated biphenyls (PCB) or mercury-containing components. No obvious leaks were observed in connection with observed equipment or the lighting fixtures.
- Suspect asbestos-containing materials (ACM) were observed during the reconnaissance and included: wallboard, vinyl and ceramic floor tiles and associated mastics, joint compound, tile grout and adhesive, suspended ceiling tiles, pipe insulation, duct insulation, electrical panels, fire doors, caulks, putties, brick and block mortar, and roofing materials. Suspect ACM were noted to be in generally good to damaged condition.
- Based on the age of the buildings, lead-based paint may be present on indoor and outdoor surfaces. Painted surfaces were observed to be in generally good to damaged condition.
- Buried demolition debris from historic on-site structures (which may include ACM, LBP, and/or USTs) and/or historic fill material may be present beneath the Property.
- The LHH facility was listed as a former Chemical Bulk Storage (CBS) facility with a closed facility status for one closed-in-place 1,300-gallon sodium hydroxide AST (installed in 1988). No closure date was provided in the listing for the AST.

De Minimis Condition

- A closed spill (Spill No. 1700632) was listed with an address of 115 East 77th Street (on Projected Development Site 1a) in April 2017. The spill file notes indicated that approximately 15 gallons of diesel was released on the roadway outside of the building from a commercial vehicle. The file record indicated that corrective actions were initiated, the spill was cleaned, and no sewers were affected. The spill number was closed on the same day it was reported. Based on the spill details, it is not anticipated to have affected environmental conditions at the Property

Recommendations

- On-site petroleum tanks should continue to be maintained in compliance with applicable petroleum storage tank regulatory requirements, specifically NYSDEC PBS registration requirements and federal Spill Prevention, Control, and Countermeasure (SPCC) requirements. Future closure of the tanks for redevelopment purposes or other reasons should be conducted and reported to the NYSDEC in accordance with all applicable regulations.
- Prior to undertaking subsurface disturbance, a subsurface investigation should be performed to establish subsurface conditions and identify the need for remediation and/or regulatory requirements for handling of excavated materials.
- Soil disturbance for any future development be conducted in accordance with a Remedial Action Plan (RAP) and Construction Health & Safety Plan (CHASP).
- During any future subsurface disturbance, all excavated soil and any debris should be handled and, if surplus or contaminated, disposed of in accordance with applicable regulatory requirements. If any unforeseen USTs are encountered, they should be closed and removed, along with any associated contaminated soil, in accordance with applicable regulatory requirements.
- Prior to demolition (or other disturbance) suspect ACM should be sampled by a NYC-certified asbestos investigator prior to disturbance. Any such ACM should be removed and disposed of prior to the disturbance in accordance with local, state and federal requirements.
- Unless there is labeling or test data indicating that suspect PCB-containing fluorescent lighting fixtures and electrical equipment do not contain PCBs, and that fluorescent lighting fixtures do not contain mercury, if disposal is required, it should be performed in accordance with applicable federal, state and local requirements.
- Any activities with the potential to disturb lead-based paint must be performed in accordance with applicable requirements (including federal Occupational Safety and Health Administration regulation 29 CFR 1926.62 - *Lead Exposure in Construction*).
- If suspect ACM or PCB-containing equipment (e.g., fluorescent lighting fixtures or electrical equipment) are identified in fill or demolition debris beneath the Property, handling and disposal should be in accordance with applicable federal, state and local regulations and guidelines.

1.0 INTRODUCTION

AKRF, Inc. (AKRF) was retained by Lenox Hill Hospital (LHH or the "Client") to perform a Phase I Environmental Site Assessment (ESA) of LHH's existing campus on the block bounded by Park and Lexington Avenues and East 76th and East 77th Streets (Block 1411, Lots 1 and 113) (aka Projected Development Site 1) and three buildings on the north side of East 77th Street across from the main hospital complex (Block 1412, Lots 9, 10, and 11) (aka Projected Development Site 1a) in Manhattan, New York (collectively, the Property). The LHH hospital complex (Projected Development Site 1) has a total area of approximately 82,753 square feet (sf) and contains adjoining buildings on Lots 1 and 113. These buildings were developed separately between the late 1800s and mid-1970s and have been interconnected to function as a single hospital facility with two ancillary (mainly vacant) former residential structures on the southeastern portion of the hospital campus. The three ancillary 3-story office buildings located on the north adjacent block (Projected Development Site 1a) are used mainly for an emergency medical services (EMS) office, file storage and medical offices by LHH. The Phase I ESA was conducted to provide preliminary environmental information as part of due diligence for the proposed redevelopment and renovation of the Property buildings and facilities.

The proposed redevelopment of the Property would entail demolition of portions of the current hospital and renovations of existing structures for a new state-of-the-art hospital facility (to occur in multiple stages).

The scope of services for this assessment was in conformance with ASTM Standard E1527-13 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice)*. Any exceptions to, or deletions from, this practice are described in Section 8.0. The scope included the following:

- Observations of the Property (reconnaissance) to identify potential sources or indications of hazardous substances, including: aboveground storage tanks (ASTs); underground storage tanks (USTs); tank vents and fill ports; transformers and other items that could contain polychlorinated biphenyls (PCBs), drums or areas where hazardous materials were used, stored, or disposed; stained surfaces and soils; stressed vegetation, leaks, odors. In addition, neighboring properties were viewed, but only from public rights-of-way, to identify similar concerns.
- Reasonably ascertainable geological and groundwater (hydrogeological) information was evaluated to assist in determining the potential for contamination migration (including in soil, soil vapor, and/or groundwater) within, from, and onto the Property.
- The reconnaissance of the Property included observation of any readily visible suspect asbestos-containing materials (ACMs) and potential lead-based paint. However, no samples were collected or analyzed, and this reconnaissance provides neither definitive nor exhaustive information.
- A state database of county-level radon concentrations was used to determine typical indoor radon levels and compare them to United States Environmental Protection Agency (USEPA) guidelines.
- Historical fire insurance maps, topographic maps, and aerial photographs for the Property and nearby properties were reviewed to evaluate historical land uses.
- The following federal regulatory databases were reviewed to determine the regulatory status of the Site and properties within the ASTM-specified radii: National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); and the Air Discharge Facilities Index (ADF). The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

- The following state regulatory databases were reviewed to determine the regulatory status of the Property, adjacent properties, and properties within a predetermined study area; the listings of hazardous material spills (SPILLS); Resource Conservation and Recovery Act Notifiers (RCRA); Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); Major Oil Storage Facilities (MOSF); Brownfield Sites; and Historic Utility Sites.
- Local agency reviews including NYC Fire Department records (obtained as part of the database search), online Buildings and Finance Departments records, and City Environmental Quality Review (CEQR) (E) Designation Sites were conducted for the Property only.

2.0 PHYSICAL SITE DESCRIPTION

Visual assessment of the Property and adjacent areas was performed on February 28, 2022, by Ms. Neoma Chefalo of AKRF. Environmental Health and Safety (EHS) Facilities Services personnel at Northwell Health provided access for AKRF and answered pertinent questions. The weather was clear and approximately 35 °F, and the visibility good. The Property was inspected for stained surfaces, storage tanks, drums, leaking pipes, transformers, suspect asbestos-containing materials (ACMs), suspect lead-containing paint, distressed vegetation, and any other evidence of hazardous material usage and storage on-site. Photographs documenting the site inspection are included in Appendix A.

2.1 General Site Conditions

As shown on Figure 2, the Property includes the hospital block (Block 1411, Lots 1 and 113) (Projected Development Site 1) and one ancillary site (Block 1412, Lots 9, 10 and 11) (Projected Development Site 1a) (the Property). The LHH hospital complex (Projected Development Site 1) has a total area of 82,753 sf and is improved with eight adjoining hospital buildings (Lachman, Wollman, Einhorn, Uris, William Black Hall of Nursing and Achelis buildings, and the Main and East buildings,) with a basement and a sub-basement. In addition to the main hospital buildings, two small 4-story buildings (aka the rowhouses) adjoined the hospital complex located on the southeastern portion of the block (Lot 113 and a portion of Lot 1) which are mainly vacant and used for file storage by the hospital. Building materials appeared to be in poor to damaged condition and only portions of the first floor of these buildings were accessed.

The Property buildings are constructed of concrete, masonry, and brick. Interior finishes include ceramic tile, gypsum board, plaster and concrete block walls; concrete, ceramic and vinyl floor-tiled floors; and gypsum board and suspended ceiling tiles. The buildings are heated by high-pressure steam provided by Consolidated Edison and natural gas and electric air handling units. Cooling systems included a combination of window-mounted air conditioners and air handling units. The Property buildings are serviced by traction and freight elevators.

Projected Development Site 1

The Main LHH facility is bounded by Park and Lexington Avenues and East 76th and East 77th Streets and contains a sub-basement, which is located below portions of the Uris, Main, Lachman and Einhorn buildings. The sub-basement contains mechanical rooms, chiller equipment, offices and storage rooms. Two steel 317-gallon diesel day tanks are located within an emergency generator room on the central portion of the sub-basement. The tanks were supplied by a larger aboveground storage tank (AST) in the northwestern portion of the basement level (discussed below) and are used to fuel the hospital emergency generators. The basement contained mechanical spaces, including chiller equipment, water piping, steam piping and electrical equipment, carpentry and electrical shop areas, locker rooms, linen storage areas, pharmaceutical waste storage areas

(discussed below), janitorial storage areas, a mail room, sterilization areas, a morgue and employee areas.

Several containers (ranging in size from approximately 5 to 55 gallons) of maintenance-related chemicals (i.e., water treatment chemicals) and petroleum (i.e., gear lubricants and hydraulic oil) were observed within designated basement- and sub- basement-level mechanical areas. The observed containers were generally neatly stored and no significant staining or evidence of a material release was noted. Floor drains were noted in the mechanical areas in the, with no evidence of a material release (some were noted to have standing water).

The first floor contained the main hospital lobby (with an entrance along East 77th Street), admissions, security, guest services a pharmacy, offices, an auditorium and a loading dock located on the southwestern portion of the campus, with 3 loading berths along East 76th Street. The upper floors contained examination and treatment rooms, nurses' stations, operating rooms, visitor rooms, patient rooms, classrooms, offices and utility rooms. The 12th floor contained clinical laboratories and laboratory storage areas.

Rooftop mechanical equipment included elevator machinery, chillers and air handling equipment and additional air handling units were mounted to the roofs of the buildings on steel dunnage. Built-up roofing materials appeared to be in fair condition.

Bulk Petroleum and Chemical/Hazardous Waste Storage

Petroleum Bulk Storage (PBS) associated with the hospital's emergency generator systems included a 20,000-gallon diesel AST located within a basement-level concrete tank room. The tank was equipped with a leak detection system and the PBS certificate was posted on the tank room door. The AST supplied diesel fuel to two (2) 317-gallon day tanks within a sub-basement-level emergency generator room. An ancillary 330-gallon diesel AST was also supplied by the 20,000-gallon AST, and was located on the roof of the Uris building. The tanks are currently registered under the facility's PBS permit #2-606498 with NYSDEC.

Small amounts of medical wastes and hazardous wastes generated in the hospital operating rooms and clinical laboratories (including the chemistry, cytology pathology, microbiology, and immunohistochemistry laboratories on the 12th floor) and pharmaceutical wastes were deposited in disposal receptacles throughout the buildings, which were collected by building personnel and placed in the designated waste accumulation areas, including a laboratory waste accumulation room on the 12th floor, and a central accumulation area for pharmaceutical wastes in the basement for removal by private haulers. Site personnel indicated that regulated Medical Waste (RMW) and biohazardous sharps are generated throughout the LHH facilities and are managed by a private contractor.

No evidence of a material release was observed in the bulk petroleum storage or waste accumulation areas.

Projected Development Site 1a

Projected Development Site 1a was located at 111-115 East 77th Street between Lexington and Park Avenues (Block 1412, Lots 9, 10 and 11). The three ancillary 3-story office buildings (used mainly for file storage and offices by LHH) were located on the block north-adjacent to the main hospital block. The buildings at 111-113 East 77th Street contained medical offices and offices for the EMS department, respectively, and the building at 115 East 77th Street contained IT offices and equipment rooms. The buildings contained natural gas meters, hot water heaters and small electric or natural gas fired boilers in the basements. An apparent former garage bay door and a

sign noting garage use were observed along the front of the 113 East 77th Street building. No evidence of a material release was observed in the buildings.

2.2 Topography and Hydrogeology

Topography at the Property was relatively level, with a slight downward slope to the east. Based on the U.S. Geological Survey, Central Park, NY Quadrangle (2013) map, the Property is approximately 65 feet above the National Geodetic Vertical Datum of 1988 (an approximation of mean sea level).

Groundwater is anticipated to be approximately 10 to 15 feet below grade based on nearby subsurface investigations provided in the regulatory database. Groundwater is assumed to flow in an easterly direction toward the East River, located approximately 3,400 feet away. However, actual flow can be affected by many factors including subway tunnels (including the adjacent No. 4, 5, and 6 subways beneath Lexington Avenue), underground utilities, and other factors beyond the scope of this study. Groundwater in Manhattan is not used as a source of drinking water.

2.3 Storage Tanks

2.3.1 Underground Storage Tanks (USTs)

During the reconnaissance, no evidence of USTs were observed on the Property. No records of USTs were identified for the Property in regulatory databases, computerized NYSDEC records.

Off-site USTs are discussed in Section 5.2.2.

2.3.2 Aboveground Storage Tanks (ASTs)

The main hospital was registered with the NYSDEC PBS Program (Facility ID #2-606498) with the following information:

Location	Capacity (gallons)	Product Stored	Install Date	Status	Approximate Distance/Direction from Site
Lenox Hill Hospital 100 East 77th Street	20,000 AST	Diesel	1972	In Service	Property
	2 x 317 AST		1982	In Service	
	330 AST		2015	In Service	

The diesel ASTs are used to supply the hospital's emergency generator system. The LHH facility was also listed as a former Chemical Bulk Storage (CBS) facility with an unregulated/closed facility status for one closed-in-place 1,300-gallon sodium hydroxide AST (installed in 1988). No closure date was provided in the listing for the AST.

No tank records were identified in the regulatory database information for Lot 113, or the buildings on the north-adjacent block (Block 1412, Lot 9, 10 and 11), however historical land use maps indicated previous garage uses on these lots that may have included the use of gasoline and/or fuel oil.

Off-site ASTs are discussed in Section 5.2.2.

2.4 Polychlorinated Biphenyls (PCBs) and Mercury

Until 1979, polychlorinated biphenyls (PCBs), which provided beneficial insulating properties, were used in a variety of products, in particular electrical equipment such as transformers,

capacitors, fluorescent light fixtures, and voltage regulators, but also in hydraulic fluids and some other products such as caulking.

Based on the age of the buildings (constructed between circa the 1890's and the mid-1970s), electrical equipment, caulk, hydraulic equipment, and lighting fixtures, switches and thermostats may include PCB- or mercury-containing components. No obvious leaks or odors were noted in connection with observed equipment or the lighting fixtures.

2.5 Lead-Based Paint

Lead-based paint was generally not used inside residential buildings after 1977 nationwide. After 1977, its use inside commercial structures was also restricted and its use elsewhere became less common, but lead-based paint may still sometimes be used outdoors. Lead-based paint can present a hazard, particularly to children, especially when it is in poor condition.

Based on the age of the buildings (constructed between circa the 1890's and the mid-1970s), lead-based paint may be present on and within the Property structures. Painted surfaces were observed to be in generally fair condition, with some damaged paint noted within mechanical/utility spaces. Any renovation activities with the potential to disturb lead-based paint must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62—Lead Exposure in Construction).

2.6 Utilities

Consolidated Edison (ConEd) provided electricity, steam and natural gas to the Property and surrounding area. The Property was connected to the New York City municipal water and sanitary/storm sewer systems.

2.7 Waste Management and Chemical Handling

Chemical/laboratory wastes, biohazardous/medical wastes were stored in designated receptacles throughout the Property buildings, which were collected by building personnel and placed in the designated waste accumulation areas in the hospital buildings for removal by private haulers. LHH is also registered as a generator of typical hospital related wastes, as noted in Section 5.2.2.

2.8 Radon

Radon is a colorless, odorless radioactive gas that results from the natural breakdown of uranium minerals in soil, rock, and water, which subsequently enters the atmosphere. It can concentrate in buildings, entering through cracks and other penetrations of a building foundation. Some areas are more likely to have elevated concentrations of radon than others, reflecting subsurface lithologic conditions.

The New York State Department of Health (NYSDOH) maintains a database of radon test results on a local and county level. According to NYSDOH, 119 radon tests were conducted in Manhattan in November 2021. The average basement radon level was found to be 1.65 picoCuries per liter (pCi/L), below the USEPA recommended action level of 4.0 pCi/L.

3.0 ASBESTOS-CONTAINING MATERIALS (ACM)

Asbestos refers to a group of natural minerals that provide good fire resistance and insulation. Asbestos is also commonly found in vinyl flooring, plaster, sheetrock, joint compound, ceiling tiles, roofing materials, gaskets, mastics, caulks and other products. Materials containing more than one percent asbestos are considered asbestos-containing materials (ACM). ACM are classified as either friable (i.e., more readily release fibers, such as most spray-applied fireproofing) or non-friable (such as floor tiles).

Suspect ACM were observed during the reconnaissance and included: wallboard assemblies, vinyl and ceramic floor tiles and associated mastic, joint compound, tile grout and adhesive, suspended ceiling tiles, pipe insulation, duct insulation, electrical panels, fire doors, caulks, putties, brick and block mortar, and roofing materials. Suspect ACM were noted to be in good to fair condition, with some limited damaged materials within mechanical spaces. ACM may also be present in other locations not readily accessible during the reconnaissance. This reconnaissance did not constitute and cannot substitute for an asbestos survey, which includes comprehensive inspection and material sampling with laboratory testing.

Regulatory requirements for ACM (or suspect ACM until proven not to be ACM) include maintenance requirements and, prior to any renovation or demolition, inspection/sampling by a NYS-certified asbestos inspector to determine if the project will disturb ACM. Any such ACM (and any other ACM subsequently identified) must be removed prior to the renovation or demolition.

4.0 ADJACENT LAND USE

LHH's existing hospital complex occupying Block 1411 Lots 1 and 113 (aka Projected Development Site 1) is located in the Upper East Side of Manhattan and bounded by Park and Lexington Avenues and East 76th and East 77th Streets in Manhattan, and three contiguous tax lots on the north-adjacent block from the main LHH campus, located at 111-115 East 77th Street between Lexington and Park Avenues (Block 1412, Lots 9, 10, and 11) (aka Projected Development Site 1a). The surrounding blocks are primarily residential (some with street-level retail), with interspersed commercial/office buildings, school uses including the Allen Stevenson School on the north-adjacent block from the hospital (immediately northeast of Development Site 1a) and religious structures, including the St. Jean Baptiste Roman Catholic Church on the southeast-adjacent block.

5.0 PROPERTY HISTORY AND RECORDS REVIEW

5.1 Prior Ownership and Usage

5.1.1 Historical Land Use maps

Historical insurance maps were reviewed for indications of uses (or other evidence) suggesting hazardous materials generation, usage, or disposal on or near the Property. Specifically, Sanborn Fire Insurance Maps from 1896, 1911, 1939, 1951, 1979-1985, 1991-1995, and 2001-2005 were reviewed.

1896

Property: The current main hospital location on Block 1411 (Projected Development Site 1) comprised the "German Hospital" on the north side of the block and apparent tenement buildings on the southern portion. Lot 113 contained a 3-story tenement building. The current ancillary hospital buildings on the north-adjacent block (Block 1412/Projected Development Site 1a) contained three dwellings.

Surrounding Property: The surrounding areas contained dwellings and outbuildings, stables and some interspersed institutional uses, including a church and several school buildings on the east-adjacent block.

1911

Property: The German Hospital on Projected Development Site 1 had expanded, with an additional wing containing a dispensary, laundry, electrical plant and boilers extending from the western portion of the hospital building, and additional ancillary structures, including a lungs and throat ward, an isolation ward, a carpentry shop and a nurses home noted to the south of the hospital structure. Lot 113 contained a 4-story residential building with a store. The current ancillary buildings on the north-adjacent block (Block 1412/Projected Development Site 1a) remained occupied by three dwellings, the structure at 113 East 77th Street was noted to contain a farrier and an auto storage house was noted at 115 East 77th Street.

Surrounding Property: Additional dwellings, stables, and religious structures were depicted on the surrounding blocks, and additional school structures, labeled as the St Ann's Academy were noted on the east-adjacent block across Lexington Avenue.

1939-1951

Property: The Lenox Hill Hospital campus expanded and was shown to occupy the entirety of Block 1411 (Projected Development Site 1), with the Einhorn Memorial Building noted on the southeastern portion of the block, with a construction date of 1938, and an adjoining training school for nurses along Lexington Avenue, with a construction date of 1918 and the private ward pavilion on the southwestern portion of the block, with a construction date of 1912. The main hospital building was located on the south-central portion of the block, with multiple elevator banks and a boiler house, and a construction date of 1930. The current ancillary hospital buildings on the north-adjacent block (Block 1412/Projected Development Site 1a) remained occupied by the three dwellings, with a garage noted at 113 East 77th Street on the first floor (the farrier was no longer noted at this location) and an auto storage house was noted at 111 East 77th Street.

Surrounding Property: The surrounding blocks were primarily developed with multi-unit apartment buildings and smaller dwellings, with interspersed stores, schools, and religious structures. A garage with gasoline tanks was noted on the southern portion of the south-adjacent block. A small garage and several auto storage houses were noted on the west-adjacent block.

1979-1985

Property: The Uris Pavilion was shown on the western portion of the main hospital campus on Block 1411 (Projected Development Site 1), with a construction date of 1974-1975 and several additions to the northern portion of the hospital complex, including the Wollman Pavilion, community health center, and school of nursing, with construction dates between 1958 and 1964, were noted in place of former hospital wards noted on prior maps. The current ancillary hospital buildings on the north-adjacent block (Block 1412/Projected Development Site 1a) remained similar to the 1951 map, with office use and a garage on the first floor of 113 East 77th Street.

Surrounding Property: Additional multi-unit residential structures were shown in the surrounding neighborhood, including several apartment buildings with associated parking

structures on the east-adjacent block in place of the former St. Ann's Academy campus noted on prior maps.

1991-1995

The Property and surrounding area appeared similar to the 1985 Sanborn map. The current ancillary hospital buildings on the north-adjacent block (Block 1412/Projected Development Site 1a) were relabeled as hospital and/or office buildings and the garage remained depicted at 113 East 77th Street.

2001-2005

The Property and surrounding neighborhood appeared similar to the 1995 Sanborn map.

Summary

In summary, historical Sanborn maps indicated that Block 1411 (Projected Development Site 1) comprised the "German Hospital" on the north side of the block and apparent tenement buildings on the south side since at least 1898. Between circa 1911 and 1939, the hospital complex expanded, with several additions and new hospital structures including the Einhorn Memorial Building. By 1939, the entire hospital block (Block 1411) was occupied by the LHH campus, with additional hospital structures including the Uris and Wolman Pavilions and a community health center noted by 1979; the hospital campus remained similar through the 2005 Sanborn map.

Sanborn maps indicated that the current ancillary LHH buildings on the north-adjacent block (Block 1412/Projected Development Site 1a) contained three dwellings since at least 1898, that were noted to include several commercial uses between circa 1911 and 2005 including auto houses, offices and a farrier (subsequently a garage) at 113 East 77th Street.

The surrounding neighborhood was primarily residential since at least 1896, with interspersed commercial, religious and educational buildings noted between circa 1911 and 2005, and some automotive uses including garages on blocks south, northeast, and west of the Property.

5.1.2 Property Tax Files and Zoning Records

Based on NYC Department of City Planning's Primary Land Use Tax Output (PLUTO), the Property is zoned as R8B (Residential). The Department of Finance Building Classification is I1-Hospitals & Health and O-8 Office Buildings.

5.1.3 Recorded Land Title Records

Copies of title records were not provided to AKRF for review. Copies of title records were not provided to AKRF for review. A review of computerized New York City Automated City Register Information System (ACRIS) records, which included records of financial transactions involving the Property, identified no environmental liens or use restrictions for the Property.

5.1.4 Local Street Directories

A review of historical city directories was conducted. The following table (Table 1) presents descriptions and interpretations from the historical city directory review:

Table 1
Historical City Directories

Year	Comments
1920	**Property:** Garage at 113 East 77th Street, Residential, stables **Surrounding Properties:** Residential, stables,
1927	**Property:** Garage at 115 East 77th Street, Residential, stables **Surrounding Properties:** Residential, stables, dyers and cleaners at 1078 Lexington Avenue
1934	**Property:** Lenox Hill Hospital, Residential, doctors' offices **Surrounding Properties:** Residential; Commercial
1938	**Property:** Lenox Hill Hospital, Residential, doctors' offices **Surrounding Properties:** Residential; Commercial, cleaners and dyers at 1060 Lexington Avenue.
1950	**Property:** Lenox Hill Hospital, Residential, doctors' offices **Surrounding Properties:** Residential; Commercial; Healthcare, cleaners and dyers at 1060 Lexington Avenue.
1963	**Property:** Lenox Hill Hospital, doctors' offices **Surrounding Properties:** Residential; Commercial; Healthcare
1978	**Property:** Lenox Hill Hospital, doctors' offices **Surrounding Properties:** Residential; Commercial; Healthcare, dry cleaners at 1056 Lexington Avenue
1988	**Property:** Lenox Hill Hospital, doctors' offices **Surrounding Properties:** Residential; Commercial; Healthcare, Lenox Club Garage at 139 East 77th Street
1994	**Property:** Lenox Hill Hospital, doctors' offices **Surrounding Properties:** Residential; Commercial; Healthcare, Carlton Tower Cleaners at 1104 Lexington Avenue
2000	**Property:** Lenox Hill Hospital, doctors' offices **Surrounding Properties:** Residential; Commercial; Healthcare
2009	**Property:** Lenox Hill Hospital, doctors' offices **Surrounding Properties:** Residential; Commercial; Healthcare, Carlton Tower Cleaners at 1104 Lexington Avenue
2017	**Property:** Lenox Hill Hospital, doctors' offices **Surrounding Properties:** Residential; Commercial; Healthcare, Carlton Tower Cleaners at 1104 Lexington Avenue

The City Directory review indicated that the Property was developed with the Lenox Hill Hospital since at least circa 1934. The surrounding areas contained a mixture of residential and commercial uses, including several drycleaners, garages and dyers and cleaners in the surrounding neighborhood. Garages were noted at 113 and 115 East 77th Streets (on Projected Development Site 1a), which is consistent with historical information provided in Sanborn maps. A copy of the City Directory report is provided in Appendix C.

5.2 Regulatory Review

The regulatory database report, provided in Appendix D, was obtained from EDR, Inc. of Shelton, CT. It includes summaries of the databases searched, their radii around the Property, and limitations of the data. The databases searched and associated radii were consistent with ASTM E1527-13 outlined standards.

5.2.1 Federal

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD);; and the Air Discharge Facilities (ADF). The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

National Priority List (NPL)

The NPL is the USEPA's list of sites that probably require remedial action under the Superfund Program. Nearby NPL sites can sometimes pose a risk of stigmatizing surrounding properties and thus impacting property values.

No NPL sites were identified within a one-mile radius of the Property.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

CERCLIS is a compilation of sites which the USEPA has investigated, or plans to investigate, pursuant to the Superfund Act of 1980 (CERCLA). As such, some of these sites may ultimately present concerns and others may not (but could still pose a perceived concern). Former CERCLIS sites that have been granted the status of No Further Remedial Action Planned (NFRAP) are also included in this database.

No CERCLIS sites were identified within a ½-mile of the Property.

Emergency Response Notification System (ERNS)

This federal database, compiled by the Emergency Response Notification System, records and stores information on certain reported releases of petroleum and other potentially hazardous substances.

The Property was not listed on the ERNS database.

Toxic Chemical Release Inventory System (TRIS)

The TRIS contains information reported by a variety of industries on their annual estimated releases of certain chemicals.

No TRIS sites were identified within a ⅛-mile radius of the Property.

Permit Compliance System of Toxic Wastewater Discharge (WWD)

This database includes certain sites which discharge wastewater containing potentially hazardous chemicals.

No WWD facilities were reported within ⅛-mile of the Property.

Air Discharge Facilities (ADF) Index

This federal database includes information on certain air emission sources.

The Property was not listed an ADF facility. No ADF facilities were identified within a ⅛-mile radius of the Property.

5.2.2 State

The state records reviewed included listings of hazardous material spills; Resource Conservation and Recovery Act (RCRA) Notifiers; Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); State Hazardous Substance Waste Disposal Sites (SHSWDS); Major Oil Storage Facilities (MOSF); Brownfield Sites; Historic Utility Sites; Environmental Restoration Program (ERP) sites; Voluntary Cleanup Program (VCP) sites and Brownfield Cleanup Program (BCP) sites.

New York SPILLS Database

This database includes releases reported to the NYSDEC, including tank test failures (for USTs only) and tank failures.

One closed spill (Spill No. 1700632) was listed with an address of 115 East 77th Street (on Projected Development Site 1a) in April 2017. The spill file notes indicated that approximately 15 gallons of diesel was released on the roadway outside of the building from a commercial vehicle. The file record indicated that corrective actions were initiated, and the spill was cleaned, and no sewers were affected. The spill number was closed on the same day it was reported. Based on the spill details, it is not anticipated to have affected environmental conditions at the Property. An additional 555 spills and 116 LTANKS were reported within a ½-mile radius of the Property. Of these, the following incidents indicated potential environmental concerns based on distance/direction and/or listing details:

- Spill No. 1300596 was reported at 122 East 78th Street (immediately north of Projected Site 1a) in April 2013 when contaminated soil was discovered in the basement of the building during excavation for plumbing work. The file entries noted that soil samples of the affected soil were collected, and based on laboratory analytical results, the NYSDEC closed the spill in August 2013. Spill No. 1205085 was listed at this location in August 2012, when petroleum-contaminated soil was discovered during excavation activities for a new elevator. The file notes indicated that apparent shallow groundwater was observed in the excavation, and a reported quantity of 124.79 tons of affected soil and 10,275 gallons of oily water were removed for off-site disposal. Post-excavation endpoint samples were collected, and laboratory analytical results were reported to be within acceptable limits, according to the file notes, and NYSDEC closed the spill in March 2013.

Based on listing details, including nature of the spills, distance from the Property, and/or inferred groundwater flow direction, the remaining listed spills would not be expected to have significantly affected subsurface conditions at the Property. Details from all spills are included in Appendix D.

Resource Conservation and Recovery Act (RCRA) Notifiers Listings

This database lists sites that have filed notification forms regarding hazardous waste activity, including: treatment, storage and disposal facilities (TSDs); small-quantity (SQG) and large-quantity generators (LQG); and transporters regulated under RCRA. The discussion below includes any CORRACTS listings of facilities that are subject to corrective action under RCRA.

No CORRACTS sites were listed within a one-mile radius of the Property. No TSD facilities were listed within a ½-mile radius of the Property. A total of 12 RCRA

Generators/Transporters (including the Property) and 102 RCRA Non-Generators were reported within a ⅛-mile radius of the Property. The Property (Projected Development Site 1) was listed as a RCRA Generator/Transporter with the following information:

- The LHH main hospital (Block 1411, Projected Development Site 1) was registered as a small quantity generator (SQG) and historic Large Quantity Generator (LQG) of hazardous wastes typically associated with medical facilities, including: formaldehyde, xylene, chromium, spent non-halogenated solvents, corrosive wastes, ignitable wastes, pharmaceutical wastes, silver, mercury, and chloroform, between approximately 1992 and 2018. Several prior violations were cited for the facility (also documented in a February 2011 Notice of Violation issued by NYSDEC) under the descriptions of "Generators Pre-transport," "Universal Waste – small quantity generators," and "Treatment, Storage, and Disposal facilities (TSDs) – Interim Status (IS) preparedness and prevention" that were resolved/closed; no outstanding violations were noted in the listing (the closed status violations were not indicative of current environmental concerns).

Based on their locations or listing details (i.e., waste type, including Con Edison subterranean transformers in the surrounding sidewalks where releases would likely be contained within the vaulted structures), the remaining RCRA facilities, are not anticipated to affect environmental conditions at the Property.

Chemical Bulk Storage (CBS) Database

The New York CBS is a list of facilities that store regulated non-petroleum substances in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

The Property was listed as a former CBS facility with an unregulated/closed facility status for one closed-in-place 1,300-gallon sodium hydroxide AST (installed in 1988) that may be associated with a former swimming pool at the main hospital. No closure date was provided in the listing. Based on details provided in the listing, the former tank is not likely to have significantly affected environmental conditions at the Property. No other CBS facilities are listed within a ⅛-mile radius of the Property.

Solid Waste Facilities (SWF)

This database includes certain landfills, incinerators, transfer stations, recycling centers, and other sites which manage solid waste.

No Solid Waste Facilities were identified within a ½-mile radius of the Property. Based on its distance from the Property and listing details, the facility would not be expected to have affected the Property subsurface.

Petroleum Bulk Storage (PBS) Database

This database lists facilities that registered having either aboveground or underground petroleum tanks with total storage exceeding 1,100 gallons. Facilities with more than 400,000 gallons appear on the Major Oil Storage Facilities (MOSF) database (see below).

A total of 82 PBS facilities (including the Property) were identified within a ⅛-mile radius of the Property. Details for the Property and pertinent facilities are given in Table 2:

Table 2
Petroleum Bulk Storage Facility Data

Location	Capacity (gallons)	Product Stored	Install Date	Status	Approximate Distance/Direction from Site
Lenox Hill Hospital 100 East 77th Street	20,000 AST	Diesel	1972	In Service	Property (Projected Development Site 1)
	2 x 317 AST		1982	In Service	
	330 AST		2015	In Service	
Residence 122 East 78th Street	15,000 AST	No. 2 Fuel Oil	Not Reported	Closed-Removed	North-Adjacent to Projected Development Site 1a

The facility at 122 East 78th Street was also listed on the NY Spills database, as noted previously. Based on listing details, distance from the Property, and/or inferred groundwater flow direction, the remaining listed PBS facilities would not be expected to have significantly affected the Property. Details of the additional PBS facilities located within ¼ mile of the Property are included in Appendix D.

State Inactive Hazardous Waste Disposal Site Registry (SHWS)

This program (also known as State Superfund) lists information regarding a variety of sites likely requiring cleanup.

Three SWHS were identified within a ½-mile radius of the Property. Based on their distances from the Property (over ¼ mile away) and/or inferred groundwater flow direction, the facilities are not likely to have affected the Property subsurface.

State Hazardous Substance Waste Disposal Site Study (SHSWDS)

This database tracks certain sites that were not listed on SHWS, but may still require investigation and/or cleanup.

No SHSWDS facilities were identified within a ½-mile radius of the Property.

Major Oil Storage Facilities (MOSF) Database

These facilities have petroleum storage of 400,000 gallons or more.

No Major Oil Storage Facilities were reported within a ½-mile radius of the Property.

Environmental Restoration Program

These sites (which are generally municipally-owned) are receiving New York State funding for site investigation and remediation. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No ERP sites were identified within a ½-mile radius of the Property.

Voluntary Cleanup Program/Brownfield Cleanup Program

The Voluntary Cleanup Program (VCP) is a NYSDEC program for investigation and remediation of (generally) privately-owned sites. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present. The Brownfield Cleanup Program (BCP) program is the successor to the Voluntary Cleanup Program. Again, some sites have known

contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

One BCP site was identified within ½-mile of the Property. Based on distance from the Property and inferred groundwater flow location, this facility is not anticipated to have affected the Property subsurface.

New York City (E) Designation Site Listing

A New York City (E) designation for a property requires that the owner conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Office of Environmental Remediation (OER) before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements).

The Property was not assigned (E) designations, per the database information.

5.2.3 Local Agency File Review

Records available online from the New York City Buildings and Finance Departments were viewed for the Property (Appendix C). Since the records typically address a multitude of issues, the review focused on items likely to relate to the potential presence of hazardous materials, e.g., petroleum tank installation applications and permits, and records indicating prior uses.

Buildings Department (DOB)

Computerized Buildings Department records for the Property tax lots identified the following:

Block 1411/Lots 1 and 113 - Projected Development Site 1

- A 1931 Certificate of Occupancy (C of O) for a 14-story hospital building with a cellar and a basement, at 113-127 East 76th Street.
- A 1952 C of O for a 9-story classroom building (former nurses school) with dormitories on the 2nd through 9th floors at 1084-1090 Lexington Avenue.
- A 1959 Temporary C of O (TCO) for a 12-story building with a basement, occupied by: an incinerator room in the basement; administrative areas on the first floor; and x-ray rooms, delivery rooms and patient rooms on the upper floors at 100 East 77th Street. Additional TCOs were issued between 1960 and 1975 noting similar uses (no incinerator rooms were noted on the subsequent C of Os).
- A 1960 Temporary C of O (TCO) for a 10-story building with a cellar and a basement, occupied by: mechanical space in the cellar; a kitchen, autopsy room and an incinerator room in the basement; administrative areas on the first floor; and x- ray rooms, staff rooms and patient rooms on the upper floors at 861 Park Avenue.
- An open Environmental Control Board violation served in 2010 for failure to provide an engineering report certifying that exit signs are connected to emergency power sources or battery system.
- A 1988 permit for the installation of an emergency generator and a fuel oil tank in the sub-basement.

Block 1412/Lots 9, 10, and 11 - /Projected Development Site 1a

- A 1920 C of O for 111 East 77th Street noting a 3-story dwelling with a public garage on the first floor. A 1976 C of O for this location noted that the first floor contained a medical office.
- No C of Os were on file for 113 East 77th Street in the electronic DOB information.
- A 1951 C of O noting a 3-story office and storage building with a cellar at 115 East 77th Street. A 1970 C of O noted that the building was used for accessory offices to LHH.

Department of Finance

Electronic property transaction records for the Property Block and Lot were reviewed from the New York City Department of Finance Office Automated City Register Information System (ACRIS). No relevant files were identified.

New York City Department of Environmental Protection (NYCDEP)

AKRF sent a Freedom of Information Law (FOIL) request to the NYCDEP pertaining to environmental records. As of the date of this report, NYCDEP has not responded to the records request. If issues of potential concern are noted upon receipt of this information, an addendum to this report will be created to discuss relevant findings.

5.2.4 Additional Environmental Record Sources

To enhance the search, ASTM requires that additional local records be reviewed (i.e., beyond those included as part of the standard database search or checked online) when, in judgment of the environmental professional, such records for the Property or any adjoining property would be reasonably ascertainable; and useful, accurate and complete in light of the objective of the records review. These records include:

- Local brownfields lists
- Local lists of landfill/solid waste disposal sites
- Local lists of hazardous waste/contaminated Sites
- Local lists of registered tanks
- Local land records (for activity use limitations)
- Records of emergency release reports
- Records of contaminated public wells

Sources for these records include:

- Fire Department
- Local/Regional Water Quality Agency
- Local Electric Utility (for PCB records)

In addition to the Local Agency File Review, AKRF sent a FOIL request to the New York State Department of Environmental Conservation (NYSDEC) Region 2 for the Property to determine whether pertinent environmental records for the Property could be obtained for further review. As of the date of this report, NYSDEC has not responded to the records request. If issues of potential concern are noted upon receipt of this information, an addendum to this report will be created to discuss relevant findings.

In AKRF's judgment, no such additional local records meeting the ASTM criteria are pertinent for the Property.

6.0 USER-PROVIDED INFORMATION

In preparing this Phase I ESA, AKRF requested that the client provide any pertinent information regarding the Property, specifically:

- The reason for performing the Phase I ESA;
- Whether they were aware of any pertinent current or historic activities at or near the Property, including but not limited to: hazardous substances or petroleum, waste management practices, filling or disposal drains, septic/sewer systems, and potable and non-potable wells;
- Owner and occupant information and whether they were aware of any previous Phase I ESAs or other potentially pertinent reports, plans or information;
- Whether any *environmental liens* or *activity and land use limitations* are in place or filed or recorded against the Property or whether there was pending, threatened, ongoing or past violations, litigation or enforcement action relevant to hazardous substances or petroleum products;
- Whether they had any specialized knowledge or experience related to the Property or nearby properties (e.g., specialized knowledge of the chemicals used by this type of business);
- Whether the (anticipated) purchase price reflects that the Property is or could be contaminated; and
- Whether they were aware of commonly known or reasonably ascertainable information about environmental conditions of the Property including current/past uses of the Property and adjacent properties.

The Phase I ESA was conducted to provide preliminary environmental information as part of due diligence for the proposed renovation/redevelopment of the Property buildings. To the extent that pertinent additional information was provided, it has been summarized elsewhere in this report.

7.0 PREVIOUS STUDIES

Spill Prevention Control and Countermeasure (SPCC) Plan, Lenox Hill Hospital, 100 East 77th Street, Manhattan, P.W. Grosser Consulting, Inc., September 2019

The September 2019 Spill Prevention Control and Countermeasure (SPCC) Plan included an inventory of active bulk petroleum storage at the Property; identified sources of potential discharges; and outlined procedures and guidelines to ensure proper storage, handling, and maintenance of on-site petroleum and/or chemical bulk storage tanks and containers (and associated ancillary distribution piping where applicable). The SPCC also outlined proper spill prevention and containment measures (and associated equipment) to address any potential unforeseen releases and identified key personnel responsible for the implementation of the SPCC and associated recordkeeping requirements. The tanks identified in the plan were consistent with those observed during the site inspection and in the PBS registration.

Report of Geotechnical Investigation, Lenox Hill Hospital (100 East 77th Street) Manhattan, NY 10075, RA Consultants LLC, January 2018

The January 2018 Geotechnical Investigation included the advancement of 17 geotechnical borings in select basement and sub-basement areas within the hospital and within the East 76th Street sidewalk immediately south of the hospital. Borings encountered fill materials consisting of a mixture of gravel, sand, bricks, crushed stone, and construction debris (noted to extend to approximately 5 to 15 feet below the basement

level and to approximately 3 feet below the sub-basement level) underlain by decomposed rock and mica schist. Competent bedrock was encountered between approximately 10 and 25 feet below the basement level, and between approximately 5 and 20 feet below the sub-basement level. Two groundwater observation wells were installed within the East 76th Street sidewalk as part of the investigation; the depth to groundwater measured between approximately 17 to 18.5 feet below sidewalk grade and noted to be perched above bedrock and flowing toward the East River.

8.0 LIMITATIONS AND DATA GAPS

This assessment met the requirements of the American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 at the time it was performed, with the following limitations:

- Results of this investigation are valid as of the dates on which the investigation was performed.
- Certain restricted areas within the hospital building, including patient rooms, clean rooms, infectious and radioactive waste areas, sterilization areas, operating rooms, areas undergoing renovation and private offices were not accessible for inspection.
- Interviews and user provided information were limited to those discussed in Section 6.0. To the extent that interviews were not conducted with the list of interviewees cited in the ASTM Standard (past and present owners, operators, and occupants of the Property and local government officials), AKRF does not believe that this represents a significant data gap likely to result in additional or significantly changed recognized environmental conditions or conclusions.
- The Property area history was not conducted in five-year intervals. However, sufficient information about the history of the site and surrounding area could be obtained from the available historical Sanborn and topographic maps, Buildings Department records, and interviews, and this data gap is not likely to alter the conclusions of this report.
- Agency file reviews for the Property and adjacent properties consisted of a review of standard databases and electronic records maintained by pertinent departments and agencies (summarized in Section 5.2). AKRF believes that this file review was sufficient in determining the potential for recognized environmental conditions or other environmental concerns at the Property and additional reviews beyond this are not warranted and would not likely change the conclusions of this assessment.

No Significant Data Gaps were identified as part of this assessment.

9.0 FINDINGS

A summary of the assessment findings is presented below:

Recognized Environmental Conditions

- The Property (Block 1411, Projected Development Site 1) was registered with the New York State Department of Environmental Conservation (NYSDEC) Petroleum Bulk Storage (PBS) Program (PBS# 2-606498) with one in-service 20,000-gallon diesel aboveground storage tank (AST) located within a basement-level concrete tank room, two (2) 317-gallon day tanks within a sub-basement-level emergency generator room, and an ancillary 330-gallon diesel AST (also supplied by the 20,000-gallon AST) located on the roof of the Uris building. The tanks are currently used to fuel the LHH emergency generator systems. No spills were listed in regulatory database information in connection with the ASTs; however, undocumented releases from historic bulk petroleum storage operations may have affected environmental conditions at the Property.
- The LHH main hospital (Block 1411, Projected Development Site 1) is registered as a small quantity generator (SQG) and historic Large Quantity Generator (LQG) of hazardous wastes typically associated with medical facilities, including: formaldehyde, xylene, chromium, spent non-halogenated solvents, corrosive wastes, ignitable wastes, pharmaceutical wastes, silver, mercury, and chloroform between approximately 1992 and 2018. Several prior violations were cited for the facility (as documented in a February 2011 Notice of Violation issued by NYSDEC) under the descriptions of "Generators Pre-transport," "Universal Waste —small quantity generators," and "Treatment, Storage, and Disposal facilities (TSDs)—Interim Status (IS) preparedness and prevention" that were subsequently resolved/closed (these closed status violations were not indicative of environmental concerns). .
- Historical land use maps and city directories indicated that the current ancillary hospital buildings on the north-adjacent block (Block 1412, Projected Development Site 1a) contained three dwellings since at least 1898 and were noted to include several commercial and automotive uses between circa 1911 and 2005, including auto storage houses, offices, and a farrier (subsequently a garage) at 113 East 77th Street. Historic garage uses were also noted at the 111 and 115 East 77th Street buildings. Such uses may have included petroleum and/or solvents and mercury (associated with the former farrier).
- Historical land use maps, city directories and the regulatory database review identified nearby uses between circa 1896 and 2005, including automotive garages on blocks south, northeast, and west of the Property, and several drycleaners on the surrounding blocks. The regulatory database information indicated two closed-status spills documenting petroleum contaminated soil and groundwater at 122 East 78th Street (immediately north of Projected Development Site 1a). Nearby off-site facilities may have affected regional subsurface conditions.

Business Environmental Risks (including items outside the scope of ASTM E1527-13 such as asbestos containing material [ACM], lead-based paint [LBP], and/or polychlorinated biphenyls [PCBs] in building materials or fill/debris)

- Based on the age of the buildings, electrical equipment, caulking, hydraulic equipment and lighting fixtures may include polychlorinated biphenyls (PCB) or mercury-containing components. No obvious leaks were observed in connection with observed equipment or the lighting fixtures.
- Suspect asbestos-containing materials (ACM) were observed during the reconnaissance and included: wallboard, vinyl and ceramic floor tiles and associated mastics, joint compound, tile grout and adhesive, suspended ceiling tiles, pipe insulation, duct insulation, electrical panels, fire doors, caulks, putties, brick and block mortar, and roofing materials. Suspect ACM were noted to be in generally good to damaged condition.

- Based on the age of the buildings, lead-based paint may be present on indoor and outdoor surfaces. Painted surfaces were observed to be in generally good to damaged condition.
- Buried demolition debris from historic on-site structures (which may include ACM, LBP, and/or USTs) and/or historic fill material may be present beneath the Property.
- The LHH facility was listed as a former Chemical Bulk Storage (CBS) facility with a closed facility status for one closed-in-place 1,300-gallon sodium hydroxide AST (installed in 1988). No closure date was provided in the listing for the AST.

De Minimis Condition

- A closed spill (Spill No. 1700632) was listed with an address of 115 East 77th Street (on Projected Development Site 1a) in April 2017. The spill file notes indicated that approximately 15 gallons of diesel was released on the roadway outside of the building from a commercial vehicle. The file record indicated that corrective actions were initiated, the spill was cleaned, and no sewers were affected. The spill number was closed on the same day it was reported. Based on the spill details, it is not anticipated to have affected environmental conditions at the Property

Recommendations

- On-site petroleum tanks should continue to be maintained in compliance with applicable petroleum storage tank regulatory requirements, specifically NYSDEC PBS registration requirements and federal Spill Prevention, Control, and Countermeasure (SPCC) requirements. Future closure of the tanks for redevelopment purposes or other reasons should be conducted and reported to the NYSDEC in accordance with all applicable regulations.
- Prior to undertaking subsurface disturbance, a subsurface investigation should be performed to establish subsurface conditions and identify the need for remediation and/or regulatory requirements for handling of excavated materials.
- Soil disturbance for any future development be conducted in accordance with a Remedial Action Plan (RAP) and Construction Health & Safety Plan (CHASP).
- During any future subsurface disturbance, all excavated soil and any debris should be handled and, if surplus or contaminated, disposed of in accordance with applicable regulatory requirements. If any unforeseen USTs are encountered, they should be closed and removed, along with any associated contaminated soil, in accordance with applicable regulatory requirements.
- Prior to demolition (or other disturbance) suspect ACM should be sampled by a NYC-certified asbestos investigator prior to disturbance. Any such ACM should be removed and disposed of prior to the disturbance in accordance with local, state and federal requirements.
- Unless there is labeling or test data indicating that suspect PCB-containing fluorescent lighting fixtures and electrical equipment do not contain PCBs, and that fluorescent lighting fixtures do not contain mercury, if disposal is required, it should be performed in accordance with applicable federal, state and local requirements.
- Any activities with the potential to disturb lead-based paint must be performed in accordance with applicable requirements (including federal Occupational Safety and Health Administration regulation 29 CFR 1926.62 - *Lead Exposure in Construction*).
- If suspect ACM or PCB-containing equipment (e.g., fluorescent lighting fixtures or electrical equipment) are identified in fill or demolition debris beneath the Property, handling and disposal should be in accordance with applicable federal, state and local regulations and guidelines.

10.0 SIGNATURE PAGE

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property for which the assessment was performed. We have performed all the appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.

Neoma Chefalo, MPH
Senior Environmental Professional

Axel Schwendt
Vice President

11.0 QUALIFICATIONS

The purpose of this assessment was to convey a professional opinion about the potential presence or absence of contamination, or possible sources of contamination on the property, and to identify existing and/or potential environmental problems associated with the property including *Recognized Environmental Conditions* as defined in ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*.

The assessment was performed in accordance with customary principles and practices in the environmental consulting industry, and in accordance with the above-referenced ASTM Standard, except as noted otherwise in Section 8.0. It should only be used as a guide in determining the possible presence or absence of hazardous materials on the property at the time of the reconnaissance, as it is based upon the review of reasonably ascertainable records relating to both the property and the surrounding area, as well as a visual reconnaissance of current conditions.

This Phase I Assessment is not, and should not be construed as, a guarantee, warranty, or certification of the presence or absence of hazardous substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any hazardous substances which may be subject to regulatory approval. This report is not a regulatory compliance audit.

This report is based on services performed by AKRF, Inc. professional staff and observation of the property and its surroundings. We represent that observations made in this assessment are accurate to the best of our knowledge, and that no findings or observations concerning the potential presence of hazardous substances have been withheld or amended. The research and reconnaissance have been carried to a level that meets accepted industry and professional standards. Nevertheless, AKRF and the undersigned shall have no liability or obligation to any party other than the Client and their successors or assignees, and AKRF's obligations and liabilities to the above, their successors or assignees is limited to fraudulent statements made, or grossly negligent or willful acts or omissions.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
