SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/16/2014 has revealed that there is 1 NPL site within the searched area.

Site	Address	Map ID	Page
WOLFF-ALPORT CHEMICAL COMPANY	***1125-1139 IRVING AVENUE***	***1***	***4***

EXECUTIVE SUMMARY

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS sites within the searched area.

Site	Address	Map ID	Page
WOLFF-ALPORT CHEMICAL COMPANY	***1125-1139 IRVING AVENUE***	***1***	***4***
CHLOE FOODS	***3301 ATLANTIC AVENUE***	***122***	***621***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERC-NFRAP sites within the searched area.

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 26 RCRA-LQG sites within the searched area.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 24 RCRA-SQG sites within the searched area.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 22 RCRA-CESQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 207 RCRA NonGen / NLR sites within the searched area.

EXECUTIVE SUMMARY

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2011 has revealed that there is 1 TRIS site within the searched area.

INDUSTRIAL FINISHING PRODUCTS	465 LOGAN ST	428	2623

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 04/09/2009 has revealed that there are 2 FTTS sites within the searched area.

INDUSTRIAL FINISHING PRODUCTS,	***465 LOGAN ST***	***428***	***2660***

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 2 HIST FTTS sites within the searched area.

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 07/31/2014 has revealed that there are 16 ICIS sites within the searched area.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/16/2014 has revealed that there are 203 FINDS sites within the searched area.

RAATS: The RCRA Administration Action Tracking System contains records based on enforcement actions issued under RCRA and pertaining to major violators. It includes administrative and civil actions brought by the United States Environmental Protection Agency. The source of this database is the U.S. EPA.

A review of the RAATS list, as provided by EDR, and dated 04/17/1995 has revealed that there is 1 RAATS site within the searched area.

NEW YORK CITY TRANSIT AUTHORIT	***25 JAMAICA AVENUE***	***287***	***1628***

RMP: When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

A review of the RMP list, as provided by EDR, and dated 08/01/2014 has revealed that there are 2 RMP sites within the searched area.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/16/2014 has revealed that there are 46 US AIRS sites within the searched area.

STATE AND LOCAL RECORDS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/18/2014 has revealed that there are 6 NY SHWS sites within the searched area.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within the searched area.

NY CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS UST site within the searched area.

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 01/20/2015 has revealed that there are 396 NY Spills sites within the searched area.

NY RES DECL: A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

A review of the NY RES DECL list, as provided by EDR, and dated 11/18/2010 has revealed that there is

1 NY RES DECL site within the searched area.

EDR PROPRIETARY RECORDS

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within the searched area.

UNION STATION (CITIZENS BRANCH	ATLANTIC AVE., ASHFORD	306	1959
BELMONT STATION	BELMONT, WILLIAMS, ALAB	584	3471

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 250 EDR US Hist Auto Stat sites within the searched area.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 70 EDR US Hist Cleaners sites within the searched area.

NY RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Conservation in New York.

A review of the NY RGA LF list, as provided by EDR, has revealed that there are 5 NY RGA LF sites within the searched area.

ISLAND TRANSPORTATION CORP CITGO S/S (Continued) **S104789218**

DEC Region: 2
DER Facility ID: 193737
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"09/23/03Reassigned from Rommel to Sun.See also 9511423, 9705021, 8902334 0006681.02/12/04-Sun-File Update by Sun:-On 10/01/03, Joe Sun sent and faxed a letter to Joseph Macchia, Jr. of Northland Marketing Corp. requesting complete delineation of petroleum contamination. The Department requires that the following work to be performed: (1) Install a minimum of two offsite wells to delineate the southern extent of contamination. Potential locations include 754 Jamaica Avenue and 36 Euclid Avenue. Based on the results of this investigation, additional wells may be rerquired. (2) Develop and survey the additional wells in Item 1,(3) Sampling all non-product monitoring wells and analyze for EPA Methods 8270 B/N and 8021 including MTBE by 11/7/03. Continue to sample the wells on a quarterly basis, (4) Submit a Report by 11/22/03 that summarizes the installation of the additional wells including boring logs, laboratory analytical, dissolved plume map, free-phase plume map, a map showig the determined groundwater flow direction,and a graph and discussion of the historic effect of the watertable fluctuation on the product thickness observed in the wells. Include a revised Site Map that reflects current conditions. Include recommendation for site remediation that include recovery of the free product and hydraulic control. -Monthly Monitoring Report (January 2004), by Berninger Enviromental, Inc. (Walter Berninger, 631-588-2251): Monitoring wells were gauged on D12/22/03. Floating product was detected only in MW-3 (0.55 feet) during this monitoring period, as other wells were not accessible due to being snow covered.-Per PBS data , thirteen 550-gallon USTs were removed from the site on 03/01/1999, but no tank closure report was prepared and submitted to the Department.11/18/05-Sun: Final New Order of Consent was sent to Howard D. Stave, Esq. (Attorney for Northland) on 11/15/05. (Sun)01/03/06-A fully-executed original Order on Consent-effective December 30, 2005 was mailed from DEC’s Attorney, John Urda, to Howard D. Stave, Esq. Attorney for the RP. (Sun)01/18/06-Sun sent a letter to Joseph Macchia to remind him that he must submit a Final Site Investigative Work Plan by January 30, 2006. (Sun) 03/01/06: Sun received a Final Site Investigation Work Plan from Berninger Environmental. (Sun)03/20/06: Sun approves the Site Investigation Work Plant with the following condition: Delineation of Soil and Groundwater Contamination: A subsurface investigation to adequately characterize site hydrogeology and to completely delineate the full extent of petroleum contamination to soil and groundwater both on-site and off-site must be performed. In addition to the boring locations proposed and shown on Figure 4 of the SIWP, the Department requires that the investigation must include installation of following additional borings/wells: one near former MW-2, one near the former tank mat and pump island, one between MW-1 and MW-6 along Euclid Avenue and near former MW-4. Based on the results of this investigation, additional wells may be required A Final Investigation Report must be submitted to the Department by June 19, 2006. (Sun)07/21/06: The Department approves the Site Investigation Summary Report. The Remedial Action Plan is due September 4, 2006 (Sun)09/11/06-Sun-The Department grants a 45 days extension request to complete the investigation. The Remedial Action Plan must be submitted by October 20, 2006. (Sun)11/14/06-Sun: The Department received the remedial action plan from BEI on 10/25/06. Review of

ISLAND TRANSPORTATION CORP CITGO S/S (Continued) **S104789218**

this RAP is pending. (Sun)12/13/06-Sun: Sun approves the Supplemental Investigation and proposed Remedial Work Plan on 12/13/06 and requires that the proposed RAP be implemented by 02/13/07. (Sun)11/09/07-Sun: Sun the following email to Walter Berninger"Walter,I briefly reviewed the report dated October 2007 and found that total BTEX concentrations of all wells except MW-7 had increased dramatically. For example, BTEX for MW-4A increased by 104% from 36,000 ug/L July 2007 to 73,500 ug/L in October 2007. It appears that iSOC may be ineffective in reducing BTEX concentration. Please explain. (Sun)11/13/07-Sun: Sun received the following email from Walter Berninger"I reviewed your e mail and both Ron and myself are working on responding to your concerns. We are reviewing the limited older data and our investigation results to provide you with reasons for the increases in wells. We are also checking our iSOC to confirm they are installed at the correct depths. An answer will follow shortly." Sun replied that an alternate RAP may be required if the existing iSOC proves to be ineffective. (Sun)05/08/08-Sun: Quarterly Monitoring Report dated April 2008 showed that total BTEX concentrations ranged from 1,485 ppb to 18,400 ppb and MTBE concentrations ranged from ND to 390 ppb.
(Sun)

----------7/24/08: Reassigned from Sun to Chanda.8/5/08: Chanda received a Monitoring Report dated July 2008, prepared by Berninger Environmental, Inc. This report stated that monitor site wells (MW-1, MW-3 through MW-7 and MW-9)monthly basis. No floating product was detected during this monitoring period. Monitored site, obtained DO readings, and performed Quarterly Sampling on July 15, 2008. (see eDocs)The groundwater analytical results showed that total BTEX concentrations ranged from 97 ppb to 7,991 ppb and MTBE concentrations ranged from ND to 500 ppb.(Chanda)9/8/08: Chanda received a Monthly Monitoring Report (August 2008) prepared by Berninger Environmental, Inc. Monitoring Report stated that no floating product was detected during this monitoring period. The RP's consultant (BEI) monitored the site and obtained DO readings on August 18, 2008. In Monitoring wells (MW-1 through MW-9)the DO% ranged from 1.92% to 37.09%.10/6/08: Chanda received a Monthly Monitoring Report, prepared by Berninger Environmental, Inc., dated September 2008.5/27/09 This spill case transferred from K. Chanda to J.A. Maisonave. - JAM7/21/09 Received a Monitoring Report for the month of June 2009 submitted by Berninger Env., Inc. dated June 30, 2009. Seven wells were gauged and no free product was detected during this monitoring period.I called Walter Berninger and told him that monthly monitoring and quarterly groundwater sampling should continue; however, report frequency can be reduced from monthly to quarterly. Reports should summarize all monitoring and sampling events for the previous quarter. This includes all sites under the Northland Marketing Consent Order. - JAM8/14/09 Received a Monthly Gauging and Quarterly Groundwater Monitoring Report submitted by Berninger on August 6, 2009 and dated July 31, 2009. Seven monitoring wells were gauged and sampled on July 9, 2009. No free product was observed in any wells. The remedy includes iSOC vessels, which are installed in wells MW-1, MW-3 and MW-4A. BTEX concentrations ranged from 93ug/L in well MW-7 to 16,470ug/L in well MW-3. MTBE concentrations ranged from ND in wells MW-6, MW-7, and MW-9 to 34ug/L in MW-5A. Wells MW-3, MW-4A, MW-5A and MW-9 showed increases in BTEX concentrations since the April 2009 sampling event. This report is

ISLAND TRANSPORTATION CORP CITGO S/S (Continued) **S104789218**

uploaded to eDocs.The additional wells that were requested by Sun in correspondence from March 20, 2006 do not seem to be installed. Contamination must be fully delineated. The implimented remedy (iSOC vessels) does not seem to be effectively reducing BTEX concentrations and another remedy should be evaluated. DEC will issue a letter requesting additional work. - JAM1/25/10 Received a Monthly Gauging and Quarterly Groundwater Monitoring Report submitted by Berninger on November 6, 2009 and dated October 31, 2009. Seven monitoring wells were gauged and sampled on October 7, 2009. No free product was observed in any wells. The remedy includes iSOC vessels, which are installed in wells MW-1, MW-3 and MW-4A. BTEX concentrations ranged from 69ug/L in well MW-5A to 8,770ug/L in well MW-9. MTBE concentrations ranged from ND in wells MW-4A, MW-6, and MW-7 to 160ug/L in MW-3. BTEX concentrations fluctuate in all wells. This report is uploaded to eDocs.- JAM2/4/10 Issued letter to Joseph Macchia regarding several spill cases managed under the Northland Marketing Consent Order. The letter, with the excerpt regarding this spill is as follows:"The New York State Department of Environmental Conservation (NYSDEC) has reviewed several quarterly monitoring reports for the above referenced spill cases, which are being managed under an Order on Consent between NYSDEC and the Respondent. Our review has identified a number of problems with the reports and with the way the spills are being addressed. To remedy these problems, the NYSDEC requires the following:1.Groundwater samples collected from all sites should be analyzed for the TAGM 4046 list of petroleum related VOCs (see attached).2.Groundwater sample result summary tables must indicate the proper units of concentration (e.g., g/L, mg/L, etc.) and should include a column totaling the VOC concentrations for each well.3.Groundwater gauging data, including water table elevation, should be included in all reports along with an updated water table contour map indicating the groundwater flow direction determined during that monitoring event.4.The reports should include a discussion of the data gathered during that monitoring event. If an active remedial system is operating at a specific site, then a discussion of system performance should be included.5.The monitoring reports should include an additional section presenting recommendations for future work at the site based on the data gathered during that monitoring event.After reviewing several quarterly reports, the NYSDEC has the following site-specific comments:""784 Jamaica Avenue, Brooklyn - NYSDEC Spill No. 8902334Monitoring wells must be surveyed and gauged to accurately determine groundwater flow direction. Once a flow direction has been determined, a proposal for additional wells to delineate the groundwater contaminant plume should be submitted for NYSDEC approval."Letter uploaded to eDocs. - JAM3/22/10 Received a Monthly Gauging and Quarterly Groundwater Monitoring Report submitted by Berninger on February 9, 2010 and dated January 31, 2009. Seven monitoring wells were gauged and sampled on January 5, 2010. No free product was observed in any wells. The remedy includes iSOC vessels, which are installed in wells MW-1, MW-3 and MW-4A. BTEX concentrations ranged from 177ug/L in well MW-5A to 29,460ug/L in well MW-3. MTBE concentrations ranged from ND in well MW-7 to 49ug/L in MW-3. BTEX concentrations were highest in well MW-3, which is located directly downgradient of the tank pad. This report is uploaded to eDocs.- JAM3/23/10 Meeting held today at DEC Region 2 Offices to discuss the status of sites included in the Northland Marketing Consent Order. Those in attendance were as follows:Joseph

ISLAND TRANSPORTATION CORP CITGO S/S (Continued) **S104789218**

Maisonave, NYSDECJon Kolleeny, NYSDECJoseph Macchia, Northland MarketingWalter Berninger, Berninger EnvironmentalThe discussion regarded items included in the DEC letter issued to Joseph Macchia on February 4, 2010. Items 1 through 5 should be included in the next quarterly groundwater monitoring reports and all site-specific requirements will be addressed under separate letters. The DEC verbally approved reducing the groundwater gauging/monitoring and reporting requirements from monthly to quarterly events. - JAM8/31/10 Received Quarterly GW Monitoring Rpt submitted by Berninger on May 17, 2010 and dated April 30, 2009. Six monitoring wells were gauged and sampled on April 15, 2010 (well MW-5A could not be accessed because of a disabled car above it). No free product was observed in any wells. Remedy includes iSOC vessels, which are installed in wells MW-1, MW-3 and MW-4A. BTEX ranged from 17 ug/L in well MW-7 to 12,221 ug/L in MW-6. Total VOCs ranged from 105 ug/L in well MW-7 to 18,960 ug/L in well MW-6. MTBE ranged from ND in wells MW-4A, MW-6 and MW-7 to 59 ug/L in MW-3. BTEX decreased in well MW-3, located directly downgradient of tank pad, and increased slightly in well MW-6, which is down-gradient and slightly side-gradient of fill port. Berninger states that wells MW-3, MW-4A and MW-6 will be sampled and tested for presence of bacteria. It appears that iSOC vessels are not effectively treating dissolved-phase contamination. Also, Berninger did not propose additional wells, which were required in DEC letter dated Feb. 4, 2010. This rpt is uploaded to eDocs.- JAM12/14/11: This spill case transferred from J. Maisonave to J. Kolleeny. - JK08/12/13: Reviewed May 2013 Mon Rpt by Berninger Envt'l, dated 5/31/13 (in eDocs). Results of gauging/sampling of seven on-site wells on 5/1/13 showed no LNAPL detected; well MW-1 had 397 ug/L total VOCs (down from 750 ug/L in Feb. 2013), well MW-3 had 5,009 ug/L tVOCs (up from 4,855 ug/L in Feb. 2013), well MW-4A had 2,519 ug/L tVOCs (up from 280 ug/L in Feb. 2013), well MW-5A had 324 ug/L tVOCs (up from 4 ug/L in Feb. 2013), well MW-6 had 2,568 ug/L tVOCs (down from 3,596 ug/L in Feb. 2013), and well MW-9 had 767 ug/L tVOCs (down from 1,152 ug/L in Feb. 2013). Wells MW-1, MW-3 and MW-4A contain iSOC oxygen emitter vessels to increase D.O. Based on data, Berninger recommends continued monthly maintenance of oxygen vessels and continued quarterly GW sampling. Next sampling event scheduled for August 2013. - J. Kolleeny12/05/13: Reviewed August 2013 Mon Rpt by Berninger Envt'l, dated 8/31/13 (in eDocs). Results of 8/12/13 gauging/sampling of seven on-site wells showed no LNAPL detected; well MW-1 had 552 ug/L total VOCs (up from 397 ug/L in May 2013), well MW-3 had 8,055 ug/L tVOCs (up from 5,009 ug/L in May 2013), well MW-4A had 34 ug/L tVOCs (down from 2,519 ug/L in May 2013), well MW-6 had 199 ug/L tVOCs (down from 2,568 ug/L in May 2013), well MW-9 had 1,264 ug/L tVOCs (up from 767 ug/L in May 2013). Wells MW-1 and MW-4A contain iSOC oxygen emitter vessels to increase D.O.; iSOC in MW-3 is in need of repair/reinstall'n. Based on data, Berninger recommends continued monthly maintenance of oxygen vessels and continued quarterly GW sampling. Next sampling event scheduled for November 2013. - J. Kolleeny

Spiller City,St,Zip:	BROOKLYN, NY
Spiller County:	001
Spiller Contact:	Not reported
Spiller Phone:	Not reported
Spiller Extention:	Not reported
DEC Region:	2
DER Facility ID:	230610
DEC Memo:	DEC PM changed from Lombardo to Carpenter June 2004 as part of spill closure program. 7/14/05 No records of follow up after the tank test failure, however, the PBS tracking system indicates that the tank is still in service. The leak was reportedly in the return line.7/14/05 - This spill was closed because, per the guidance, sites with multiple spill can be consolidated to one spill number. This site had a reported spill in 1997 (spill number 97-07001). The spill will now be managed under the 1997 spill number.
Remarks:	2K TANK FAILED PETRO TITE AT -1.193GPH, LEAK IN RETURN LINE, WILL REPAIR THE LINE, WILL CALL IN CONTRACTOR.

DER Facility ID:	309658
DEC Memo:	Sangesland spoke to the property owner. Tank in basement rotted and oil spilled to the basement floor and down a drain. Petro was called and Milro was put on standby. someone? pumped the remaining oil out of the tank. No clean up has been done yet (by 10AM on 2/15) Sangesland told the homeowner to call their insurance company and get an adjuster to the site.Ketani responded to the site.2/15/06 - Raphael Ketani. I made a site visit and met Harry King of Petro ((718) 628-3366) and a fellow worker who was serving as a translator. I also met Alba Ramos and her son. There was a slight stain on the wall where the fill port was, but nothing to indicate that any oil ran down to the ground. The vent pipe area was clean. The pipes leading to the tank looked clean and dry. I asked Mr. King whether he had checked the pipes for leaks. He said he did and they were fine. I asked about the suction line and he said it was also fine. He said the tank was the problem and that it had burst. The tank was rusted all over. Mr. King said that the stairs above the tank leak and that the tank was sitting on the ground. I didn't see any oil, but the soil next to the tank had oil. I saw a drain about 5 feet from the tank, but the vapors coming from the tank area were strong enough so that I couldn't sense whether any oil had gone down the drain. However, I didn't see any sheen in the wet sand next to the drain and Petro had been walking all over the place. So the odors were getting

PRIVATE RESIDENCE (Continued) **S107658559**

more and more spread throughout the under-stairs area. Mr. King said that 179 gals. had been delivered, and MILRO had been here earlier and had pumped the tank. I saw only a little sludge in the tank bottom. I told Mr. King and Ms. Ramos (through the translator) that the tank would have to be removed and a soil boring would have to be done in the tank area and a soil sample taken in the drain.I spoke to Paul of MILRO, the company that vacuumed the tank. He said his records show that they collected only 30 gals. I left a message for Mr. King of Petro and told him the recovery was only 30 gals.Abu Ramos (son in law) called me and said the Allstate claim number is 5381768216.3/6/06 - Raphael Ketani. Paul of MILRO called to say that his crew was over to the site on 2/28/06 and removed the tank. They discovered holes in the bottom of the tank and in the concrete floor below the tank. They have done excavation of contaminated soil at the site and are wondering how many borings to do as the owner is paying for the work herself and, he said, she doesn't have much money. Paul wanted to avoid some of the costs of the work by doing just 2 end point borings, instead of the usual 4 he would do in this 4' x 4' excavation. I told him to a take bottom and a side clean end point samples. 4/4/06 - Raphael Ketani. I received the cleanup report on 4/3/06 from MILRO. I reviewed the report describing what was done to investigate the situation, remove all of the contamination, and the taking of clean end point samples. Based upon this report, I am closing the case.

Remarks: ROTTED SPOT IN BOTTOM OF TANK. 100 TO 150 GALLONS. SOME DID GO INTO A STORM DRAIN. TANK HAS BEEN PUMPED OUT. TECHS ON SITE ARE USING SPEEDY DRY

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "K FOLEY"Contaminated soil letter sent to:Robert Kohn7424 Rockaway Realty Corp160-15 Hillside AveJamaica, NY 114323/9/2004 Sangesland spoke to Eric Meyn of American Environmental.He said the soil has been excavated and is stockpiled on site. Endpoint samples have been taken and a full report will be sent to Jenn Rommel "soon".3/16/04

74-24 ROCKAWAY BLVD (Continued) **U001838872**

Reassigned from Rommel to K Foley.4/19/04 Reviewed UST closure report. Sent delineation letter to R. Kohn. Investigation report due 5/31/04.4/21/04 American Environmental Services(AES) will send proposal for my review.4/22/04 Mike Casazza(AES) will notify me when drilling date is set. He wasn't sure of depth to groundwater but thought it would be too deep for Geoprobe. Requested they attempt. Told him if all soils came back clean, I would not need the groundwater sample. Areas of concern are 20' apart and I agreed to one groundwater sample, if necessary. 4/28/04 Mike Casazza(AES) notified Dept of scheduled drilling tomorrow morning.5/13/04 Call from M. Casazza. Has lab data. Hits for 2 PAHs (200ppb of benzo(a)pyrene and 280ppb of benzo(b)fluoranthene) in the waste oil tank area. Nothing in gas tank area. Will fax data and call me Monday to discuss.5/17/04 Received faxed data. Only two minor exceedances in waste oil tank area. Sample was taken at 9'bgs. Four other samples taken around gas tank area at 8'bgs. No VOCs detected. Left voicemail for M. Casazza requesting final report with documentation. 5/18/04 M. Casazza will be sending final report and requesting closure.5/18/04 Received faxed letter requesting closure with site map showing Geoprobe locations and analyticals.5/19/04 Mailed NFA letter dated 5/18/04.

Remarks: REMOVED 20 YARDS OF CONTAMINATED SOIL:

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS

JENNIFER STORAGE (Continued) **1001119321**

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "FOLEY"Con Ed e2mis Notes:While working on emergency "B" tic, he was doing an inspection of an overhead transformer on pole #25176. Transformer leaked approx 1 gal transformer oil from disconnect handle onto roadway(asphalt) and sidewalk. Also onto private vehicle license plate #FA147R. Oil was contained to an area of 2'X 2'. Transformer to be plastic bagged. Historic PCB count 0ppm. Will take liquid sample. Started job 50-499ppm. Cleanup completed by double washing roadway and sidewalk with bio-gen 760 and bull dog. They also double washed private vehicle. Removed all solid waste material as 50-499ppm in a plastic bag. (KMF 8/10/01)
Remarks:	FAILURE ON OVERHEAD TRANSFORMER RELEASED 1 GAL OF OIL TO PAVEMENT BELOW. PRIVATE VEHICLE ALSO IMPACTED. CON ED NUMBER 138808.

PRIVATE DWELLING (Continued) **S110489641**

checking out the tank condition before making delivery. Odor in the basement coming on and off.I told the home owner's grand daughter that a clean up should be done asap.Home owner contacted her insurance for possible coverage of clean up.Ryan Piper will make a site visit.Csl was sent out toDarrien Hinds7 Adler PlaceBrooklyn, NY 11208(sr)DEC Piper inspected site. AST was located o utside in bakyard behind concrete blocks and plywood/metal roof. Tank apparently rotted and spilled to soil. Foundation wall inside has some staining. NO PID readings upstairs. 8ppm in ;laundry room where stain is. 20ppm against wall. Owner contacted insurance co though has not heard back. Petro was on scene plumbing up temp tank. Soil digout under tank and epoxy painting on insie wall required. H2M hired Milro. Milro dugout soil to 5' bgs. endpoints were lsightly above Part 375 SCO's for 1,24, Trimethyl benzene and mixed xylene. Based on work to date and documentation of remedial efforts, this spill is closed. see e-docs if warranted.

Remarks: tank leak of unk amount, outdoor tank leaked through concreate into dirt, and into foundation of house. Petro has contacted company to pump tank out.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource

MORWOOD DRY CLEANERS (Continued) **1016067700**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: D040
Waste name: TRICHLOROETHYLENE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FULTON VALET CLEANERS (Continued) **1000395549**

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Site name: SANTAE CLEANERS DBA J BROS
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: D040
Waste name: TRICHLOROETHYLENE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

SANTAE CLEANERS DBA J BROS (Continued) **1010415687**

SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource

NYC DEPT OF EDUCATION - PS 65K (Continued) **1016451803**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"01/04/2006- Isaac Katz on phone asked to have "Spill report to be Faxed at 1-718-623 -9436. He will response by end of Jan, 2006.6/2/09. According to a Clean Solutions Technologies letter dated 12/18/06 (see spill # 0513778), borings were done outside the building and next to the former UST location on 11/6/06 and 11/7/06. Two outside borings were performed to 12' and 36'. No contamination was detected. Boring B-1 was done next to the former UST location to a depth of 15' bg. Results from the soil sample taken on 11/17/06 were virtually entirely non-detect. Residual contamination was found at less than 6' at the other borings.5/18/07 letter from Clean Solutions Technologies stated that the second treatment solution injection took place on 3/19/07 and soil samples were taken on 4/19/07. The results for soil samples from SB-1 and SB-2 (next to the tank) showed only a few hits for both and the total SVOCs were below TAGM. All of the other soil samples taken from borings throughout the basement were almost entirely non-detect.7/12/07 letter from Clean Solutions Technologies stated that a soil sample taken on 6/29/07 from boring S-1 next to the former UST location had results that were below TAGM.Based on the data obtained case closed. SCL. JK.

DEC Memo:	Sangesland called eastmond to get a status on the cleanup03/02/06 Feroze, PBS case of this spill is # 2-509531. CSL is sent to: ISSAC KATZAnna Court Realty LLC174 Broadway, #215Brooklyn, NY 11211 03/07/06 Feroze, received a call from Mrs. Bianca (718-827-0184). She told me that she feel too odor in her apartment. Eastman & Sons is working on the site. Issack Mangoa of Eastmond & Sons (718-378-3000)is requested to use air ventelation of that building to reduce oil smell. Mr.Rene 917-299-7257 of Eastmond & Sons is taking care of that work.03/08/06 Feroze, I talked to Ms. Bianca. She complained about the odor of fuel. She cann't stay in her room. I talked to Rene. He informed that the concrete floor is impacted by fuel. I talked to Mr.Anthony (718-627-5100) of Empire Fuel Oil Corp. He informed that they will send Eastman & Sons for further cleaning work.3/8/05 - Raphael Ketani. I arrived at the site at 1:15PM. I was

APARTMENT BUILDING (Continued) **S107657273**

met by Mrs. Bianca (cell (718) 753-1884), the building manager. There was a slight oil odor (160 ppb total VOCs with the PID)in the foyer which was enclosed by steel with glass doors front and back. She took me to the first floor lobby, which had a slight odor (187 ppb). Then she took me to see Mr. Kissoon, the resident of apartment 5A (first floor). Mr. Kissoon's apartment had about 80 to 125 ppb depending on how well the rooms were ventilated. She took me to the basement. There I saw many dark stains all over the floor of the basement and inside the boiler room. There were many fine cracks throughout the basement and the boiler room, and many of them had oil stains along their lengths. The ambient air in the basement had 3,400 ppb. There were wet looking stains where the basement walls met the floor, especially inside the tank room. The PID indicated 5,000 to 9,000 ppb at these stains. The 2,000 gal. #2 fuel tank looked dry on the outside. All of the associated piping looked dry and intact. The tank looked like a recently installed unit as the paint was shiny black. The boiler looked dry and intact, but the ambient air had 3,000 ppb. Mrs. Bianca said that K. C. Transportation had arrived at the building on 3/1/06 and started pumping oil into the fill port and pipe. However, she said, it was an unplugged pipe that was no longer used which opened into the tank room. Mrs. Bianca said that after some time her husband noticed a strong odor coming from the basement and went to investigate. He saw the oil flowing through the cinder block wall of the tank room and over the floor of the basement. He ran outside to stop the truck driver from pumping more oil. She said that the oil was all over the floor of the basement and the floor of the boiler room and the tank room. She said that Eastmond told her that 50 gallons had spilled. However, given the amount of time that elapsed from when pumping started and when Mr. Bianca had the oil delivery stopped, I estimated the spillage at atleast 280 gals. I did not see any drains in the basement, but there is a sump with a pump in the boiler room. She said that it hasn't been running. (It didn't look wet when I saw it.) She said that Eastmond was hired by Empire Oil who had subcontracted K. C. Transportation. Eastmond had knocked out most of the cinder blocks from the tank room vault and piled them up nearby. They had also bagged up some oil soaked debris, but they didn't take away the saturated blocks or the bags. Additionally, there is still alot of oil soaked sediment and cement within the tank room on the floor and along the bottom of the walls of the basement. The floor staining is also obvious, despite a round of power washing. Eastmond left Mrs. Bianca bottles of vinegar and Sweet-Air to reduce the odors. From talking to Mrs. Bianca, it is not clear why Eastmond left the oil soaked debris. The floor needs at least another power washing. I told Mrs. Bianca to immediately get someone to plug up the old fill port and pipe with cement. She said she would, but seemed a bit upset and so she may not remember my telling her this. Mrs. Bianca took me up to her apartment to measure the vapor levels. The second floor landing had 415 ppb. The ambient air in her apartment was 200 to 375 ppb, the first bedroom was 280 ppb with ventilation, and the second bedroom (which was closed) was 900 ppb. I asked her for the building owners phone number. She said Mr. Issac Katz was at (718) 623-9430. I told Mrs. Bianca that I will call Empire State Fuel Corp. ((718)627-5142), K. C. Transportation (Paul Sano at cell (516) 322-3820), and Eastmond ((718)378-3000) and write letters to Issac Katz, the building's owner, to get the vapors resolved. vapor recap:foyer - 160 ppbfirst floor lobby - 187 ppbKissoon's apartment - 80 to 125 ppbbasement ambient air - 3400 ppbtank room floor sediment

APARTMENT BUILDING (Continued) **S107657273**

- 5000 to 9000 ppbboiler room ambient air - 3000 ppbsecond floor landing - 415 ppbMrs. Beanka's apartment - 200 to 375 ppbMrs. Beanka's first bedroom - 280 ppbMrs. Beanka's second bedroom - 900 ppb I spoke to Rene of Eastmond and he said that he was working for Empire State Fuel and Anthony Reitano hired his company. He said they arrived on 3/1/06 and spread Speedi-Dri inside the tank room, but to soak up some of the oil. However, he said, they were not authorized to break down the cinder block wall to get inside and clean up more oil. So they power washed the floor. Later, he said, the super's own crew knocked down the cinder blocks. He added that his crew had picked up all of the debris they made and that the cinder blocks and black bags that are present were generated by the super's crew, though he is willing to pick them up. Rene said that he wont do more work as there are arguments (between Empire and the super) as to who is responsible for paying for the cleanup and who will pay for more work.Later, Mahendra of NYC DEP called ((347) 386-3702) to say that Mrs. Bianca had called him about the oil spill and the high vapors in the building. He asked what the situation was there and I told him. He asked whether DEC needed any help and I told him that we are responding to the case and will get the responsible parties to clean up the spill. I tried to call Issac Katz, the owner, but could only leave a message.3/9/06 - Raphael Ketani. I tried calling Mr. Katz again, but could only leave a message. I will send spill cleanup letters to Mr. Katz and to Empire State Fuel. I called up Mr. Reitano of Empire State Fuel to ask what was happening with the cleanup of the basement. He said that nothing was happening right now. I told him about the oil soaked conditions and high vapors in the basement and how the vapors were affecting people in the floors above. He said he will talk to Rene of Eastmond and find out what is the status of his company going out there to continue the cleanup. Also, as of 1:37PM, I still haven't heard from Mr. Katz. 3/10/06 - Raphael Ketani. Jeff Vought of DEC Spill Response Region 2 called Mrs. Bianca to find out how the vapors were in the building and if someone was ventilating the building. She said that no one had come to get rid of the odors. Mr. Vought told me that the vapors weren't being removed and I called Mr. Katz, Mr. Reitano of Empire, Mr. Alex Zeblovich of K. C. Transportation (the subcontractor) and Rene of Eastmond. I told each of them that a contractor had to be brought to the building immediately and had to set up large fans to ventilate the building and get rid of the vapors. Mr. Katz, Mr. Reitano, and Mr. Zeblovich all told me that it was the other guys' responsibility and not theirs. I told them that they were all responsible and that this must be done by four o'clock today. I added that if they don't call me by four o'clock to tell me the fans are in place and blowing, then I will call the ECOs and have them visit everyone and issue fines and violations to everyone. They seemed to understand. I informed Randy Austin, Chief Spills Engineer of Region 2, of the situation with the heavy vapors in the basement, the residents complaining, and in one case leaving to stay elsewhere, and he agreed with my actions.Later, at about 3:45PM, Mrs. Bianca called to say that the vapors were again very strong in her apartment and that they were making her sick. At 4:05PM, I received a call from Mr. Katz that Eastmond was on their way to set up fans in the basement. I mentioned this to Mr. Austin and he sent Ryan Piper of the Spill Response Unit to investigate.Mr. Piper arrived on site at 5:20PM. He told me that Eastmond was present and that they were setting up 4 large fans. The odors in the basement were moderate and the odors upstairs were light.3/15/06 - Raphael

APARTMENT BUILDING (Continued) **S107657273**

Ketani. I received a call from Mr. Katz. He asked what has to be done now. I told him the oil stained cracks need to be investigated. If oil is found below the floor, then that part of the floor needs to be dug up, the soil dug up, and everything removed. I added that there are cracks in the upper basement floor, the floor outside the boiler room, and the floor inside the boiler room. Lastly, I told him that the oil soaked bottom of the walls and the oil soaked cinder block needs to be power washed, and removed, respectively. He said he will hire ABC Tank. I told him I will need a report regarding all of this work before I close the case. Rene of Eastmond called. He said he set up 4 large fans in the basement. He said that Anthony of Empire State was contracting him for this. I told him to keep his fans there and to keep the air circulation going. He said he would. He told me that Mr. Katz hasn't contacted him regarding the investigation work. I told him that I had told Mr. Katz what needs to be done to conduct the investigation. Rene said that as soon as the other company arrives, he will remove the fans. I told him that the air circulation has to be maintained because there are children and sick people in the building. I spoke to Mr. Reitano and told him to keep at least one large fan in the basement. He said he will, but HE WANTED TO KNOW WHEN HE CAN TAKE THEM OUT. I told him I would let him know. 3/17/06 - Raphael Ketani. I tried to find out whether the clean up had started by calling Mr. Katz, but I could only leave a message. I called Mrs. Bianca and asked her how things were and whether any work had started. She said the odors were better in her apartment, but the elderly couple on the first floor still hasn't returned. She said the fans are working, but no digging or debris removal has started. She said someone from the NYC DOH came over to the building. She said this person issued a notice that the oil soaked debris had to be cleaned up by April 1. Mr. Katz called me back. He said he is going to contract with ABC Tank and they will send him a proposal. He said they will initially do soil borings to see how bad the contamination is under the floor. He said that Eastmond has already done 2 power washes. I told him that all oil soaked cinder block and the black bags of debris have to be removed. He said he will have this done. I told him that the cement walls at their base are oil soaked and that this needs to be power washed and sealed with expoxy paint, as they are bearing walls that can't be removed. He said he will also have this done. Lastly, I asked him to keep me informed as to what ABC Tank finds and as to what they recommend. He said he would. 3/21/06 - Raphael Ketani. I spoke to Mrs. Bianca. She said that John Sabatino, Project Manager from AB Environmental (631) 567-6545, was in the basement with another person inspecting the site. She said that he had also been there about a week ago. Mrs. Bianca said that no work has taken place, yet, but the fans are still blowing and the vapors are low enough in her apartment to live comfortably. Later, Mark Robbins of Hydro Tech Environmental (631) 462-5866 called to find out what the remediation job would entail. He said he was contacted by Mr. Katz. I explained to him the extent of the contamination that I had seen during my site visit.3/24/06 - Raphael Ketani. I spoke to Mr. Sabatino today. He asked what kind of analysis DEC wanted. I told him methods 8260 and 8270 with TAGM 4046. He said he would have this done. He told me the soil PID results he obtained. He said the following:between wall and tank at 10' bgl: 426 ppm 5' away from tank: 289 ppmSB-4 at 20" bgl: 60 ppmSB-6 at 16" bgl: 235 ppmSB-10 at right side of tank: 414 ppmSB-14 at floor drain: 28 ppmI asked Mr. Sabatino whether his company would do the soil digging below the slab

APARTMENT BUILDING (Continued) **S107657273**

and the power washing of the base of the walls. He said they would.3/29/06 - Raphael Ketani. I left a message for Mr. Sabatino to call me back regarding the status of the cleanup and investigation at the site.I spoke to Rene of Eastmond. He said he is taking his fans out of the basement as his company is no longer the contractor there. I told him he can do this. Next, I called up Mr. Sabatino and told him that ventilation must be maintained in the basement, that Eastmond has to take there equipment out to bring it to another job, and so AB Environmental must install fans for ventilation. He said he will do this.4/3/06 - Raphael Ketani. I spoke to Mr. Sabatino (cell (631) 466-2793). He said that he has the analytical results for SVOCs for the soil samples and that he is expecting the VOC results within a week. I asked him about the fans. He said that his boss is worried about getting paid and so he can't put the fans in - it's a contract issue. Mr. Sabatino told me to call or write Mr. Katz directly to get him to order putting in the fans. I tried calling Mr. Katz, but could only leave a message with his answering service. I tried to call Mrs. Bianca to find out how the odors are in her building, but could only leave a message.Mr. Katz called me back. He said that he had talked to A B Environmental last friday, 3/31, and they agreed to put in the fans. I told him that I had just talked to Mr. Sabatino today and he said that A.B. had not agreed to do so. I told him that I was told it was a contractual issue and they were concerned about getting paid. Mr. Katz said he would talk to A.B. and straighten the situation out. I told him to resolve the situation quickly so that the floors above don't get filled with vapors again.4/4/06 - Raphael Ketani. Mrs. Bianca called to say that the fans were taken out yesterday and that last night the vapors became more noticeable in the first floor apartments. She said some of the residents complained to her. I told her that if the fans are not installed today, she should call me back tomorrow. She said she will do that if no ventilation is provided. Mr. Sabatino called at 2:20PM and said that his company will install fans in the basement and do power washing tomorrow.4/10/06 - Raphael Ketani. I spoke to Mr. Sabatino at 11:28AM. He said that the fans were installed thursday, 4/6/06, and that they power washed the tank containment area and the basement floor. He said they found a lot of residue in the tank containment area. I asked him about the soil below the slab. He said he is putting together an investigation proposal right now which will include soil removal below the floor. I asked about the odors. He said they are slight due to the ventilation.4/17/06 - Raphael Ketani. I tried calling Mrs. Bianca, but could only leave a voice mail message. 4/18/06 - Raphael Ketani. I reviewed the Site Assessment Report produced by ABLE Environmental, submitted by AB Oil Service Ltd. and dated 4/12/06. The report was acceptable to the Department. Significant contamination was found in the soil at sites SB-1, SB-2, SB-6, and SB-10. I will send a letter to this effect with the addition that they have to do several rounds of bioremediation to get the oil under the tank room and under inaccessable areas of the basement.4/26/06 - Raphael Ketani. Mr. Sabatino called and asked for clarification regarding my 4/18/06 letter. I told him I wanted soil to be dug up only at the boring sites I indicated: SB-1, SB-2, SB-6, and SB-10. He said that he will do bioremediation by injection from outside the building and possibly via a trench dug inside the basement in the exposed soil below the concrete floor. Mr. Sabatino said that it may take a number of injections. I told him to send me a letter describing what he wants to do. He said he would. As an aside, I asked him what the vapors

APARTMENT BUILDING (Continued) **S107657273**

were like in the basement. He said that you can hardly smell them. He said that the last time he measured the vapors, they were at 10 ppm. I told him that is very high and that this is dangerous to elderly people, sick people, and children in the building. He said that his company is not in the business of ventilating buildings. I told him that the basement needs ventilation. He said that he has one fan going all the time and the windows and doors are open. Later, I called up Mrs. Bianca and asked her how the vapors were in her apartment. She said that the vapors are bad in her place, even with the windows open. She said that the elderly couple on the first floor still haven't returned due to the odors. I told her I will make a site visit tomorrow at 10:30AM. She said she will be there to let me into the building. 4/27/06 - Raphael Ketani. I made my site visit and met Rosemary Addison, Public Health Sanitarian with the Office of Environmental Investigations, Div. of Environmental Health, NYC DOH ((212) 442-3372). I did not expect to meet her, but she said that Mr. Kisson of apt. 1A had asked her to come and she was responding to a "nusiance odor complaint." I told her that A.B. Environmental was going to start work soon to dig out the soil below the basement and do bioremediation. She said she wasn't going to issue a ticket at this time and will talk to her supervisor on what to do. Next, I met Mrs. Bianca and she showed me the basement, her apartment, Mr. Kisson's apartment and Mr. Kisson's parents' apartment (5A).The vapor levels were:basement ambient air - 300 ppbstained areas where basement walls meet the floor, and the tank room floor - up to 690 ppbboiler room - 350 ppbfirst floor hall - 29 ppbMr. Kisson's apartment - 250 ppbMr. Kisson's parents' apartment - 110 ppbMrs. Bianca's apartment - 250 ppb in kitchen and 162 ppb in the second bedroomExcept for the basement, there were no detectable odors. The apartments have odors primarily because they are over the basement and because the floor boards have many gaps and the pipes for the radiators pass through holes that are too large - creating more gaps. All of the measurements were made with open windows in the apartments, the hallway, and the basement. Two fans were running in the basement. One to draw in air and one to exhaust air.I spoke to Mr. Sabatino of A.B. Environmental and told him that there are still stains along the base of the walls. I asked him to power wash those areas where the floor meets the walls inside and outside the tank room. He said he would do it. I asked him when the digging will start. He said probably next week. He said he will put up plastic sheeting on the ceiling to prevent additional vapors from migrating up into the apartments.5/25/06 - Raphael Ketani. Received a FAXed letter from Scott N. Fein, attorney for Mr. Katz and Anna Court Realty, stating that DEC should also go after Empire State Fuel to get them to pay for some of the cleanup costs. I brought the letter to the attention of John Urda of Legal Affairs and he said he would call Mr. Fein.I tried calling Mr. Sabatino, but could only leave a message.Mr. Sabatino returned my called at 3:20PM and said he spoke to Mr. Katz last week, but Mr. Katz told him he's not going any further with the cleanup (only soil sampling was done).6/7/06 - Raphael Ketani. I left a message for Mr. Sabatino at his desk number (631) 567-6545 and at his new cell number (631) 300-6493.Mr. Sabatino returned my call. He said that things are at a standstill. I will contact John Urda of Region 2 Legal Affairs and let him know. 6/13/06 - Raphael Ketani. I sent STIP letters to Issac Katz of Anna Court Realty LLC, Anthony Reitano of Empire State Fuel Corp, and Casey Transportation.6/26/06 - Raphael Ketani. I received a call from Mary

APARTMENT BUILDING (Continued) **S107657273**

Ellen of Coverage Concepts, the insurance broker for Empire State Fuel and K C. Transportation. She inquired as to what the STIPS mean. I explained the letters to her and stated that they have until the deadline, June 27, to get me the signed stipulations. I told her that if I don't receive them, then I will have the ECOs go out and issue fines. She said she understood. 6/27/06 - Raphael Ketani. I visited the site today after Mary Ellen Fatscher ((631) 331-7700, ext. 134), the Coverage Concepts insurance agent for Empire and K.C., called to say that she had talked to A. B. Environmental and wasn't sure the cleanup work was continuing. I looked inside the basement window from the street and saw that nothing had changed since the investigation took place. There was only a slight odor in the basement. I talked to Ms. Fatscher after returning and told her nothing was taking place. I told her that I still held Mr. Katz responsible, even if he doesn't send in a STIP, and that he will get fines because of this. She said that, in that case, she will have both Empire and K.C. send in their STIPs.Ms. Fatscher called back and asked for a 1 day extension of the STIP submittal deadline. I told her that would be alright, but not more than 1 day. I tried calling Mr. Katz, but no one picked up the phone and the answering machine would not come on. Ms. Fatscher said that she thought Mr. Katz was out of town for a vacation or due to a death in the family. 6/28/06 - Raphael Ketani. I received a call from Bob Spears of Ambrose Environmental (732) 312-2375. He said he represents the insurance carrrier, AIG. He wanted to know what was needed to remedy the situation at the site. I told him that only the cleanup is needed. I told him what was involved in order to collect and remove the oil. I asked him to send me a cleanup plan for review. He said he would.Mr. Sabatino called because he received a call from Ambrose that they were going to do the cleanup. I told him that was true and that Ambrose has been hired by the insurance company for Empire and K.C. I told him I was sorry this was happening, but things are standing still and Mr. Katz is unresponsive because he feels he has paid enough of the costs. Mr. Sabatino said he wasn't upset about Ambrose doing the cleanup and he will talk to them again.6/30/06 - Raphael Ketani. Ms. Fatscher FAXed me a copy of the building permit that was granted by the NYC Department of Buildings for replacing the tank, boiler and associated piping. She also FAXed me a copy of the court summons whereby Anna Court Realty is suing Empire State Fuel.7/5/06 - Raphael Ketani. Mr. Robert Martin (212) 989-5337, an investigator for Mr. Krol ((212) 595-8009; the lawyer for Empire State Fuel), called and asked whether there were any witnesses to the oil spill, other than the super, and how much oil spilled. I told him that, as far as I knew, the super was the only witness and that it was impossible to tell how much oil had been released and whether this followed a previous spill. 7/10/06 - Raphael Ketani. I sent out new letters containing STIP forms to be signed to Empire and K. C. I did this because they both scratched out paragraph 3 on the STIPs they sent in. However, Mr. Katz never responded. Mr. Sabatino of A. B. Environmental tried to call me last friday (7/7/06). I called him today. He said that A. B. will do the actual physical removal and treatment work and Ambrose will be the overseeing company. I told him that sounded fine. He said he expected work to start either this week or next week.7/11/06 - Raphael Ketani. Ms. Bianca called to say that she has a 9 to 5 job now and so she will not be at the apartment building during business hours. She said her husband is a part-time super. and so he may or may not be in the building during business hours. She added that possibly she can make special arrangements for

APARTMENT BUILDING (Continued) **S107657273**

me to visit the basement if I call her enough ahead of time.7/14/06 - Raphael Ketani. Mr. Sabatino called and said that he sent the cleanup proposal to Ambrose. He said if they approve it soon, then maybe he can start work next week.7/25/06 - Raphael Ketani. I spoke to Bob Spears (732) 312-2375 regarding the cleanup of the oil in the soil. He said that Ambrose has taken the approved A. B. Environmental proposal and has given it to Clean Solutions to design a soil treatment method. He said that Clean Solutions has a lot more experience on Long Island in treating oil contaminated soil. He added that A. B. and Clean Solutions will sit down together and come to an agreement on the method to be used.8/2/06 - Raphael Ketani. I spoke to Mr. Spears. He said that A.B. Environmental and Clean Solutions have put togther a remediation plan and that I should receive it either this week or next week. Mr. Sabatino of A. B. called at 2:25PM. He said that Ambrose has taken the lead as to who is supposed to do what. However, he believed A. B. will still do the digging and later Clean Solutions will inject the bio or ORC solution. 8/9/06 - Raphael Ketani. I spoke with Mr. Spears of Ambrose Environmental. He said that Clean Solutions has finished their proposal and will mail it to DEC sometime this week.8/23/06 - Raphael Ketani. I contacted Mr. Spears. He said that Ambrose told him the plan had been mailed last week. I told Mr. Spears that I will wait until monday, 8/28, to get it.Tom from Clean Solutions cell (516) 857-9822 called to say that he mailed the proposal 2 fridays ago. I told him I never received it. He said he will mail it out again and I should get it by 8/28, monday.8/30/06 - Raphael Ketani. I received the Remedial Action Work Plan from Clean Solutions Technologies, Inc.8/31/06 - Raphael Ketani. I finished my review of the RAP. In it, Clean Solutions states that they will install 18 borings. Most will be in the general basement area, 2 will be in the boiler room, 1 will be in a small room outside the basement, and the rest will be in the street on the south side of the building. They will inject Fenton Chemistry - dilute solutions of hydrogen peroxide and enhanced acetic acid - and ferrous salt ions. The site is over 2 miles to the west of the nearest pumping well of the Jamaica Water Supply district. They will inject the solution slowly over several rounds of treatment. Monitoring of the concentrations of the chemicals and the oil in the groundwater and the soil will take place.I will send a letter approving the location and number of borings, the rounds of application, and the continual monitoring of the groundwater and the soil. However, I will write that it is the responsibility of Clean Solutions to insure that the process goes smoothly, that there are no impacts to the people living in the building, that the DEC expects Clean Solutions to remediate any mishaps with the treatment process, and that there must be no damage to the soil or groundwater. The letter will be cc'd to:Issac Katz, Anna Court Realty, LLC, 174 Broadway, #215, Brooklyn, 11211Anthony Reitano, Empire Fuel Oil Corp., 1640 McDonald Ave., Brooklyn, 11230John Sabatino, A. B. Environmental, 1599 Ocean Avenue, Bohemia, NY, 11716Bob Spears, Ambrose Environmental Management, 5 Cherry Hill Park, Ste. 100, Danvers, MA, 019239/11/06 - Raphael Ketani. The letter addressed to Mr. Katz at 174 Broadway came back undeliverable as addressed.9/12/06 - Raphael Ketani. Tom Dehaney of Clean Solutions Technologies, Inc. (cell (516) 857-9822) called me today to explain what happens when the oil removal solutions are injected and to calm any fears I might have, as he felt were expressed in my 8/31/06 letter to his company regarding the remediation of the oil. He said he will work with all

APARTMENT BUILDING (Continued) **S107657273**

of the residents of the building and notify them when work is to start and he stated that he will communicate with all of them if they have any questions.9/19/06 - Raphael Ketani. Bob Spears of Ambrose called and said that everyone had a meeting a while ago. He added that A. B. Environmental will put together a package describing the work that will take place to seal the ceiling. He said I will be notified when the well drilling will take place.9/29/06 - Raphael Ketani. I received a FAX today of a letter dated 9/28/06 from Thomas Doheny, Jr. of Clean Solutions Technologies. The letter addressed the concerns DEC had regarding vapors and odors during the soil treatment process. Mr. Doheny included a diagram for another site that was also the subject of soil treatment. 10/13/06 - Raphael Ketani. Bob Spears of Ambrose called to say that the wells will be put in 10/23/06.11/3/06 - Raphael Ketani. I called up Bob Spears of Ambrose (732) 312-2375 and asked him what was happening at the site. He said that there was a problem with A.B. Environmental where they wanted to install only 1" wells, when 4" wells were needed. So Ambrose got rid of A.B. and hired Trade Winds Environmental (800) 282-8701. Trade Winds told Ambrose they will install the 4" wells. Trade Winds and Ambrose set a date for the installations starting the week of 11/6/06. 12/26/06 - Raphael Ketani. Mr. Spears called regarding the oil spill. He said that the first oil treatment solution injection will take place on 12/28/06.1/2/07 - Raphael Ketani. I tried calling Mr. Spears to see how the injection went, but could only leave a voice mail.I received a report dated 12/18/06 from Thomas Doheny, Jr. (516) 897-2880 of Clean Solutions Technologies, Inc. (CST) regarding work at the site. The cover letter stated that the oil didn't migrate outside of the basement. Through the sidewalk, continuous cores were taken to 36 feet below grade. Analytical results were included in the report for soil samples collected from the outside borings and for several inside borings. With the exception of well #1 (A B Environmental boring #10), the contamination is at less than 6 feet below the basement floor. Cracks were investigated and it was determined that the contamination was at a depth of 2 feet or less below the floor. CST will install injection points to treat the contamination at these locations.The analytical results for B-1, B-1A, B-14, B1-12, and B1-36 show that contamination is non-detect or at most well below the TAGM 4046 RSCO limits. Pictures were included in the report that show the debris and oil staining has been cleaned up. I found the report to be acceptable.1/3/07 - Raphael Ketani. Bob Spears of Ambrose (732) 312-2375 called to give me an update. He said that the solution injection did not take place as planned due to the alternate side of the street parking. CST couldn't put there trucks next to the building. So some setup and initial injection will take place tomorrow, 1/4/07. The bulk of the injection will take place on 1/8/07. The first soil samples will be taken 30 days later.1/10/07 - Raphael Ketani. Bob Spears called and said that they are working in step with the alternate side of the street parking regulations. He said that partial introductions of the treatment solution were done last thursday (1/4/07) and monday (1/8/07). He added that additional work will take place this monday (1/15/07) and the following thursday (1/18/07). 2/14/07 - Raphael Ketani. Bob Spears called to say that I should receive the soil analytical results soon. He said they look good. He said that a vapor suctioning device was installed on each of the 2 most contaminated borings. He said that the vapors are exhausted directly to the outside. Two sets of galleries (shallow wells) were installed for the impacted soil. Three deep wells will be

APARTMENT BUILDING (Continued) **S107657273**

installed soon.3/12/07 - Raphael Ketani. Today I received a cover letter dated 2/28/07 with attachments from Clean Solutions describing the progress they have made in treating the contaminated soil. There was a site map, soil analytical results from 3 locations (MW-1, MW-5, MW-7) a copy of the flyer that was sent to the residents notifying them about the work that was to take place, and photos of the exhaust fan setup and the injection piping. The analyticals show that the 3 sites were essentially non-detect for the 2/1/07 round of sampling for VOCs and SVOCs.4/10/07 - Raphael Ketanni. Mr. Spears called to say that the next round of soil sampling will take place on about 4/16/07.4/17/07 - Raphael Ketani. Mr. Spears called to say that soil sampling will take place this thursday, 4/19, at the site. He said that the water table is greater than 30 feet below the surface.5/2/07 - Raphael Ketani. Jean Gerbini (ger-bee-nee) of Whiteman, Ostraman, and Hanna (518) 487-7725 called and left a message that her firm is representing Anna Court (78 Highland Pl.) and that she would like an update on the situation.I spoke with Ms. Gerbini later today and told her that DEC needed another round of soil analyticals with good results in order to consider closing the spill case. I added that the last round of soil samples took place 4/19/07 and that we were hoping to get the results soon. She said that if everything is good, then she would like an NFA letter. I told her I would send one if the results are at or below TAGM RSCOs. 5/16/07 - Raphael Ketani. Mr. Spears called and said that the soil samples were non-detect. He said that there was only some odor from the ground just under the tank, but they will address that in the final report. He said DEC should get the final report by week's end.6/1/07 - Raphael Ketani. Today I received a FAXed progress report regarding the soil treatment by Clean Solutions. The report was sent by Thomas Doheny, Jr. (516) 897-2880. All of the VOCs were non-detect for the 15 wells. There were some SVOC hits, but they were well below TAGM. I spoke to Mr. Doheny regarding the soil under the tank pad, which still had oil. He said that this is the only area that still needs treatment and they are thinking of drilling horizontal wells. He said that the 3 galleries around the perimeter of the pad were helping, but they were not enough. He said that they may also drill an injection well outside the building and through the sidewalk. I told him this sounded fine. I asked about the oil vapors and odors. He said that 2 wells still have some odors, but the exhaust fans are keeping the building odor free. He said that they will pour new concrete and epoxy paint the floor when everything is done. 7/19/07 - Raphael Ketani. I received a 7/12/07 letter from Clean Solutions Technologies, Inc. The letter listed the analytical results for a soil sample from under the concrete slab supporting the tank. This was the last location that needed to be addressed. The results were all well below TAGM.Based upon the 7/12/07 letter from Clean Solutions, the FAXed progress report from Clean Solutions that was received on 6/1/07 and the other documents in the case file, I am closing the spill case. I will send the NFA letter to Ms. Gerbini, Mr. Spears (Ambrose Environmental Management, 3400 Belmar Blvd., Wall, NJ, 07719), Mr. Reitano and Mr. Doheny, Jr. The letter went out today. 10/22/07 - Raphael Ketani. Mr. Spears called to let me know that all of the injection wells have been closed up and the floor of the basement has been sealed. 6/1/09 - Raphael Ketani. Dale Lanier of EFI Global (704) 246-2420 (an environmental consulting company) called to inquire whether any more environmental work was needed at the site, including borings around the area where the old UST used to

APARTMENT BUILDING (Continued) **S107657273**

be (see case #0212208). I told him that I would have to research what took place at the site with my spill.6/2/09 - Raphael Ketani. I called Mr. Lanier back and told him that according to a Clean Solutions Technologies letter dated 12/18/06, borings were done outside the building and next to the former UST location on 11/6/06 and 11/7/06. Two outside borings were performed to 12' and 36'. No contamination was detected. Boring B-1 was done next to the former UST location to a depth of 15' bg. Results from the soil sample taken on 11/17/06 were virtually entirely non-detect. Residual contamination was found at less than 6' at the other borings.A 5/18/07 letter from Clean Solutions Technologies stated that the second treatment solution injection took place on 3/19/07 and soil samples were taken on 4/19/07. The results for soil samples from SB-1 and SB-2 (next to the tank) showed only a few hits for both and the total SVOCs were below TAGM. All of the other soil samples taken from borings throughout the basement were almost entirely non-detect.A 7/12/07 letter from Clean Solutions Technologies stated that a soil sample taken on 6/29/07 from boring S-1 next to the former UST location had results that were below TAGM.

Remarks: EASTMAN TANK CLEANERS HAVE BEEN DISPATCHED TO SCENE. LOCATECD IN THE BASEMENT. WAS A BROKEN FILL PIPE AND WHEN THE DRVIER BEGAN TO FILL TANK IN WENT INTO THE BASEMENT.

DEC Memo:	4/11/11-Vought-Primary off hours responder. Called Petro (Greg Ph:(516) 686-2039) for more information and was referred to Petro Dispatch (Ph:877-307-1212). Vought was told that Joe works nights and Petro Dispatch would have more information. Vought called Dispatch and spoke to Tony and Gregory Parker was field technician and noted dry oil stain on top of buried oil line and temporary line was installed. Thirty feet of above line was also installed. Vought called homeowner (Lisa Pistone 718-277-6130) to invesigate staining in concrete. Vought spoke with Charlie Pistone and he is homeowner and noted he was disabled. Vought requested that he break concrete and continue removing concrete until clean concrete is noted or contaminated soil is noted and call DEC to arrange site visit. Vought sent out TTF letter with CSL language and 30 day deadline to:Charlie

DRY OIL STAIN OVER SUPPLY LINE (Continued) **S111011010**

Pistone809 Grant AvenueBrooklyn, NY 112084/19/11-Vought-Received call from and spoke to Jerry Leitch (State Farm - 631-351-7340). Jerry will contact Pistone and return call to Vought. Leitch was unsure if concrete was broken to date to inspect for possible subsurface contamination.5/6/11-Vought-Received call from and spoke to Milro (Mike McArdle) and he was hired by insurance and five soil borings were installed to 4-3'bg with refusal on rock via hand auger. PID readings from 32ppm to 128ppm and he will open up concrete and begin soil excavation and he approximated dimensions as 5'x 5'bg. Exhaust fans will be set up. Five endpoint samples required.6/6/11-Vought-Received email report from Milro (McArdle) dated 6/3/11 and added report to e-docs. As per report, Milro removed concrete floor and excavated oil contaminated soil from the impacted area due to noted cracks in concrete slab. Milro initially performed hand auger soil borings through concrete and then removed 8'x6' of concrete and extended excavation to a depth of 4 feet below slab removing approximately five yards of oil contaminated soil. Disposal manifests included and five endpoint samples were collected (analysis also included). Area was epoxy sealed and a vapor barrier installed during backfill and no further action recommended. Report noted that "Upon New York State Department of Environmental Conservation (DEC) approval, the area was backfilled with clean sand and a vapor barrier was installed". PERSONAL NOTE: The DEC never approved backfill and cannot even comment on applicability of backfill without submission and review of the soil analyticals. Soil endpoint analyticals noted : 33000ppb napthalene(SB5 4'bg),8,100ppb toluene(SB5 4'bg), 13,000ppb ethylbenzene(SB5 4'bg), 71000ppb xylene(SB5 4'bg), 42,000ppb napthalene(SB4'), 4,900ppb toluene(SB4), ethylbenzene(SB4) and 72,000ppb xylene(SB4). Vought called Milro and spoke to Basso and noted that DEC NEVER approved backfill without the submission of endpoint samples and also that further investigation was required. Address of State Farm as per Milro is:Mr. Jerry LeitchState Farm InsuranceP.O. Box 8062Ballston Spa, NY 12020Vought to transfer spill to another project in Spills Unit for longer term management. Vought spoke with RSE and spill transferred from Vought to Patel.06/06/11-Hiralkumar Patel. reviewed submitted report. the submitted report is not acceptable because of following:- the report is missing scaled site map with tank/boiler/endpoint sample/piping locations and north arrow- report includes a site map with boring locations which were installed for delineation purpose, but the map is not scaled and doesn't include tank/piping locations- as per the text, soil was excavated to 4 ft depth, but as per chain-of-custody, endpoint bottom sample was collected at 5 ft depth. need clarification for this- report missing sample summary table with comparison to CP-51found that previous letter (dated 04/11/11) was sent to wrong address (to 809 Grant Ave instead of 309 Grant Ave).1:28 PM:- left message for Mike at Milro.1:30 PM:- left message for Lisa Pistone, Charlie's daughter.Charlie Pistone 2006 Family Trust **property owner**c/o Alfonso Pistone, As Trustee **Charlie's son**309 Grant AvenueBrooklyn, NY 11208Ph. DRY OIL STAIN OVER SUPPLY LINE (Continued) **S111011010**

report by the end of 06/10/11. email copied to Paul at Milro.06/21/11-Hiralkumar Patel.1:23 PM:- spoke with Jerry. he mentioned that oil spill cleanup is covered under insurance policy. informed him about further investigation/remediation requirements. 1:25 PM:- left message for Mike at Milro.1:26 PM:- left message for Lisa Pistone.4:47 PM:- received message from Lisa Pistone.06/22/11-Hiralkumar Patel. received message from Alfonso Pistone (at 5:47 PM on 06/21/11).12:54 PM:- spoke with Mike inquiring about revised report. he will send report today.12:55 PM:- left message for Alfonso.1:00 PM:- received call from Alfonso. informed him that further investigation/remediation is required. Alfonso mentioned that he is the only trustee of the property and all correspondence should be addressed to him only. he mentioned that Lisa is not the owner and she got involved as Petro's account is on her name.1:39 PM:- received revised report from Mike. abstract:- advanced five soil borings and field screened the soil- removed a 8 ft by 6 ft area of concrete and excavated contaminated soil- excavation extended to a depth of approx. 5 ft below the concrete slab- removed approx. 5 yards of contaminated soil and concrete- further excavation was not possible due to structural concerns- collected five endpoint samples: EP1 at 5 ft depth from excavation bottom, EP2 to EP5 at 3 ft depth from excavation sidewalls - excavation was backfilled and a vapor barrier was installed- area was sealed with an epoxy paint- found heavy contamination in endpoint samples EP1 (bottom) and EP4 (west sidewall)soil analyticals:----------EP1----------EP4 (5 ft)

000n-Butylbenzene----------12,000----------13,
000n-Propylbenzene----------12,000----------11,0002:11 PM:- spoke with Mike and asked him to submit a scaled site map including tank/piping/leak found in pipe/boiler/endpoint samples.2:12 PM:- sent email to Mike requiring to submit a scaled site map. email copied to Alfonso.while reviewing report, noticed that there is no match for endpoint sidewall locations between the site map and chain-of-custody.4:19 PM:- sent email to (and left message for) Mike to submit corrected data regarding endpoint sample locations.06/30/11-Hiralkumar Patel.1:04 PM:- spoke with Mike regarding missing scaled map with corrected endpoint sidewall sample locations. Mike will submit data by tomrrow.1:08 PM:- left message for Al Pistone.07/01/11-Hiralkumar Patel.12:30 PM:- received call from Al Pistone. asked him to submit a scaled site map. he will contact Milro.07/14/11-Hiralkumar Patel.2:06 PM:- left message for Mike.07/15/11-Hiralkumar Patel.1:09 PM:- spoke with Mike. he will send revised map today.4:05 PM:- sent letter to Al Pistone requiring to submit a scaled site map (including tank/boiler/piping/area of excavation/endpoint sample locations, by 07/22/11) and delineation of soil contamination around former endpoint sample locations EP1 and EP4. asked Mr. Pistone to submit investigation report by 08/31/11. letter emailed to Mr. Pistone and Mike. letter faxed to Mr. Leitch.07/18/11-Hiralkumar Patel.11:50 AM:- spoke with Paul at Milro about the revised site map. he will talk to Mike and will send it

DRY OIL STAIN OVER SUPPLY LINE (Continued) **S111011010**

tomorrow.07/21/11-Hiralkumar Patel.11:39 AM:- received revised report from Paul from Milro. Paul mentioned that leak was found near the boiler. he also mentioned that groundwater was not encountered during excavation and it is estimated to be at 25-30 ft bg in the area.08/05/11-Hiralkumar Patel.10:57 AM:- sent email to Al Pistone inquiring updates. email copied to Paul.11:00 AM:- received email from Paul stating that samples were submitted to lab for analysis on 07/26/11.08/10/11-Hiralkumar Patel.3:59 PM:- received report from Paul. abstract:- borings were advanced to determine the vertical extent of the contmaination in the area previously identified as EP1 and EP4- soil samples were collected and field screened at one ft intervals between 5 and 11 ft below the concrete slab- refusal encountered at 11 ft bg- PID readings ranged from 563 ppm (at 5 ft depth) to 60 ppm (at 11 ft depth) in boring EP1- PID readings ranged from 204 ppm (at 5 ft depth) to 37 ppm (at 11 ft depth) in boring EP4- two soil samples were collected from each boring: one at highest PID readings at 5 ft depth and another at end of boring at 11 ft depth- groundwater in the area is estimated to be 25-30 ft bg- fine sand found in entire length of both borings- found contmaination in soil samples at 5 ft depth, but clean soil found at 11 ft depthsoil analyticals:----------EP1----------EP4 5 ft
5
ftToluene----------3,
300----------110Ehtylbenzene----------5,
800----------160Xylene----------33,
000----------8801,2,4-Trimethylbenzene-------52,000----------1,
3001,3,5-Trimethylbenzene-------16,
000----------440Naphthalene----------32,000----------2,
300n-Butylbenzene----------7,
900----------230n-Propylbenzene----------5,
800----------130report is not accepable for following reasons:- doesn’t include any info about horizontal delineation- as per report, borings were installed in the area of EP1 and EP4, which means previously installed vapor barrier was punctured- refusal found at 11 ft depth - what is the reason (rock/boulder/bedrock/clay)?- as per text part, PID reading range is similar for both borings, but its different in boring logs- text missing at the end of third paragraph: "Semi volatile organics ranged from Phenanthrene at 300 ug/kg to Fluoroene."- groundwater is estimated to be 25-30 ft bg - based on what (nearby well or map)?- typo at the end of fourth paragraph: it should be ’spill’ instead of ’location’- as per lab data, contamination at 5 ft in EP4 is about 50 times lower than contamination at 3 ft in endpoint sample collected at EP4: need explanation for such a drop in contamination within 2 ft even site has fine sand08/11/11-Hiralkumar Patel.11:27 AM:- left message for Al Pistone requesting to schedule a site visit.1:19 PM:- spoke with Lisa Pistone to schedule a site visit. she mentioned that her brother Al knows all about the project and she wants Al to be present during visit. she will ask Al to call back.1:45 PM:- received call from Al Pistone and scheduled a site visit at 3:30 PM on 08/24/11.08/24/11-Hiralkumar Patel.3:30 PM:- visited site. met Al and Charlie Pistone. inspected basemet. endpoint soil sample EP4 was taken from a excavation sidewall adjacent to a storage cabinet and basement stairs in the area. so no further excavation possible towards EP4. endpoint bottom sample EP1 was taken from area right underneath the boiler location. no further excavation possible in bottom also. there is about 8 ft overhead clearence in basement. site

DRY OIL STAIN OVER SUPPLY LINE (Continued) **S111011010**

has one 275 gal AST on legs.08/25/11-Hiralkumar Patel.4:27 PM:- spoke with Paul. he mentioned that borings were installed at same location as endpoint samples. they found rocks at 11 ft depth in both borings. he used USGS maps for groundwater depth information. asked Paul to submit revised report correcting information (about PID range and missing text).08/26/11-Hiralkumar Patel.3:13 PM:- received corrected report from Paul.09/06/11-Hiralkumar Patel. based on available information and after discussing with DEC Austin, case closed based on following:- no further excavation possible- no odors inside the building- clean deeper soil- groundwater at about 25-30 ft bg4:10 PM:- sent spill clsoure letter to Al Pistone. letter emailed to Al Pistone and Paul.

Remarks: Underground oil line was found leaking. Petro ran temp. oil line.

Program:	HW
Site Code:	58281
Classification:	Significant threat to the public health or environment - action required.
Region:	2
Acres:	.009
HW Code:	224042
Record Add:	04/04/2003
Record Upd:	10/27/2014
Updated By:	MJKOMORO

Site Description: Location: The site is located in an urban area in the southeastern part of the Bedford Stuyvesant section of Brooklyn. The site occupies 188 through 192 Ralph Avenue and is identified on the New York City Tax Map as Section 3, Block 1678, Lot 53. Site Features: The main site feature is the existing three-story building on the property and an attached one-story addition with a basement at the rear (192 Ralph Avenue). The building structure is 20' x 80' occupying an area of approximately 0.037 acres.Current Zoning/Use: The building at the site is zoned mixed Residential and Commercial (R6B) and is currently unoccupied. The surrounding properties are either zoned the same or as Residential 1 and 2 Family (primarily row house structures), which make up the majority of the area property uses. The row house property adjacent to the site building at 590 MacDonough Street has this latter zoning designation, while the adjacent 4-story, 14-unit apartment building to the south at 196 Ralph Avenue has the residential and commercial designation.Past Use of the Site: Dry-cleaning operations (wet chemical) were conducted at the site from approximately 1946 until 1998. From 1998 until 2000 the site was used solely as a drop-shop dry-cleaning operation. The dry-cleaning operations took place in the 20 x 20 foot addition at the rear of the building with the equipment located on the first floor. It appears that the site contamination came from releases of process chemicals into the basement area of the one-story building addition, which at the time had a dirt floor in the basement allowing migration of contaminants into the underlying soils and groundwater. Site contamination was discovered in 2002 during an owner-initiated subsurface investigation within the basement area of the building.

192 RALPH AVENUE (Continued) **S109416407**

With the confirmation of waste disposal at the site the property owner entered the Department's Voluntary Cleanup Program (VCP)as a Volunteer in 2004. The VCP site is defined as the entire 80' x 20' parcel. The State Superfund site is a 20' x 20' area at the southern end of the parcel.Operable Units: The site was divided into two operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 2 (OU2) is the on-site source area. A Record of Decision was signed for OU2 on October 18, 2013. OU1 consists of the off-site groundwater and soil vapor plumes.Site Geology and Hydrogeology: The general area geology is composed of outwash sand and gravel deposits. Locally, there are highly permeable fine to medium sands with some gravel. There appears to be a confining silt/clay layer of unknown thickness present in the site area around 60 to 70 feet below the ground surface. Groundwater is encountered at 35 to 40 feet below ground surface (~9 feet above sea level). The area groundwater flow is to the south/southeast.

Env Problem: Nature and Extent of Contamination: Based upon investigations conducted to date the primary contaminant of concern at the site is the dry cleaning solvent tetrachloroethylene (also known as perchloroethylene, perc or PCE). Chemical concentrations are reported in parts per billion (ppb) for water, soil samples are reported in parts per million (ppm) while air samples are reported in micrograms per cubic meter (ug/m3).Soil Contamination: The significant soil contamination at the site is primarily limited to the area under the building footprint. The shallow soils are contaminated with PCE in the range of 10 to 344 ppm. The restricted residential soil cleanup objective (SCO) for PCE is 19 ppm.Groundwater Contamination: Groundwater beneath the building footprint is contaminated with PCE above groundwater standard of 5 ppb. PCE has also migrated from the site area down-gradient to the south southeast under the adjoining sidewalks and streets. PCE contamination in the upper part of the aquifer (~ 40 feet below ground surface) ranges from approximately 2.4 to 320 ppb in the vicinity of the site in February, 2013.Soil Vapor: Soil vapor measurements taken from the five extraction wells in the basement of the building showed PCE concentrations ranged from 678 to 19,000 ug/m3 during the latest monitoring event.Indoor Air: A post-IRM indoor air sample in the southern 20'x 20' portion of the parcel defined as the State Superfund site showed PCE at a concentration of 7.46 ug/m3. Three post-IRM indoor air samples were taken in the remainder of the parcel and contained a maximum PCE concentration of 6.71 ug/m3.

Health Problem: People will not come into contact with contaminated soils since they are located at depth and beneath a building foundation. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A soil vapor extraction system has been installed beneath the on-site building to prevent the indoor air quality from being affected by the contamination in soil vapor beneath the building. The potential for

192 RALPH AVENUE (Continued) **S109416407**

off-site inhalation exposures due to soil vapor intrusion is being investigated as part of a separate investigation (Operable Unit 1).

Updated By:	MJKOMORO
Site Description:	Location: The site is located in an urban area in the southeastern part of the Bedford Stuyvesant section of Brooklyn. The site occupies 188 through 192 Ralph Avenue and is identified on the New York City Tax Map as Section 6, Block 1678, Lot 53. Site Features: The main site feature is the existing three story building on the property and an attached one story addition with a basement at the rear (192 Ralph Avenue). The building structure is 20' X 80' occupying an area of approximately 0.037 acres.Current Zoning/Use: The building at the site is zoned mixed Residential and Commercial (R6B) and is currently unoccupied. The surrounding properties are either zoned the same or as Residential 1 and 2 Family (primarily row house structures), which make up the majority of the area property uses. The row house property adjacent to the site building at 590 Macdonough Street has this latter zoning designation, while the adjacent 4 story, 14 unit apartment building to the south at 196 Ralph Avenue has the residential and commercial designation.Past Use of the Site: Dry cleaning operations (wet chemical) were conducted at the site property from approximately 1946 until 1998. From 1998 until 2000 the site was used solely as a "drop shop" dry cleaning operation. The dry cleaning operations took place in the 18 X 20 foot addition at the rear of the building with the equipment located on the first floor. It appears that the site contamination came from releases of process chemicals into the basement area of the one story building addition, which at the time had a dirt floor in the basement allowing migration of contaminants into the underlying soils and groundwater. Site contamination was discovered in 2002 during an Owner initiated subsurface investigation within the basement area of the building. With the confirmation of waste disposal at the site the property owner entered the Department's Voluntary Cleanup Program as a Volunteer in 2004.Site Geology and Hydrogeology: The general area geology is composed of outwash sand and graveldeposits. Locally there

192 RALPH AVENUE (Continued) **S109416407**

are highly permeable fine to medium sands with some gravel. There appears to be a confining silt/clay layer of unknown thickness present in the site area around 60 to 70 feet below the ground surface. Groundwater is encountered at 35 to 40 feet below ground surface (~9 feet above sea level). The area groundwater flow is to the south/southeast.A Decision Document for the site was signed on October 18, 2013.

Env Problem: Nature and Extent of Contamination: Based upon investigations conducted to date the primary contaminant of concern at the site is the dry cleaning solvent tetrachloroethylene (also known as perchloroethylene, perc or PCE) and to a minor extent the breakdown products of this chemical. Chemical concentrations are reported in parts per billion (ppb) for water, soil samples are reported in parts per million (ppm) while air samples are reported in micrograms per cubic meter (ug/m3).Soil Contamination: The significant soil contamination at the site is primarily limited to the area under the building footprint. The shallow soils are contaminated with PCE in the range of 10 to 344 ppm. The restricted residential soil cleanup objective (SCO) for PCE is 19 ppm.Groundwater Contamination: Groundwater beneath the building footprint is contaminated with PCE above groundwater standard of 5 ppb. PCE has also migrated from the site area down-gradient to the south southeast under the adjoining sidewalks and streets. PCE contamination in the upper part of the aquifer (~ 40 feet below ground surface) ranges from approximately 80 to 7,100 ppb.Soil Vapor: Soil vapor measurements taken from the five extraction wells in the basement of the building showed PCE concentrations ranged from 678 to 19,000 ug/m3 during the latest monitoring event.

Health Problem: People will not come into contact with contaminated soils since they are located at depth and beneath a building foundation. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A soil vapor extraction system has been installed beneath the on-site building to prevent the indoor air quality from being affected by the contamination in soil vapor beneath the building. The potential for off-site inhalation exposures due to soil vapor intrusion is being investigated as part of a separate investigation.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Classification: Not a generator, verified

Date form received by agency: 07/08/1999
Site name: ACTIVE MOTOR SALES CORP
Classification: Not a generator, verified

Date form received by agency: 09/26/1985
Site name: ACTIVE MOTOR SALES CORP
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

review by Vought:Letter from DEC Tomasello to Getty Oil Co-4/27/91. "Due to the occurence or a gasoline spill into the LIRR Atlantic Avenue." the DEC requires the installation of three monitoring wellsin the center of the traffic lane of Atlantic Avenue westbound..."Letter from Tyree(Racaniello) to DEC Sullivan-5/8/91. "Shown is the sketch for the proposed recovery system". "The recovery well will be 12 inches in diameter and 55 feet deep" "The well will incorporate a product recovery system to capture free phase petroleum products".Site Report (Tyree)-May 1991. Fourteen monitoring wells onsite and one recovery well. Product recovery system began on 6/4/91. Site undergoing weekly monitoring and sampling of influent/effluent to air stripper tower.Letter from Tyree(Racaniello) to DEC Sullivan-5/9/91. Harris Sewer Service will be "installing a heavy six inch iron line from the property line to the existing manhole on Atlantic Avenue."Letter to DEP(Joe Cuzzo) from DEC Sullivan-5/9/91. "We are presently installing a recovery system". "It is essential that we discharge the treated water into a sewer manhole located in front of this station on your 18 inch sewer line".Letter from DEC Sullivan to DEP LaGrotta-5/14/91. "What we need is a written okay to tie into the sewer at the above location".Letter from DEP Farag to DEC Sullivan-5/21/91. Letter sent listing requirements for connection to sewer line.Site Report (Tyree)-June 1991. "A total of 1457 gallons of product were recovered by this system in June". "LIRR has notified Tyree that LEL readings on the explosion meter in the tunnel under Atlantic Avenue has declined from 90% to 10%" Site Report (Tyree)-August 1991. "This makes a total of 1717 gallons of gasoline recovered from the recovery system since it began operating in June".Site Report (Tyree)-Sept and Oct 1991. "A total of 1717 gallons of gasoline has been recovered to date from the recovery system". Site changed to biweekly product monitoring.Letter from Tyree(Pisel) to DEP(Garafallis)-1/14/92. "Please find the stripper tower influent and effluent sample results.."Site Report (Tyree)-Nov and Dec 1991. "A total of 1717 gallons of gasoline has been recovered to date from the recovery tank". Tank to be scheduled to be emptied in June.Letter from Tyree(Pisel) to DEP(Garafallis)-4/17/92. "Please find the stripper tower influent and effluent sample results.." for Jan, Feb and March 1992.Site Report (Tyree)-Jan, Feb and March 1992. A total of 1891 gallons of gasoline has been recovered to date from the recovery tank. Seventy gallons of free product have been removed via manual bailing.Site Report (Tyree)-April 1992. A total of 1891 gallons of gasoline has been recovered to date from the recovery tank.Letter from Tyree(Pisel) to Getty(Ochotorena)-6/18/92. "Due to a scheduling error the recovery system at the above referenced site was not sampled during the month of May 1992". Letter from Tyree(Pisel) to DEP(Garafallis)-7/30/92. "Please find the stripper tower influent and effluent sample results.." for the months of June and July 1992.Site Report (Tyree)-June and July 1992. A total of 2737 gallons of gasoline has been recovered to date from the recovery tank.FOIL Request-8/25/92. FOIL request from Richard Berka (LIRR attorney).Site Report (Tyree)-September and October 1992. A total of 2737 gallons of gasoline has been recovered to date from the recovery tank. "The system is down at this time awaiting a scheduled pump maintenance".Site Report (Tyree)-Nov and Dec 1992. A total of 2737 gallons of gasoline has been recovered to date from the recovery tank. "The system is down at this time pending an investigation of the temporary electical service".Groundwater analyticals-4/13/93. Groundwater analyticals show 213ppb xylene(W6), 1490ppb MTBE(W5),

GETTY#411 (Continued) **S104951429**

40ppb MTBE(W10), 41ppb MTBE(W11), 39ppb MTBE(W12) and 16ppb toluene(W9).Status Report (Tyree)-January 1995. "Approximately 3237 gallons of gasoline was recovered by the system prior to shut down at the end of June 1993. The previous year of operation and monitoring had shown free-product to be virtually absent from the site wells." "Given the diminishment of free product, the NYSDEC authorized abandonment of the four wells in the westbound Atlantic Avenue Roadway". Ten monitoring wells onsite. Report requests spill closure.Site Report (Tyree)-Feb 1995. Recovery system is off. "Cycling tower on and off, checking for dissolved levels from recovery well. Maintaining biweekly monitoring."Letter from Tyree(Pisel) to DEC Tomasello-8/23/95. "Please recall that closure of the spill case on this site was granted at our last meeting on March 2, 1995. Tyre Brothers plans on removing the recovery equipment and decomissioning the site monitoring wells in the near future."Letter from Tyree(Rennie) to DEC Tomasello-1/14/96. "Enclosed please find the analtyical data for the stripper tower sampling performed .....during the month of December 1996".Status Report (Tyree)-1995. "On September 13, 1995 NDE Tank Testing was peforming tank and associated line testing at the site." A failure was detected and spill 9507252 was generated. Six inches of free product was detected in W2. In September 1995 the groundwater remediation system was "put back on line". Biweekly monitoring was implemented. Depth to water is 20-22' below grade. Pump truck visits were made while system was put back on line recovering approximately 500gallons.Quarterly Monitoring Report (Tyree)-January thru December 1996. Ten monitoring wells onsite. Weekly gauging. Groundwater flow to the south and later to the south-southwest and later to the south again. Monthly sampling of pump and treat system. Product recovered to date is 941.50 gallons.Stripper Tower Results (Tyree)-July 1996, August 1996, September 1996, October 1996, November 1996.Quarterly Monitoring Report (Tyree)-Jan to March 1997. "System not operating/no sampling due to tank removals/installations". Quarterly Monitoring Report (Tyree)-April 1997 thru June 1997. Pump and treat system not operating due to need of temporary electrical connection. SVE system "in process of being designed".Tank Closure Report (Tyree)-September 1997. Tank removals performed as part of service station upgrade. Two pump islands located adjacent to Atlantic Avenue. Residential housing to the north and car dealership to the west. Removal of twelve (550-gallon) gasoline USTs and one (550-gallon) waste oil UST. Approximately 450.48 tons of impacted soil were removed. Installation of two (4000-gallon) gasoline and one (4000-gallon) diesel UST in the same location as former tankfield. Six endpoint soil samples were collected. Soil analyticals show 1920ppb xylene(BS1 12'bg), 707ppb MTBE(BS1 12'bg), 130000ppb 1,2,4-trimethylbenzene(BS2 12'bg), 609ppb MTBE(BS2 12'bg), 1480ppb xylene(BS5 12'bg), 13100ppb 1,2,4-trimethylbenzene(BS5 12'bg) and 751ppb MTBE(BS5 12'bg).Quarterly Monitoring Reports (Tyree) July 1997 thru Nov 1998. Nine monitoring wells onsite. Ten monitoring wells onsite from May 1998 thru Nov 1998. Groundwater flow to the south. Product recovery system not operating due to need of temporary electrical connection. SVE system in process of being designed. LNAPL thickness is O feet.Quarterly Monitoring Reports (Tyree) March 1999 thru Nov 1999. Nine monitoring wells onsite. Groundwater flow to the south. LNAPL thickness is O feet. Pump and treat system not operating due to need of electrical connection but "Periodic vac truck pump out if needed". SVE system "not operating-need temp. electric connection".Quarterly

GETTY#411 (Continued) **S104951429**

Monitoring Reports (Tyree) Sept 2000 thru Feb 2001. Ten monitoring wells onsite. Groundwater flow to the southwest. No LNAPL detected. Groundwater pump and treat is operational.Letter from Tyree(Ewald) to DEC Rommel-5/7/01. "Tyree Brothers Environmental Services respectfully requests closure of this spill number based on the following..." Included passing system tightness test for new USTs onsite.Letter from Tyree to DEC Rommel-6/15/01. Letter sent to request the following changes: influent sampling frequency will be changed to quarterly, system maintenance will be bimonthly. "These changes will be effected as of July 1, 2001. If there are any objections please notify us in writing....".Quarterly Monitoring Reports (Tyree) March 2001 thru June 2003. Ten monitoring wells onsite. Groundwater flow to the southwest. No LNAPL detected. Groundwater pump and treat is operational. SVE system installed with influent and effluent readings. System shut down due to electrical problems from Dec 2001 thru Oct 2002. Pump and treat system back in operation from Oct 2002 to June 2003.Quarterly Monitoring Report (Tyree)-Jan 2004 thru March 2004. Ten monitoring wells onsite. No LNAPL detected. Pump and treat and SVE shut down in May 2003. "Tyree requested a no further action ruling in a sensitive receptor survey in August 2003." Groundwater analyticals show 26ppb toluene(W2), 603ppb xylene(W2), and 11ppb ethylbenzene(W2).DEC requires: 1)copy of sensitive receptor survey 2)sampling of all onsite wells (including recovery well) for at least one more quarter. Vought sent email to Hatcher/Lindell with requirements.9/24/04-Vought-Received Quarterly Monitoring Report and Sensitive Receptor Survey (Tyree). Quarterly Monitoring Report- April 2004 thru June 2004. Ten monitoring wells and one recovery well onsite. Groundwater at depths of 20-22' and flow to the southwest. Groundwater analyticals show 258ppb MTBE(W1), 12ppb toluene(W2), 520ppb xylene(W2) and 344ppb MTBE(W8). Downgradient wells W14 and W8 show non detect for MTBE and xylene (contamination confined to onsite). Sensitive Receptor Survey (Tyree) dated August 2004. Long Island Railroad present downgradient across Atlantic Avenue. Groundwater depth is at 20' and therefore below adjacent foundations and utilities. Spill closed by Vought.

Remarks: UPPER PORTION OF TANK FAILED TEST; 2 TANKS FAILED; CHARLES TRUCELLO HAS BEEN DEALING WITH THIS CASE.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"Assigned to Vought on Monday, 8/12/02 from Krimgold.email to Tyree and Delta, Getty's consultants on 8/12/02:FYISpill #: 02-04967 was reported to DEC on 8/10/02 at 7:36pm from NYCDEP.A malfunction of the stripper tower caused contaminated water to spill onto the street.DEP turned off the system to stop the flow of water. Please visit the site and ensure that the system is up and running ASAP to prevent any impact to the subway.>>> Jennifer Rommel 08/12/02 04:23PM >>>Eric,DEP Contact:Doug Greeley Water and Sewer Operations718-595-5330Mention the "Atlantic Avenue and Grant Avenue" siteDEP Reference #494553As per your Quarterly Report dated 7/26/02, the system temporarily shut down due to electrical problems, but was repaired on July 15. Was the system ever put back on line?Has the system been operating with a broken discharge line since the water main installation?I wouldn't worry so much about the lost water.Discussions with DEP did however mention they saw a sheen on the water?I would focus on getting the system re-connected and back on line.Call with questions 718-482-4934Thank you.>>> "Eric Ewald" <EEwald@tyreeorg.com> 08/12/02 03:45PM >>>Tyree's environmental technician visited this site August 12, 2002. Allthat remains is a road plate in the middle of Atlantic avenue. Thestation operator informed our technician that a DEP subcontractorinstalled a water main along Atlantic avenue within the past two months,during a time when the remediation system was not operating. Thedischarge line was damaged by the subcontractor and Tyree will have toobtain necessary permits and clearances to complete repairs in AtlanticAvenue. Jennifer, do you have contact information for the DEP regarding thisissue? It would be ideal If we can work with them under an emergencyrepair order to prevent permit delays. Are we certain contaminatedwater spilled onto Atlantic Avenue? This should have been dischargewater which has shown Below Detectable Limits in the past.12/4/03-Vought-This spill on concrete and closed due to open spill #9013177 at same location. See also closed spill #0012591 at same location.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110004531739

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to

GETTY PETROLEUM CORP (Continued) **1001125044**

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	4/5/05//mt updating////275gal. AST in basement, line leaked both above and below concrete basement slab , Petro Care Program has retained Milro Associates to conduct the cleanup, Milro will complete the digout, take end point samples and take photographs of the final excavation.04/05/05-SR//Two end point samples were taken after excavation.Awaiting for results.Milro wants to start backfilling.They are told to wait until results are available.12/06/05 Sharif-Rec'd closure report prepared by Milro. Milro saw cut the concrete slab and began to excavate oil contaminated soil from the basement.The excavated area was backfilled with clean sand and a vapor barrier was installed. The concrete slab was restored to its original condition and epoxy sealed to prevent residual odors from migrating into the system.Milro collected one end point sample from the west and east side of the excavation at five feet below the slab.VOC's/SVOC's were Non detect. NFA required.
Remarks:	BELIEVE THE LINE IS LEAKING UNDER SLAB:

DEC Memo:	Petro is replacing a suction line between tank and boiler. Unknown how much spilled from buried line. Site inspection needed. No one at home during the day - Site visit must be after 5PM.01/14/10-Hiralkumar Patel. visited site (at 5:30 PM on 01/13/10). its two story house with basement. tenant in basement. met Ms. Perez, property owner who mentioned that petroleum odors noticed in basement so they called Petro. Petro did vacuum test on old supply line and found failed. Petro installed new supply line. site has one 275 gal AST on legs. no spill noticed in tank room. found sewer trap inside tank room. last oil delivery was on 01/10/10. no sign of overfill at the vent pipe. boiler is located in middle of basement and has rooms around boiler room. odors noticed in area at the end of stairs and this area is between tank and boiler room. no free product observed on floor. smelled oil under one of tile in room corner along front foundation wall. old supply line runs under floor. asked Ms. Perez to either do soil investigation or expose old supply line for further inspection. suggest Ms. Perez to build secondary container around tank to prevent any oil go into sewer trap, if tank started leaking.site owner:Melin Perez Torres201 Pine StreetBrooklyn, NY 11208Ph. (646) 637-2058 (C)email: melinperez11208@aol.com11:27 AM:-sent CSL to Ms. Torres. letter emailed to Ms.

MELIN PEREZ RESIDENCE (Continued) **S110139541**

Torres.02/01/10-Hiralkumar Patel.10:31 AM:- received message from Ms. Torres. they have exposed old supply line and requested a site visit.11:48 AM:- left message for Ms. Torres.02/03/10 Performed site inspection on behalf of Kumar Patel on 02/02/10 afternoon.The old suction line was exposed and removed.Minor leak found at the corner where it makes a 90 angle towards boiler room.Home owner Ms. Torres told me they put down absorbent powder to soak the small quantity oil.No smell of oil observed during my inspection.I took a look at the old line which was kept outside for DEC inspection.No holes or sign of corrosion was found the old line.Case can be closed.(sr)02/03/10-Hiralkumar Patel. case closed based on observations by DEC Rahman during site visit.

Remarks: tank in basement - underground - pipe to furnace - leak coming from the tank to boiler in underground line

DEC Memo:	6-24-2005 NFA for motor oil fuel spills was issued in April 1999. This spill occurred later and is handled by Imbdad Islam. AZ05/30/2007: This spill case transferred to A. Doronova. - ADNo file for this case, just a spill report.06/01/2007: Sent an email to A. Samani (cc: J. Kolleeny; A. Ledins; F. Ashkan; T. Ahmad; B. Morrissey; J. Staten and H. Roberts)asking for the site status update information. Received a response email from A. Samani on the same day. She promised to get back to us with updated data. AD04/17/2008: Received an email from DDC saying:"Dear Sir or Madam: I am working on some spills for the NYCDDC. I was going through some spill numbers in the DEC database and saw that you were the lead DEC person for some of the ones on which I am currently working. Can you send to me the NYSDEC Spill Report Form for the following spills? Spill # - Site0109758 - 69th Precinct0108983 - Brooklyn West 120012041 - 63rd Precinct0102559 - EC 233 / Ladder 176 I would appreciate it if you can email to me pdf files (or some other format would be fine) of the forms. Please let me know if you have any questions. Thanks again for your time and consideration. Renee Wong Renee L. WongProject GeologistCertified Professional Geologist"Sent the requested spill reports the same day. AD06/12/2008: Send an email to Ms. Wong of DDC:"Hi Renee,Thank you for keeping me informed. I am now in a process of reviewing the spill closure reports Roux had submitted to us. I would like to ask you to submit also PDF version of Tank Closure Report for NYPD - 69th Precinct, spill No. 0109758 and a hard copy and PDF version of Tank Closure report for Engine Company 233, spill No. 0102559.Regarding the 63rd Precinct site: I need Tank Closure Report for closed-in-place UST (hard copy and PDF). As for the workplan, I think the requirements will be standard. Borings at each side of the tank; PID screening; soil sampling (including sampling right above the water table,(if applicable); groundwater grab sampling (if applicable). If you would like me to take a look at the investigation work plan for this site, before you will submit it officially, you can send its finalized copy on my email.Sincerely,Ainura DoronovaEnvironmental EngineerDivision of Environmental RemediationNYSDEC Region 2"06/02/2009: Received an e-mail from Renee Wong:"Hello Ainura, How are things going? I was reviewing a couple of spill closurerequests that I had sent to you sometime last year and was justfollowing up on their status. Please let me know if these spills areready for closure or, if not, what still needs to be done for the sitesbefore the spills may be closed. The following are spills for which Istill need status information: - 0109758: 69th Precinct- 0102559: Engine Company 233

ENGINE CO. 233/LADD. CO. 176 FDNY -DDC (Continued) **S105055038**

Thanks,Renee"06/09/2009: Sent a reply:"Hi Renee,Here is the status information for the following spills:- 0109758: 69th Precinct - NFA letter was issued for spill No. 0109758.- 0102559: Engine Company 233 - On June 12, 2008 DEC requested submission of the additional documentation (PDF and hard copies of UST closure report) for spill No. 0102559. Approval of the Spill Closure Request has been postponed pending submission of the additional data. Regards,Ainura Doronova" 06/16/2009: Received an e-mail from R. Wong:"Thanks, Ainura.We will try to get the necessary data for the EC 233 spill and submit it to you for your review.Regards,ReneeRenee L. WongProject GeologistCertified Professional GeologistEmail: rwong@rouxinc.com Mobile Phone: 631-774-7346"AD09/30/2009: Received an-email from R. Wong saying:"Hi Ainura, I got the additional documentation (UST Closure Report, see email below) needed to support the spill closure request for Spill 0102559. I have attached the PDFs here and am putting the hardcopy in the mail to you today. Please let me know if there is anything else that you need in order to close the spill, or if you have any questions. Thanks!Renee Renee L. WongProject GeologistCertified Professional GeologistEmail: rwong@rouxinc.com <mailto:rwong@rouxinc.com> Mobile Phone: 631-774-7346Roux Associates, Inc. 209 Shafter Street Islandia, NY 11749Tel: 631-232-2600 Fax: 631-232-9898"DL to eDocs. Will review. AD10/06/2009: Reviewed the report. It states that the spill was issued following a tank test failure of a 3,500-gallon #2 fuel oil UST. This tank was closed-in-place in April 30, 2002 by Empire Environmental Services. Six soil samples were collected from around the tank area and analyzed for VOCs and SVOCs. Four samples were taken along the sides of the tank walls, and two samples were taken directly below the bottom of the tank. The concentrations of VOCs for all six samples were below RSCO levels. Side soil samples indicated some elevated levels of SVOCs, but no elevated levels of Naphtalene were detected in any of the six samples. Two bottom soil samples showed no exeedances in the SVOCs levels. Groundwater at this site is approximately 58 feet bgs. Roux concludes that there is little chance of the SVOC compounds migrating down to groundwater in sufficient concentrations to be a cause for concern and requests closure of this spill case. AD10/07/2009: Discussed this site with J. Kolleeny of DEC. Based on the data provided, the decision was - to close the case. Issued and sent NFA letter. DL to eDocs. AD

Remarks: WILL EITHER DIG UP AND REPAIR OR REAPLACE TANK.

Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: NONE
Waste name: None

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Registry ID: 110019393878

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

groundwater table beneath the site is approx. 28 ft bg and the regional groundwater flow direction is generally to the south-southeast less than ---------- in approx. 1950, the property was shown redeveloped and operated as a gasoline service station until the most recent sanborn maps (1989)- eight 550 gal gasoline USTs, eight gasoline dispensers and two waste oil tanks were installed on the property in 1950- eight 550 gal gasoline USTs located in the central southern portion of the property connected to eight dispensers located south of the USTs- presently, the gasoline USTs appear to be abandoned on the property and at least one abandoned UST may be located beneath the northwestern portion of the property less than -------- one sump containing petroleum was noted in the northwestern portion of the site (Electico auto repair). no piping was noted in the sump, although the entire sump was not visible due to the presence of debris in the sumprecommendations:- soil/groundwater delineation- evaluation of active waste oil UST and registration- cleaning of sump and evalution of it for any petroleum releasespoke with Greg at Enviroscience. he is preparing work plan for Phase II and will submit by Dec. 14, 2007. asked Greg to include old and current tank locations (approximate), sump location and other locations of any suspected area on site map alongwith proposed boring locations.12/14/07-Hiralkumar Patel. received work plan from Greg. abstract:- other than gasoline USTs and one active waste oil UST, in the northwestern portion of the property, there are two possible USTs waste oil and fuel oil storage, which are inactive- will do GPR survey- tank test will be done for active waste oil UST- if active waste oil UST found leaking, then soil and groundwater investigation will be done alongwith repair/replacement of tank- if active waste oil UST found tight, then no investigation will be done- continuous soil samples will be collected from the ground surface to groundwater- at locations where there are indications of soil contamination, two soil samples will be collected: one at highest PID and one from within one foot above the water table- if petroleum impacted soil extends to groundwater, then groundwater sample will be collected- if no soil contamination observed, then one soil sample will be collected from within one foot above water table- based on soil and groundwater investigation, will install monitoring wells to define groundwater contamination and site-specific groundwater flow direction, if necessaryGreg proposed to submit investigation report by March 8, 2008.sent email to Greg approving proposed work plan. also asked him to measure water level to define groundwater flow direction, using borings, if possible (so can decide well locations once get analytical data, if required).01/03/08-Hiralkumar Patel. received call from Greg. they did tank test for active waste oil UST and GPR survey. found waste oil UST tight. and GPR confirmed anamoly in northwest corner of the site (where they suspected a tank). they will do borings on 01/10/08.01/11/08-Hiralkumar Patel. received message from Greg. spoke with Mr. Greg. they tried boring in tank field area, but due to some thick concrete, they couldn't get soil sample. so they moved boring location on downgradient from tank field (based on regional groundwater flow direction). no soil contamination found, but some groundwater contamination, based on visual observations. Greg will submit report, once get analyticals back.02/22/08-Hiralkumar Patel. received report from Greg. abstract:- depth to groundwater beneath the site is approx. 26 ft bg and regional groundwater flow direction is estimated to be towards the south less than --------- geophysical survey results indicate that no

FORMER GAS STATION (Continued) **S104278789**

tanks appear to be present in northwestern portion of the site- site has two waste oil tank - one is 250 gal AST (which is registered) and one 275 gal UST (unregistered)- seven borings were advanced in vicinity of gasoline USTs and dispenser islands- at each boring location, continuous soil samples were obtained from the ground surface to aprox. 30 ft bg, which was approx. four ft below the water table- generally, the soil was characterized as brown medium to coarse sand- based on field screening, there were no significant indications of gasoline impacted soil in the unsaturated zone at the boring locations throughout the site, although petroleum impacted soil was observed below the water table- since there were no indications of petroleum impacted soil in the unsaturated zone, one soil sample was obtained within one foot above the water table at each boring- one groundwater sample was obtained from SB-2 to SB-7; no groundwater sample was obtained from SB-1 since there were no field indications of contamination less than ---------- groundwater results indicates that the western and central inactive gasoline UST areas appear to have impacted the groundwater less than ---------- samples analyzed for VOCs only less than ---------- no contamination found in soil samplesgroundwater
analyticals:

010Xylene----------178-----7,620----14,910-----13,720based on submitted reports, requires further work as follows:- registration of active waste oil UST and abandoned gasoline USTs- complete delineation of soil contamination including vertical delineation under water table- site specific groundwater flow direction- soil/groundwater investigation on north, east and west sides of tank field and south, west and east sides of dispenser islands- complete delineation of groundwater contamination (horizontally)spoke with Mr. Khalili. explained him that based on submitted report, further soil and groundwater investigation is needed. he mentioned that when he baught this property, old owner didn't told him about this contamination. Mr. Khalili will send old owner's information. asked Mr. Khalili to discuss liability issue with his attorney, and informed him that as a current owner he is responsible for required investigation and remediation.left message for Greg to provide scaled site map (as sample distances from dispenser islands are unknown).02/26/08-Hiralkumar Patel. sent letter to Mr. Khalili requiring registration of active waste oil UST and abandoned gasoline USTs, complete vertical delineation of soil contamination around abandoned USTs and at dispenser island and groundwater delineation with site specific groundwater flow direction. also asked for weekly well monitoring to confirm any fluctuation in water table. letter emailed to Mr. Khalili and Greg.02/28/08-Hiralkumar Patel. received letter from Mr. Khalili with former owner's information.Navin Persaud **former owner**148-03 90th AvenueJamaica, NY 1143503/20/08-Hiralkumar Patel. left message for Mr. Khalili.03/24/08-Hiralkumar Patel. received message from Mr. Khalili. his consultant will call back.03/27/08-Hiralkumar Patel. received message from Greg. left message for Greg.03/28/08-Hiralkumar Patel.

FORMER GAS STATION (Continued) **S104278789**

received call from Greg. he will submit work plan by 04/04/08.04/08/08-Hiralkumar Patel. received email from Greg. he is working on work plan and will submit by 04/15/08.04/11/08-Hiralkumar Patel. sent email to Greg and Mr. Khalili to submit work plan, alongwith tank registration form, by end of 04/15/08. also asked to submit investigation report by end of 05/30/08.04/14/08-Hiralkumar Patel. received message from Greg. spoke with Greg. they are planning to remove tanks from site. he will talk to owner again and will submit work and schedule.04/25/08-Hiralkumar Patel. received work plan from Greg. they are planning to remove eight 550 gal USTs and associated pipes and any contaminted soil. will submit report by June 9, 2008.sent email to Greg and Mr. Khalili with work plan approval.05/09/08-Hiralkumar Patel. received email from Greg. they will start tank removal from 05/13/08.07/08/08-Hiralkumar Patel. left message for Greg. spoke with Mr. Khalili. he mentioned that contractor has removed about 14 tanks from ground and found some contaminated soil. Mr. Khalili will asked Greg to call back with updates.07/09/08-Hiralkumar Patel. received call from Greg. they removed about 16 tanks from ground and currently report and invoices are under review.07/23/08-Hiralkumar Patel. received call from Greg. will submit report in about two weeks.09/19/08-Hiralkumar Patel. spoke with Greg about report. he mentioned that as they had some conflicts about payments, he hasn't submitted report to client. but now they reached to agreement and will submit report by end of 09/30/08.10/01/08-Hiralkumar Patel. received call from Greg. he has submitted draft report to client and currently client and thier attorney are reviewing it. Greg asked to extension to submit report. he will submit report by 10/06/08. approved his request.11/14/08-Hiralkumar Patel. received tank removal report from enviroscience. abstract:- removed total of 16 USTs (one 500 gal waste oil, 12- 500 gal gasoline and three 4000 gal gasoline) and associated pipes- removed 30 tons of impacted soils- all gasoline tanks were encased in concrete but waste oil tank was not encased in concrete- all tanks had direct fill- no excessive corrosion, pitting, cracks, holes or damage were noted in any tank- pipe fitting on waste oil tank was found leaking- final dimension of waste oil tank excavation was 14 ft wide (east-west) by 8 ft long (north-south) by 7 ft deep- some contamination left in north sidewall of waste oil excavation as adjacent to foundation wall- two endpoint samples collected from waste oil tank excavation: bottom and north sidewall- piping and pipe fittings failed in 12- 500 gal gasoline UST field- petroleum impacted soils were identified in northern portion of central tank area (above tank #5), the southern portion of central tank area (above tank #2 and tank #3), and south of tank #2 and tank #3 beneath piping- final dimension of 12- 500 gal gasoline USTs excavation was 38 ft wide (east-west) by 36 ft long (north-south) by 7 ft deep- one soil sample was obtained from beneath each 500 gal gasoline UST- no petroleum impacted soil was observed in the vicinity of 4000 gal gasoline USTs area- final dimension of 4000 gal USTs excavation was 50 ft long (east-west) by 22 ft wide (north-side) by 10 ft deep- two soil samples were obtained from beneath each 4000 gal UST- total of 23 confirmatory soil samples were obtained- no contamination found in any endpoint samplesrecommendations:- installation of three 2-inch monitoring wells with site-specific groundwater flow direction- fluid-level monitoring on a monthly basis for initial three months to evaluate for the presence of free phase floating product- quarterly groundwater monitoring and fluid-level monitoring for one

FORMER GAS STATION (Continued) **S104278789**

year11/18/08-Hiralkumar Patel. sent email to Greg to submit site map with proposed well locations and work schedule. email copied to Mr. Khalili.11/24/08-Hiralkumar Patel. received email from Greg with proposed well location map.11/28/08-Hiralkumar Patel. sent email to Greg approving proposed well lcoations. asked to submit groundwater investigation report by end of Jan. 16, 2009. email copied to Mr. Khalili also.12/02/08-Hiralkumar Patel. received call from Greg. he asked about well depth. as groundwater is about 30 ft depht, asked Greg to install wells to depth of 40 ft bg. asked him to collect soil sample during well installation. told him that soil must be screened and sampled below bottom of previous tank excavation field. asked him to collect two soil samples from each well: one deepest clean and one with highest PID. if no PID above water table, then soil sample right above water table and if finds PID under water then soil samples with highest PID.12/12/08-Hiralkumar Patel. received email from Greg. wells will be installed on 01/08/09.01/16/09-Hiralkumar Patel. received email from Greg. wells will be sampled next week.02/12/09-Hiralkumar Patel. spoke with Greg. report is ready and will submit soon.02/23/09-Hiralkumar Patel. received message from Greg (02/20/09). left message for Greg.03/13/09-Hiralkumar Patel. received report from Greg. abstract:- three monitoring wells (MW-1 through MW-3) installed at the site- soil samples obtained during well installation at depths of 14-16 ft, 19-21 ft and 24-26 ft- generally, soil was characterized as light brown in color and consisted of medium to fine-grained sand and no petroleum-impacted soil was observed in the unsaturated zone less than ---------- one soil sample was obtained from 24-25 ft interval at each location, which was deepest unsaturated soil interval- within saturated soil, there were indications of petroleum-impacted soils in wells MW-1 and MW-3- collected soil samples from saturated zones from MW-1 and MW-3- wells were installed to depth of 37 ft bg with screen from 21 to 37 ft depth- site-specific groundwater flow direction was determined to be towards the south less than --------- no product noted in any wells- believes site has been impacted by off-site source based on: 1) no significant areas of unsaturated petroleum impacted soil at depths have been identified in the former gasoline tank areas; 2) correlation of contaminants between the saturated soil sample results as compared to groundwater results is inconsistent- recommends following: 1) wells will be sampled in April 2009 to further evaluate whether there may be an offsite source or if there may be an onsite upgradient source- found VOCs in soil samples from MW-3- found high PID under water tablesoil analyticals:----------MW-3 (25-26 ft)Ethylbenzene----------5,6001,2,4-Trimethylbenzene-----34, 0001,3,5-Trimethylbenzene-----10,000Xylene----------1, 200groundwater analyticals:

FORMER GAS STATION (Continued) **S104278789**

e----------4001:12 PM:- spoke with Greg about complete report for upgradient investigation. he will talk to owner and will submit report soon. asked Greg about oil/water separator. Greg mentioned that oil/water separator is located in northwest corner of property and is out of line of groundwater flow.1:27 PM:- left message for Mr. Khalili reminding to submit report by end of 12/11/09 and also asked to do complete delineation of groundwater contamination, on- and off-site.1:40 PM:- received call from Mr. Khalili. remind him to submit recent groundwater investigation report by end of 12/11/09 and also asked to submit work plan, including schedule, for complete groundwater delineation by end of 01/08/10.2:03 PM:- sent email to Mr. Khalili regarding submission of report (by 12/11/09) and work plan (by 01/08/10). email copied to Greg.found new PBS registration (PBS #: 2-610954) for 16 tanks removed in May 2008.12/11/09-Hiralkumar Patel. received email from Greg (at 3:57 PM on 12/10/09) requesting additional week to submit investigation report (by 12/18/09).2:01 PM:- sent email to Gerg approving additional week.12/18/09-Hiralkumar Patel.1:43 PM:- received report from Greg. two 2-inch wells (MW-4 and MW-5) installed to 35 ft depth, upgradient from previous tank field. no contamination found in soil or groundwater samples from upgradient wells. quarterly groundwater samples collected from wells MW-1 to MW-3 in Jan, Apr and Aug. 2009 and found VOC contamination in samples. Greg will submit work plan for complete delineation of GW contamination by end of 01/08/10.12/29/09-Hiralkumar Patel.12:42 PM:- received call from Donna from ABC tank inquiring about what work needs to be done. explained Donna that the department requires complete delineation of groundwater contamination.2:31 PM:- received message from Mr. Khalili.12/30/09-Hiralkumar Patel.11:10 AM:- spoke with Mr. Khalili. he is waiting for proposal from other companies and expect to submit work plan by end of 02/05/10. approved his request to extend deadline and asked to submit work plan by end of 02/05/10.01/19/10-Hiralkumar Patel. received message from Mr. Khalili (at 12:29 PM on 01/18/10).11:10 AM:- spoke with Mr. Khalili. he requested a meeting with one of consultant that he is thinking to hire. told Mr. Khalili that the department requires complete GW delineation and don't see any reason for any meeting. informed Mr. Khalili that once he hired someone then he can call to discuss this case.01/26/10-Hiralkumar Patel.1:33 PM:- received email from Danny from Don Carlo including work plan for further delineation and health & safety plan. Danny is proposing to install eight borings on-site in open parking space in front of on-site buildings. no proposal about off-site investigation.Danny SinghDon Carlo Environmental Services Inc.Ph. (718) 857-3100email: doncarllo@aol.comreviewed old maps and found that clean soil area found north, east and west side of former tank location. needs to investigate further on south side towards Atlantic ave.3:25 PM:- spoke with Danny and asked him to submit revised work plan including complete delineation including off-site.01/28/10-Hiralkumar Patel. received email from Danny (at 4:10 PM on 01/27/10) including revised work plan.02/03/10-Hiralkumar Patel. reviewed revised work plan submitted on 01/27/10. Danny proposed to install five on-site borings in previous gasoline tanks area and three off-site borings on Atlantic ave sidewalk, all down to depth of water table. Danny proposed to collect off-site groundwater samples via temporary well points only if finds soil contamination in off-site boreholes.the proposed revised work plan is not accepted as proposed to collect water sample from temporary well points if finds

FORMER GAS STATION (Continued) **S104278789**

soil contamination in off-site borings. the department requires complete delineation of groundwater contamination via installation of permanent wells off-site. also Danny proposed soil borings to depth of soil/water interface, but the department requires soil screening below water table as found some contamination below water table during previous investigations.also need to find out location of old oil/water separator as mentioned in earlier reports. this old oil/water separator may be the source and may need to install borings around this old oil/water separator.11:46 AM:- spoke with Danny and informed him that proposed revised work plan is also not accepted as the department requires installation of permanent wells off-site and complete soil delineation which may require deeper soil borings under water table. asked Danny to look for old oil/water separator and need to install soil borings around this old structure. Danny mentioned that there is a LIRR tunnel under Atlantic Ave.12:00 PM:- left message for Greg about old oil/water separator location and any investigation around
it.*-+*reviewed boring logs from previous investigations:phase II investigation report dated 12/17/99:- highest PID reading of 156 ppm was noted at 5-7 ft depth in boring B-1, then minor PID readings to termination depth at 32 ft bg- no PID readings noted in boring B-2 from 0 to 32 ft bg- found high PID reading of 1,098 ppm in fill material at 3-5 ft depth in boring B-3 and then found high PID reading of 1,524 ppm at 30-32 ft bg; minor PID readings found between 5 to 30 ft depth- no PID readings found noticed in boring B-4 from 0 to 30 ft depth, but then found more than 2,000 ppm on PID at 31 ft depth where boring terminated- no PID readings found noticed in boring B-5 from 0 to 25 ft depth, but then found more than 2,000 ppm on PID at 25-27 ft depth and 1,711 ppm at 32 ft depth where boring terminated- no PID readings noted in boring B-6 from 0 to 32 ft bg- no PID readings found noticed in boring B-7 from 0 to 25 ft depth, but then found 929 ppm on PID at 25-27 ft depth and 1,583 ppm at 30-32 ft depth where boring terminated- no PID readings found noticed in boring B-8 from 0 to 30 ft depth, but then found 1,972 ppm on PID at 30-32 ft depth where boring terminatedsoil/gw investigation report dated 02/20/08:- no PID readings/stains/odors noticed in boring SB-1- no PID readings/stains/odors noticed in boring SB-2 from 0 to 26 ft depth, but then found black stained soil with strong petroleum odors between 26 to 27 ft depth- no PID readings/stains/odors noticed in boring SB-3 from 0 to 26 ft depth, but then found black stained soil with strong petroleum odors between 26 to 28 ft depth- no PID readings/stains/odors noticed in boring SB-4 from 0 to 26 ft depth, but then found black stained soil with strong petroleum odors between 26 to 29 ft depth- no PID readings/stains/odors noticed in boring SB-5 from 0 to 27 ft depth, but then found black stained soil with strong petroleum odors below 27 ft depth- no PID readings/stains/odors noticed in boring SB-6 from 0 to 27 ft depth, but then found black stained soil with strong petroleum odors below 28 ft depth- no PID readings/stains/odors noticed in boring SB-7 from 0 to 26 ft depth, but then found black stained soil with strong petroleum odors below 28 ft depthGW investigation report dated 02/27/09:- no PID readings/stains/odors noticed in boring MW-1 from 0 to 26 ft depth, but then found black stained soil with petroleum odors near 26 ft depth; found 300 ppm PID at 26 ft depth; no information about PID values below 26 ft depth to termination point at 37 ft depth- no PID readings/stains/odors noticed in boring MW-2

FORMER GAS STATION (Continued) **S104278789**

from 0 to 26 ft depth, but then found stained soil with petroleum odors near 26 ft depth; found 400 ppm PID at 28 ft depth; no information about PID values below 28 ft depth to termination point at 37 ft depth- no PID readings/stains/odors noticed in boring MW-3 from 0 to 25 ft depth, but then found black stained soil with petroleum odors near 26 ft depth; found 986 ppm PID at 26 ft depth; no information about PID values below 26 ft depth to termination point at 37 ft depthupgradient GW investigation report dated 12/18/09:- no PID readings/staining/odors noticed during installation of wells MW-4 and MW-5 from 0 to 30 ft bg*-+*all previous boring logs shows sandy soil at the site. and based on boring/well logs, most contamination found at soil/water interface. this is also confirmed by endpoint samples collected after removal of gasoline/diesel/waste oil tanks. no groundwater contamination found in upgradient wells.02/03/10-Hiralkumar Patel.2:14 PM:- received call from Greg. asked him about location of oil/water separator. Greg mentioned that oil/water separator is located in northwestern corner of the property inside building. they cleaned out structure and found drains. no soil investigation done around oil/water separator or other drains in building.based on available information, need a scaled site plan with oil/water and other drains structures.2:21 PM:- spoke with Danny. asked him to submit a scaled site map including following, prior to deciding future boring locations on the property:- oil/water separator and associated pipes- entire drain structure on property- all previous boring/well/endpoint samples- proposed boring locations02/09/10-Hiralkumar Patel. received email from Danny (at 4:36 PM on 02/08/10) including results of GPR survey. found one anomaly in northwestern part of the property on Autumn Ave. another anomaly found on eastern portion of the property.02/11/10-Hiralkumar Patel. received message from Mr. Khalili (at 10:57 AM on 02/10/10).3:35 PM:- left message for Mr. Khalili.02/19/10-Hiralkumar Patel.11:17 AM:- spoke with Danny. they did GPR survey on 02/08/10 and found one 550 gal gasoline UST filled with 34 inches of water with traces of gasoline. this old UST was found about five ft away from oil/water separator which is located in northwest corner inside Electrico Auto Repair Inc. asked Danny to submit scaled site map including all former/current tank systems (including piping, remote fill ports, dispenser islands), boring/well locations, oil/water separator structure including piping and complete drain structure on property. suggest Danny to do dye test of on-site drain structures to see any of drain pipes are leaking in ground.11:38 AM:- spoke with Mr. Khalili and informed him about discussion with Danny.11:48 AM:- spoke with Danny about time he needs to submit site map (as discussed earlier) and work plan for complete gw delineation. Danny mentioned that he is going to site on 02/22/10 for GPR survey to locate all underground lines and he can submit scaled site map by end of 03/05/10. he is planning to excavate oil/water separator and 550 gal gasoline UST on 02/22/10 also. once he gets site map ready, he can submit work plan for GW delineation by end of 03/22/10.11:59 AM:- sent email to Danny requiring to submit site map by end of 03/05/10 and work plan for gw delineation by end of 03/22/10. also asked him to confirm schedule for excavation of oil/water separator and 550 gal tank. asked to submit required documents by the specified dates to avoid enforcement. email copied to Mr. Khalili.03/09/10-Hiralkumar Patel.12:12 PM:- received email from Don Carlo. they requested some

FORMER GAS STATION (Continued) **S104278789**

more time to submit scaled site map.03/10/10-Hiralkmar Patel.3:12 PM:- left message for Danny.05/17/10-Hiralkumar Patel.10:49 AM:- spoke with Mr. Khalili about project status. he will ask Danny to call back with more info.05/18/10-Hiralkumar Patel.2:06 PM:- received email from Don Carlo with site map. map missing oil/water separator structure and previous boring/well locations.3:47 PM:- left message for Danny.06/29/10-Hiralkumar Patel.11:39 AM:- spoke with Danny. asked him to re-submit map including location of oil/water separator (with its drainage structure). Danny mentioned that 550 gal gasoline tank, that was found next to oil/water separator, was removed on 03/08/10, but due to payment issue, they haven't got sample results from lab yet. asked Danny to submit tank closure report.12:15 PM:- received email from Don Carlo including revised map.after discussing with DEC Austin, case transferred to DEC Vadim due to groundwater contamination.summary:- site was in use as gasoline station, auto repair facility with body shop- an unidentified concrete object, believed to be an oil/water seperator, located to the west of the 12 fill ports- depth to groundwater beneath the site is approx. 26 ft bg- removed total of 16 USTs (one 500 gal waste oil, 12- 500 gal gasoline and three 4000 gal gasoline) and associated pipes- removed 30 tons of impacted soils- site-specific groundwater flow direction was determined to be towards the south- no product noted in any wells- found high PID near and under water table- heavy groundwater contamination- clean endpoint samples after tanks removed- no PID readings noted in soil from 7 ft to 25 ft depthDEC requires: 1) soil/gw investigation around previous oil/water separator, 2) complete delineation of groundwater contamination, 3) RAP based on complete delineation results08/06/2010 - Called Don Carlo Environmetnal Services and spoke with Dany Singh, advised him that DEC can not close spill at this time and requested that RP implements: 1) soil/gw investigation around previous oil/water separator, 2) complete delineation of groundwater contamination, 3) RAP based on complete delineation results. V. Brevdo09/30/10: This spill case transferred from V. Brevdo to J. Kolleeny. Spoke with Danny Singh of Don Carlo Envt'l Svcs on 9/29/10, requested revisions to Tank Closure Rpt for 550-gal gasoline UST and 100-gal oil-water separator tank; he asked if I had received investigation work plan, I said no, he said he will re-submit along with revised tank closure rpt. - JK12/15/2010: This spill case was transferred to A. Doronova. ADThere were documents in the paper file for this case dated October 6, 2010 submitted by Don Carlo Env. Services including: revised Tank Closure Report, Subsurface Investigation Work PLan, and Health & Safety Plan. DL pdf copies to eDocs. Will review. AD01/06/2011: Reviewed the work plan. It proposes to advance eight soil borings across the site with collection of soil samples. No permanent groundwater monitoring wells are proposed to be installed to delineate the groundwater contamination. AD01/19/2011: Called and spoke with D. Singh of Don Carlo Env. regarding the proposed soil only investigation at the site. Required to revise the work plan to include the groundwater investigation as well, and to revise locations for the proposed borings. AD02/07/2011: Received the revised work plan. It proposes to install four permanent monitoring wells with collection of soil and groundwater samples. Additional wells should be added, and some wells locations should be revised. AD02/22/2011: Discussed the work plan with D. Singh. Required to add additional well and change location for some of the proposed wells. Later received an e-mail from D. Singh of Don Carlo Env. saying:"Good

FORMER GAS STATION (Continued) **S104278789**

afternoon, Attached please find the revised subsurface investigation work plan for the above mentioned location. Kindly give me a call if you have any questions.Thank you Don Carlo Environmental Services Inc.1225 Atlantic AvenueBrooklyn NY 11216"Will review. AD02/23/2011: Reviewed the revised work plan. The work plan proposes an investigation in the vicinity of former USTs involving installation of five monitoring wells, with collection of soil and groundwater samples. One additional well was added and wells' locations were revised as per DEC requirements. A summary report with conclusions and recommendations for further action will be provided to DEC. Discussed the revised locations with J. Kolleeny of DEC. Will issue an approval letter. AD02/25/2011: issued and sent the approval letter. DL pdf copy to eDocs. AD07/18/2011: Received a Environmental Subsurface Assessment Report from Don Carlo Env. (Don Carlo). PDF copy is missing. To request submission of electronic copy of the report. AD07/20/2011: Received a phone call from the owner of the site - Mr. Halili. He wanted to schedule a meeting to discuss the further actions at the site, which will lead to the spill case closure. Scheduled the meeting on August 2, 2011. AD08/01/2011: Reviwed the report. Five soil borings were advanced during the site investigation, with collection of soil samples. All of these soil borings were converted into permanent groundwater monitoring wells. After wells were developed, groundwater samples were collected. According to the results, gwoundwater is highly contaminated at the site ranging from 1,355ppb in well MW-6 to 19,417ppb in well MW-9. Elevated levels of VOCs were detected in one soil boring B-4/MW-9, where Xylene was 2,000ppb (standard - 1,200ppb) and Toluene was 8,300ppb (standatd - 1,500ppb). Depth to groundwater is 23 - 24 feet bgs. Don Carlo recommends to excavate contaminated soil in the location of soil borings B-2, B-3 and B-4. To discuss the recommendation with the consultant. AD08/02/2011: Met with Mr. Halili. Dicsussed with him the proposed excavation, and other possible remediation options for the site. Requested to survey all newly installed wells and to prepare a groundwater contour map. Since the soil data did not indicate high levels of contamination, the proposed excavation locations are questionable. Need more info. AD09/01/2011: Received a phone call from D. Singh of Don Carlo Env. Discussed with him the proposed excavation. Expressed my concerns regarding the remediation choice. Requested him to revise the remedial work plan. AD10/05/2011: Received an e-mail from Don Carlo Env. saying:"3443 Atlantic Ave, Brooklyn, NY.pdfGood morning Attached please find a revised Environmental Subsurface Assessment for the address mentioned above. Kindly review and give me a call if you have any questions.Thank youDon Carlo Environmental Services Inc.1225 Atlantic AvenueBrooklyn NY 11216"DL the report to eDocs. Will review. AD11/16/2011: Reviewed the report. It states that based on the historic environmental work and the recent investigation performed for the site, DCES has concluded that the petroleum-contaminated soil along with impacted groundwater identified by BLC in 1999 still exists beneath the area of the former 550-gallon gasoline USTs. Furthermore, it is presumed that the contaminated soil removed during the USTs removal did not extend to the contaminated area(s) identified historically by BLC.Based on this, DCES proposes chemical oxidant injections as a remedial approach for the site. The petroleum-contaminated soil in the vicinity of bore locations B-2, B-3 and B-4 together with the groundwater beneath the subject property should be chemically treated using direct push-type

FORMER GAS STATION (Continued) **S104278789**

injection methods utilizing groundwater monitoring wells MW-8, MW-9 and proposed well location MW-lO in order to breakdown the contaminants. DCES further recommends that the targeted areas should be treated on monthly intervals for three (3) months. As a treatment requirement, confirmatory groundwater samples should be collected on the third month of treatment in order to verify effectiveness of the injections. Based on the results, further recommendations will be made. ADRequested submission of a detailed work plan for chemical oxidant injections. AD01/17/2012; Sent an e-mail to DCES with a request to expedite WP submission. Later received a response from DCES saying:"Ms. Doronova,After our last conversation regarding the propose chemical treatment for the site, our office were in contact with the property owner on several occasions. The property owner is not understanding the reason for chemical treatment and disagrees with such treatment when he performed a tremendous amount of soil removal from the site. Based on conversations with the owner, he does not intend to change the use of the site or redevelop the site. Our office is asking for a conditional spill closure based on the limited contamination and the depth encountered; if future redevelopments are intended for the site where subsurface soil will be disturbed, the owner will be required to notify the state prior to such work in order to reopen a spill number based on the historic assessments.If further information is needed, please do not hesitate to contact us. Danny SinghDon Carlo Environmental Services Inc.1225 Atlantic AvenueBrooklyn NY 11216Tel: (718) 857-3100"AD07/02/2012: I was contacted by Mr. Reza Khanbilvardi - phone: 212-650-8009 (new consultant for the RP), he wanted to meet and discuss the spill case. Informed him that I will be off this week. Asked him to call me next week regarding the meeting scheduling. gave him my contact info. AD07/2012: Called and left several messages on the phone number provided by Mr. Khanbilvardi, but did not receive any response. AD08/08/2012: called Mr. Khalili (owner) on (718) 322-4444 and left a message. AD08/09/2012: Received a call from Mr. Khanbilvardi. Spoke with him about next actions at the site. Sent him the following e-mail:"Dear Mr. Khanbilvardi: I am writing this e-mail in regards to our today's phone conversation about the above-referenced site. I believe that the right course of actions for the site will be the following: 1. Check and sample all site monitoring wells to get most recent data.2. Construct groundwater contour map.3. Analyze historic soil and groundwater data, make summary tables and construct VOCs diagram for wells.4. Based on the outcome choose appropriate remedial approach for the site.5. Prepare the work plan and submit it to NYSDEC for review and approval. Please contact me if you have any questions or comments. Sincerely, Ainura DoronovaEnvironmental Engineer"AD11/29/2012: Called and left a message to Mr. Khalili. AD01/23/2013: Called and left a message to Mr. Khalili with his secretary. later received a call from a property manager. She will gather all available info and get back to us. She gave me other contact phone numbers for Mr. Khalili: (718)-641-1859, (516)-333-5050. AD02/04/2013: Received the following e-mail from Mr. Khanbilvardi:"Dear Ms. Doronova: I just would like to give you an update on the situation with respect to the above referenced property. We asked "Laurel Environmental Associates" to take a series of samples from the observation wells on the property. This was done Tuesday January 8th, 2013. I should be getting the result of their sampling and analysis this week and then I will forward you the result. . I tried to rich you on the phone today. In the meantime, my

FORMER GAS STATION (Continued) **S104278789**

cell phone is 914-329-3440. Please call me if you at your convenience.ThanksReza Khanbilvardi, PhD. P.E.NOAA Chair Professor of Civil Engineering,"Sent him the following e-mail:"Dear Mr. Khanbilvardi: The groundwater analytical data should be submitted to the Department as a complete groundwater monitoring report with summary tables, diagrams, and scaled site maps. Your conclusions and recommendations for further actions at the site should be given in this report. Do not send to the Department raw laboratory data. It will not be reviewed. Please submit complete groundwater monitoring report to DEC by February 22, 2013. Sincerely,Ainura Doronova"AD02/22/2013: Received a phone call from Mr. Khanbilvardi. He informed me that he is on business trip and cannot submit the report by deadline, so he asked to extend it till march 1, 2013. Approved the postponement of submission. AD03/14/2013: Did not receive the requested report. Sent an e-mail to Mr. Khanbilvardi with a new deadline date as March 19, 2013. AD03/19/2013: Received the following e-mail from R. Khanbilvardi:"Dear Ms. Doronova:As promised, I am submitting a status report for the property know as 3443 Atlantic Ave. I am submitting this report on behalf of the owner (Mr. Fred Khalili). Due to the major snow storm that we had in upstate New York City, I was not able to get to my office in Manhattan today. As the result I was not able to create one pdf file for the entire report. If you require one pdf file, I will be able to send you the report again, in one pdf file tomorrow. Please do not hesitate to communicate with me for any additional information at this time.Sincerely Yours, Reza Khanbilvardi"Will review. AD04/08/2013: Reviewed the report. It states that Laurel Env. visited the site on January 7, 2013 to collect GW samples. TVOCs data (in ppb):1. MW-01 - ND;2. MW-02 - ND;3. MW-03 - 24,950;4. MW-04 - 10,734;5. MW-05 - 5,614;6. MW-06 - 37,810;7. MW-07 - 20,059;8. MW-08 - 125;9. MW-09 - ND.According to the data, contamination exist at the central and southern part of the property. Laurel Env. states that these contaminated wells are very close to each other and they cover an area of about 20 ft by 25 ft in center and front of the property.Laurel Env. recommends at this point to undertake a soil delineation sub-project. They state that this information is needed to provide a realistic estimate of costs and timeframe for any of the remedial scenarios. The soil delineation project, which is proposed by Laurel Env., includes: 1. Prepare a PH2 Workplan for submittal to DEC2. Install nine borings to twenty-five feet in a grid pattern across the area of contamination3. Field screen samples and select up to three from each boring for VOC analysis using CP-514. Collect water quality data from an upgradient and a contaminated monitoring well (DO,ORP, pH, etc).4. Review results and prepare a workplan for remediation, comparing costs and timeframe forUpon completion of this project, the complete workplan will be submitted to NYSDEC for approval. Due to the unexpected nature of weather elements during this season, this action plan will be completed in 1.5 Months.Laurel Env. uses own designation for the site wells which will pose difficulties with historic data operations. The site plan is not to scale. The report is partly in World, partly in PDF format. To request its resubmission. AD04/19/2013: Called and spoke with Mr. Khanbilvardi. Requested to resubmit the report. Sent him the following e-mail with the requested report:"Dear Mr. Khanbilvardi: As per our today's phone conversation I am providing you with a copy of the report for the above-referenced site. You should revise your report and submit it as one PDF file. A site plan and groundwater

FORMER GAS STATION (Continued) **S104278789**

data summary tables should be revised in accordance with historic site data. A site plan should be scaled. Please submit the revised report by May 15, 2013. Failure to respond by this deadline may result in referral of this case to our Office of General Council for enforcement. Sincerely,Ainura Doronova"AD05/10/2013: Received the following e-mail from Mr. Khanbilvardi:"Dear Ms. Doronova:Thank you for your call a little bit more than two weeks ago. During the call, you indicated that you will send me a copy of the older result, and the old well numbering that were used before. This is needed to revise the report to use a consistent matching well numbers. I am still waiting for your e-mail. I appreciate your timeThanksReza Khanbilvardi"Send him another e-mail with an attached report with copy of my e-mail from 04/19/2013, as a proof that the requested report was sent to him on time. Set a new deadline for revised site status report submission for May 30, 2013. AD05/29/2013: Received the following e-mail from Mr. Knanbilvardi:"Dear Ms. Doronova:I am attaching a copy of the status report for 3443 Atlantic Ave. I look forward to hearing from you soon.Thank you so very much. Sincerely,Reza Khanbilvardi, PhD. P.E."Will review. AD06/12/2013: Reviewed the report. Mr. Khanbilvardi clarified in this report old historic names of the wells they sampled, so a data comparison can be made. According to the report, TVOCs levels in GW increased in the site well over time:GW data (in ppb) - May 2011 - January 20131. MW-05 - ND ND;2. MW-04 - ND ND;3. MW-07 - 17,475 24,950;4. MW-03 - NS 10,734;5. MW-01 - NS 5,614;6. MW-09 - 19,417 37,810;7. MW-08 - 13,378 20,059;8. MW-02 - NS 125;9. MW-10 - ND ND.Will approve the recommendation for supplemental soil investigation work plan preparation. AD06/20/2013: Discussed the site with J. Kolleeny of DEC. Issued and sent an approval letter with the following comments:" The work plan should include data tables with all available historical soil and groundwater data for the site; the tables should include a line for Total VOCs. The work plan should also include a site map with proposed soil boring locations which should depict the historical soil data from all previous site investigations. The map should include the locations of former soil borings and end-point samples and should show the locations of the former USTs with piping and fill ports. The proposed locations for the new borings should be based on the historical soil data."DL pdf copy of the letter to edocs. Submission of the work plan is due August 9, 2013. AD08/12/2013: Received the following e-mail from R. Khanbilvardi dated August 9, 2013. "Dear Ms. Doronova: On behalf of the property owner (Mr. Khalili), and as the engineering consultant to the project, I am sending this e-mail to acknowledge receiving your e-mail and asking extension of deadline from August 9, 2013, to September 18, 2013. Here are the reason for asking this extension:1- We were trying to find the best and also the most cost efficient company to do the soil sit investigation. It took us longer than expected to finalize/contract with a company (Laurel Environmental)2- The owner has to agree to the most cost efficient company to agree with the process. Some of the initial suggested contract/cost was out of reach for the owner)3- Most of the contractors are very busy in Summer months, and scheduling with them was difficult.Now that we have come to agreement with the Laurel Environmental company, I assure you the requested plan will be submitted by September 18th, 2013. I appreciate your acknowledge of this e-mail and agreeing with the extension.Sincerely, Reza Khanbilvardi, PhD. P.E.NOAA Chair Professor of Civil Engineering,Director of NOAA-CREST Center, Exec.

FORMER GAS STATION (Continued) **S104278789**

Director of CUNY Remote Sensing Earth System (CREST) InstituteEditor-in-Chief, International Journal of Water (InderScience Publisher)T-107, Steinman Hall140 St. and Covent Ave.The City College of the City University of New YorkNew York, NY 10031 E: khanbilvardi@ccny.cuny.edu || V: 212-650-8009 || F: 212-650-8097 || W: http://crest.ccny.cuny.edu"On August 12, 2013 received the following e-mail from Mr. Khanbilvardi:"Dear Ms. Doronova: An additional note, I was just informed that Laurel Environmental Associates is being planned to start the field testing on August 20th.Thanks, Reza Khanbilvardi, PhD. P.E."Called and left a message to Mr. Khanbilvardi. AD08/22/2013: Received the followinf e-mail from Brian McCabe of laurel Env.:"Ms. Doronova Attached is the work plan for 3443 Atlantic Avenue. Please review the document and let me know if you require any changes. We would like to perform the field portion of the work on Friday, August 23, 2013. I hope this short notice does not pose to great an inconvenience. Laurel Environmental Associates, Ltd.53 West Hills Road. Suite 1Huntington Station, New York 11746tel: 631-673-0612 x277cel: 631-662-0523fax: 631-427-5323"Looked at the work plan. It proposes to conduct soil sampling in a grid-like fashion throughout the area in which the highest groundwater concentration were encountered. A total of nine soil boring will be installed throughout the investigation area. Some of the locations for the proposed soil borings are questionable. Send an e-mail to Mr. McCabe stating that they should use historical wells designation for comparison purposes and to re-locate proposed soil borings. Also mentioned that I leave for vacation, so it will be not possible for me to review changes and approve the work plan on a such short notice.2:53PM: Received the following e-mail from Mr. McCabe:"Ms. Doronova Attached is a revised site plan with corrected well IDs and new proposed boring locations. I could not move the drilling so we will be on site tomorrow. Brian McCabeLaurel Environmental Associates, Ltd."Called and spoke with Mr. McCabe. Told him that if they cannot re-schedule the site work, they could proceed with the installation of soil borings without DEC approval letter on their own risk. Requested to inform me on any on the site issues via e-mail and to send me a brief memo on the performed site work. AD08/29/2013: Sent the following e-mail to B. McCabe:"Mr. McCabe: Please provide DEC with a brief memo for the performed site work. Thank you. Sincerely,Ainura Doronova"AD11/20/2013: Called and left a message to B. McCabe regarding the report submission. AD12/10/2013: Sent an e-mail to Mr. Khanbilvardi requiring submission of the SSIR by December 31, 2013. AD01/07/2014: Received the following e-mail:"Dear Ms. Doronova:I would like to wish you a Happy New Year for you and your family. I am attaching a copy of the report prepared as the result of Subsurface Investigation conducted by Laurel Environmental. Presently we are working with them to select a remediation option.ThanksSincerely, Reza Khanbilvardi"DL the report to eDocs. It is dated October 10, 2013. Will review. AD02/24/2014: Reviewed the report. It states that on August 23, 20 13, Laurel Environmental Associates (LEA) staff conducted soil borings at exterior locations throughout the site. Sample locations were based upon LEA’s investigation work plan, which included a boring location site plan. The sampling locations were selected based on their proximity to groundwater monitoring wells known to have elevated levels of volatile organic compounds. Using a model 6610DT Geoprobe, continuous soil borings were advanced from zero to at least twenty feet below grade, and designated SB-I through SB-9. Each core sample

FORMER GAS STATION (Continued) **S104278789**

was field screened for the presence of total VOCs utilizing a PID. The soil had a slight organic bog odor. Several of the samples collected had odors of possible gasoline contamination, mostnotably SB-5 through SB-9. It should be noted that SB-5 through SB-9 are located directly down-gradient from the former UST location in the central portion of the property.Laboratory analysis of the samples indicated the following:- Elevated levels of the VOCs for 1,2,4 Trimethylbenzene, 1,3,5 Trimethylbenzene, Ethylbenzene, nPropylbenzene, and Xylene (mixed) were detected in SB-6 (30'), SB-7 (26' and 30'), and SB-9 (26'), all above their respective NYSDEC Unrestricted Use Soil Cleanup Objectives.- Elevated levels of the VOC n-Butylbenzene were detected in SB-6 (30'), SB-7 (26'), and SB-9(26') and an elevated level of Sec-Butylbenzene was detected in SB-7 (30'). All of which wereabove their respective NYSDEC Unrestricted Use Soil Cleanup Objectives.- High levels of the VOC Naphthalene were detected in SB-7 (26' and 30') and SB-9 (26') but atconcentrations below NYSDEC SCOs.GW sampling:No groundwater samples were retained for laboratory analysis. Groundwater quality information was collected for future comparison and to aide in the evaluation of potential site remediation options.Based on the completion of this Phase II Limited Subsurface Soil Investigation, LES has found the following:Subsurface Soil Investigation:I. Soil borings were collected at nine locations throughout the site. Sample locations were based upon an area of known groundwater contamination. Soil borings were installed to the south, east and west of the impacted wells in an effort to delineate the extent of contamination at the site.2. Due to site accessibility, down gradient soil borings were restricted to the sidewalk directly south of the site.3. Elevated levels of VOCs are present in all of the soil samples collected at the soil/groundwater interface in the central and southern portion of the Subject Property, with the heaviest concentration being encountered over a depth range of approximately 26 to 30 feet below the ground surface.Groundwater Investigation:I. No groundwater samples were collected for laboratory analysis. Groundwater quality data wascollected from two of the on-site monitoring wells. Monitoring wells MW-5 and MW-6 weregauged for depth to water, depth to bottom, and the following groundwater parameters:temperature, dissolved oxygen, conductivity, pH, oxidation-reducing potential, and turbidity.Based on the findings of this study, LES recommends the following remedial corrective action:As the VOC contamination at the site is only present in the groundwater and the smear zone above and below the water table, excavation of contaminated soil is not warranted. Groundwater and soil within the water table smear zone in both in the central portion of the site and along the sidewalk to the south of the property can be remediated most effectively through the installation and operation of an Air Sparging and Soil Vapor Extraction (AS/SVE) system. This is also the least obstructive to the continued operations at the property.A remedial action plan (RAP) should be prepared which includes: The installation of pilot test wells, and the performance of an AS/SVE pilot test for the purposes of designing an appropriate remediation system. Vertical and horizontal delineation of the contamination in soil and groundwater using fieldscreening and possible laboratory analysis so that the AS/SVE treatment and capture zone are sufficient. Groundwater sampling should commence at the site and be performed on a quarterly basis. AD11/24/2014: Received a RAP. Will review. AD12/11/2014: Reviewed the submitted RAP. It proposes installation of Air Sparge and Soil Vapor Extraction Systems. The

FORMER GAS STATION (Continued) **S104278789**

proposed actions seem adequate. But the last GW sampling was performed in 2013. GW sampling should be done prior the system installation. Few monitoring wells (MW-7 and MW-3) were destroyed. These wells should be re-installed. Since operation of the system will produce air discharges, Stip should be issued and signed by the RP. Also, SVES data sheets should be submitted to DEC. RAP approval is pending additional data submission. Will discuss the RAP with J. Kolleeny of DEC. AD12/12/2014: Discussed the site with J. Kolleeny. Sent the following e-mail to S. Yanuck of Laurel Env.:"Scott,I reviewed the RAP and discussed it with my supervisor - Jonathan Kolleeny. The proposed actions seems to be adequate. There are some detail that should be addressed before DEC can approve the RAP: - Since the proposed system will produce air discharges, Stipulation Agreement should be signed by RP;- SVES data sheet should be submitted to DEC (please see the attached).Also the following action should be performed at the site:- Groundwater baseline sampling from all existing site wells should be performed prior to the system installation;- Destroyed wells should be replaced.Please call me if you have any questions.Sincerely,Ainura Doronova"AD12/15/2014: Prepared Stip. Sent an e-mail to S. Yanuck with a request to verify PR's contact information. AD12/16/2014: Received an e-mail from Meena Sadoo saying:"Good Afternoon Mr. Doronova,In regards to your email below,1) 3443 Atlantic Ave is deeded to 263443 Atlantic Avenue LLC2) Owner for LLC is Fereydoun Khalili3) Mailing Address 17 Laurel Drive, Great Neck, NY 11021 or you can use my address below.Please let me know if you need any additional information.Kindly reply to this email to confirm receipt.Thanks.Meena SadooDavid & Yonathan, LLC109-14 97 StreetOzone Park, NY 11417Phone: (718) 641-0859Fax: (718) 228-8886Email: msadoo@verizon.net"ADIssued and sent a Stipulation Agreement with a Corrective Actions Work Plan and Cover Letter to Mr. Khalili. DL to DDocs. Response is due January 16, 2015. AD

Remarks: called in to do inspection of soil and groundwater for poss sale.found contamination at 30 ft underground(watertable). clean up has not begun. please contact asap@(917) 543-1504.

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

DEC Memo:	DEC-Patel responded.01/21/12-Hiralkumar Patel.2:00 PM:- visited site. it is a three story building with basement. met James Gochnauer, tenant on first floor. he mentioned that the current property owner

PRIVATE RESIDENCE (Continued) **S111457843**

baught house about 40 years ago and since then using gas heating sytem. about couple of months ago, they had to fix a leaking drain pipe which runs along the building's southern foundation wall. piece of this line runs behind the two 275 gal ASTs. so to fix the leak, they cut the both tanks from associated pipes, move those tank and fix the leak. after fixing leak on drain pipe, contractor never connected pipes to tank.driver from Reliable Heating Oil delivered 150 gal #2 oil into the cut open fill line at the subject site (instead of building 142 Cleveland Ave). oil spilled onto concrete floor.during inspection, met with Vinny Burns, owner of Reliable Heating Oil. Vinny mentioned that driver left delivery ticket at the house. so tenant called the oil company regarding the spill. before oil company responded, FDNY responded and recovered about 20 gal oil and put in drum. oil company resumed cleanup on Friday night. they installed one fan in basement window in front and one one fan in the basement window in rear. during inspection, strong odors detected in basement and minor odors found on first floor. Vinny offered relocation, but Mr. Gochnauer decided to stay in house as minor odors in apartment. asked Vinny to install more powerful ventilation system to prevent any odors moving up through cracks in basement ceiling. asked him to remove contaminated material from the basement floor. informed him that the department may requiure subsurface investigation after inspecting the floor condition.asked Mr. Gochnauer to seal the fill port to prevent future misdeliveries.James E. Gochnauer **first floor tenant**132 Cleveland St Flr 1Brooklyn, NY 11208PH. (347) 992-5924email: vinnyburns@reliableheatingoil.comwww.reliableheatingoil.com01/23/12-Hiralkumar Patel.9:51 AM:- spoke with Vinny. he mentioned that contractor has removed the contaminated speedy dry from the basement floor. they will do some more cleanup and requested a site inspection tomorrow.01/26/12-Hiralkumar Patel. while visiting other site in booklyn, went to the subject site for inspection, but no one at home.01/30/12-Hiralkumar Patel. received email from Mr. Gochnauer (at 8:42 PM on 01/28/12). he mentioned that oil smell stil persists in the building and no ventilation was set up by oil company. he mentioned that his wife and son complained about low-grade headache.9:56 AM:- left message for Mr. Gochnauer.9:59 AM:- spoke with Vinny. informed him that a ventilation system must be installed in the basement and keep it running until the remediation is completed. informed him that a site meeting will be scheduled and asked him to be present.10:03 AM:- spoke with Mrs. Gochnauer. she mentioned that she and her son has light headache, but odors are much less now. informed her that the oil company can provide a relocation, if needed. she did not requested relocation. she will asked Mr. Gochnauer to call to schedule a site meeting.10:07 AM:- sent email to Mr. Gochnauer and asked to call back to schedule a site meeting. email copied to Vinny and Ms. Bernier.10:48 AM:- received call from Mr. Gochnauer. scheduled a site visit at 3:30 PM.11:01 AM:- spoke with Vinny and informed him about scheduled site meeting today. either he or someone else from his office will come.3:30 AM:- visited site. very minor odors detected on ground floor. less than 1 ppm recorded on PID. inspected basement. found odors in basement.

PRIVATE RESIDENCE (Continued) **S111457843**

inspected basement floor. basement floor is unfinished concrete floor. no cracks found in visible portion of the floor. any petroleum odors in basement could be from impacted materials (wood rack, metal rack etc.) in basement. based on condition of impacted floor, no subsurface investigation is required at this time, but requires ventilation in basement for some time.3:58 PM:- spoke with Vinny. asked him to install ventilation system in basement by tomorrow morning. asked him to run ventilation system 24 hours for at least a week.01/31/12-Hiralkumar Patel.10:34 AM:- spoke with Vinny and inquired him about ventilation system. he mentioned that he only has property owner's contact info who refused to give tenant's contact. so he had no contact with tenant. he needs to talk to tenant regarding access. informed him that the ventilation system must be installed by the end of today or else case will be referred to legal for enforcement. he requested list of contractors.10:43 AM:- sent email to Vinny with Mr. Gochnauer's contact info and contractor list. asked him to call back by 2 PM today with contractor's name, who will install ventilation, and timing. email copied to Mr. Gochnauer.2:29 PM:- received message from Colleen Higgison from AARCO.Colleen HigggisonAARCO EnvironmentalPH. (631) 586-5900 (O) (631) 433-3743 (C)Fax (631) 586-5910email: chiggison@aarcoenvironmental.com4:39 PM:- spoke with Colleen. she mentioned that AARCO will install a ventilation system in basement today.4:42 PM:- spoke with Ms. Gochnauer and informed her that AARCO will install ventilation in basement today. 02/03/12-Hiralkumar Patel.9:32 AM:- left message for Mr. Gochnauer.02/07/12-Hiralkumar Patel.1:50 PM:- spoke with Mr. Gochnauer. he mentioned that air quality is much better now. there is no odors in his apartment except some odors in bedroom. as he and his wife leave house early is morning, he asked to call back on 02/09/12 for a possible site visit on 02/10/12.1:57 PM:- spoke with Vinny and informed him about the possible site visit on 02/10/12. asked him to be available for a site inspection.02/08/12-Hiralkumar Patel.3:08 PM:- as I will be out of office on 02/10/12, sent email to Mr. Gochanuer and Vinny and asked for a possible site visit at 3 PM on 02/14/12.02/10/12-Hiralkumar Patel. received email from Mr. Gochnauer (at 6:41 PM on 02/08/12). he will be at home at 3:30 PM on 02/14/12.received email from Vinny (at 8:11 AM on 02/09/12). he is available for site visit.10:41 AM:- sent email to Mr. Gochnauer and Vinny and asked to confirm site visit at 3:30 PM on 02/14/12.02/13/12-Hiralkumar Patel. received email from Mr. Gochnauer (at 7:17 AM on 02/11/12). he is available for site visit tomorrow at 3:30 PM.11:44 AM:- left message for Vinny to confirm site visit tomorrow.12:22 PM:- received email from Vinny. he is not available for site visit tomorrow.1:02 PM:- spoke with Vinny and Mr. Gochnauer and scheduled a site visit at 2 PM on 02/15/12.02/15/12-Hiralkumar Patel.9:01 AM:- received email from Mr. Gochnauer. he is out of town, but property owner Mr. Bernier will be at the site at 2 PM for site inspection. he mentioned that smell in the house is much less. some smell in bedrooms and bathroom where there is limited air circulation.10:54 AM:- spoke with Mr. Gochnauer. he is out of town, but owner will be at the site to provide access. he also mentioned that someone removed fan from basement, sometime after yesterday afternoon. and this morning, his wife and son experienced strong odors in house (Mr. Gochnauer was not at home when he sent email this morning and was not known of the fact).11:09 AM:- spoke with Vinny. he mentioned that AARCO removed the fan. informed him about the strong odors in building. he will meet at the site.2:00 PM:- visited

PRIVATE RESIDENCE (Continued) **S111457843**

site. odors detected in basement. inspected basement floor again. found concrete patch on floor running from tanks to the boiler location, which could be location of the old supply line. found some cracks along this concrete patch and based on stain on floor, most of the oil might have accumulated in this area and looks like some oil might have seeped into ground through crack. also found oil soaked base of the wooden work bench. found some contaminated speedy dry under the metal shelf (which has glass jars on it) located in rear of the basement, also in the same area where dark oil stain observed. found some contaminated speedy dry along the building's eastern foundation wall. remaining speedy dry and possible oil seepage to the ground might be causing odors in the building.Vinny did not came for site visit.2:17 PM:- spoke with Vinny from the site. based on observations during the site visit, asked him for following work immediately:- removal of remaining speedy dry from along the eastern wall and also from under the shelf (owner will remove his stuff and move the shelf)- removal of bags of un-used speedy dry that cleanup contractor left behind- removal of two black drums left behind by FDNY after initial response (one contains contaminated material/oil and second is empty)- at least six soil borings: one under the metal shelf, one half way between the metal shelf and eastern foundation wall, one by the cracks along (possible) former supply line area and three along the eastern foundation wall (where tanks are located)informed Vinny that tasks, except soil borings, must be completed by the end of 02/17/12 and a work schedule for soil boring must be submitted by the end of 02/17/12.02/17/12-Hiralkuamr Patel.4:59 PM:- left message for Vinny.02/21/12-Hiralkumar Patel. received message from Vinny (at 5:38 PM on 02/17/12). he has contacted AARCO for required work.10:57 AM:- spoke with Mr. Gochnauer. he mentioned that no work has been done yet and he did not received any call from Vinny.tried Vinny's number, but his number is unavailable and could not leave a voice message.11:25 AM:- spoke with Colleen at AARCO. she mentioned that one of her empolyee received call from Vinny on 02/17/12 inquiring about cost for soil delineation. Colleen tried Vinny's number after that, but someone else answered the phone and said it was wrong number. she tried Vinny's number today, but no response.11:47 AM:- sent email to Vinny and asked him to call back before 1 PM today, or else case will be referred for enforcement.12:30 PM:- tried Vinny's number from other line (718-482-7366) and it worked. Vinny answered the phone. informed Vinny that if he does not complete required work, the case will be referred for enforcement.12:34 PM:- received email from Vinny. he spoke with AARCO for required work.12:42 PM:- spoke with Colleen at AARCO. she spoke with Vinny. she inquired about required work. informed her that the Department requires following:- ventilation system in basement and first floor (if possible)- removal of contaminated speedy dry left over after initial cleanup and other contaminated materials- removal of black drums left by FDNY- removal of unused speedy dry- soil delineation (soil boring to minimum of 2 ft below surface)informed her that ventilation must be installed by the end of today. she will send proposal to Vinny and will call back.1:10 PM:- received call from Colleen. she got OK from Vinny and a crew will go to site between 3 and 4 PM today. crew will remove remaining contaminated material, unused speedy dry and drums. also, a ventilation system will be installed tomorrow morning. she will send written proposal to Vinny for required soil delineation.1:55 PM:- sent letter to Vinny requiring installation of ventilation system in

PRIVATE RESIDENCE (Continued) **S111457843**

basement, removal of contaminated material and other unused cleanup material from the basement, soil delineation and endpoint samples (if needed). asked him to submit documentation regarding installation of ventilation and removal of contaminated material, by tomorrow. also asked to submit report by 03/21/12. letter emailed to Vinny, Colleen, Mr. Gochnauer and Ms. Bernier.2:56 PM:- spoke with Mr. Gochnauer and informed him about AARCO crew coming to the site for cleanup.3:33 PM:- spoke with Roy (631-445-0218), AARCO person who is at the site. asked him to remove contamianted materail from the basement. he is with Mr. Gochnauer and will address the issue.02/22/12-Hiralkumar Patel.4:41 PM:- left message for Colleen.02/23/12-Hiralkumar Patel.11:21 AM:- left message for Jim at AARCO (Colleen was out of office) inquiring update.02/24/12-Hiralkumar Patel.1:08 PM:- left message for Jim at AARCO.2:14 PM:- received message from Jim.3:01 PM:- spoke with Jim. he doesn't know much about the status, but believes that ventilation system has been installed.03/23/12-Hiralkumar Patel.1:52 PM:- spoke with Colleen. they had cleaned up surface material and installed a fan. but did not do any subsurface investigation. asked her to submit documents for work done till date.1:55 PM:- left message for Vinny. informed him that as the department has not received an investigation report, the case will be referred to legal for enforcement.1:59 PM:- sent email to Vinny.03/26/12-Hiralkumar Patel. received email from Vinny (at 11:25 PM on 03/24/12). he mentioned that he was not aware that he suppose to provide a report. he thought that AARCO was handling the issue.03/27/12-Hiralkumar Patel.6:53 AM:- received message from Vinny.3:55 PM:- left message for Vinny. asked him to refer to the Department's letter dated 02/21/12. informed him that the department requires investigation and remediation of contamination. asked him to submit a work schedule for subsurface investigation by the end of 03/30/12.3:58 PM:- spoke with Colleen and informed her about Vinny's email on 03/24/12. she will call Vinny.4:03 PM:- sent email to Vinny and asked him to contact Colleen. also mentioed that work schedule for subsurface investigation must be submitted by the end of 03/30/12.04/02/12-Hiralkumar Patel.12:51 PM:- received email from Vinny. he mentioned that AARCO will schedule for soil delineation.4:32 PM:- spoke with Colleen and scheduled a site inspection at 10 AM on 04/10/12. Colleen proposed to collect soil samples for field observations only and will continue investigation and sample collection for analysis only if finds indication of subsurface contamination.04/10/12-Hiralkumar Patel.10:30 AM:- visited site. met John (631-284-7049) from AARCO. he removed soil (by jack hammer and shovel) in one area along the southern foundation, behind the tanks. found petroleum odors in soil down to 2.5 ft below basement floor. asked John to stop further digging as he did not have PID or sampling jars. informed him that delineation work must be rescheduled with proper equipments. during work, found very thin concrete floor in basement. before begining work, John removed ventilating fan from basement. asked him to reinstall the fan to prevent any odors upstaris.spoke with Ms. Gochnauer, who confirmed no more odors in living area.10:45 AM:- left message for Vinny.12:49 PM:- received call from Vinny. informed him about findings of contaminated soil underneath the basement floor. informed him that the department requires complete delineation and remediation of contamination underneath the basement floor. as cleanup of contaminated soil could be more expensive, Vinny decided to report spill to his insurance company. asked Vinny to provide insurance

PRIVATE RESIDENCE (Continued) **S111457843**

agent's contact info and claim number, by tomorrow.04/11/12-Hiralkumar Patel.3:46 PM:- received call from Vinny. he spoke with insurance company and was informed that there is no pollution coverage. informed Vinny that the department requires delineation and remediation of contamination. he will talk to AARCO and will call back by tomorrow with work schedule.04/18/12-Hiralkumar Patel. received message from Vinny (at 5:10 PM on 04/17/12).9:51 AM:- left message for Vinny.9:52 AM:- spoke with Colleen. she hasn't received any calls from Vinny last week regarding soil delineation/remediation. she will talk to Vinny.04/23/12-Hiralkumar Patel.8:50 AM:- received message from Vinny.04/24/12-Hiralkumar Patel.11:04 AM:- left message for Vinny.12:29 PM:- received call from Vinny. he has spoke with Colleen and trying to schedule cleanup work. informed him that spill cleanup must begin immediately. he will call back by end of 04/27/12 with schedule.05/02/12-Hiralkumar Patel.2:05 PM:- spoke with Colleen. she just received payment for previous work and will submit proposal for required investigation work. informed her that the case will be referred to legal if work schedule not received by noon tomorrow.2:10 PM:- spoke with Vinny and informed him that work schedule must be submitted by noon tomorrow.05/03/12-Hiralkumar Patel.11:54 AM:- received message from Colleen.12:38 PM:- spoke with Colleen. she mentioned that Vinny has signed with contractor and they have scheduled soil delineation on 05/09/12.05/09/12-Hiralkumar Patel.9:25 AM:- visited site. met John from AARCO. he finished first boring to 3 ft depth. found less than 10 ppm on PID below 2 ft depth. asked to submit soil sample from 0-2 ft depth from first boring. they will install more borings.10:39 AM:- spoke with John (631-284-7049). they completed two more borings. less than 20 ppm recorded on PID in second boring with less than 10 ppm below 2 ft depth. asked to collect soil sample from 0-2 ft depth from second boring. in third boring, 51 ppm recorded in soil from 0-1 ft depth and 17 ppm from 1-2 ft depth. less than 10 ppm recorded below 2 ft in third boring. asked to analyze sample from 0-1 ft depth from third boring. he will install two more borings. he will call if any question regarding sampling depth.during visit, about 3 ft distance noticed between the buildings 132 and 136.12:59 PM:- received call from John. he mentioned that high PID readings (upto 198 ppm) were recorded to 5 ft depth in boring # 4 and 5. they stopped at 5 ft depth. informed John that the department requires complete delineation of contamination. asked him to continue vertical and horizontal delineation at and around borings 4 and 5. they found 121 ppm on PID from 0-1 ft depth in boring 6, but only 8 ppm recorded from 1-2 ft depth. asked him to analyze soil from 0-1 ft depth from boring 6. they will install more borings around boring 4 and 5 and continue those borings to clean soil. asked him to collect two soil samples from each boring with contamination (at and around borings 4 and 5): one at highest PID reading and one deepest clean.2:20 PM:- received call from Colleen. she mentioned that crew extended borings in contamianted zone to 7 ft depth and coult not extend further as using hand augers. found contamianted soil at 7 ft depth. asked her to collect two soil samples from each boring that shows contamination: one at highest PID and second deepest soil sample. she mentioned that after reviewing sample results, she will discuss with another consultant regarding further investigation and cleanup.05/23/12-Hiralkumar Patel.9:48 AM:- left message for Colleen.10:30 AM:- received call from Colleen. she will sent email with results. she has informed Vinny about soil contamination and

PRIVATE RESIDENCE (Continued) **S111457843**

referred to another company for cleanup.10:33 AM:- received email from Colleen including sample results. total of eight samples were analyzed and found contamination in four samples.soil analyticals:

Inter Insurance.Javier RiveraInter Insurance Agency Services, Ltd.Ph. (516) 352-7500 Ext. 1302email: jrivera@interinsurance.com07/13/12-Hiralkumar Patel. received message from Tim Derham (at 6:13 PM on 07/12/12) from Inter Insurance.2:35 PM:- spoke with Mr. Derham. he mentioned that Inter Insurance only insures office of reliable heating and there is no pollution liability coverage under their policy, but oil company's trucks are insured by State Farm. he will call back with contact info for state farm agent.Timothy DerhamInter Insurance Agency Services, Ltd.Ph. (516) 352-7500 Ext. 1310email: tderham@interinsurance.com2:41 PM:- sent email to Mr. Derham and asked to provide state farm agent's contact info. email copied to Vinny and Mr. Rivera.3:37 PM:- received email from Mr. Derham including state farm policy number and agent's name.4:30 PM:- spoke with Mr. Lewis. informed him about the spill case and inquired about coverage under policy issued by State Farm. he will look into the policy documents and will call back.Tom LewisState Farm Fire and Casualty CompanyPh. (845) 454-5444email: tom.lewis.pwl1@statefarm.compolicy #: 177 6058 E07 524:38 PM:- sent email to Mr. Lewis with case summary. asked him to reply.5:07 PM:- received message from Mr. Lewis. he mentioned that oil loading and off-loading from truck is not covered under auto insurance and it has to be referred to business insurance.5:08 PM:- received email from Colleen including boring logs and site map. found following information confusing:- as per lab data, soil sample was collected at 4-5 ft depth in SB-6, but boring log does not include any information about sampling at 4-5 ft depth in SB-6- site map is missing location of boring SB-8.07/16/12-Hiralkumar Patel.12:31 PM:- left message for Colleen.12:38 PM:- spoke with Mr. Ferris. he doesn't know anything about cleanup from property owner's insurance company and asked to contact insurance company directly.12:44 PM:- left message for Ms. Bernier.1:18 PM:- sent email to Colleen and asked to submit correct information about boring depths and site map.2:00 PM:- received message from Ms. Bernier.4:18 PM:- received call from Ms. Bernier. informed her that as fill port was not properly closed, it could be building code violation and as a property owner, she also has responsibility for the cleanup. asked her to complete delineation and perform cleanup. she mentioned that there is no coverage for such cleanup under her insurance policy. she requested list of contractors and copy of letter dated 02/21/12. asked her to call back by the end of 07/23/12 with updates.4:33 PM:- sent email to Ms. Bernier with contractor list and copy of email sent on 02/21/12 (with CSL).07/17/12-Hiralkumar Patel.4:05 PM:- received email from Colleen including revised site map with location of boring SB-8. she also mentioned that sample jar was marked incorrectly, but soil boring logs are correct. she did not mentioned the correct depth where soil sample collected from SB-6.4:15 PM:- sent email to Colleen and asked about correct depth where sample collected from SB-6.07/18/12-Hiralkumar Patel.7:52 AM:- received message from Ms. Bernier. she asked to send soil investigation data to ABC Tank.10:10 AM:- sent email to Ms. Bernier including copy of available lab data and boring logs.07/20/12-Hiralkumar Patel.9:51 AM:- received message from Ms. Bernier. she inquired about any other documents availabe.1:05 PM:- left message for Ms. Bernier and informed her that documents sent on 07/18/12 are for her property and the department does not have any other documents.07/26/12-Hiralkumar Patel.11:12 AM:- received message from Colleen.3:25 PM:- spoke with Colleen. asked her to confirm correct depth of sampling from

PRIVATE RESIDENCE (Continued) **S111457843**

SB-6.08/03/12-Hiralkumar Patel.4:20 PM:- received call from Rachel from Hydrotech. Hydrotech has been hired for the required work. Rachel mentioned that none of the sample results exceeds restricted residential cleanup standards. informed her that the department is using unrestricted cleanup standards and requires cleanup of contaminated material. also informed her that if owner wants to use restricted standards then they have to apply for other programs (like superfund or brownsfield). informed Rachel that the department requires excavation of contaminated soil to either clean point or to feasible limits. asked her to leave excavation open, if only safe, until the department reviews endpoint sample results. informed her that at this point, the department does not approve any remedial methods, other than excavation. asked her to provide work schedule. she will talk to property owner and will call back.08/17/12-Hiralkumar Patel.10:49 AM:- spoke with Rachel. she has sent work proposal to property owner and hasn't heard back.10:51 AM:- spoke with Ms. Bernier. she has received cost estimate from two companies and waiting for two more. due to high expense and no coverage from the insurance company, she needs some time collect fund. she is expecting to start work by middle of Sep. 2012. asked her to call back by the end of 08/31/12 with contractor's information.case referred to DEC Urda as Vinny failed to cleanup the spill.09/10/12-Hiralkumar Patel.4:39 PM:- left message for Ms. Bernier.09/13/12-Hiralkumar Patel.9:24 AM:- received message from Ms. Bernier. she mentioned that cleanup work will begin on 09/17/12.4:26 PM:- left message for Ms. Bernier and asked her about the contractor who will do the work.4:54 PM:- received message from Ms. Bernier. she mentioned that Riteway will do the work.09/14/12-Hiralkumar Patel.4:28 PM:- spoke with Rob Hill at Riteway. he confirmed that Riteway has been hired for work. due to some conflicts they had to rescheule the work. they will start soil excavation on 09/19/12. asked Rob to inform the department prior to backfilling of any part of excavation, so a site visit can be performed.09/20/12-Hiralkumar Patel.3:50 PM:- received message from Stephen Erlitz, attorney for Ms. Bernier.Stephen Erlitz **property owner's attorney**Low Firm of Erlitz & Erlitz LLP.151 BroadwayLynbrook, NY 11563Ph. (516) 568-9000Fax (516) 568-9001email: stephenerlitz@aol.com4:14 PM:- spoke with Mr. Erlitz. he asked to copy him on future correspondence regarding this case. he inquired about response from Vinny. informed him that the case has been referred to DEC legal for enforcement against the oil company.09/24/12-Hiralkumar Patel.11:48 AM:- left message for Rob.12:30 PM:- received call from Rob. they are removing contaminated soil. until now, they removed 20 drums of contaminated soil.09/25/12-Hiralkumar Patel.1:38 PM:- spoke with Ms. Bernier to schedule a site visit. she mentioned that her husband Mr. Bernier will be at site today at 3:30 PM.Wilfred BernierPh. (347) 634-79953:15 PM:- visited site. met Mr. Bernier. inspected basement. about 3 ft deep soil been removed from the former tanks location. ventilation system was running in basement.10/23/12-Hiralkumar Patel. received message from Mr. Erlitz (at 3:55 PM on 10/17/12).11:17 AM:- spoke with Mr. Erlitz. he mentioned that Mr. Bernier applied for loan to pay cleanup cost, but loan was turned down and property owner has no funding to support cleanup. they will talk to contractor to discuss payment plan.12/05/12-Hiralkumar Patel.11:27 AM:- spoke with Rob at Riteway regarding cleanup. he mentioned due to financial issues, property owner has asked Riteway to stop work in beginning of Oct. 2012.02/14/13-Hiralkumar Patel. received message from Colleen

PRIVATE RESIDENCE (Continued) **S111457843**

(at 5:15 PM on 02/14/13). she mentioned that Reliable Heating Oil hasn't paid bills. she inquired if AARCO can submit bills to the department.11:02 AM:- left message for Colleen.11:17 AM:- received call from Colleen. informed her that AARCO was working for Reliable Heating Oil and bills can not be submitted to DEC for payments.05/01/13-Hiralkumar Patel. received call from DEC legal. Vinny Burns called legal and informed that Reliable Heating is out of business.06/21/13-Hiralkumar Patel. A default hearing was held at the Region 2 office, in which Department staff attorney John Urda presented a motion for a default judgment against Reliable Heating Oil, Inc. Patel gave supporting testimony and, at the hearing's conclusion, Administrative Law Judge Richard Wissler granted the motion. The ALJ will submit a recommendation to the Commissioner for a final decision.10/29/13-Hiralkumar Patel. received message from Rob (at 2:18 PM on 10/25/13) from Riteway.11:13 AM:- left message for Rob.11:27 AM:- recieved call from Rob. he mentined that property owner is requesting a site visit to discuss cleanup options. informed Rob that property owner has to submit a work plan for review and there is no need for site visit at this time.11/06/13-Hiralkumar Patel. received copy of Decision and Order of the Commissioner.11/14/14-Hiralkumar Patel.11:25 AM:- spoke with Ms. Bernier inquiring cleanup update. she mentioned that due to some financial problems, she can not pay for previous work and contractor will only continue work after full payment of previous work. she also filed lawsuit against Reliable Heating and got judgement in her favor, but there is no response to any summons sent to Reliable Heating.**waiting for corrected boring logs and site map with sample locations???****sample results on hard drive.****case referred to legal against Reliable heating.**DEC requires: 1) complete delineation and remediation of contamination

Remarks: national grid was on scene noticed oil smell. FDNY to scene located oil in basement. contained to concrete floor

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Registry ID: 110004401549

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number: 001
Tank Id: 1214

BNS BLDGS LLC (Continued) **A100168786**

Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
G03 - Tank Secondary Containment - Vault (w/o access)
I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
J02 - Dispenser - Suction Dispenser
L09 - Piping Leak Detection - Exempt Suction Piping
H04 - Tank Leak Detection - Groundwater Well
B00 - Tank External Protection - None

Tank Location: 1
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 10/17/1928
Capacity Gallons: 5000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: MSBAPTIS

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Date form received by agency: 02/16/1988
Site name: NASH DRY CLEANERS
Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Hazardous Waste Summary:
Waste code: NONE
Waste name: None

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

A B C COMMUNICATIONS INC (Continued) **1000553958**

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 01/21/1994
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: EPA Contractor/Grantee

FINDS:

Registry ID: 110004473285

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"10/10/95: This is additional information about material spilled from the translation of the old spill file: CONTAMINATED SOIL.1/12/2004-Vought-Spill transferred from Rommel to Vought.9/26/05- Obligado- FILE TRANSFERED FROM VOUGHT TO OBLIGADO10/21/05 - Obligado- File review:Site Assessment Report submitted to DEC in 1994. Six soil borings advanced in vicinity of old tanks. One boring to 45' (B4), other borings to 9' bgs. Soil analyticals show BTEX franging from 16 ppb in soil sample B-2 to 25 ppb in B-4. No groundwater samples taken, gw encountered at 40'. No boring logs submitted. NFA requested based on low concentrations and no sensitive receptors. DEC Rommel denies NFA request due to: soil samples analyzed after holding time, no boring logs included, site in residential area (sensitive receptors) and near utilities, borings only to 9' bgs in 5 locations, no ground water sample collected. Requires: 1)borings in vicinity of B-4 to determine vertical extent of contamination, 2) boring in vicinity of soil contamination associated with spill #s 9312954 and 94031818, 3) borings in vicinity of pump island, 4)boring logs, 5) result of soil screening, 6)tank test results for 4/93. 11/3/05 - Obligado - Sent email to Tomasello inquiring as to whether or not additional work was ever performed at the site.8/7/09 - Obligado - Reviewed work plan. According to workplan, gw at 18-19 ft bgs. Not clear if they are proposing grab samples or well installations. Sent disapproval email with comments requiring resubmittal within 30 days. Comments in edocs. 10/14/09 - Obligado - Reviewed revised workplan. Sent disapproval letter again requesting moving of some borings. Require resubmission within 15 dasy.11/13/09 - Obligado - Reviewed Investigation Work Plan submitted by JP Broderick. The plan proposes to install 3 monitoring wells at the site. The plan addresses the previous DEC comments and is acceptable. I sent an approval letter. The RI will be submitted within 60 days.4/5/10 - Obligado - I reviewed the RI report. 3 soil boring/monitoring wells were installed and soil and Gw contamination was not detected. This spill is closed.6/21/10- Obligado -

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	working for potential purchaser. May be entering brownfields. propsed self storage. Several tanks on site. Whitestone is scheduled to conduct the first quarterly round of product recovery and groundwater gauging and sampling on Tuesday, December 14, 2010. Each of the nine on-site wells will be accessed and gauged with an oil/water interface probe prior to sampling to obtain depth to groundwater measurements and record product thicknesses (if encountered). If a monitor well does not exhibit free-phase product, the well will be purged prior to sampling, and a groundwater sample will be collected for volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) analyses via USEPA Methods 8260 and 8270, respectively. Following this initial quarterly groundwater gauging and sampling event, a report will be provided to NYSDEC documenting the UST closures, soil remediation, groundwater monitor well installation, and gauging/sampling activities.3/10/11- As per Whitestone e-mail. Whitestone conducted the first quarterly round of product recovery and groundwater gauging and sampling at the above-referenced site on Tuesday, December 14, 2010. During this initial event, only seven (MW-1 through MW-5, MW-7, and MW-9) of the nine on-site wells could be accessed for gauging and/or sampling as two of the on-site wells (MW-6 and MW-8) are located within storage units at the facility. Gauging and sampling of these two wells later took place on February 10, 2011. During the initial gauging and sampling event conducted on December 14th, No. 6 fuel oil product was identified in monitor wells MW-1 through MW-3. Accordingly, groundwater samples were not

RITEWAY LAUNDRY CO INC (Continued) **1000547174**

collected from monitor wells MW-1 through MW-3. Groundwater samples were collected from monitor wells MW-4, MW-5, MW-7, and MW-9 and submitted for volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) analyses. During the gauging and sampling event conducted on February 10th, no free-phase product was identified in monitor wells MW-6 or MW-8. Accordingly, groundwater samples were collected from these wells and submitted for VOCs and SVOCs. Analytical results from the sampling events have identified the chlorinated VOC trichloroethene (TCE) at a concentration of 5.5 parts per billion (ppb) in monitor well MW-6 slightly exceeding the NYSDEC Technical and Operational Guidance Series 1.1.1. (TOGS) Water Quality Standard (WQS) of 5 ppb. The VOC chloroform was identified at a concentration of 14 ppb in monitor well MW-9 slightly exceeding the NYSDEC TOGS WQS of 7 ppb. No other tested constituents were detected in the wells at concentrations exceeding NYSDEC TOGS WQS. The next quarterly groundwater gauging and sampling event is scheduled to be conducted on March 16, 2011. Due to the proximity of the receipt of the analytical data from the first quarterly sampling event and the scheduling of the second quarterly sampling event, a report will be provided to NYSDEC documenting the UST closures, soil remediation, groundwater monitor well installation, and gauging/sampling activities to date following the completion of the second quarterly sampling event.3/16/11- a total of eight free-phase product recovery events in an attempt to remove residual petroleum product. The free-phase product recovery program consists of product removal from monitor wells MW-1 through MW-3 via disposable hand bailers and/or a pump/skimmer into 55-gallon drums for off-site disposal. If free-phase product is encountered in other on-site wells, these impacted wells also will be addressed. Referred to remediation.1/10/13-Vought-Received call from Patrick Besley (Whitestone Associates Ph:908-285-2489 Office:908-668-7777) and he is working for property owner and is looking for status on new project manager and would like to arrange meeting with new Project Manager. Vought called and spoke to to Piper who noted that site was not referred to remediation as noted above and that DEC Piper was requiring a RAP to address due to continued presence of free product at the site. Besly noted that he received email from DEC Piper that case will be transferred and is looking for an immediate callback.1/11/13 - Austin - Spoke with Chris Seib of Whitestone (same number as Besley). He is requesting a callback from DEC Piper to discuss the RAP for the project. Will pass request along to Piper via e-mail. After I sent e-mail, Piper spoke with me, and indacted that this site had a large patch of product that needed immediate removal, and that the RP’s reps have been not forthcoming with results. I indicated to him that he either get an aggressive RAP to immediately rectify this problem, or file a case with Legal on the matter. - end01/17/2013: This case was transferred to A. Doronova. ADI was copied on the following e-mail:" greater than greater than greater than Randall Austin 1/16/2013 2:02 PM greater than greater than greater than Vadim - Please see the note below from Ryan - We have a situation where a "puddle" of # 6 oil was detected within the foundation walls of a structure that subsequently was rebuilt. The remediation work still needs to be done, but a dig-out does not seem feasible. We have directed the RP’s consultant to submit a remediation proposal for this situation, and they in turn wish to have a site. visit. Can you please have one of your project managers contact Ryan ASAP, and arrange an appropriate date to meet with the

RITEWAY LAUNDRY CO INC (Continued) **1000547174**

consultant? Ryan is available to them, to answer any questions they may have, before this field meeting takes place. Thanks - @ greater than greater than greater than Ryan Piper 1/16/2013 1:49 PM greater than greater than greater than Randy,During the initial gauging and sampling event conducted on December 14th, 2011, No. 6 fuel oil product was identified in monitor wells MW-1 through MW-3. Accordingly, groundwater samples were not collected from monitor wells MW-1 through MW-3. Groundwater samples were collected from monitor wells MW-4, MW-5, MW-7, and MW-9 and submitted for volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) analyses. During the gauging and sampling event conducted on February 10th, no free-phase product was identified in monitor wells MW-6 or MW-8. Accordingly, groundwater samples were collected from these wells and submitted for VOCs and SVOCs.Analytical results from the sampling events have identified the chlorinated VOC trichloroethene (TCE) at a concentration of 5.5 parts per billion (ppb) in monitor well MW-6 slightly exceeding the NYSDEC Technical and Operational Guidance Series 1.1.1. (TOGS) Water Quality Standard (WQS) of 5 ppb. No other tested constituents were detected in the wells at concentrations exceeding NYSDEC TOGS WQS. Currently, the site has been redeveloped with a self storage warehouse. A 50' x 50' x 1.5' free phase plume of #6 oil remains under the building. I have requested the RP and contractor to submit a RAWP to address this plume. They would like to have a meeting, as soon as possible. I would like to have this reassigned to Remediation so they may attend the meeting as well.I have a small paper file when the transfer is finalized.Ryan M. PiperEngineering Geologist I"AD01/18/2013: Called and left a message to Mr. Beesley, stating that I am a new project manager, and my contact information. Later received a phone call from Mr. Beesley. he informed me that they have tentatively scheduled meeting with R. Piper of DEC on january 23, 2013. Told him that I have to speak with R. Piper regarding this meeting, and that probably it will be rescheduled. AD01/22/2013: Spoke with Mr. Beesley regarding the meeting. Re-scheduled meeting for January 25, 2013. AD01/23/2013: I, J. Kolleeny and R. Piper had a meeting with RP (Acrs II LLC) and their consultant (Whitestone Associates) regarding futher actions at the site. RP and the consultant were informed that DEC can not approve the spill closure request with free product in the site wells. DEC required to perform free product recovery test and based on results propose LNAPL recovery schedule. Also, DEC required to submit a work plan for delineation of LNAPL plume. Put site priority as P1. AD03/12/2013: Received a call from Jim Van Horn of CNS (new consultant for RP). His phone numbers are: (631)-774-2557, (516)-932-3228. He asked for the next course of actions required by DEC. Told him that DEC required the previous consultant to perform free product recovery test and based on results propose LNAPL recovery schedule, and that a work plan for delineation of LNAPL plume should be submitted to DEC for review and approval. Mr. Van Horn will submit WP soon. His full contact info is:Jim Van HornSenior Project ManagerCNS Environmental Corp.208 Newtown RoadPlainview, NY 11803T. 516.932.3228F. 516.932.3288C. 631-774-2557AD03/13/2013: Received the following e-mail from Mr. Van Horn:"Ainura,Please utilize the link below to download the proposed Remedial Investigation Work Plan for Spill# 0705410. https://dl.dropbox.com/u/100835224/Spill%20No%200705410_Remedial%20Investigation%20Work%20Plan_031213.pdfPlease contact me with any questions. Regards,Jim Van Horn"DL the RIWP to eDocs. Will review.

RITEWAY LAUNDRY CO INC (Continued) **1000547174**

AD03/25/2013: Reviewed the work plan. It proposes installation of two additional monitoring wells on a sidewalks along Euclid and Atlantic Avenues to delineate free product plume. Discussed the proposed work plan with J. Kolleeny of DEC. Issued and sent an approval letter to Mr. Michael Greene with the following comment:" Two soil samples should be collected for laboratory analysis from each boring/well: one sample from directly above the water table and a second from the sampling interval with the highest PID reading. In the absence of any field indications of contamination, a single soil sample should be collected from just above the water table."DL pdf copy of the letter to eDocs. AD06/21/2013: Called to speake with Mr. Van Horn regarding submission of the report. He was abcent, and I spoke with a receptionist. She told me that the report is under review, and will be sent to DEC sometime next week. AD07/24/2013: received the following e-mail from CNS:"Ms. Doronova,Please see a link below where you can view and download the Remedial Investigation Report and Remedial Action Work Plan with Health & Safety Plan completed for NYSDEC Spill # 07-05410 assigned to 3319-3325 Atlantic Avenue in Brooklyn, NY.https://www.dropbox.com/sh/o8qrf9z4a8m6zf2/lKjosihSFrIf you have any questions, please contact Charles Powers at 516-932-3228 or cpowers@cnsenviro.com.Thank you. Joanna LicataCNS Management Corporation"DL the report and RAP to eDocs. Will review. AD07/30/2013: Reviewed the RAP. It states that free product was detected in two newly installed sidewalk wells. Based on the data, a RAP is proposing installation of a belt skimmer system for the basement wells with free product and application of EFR on sidewalk wells exhibiting free product. Quarterly groundwater monitoring reports will be submitted to the Department on a regular basis. AD07/31/2013: Called and spoke with Charles Powers of CNS regarding RAP details, such as frequency of the EFRs and belt skimmers specifications. Requested to submit info on belt skimmers. Approval of the RAP is pending submission of an additional data. AD08/15/2013: Called and left a message to Mr. Powers regarding data submission. Reviewed the Remedial Investigation Report. It states that from April 19 through April 22, 2013, CNS installed two off0site wells on a sidewalk along Euclid Avenue and Atlantic Avenue. PID readings were taken during soil sampling and they ranged from o to 166 ppm. These soil borings them were converted into 4 " GW monitoring wells.On May 4, 2013 sampled site wells with no free product: MW-4 and MW-5. Five wells had free product: MW-1, MW-2, MW-3, MW-10 and MW-11. Three wells were not accessable. AD09/12/2013: Called and left a message to Mr. Powers regarding data submission. AD09/13/2013: Called and spoke with Mr. Powers. He promised to submit the data by Monday, September 16, 2013. AD09/16/2013: Received the following e-mail from C. Powers:"Attached are the specs of the pumping system.Charles PowersPresident | CEOCNS Environmental Corp.208 Newtown RoadPlainview, NY 11803D. (516) 932-3287T. (516) 932-3228F. (516) 932-3288"Will review. AD09/18/2013: Reviewed the submitted data. Will issue an approval letter. AD09/19/2013: Sent the approval letter to Mr. Greene. DL pdf copy to eDocs. AD12/12/2013: Called and left a messsage to Mr. Powers. AD07/24/2014: Called and left a message to Mr. Powers regarding site status update info. AD07/28/2014: Received a phone call from C. Powers. he said that the pump system was installed approximately 2 months ago and that the system is running. The report will be submitted next week. AD

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DER Facility ID:	144292
DEC Memo:	01/24/06: This spill transferred from J.Kolleeny to S.Kraszewski. - SK03/14/06: This spill reassigned to K.Tang. - SK01/15/08: spill reassigned to J.Kann. Consolidated with closed spill 0302414. J.Kann4/10/13: J.Kann - IWP approved in an email (edoced).4/26/13: J.Kann - revised IWP rcvd and edoced.11/4/13: J.Kann - SAR is past due (due October 2013). stip sent to NYCHA today. Must be returned by December 4, 2013.12/6/13: J.kann - signed stip rcvd from NYCHA on 12/4 and forwarded to legal for execution on 12/6/134/4/14: J.Kann - extention requests made by NYCHA's consultants due to poor weather and a damaged drill rig. Extension was approved on February 12 and then again on March 12. Report was submitted today, the approved extension date. Brief glance at the report shows some VOC and SVOC constituents in groundwater above CP-51 at one location. Closure request was made by NYCHA's consultant. Will need to further review the report before making a determination.10/21/14: J.Kann - reviewing site. One well has elevated VOCs. Groundwater is at approx. 75 fbgs. Two wells were previously installed on site as part of another investigation. An email was sent to NYCHA on 10/21/14 requesting they try to locate the report related to the previous

OCEAN HILL HOUSES -NYCHA (Continued) **S102149171**

investigation.10/30/14: J.Kann - spoke with NYCHA today. They never received information about the investigative work that Gannett Fleming had started at the site. Therefore, no additional info is available. 11/18/14: J.Kann - information from spill 0302414 indicates "NYCHA CONTRACTOR GANNETT FLEMING DOING FOLLOW-UP SITE INVESTIGATION SINCE TANK CLOSURE FOUND SVOCs IN SOIL ABOVE TAGM. PUTTING IN WELL, SOIL CONTAMINATION ENCOUNTERED FROM 25 FEET DOWN TO WATER TABLE AT 75 FT., WITH PID=220 PPM AT 50 FT., THEN FIRST SPLIT SPOON BELOW WATER TABLE, PID=230 PPM. SOIL SAMPLES WERE COLLECTED FOR LAB ANALYSIS, AND GROUNDWATER SAMPLE WILL BE TAKEN AFTER WELL IS DEVELOPED." The tank closure report was reviewed (dated February 2000 and prepared by PT&L Contracting). Endpoints were not above CP-51. No VOCs were detected, some PAHs were detected below CP-51. The investigation performed by JCB is also under review.12/10/14: J.Kann -email sent to Yelena today-I have read the Remedial Investigation Report (RIR) prepared by JC Broderick for the referenced site. Based on the review, the spill has not been closed and the Department has the following comments:-Based on the site file, JCB notified the Department of difficulty encountered during the field investigation, resulting in approved modifications to the original work plan. None of this information is discussed and presented in the RIR. These details must be discussed in the RIR since borings were not advanced to the depths proposed in the original work plan.-The conclusions and recommendations section indicates that JCB suspects the contamination in the on site groundwater monitoring well is from another source, but a potential source is not identified. The Gannett Fleming work plan for the site dated 2003 indicates that based on historic Sanborn Maps a gasoline tank was present on this property until around 1962, or when Ocean Hill Houses were built. Why is the source assumed to be off-site? Please clarify and further discuss this in the RIR. -An additional round of groundwater samples must be collected from the three wells, analyzed for VOCs/SVOCs, summarized and submitted to the Department. Once these comments are addressed, additional investigative work may be necessary at this site.

Remarks: 20K TANK SYSTEM FAILED HORNER EZY CHECK WITH A GROSS LEAK, WILL EXCAVATE, ISOLATE & RETEST.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"Con Ed e2mis #130985 Notes:4-19-00 1000hrsWhile working on consumers vault 5638-b on 104[9b05] taking samples of current transformer on LIRR property, 1gal dielectric fluid spilled onto I-beams and possibly some bluestone. Not sure if oil on bluestone was from spill. Did a 50-499ppm cleanup of bluestone. Sample taken of oil spill.4-21-00 0725hrsVerified owner of equipment(current transformer) is Con Ed. LIRR owns vault 5638-b 104.4-21-00 1555hrsLSN 00-03883 117ppm PCBUpdate being entered on 5-1-00 1240hrsEquipment Group investigated the cause of late report. Discovered employees neglected to report spill on day of incident due to the embarrassment of the situation. Personnel did not wear PPE.PT701F1621 labeled as CT is source of spill. LSN 00-03883-002 93ppm PCB. (bluestone)On 4/25/00, R. James interviewed responsible parties and found that employees has oil on clothing and three vehicles were involved . Mr. James requested quarantining and sampling vehicles. Also, an ammonia based window washing liquid was used to cleanup the vault.On 4/26/00 1600hrs, Mr. James left a voicemail for LIRR informing of improper cleanup and possible exposure.On 4/26/00 1715hrs, LSN 00-04028 received. Sample results of vehicle seats and floor found acceptable with exception of the drivers seat in vehicle #D23270 which was 18ugs/100cm2.4/26/00 1800hrsVerified that Ammonia based cleaner would not clean PCB oil.4-26-00 2045hrsCon Ed advised H. Goetz of LIRR that cleanup was not done by procedure and that they need a list of any exposed LIRR employees.4-28-00 0700hrs LSN 00-04136, 7 wipe samples of PT transformer taken. All <10ug/100cm2. No LIRR personnel feel they were in contact with oil.4-28-00 1030hrsCleanup compleated on vehicles. Area of sample #5 which returned high was cleaned and taken again. Returned <1ugs/100cm2.4-30-00 1707hrsUpper structure cleanup was completed. Chem Lab started sample taking at same time completing at 1620hrs. Maintenance removed 4'X12' section of bluestone. Cleanup area roped off until wipe sample results recieved.5-2-00 1540hrsWipe sample results from areas of girders where the oil spilled. Sampling results <1ugs/100cm2.
Remarks:	CUSTOMER VOLT #5638 GETTING REPAIRED AND SPILL OCCURED. ALL FLUID HAS BEEN CLEANED UP ON 4/19 BY 1130 AM. #130985

Emergency contact telephone: 7188279000
24 hour emergency telephone: 7188279000
Emergency contact ext/pin #: Not reported
Number of full time employees: 500
EPA ID: 2000338
Facility ID provided by CEPPO: 100000111489
Is facility covered by OSHA PSM: T
Is facility covered by EPCRA 302: T
Is fac. covered by CAA Title V 112(2): F
Clean air op. permit/State ID: Not reported
Last safety insp. dat: 1999-02-11 00:00:00
Inspected by: State environmental agency
Is it OSHA approved with star/merit ranking: False
Will RMP involve predictive filing: False
Submission type: First Time
RMP description: Not reported
Facility has no accident hist. recs: True
Foreign owner's address: Not reported
Foreign owner's zip: Not reported
Foreign owner's country: Not reported
Claim # of employees as CBI: False
Date RMP accepted by EPA: 1999-07-09 00:00:00
Date of error Report: Not reported
Date RMP received: 1999-06-21 00:00:00
Does RMP contain graphics files: False
Does RMP contain attachments: False
Was certification letter received: True
RMP submission method: RMP*Submit
Does RMP contain CBI substantiation: False
Does RMP contain electronic waiver: False
Date RMP postmarked: 1999-06-18 00:00:00
Is RMP complete: True
Date of de-registration: 2012-07-30 00:00:00
Date de-registration is effective: 2012-07-27 00:00:00
Aniversary date: 2004-06-18 00:00:00
Does RMP contain CBI data: False
Does RMP contain unsanitized CBI version: False
RMP version #: 1.1.7
FRS latitude: 40.680840000000003
FRS longitude: -73.875029999999995

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"12/9/03 TJDSpill reassigned Demeo >>> Rommel.06/14/04Received call from Tony Ying of CRA, 716-297-2160 who represents new owner. They would like to know what needs to be done to investigate/remediate the spill. Rommel.No file exists.2:30pmLeft message for Mr. Ying that the soil and groundwater around all the tanks (gas, diesel and fuel oil) must be investigated due to the three spill numbers at this site. 9412423 and 8805745.Offered to review a work plan.Rommel07/11/05Received a Phase II report, dated 2001, for the site from Brian Kramer of CRA. The report recommends additional sampling. Discussed the current status with Brain Kramer. He advised that the owner or possibly a buyer of the propoerty is eager to complete the additional testing and sign off on a

BLUE RIDGE FARMS (Continued) **1002988545**

remediation plan. Bishop7/25/2005 Sangesland spoke with "Bank Officer" from a potential purchasers bank who asked about the project and what work needs to be done. Sangesland noted that the Spill Manager was still listed as Rommel, so Sangesland told the owner to get in touch with Koon Tang (Head of Region 2 Gasoline Remediation Group). (Unknown who wrote the notes above listed as 7/11/05)SS8/1/05 AKRF Environmental Consultants have submitted a Subsurface Investigation Report Phase II dated May 2001 including an electromagnetic survey and collection an analysis of soil, groundwater, and process water samples. The report has been reviewed.BishopPreviously assigned to Heather Bishop in CO.2/26/07 - Austin - Received report from Conestoga-Rovers Associates, dated 2/21/07 for this location - Spill reassigned to Ketani for review of submission and contiuation of work. - end2/27/06 - Raphael Ketani. There are 2 PBS cases for the site: #2-336726 and #2-095923.#2-336726= four 4,000 gal. tanks, closed and removed 6/1/88#2-095923= 5 tanks, four 4,000 gal. and one 10,000 gal., all closed and removed 12/1/89 one 10,000 gal. #2 fuel oil tank, above ground, temporarily out of service one 300 gal. lube oil tank, above ground, in service I found the following documents:5/17/01: AKRF phase II report with FAXes of tables of analytical results, and boring logs dated 5/20/056/14/04: several sets of Spill Reports with notes attached2/21/07: status report from Conestoga-Rovers & Associates2/26/07: Spill Report with notes 3/1/07 - Raphael Ketani. I finished my review of the case file.From the AKRF 5/17/01 report, parcel D contained the main building. Two tanks failed their tank tests, according to spill case #8805745. Borings B-12 to B-15 were done in the receiving dock area at the west side of the building. Borings B-4, and B-9 to B-11 were done in the shipping dock area on the east side of the building. B-10 had the worst contamination with very high TAGM exceedences for many VOCs. B-9 and B-11 had several VOC hits, but they were below TAGM. Water samples were also taken. B-9 had 3 hits with 1 VOC above TAGM and B-12 had 2 hits with none above TAGM. B-4, and B-12 to B-15 had no groundwater VOC hits.In the Consetoga-Rovers 2/21/07 report, SB-2 was installed in the approximate vicinity of B-10 of AKRF's report. All of the chemical species for SB-2 were non-detect. The groundwater sample taken from MW-1 after the chemical treatment in 8/06 was almost completely non-detect. There were exceedences for isopropylbenzene and trichloroethylene. MW-1 is situated upgradient of former B-10 and the other sites that had contamination. However, the MDL was set at 10ppb. SB-5 (to the right of former B-10) was sampled in 8/05 and had many VOC exceedences. Boring BH-10 had the highest contamination, according to the report, but there wasn't any excavation.I tried to reach Brian Kramer of Conestoga-Rovers & Assocs. (716) 206-0202, ext 210, but could only leave a voice mail. The owners of the site at block/lot 04143/0001 are 3301 Atlantic Avenue, 1 Plaza Road, Greenvale, NY 11548-1027.3/5/07 - Raphael Ketani. Brian Kramer and Kevin Lynch of CRA returned my call. They said that some typographical errors were made on Table 1 and the site map. They said that the North arrow should be turned 90 degrees to point toward the facility. The "BH" series of boirngs in Table 1 should be listed only as "B." Mr. Kramer said that IP-3 is the nearest boring to B-10. They said that the potassium permanganate was injected into the smear zone/upper zone in order to have the chemical seep down into the affected soil, rather than just going laterally and missing the zone. The trichloroethylene detected in the groundwater is present

BLUE RIDGE FARMS (Continued) **1002988545**

everywhere under the site and appears to be originating from upgradient. In the end, I asked them for one more soil sample from a boring just south of B-10 and another groundwater sample from MW-1. They agreed to do this.3/7/07 - Raphael Ketani. I received the following e-mail from Mr. Lynch:Per our conversation on Monday March 5, 2007, I am attaching a revisedFigure 1 and revised Table 1 for inclusion in the Letter Report datedFebruary 21, 2007 for the Chloe Foods Site. Figure 1 has been revisedto show the correct orientation of the North arrow. Table 1 was revisedto add the depths at which the soil samples were collected and tocorrect the designations of B-9, B-10, and B-11(incorrectly shown asBH-9, BH-10, and BH-11). We are also aware the spill number wasincorrect on the letter, and should be 1010620, not 101060. To help clarify the TCE in groundwater issue, attached is a figureshowing the upgradient locations at which AKRF collected soil andgroundwater samples at the site, and the analytical summary tables forthe compounds detected at those locations. These results indicate thattrichloroethylene was detected in the groundwater upgradient of theproduction facility (at B-1, B-2 and B-12, and the process waterextraction wells), and that this compound is not present in any of thesoil samples from the site. Therefore, TCE and related chlorinatedcompounds are not considered to be site related, but rather present inthe water regionally. We understand that the NYSDEC is requesting additional sample collectionto verify that treatment was effective at the site. This sampling is toconsist of collection of one additional groundwater sample at the MW-1monitoring well, and collection of one additional soil sample adjacentto historical locations B-10 and SB-5. The soil sample will be collected from the interval(s) exhibitingthe highest PID reading, strongest odor, or most staining. In absenseof these items, the sample will be collected from just above the watertable in the smear zone. Both the groundwater and the soil sample areto be analyzed for volatile organic compounds. CRA will contract with adriller to install the soil boring and collect the soil sample. Thegroundwater sample will be collected at the same time. The NYSDEC willbe notified of the date of the work. Should you have any questions, please contact Mr. Brian Kramer at (716)583-5730 or Mr. Kevin Lynch at the numbers below. Mr. Kramer and Mr.Lynch are both in the same office so mailing and office phone numbersare the same. Mr. Kramer is at extension 210. Kevin Lynch Conestoga Rovers and Associates, Inc.2371 George Urban BoulevardDepew, New York 140436/22/07 - Raphael Ketani. I made contact with Mr. Kramer. He said that things were delayed twice as the client was not "on board" with the idea of doing another boring and more sampling. However, the boring was done and a soil sample and a groundwater sample were taken. He said that 5 or 6 injection points for soil treatment were also installed. Mr. Kramer said that the results for the groundwater sample are all in the single digits, except for MTBE, which is at 11 ppb. He said that the results for the soil sample haven’t come back yet, but if they are above TAGM, then they are ready to do soil treatment. He said they will send me the results and all of the additional information when it is available. 9/17/07 - Raphael Ketani. I received the 9/7/07 letter report from Kevin Lynch of Conestoga-Rovers. It stated that borings IP-17 to IP-21 were installed around boring B-10. Only the soil sample from IP-17 at the 15’ to 17’ interval had high PID readings. Total volatiles were detected at a reading of 668 ppm. This sample was sent off for analysis. The soil analyses came back with very low hits for 4 VOCs and non-detects for 4 other VOCs. A

BLUE RIDGE FARMS (Continued) **1002988545**

groundwater sample was taken from MW-1. The results showed that the 4 VOC hits were at or below the TAGMlimits, including a 5J hit for TCE.9/19/07 - Raphael Ketani. I contacted Brian Kramer of Conestoga-Rovers regarding the process water injection that had been depicted on some old diagrams in the file. He said that this water was used for cooling only, not for any type of commercial process.I reviewed the old analytical results packages and found listings for PERC (tetrachloroethylene) among the VOCs. However, PERC was always non-detect. Also, PERC and TCE were never detected in the soil samples. Based upon the analytical results of the letter reports for 2/21/07 and 9/7/07, and the existence of the site in an industrial area where TCE is probably ubiquitous in the groundwater, I am closing the spill case.9/27/11 - Raphael Ketani. Jim Kelly of Property Solutions (732) 417-0999 ext 222 called requesting information about several issues regarding the property and the spills that took place on the site (also spills #9412423 and #8805745). I spoke to him. He said that a Phase I was being done and, in the process, they discovered information about the spills and the tanks. The Phase I is being done for a transaction. The property is in receivership. I told Mr. Kelly that there are two reports in the e-docs and that the FOIL people will copy them onto a disk and send it to him. He asked what should be done with the 19 injection wells. I told him that it would be up to the owner whether he wants to keep them open. However, if they are going to be abandoned, then they must be abandoned in accordance with DER-10. He said that he will follow the instructions in DER-10. With that, the conversation ended.

Remarks: CALLER DOING SITE WORK FOUND CONTAMINATED SOIL.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

OSHA ESTABLISHMENT

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

BLUE RIDGE FARMS INC (Continued) **1016098670**

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Classification: Not a generator, verified

Date form received by agency: 11/24/1989
Site name: NAREMY DRY CLEANERS
Classification: Unverified

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

NAREMY DRY CLEANERS (Continued) **1000206130**

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

MUNDO SHOES & FASHION (Continued) **1016066755**

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

DIAZ JUAN (Continued) **1000442652**

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

FINDS:

Registry ID: 110004414269

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Sangesland spoke to homeowner. He said he noticed a small leak from his tank onto the basement floor. He put a pan under the tank and called Petro.Petro drained the tank and will repair or replace. Minor leak to cement floor. No drains impacted.
Remarks:	Above homeowner found that his oil tank was leaking and put a pan underneath it to catch any oil. Petro oil is on site for the repair.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	9/7/11 - Single family row house - Attached on one side - driveway on other side(from Property Shark) Owner: Winford Mitchell, 380 Lincoln Ave, Brooklyn NY 112089/7/11 - Raphael Ketani. I visited the site today to see the spill. The site consisted of a row house which was undergoing rehabilitative construction on the inside. I went to the door and met a person who said that he was in charge of the construction. I gave him my business card. I asked him who he was. He said that he was Winford. I told him that an oil spill had been reported to the DEC and asked to see the basement and the location of spill. Winford said that there was no spill and that he could not let me in. I asked him whether there was a tank on the site or there had been a tank on the site. Winford said that there wasn't a tank and that there hadn't been a tank. I asked him how the house was able to be heated. He did not say anything. I again asked to be let in to see the basement. Winford said that he could not let me in without the permission of the owner. Next, I told him to call the owner. He said that the owner would be at the site tomorrow sometime in the morning and that I could come back then. I asked him to give me the name of the owner and that person's phone number. However, he again told me to come back tomorrow. I told him that I could call an ECO and that he would get me into the house. I explained that an ECO was a state

MITCHELL HOME (Continued) **S111238455**

police officer. Winford looked nervous and tried to call someone on his cell phone. He told me that he couldn't reach the person he was trying to call. I again asked to be let into the basement. Winford again said that I should come back tomorrow, but he also asked who had called in the spill. I told him that the spill was called into the DEC by the Coast Guard who had received an anonymous call.At this point, I went back to my truck and called Steve Sangesland, Region 2 Spills Duty Desk Officer. I told him that Winford was not letting me in to see the spill. Mr. Sangesland asked who Winford was. I told him that, as far as I knew, Winford was only the foreman. I told Mr. Sangesland that I had explained to Winford why I was here and what I wanted to do. Mr. Sangesland told me to give my blackberry to Winford. I handed the blackberry to Winford and Mr. Sangesland had a discussion with him. However, he still wouldn't let me in. After this, Winford gave me back my blackberry and walked over to one side of the house. He dialed someone on his cell phone and talked to them. After this, he let me inside the basement.Once in the basement, I asked Winford where the tank used to be. He pointed to an area with dark soil. This was an area of about 7 feet long and 5 feet wide. I sensed oil odors, but they were very light. I told Winford that it was reported that 500 gals. had spilled. Winford said that it was nothing like this. I asked him how the spill had happened and where the tank was. He said that the a scrap metal contractor came to the back of the basement while it was open and took the tank. Winford stated that neither him, nor the construction crew were at the house when the tank was removed. He added that this person was not supposed to take the tank without someone supervising the removal. However, the guy took the tank anyway. I told Winford that I will send a letter to the owners of the house to let them know that the oily soil has to be removed. I added that the owners will need to hire a contractor to remove all of the soil and that the soil needed to be hauled away by someone with a Part 364 permit. I explained that the Part 364 permit allows that person to take away oil contaminated soil and that no one else can legally haul away the material. Winford said that he understood. He asked that I send the letter to him here at the house. I asked him why. He said that he was one of the owners. I asked him what his full name was. He said that it was Winford Mitchell and that his wife was Barbara Mitchell. Mr. Mitchell gave me his phone number (347) 325-5759. After this, I left the property.9/8/11 - Raphael Ketani. According to ACRIS, the property is owned by Winford and Barbara Mitchell of 380 Lincoln Avenue, Brooklyn, NY, 11208. The block and lot are 4172 and 62. The deed is dated 4/28/06. There are no other addresses for the Mitchells. I sent a CSL to the Mitchell Home at 380 Lincoln Avenue, Brooklyn, 11208.9/23/11 - Raphael Ketani. Mr. Mitchell called me today at 12:08PM. He said that the contractor, Barry & Sons, had dug out all of the contaminated soil and that the soil had been carted away. Mr. Mitchell wanted me to inspect the excavation and see that the matter had been resolved. I told him that I will make an inspection sometime today.I visited the site. The basement had a clean concrete floor. Mr. Mitchell explained that this floor is old, but in good shape. He said that the oil had spilled on the dirt which was originally covering the concrete floor. I looked at the floor and it was completely free of cracks or defects. The PID did not detect any vapors when held close to the location where the spill had taken place. There were no vapors in the basement.As the spill was on the dirt covering the floor, and as this dirt had been completely

MITCHELL HOME (Continued) **S111238455**

removed, I determined that there was no threat to the public or the environment from any vapors or product. Therefore, I closed the spill case.

Remarks: unknown how spill took place - clean up - contractor hired - unknown if clean up

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"11/15/04 File Update by Sun: On 11/15/04, Sun received a letter from David Lee of Hess Corp, indicating that on August 27, 2004 Alvin Petroleum (Alvin) was dispatched to the site in response to a liquid sensor alarm. When Alvin arrived at the site that same day they encountered a contained piping sump with approximately 30 gallons of product contained within it. Alvin removed this product and placed it back into the respectve underground storage tank. Alvin determined that the source for the product was due to a faulty remote line tie in which was subsequently repaired. Crompco corporation later tested this line which subsequently passed tightness testing. A copy of these test results is attached to the letter. Because the spill was contained within a piping sump, no release to the environment occurred. Based on the above reasons, this spill is closed.
Remarks:	Spilled into containment. Cleanup is pending.

DEC Memo:	V. Zhune on "off hours duty"Need to follow up with Michael Matri at Hess (732-750-6432)that repairs were completed.01/15/07- Zhune spoke Michael Matri from Hess. He told me. Hess sent contractors to test the product lines line. They found a small amount of gasoline in the plus piping sump. The plus line fail the test . Today they are working on it . He said that for the next 2 weeks they will be testing the line. A letter will be sent in 2 weeks.03/6/07- A letter from Michael Matri (Sr. Environmental Scientist) from Hess was received. It stated that the quantity of product was estimated to be 2 gallons. Crompco completed the removal of product from piping sump.

MERIT SERVICE STATION (Continued) **S108057988**

On February 15, 2007 Crompco returned to the station to complete the repair and retesting of the plus product line. A copy of the Crompco's work to complete the repair as well as post repair tightness testing results demonstrating that the plus product line has tested tight are attached for reference. Case Closed

Contact Phone:	(718) 257-8470
DEC Memo:	11/3/09 - Raphael Ketani. The spill took place today and consisted of 20 gals. of diesel fuel which landed on the pavement of an Access-A-Ride vehicle parking area at 2037 Eastern Parkway.I spoke to Reid Turoff of Energy Tank and Environmental Services (718) 257-8470 about the spill. He said that his crew was doing some work on a tank. They were working on the suction line and they kept pulling up dirt and debris into the pump. They decided to blow everything into a drum. However, the overfill valve still had pressure in it. So more came out than the drum could handle and the fuel spilled onto the pavement. He told me that his crew has completed the cleanup, and that they had sucked everything out of the storm drain. Mr. Turoff has contacted ABC Tank and they will come over with their vacuum truck just to make sure that everything is sucked out of the storm sewer.This is the same spill as #0908726. So I am closing this spill case and referring it back to the earlier one.

Contact Phone:	(646) 265-6108
DEC Memo:	11/3/09 - Raphael Ketani. A 55 gal. diesel fuel spill took place at the Access-A-Ride facility at Broadway and Eastern Parkway in Brooklyn. Chris Wesmont of DEP Hazmat (646) 265-6108 called in the spill and was on the scene. I talked to him about the spill.Energy Tanks and Environmental Services of 898 East 92nd Street, Brooklyn, 11236 (718) 257-8470 was doing maintenance on the tanks. There was pressure in one tank and the fuel flowed out. The fuel spilled onto the parking lot for Access-A-Ride and into a drain. Energy Tank is already containing and cleaning up the spill. They will also clean out the drain. Mr. Wesmont said that DEP will also deal with the drain.Later, another spill was called in by Energy Tank. This was spill number 0908728. The spill consisted of 20 gals. of diesel fuel which landed on the pavement of an Access-A-Ride vehicle parking area at 2037 Eastern Parkway.I spoke to Reid Turoff of Energy Tank and Environmental Services (718) 257-8470 about the spill. He said that his crew was doing some work on a tank. They were working on the suction line and they kept pulling up dirt and debris into the pump. They decided to blow everything into a drum. However, the overfill valve still had pressure in it. So more came out than the drum could handle and the fuel spilled onto the pavement. He told me that his crew has completed the cleanup, and that they had sucked everything out of the storm drain. Mr. Turoff has contacted ABC Tank and they will come over with their vacuum truck just to make sure that everything is sucked out of the storm sewer.I am closing this later spill case and keeping the earlier one open.11/04/09-Hiralkumar Patel. visited site (at 2:15 PM on 11/03/09). met Reid from Energy Tank. diesel oil spilled from dispenser pupm, onto asphalt parking lot and then ran towards back entrance along De Sales Place and then along curbside to a strom drain at the intersection of De Sales Place and Broadway. no oil noticed inside strom drain at street intersection. crew cleaned up spill on street and were working inside parking lot. found oil underneath at parked trailer in corner near by entrance along De Sales Place. found oil in two interconnected strom drains inside parking lot. Reid hired ABC tank for pump out of strom drains in parking lot as well as in street corner. found one old monitoring well nearby pump island and well area was impacted.visited site again (at 11:35 AM today). spill in parking lot has been cleaned. couple of inches of soil/broken asphalt removed from broken parking lot areas along spill path. removed contaminated asphalt from area around monitoring well near dispenser island. strom drains pumped out by ABC tank. found solid concrete in strom drains and also hard surface under broken parking lot areas. no odors noticed.based

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"PBS is overdue #2-117463Mark Turoff was hired by Consolidated Bus to delineate the contamination on the site. He says Consolidated bought the property from Caravan Transport (name on old PBS).Contaminated soil letter sent to:Steven Genovese, Consolidated Bus Company, 36 Snediker Ave. Brooklyn, NY 11207 4/6/04-Vought-Spill transferred from Rommel to Vought. Vought called Mark Turoff for status update. Delineation included three wells and sampling. Report shold arrive to DEC by 5/31/04. 5/18/04-Vought-Reviewed faxed investigation results and well proposal from Turoff. Soil analyticals show minor PAH exceedences up to: 680ppb benzo(a)anthracene(SB5 8-12'), 1700ppb benzo(a)pyrene(SB5 8-12'), 3400ppb benzo(b)fluoranthene(SB5 8-12'), 1000ppb benzo(g,h,i)perylene(SB5 8-12') and 780ppb chrysene(SB5 8-12').DEC approved well installation plan and requires: 1)detailed soil description due to PAH exceedences. Vought called Turoff and approved plan. DEC will receive report by 7/1/04.5/25/04-Vought-Boring performed to 60' and no water encountered. Tanks are currently emptied and no fuel pumps present. Only two tanks onsite are 3000-gallon diesel USTs which are currently empty. Boring performed to depth of 65' feet with no groundwater encountered. Four borings on surrounding sides of tankfield show no TAGM 4046 Required Soil Cleanup Objectives for VOCs and also show no impact to groundwater due to proximal location to tankfield. DEC will close spill upon reception of: 1)tank tightness tests and 2)65' Boring data.6/2/04-Vought-Received report from Turoff.7/7/04-Vought-Reveiwed report received on 6/2/04. "We continued our borings to a depth of sixty feet below the lowest grade on the property. The soil was completely dry. Little, if any, moisture was found in the sample at depth. The soil was heavily brownish/red clay. No sand or gravel was encountered. We screened every five feet with a MiniRae PID and got no hits. There were no odors or staining of any kind and a jar test revealed no phase separation in the soil. Headspace PID readings were negative." "That is why a pressure test was conducted". DEC requires: 1)tank tightness tests results. Vought called Turoff and left message with outstanding test requirement.7/12/04-Vought-Received message from Patricia Zonobio(DEP Comissioners office 718-595-6524). Vought returned call and left message to return call to DEC. Vought later spoke to Zonobio and reaffirmed requirement of tightness test.7/13/04-Vought-Received passing system test results from Energy Storage Systems for passing test performed on 4/9/01. DEC requirement still outstanding. Vought called Turoff and Turoff stated that current tank test was being scheduled.9/21/04-Vought-Received passing system test results. Spill closed by Vought.
Remarks: DURING SOIL BORINGS FOUND CONTAMINATED SOIL: WILL CONTINUE BORINGS AND DECIDE HOW TO HANDLE:

DEC Memo:	09/12/14-Hiralkumar Patel.10:41 AM:- spoke with Ms. Ali, who lives at 61 Glen Street. she mentioned that oil is seeping through boiler room floor in her building. she claimed this product from an historical spill in next door property at 57 Glen Street. she mentioned that spill occurred couple of years ago and at that time, neighbour had changed heating system from oil to gas. Ms. Ali stated that she baught her property about 20 years ago and is using gas heating system since then.alternate address for 57 Glen St: nonealternate address for 61 Glen St: noneno PBS or other spill record found for 57 or 61 Glen Street.Rosette Joachim57 Glen StreetBrooklyn, NY 11208Gloria Ali61 Glen StreetBrooklyn, NYDEC Mahat will inspect site.9/12/14 : A site visit is schedule for 9/16/14 @ 1:00pm for a follow up investigation of the seepage.9/16/14: Mahat Site Visit: DEC Mahat visited the site for an inspection. There was minor stain on the menchanical room and she was concern about the health and fire hazard. Stain on the mechanical room was very minor and does not trigger the alarm for health and fire hazard. There was evidence of oil and smell. No body was living on the basment and currently it is used as storage. Based on the site visit, no further investigation is required by the department. Since there is no evidence of spill, the case will be closed in the the DEC database. *** Case Close ***

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110019394430

Environmental Interest/Information System
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID: 110004354564

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SAWYER"1/5/04-Vought-Spill transferred from Vought to Austin.1/27/04 - Sawyer - Spill transferred from Austin to Sawyer.02/15/06 File indicates that Oil leak at private dwelling. Tank and line capped off. Previous DEC contact indicates; pit needs cleaning, borings needed.03/29/06 Recommended next: Contact owner, find out if work was completed.Austin - 9/30/09 - Spill project assignment transferred from Albany staff (DJEATON) to Vought, for further review and action. - end7/19/10 - Raphael Ketani. The spill took place on 2/19/02. A fuel line leaked an unknown amount of #2 oil. ACRIS lists the block and lot as 4172 and 66. On 1/5/10, the home was sold to Mohammed A. Hashem, 932 Pacific St., 1, Brklyn, NY, 11238. There are no E-docs, nor a paper file.I sent a CSL to Mr. Hashem with a 30 day deadline.11/22/10 - Raphael Ketani. As Mr. Hashem did not respond to the CSL, I sent him a standard followup letter threatening legal action if the DEC didn't receive a work plan by 12/17/10.12/20/10 - Raphael Ketani. As Mr. Hashem did not respond to the CSL, nor the followup letter, I sent him a STIP package to both the 203 McKinley Avenue, Brklyn, 11208 address and the 932 Pacific Street, Brklyn, 11238 address. I gave him until January 17, 2011 to return the signed STIP.1/19/11 - Raphael Ketani. Mr. Hashem never returned the signed STIP. Therefore, I submitted a Case Initiation Form to Randall Austin, Chief of the Spills Unit, for his signature.1/21/11 - Raphael Ketani. The Case Initiation Form was signed by Mr. Austin and submitted to the Region 2 Office of General Counsel.1/25/11 - Raphael Ketani. I checked ACRIS, and I found that the property had been sold on 11/15/10 to Mr. Karim and Ms. Begum. I sent out the STIP packages today with a deadline of February 22, 2011.2/2/11 - Raphael Ketani. Ms. Begum (347)689-8296/(917)412-6589 called me today. She didn't understand why the DEC had sent her and Mr. Karim the STIP package. She said that, as far as she knew, there was no spill. She said that they bought the home in November 2010 and they haven't even moved in yet. They received the title this month. She said that Mr. Hashem had bought the home in 2004. She asked why the DEC didn't go after him. I told her that we did send Mr. Hashem letters and a STIP agreement, and a legal case was about to be started. However, we then found out that Mr. Karim and she had bought the home. I told her the responsibility for the spill shifted to the her and Mr. Karim. So, the DEC sent the STIP to her and Mr. Karim. She stated that no one even knew there was a spill. I told her that her lawyer or someone hired by her lawyer should have found out about the spill. However, they didn't. Ms. Begum said that this was very unfair - especially since the spill happened in 2002 and the DEC didn't go after the owner at that time. I told her that this is an old case and was

FORMER POORAN SINGH HOME (Continued) **S106001226**

transfered to me fairly recently. I told her that whatever didn't happen in the past with managing the case is not the issue now. I told her that she and Mr. Karim own the home and so they own the spill. I told her that she and Mr. Karim need to sign the STIPs and send them to the DEC by February 22, 2011. She asked what would happen if they didn't sign the STIPs. I told her that our legal division would start a case against them with penalties and/or fines. I told her to call her lawyer and try to get Mr. Hashem to contribute money to help with the soil and groundwater investigation. She said that they will try. Ms. Begum asked for more time to send the signed STIP. I gave her until March 22, 2011. 2/3/11 - Raphael Ketani. Today I received green return cards which were signed by Ms. Begum and Mr. Karim. 3/23/11 - Raphael Ketani. Ms. Begum (347)689-8296/(917)412-6589 called. I spoke to Mr. Karim. He said that he had given the STIP to his lawyer. He said that he needed a little more time to talk with his lawyer and sign the STIP. I told him that the DEC will extend the deadline for submitting the STIP to April 8. He said that this was fine.4/6/11 - Raphael Ketani. I received the signed STIP with a cover letter from Mr. Karim and Ms. Begum. I attached a summarizing case history to the STIP and gave it to the legal division.4/8/11 - Raphael Ketani. Ms. Begum called me. She wanted an explanation regarding why the DEC took so long to reactivate the spill case and why the DEC wasn't going after the previous owner. I told her that it was an unfortunate circumstance that she and her husband had bought the home shortly before the case had been reactivated. I told her that I couldn't determine why the case hadn't been resolved sooner. She asked whether we could just close the case because the spill hadn't occurred when they owned the house. I told her that we couldn't do that. I added that as she and her husband are the new owners, they were now responsible for the contamination. I told her that, by law, the DEC can't simply close an old spill case without an investigation. The spill must be checked out and it must be determined whether there is a problem. Ms. Begum asked what should happen now. I told her, as a first step, that she should find a contractor to do some soil borings through the basement floor and take soil samples. Then one can see whether there is contamination and how bad it is. Ms. Begum seemed to understand.4/15/11 - Raphael Ketani. The approved STIP was signed by the Director on 4/8/11. I mailed the STIP to Mr. Karim and Ms. Begum today.4/26/11 - Raphael Ketani. I spoke to Donna Vieni of ABC Tank (718) 272-2800. She said that her company had been contacted regarding having a soil investigation performed. She added that an employee of ABC will go over to the site to see what the situation is with the fuel management system and whether the old fuel line can be found. After this, she will get back to me with an investigation plan.George Russo, attorney (718) 849-6900, called and left a message yesterday. He wanted to discuss the spill case. I tried to return his call, but could only leave a message for him to contact me.4/27/11 - Raphael Ketani. Ms. Vieni called me today. She said that one of ABC's workers went over to the site to inspect it. He found a 275 gal. AST that was disconnected, a new suction line and an intact concrete floor with no sign of a spill. I asked Ms. Vieni whether her inspector thought that the floor was new. She said that he thought it had been there for a number of years, but he couldn't tell how long. I asked Ms. Vieni whether the old suction line was found. She said that there was no sign of an old suction line. In the end of our conversation, I asked Ms. Vieni to have 3 soil samples taken along

FORMER POORAN SINGH HOME (Continued) **S106001226**

the trace of the old suction line - as best as they could determine where it originally was. Ms. Vieni said that this will be done.4/28/11 - Raphael Ketani. Mr. Russo tried to contact me yesterday after I had already left work. I tried to contact him, but could only leave a message.Mr. Russo (718) 849-6900 called me back. He asked questions about the nature of the spill, why the DEC hadn't gone after the previous owner, and what the present owners have to do next. I explained the investigation process to him and what the next step would be if contamination is found. He said that he will talk to his clients.5/9/11 - Raphael Ketani. I spoke to Ms. Vieni (718) 272-2800 regarding the case. She said that she had spoken on 4/28/11 to Mr. Karim and he told her to talk to Ms. Begum. However, nothing has happened since.Next, I tried to contact Mr. Russo, but I could only leave a message.Mr. Russo called me back. He said that his clients were still considering the matter of conducting the spill investigation. Mr. Russo sounded very angry. I told him that the DEC was trying to avoid going through the legal process in handling this matter and would just like to have the spill investigated. He said that it was unfair that the property was owned by the previous owner for 9 years and the DEC never went after him. He said that he would argue this point in court. I told Mr. Russo that it wasn't my fault, but that now that I have the spill case, the investigation must take place. He responded that he could see my point, but he added that the DEC should have notified his client that there was a problem with the property. I told him that, now, we just wanted the spill investigated. Mr. Russo, in essence, responded that it was unreasonable to expect his clients to respond to the DEC in the time frames given in the letters when the DEC took so long to respond to the spill. After this, the conversation ended.5/10/11 - Raphael Ketani. As Mr. Karim and Ms. Begum have failed to hire a contractor and submit a work plan by the CAP deadline, and as they have decided to fight the request made by the DEC to undertake an investigation, I have submitted a Case Initiation form to Randall Austin, Chief of the Spills Unit, for his signature.Mr. Austin signed the Case Initiation Form and the document package was walked up to the legal division.Rachel Ataman of HydroTech called (631) 462-5866. She said that Ms. Begum had called her regarding having an investigation done. Ms. Ataman wanted to know what happened to cause the spill and what the DEC was looking for in the way of an investigation. I told her that the fuel line had leaked above the basement floor and so oil had spilled into the furnace pit and onto the floor. I told Ms. Ataman that a line of soil borings from the furnace to the tank would probably be the best way to begin the investigation. Ms. Ataman said that she understood. 7/11/11 - Raphael Ketani. I tried to reach Ms. Ataman (631) 462-5866/(631) 457-0032 regarding progress at the site, but I could only leave a message.7/12/11 - Raphael Ketani. I spoke to Ms. Ataman today. I asked her whether Ms. Begum and Mr. Karim had retained Hydrotech for doing the investigation work. She said that they hadn't.5/2/13 - Raphael Ketani. I checked the ACRIS property database today. According to the database, Karim Razaul is the owner of the property and bought it on 1/4/11. His address is 203 McKinley Avenue, Brooklyn (4172/66; alternate address 388 Lincoln Avenue). However, Ms. Begum had told me that she and Mr. Karim had bought the property during November 2010. There has been no contact with either Mr. Razaul, Mr. Karim or Ms. Begum.8/29/13 - Raphael Ketani. As of today, I have not been contacted by Mr. Karim, Ms. Begum or their lawyer.So, I sent a certified letter with a green return card to Mr.

FORMER POORAN SINGH HOME (Continued) **S106001226**

Karim and Ms. Begum in which I stated that they had signed the Stipulation Agreement on March 27, 2011 and that it became effective on April 8, 2011 (I enclosed a copy). At the present time, they were in violation of Article 12 of the Navigation Law, Section 173 - Causing a Spill, and Section 176 - Failure to Clean Up a Spill. I added that if they did not have the remediation work performed and did not submit the report by September 20, 2013, then the DEC would take legal action. I indicated that this was their last chance to avoid legal action.9/12/13 - Raphael Ketani. Today I received the green return card with the signature of Mr. Karim, but no signing date.9/17/13 - Raphael Ketani. Today Mr. Russo (718) 849-6900, the attorney for Ms. Begum, called and stated that his client was not responsible for the oil spill. He said that he was involved in the case because Ms. Begum approached him with the DEC 8/29/13 letter and because he did the closing on the purchase of their home in 2010. Mr. Russo stated that the spill happened a long time ago when someone else owned the property. So his client shouldn't be held liable. I told Mr. Russo that when one buys a property, you also buy the spill. Mr. Russo stated that there was nothing in the title report from the DEC regarding the spill. I told him that the DEC doesn't put spill reports in the title report - this was not something the Department does. Mr. Russo said that he owns a title company and property condition searches are never done for residential properties. I told him that every prospective homeowner should have someone do an investigation for any oil spills, or other conditions, at a residential property. Otherwise, they don't know what they are buying. Mr. Russo asked how the prospective home buyer is supposed to know that there is or was a spill on the property? I told him that they can always go to the public Spills database, since about a few years ago. Also, even before this, one could always do a FOIL request about a property. Mr. Russo said that DEC not notifying the public is a serious issue. I told him that it was up to the prospective home buyer to do due diligence. Mr. Russo said that he didn't agree with the Department's policy. He added that his client doesn't have the money to do the investigation and remediation - they are barely making the mortgage payments. He said that the burden was on the Department. I told Mr. Russo that the State can always do the investigation and remediation with its own contractor, but, once the work is finished, the State will send the bills to the Office of the Attorney General who will sue your client in order to recoup the money spent. Mr. Russo asked whether DEC can work out a deal whereby they only do the investigation and then, maybe, his client pays for the remediation. I told Mr. Russo that this is a legal case and that he should really talk to the DEC attorney in charge, John Urda. I added that I was only talking to him in order to see what the situation was with his client - whether he was willing to do the work. Mr. Russo said that he will call Mr. Urda.9/19/13 - Raphael Ketani. I contacted Mr. Russo (718) 849-6900 today and explained that I wanted to make a site visit to the home in order to see whether there were still any indications of a spill. Mr. Russo gave me Mr. Begum's number (917) 361-6919. I told Mr. Russo that I thought the property was owned by Mr. Karim and Ms. Begam. He said that the property is owned by two men, Mr. Karim and Mr. Begum. However, he didn't know how they were related.I called Mr. Begam and told him that I would like to inspect the home for any signs of an oil spill. I asked that we meet on tuesday, 9/24/13. Mr. Begum said that he first needed to call someone and then he will get back to me. I told

FORMER POORAN SINGH HOME (Continued) **S106001226**

him that would be fine.9/23/13 - Raphael Ketani. Ms. Begum called me today. We set up a site visit appointment for tomorrow at 11:30AM.9/24/13 - Raphael Ketani. I met Mr. Karim and Ms. Begam as planned. They showed me the former location of the AST. The floor looked like it had been replaced with new concrete. There were no stains and no odors. The PID meter did not register the presence of any VOCs. Mr. Karim said that ABC Tank had been to the site and had taken away the old AST and had cut the fuel line, leaving only a short section. He added that they were now using gas to heat the house. Mr. Karim also showed me where the line from the AST to the furnace had laid. There were no stains along this path. As there was nothing to see and no odors, I considered my inspection to be complete and I left.Based upon the information in the case file, the lack of signs of an oil spill and the lack of oil vapors in the home, I determined that any residual contamination, if present, was not a threat to the Karim family or the environment. Therefore, I closed the spill case effective today.

Remarks: oil line leak - tank & line capped off - they will repair after its all cleaned up

DEC Memo:	11/04/13- Michael Matri from Hess Corporation sent the spill investigation summmary report dated November 01, 2013.The report indicate that on July 1, 2013, Crompco, LLC (Crompco) of plymuth meeting, PA was on-site to perform testing as part of compliance activities. It was determined during the testing that the premium tank failed a tightness test. investigation into the failure identified a leaking stick port riser located within a containment sump. The riser was repaired and no product was released to the environment.11/4/13- As per Michael 's email dated 11/4/13. July 1, 2013 Crompco test results demonstrating the initial test failure of the Premium tank . This test resulted in Spill 1303477 and turned out to be a leaking stick port riser that was located within the STP sump (contained). July 5, 2013 Crompco test results demonstrating the Premium tank as being tight.Test results in eDocs. Spill Closed.
Remarks:	Tank test Failure indicates leak in vapor piping. Will be investigated and repaired on 7/2/13.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"10/4/02 TJDSite inspected 10/3. Location is a former gas station now operated as a truck repair garage. Current business on site isA & N Brake and Clutch (owner:Alon Yemini 718-443-2323) which has been operating on site for one month. Several minor petroleum

AMERICAN TRUCK REPAIRS (Continued) **U001841386**

spills were noted both inside and ouside of building, owner immediately dispatched employees to clean up spills on concrete/aphalt using absorbents. Clean-up completed while inpection was conducted.Buried waste oil tank of unknown capacity was identified on site, owner was unable to produce a PBS registation for this tank and was directed to empty tank and obtain registration from DEC.Database search revealed a total of (8) gasoline UST's exist on site an are of unknown status. PBS records (2-600300) indicate registration expired 8/29/96. Last tank tests were performed in 1990 on these tanks. Surface spill closed. Out of compliance tanks referred to PBS for follow-up. FAX 443-2422.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"Con ed e2mis notes:15 gallons of oil that he visually sees leaking from the top of the transf (on fdr 5B25) on 200 gallons of water. He found oil while he was going to make repairs on transf. He took a sample from source of transf. Will start cleanup as 50-499ppm due to the amount of oil. HIstorical record of pcb of transf is 10 ppm. Transf was installe din 1976 and it has a record of pcb (10 ppm). DEP Stanley Baldwin on location. 1255 hrs. Feeder will not be off the system until weds when load is lower to allow access, providing pcb is <50 ppm, envir mgr. Ron James showed him vault was full of sludge and dirt, therefore very little likelyhood if there is a drain for liquids to get in. He agreed and left location at 1415 hrs. Jane O'Connell N.Y.S. D.E.C. on loc. She requests a copy of the lab report faxed to her upon receipt. Sucked up all visible oil in structure. Put oil absorbant down to contain any future puddeling. This structure has 3 1/2 feet of dirt in it. Lab results returned <1ppm. Transformer drained (265 gals. of oil) sump found cemented and network side of structure cleaned 100% with slix. Tag remains pending removal of transformer. <1.0ppm cleanup complete and tag removed. Incident is closed.
Remarks:	TRANSFORMER IS LEAKING ONTO 200 GALS OF WATER,CONTAINED IN MANHOLE. LABS WERE TAKEN FOR PPM CONTENT. CON ED 126-822

Classification: Not a generator, verified

Date form received by agency: 03/30/1995
Site name: MATHEW LAMP SHADE CORP
Classification: Unverified

Date form received by agency: 09/02/1988
Site name: MATHEW LAMP SHADE CORP
Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: NONE
Waste name: None

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

MTA NYCT - CLEVELAND ST STA - JMZ LINE (Continued) **1007990573**

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

spill in field. DEC Ketani called FDNY and left message to return call to DEC.02/27/06-Hiralkumar Patel. visited site on 02/26/07. met Ferdrnand Torres (917-568-3022), tenant at building. Mr. Torres lives on second floor. as per Mr. Torres, there was no heat yesterday (02/26/07) morning and he compalined to NYC HPD. oil delivered during day. lateron tenant found oil in basement and called FDNY. site has two 275 gal #2 oil ASTs on leg and FDNY found one of these tanks was leaking. they pumped out oil from leaking tank and put in drums and spread absorbent in basement. three 55 gal drums were out of building on sidewalk. second tank is still in use.as per Mr. Torres there is no super in building but Mr. Torres has keys to basement. at time of visit, heavy odors inside basement, free product around tank and odors upstairs also. Mr. Torres's mother and brother living on first floor. suggest Mr. Torres to get these people on second floor as there was no odors. this building ownes by NY City. Mr. Torres gave contact info for person managing property for city.Francis SynMoie7A Admin. Bld #042C/O NY Residential Works Inc.347 Lenox AvenueNew York, NY 10027Ph. (212) 987-8088 Ext. 105left message for emergency service at NY Residential Works at night. received call from Basil Marshall (646-294-0086). asked him to get cleanup crew to start cleanup for free product and odors in building. he spoke with Anthony Lara (646-772-7180). received call from Anthony. he was ready to send cleanup crew in night but he need approval from city and proposal signed by authorized person, which he hadn't got. tried to contact Mr. Marshall again regarding signing paperwork, but no contact was made. left message for Mr. Marshall.left message for Mr. SynMoie at NY Residential works last night.spoke with Mr. SynMoie this morning. they are still working on getting authorization from city agency for cleanup. asked Mr. SynMoie to start cleanup by end of today.2/27/07 - Raphael Ketani. I contacted Mr. Francis Synmoie (sin-moy) at NY Residential Works, Inc. (212) 987-8088, ext 101. He said that he is still waiting for authorization to hire a contractor to do the cleanup, but someone already put down absorbent. He said that he contacted Debra Thomas of Unit 7A at HPD (212) 863-7392. He said she has the authority to authorize someone to cleanup the spill. I asked him how the odors are. He said that you notice a moderate odor of oil as you walk into the building, but no one lives on the first floor. I asked him about the odors on the second floor. He said there were none. He said that this building was owned by a private party, but they didn't keep it up. So the city took it over and they will refurbish it.I spoke to Ms. Thomas. She said the City doesn't own the building, but is managing it. I asked her what is happening now. She said that a call was made to the Emergency Repair Unit as there is no money in the budget to pay for the cleanup. She said she is waiting for a call back. I told her that this spill is now at least 24 hours old. She said she knows, but all she can do right now is to call the Emergency Repair people. I told her that certain things will have to be done to cleanup the spill. She asked me to e-mail her what these requirements are. The requirements are:(1) cleanup all of the free oil(2) pickup all of the spent absorbent(3) powerwash the affected areas and the concrete floor(4) take soil samples below the concrete floor and send them to a NYSDOH certified lab for 8260 and 8270 analysis(5) remove all contaminated soil(6) submit manifests for all soil and contaminated material that is removed and the soil analytical results(7) repair the tank system and send copies of the documentation verifying that the repairs were made(8) submit to DEC a short report with pictures (if possible) of the before and after

TORES HOME (Continued) **S108466382**

conditions and all documentationMs. Thomas' e-mail address is thomasd@hpd.nyc.gov3/12/07 - Raphael Ketani. Spill case #0613303 came in today regarding a new spill at the site. I spoke to Patrick Fahey of Pacific Energy (718) 647-1400 about the spill. He said that it was a loose flare nut that allowed oil to drip onto the floor. About 1 gal. leaked out. The flare nut was tightened, but the earlier large spill hasn't been cleaned up yet. This later spill case was closed.I spoke to Ms. Thomas regarding the old big spill of 2 weeks ago. She said she just got back from vacation and had been told the old spill had been cleaned up. I told her that Pacific Energy had a mechanic on site about 1 hour ago and he said the old spill was not removed. She told me that she will look into the issue and call me back.3/23/07 - Raphael Ketani. I tried to make a site visit. The front door was locked and there was no one around to let me in. I didn't see or smell any signs of an oil release. 3/27/07 - Raphael Ketani. I made a site visit at 9:45AM today and was shown the basement by a second floor resident of the building who goes by the name of Rio and serves as a helper for Mr. Synmoie. The vapors were light but noticeable in the first floor hallway. The vapor readings were: basement 1334 ppb, first floor 903 ppb, second floor 782 ppb, third floor 751 ppb. Rio explained to me that the tanks are still not sitting solidly on the floor and that there were 2 big spills - both due to the tanks moving and a line below them getting loose. There was a 12" by 6" wet spot below the oil line that connects the two tanks at the bottom. Rio showed me that one spill flowed 30 feet down the basement hallway and into the adjacent room. The floor was in very bad shape and was in pieces, many of which could be moved by hand exposing the soil below. The floor had dark staining all over and so did the floor of the adjacent room. Lastly, Rio showed me the boiler room. The floor there also had staining. 3/28/07 - Raphael Ketani. I spoke to Mr. Synmoie and told him about the floor, the high vapor readings, the oily wet spot, the oil staining, and the probability that the soil under the basement floor is contaminated. I told him that he has to hire a company to stabilize the tanks, fix the line at the bottom if it is still dripping, do a soil investigation and ventilate the building. He said he will do this. He said there is one tenant on the first floor and she will be moved to the second floor. He said that the building is scheduled for rehabilitation in the very near future. I told him that the soil investigation has to get started as soon as possible. He said he will call Ms. Thomas. I sent Ms. Thomas an e-mail with my notes from 3/27 and 3/28. 3/29/07 - Raphael Ketani. Chacko Thomas (cell (646) 865-4564) [supervisor (718) 857-5444] of NYC HPD called to say that 6 soil samples were taken in the floor of the building after the last oil spill. He said samples were taken in the tank room, the hallway, and the storage rooms. The analytical results should be available soon. He asked what else needed to be done at the site. I told him that the vapors are high so ventilation needs to be provided, the tanks need to be fixed to the floor so they don't move, the line at the bottom of the tanks needs to be fixed so it doesn't drip, and a soil boring needs to be taken in the boiler room floor. Mr. Chafeko said he will have this done.4/4/07 - Raphael Ketani. Mr. Thomas of NYC HPD sent me a FAX for SVOC analysis for 4 of the 5 samples that were taken in the basement. He said he was expecting the VOC analysis today and will FAX them as soon as he gets them. There were only 2 very low exceedences of the TAGM RSCO limits. I told him these results looked fine. I received a FAX from Mr. Thomas with the VOC analyticals for soil samples 1,2,4,5. The samples

TORES HOME (Continued) **S108466382**

were taken on 3/22/07. There were no RSCO exceedences, except 3200 ppb for total xylenes for soil sample #1. This is the tank room sample. Again, soil sample #3 was missing from the results.4/5/07 - Raphael Ketani. I contacted Mr. Thomas and told him that the results seemed fine, except for total xylene in sample #1. I told him that soil will have to be removed in this area. Afterwards, Mr. Thomas called me up regarding which sample came from what location in the basement. Sample #1 was the tank room. Sample #2 was the storage room next to the tank room. Samples #3 (which he will check on why the results weren't received) to sample #5 were from the hallway. He said that the drip from the pipe at the bottom of the tanks is something new and will be taken care of shortly and that the tank feet were covered in cement to stabilize the tanks. Mr. Thomas said that the stain in the boiler room is only from routine servicing of the boiler. I told him that it seemed like more than routine servicing. He said the service techinician is sloppy and he will talk to him about being careful. However, he said, the building is privately owned and HPD is just overseeing the refurbishing of the building.4/11/07 - Raphael Ketani. Mr. Thomas FAXed me the analytical results for samples 1,2,4,5. I spoke with him shortly after I received the FAX. He said that the contractor who did the sampling also took samples 3 and 6. However, the contractor threw out these samples as he felt he had enough samples for the site, according to Mr. Thomas. I told Mr. Thomas that either the soil has to be dug out in the tank room or soil treatment needs to be used. He said that he has to make a work order, in either case. I asked him to try and push the process forward. He said he would try.5/18/07 - Raphael Ketani. Mr. Thomas of HPD (718) 857-5444 sent me a FAX with analytical results for 3 soil samples that were taken in the tank room after the contaminated soil was removed. All 3 sets of results were non-detect. I called up Mr. Thomas and asked him to send the manifests for the removed soil. He said he will send them. Mr. Thomas added that the 2 tanks have been emptied and will replaced with one tank. So that will take care of the leaking pipe.7/13/07 - Raphael Ketani. I tried to contact Mr. Thomas regarding the documentation for the cleanup work and the tank replacement work, but could only leave a message. (Mr. Thomas is the person to contact regarding the project, NOT Mr. Synmoie or Ms. Thomas.) 7/16/07 - Raphael Ketani. I spoke to Mr. Thomas and he told me the two tanks were replaced with 2 new 275 gallon tanks. He added that the contaminated soil at boring location #1 was taken away and that I should be receiving the manifest soon.9/17/07 - Raphael Ketani. I received the Oil Spill Site Assessment Report from Mr. Thomas. The report states that the floors of the basement, the tank room, and the boiler room were power washed and soil samples were taken. The report also states that the leaking tanks were emptied (a waste ticket is included), removed, and replaced with new tanks. On 5/11/07, soil from the tank room was excavated and removed.Based upon the above mentioned Oil Spill Site Assessment Report and the analytical results for the tank room soil that were FAXed on 5/18/07, I am closing the spill case.

DEC Memo:	10 days ago line under the oil tank broke. Tank was loose and when the tank is filled, the tank moves. Oil gushed onto the basement floor. FD Haz Mat cleaned the spill. Line broke again. 6 family building - Oil Company on site now - Pacific Energy 718-647-14003/12/07 - Raphael Ketani. I spoke to Patrick Fahey, manager at Pacific Energy. He said his mechanic was on site now. He said that a flare nut connecting two pipes came loose a little and dripped oil onto the floor. He said that about 1 gal. dripped out. The flare nut has been tightened and this problem is solved. He said that a big spill happened weeks ago (#0612788)and was caused by a rotten equalizer (pipe connecting the 2 tanks). He said this pipe was

TORES HOME (Continued) **S108466382**

repaired back then. Mr. Fahey said that the tanks are full and are holding the oil. As there is an earlier open spill case, I am closing this later case.

Remarks: BOILER MALFUNCTION:

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIPPLE"3/12/2004 Sangesland spoke with PTC. They have someone at the site now working on the spill.275 gal leaking tank in a basement.Puddle approx 30' x 8' and 1 or 2 inches deep.3/15/2004 Sangesland called PTC. They need to send a crew back to the site to finish the cleanup.06/07/06: Called responsible party (Balter Lehigh Plumbing and heating Company)regarding spill Glenda was on phone she told that she will find out and she will send the information regarding spill. Also faxed to Ms. Glenda request to send information regarding spill. -QA11/06/06: Called Glenda at (718)293-9696 nd talked to Ms.Tam regarding information of the spill she told that she will convey my message to Glenda and she will call me back. -QA 01/17/07: Called Glenda (Balter Lehigh Plumbing & Heating) and talked to her regarding spill She said Eastmond Company did clean up work for this spill. -QA02/14/07: Called Issac Mungra at (646)879-6703 (C) regarding spill informations and left message to call me back. -QA03/12/07: Called Issac Mungra (Eastmond Company) regarding information of spill and left message to call me back. -QA09/26/07: Called Issac Mungra to discuss regarding removal of tank. He said he will find out information about the spill and he will call me back. -QA09/28/07: Called Mr. Issac Mungra at (646)879-6703 to get the documents regarding removal of the tank. He was not there left message to call me back. -QA6/25/08: Reassigned from Vadim Brevdo to Kartik Chanda. (Chanda)7/28/08: Chanda reviewed the spill related documents regarding this site. Chanda sent a letter to the property owner (NRG Development Group Inc.) requiring that a report be submitted to DEC by 9/15/08 for review. The report should contain at a minimum:1. An explanation of the cause of the tank system failure;2. Either a description of the work performed to restore the integrity of the tank system (including retesting results), or a description of the work performed to close (decommission) the tank;3. Information regarding petroleum contamination found at the site and cleanup activities (if any) associated with a release from this tank system;4. Any available documentation (i.e., invoices, bills, sampling analysis reports, etc.) pertaining to the work performed at this site associated with this violation. May 13, 2013 - V. BrevdoThe underlying reason for reporting this spill case to Spills Hot Line was a puddle of No. 2 oil of approximately 30' by 8' and 1 or 2 inches deep in the basement of private residential house. Oil allegedly leaked from 285 gallon heating oil tank in the basement of the house.The Department evaluation of this 10 year old spills is as follows:1) Although spill did occur in the basement of the private house, no analytical data or other documented information exists in the Department's file which would confirm impacts to soil or groundwater from the spill event. 2) Plumbing company - Balter Lehigh Plumbing and Heating Oil Company - confirmed on January 17, 2007 that Eastmond Company did cleanup work for this spill.3) Given that there is no confirmed impact to groundwater or the environment, and no complaints of petroleum odor ever came from the residents of the house or neighbors, further environmental investigation of this case appears to be unwarranted.Based on the aforementioned evaluation of this spill case the Department decided it is appropriate to close this spill case. Spill case is closed effective May 13, 2013.V. Brevdo
Not reported

383 CRESCENT ST (Continued) **S106385588**

Remarks: a leaky tank spilled out an unknown amount of #2 oil. the spill hasnt been cleaned up yet.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ACTIVE MOTOR SALES CORP (Continued) **1000265125**

Owner/Operator Type: Owner
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2006

Classification: Not a generator, verified

Date form received by agency: 07/08/1999
Site name: ACTIVE MOTOR SALES CORP
Classification: Not a generator, verified

Date form received by agency: 08/31/1988
Site name: ACTIVE MOTOR SALES CORP
Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
