DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"12/20/00Reassinged from Saccacio.Daniel Sully called, the attorney fro APRE Fuel Oil Co. Mr. Sully was upset by Saccacio's letter requiring additional work within 45 days. Sully will submit to DEC the following information:1 - Whether APRA delivered oil on or about the spill date2 - The name of the other oil company that APRA is claiming may have delivered the oil3 - Who performed/contracted the original mop-up4 - The results of the pressure test paid for by APRA5 - Photos taken by Mr. Sully days after the spill1/11/00Attempted to return Mr. Sukal's call, no answer, no voice mail.1/17/00 Called Adrien Sukal at work.2/09/01Referred to legal.Administrative Order on Consent signed by APRAFrom: Jennifer Rommel [mailto:jmrommel@gw.dec.state.ny.us]Sent: Thursday, September 25, 2003 3:22 PMTo: 'Dave Rubinton (dsrubinton@gw.dec.state.ny.us)'; charlies@pwgrosser.comSubject: Re: APRA Fuel Co. - 90 McKinley Ave.Franklyn Sukal just called. He can be reached at XX.>>> Charles Sosik <charlies@pwgrosser.com> 09/25/03 04:03PM >>>Jennifer,I spoke with Mr. Sukal. He said that he has been sick for some time and is still recovering. When I mentioned sealing the floor around the tank he said that he was not ready and probably would not be ready this year. He said he would call me when he was.>>> Jennifer Rommel 09/26/03 10:21AM >>>Charlie,I discussed with Dave Rubinton.The AOC will be extended for another year to allow Mr. Sukal to recover.Call with questions.Jennifer718-482-493401/26/04Transferred from Rommel to Austin02/17/04: Reassigned from AUSTIN to KRIMGOLD.7/14/05 TASTried calling Mr. Sukal, woman who did not speak english answered and did not provide any help. Contacted APRA's consultant (P.W. Grosser), he stated the samples did not show a problem and the only work to do was to seal the floor around the tank. Mr. Sukal has not contacted anyone to seal the floor. Will try calling at another time.9/26/05 TASSent letter requesting information. Letter was not deliverable.11/3/05 TASSince I have been unable to contact the property owner and the September 23, 2003 letter from P.W. Grosser to Jennifer Rommel states that the work still required was minor (and there was no contact from the site owner to complete the work) the spill has been closed.
Remarks:	caller has oil in basement after service call

Spiller Company:	999
Contact Name:	HAROON ASLAN
Contact Phone:	(646) 252-5777
DEC Memo:	5/7/09 - Raphael Ketani. I spoke to Mr. Aslan (646) 252-3607 regarding the potential 4000 gal. diesel spill. He said that the MTA doesn't believe it's a spill, but a metering problem. He said that the inventory is checked every 10 days. For April, the inventory showed a discrepancy of 4000 gals. They have had ongoing issues with the meters and the calculations. One meter always reads less. They will change the meters on lines 1 and 3. They had similar experiences with the meters last year. Mr. Aslan said that he will send DEC an update.06/15/09-Hiralkumar Patel. 11:50 AM:- received call from Haroon Aslam from MTA. he mentioned that they changed meter and found everything working ok. asked him to send inventory record before and after meter changed.12:46 PM:- received email from Mr. Aslam with inventory record for month of Apr and May 2009.based on submitted document, case closed.
Remarks:	CALLER STATES THAT THERE IS AN INVENTORY DISCREPANCY REGARDING 4000 GALLONS OF DIESEL. UNK IF THERE IS A SPILL.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003

NYCT-40 CONWAY STREET (Continued) **1001119495**

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Sangesland spoke to Matt Dominick at DEP. He will investigate and follow up with a report.08/08/08 Rec'd a letter from DEP that indicates DEP's intention to close the 2000 gallon UST in place.Site assessment report will be sent to DEC after tank closure.(sr)01/15/09 Rec'd analytical data for the sample taken from tank excavation, results show no voc present in the soil,some elevated level of SVOCs those can be attributed to fill material.Backfilling has been approved. Closure report will be sent to DEC.(sr)03/19/09 Rec'd closure report,see edocs.Residual contamination within acceptable

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	11/19/14-Vought-Duty desk officer. Called EBC Sosik (Ph:631-504-6000 email:csosik@ebcincny.com) for more information. Vought called and spoke to Charlie and they performed Phase II for property transfer (one property is auto repair and one property is tire place and same owner for both and contamination was found on tire place which is 110 Jamaica and Auto Repair is 108 Jamaica. They installed four borings on both properties and noted contamination at 12-13'bg (gasoline type as per Sosik). They peformed additional delineation and found reduced concentrations from 18-20'bg. No known tanks on-site. They also have a Phase I Report. Sosik not sure of furture use of property and site is zoned residential so it may be redeveloped. Sosik does not have property owners address but does have owners name as Ilya Mikghilov and Sosik notifiy Mikghilov of the spill.12/5/14-Vought-As an effort

SOIL CONTAMINATION (Continued) **S117393127**

to complete Desk Duty obligations, Vought called and spoke to Sosik who also noted that no groundwater samples collected to date and that he will send reports to DEC Piper as well as send Vought property owners information for contaminated soil letter.1/5/14-Vought-No info on property owner received from EBC Sosik and Vought returned call and spoke to him and he had not sent Phase II to DEC Piper as of yet and did not that owner and seller were still considering property transaction but that negotiations were ongoing due to the presence of soil contamination. Vought was later copied on email from EBC Sosik to DEC Piper with an attached Phase II and as such no initial requirement letter sent by Vought.

Remarks: Caller advised received results back from testing and showed gasoline in teh soil. Clean up is pending.

(631) 774-6682email: beijustin@optonline.netabstract of Phase II:- on 01/30/14, five soil borings (B-1 through B-5) were installed- soil was screened continuously to a depth of 25 ft bg- fine sand was found in all borings- boring B-1 was installed to the west of the southern pump island grouping. PID readings and petroleum related odors were observed from 10-25 ft, but the highest PID reading (9,999 ppm max) was recorded from 15-17.5 ft- boring B-2 was installed just west of the northern pump island grouping. highest PID reading (800 ppm) was detected from 12.5-15 ft- boring B-3 was installed just north of the existing tank mat along Highland Blvd. only minor PID readings (25 ppm) were observed- boring B-4 was installed on the east side of the existing tank mat. no issues found- boring B-5 was installed just south of the existing tank mat and was found to have the highest VOC concentrations of the five samples collected. highest PID reading (9,999 ppm max) was detected rom 15-17.5 ft bg. PID readings beyond this depth slightly decreased, but were still very significant to approx. 25 ft bg- groundwater samples were unable to be obtained due to the depth of groundwater table. three separate attempts to reach groundwater failed as no indications of water were observed to a depth of 65 ft bg. multiple refusals and equipment failure prevented from continuing deeper beyond 65 ft bg.soil analyticals:

BrevdoCurrent Project Status:Sunoco Service Station, 32 Highland Blvd., (a.k.a. 1731 Bushwick Ave.), Brooklyn. (Spill Case No. 1400791)The site is located on a triangular shaped property bordered by Highland Blvd. to the North, Bushwick Avenue to the South, Gillon Place to the West, and Fanchon Place to the East.

SUNOCO STATION (Continued) **S116554755**

The site is approximately 0.31 acres of land. The surrounding property consists of a cemetery to the North, the MTA East New York maintenance yard to the West and Southwest, commercial and industrial properties to the South, and residential properties to the East. There is one story structure with a garage underneath. The USTs consist of four (4) 4,000 gallon double-wall fiberglass tanks for the storage of gasoline. Potential buyer of the property conducted Phase 2 site investigation as part of property transfer. Site investigation revealed trace amounts of petroleum in the soil, and site owner reported contamination to the Department's Spill Hotline. The spill case was opened on April 23, 2014. Sunoco, Inc. has the lease on the property and accepted responsibility for the contamination on the site. Clean Globe Environmental LLC (CGE), an environmental engineering consultant for Sunoco, Inc. (Sunoco) has conducted an Environmental Site Assessment, completing the field work on November 5, 2014. Sunoco and CGE submitted the Environmental Site Assessment report dated November 13, 2014 to the Department on December 31, 2014. The purpose of site assessment/investigation was to collect subsurface soil and groundwater data to document the existing conditions of the site related to the current use of the property as a retail gasoline station. Seven groundwater monitoring wells were installed at the site. The depth to groundwater at the site is 84 feet. No petroleum free product was detected on the water table. Several soil samples collected from the borings exceeded CP-51 recommended cleanup guidance values for VOCs. None of the samples exceeded CP-51 SVOC values. Groundwater data showed low level impact of Ethylbenzene and Xylenes in two out of seven monitoring wells. The Department completed review of the Environmental Site Assessment Report on January 16, 2015 and requested Sunoco and CGE to make recommendations and propose an appropriate course of action to address contamination on the site, complete site investigation and cleanup (if warranted), and accomplish closure of this spill case in an expedient manner. The deadline the Department gave to Sunoco and CGE to make recommendations and propose course of action is February 17, 2015. VB

Remarks: Caller advised results from a phase 2 came back and showed trace amounts of petroleum in the soil. Caller advised is possibly from a historical spill. Clean up is pending.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D006
Waste name: CADMIUM

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Violation Status: No violations found

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIBBE"5/12/04 - AUSTIN - TRANSFERRED FROM HALE TO TIBBE - END10/07/04: As per NYCT's e-mail dated 10/05/04, 500-600 cubic yards of petroleum contaminated soil was removed and transported to an asphalt plant but there is no further information.07-14-05: The best information that NYCT can ascertain is that this "parking lot" was

PARKING LOT -NYCT (Continued) **S103571449**

being cleaned up to be surfaced with concrete. Years of cars parking there and dripping auto fluids cause quite of bit of surface staining. This soil was removed as park of the overall project and a spill number was needed to ship the material to the asphalt plant. Records do not indicate any PBS or CBS for this lot.

Remarks: caller stated that site testing on parking lot shows contamination of motor vehicle leaks over a period of time.

DEC Memo:	12/26/2013 - Feng - Called Distinct Engineering Solution (646-863-6161, left a message to Sherien Thampi (x603) to call back.1/2/2014 - Feng - Mr. Thampi returned the call. It is an abandoned apartment building and a future EDC/DEP development project. They were doing permeability test. Nothing was picked up in the GPR survey on 12/16/2013. They checked the Sanbon maps from 1888 to present, no tank record. They installed one soil boring to 7 feet and identified sheen in the cutting. The PID read 3 ppm. The soil boring was installed down to 10 feet and stop the work due to the mud rotary rig was losing water. Mr. Thampi mentioed that he talked to

SIDEWALK (Continued) **S116155731**

the owner of the next door property at 58 Somers Street, and the owner said a tank in 58 Somers Street has been removed some years ago due to leaking problem and found contamination. Mr. Thampi suspected the contamination in the 56 Somers Street was originated from other source.Contact information for Mr. Thampi's client:Ms. Jinine Beni WitkoArupu 77 Water StreetNew York, NY(212)897-1535Sent Contaminated Soil Letter to Ms. Witko and cc Sherien Thampi of Distinct Engineering. Assigned to the Runner of the day K. Patel.01/03/14-Hiralkumar Patel.alternate address for 56 Somers St: noneno PBS or other spills found.56 Somer St. LLC. **property owner**600 Lexington AveNew York, NY 10022or 228 East 45th Street, Suite 1801New York, NY 1001711:15 AM:- left message for Ms. Witko.Janine Beni WitkoArup77 Water StreetNew York, NY 10005PH. (212) 896-3000 (212) 897-1535 (646) 385-2155 (C)email: Janine.witko@arup.com11:23 AM:- left message for Mr. Thampi.Sherien (Jerry) ThampiDistinct Engineering Solutions, Inc. P.C.PH. (646) 863-6161 Ext. 603 (201) 284-0784 (C)email: sthampi@distinct-esi.com11:55 AM:- received call from Ms. Witko. her company is working for NYC EDC for green infrastructure project called Right of Way Bioswales. this project is part of NYCDEP's efforts to reduce the amount of stormwater entering the combined sewer system. prject includes excavation of about 3 ft wide and 10 ft long area along the sidewalk, down to about 10-15 ft bg and then backfill it with porous material and soil which would allow absorbtion of rain water in subsurface.priro to installation of Bioswales, contractor was doing preliminary testing including soil permeability test. a boring was installed on sidewalk, in front of 56 Somers St. Ms. Witko mentioned that drilling company noted sheen on water and stopped further drilling. there is no sample collected for analysis. Ms. Witko will talk to EDC who may choose not to install Bioswale in this area. she will call back after discussing with EDC. asked Ms. Witko to disregard letter sent yesterday.12:27 PM:- spoke with Mr. Thampi. he mentioned that a 4 inch diameter casing was pushed in to 10 ft depth and was filled with water for permeability test. after filling hole with water, crew noted sheen on water. they measured 3 ppm on PID at surface. Mr. Thampi mentioned that no sigs of current/former fill port were noted in area. also there was no petroleum odors noted during field work.discussed with DEC Vought. based on available information, further investigation/remediation will be required only if EDC choose to install Bioswale in the area, otherwise case will be closed.01/06/14-Hiralkumar Patel.10:58 AM:- received email from Ms. Witko including letter from Distinct Engineering Soluntions.Mr. Thampi mentinoed that while advancing boring to 10 ft bg, drilling inspector noticed the presence of oil sheen and traces of sludge in the drill cutting at approx. 8 ft with slight petroleum odor. boring was terminated at 10 ft to avoid further migration of contamination. no presence of fill port or vent pipes were noticed on the sidewalk or near the building. boring was backfilled with sand and patched with cement.01/08/14-Hiralkumar Patel.3:42 PM:- left message for Ms. Witko.4:53 PM:- received message from Ms. Witko. she discussed with NYC DEP and NYC EDC and they decided not to install Bioswale in area in front of 56 Somers St.01/10/14-Hiralkumar Patel. as discussed previously with DEC Vought, case closed as Bioswale will not be install in the area, no record available regarding presence of current/historical fuel pipe in area and absence of soil or groundwater sample results.11:11 AM:- sent email to Ms. Witko. informed her that based on available

SIDEWALK (Continued) **S116155731**

information, no further investigation is required and case is closed.
email copied to Mr. Thampi.
Remarks: Possibly was an abandoned tank at one time. Sheen from borings.

DEC Memo:	06/25/09-Zhune spoke to Lt. Reegan and he said a top cut off 275 gallons tank were left in the alley at 31 Montauk Ave. between Liberty Ave and Atlantic Ave. The fire Department sucked out 60 gallons of water and oil into a 85 gallons and 55 gallons drums. 06/28/09-Zhune visited the site. Drums and half of 275 gallons tank are in the alley of 35 Montauk Ave. Spoke to Melvin he did not want to give inforamtion about the drums and owner of the house. He said

MONTAUK AVE (Continued) **S109827008**

we are tenants and we have no idea about drums and tank. A CSL was sent to the onwer:Suzatte Campbell3570 Bronx Boulevard Bronx, NY 1046708/09/12-Zhune visited the site the tank was removed, the two drum with water and oil are still in the alley of 35 Montauk Ave.11/25/14-Zhune visited the site on 10/10/14. Base on observations the drums were removed and the house was renovated. There is no confirmation of any spill inside the house. As per Jeff Vought spill closed.

Remarks: 275 gal oil tank dumped by side of road...top has been removed. NYC FD removed approx. 60 gals of water and oil mix

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"See spill 9906412. Oil from Vault 2321 Contaminated vault 1048.Con ed e2mis notes:The transf was below min and leaked approx 50 gallons. 25 gallons of the transf oil leaked into vault#1048 thur the drain in structure (see incident #127486). Transf was installed in 1-1-79 and has a pcb count of 33 ppm. Will pressure test transf and take a sample when it is safe to do. Cleanup procedured to follow is to double wash street and structures and to remove dirt with oil on it and put it into barrels over 50 ppm tanker to remove all liquids.Transformer in VS-2321 holds 495 gal of oil as per MFR plate. Approx 310 gal oil was drained from unit and approx 185 gal of oil was lost into structure.Reports initial cleanup completed. Reports transformer removed, structure cleaned, tag removed and new transformer installed. Incident is closed.
Remarks:	OIL LEVEL IN TRANSFORMER IS LOW AND WILL BE INVESTIGATED. OIL LEAKED IN DRAIN PIPE CONTECTED TO VAULT 1048. CROSS REF 9906412

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ENGELHARDT"Closed due to redundant reporting. Spill 9906417 is for leak from vault 2321 which travelled through piping and contaminated valut 1048.DEC Inspector notes:8/30/99: Responded to spill-notes attached. Steve Zalloughi to fax E2MIS when spill is closed. He is too call if they discover >50ppm pcbs.Oil in western transformer was mistaken for water and pumped into street. Transformer is suspected

VAULT #1048 (Continued) **S104194489**

of leaking. Vaults are hydraulically connected. Oil in second vault-middle for are either clean or have mineral oil. Waiting for >50 tanker.33ppm historical in eastern transformer. Able to deploy speedy dry.All three vaults (each composed of the transformer vault and a bus compartment) are connected by a common pipe that is situated at the bottom of or under the bottom of the vaults.The bus compartment has sediment/debris looks dry. Bus compartment for V0382 has sediment/debris. Bus compartment for V1048 has water-looks clean.Steve said they would barrel sediment/debris. Joe-- Operating Supervisor of Equipment group. Transformer in V2721 installed last Wednesday. Discharge for all six structures is in V2321. Pluming was removed when new unit installed. Con ed e2mis notes:25 gallons of unknown oil, no water. Brand new transf that was installed 8/25/99. Transf was pressure tested and tested ok. No engineer plates for this structure. Crew started to pump fluid out of hole before realizing that they were pumping oil out onto street. Approx. 4 gallons of oil was pumped onto street. Making a stain of 40'x10". Oil did not go into sewer. They contained oil with diapers and absorbent. A liquid sample was taken. Will start cleanup as 50-499. Over 50 tanker and EPA number. He found the source of the leak. It is coming from a below min transf in V2321. Cleanup procedured to follow is to double wash street and structure (clean up as 50-499 ppm) and to remove all dirt with oil on it and put it in barrels, and over 50 ppm tanker to remove all liquids.Initial cleanup completed.Cleanup procedured to follow is to double wash street and structure (clean up as 50-499 ppm).All dirt with oil on it and put it in barrels, and over 50 ppm tanker to remove all liquids, cleanup completed pending removal of transformer in VS-2321. VS 2321 was removed, structure was cleaned and transformer replaced. Final cleanup of this structure pending. Cleanup is completed.Amount UOM : 40 ppm

Remarks: cleanup as 50-499ppm - 40 gals of the 25 gal was pumped up onto street and contained - new transform installed on 8/25 in vault presure test on unit today and unit passed drain in vault which they believe goes to a building

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

T & G AUTO BODY REPAIR (Continued) **1016124595**

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	Find owner & send CSL4/18/06 - Raphael Ketani. I finally found the owner of the property. It is: LPL Properties, Inc., 249 Empire Blvd., Brklyn, NY, 11225 ((718) 703-2700; cell (718) 504-7124). I spoke to Jonas Rudofsky at this phone number, but he said this number is not LPL, just him. He said he is the prospective buyer of the property and owns the property next door. He said he will get me the address and phone number of the actual owner.4/20/06 - Raphael Ketani. Ted Yen (cell 917-584-6299) of Ted Yen Associates called today. He said that his company is involved in the cleanup at the site and work is in progress. He said that Eastmond & Sons pumped out 1,000 gals. of mostly water with a little oil from the tank. Then they lifted the tank and the bottom didn't come with it. So they dug up 55 drums of oil soaked soil and debris. He said he represents the tank removal contractor. Mr. Yen added that they took clean end point samples and all of the information will be sent to me in a report. He said that Mr. Rudofsky is the owner of LPL Properties.I will send Mr. Rudofsky a CSL today. 5/17/06 - Raphael Ketani. I reviewed the 5/10/06 Tank Closure and Remediation Report produced by Don Carlo Environmental Services, Inc. I found the analytical results and the report to be acceptable. I will send a letter to the owners of the property stating that the report is acceptable and that the case has been closed. Based upon this report, I am closing the case.

DEC Memo:	04/03/06-Hiralkumar Patel. Owner:Stuart GoldsteinBerriman Street Associates888 7th Ave - 24th FlrNew York, NY 10106-0001PH. (212) 755-5390 EXt. 305CSL sent out to Stuart Goldstein.04/04/06-Hiralkumar Patel. DEC_Steve asked me to send the same letter to property owner, listed in property shark list. Joseph Zuccaro81 Miriam StreetValley Stream, NY 11581-1320letter sent out to owner. copy given to ECO. 04/06/06-Hiralkumar Patel. Received message from Jim Vest (212-660-1200 Ext. 309), who is handling this property. as per him, property has gas heating system and doesn't have any kind of oil tank, burner etc. Left message for Jim.05/04/06-Hiralkumar Patel. Left message for Jim.05/11/06-Hiralkumar Patel. Left message for Jim.05/15/06-Hiralkumar Patel. Received call from Jim(Cell: 973-641-1139). as per him, there is no open spot, which has soil. all property area is covered by concrete floor and property has commercial buildings like garage and warehouses. the property side at Berryman street is touching sidewalk and there they have garage opening. Jim is not sure about which part of site has contamination that DEC officer observed. he wants to meet on site.05/17/06-Hiralkumar Patel. Spoke to Jim and ECO. meeting both on site at 2:30 PM tomorrow.05/18/06-Hiralkumar Patel. visited site with DEC Vought and ECOs. spoke to Joseph Zuccaro, owner of property. property has piles of junk of broken parts from cars. owner is selling this property and is in contract stage. but new owner wants those piles cleaned up from site before they buy it, as buyer wants to do soil investigation. Mr. Zuccaro is removing piles and will be done by July 1, 2006. buyer has planning to develop this property as residential complex. Mr. Zuccaro denied to give buyer's information, but he is taking responsibilty of cleanup and will sign STIP. he was also agree to forward copy of the STIP to buyer once they sell out property. DEC Vought suggest him to inform DEC when he removes all the piles from ground, so we can see soil and floor condition as currently most of the area is covered by these piles. he agreed with this and will remove everything from ground for better insepction. he will not remove racks and junk from racks by July 1. property has few ASTs onsite. as per Mr. Zuccaro, he doesn't keep gas tank from the cars, so doesn't store any waste oil tank on location. property has multiple ASTs. few are in use to store diesel for internal use.ECO

CARBUSTERS AUTO RECYCLING LLC (Continued) **S108145756**

Jeff mentioned that they have issued some violations against Mr. Zuccaro.Carbusters Auto Recycling 66 Berriman Street, Brooklyn, NY 11208 (718) 235-024205/19/06-Hiralkumar Patel. Received message from Jim. after talking to Jim, found that Jim was talking about site at 60 Berry STreet in Brooklyn. as DEC got this address in initial spill report, first letter sent out at this address, but that was not the site. ask Jim to disregard the letter that he has from the Department. 05/23/06-Hiralkumar Patel. STIP sent out to Mr. Zuccaro at following address:Joseph Zuccaro81 Miriam StreetValley Stream, NY 11581-1320Ph. (516) 872-8747 (H) (718) 235-0242 (Off., site) (516) 523-7039 (C)FAX (718) 235-8703email: carbustersauto@aol.comSTIP sent out in registered mail (7005 1160 0000 6901 1261). faxed to Mr. Zuccaro.06/02/06-Hiralkumar Patel. REceived certified mail receipt.07/10/06-Hiralkumar Patel. Left message for Joseph.07/12/06-Hiralkumar Patel. Received message from Joseph (718-235-7015). Left message for Mr. Zuccaro. received call from Mr. Zuccaro. he will check wiht his secretary and will send STIP soon. he is still removing piles from area. asked to call the department once he removes all piles from spot.08/14/06-Hiralkumar Patel. left message for Joseph.09/27/06-Hiralkumar Patel. after discussing with DEC Austin and DEC Urda, case transferred to legal department. Mr. Urda is working on this case.05/27/08-Hiralkumar Patel. visited site as DEC Urda requested to know number and size of tanks and type of product stored. visited site with ECO Markey. found three 275 gal tanks at the site. two 275 gal diesel tanks were located at elevated platform. one 275 gal waste oil tank was found on floor but covered entired with junk and only top was visible. met Joseph at the site. he is still running business. Joseph mentioned that NYC HPD is buying this property. asked Joseph to provide contact at NYC HPD.left message for John Garrity at NYC HPD to know status of transaction.John GarrityNYC HPDDirector, Environmental Remediaton & Special Projects UnitPh. (212) 863-8052Fax (212) 863-798803/02/09-Hiralkumar Patel. spoke with DEC Urda. no updates yet.10/08/09-Hiralkumar Patel. received call from DEC Urda. he requested to visit site again (with ECO) to confirm contamination (take pics).2:45 PM:- visited site with ECO Neil Stevens. most of the site was covered by junk stockpile (more than during initial site visit). found middle portion cleaned up and solid concrete in visible areas. some stains found on concrete, but no oil. other areas were covered with piles.based on observations during the site visit, case closed.**Do not take site visit without ECO**

Remarks: During inspection, a significant amount of engine blocks/ transmissions piled on soil. Excavation w/ foot revealed oil coming into depression.***** Do not attempt to visit site without armed escort!*****

DEC Memo:	Spoke to John Leddy. This is in an estate and the estate has to make a decision where to take this. Tried to make contact and was unsuccessful 11/05-S. Scharf3/06-Refer back to Region 2 for followup and closure.- S. Scharf09/12/06 This case was transferred from Albany to Region 2. Zhune spoke to Elizabeth Farrel.(ph: 718-465-3600). She will fax copy of documents. 9/12/06 She sent tightness test result from 2005. I called her back let know that we need documents from 2004. 09/15/06 She only sent tank test failed results from 2004. 09/22/06-Vought-Received call and spoke to Elizabeth and she has already faxed in results. Requesting review and callback from Zhune.06/19/07-ABC tank sent a letter and invoice describing the repair they did to the 2500 gallons UST that failed the test. The letter says: on April 11- April 15, 2005 ABC Tank dug up to expose

55 BERRIMAN STREET - TTF (Continued) **U001841117**

the top of (1) 2,500 gallon underground storage tank. After tank was opened, a new gasket set along with a new stickline was installed. The tank was then cleaned and a visual inspection was performed on the interior of the tank. ABC found no evidence of leakage from the interior of the tank. Pressure was able to hold for (1) hour. On April 15,2005 a tightness test was performed on the tank. ABC Tank found no evidence of contaminated soil at the above site and any repairs made were neded in order for the tank to pass the tightness test. A copy of the pass tightness test results was also sending.Case Closed

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIBBE"11/12/10 - spill re-assigned from Tibbe to Joe O'Connell3/9/12 - Raphael Ketani. I sent Mark Tibbe of DEC (the former case manager) an e-mail requesting any information he remembered about the case.3/12/12 - Raphael Ketani. Mr. Tibbe responded back today with the below e-mail:#2 fuel oil leaking into a subway station. Never found a source. Milro went in a couple of times and did some cleanup. NYCT was supposed to keep an eye on it and let us know if anything returned. Went back once a couple of years ago with NYCT. Found a couple of spots of a little oil. NYCT was going to clean it and watch it some more. Could probably be closed but would check it one more time before you did that. Most of the spots that the oil was leaking in were on the platform and on the tracks in the station. There is a

ROCKAWAY AVE STATION -NYCT (Continued) **S104952021**

dewatering sump not far from the station that collected a little oil also, probably from the tracks in the station. If nothing has returned in the last 2-3 years, you could close it.7/11/13 - Raphael Ketani. I made a site inspection today. I walked the entire station and didn't see any signs of an oil spill. The ceiling had a little bit of peeling paint over one track. However, there were no signs of seepage. The ceiling over the two platforms was light colored and showed no signs of seepage or damage.7/18/13 - Raphael Ketani. A monthly progress meeting was held today regarding oil spills at a number of NYCT sites. Attending the meeting was Toni Watts of the NYCT Office of System Safety (646) 252-5939. I asked her whether she could find any information or documentation regarding this spill. She said that she would look into the matter. 7/19/13 - Raphael Ketani. I made an unannounced site visit to the street above the subway station. The area consisted of third floor walk up apartment buildings with stores on the ground floor. I saw two stores with possible cemented over fill ports and no vent pipes. Otherwise, there was no sign that anyone had oil service.Once back at my office, I searched the address 2158 Fulton Street in the spills database. No other spill cases came up.7/25/13 - Raphael Ketani. Ms. Watts called me today. She said that they could not find any documentation in the NYCT records system regarding the spill.8/20/13 - Raphael Ketani. The Final ISR was written and signed by myself, Randall Austin - Chief of the Spills Unit, and Louis Oliva - Regional Attorney. The Final ISR was then sent to Dennis Farrar in the Albany, NY office of the Division of Remediation.

Remarks: oil is seeping through ceiling onto wall and onto tracks. area above tracks might have abandoned drums there. spill was investigated but no clean up yet.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

NAYA SUPER DRY CLEANERS (Continued) **1007086378**

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "FOLEY"e2mis Notes:While doing flood inspections Equipment Group found an undiaperable sheen of unknown oil on approx 200gal water in V2040. Results of lab sequence 00-11777 are 1033ppm PCBs. Vault is on feeder 9B06. Historical records show this transformer has a PCB count

VAULT 2040 (Continued) **S104881114**

of 9ppm. Structure resampled. Initial cleanup completed by double washing structure with bio-gen 760. Liquid waste removed by tanker, solids placed into 2 drums that were taken to 3rd Ave Yard. Equipment Group sending crew to pressure test unit and take oil sample. Sample taken by env ops returned <1ppm. Sample taken from transformer by equipment group returned 15ppm. Unit was removed. Crew removed 3barrels solid waste. Double washed structure with slix. Tanker removed 300gal liquid wash water. Four wipe samples were taken of transformer. Washed again and soda blasted walls and floor. Tanker removed 200gal wash water. Used 5gal slix, 5gal sludge softener, 3bags soda blast. Sump already sealed. Took 9 wipe samples and all returned <1ugs.

Remarks: UNDETERMINABLE AMT OF OIL ON 200 GALLONS OF WATER - CLEAN UP PENDING LAB RESULTS - REF #134800 - TRANSFORMER IN THERE & UNABLE TO PRESSURE TEST IT - NO MOVEMENT OF WATER -- NO SEWER CONECTIONS - CONTAINED

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D005
Waste name: BARIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: D011
Waste name: SILVER

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE

NYC BD OF ED - ENY H S OF TRANSIT TECH (Continued) **1000552170**

OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

DEC Memo:	11/15/2005: Lead transferred to Joe White as part of the Spill Initiative Project.12/08/2005: Mr. James Merlo, the coordinator for NYC School spills, called Joe White to indicate that the tank has been retested and passed. These passing results will be sent to the DEC for closure of failed tank test.01/04/2006: The reported spill was #4 Fuel oil tank test failure. At this location there are two tanks listed in the PBS database. Tank 1 is #2 fuel oil and tank 2 is #4 fuel oil. Tank 2 was documented as passing the tank test on 7/14/2005 which is subsequent to the tank test failure reportee in this spill report. Since the quantity reported as spilled is 0 gal,

POLYTECH (Continued) **S104621468**

the subsequent tank test pass in 2005 is sufficient to close out this spill. The PBS information is documented in PBS # 2-354732.

DEC Memo:	Over fill out of a vent line. Onto soil. Area is behind a fence and away from children access. Area being dug out. PTC will send closure documentation.05/12/09-zhune spoke to Manandra from Fuel Division 718-3495738. PTC did the cleanedup the same day. they removed the soil contaminated. oil went on top of the ground probably 1". They removed 4 drums of soil contaminated and asked to removed extra soil. As per Manandra it was not necessary to take soil samples. Zhune told him DEC requires soil samples. He said no problem he will call PTC to do the sampling. 05/15/09- Zhune spoke to Mark from PTC. he said two soil samples were taken. Results will be ready in two weeks.05/29/09- Zhune spoke to Ray from PTC. Results will be ready next wednesday 05/04/09 09/09/09- PTC sent the soil samples results. Two samples

POLYTECH (Continued) **S104621468**

were taken at depth of 2 ft. The results indicate VOCs and SVOCs below the Recommended soil cleanup objectives for fuel oil contaminatd soil. spill Closed.

Remarks: possible over fill spilling approx 20 gallons onto the ground, clean up is in progress.

POLYTECH (Continued) **S104621468**

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"Also see 0012546 and 0012542.Board of Ed hired PTC to test one 10,000 gallon UST(tank #2) buried under grass to the west of main entrance on Wells Stbecause maintenance noticed moisture around the tank and they were concerned of possible corrosion. PTC installed plugs and then subcontracted Crown Leak Detection to perform test.The lines were tested on 2/16, the tank tested on 2/21, plugs never removed. Board of Ed ordered oil on 2/16 which was delivered on 2/23 - before the plugs were removed from vent. Pressure built up and oil was forced out of fill line onto street.Cleaned by Petroleum Tank Cleaners. No further action.

Remarks: spill caused by plugged fill lines ***approx 200 gal spilled into a storm drain**

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D000

MOBIL OIL CORP SS #FV2 (Continued) **1000553841**

Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Violation Status: No violations found

DEC Memo:	05/06/10 - The DEC submitted comments on the 2009 Fourth Quarter Site Status Update Report to ExxonMobil on 3/26/10.06/23/10 - The DEC submitted comments on the 2010 First Quarter Site Status Update Report to ExxonMobil on 6/7/10. ExxonMobil was advised to take steps to optimize contaminant removal particularly in the area surrounding groundwater monitoring well MW-3.10/26/10 - The DEC submitted

EXXONMOBIL (Continued) **S104509356**

comments on the 2010 Second Quarter Site Status Update Report to ExxonMobil on 10/12/10. ExxonMobil was advised to respond by 11/12/10 to the DEC's request to take steps to optimize contaminant removal particularly in the areas encompassed by groundwater monitoring wells MW-3, MW-4, MW-6 and MW-8.11/24/10 - On 11/23/10, the DEC received verbal confirmation from Kleinfelder (ExxonMobil's consultant) that they would implement the steps outlined in the DEC's 10/12/10 comment letter to optimize contaminant removal rates.02/22/11 - The subject property was transferred from ExxonMobil to Bolla EM Realty, LLC ("Bolla"). Bolla has now assumed all responsibility for the remedial activities associated with Spill #99-12248. Arcadis will be taking over the remedial work from Kleinfelder.04/26/11 - The DEC submitted comments on the 2010 Third Quarter Site Status Update Report to Bolla on March 22, 2011. 07/28/11 - The DEC submitted comments on the 2010 Fourth Quarter Site Status Update Report to Bolla EM Realty, LLC on July 26, 2011. The DEC submitted comments on the 2011 First Quarter Site Status Update Report to Bolla EM Realty, LLC on July 27, 2011.10/27/11 - The DEC submitted comments on the 2011 First Quarter Site Status Update Report to Bolla EM Realty, LLC on July 27, 2011. The DEC submitted comments on the 2011 Second Quarter Site Status Update Report to Bolla EM Realty, LLC on September 8, 2011.12/22/11 - The DEC submitted comments on the 2011 Third Quarter Site Status Update Report to Bolla EM Realty on December 21, 2011.01/24/12 - The next quarterly round of groundwater samples are expected to be collected in March 2012.03/26/12 - The DEC submitted comments on the 2011 Fourth Quarter Site Status Update Report to Bolla EM on March 8, 2012.04/24/12 - The DEC received Remedial Action Plan for In-Situ Chemical Oxidation on 4/20/12. It is currently under review.05/29/12 - An Order on Consent between Bolla EM Realty LLC and the DEC was executed on April 4, 2012. The DEC approved the April 20, 2012 Remedial Action Plan for In-Situ Chemical Oxidation on May 25, 2012.10/25/12 - The DEC submitted comments on the 2012 Second Quarter Site Status Update Report to Bolla EM on 10/2/12.01/25/13 - The DEC submitted comments on the 2012 Third Quarter Site Status Update Report to Bolla EM Realty, LLC on 1/24/13.03/25/13 - The DEC submitted comments on the February 28, 2013 Site Status Update Report to Bolla EM Realty, LLC on 3/14/13. Rebound concentrations in monitoring wells MW3, MW4, MW6 and MW8 will continue to be observed over the next two quarters.06/24/13 - The DEC received the June 2013 Site Status Update Report on 6/7/13. It is currently under review.07/24/13 - The DEC submitted comments on the June 7, 2013 Site Status Update Report to Bolla EM Realty, LLC on 6/26/13. The DEC concurs with Bolla EM Realty, LLC's consultant's (ARCADIS) recommendation that additional remediation needs to be completed in the vicinity of monitoring wells MW-3 and MW-4. ARCADIS' proposed remedial approach will be be outlined in the August 2013 SSUR.09/03/13 - The DEC submitted comments on the August 26, 2013 Site Status Update Report Bolla EM Realty, LLC on 9/3/13. The DEC concurs ARCADIS' recommendation for a supplemental ISCO event involving the injection of a total volume of up to 35,700 gallons (depending on field observations) into injection wells IW-1 thru IW-3 to address elevated BTEX concentration levels in monitoring wells MW-3, MW-4 and MW-8 primarily.01/27/14: The DEC submitted comments on the November 27, 2013 Site Status Update Report and Receptor Evaluation Report on 1/27/14. The spill closure request was denied since total BTEX concentrations remain above 500 ppb in key on-site wells.03/25/14: The DEC submitted comments on the March 2, 2014 Site

EXXONMOBIL (Continued) **S104509356**

Status Update Report (SSUR) to Bolla EM Realty, LLC on 3/11/14. It is understood that the next SSUR which is expected to be submitted in May 2014 will include a discussion of the proposed remedial approach for addressing elevated contaminant concentration levels, particularly in monitoring wells MW-3, MW-4 and MW-8.06/25/14: The DEC received the May 2014 Site Status Update Report on May 27, 2014. It is currently under review.07/28/14: The DEC submitted comments on the May 27, 2014 Site Status Update Report (SSUR) to Bolla EM Realty, LLC on 6/30/14. The DEC has requested that ARCADIS submit a Scope of Work which describes the high vacuum total fluid recovery events proposed to address the contamination in the vicinity of groundwater monitoring wells MW-3 and MW-4.09/24/14: The DEC submitted comments on the August 25, 2014 Site Status Update Report (SSUR) to Bolla EM Realty, LLC on 9/3/14. A high vacuum truck extraction event was performed during the first week of September 2014.

Remarks: SOIL CONTAMINATION WAS DISCOVERED - EITHER WASTE OILOR GASOLINE. ENVIRONMENTAL CONSULTANT IS CONTINUING INVESTIGATION.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"8/27/98: site visit with Joe Floryshak and Ken Twomey (Con Ed). 2 x 2000 gallon gasoline USTs and 1 x 275 gallon hydraulic oil tank. When they were pulling the tanks out of ground they noted gasoline odors. Hole is visually contaminated - soil is still being excavated. Requested 2 additional monitoring wells be installed - one north, one west of excavation. They will excavate to concrete slab to collect soil samples. (JHO)2/23/00: Jacques Whitford Corp. (JWC) notes approx. 0.14 feet of gasoline in well MW-1A. Passive product recovery initialted (sorbent sock deployed in well). (JHO)6/15/00: Con Ed submits site investigation work plan to characterize site. Proposal calls for installation of 8 soil borings and 4 new wells around former tank area. Work plan approved in letter dated 6/21/00. Site investigation activities commence in late July 2000. (JHO)4/23/01: Site investigation report submitted. Findings indicate that in addition to gasoline/diesel contamination associated with former tanks, the site is underlain by a former BUG (now KeySpan) manufactured gas plant. Comment letter on SIR sent to Con Ed 9/10/01. Request Con Ed submit proposal for additional remedial action. (KMF)12/28/01: MGP site history report submitted by Con Ed. (KMF)2/15/02: Supplemental site charaterization work plan submitted, which addresses some of the on-site former MGP structures. Comment letter sent to Con Ed 6/13/03. (KMF)~~~~~~~~~~~~~~~~~~~~e2mis no. 119278:8/26/98 STRONG ODOR OF GASOLINE OR DIESEL FLUID IN EXCAVATION 30'BY 15' BY OLD GAS PUMPS. SOIL ALSO LOOKS EFFECTED. D.E.C. JANE OCONNELY WAS ON LOCATION REQUESTED EXCAVATION BE SQUARED OFF & SAMPLED.2/23/00 Jacques Whitford, a contractor for ConEd, reports that during a sampling event at 5:30, he encountered 0.14' of product material in monitoring well.Update 12-11-00 - Closure Report submitted to the DEC on 4/24/00. Draft Site Characterization plan submitted to the DEC on 6/09/00. Verbally approved by the DEC on 06/20/00. Nine borings and five monitoring wells were installed to evaluate the potential of soil and groundwater contamination in the vicinity of the former USTs. Five (5) of the boring locations were designated for well installation. The drilling occurred from July 24 to August 11, 2000.The analytical results indicated elevated BTEX concentrations, and to a lesser extent MTBE concentrations in the soil samples collected. With the exception of one boring (SB-6B), SVOC concentrations in soil for all boring locations were relatively low. During the soil boring installation work, evidence of Manufacturing Gas Plant (MGP) residuals were encountered at the SB-6B location. The first round of groundwater sampling of the six monitoring wells was completed on August 29, 2000. The results indicated very high concentrations of MTBE and moderately high concentrations of BTEX in the wells. Relatively low levels of SVOCs were detected. A summary of the MTBE and BTEX concentrations for the groundwater sampling completed on August 29, 2000 is provided below:Well ID MTBE (ppb) BTEX (ppb)MW-1A 500,000 13,000MW-2 37,000 660MW-3 31,000 17,000MW-4 6,300 NDMW-5 47,000 1,200MW-6 100,000 8,500A second round of groundwater sampling was completed during the week of October 30, 2000. Jacques Whitford Company (a contractor for Con Edison) is currently developing the site characterization report. The draft report is expected to be completed during the first quarter of 2001. 07/01/10 - Spill transferred to S. Deyette in Central

CONSOLIDATED EDISON (Continued) **S102239118**

Office. Telcon with J. Oconnell (R2) to discuss current status.Spoke with M. Gonzalez (CE PM) regarding transfer of spill. Discussed current groundwater monitoring and tentative start date of NG site characterization of MGP.08/06/10 - The Second Quarter 2010 Groundwater Monitoring Report was received and is under review. (SD)08/02/11 - The First Half 2011 Groundwater Monitroing report was submitted and approved. (SD)05/12/12 - The September 2011 Report was reviewed and approved on May 2012. The next semi-annual report is expected in July 2012. (SD)06/20/13 - The March 2012 and September 2012 reports were reviewed and accepted. No update to start of NG MGP Investigation. (SD)09/18/13 - The March 2013 report was submitted and reviewed. Portions of the report were not included. CE was asked to revise and re-submit. (SD)10/28/13 - CE submitted revised March 2013 report, which was subsequently approved. No update to the start of the NG MGP investigation. (SD)02/13/2014 - CE submitted the September 2013 sampling report; no changes to sampling frequency or locations. (SD)

Remarks: CON EDISON CLEVLAND STREET YARD THERE IS A STRONG ODOR IN AREAOF GASOLINE AND DIESEL. TANK EXCAVATION IN PROGRESS AT SITE.

DEC Memo:	11/13/2013: Mahat A phone call was made to Con Edison ERT (Paul Dedomenico @ 212.580.8383) regarding the spill. It is inside the contained area. ERT is doing an investigation to determine the flow path of spilled antifreeze. Mr. Paul will inform DEC in any event when the attention is needed. As per Mr. Paul, there is no soil and GW contamination. Further investigation is ongoing.02/06/14-Zhune spoke to ERT-Paul DiDomenico. He said they replaced the valve from the AC unit that caused the spill. The spill went directly to the storm drain. NRC and DEP was notified. Emis # 2355246/18/14-Zhune spoke to ConEdison ERT- Dennis Michaelides. He said they did not fix the AC yet. They are waiting for a piece of equipment that they ordered to fix the AC. The area where the spill happened has been cleaned up. The spill went into the drain and into the sewer.9/25/14

DRAIN (Continued) **S114561557**

- Austin - 55 gals of antifreeze (propylene glycol solution) leaked from a loose valve on an AC unit, and entered drain - Con Ed tightened the valve; material drained completely to NYC sewer system, so no cleanup practical - See the document files for further information - Spill closed - end

Remarks: Clean up unknown they do not know where drain leads to at this time

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Sangesland spoke to Paul Woodell (environmental consultant)Property was an Auto Parts store and the building was recently sold.New Owner wanted to renovate and during construction found 2 - 550 gal UST which were removed. After removal they used a PID to check the soil. It looked clean, but they took soil samples from the bottom & sidewalls and there were minor SVOC hits (exceeded the state levels).Additional excavations done and new soil samples taken today. If these samples are clean, a tank closure report will be sent to DEC for review and closure.06/22/11-Darlene Day from LBGN (Laggette, Brashears & Graham, Inc. emailed The Undeground Storage Tank Closure Report dated June 21, 2011. Two 550-Gallon single wall steel USTs and associated piping were removed from beneath the interior floor of the building. The USTs were found to be in good condition with surface corrosion but not visible penetrations.Initial endpoint samples were collected from bottom of grave(T-2 North, west, east sdewalls and bottom. T-1 south, west, east sidewalls and bottom). The analytical results indicated no VOCs exceeding the standards with exception of Ethylbrnzene in sample T-1 south sidewall and Methylbenzene in all samples. Exceedances are minimal. Several SVOCs Benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, chryzene, benzo(k) fluoranthene, indeno (1,2,3cd)pyrene) in two samples T-1 south

COMMERICAL BUILDING CSL (Continued) **S111011728**

sidewall and T-1 bottom exceeded the standards. Additional soil was excavated from these two areas (beneath and south of the former T-1 location).Three additional endpoint soil samples (T-1 south sidewall second set, T-1 bottom of south sidewall and T-1 bottom second set) were collected. The analytical results indicated no SVOCs exceeded the standards.

Remarks: test resuts show contamination

Spiller Extention:	Not reported
DEC Region:	2
DER Facility ID:	186577
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"Sangesland spoke with Gary Weissberger of Whitman Companies.Specific direction was:2 soil boring samples through the bottom of the tank3 soil borings from around the tank (2 ends and one side) Depth of borings will be 0 to 2 feet below the bottom of the tank.The other side is right up against a building.Test samples to VOC/SVOC & compare to TAGM One deeper boring to confirm that Groundwater is not in the area3/6/2006 Sangesland called Mr. Weissberger at Whitman asking about the closure report. He said a copy was submitted in Oct 2003 and sent to Anthony Sigona.Sangesland asked for another copy of the report to be sent. Mr. Weissberger says that teh site was clean and the closure report backs this up.3/14/2006 Sangesland reviewed a "UST - Site Investigation Report" from Gary Weissberger of the Whitman Companies originally dated October 2003.The report confirms the information discussed above. The subject tank was properly cleaned, soil samples were taken through the bottom of the tank and then it was filled. The soil samples taken through the bottom of the tank showed slight "hits" for a few SVOCs, but this can be attributed to the fill material located in the area. Additional soil samples were taken adjacent to the tank and found to be clean.The tank was properly abandoned in place and the soil sampling proved to be adequate for spill closure.

DER Facility ID:	324261
DEC Memo:	12/11/2006 Sangesland spoke to Joe Ostrowski at PTC. He said PTC cleaned up a spill in the basement of the building and outside. There was soil contamination and the area was dug out. Several endpoint samples were taken and the results will be submitted to DEC as soon as PTC gets them from the lab.12/19/06 - Raphael Ketani. On 12/7/06, T&S Trucking (718) 499-2900 (Angelo Solimine) delivered the oil. Custodian had ordered 5000 gals., but tank already had 3900 gals. of #4. Oil shot out the vent pipe and onto the concrete. Kim Lee Allen is the school contact.The PBS case is #2-356581 and shows an active 10,000 gal. tank with #4 oil. 1/5/07 - Raphael Ketani. I tried to call Ms. Allen (718) 647-1113 and Mark Salamack of PTC (718) 624-4842, but could only leave messages.Mr. Salamack called me back. He said that the school usually produces its own report, but he will send me the analyticals. 2/23/07 - Raphael Ketani. I tried to call Mr. Salamack, but could only leave a message.3/26/07 - Raphael Ketani. I received a FAX from Mr. Salamack containing manifests and end-point sample results. There were 2 manifests and 5 sample results. All of the samples were either non-detect or had hits that were very far below the TAGM RSCO limit. One sample had a number of VOC and SVOC hits, but these were well below the limits, except for benzo(a)pyrene which was just very slightly above with 81.2 ppb (limit 61 ppb).I called up Mr. Salamack regarding the amount of oil that had spilled inside the school and the vapor concentrations in the school. He said that he will have to talk to someone in PTC who knows the cleanup and get back to me. He said that it was #4 oil. I told him I needed a letter describing how much was spilled and the cleanup. He said that he would send me the letter.Mr. Salamack called me back a little while later. He said that the spill was an overfill and that the tank doesn't have a vent alarm or high level alarm. Mr. Salamack FAXed me a letter describing how the spill happened and what was done to clean it up. It said that 30 gals. came out the vent pipe as an overfill and contaminated the soil and conrete. It was also stated that the custodian opened the stick line and another 10 gals. spilled out, ran down the tank, and onto the painted floor of the tank room. Mr. Salamack's letter stated that the soil was dug out, absorbent was put down on the concrete outside, and the conrete next to the tank was pressure washed.Based upon the letter mentioned above, the manifests and the soil sample results, I am closing the spill case.
Remarks:	Driver was making a delivery for Castle Oil. The Custodian for the school read the gauge and gave the okay for a 5000gal. Tank originally had 3989 gal. Material shot out of the vent which is outside the school. Spill impacted the concrete. T& S Trucking has a crew on route to contain the spill but caller does not know who is doing the clean up.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"After removal of all visually (and PID) contaminated soil, Astem collected excavation endpoint samples with DEC present. Soil samples ND, but since tanks were out-of-service for longer than 10 years and 270 tons of contaminated soil removed from site, required borings. Impact Environmental performed 5 borings, 3 to 55 feet below grade. No contamination, spill closed.

DEC Memo:	e2mis 15632611/20/2004 11:30 HRS. J. O'CONNELL #57240 OF CONSTRUCTION MANAGEMENT REPORTS HE RESPONDED TO LOCATION AFTER COMPANY CONTRACTOR NOTIFIED HIM OF OIL IN MANHOLE AND AT 11:15 HRS. HE FOUND UNKNOWN OIL AND WATER IN MH-3745 LOCATED AT S/INT LIBERTY AVE & CHESTNUT ST. HE WAS MET ON LOCATION BY BROOKLYN ENV OPS O/S B. BAMONTE, WHO ESTIMATED SPILL AMOUNT AS 1 GAL OIL ON 400 GAL. WATER. SPILL APPEARS TO BE CONTAINED TO STRUCTURE (NO SEWERS OR WATERWAYS AFFECTED, NO PRIVATE PROPERTY AFFECTED, NO FIRE OR SMOKE INVOLVED). B. BAMONTE WILL PLACE ENV. STOP TAG IN STRUCTURE, TAKE A LIQUID SAMPLE, AND DELIVER IT TO CHEM LAB FOR TESTING.11/20/04 12:10 HRS. -- BROOKLYN ENV OPS O/S B. BAMONTE REPORTS OIL APPEARS TO BE MOTOR OIL AND HE PLACED OIL SOLIDIFICATION MATERIAL INTO STRUCTURE. TWO LIQUID SAMPLES WERE TAKEN FOR PCB AND OIL ID TESTS. CHAIN OF CUSTODY FORM # DD-11470 WAS MARKED FOR "E" PRIORITY TURNAROUND AND 24-HOUR DEMINIMIS PROGRAM. ENV STOP TAG # 44167 PLACED. CLEANUP PENDING RESULTS FROM CHEM LAB.I1-20-04 23:00hrs LAB SEQ# 04-09663-001 OIL ID PRESENCE OF DIELECTRIC OIL. S. PACE 49874.UPDATE*11-21-04 LAB SEQ# 04-09661-001 1872 PPM. S. PACE 4987411-21-04 EPA# NYP 004 127 098. OVER 50 TANKER WAS ORDERED BY B. BAMONTE (ENV OPS) LAST NIGHT FOR THE A.M. TO BEGIN CLEANUP S. PACE 49874UPDATE 21-NOV-2004 14:42 HRS.ENVIR. OPER. O.S. A.WALKER EMP# 55495 REPORTS: ASTORIA >500 TANKER REMOVED 300 GAL'S OF LIQUID FROM STRUCTURE. 1 DRUM OF SOLID DEBRIS WAS REMOVED FROM STRUCTURE BEFORE D-FAULT WAS FOUND (12:00 HRS.)D-FAULT TAG# 02078 WAS PLACED IN STRUCTURE. DUE TO THE AMOUNT OF DEBRIS STILL IN STRUCTURE SUMP STATUS IS UNKNOWN. ENVIR. TAG WILL REMAIN IN PLACE. NOTE: STRUCTURE STILL CONTAINS A LOT OF DEBRIS. C.HOGAN 07511UPDATE 11/29/04 09:00 HRS.D FAULT # 7886, FEEDER 9B93, FAULT: DAMAGED JOINT, DUCTING: BN-E; BN-W.UPDATE 12/11/04 15:50 HRS AS PER FOD SUPV CORRECT FDR 9B94 IS NOW OFF AND FOD IS ON LOCATION AND THERE IS WATER IN THE STRUCTURE. A TANKER AND ENV CREW WILL BE GOING TO LOCATION TO PUMP WATER AND HOLD ZONES.Update 12/12/04 20:45hrs. O.S. B.Bamonte reports on location with Env. Ops. crewsFernandez, Williams, Stanford and Breakenridge. U.G. crews cut out the D' fault in structure.After D' fault was repaired, Env. Ops. crews began clean up. Structure was double washed

MANHOLE 3745 (Continued) **S106720778**

with5 gallons of 760, and 10 gallons of Safety clean detergent. All solids were put into drums. Atotal of five (5) drums were generated consisting of PCB solids, PPE, zone material and lead.Drums were picked up by Astoria transportation. An >500 tanker removed 125 gallons ofliquids out of structure. No sump found in structure. Env. stop tag remains in place untilstructure is soda blasted. From: Bamonte, BenjaminOn 1/6/04, While soda blasting the manhole, Joseph Weihs noticed secondary cable missing insulation. #9 was not available, nor was an underground supervisor. Soda blasting and the cleanup was cancelled pending resolution of the issue. 200 gallons of PCB oily water was taken by an Astoria Tanker. 1 drum of PCB/Lead solids was also picked up by Astoria Transportation.#9 will set up a meet with Env. Ops to investigate/fix the issue during 7-3 shift. From: Columbia, Thomas1/9/05A #9 crew and an Env. Ops crew (Weihs/Walker/Giorgianni) mobilized to the above incident today, Sunday 1/9/05. The #9 crew corrected the exposed secondary cable in the structure.Once completed, the Env. Ops crew double washed and cleaned the structure with 10 gallons Biogen 760 and then soda blasted the entire structure. 100 gallons of PCB oily water was generated during the cleanup and taken by an Astoria Tanker. 1 drum of PCB/Lead solids was generated and picked up by Astoria Trans. 9 wipe samples were taken by a Chemlab chemist based on the sampling grid provided by Bob O'Kane. The samples were sent for priority 'A' analysis for PCBs under Chain of Custody #DD15637 Tom ColumbiaUPDATE 11-JAN-2005 1055HRSLab Sequence Number: 05-00210-001 Date Approved: 1/10/2005ALL 9 WIPE SAMPLES PASSED.

Remarks: NO TO ALL 5 QUESTIONS. NO CLEAN UP YET. CON ED REF # 156326.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIBBE"Testing equipment was discarded in a dumpster and leaked out. Approximately 3 galons leaked into the parking lot with one gallons going into a storm drain. NYCT contained and cleaned all product except what went into the sewer. NYCT attempted to notify DEP but, after being put on hold for several minutes, NYCT discontinued call.
Remarks:	Caller reports someone dumped the oil in their dumpster. It leaked onto pavement and approximately 1 gallon went into the sewer. Cleanup is in progress by NYC transit employees.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F004
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: CRESOLS AND CRESYLIC ACID, AND NITROBENZENE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING,

FINDS:

Registry ID: 110059735283

Environmental Interest/Information System
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID: 110009483497

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	12/14/11- Zhune spoke to Homeowner. The oil company brought delivey and overfilled the tank located in the basement. There are oil odors throughout the house. Her son ocuppy the basement and had to move to the first floor becouse of the odors. The oil company removed the carpet from the basement and spread sand on the spill but she said that odors are still strong. Oil company said they will comeback in two days. Heeranjani Rawh * Homeowner*347-387-1072 Address: 482 autum ave Brooklyn, NY 11208 Paul* Homeowner's son917-912-7827DEC Rahman responded 12/15/11 I inspected the tank room on 12/14/11 afternoon. Approx 2-3 gallons spilled through the gauge on top of the tank. Oil Company "Skaggs Walsh" put down speedy dry on the floor to absorb the oil, removed carpet that was oil soaked. I recommended for a power wash on the floor, followed by epoxy painting of the floor.(sr)
Remarks:	spill to concrete because tank gauge was not secure. cleanup complete, odor present

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

FINDS:

Registry ID: 110001572405

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of

AMOCO-56430129005 (Continued) **1000553872**

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIBBE"12/08/88: GOING TO SEND BORING LOG, DEC MAY RECOMMEND IMMEDIATE TESTING IF BORING PROVES CONTAMINATED. 11/14/94: GOING TO SEND BORING LOG, DEC MAY RECOMMEND IMMEDIATE TESTING IF BORING PROVES CONTAMINATED. REASSIGNED TO ZHITOMIRSKY FROM SIGONA ON 11/14/94. transfered from Hale to Tibbe on 12/27/00. see also 91-02804 & 94-06304. Tanks closed and replaced. Investigation and remediation ongoing.11/12/10 - spill re-assigned from Tibbe to Joe O'Connell5/19/2011 The spill was reassigned from Joe O'Connell to Linda Ross2/27/12 - Raphael Ketani. Spill reassigned to me during February 2012. Monthly progress update meetings are taking place.12/18/12 - Raphael Ketani. There have been monthly to bimonthly (once every two months) update meetings with the NYCT regarding this and 17 other sites. The information for the sites is in the UIS under e-docs, multiple sites, DER, Region 2, Petroleum Spills, NYCT.5/8/14 - Raphael Ketani. Stephen Taus of Dvirka & Bartilucci (the consultants to the NYCT) sent me an e-mail describing the Membrane Interface Probe technology (MIP). This direct push system will be used to determine the position of the oil on the water table and the approximate quantity of oil below ground. The system consists of a series of hollow metal tubes with a probe tip at the advancing end. The tip allows for the collection of VOC vapors, detection of soil conductivity, and the determination of soil particle size and total organic chemical constituents. The probe can be converted for collecting soil and groundwater samples. The MIP system will be connected to soil conductivity, photoionization, flame ionization and electron capture detectors.6/12/14 - Raphael Ketani. I reviewed a request letter from the NYCT dated 6/10/14 and titled Well (W-06R) Decommissioning Request. Well W-06R is in the central-eastern part of the site. The reason for the request is that the casing is cracked and offset 20 feet below grade. This well is 4 inches in diameter and extends to 70 feet below grade. The NYCT will replace this well with a 2 inch diameter well which will be drilled to 70 feet below grade and in close proximity to W-06R. The new well will be named W-06RR. The old well will be overdrilled with augers to 5 feet below grade. Then the loose material will be removed. After this, the old well will be grouted to 5 feet below grade. Next, the casing will be cut and the well grounted to within 1 foot of grade. After this, the pad will be cemented to grade. I drafted a response letter to be reviewed

EAST NEW YORK DEPOT -NYCT (Continued) **S103560280**

by Hassan Hussein, EE III and head of Unit C Remediation. In the letter, I approved the plan to abandon W-06R and replace it with W-06RR. I also stated that soil sampling and PID screening must take place with the installation of W-06RR. I added that well development should not take place any sooner than 48 hours after well construction and that groundwater sampling should not take place any sooner than one month after well development.

Remarks: STARTED DRILLING 10/26/88, FOUND OIL ON DRILL 15 FEET DOWN.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	This spill event is BOTH a spill and a tank test failure.Spill was cleaned. TTF issue remains open8/5/2009 TTF letter sent to:Ms. Jennifer WoutinenNew York City Transit2 Broadway - 27th FlrNew York, NY 100048/24/09. J.Krimgold interviewed the caller (HAROON ASLAM) form MTA over the phone. He stated that the failure was due to the leak from the fill line, not due to the t/test as originally stated. The fill line is double walled and sloped toward the tank sump, where the product was found. The pipe's secondary containment then was tested and found to be tight. This indicates that there was no release to the environment from this incident. The pipe was tagged (taken out of service). Tank is manifolded with other tanks and has another fill. NFA. JK.
Remarks:	CALLER STATES THAT THE TANK (UNK SIZE) FAILED A LEAK TEST, ABOUT 10 GALLONS WAS SPILLED. CALLER DID NOT HAVE THE PBS NUMBER. SPILL WAS CLEANED UP.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit

PS 155 N HERKIMER ELEM SCHOOL (Continued) **1004762068**

Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	Sangesland spoke with Mr. Alter of GZA. His firm was hired to do a phase 2 on a vacant lot. City owned vacant lot (HPD is landlord) is being sold to a non for profit to build housing. Site history was a row of 3-4 story high apartment houses demolished in 1970's. GZA installed 3 temp wells on the site. One well (southeast corner) has a hit of BTEX 6640 ppb of BTEX. They believe the source is from off site, no obvious source. To the east is a junk yard, but it's down the block.Purchaser of site: Muzzy RosenblattChristine Lalor-Chisholmc/o Bowery Residents Committee 324 Lafayette StNew York, NY 10012Ph. (212) 803-5701Mr. Rosenblatt will take over the property and will manage the remediation of the site with grant money from the city.07/17/08-Hiralkumar Patel. spoke with Mr. Alter. asked him to submit Phase II report for review.07/22/08-Hiralkumar Patel. received Phase I report, Phase II report, RAP and CAMP. alternate

EMPTY LOT (Continued) **S109206126**

addresses: 888-910 Liberty Ave, 369 Logan Street, 116 Fountain Ave, 126 Fountain Aveabstract of Phase I:- site occupies Block 4190/ Lots: 19 to 28 and Lot 30- currently site is vacant and undeveloped- regional groundwater flow at the site is to the southeast, towards Jamaica Bay- by 1908, the site contained ten 3-story buildings; demolition of buildings occured over a period of time, from mid-1960s to approx. 1982; site has been undeveloped since 1982abstract of Phase II:- site is approx. 30 ft above mean sea level- groundwater flow is likely towards southeast <---------- installed 10 test pits on lots 19 to 28, no access to lot 30- test pits were at least 20 ft long, 6 ft wide and 15 ft deep <-------- 10 test pits contained construction debris, including bricks, asphalt, pieces of waste metal pipes, sheets and equipments, and brown fine to medium sand with some small cobbles; fill extended to depth of 10 to 12 ft bg, where native brown fine to medium sand was encountered <--------- collected soil samples from each test pits in the 0 to 2 ft bg interval and in the 12 to 15 ft bg interval <---------- installed three temporary well points TW-1, TW-2 and TW-3- well points TW-1 and TW-2 were installed to depth of approx. 25 ft bg; well point TW-3 was installed to a depth of 32 ft bg <---------- 20 ft of well screen were installed in each well point- groundwater was encountered at 20 ft bg <---------- purge water from TW-1 and TW-2 contained no observable odor, sheen or elevated PID readings; purge water from TW-3 was visibly impacted, exhibiting a strong petroleum odor, light sheen, and black coloring <---------- found SVOC contamination in soil samples collected from test pits at 0-2 ft bg, but no contamination in deep samples from 12-15 ft bg- found heavy VOC contamination in groundwater sample from TW-3groundwater analyticals----------TW-3Benzene---------- --------520Ethylbenze----------3, 500Toluene----------2,500Xylene----------5, 3001,2,4-Trimethylbenzene--------2,7001,3, 5-Trimethylbenzene----------760Naphthalene----------750abst ract of RAP:- proposed on-site improvements include a three story building with 12 ft deep partial cellar and associated landscaped areas- soil will be excavated to a depth of approx. 14 ft witin the proposed basement footprint and 4 ft elsewhere <---------- in addition, approx. 48 inches of soil will be excavated from landscaled areas, including both paved and unpaved areas, so that unsuitable fill is removed for stability purposes- since historic fill is prevalent throughout the site, will assume that the remaining soils are similarly contaminated, and will not collect post-excavation soil samples <---------- waste classification samples will be collected at a rate and for analyses determined by the disposal facility <---------- demarcation barrier in the form of a marker layer of filter fabric or snow fencing will be placed between vegetated clean fill and contaminated (minor backfill SVOC contamination) site materials- appropriate vapor barrier will be incorporated into the desin plan for the proposed structure, along with depressurization system <---------- design of vapor barrier and depressurization system and manufacturers specifications will be submitted for review- three permanent monitoring wells will be installed: one well will be installed at the location of former temporary well TW-3 (which found contaminated) and two wells along the northern property boundary to assess whether the petroleum related compounds orginated off-site to the north <---------- wells will be installed to a depth of approx. 7 ft below water table; water table is expected to be

EMPTY LOT (Continued) **S109206126**

encountered at 20 ft bg <----------Phase II and RAP report includes unscaled, google view, site plan, which is not acceptable. requires scaled site plan with sampling point and proposed foundation layout and proposed well locations.07/30/08-Hiralkumar Patel. spoke with Mr. Alter at GZA. asked him to submit scaled site map with test pit and temporary well points. also asked for scaled site map with proposed building foundation layout and proposed well locations.left message for Mr. Biber, real estate consultant for owner.Joseph BiberHousing Consultant, Inc. **real estate consultant for buyer**Ph. (914) 827-7425 (917) 797-7971Fax (914) 827-3968email: jbiber@mindspring.comBenjamin AlterGZA GeoEnvironmental, Inc.Ph. (973) 774-3309email: benjamin.alter@gza.com07/29/08-Hiralkumar Patel. DEC Sangesland received call from Ms. Washington from NYC HPD.Tracy WashingtonNYC HPD100 Gold STreet, #9VNew York, NY 10038Ph. (212) 863-5180email: washingt@hpd.nyc.gov08/01/08-Hiralkumar Patel. left message for Ms. Washington.08/04/08-Hiralkumar Patel. received call from Ms. Washington. she mentioned that site is not under "e" designation, but was notified probably for water discharge permit that might need during construction. Ms. Wahington doesn't know when this property will be sold out.08/11/08-Hiralkumar Patel. received call from Mr. Biber. he mentioned that property sell will happen in Nov. 2008 and currently NYC HPD is the owner of the property. Mr. Biber asked to send documents to Christine at Bowery Residents and Mr. Biber will be point of contact for buyer. 08/12/08-Hiralkumar Patel. received message from Mr. Alter. he mentioned that he sent site map, but i didn't received it. sent email to Mr. Alter to submit site map to my attention.received scaled site map with boring/temporary well locations, proposed permanent well locations and foundation layout.08/14/08-Hiralkumar Patel. sent letter to Ms. Washington requiring delineation of groundwater contamination and site specific groundwater flow direction. letter emailed to Ms. Washington, Mr. Alter at GZA and Mr. Biber.10/06/08-Hiralkumar Patel. received call from Mr. Alter. they have installed three monitoring wells on 09/29/08. samples are currently in lab and will submit report by end of Oct. 2008. approved Mr. Alter's request to extend report submission deadline to end of Oct. 2008.11/05/08-Hiralkumar Patel. received groundwater investigation report from GZA. abstract:- installed three permanent monitoring wells- evidence of petroleum contamination was noted in all three wells from approx. 18 ft to 26 ft bg- highest PID readings were observed at the water table and the smear zone- collected one soil sample just above the water table at approx. 20 ft bg and one sample with the highest PID reading from each well boring at approx. 22 ft bg- water table was encountered at approx. 23 ft bg- soil encountered during boring consisted of fill material to a depth of approx. 15 ft bg, underneath the fill was a light-brown medium to coarse sand, with some fine sand and silt- sheen and petroleum odors were noted in PW-2 and PW-3- groundwater flows to the west at the site <---------- during well installation activities, soils contaminated with gasoline constituents were encountered in the smear zone at all three locations at approx. 18 ft to 26 ft bg- found contamination in upgradient well PW-2 (in northeast corner of the site)- GPR survey performed in 2007 did not reveal the presence of any USTs on the site, or any anomalies in the vicinity of monitoring well PW-2- a scrap yard has adjoined the property to the east, across Fountain ave, for since 1991 <------- gasoline filling station was present at the northwest corner of liberty and Fountain ave <------soil

Austin asked to start investigation at properties across the corner (899 liberty ave & 921 liberty ave).spoke with Ben Alter, Joe Biber and DEC Austin. Austin mentioned that as there is groundwater contamination at the site, the Department can't close the spill. but as no soil contamination found at the site (means there could be no source), to accommodate property closing, the Department may consider sending letter acknowledging findings of investigation and responsiblities of future investigations/remediation.received email from Mr. Biber requesting letter to be sent out at following address:902 Liberty Avenue, L.P.c/o Bowery Residents' Committee324

EMPTY LOT (Continued) **S109206126**

Lafayette StreetNew York, NY 10012Attn: Muzzy Rosenblatt11/20/08-Hiralkumar Patel. received message from John Gearrity (212-863-6539) from HPD regarding closure of spill. left message for John mentioning disucssion with Mr. Biber and Mr. Alter, yesterday.sent letter about accepting findings of previous investigations regarding off-site source to Ms. Washington at HPD and Mr. Rosenblatt at Bowery Residents' committee. letter copied to DEC Urda, DEC Austin, Mr. Alter at GZA and Mr. Biber at housing consultants.discussed with DEC Austin and DEC Urda regarding opening spill cases at upgradient properties for further investigation. both agreeded not to open any more spill cases until gets confirmed contamination.spoke with Dominick Vitucci, owner of 895-909 Liberty ave (suspect property), upgradient property from the subject site. Mr. Vitucci mentioned that he baught his property about 12 years ago and since then he is using gas heating system. as per Mr. Vitucci, there was a casket factory and there was no gas station or repair shop at his property ever. currently his site occupied by residential and commercial (wood factory) properties. he also mentioned that there were no gas station/repair shop across the street at 921 liberty ave.Mr. Vitucci also ownes property at 911-921 Liberty ave, a bus paint shop.Dominick Vitucci owns following properties:1. 899-907 Liberty Avenue: Block/Lot # - 4154/952. 909 Liberty Avenue (aka 114 Fountain Ave): Block/Lot# - 4154/943. 911-921 Libery ave (aka 103-113 fountain ave): Block/Lot # - 4156/14. 923 Liberty Ave: Block/Lot # - 4156/505. 925-933 Liberty Ave (aka 54 Crystal St): Block/Lot # - 4156/45Dominick Vitucci 427 Euclid Ave **office address**Brooklyn, NY 11208PH. (718) 235-0688 (O) (917) 528-6094 (C)Fax (718) 835-0799email: domstrucks@aol.comduring spill record search, found old spill report on Mr. Vitucci's property. spill #: 0330025. spill reported at 925 Liberty Ave, by DEC DeMeo on 08/07/03 as found waste oil leaking drums on property. case closed. no other spills found. no PBS record for Mr. Vitucci's properties listed above.12/09/08-Hiralkumar Patel. discussed with DEC Austin regarding letter to upgradient sites for soil and groundwater delineation. based on findings at the subject site (high concentrations of VOCs), Austin asked to hire state contractor to expedite soil/groundwater investigation on-site as well as off-site, before construction at the subject site starts. Austin asked to send letter to Mr. Vitucci requiring submission of PHase I for both upgradient properties and access to site for investigation by state contractor.lateron, DEC Randy asked to ask subject property owner to install off-site wells to prove contamination coming from off-site. he also mentioned to inform owner that if there is higher contamination in groundwater, upgradient from the subject site, the department may close the case.12/15/08-Hiralkumar Patel. left message for Muzzy Rosenblatt at Bowery Residents Committee.12/18/08-Hiralkumar Patel. left message for Mr. Rosenblatt.received call from Mr. Jhonson from Mr. Rosenblatt's office. explained him that till now the department only has confirmed groundwater contamination on-site, and no data for off-site contamination on upgradient location which can confirm theory of off-site migration of contamination. told him that if they confirm higher concentration in upgradient groundwater (via borings) then the department may consider closing spill case at the site.John JhonsonBowery Residents CommitteePh. (212) 803-571601/12/09-Hiralkumar Patel. received call from Kevin from Artec, general contractor. he called to see if any documents they need before they start excavation of soil for foundation work. told

EMPTY LOT (Continued) **S109206126**

Kevin that based on submitted documents, they don't need anything from the DEC for any foundation excavation. but suggest him to keep environmental contractor on-site during excavation work due to possibilities of vapor from heavily contaminated groundwater.KevinArtec constructionPh. (718) 721-2400email: kevin@artecconstruction.com01/14/09-Hiralkumar Patel. received message from Kevin.01/16/09-Hiralkumar Patel. spoke with Kevin and Taso at Artec. explained them that till date the department doesn't have any off-site groundwater data which supports theory of off-site migration of contamination. so if they can install borings off-site upgradient and finds same groundwater contamination in upgradient groundwater samples, then the department may consider closing case on the subject site. Taso agreed with it and will ask Mr. Alter to submit site plan with proposed boring locations.Taso VasiliouArtec constructionPh. (718) 350-7628 (C)02/26/09-Hiralkumar Patel. spoke with Mr. Vasiliou regarding off-site investigation. he asked to call owner.spoke with Mr. Rosenblatt. explained him that if they collect off-site soil/groundwater samples and finds similar contamination then the department may close case on his property. he will talk to consultant and will call back.03/23/09-Hiralkumar Patel. left message for mr. Rosenblatt.received message from Mr. Johnson from Bowery Residents Committee.03/27/09-Hiralkumar Patel. spoke with Mr. Johnson at Bowery residents. he mentioned that Bowery residents committee owns the property but NYC HPD is funding the project. so he need approval from HPD for additional boring off-site. he will contact all parties and will set up conference call to discuss further.04/02/09-Hiralkumar Patel. received email from Mr. Johnson. he asked for letter regarding soil/gw investigation off-site as need approval from HPD.04/03/09-Hiralkumar Patel. left message for Mr. Johnson and asked him to call back.received call from Mr. Johnson requesting letter from the department for off-site investigation.John JohnsonBowery Residents CommitteePh. (212) 803-5701email: jjohnson@brc.orgdiscussed with DEC Austin. he asked to send letter based on verbal agreement from owner for off-site investigation.sent letter (with DEC Austin's approval) to Mr. Rosenblatt (owner) and Ms. Washington (NYC HPD) requesting off site soil and groundwater samples from a boring. letter emailed to Ms. Washington, Mr. Alter (at GZA) and Mr. Johnson (at owner's office).04/29/09-Hiralkumar Patel. received message from John Garrity from NYC HPD. he mentioned that Bowery committee doesn't have money to do off-site investigation. HPD is planning to use some federal grant, but it may take about two months to get approval for such work.John GearrityNYC HPDPh. (212) 863-6539email: gearritj@hpd.nyc.govleft message for Mr. Garrity.05/26/09-Hiralkumar Patel. received call from Mr. Garrity from HPD. he mentioned that they are planning to apply for EPA grant for complete delineation at the site. he will discuss with Office of Enviromental Remediation in mayor's office for EPA grant. asked Mr. Garrity to send letter summarizing the process.07/06/09-Hiralkumar Patel.12:59 PM:- left message for Mr. Garrity.08/25/09-Hiralkumar Patel.2:42 PM:- left message for Mr. Garrity.11/24/09-Hiralkumar Patel.12:38 PM:- left message for Mr. Garrity.11/27/09-Hiralkumar Patel. received message from Mr. Garrity (at 2:40 PM on 11/25/09).12/01/09-Hiralkumar Patel.9:17 AM:- left message for Mr. Garrity.12/08/09-Hiralkumar Patel.11:37 AM:- received call from Mr. Garrity. they tried to get money from EPA grant but no success. Mr. Garrity will talk to construction project manager regarding use of construction money to do off-site investigation. Mr. Garrity will

EMPTY LOT (Continued) **S109206126**

call back by end of month.discussed with DEC Austin and DEC Vought. Based on results of groundwater sampling, Austin asked to investigate about spill sites upgradient from the subject property and inspection of basement in new building (if constructed) at the site.12/11/09-Hiralkumar Patel.8:00 AM:- visited site. three story structure on site now and under construction. inspected basement at the site; no odors noticed in basement. during inspection found that lots across Fountain ave from the subject site are also under development and that project is also funded by HPD. as per groundwater flow direction from groundwater investigation report (dated Oct 08 from GZA), groundwater is flowing to the West and immediate upgradient site from the subject site is construction site across Fountain ave.East NY High School of Transit Technology is located at 370 Wells Street.also visited Getty gas station at 3196 Atlantic Ave which is closest gasoline station to the impacted site at 908 Liberty ave.during inspection found auto repair facility at 2 Fountain ave adjacent to Getty station.10:08 AM:- spoke with Mr. Alter at GZA. according to groundwater investigation report (dated Oct. 08), groundwater is flowing to the west and next upgradient site is the site where HPD is constructing new residential building (this construction site is known as 125 Fountain ave). asked Mr. Alter if any investigation done on 125 Fountain ave project site. Mr. Alter mentioned that someone else did investigation.10:15 AM:- spoke with Mr. Gearrity regarding environmental investigation on 125 Fountain ave project. Mr. Gearrity mentioned that CA Rich did investigation on 125 Fountain Ave and found no contamination. asked Mr. Gearrity to submit investigation report. he also mentioned that according to Sanborn maps from 60-70s, there was filling station on property at 911 Liberty ave. asked Mr. Gearrity to send sanborn maps also, if available. construction project on 125 Fountain ave runs along Liberty ave between Fountain ave and Crystal street and contains multiple lots. asked Mr. Gearrity to send list of lot #s involved in 125 Fountain ave construction project.10:45 AM:- spoke with Mr. Singh, business owner at 3196 Atlantic Ave. Mr. Singh owns this business for last three years and never had any spills during his ownership. Mr. Singh mentioned that property owner owns tank system and he maintain these system. asked Mr. Singh to send inventory record and tank test results and any other documents regarding tanks for past three years.Kuldeep Singh **business owner of Getty station**3196 Atlantic AveBrooklyn, NY Ph. (347) 324-2405 (C)Fax (718) 850-0434as per Mr. Singh, Dominick Vitucci owns property at 3196 Atlantic Ave and 2 Fountain ave.*-*Getty Station:---site address: 3196 Atlantic Avealternate addresses: 259 Logan St, 3196-3202 Atlantic AvePBS #: 2-600695. according to PBS record, site has/had following tanks:- four 4,000 gal gasoline USTs in-service installed on 03/01/96- eleven 550 gal gasoline USTs installed on 12/01/56 and removed on 02/01/96- one 4,000 gal gasoline UST installed on 12/01/74 and removed on 02/01/96property owner, as per PBS record:Vitucci Logan Corporation101-43 105th StreetOzone Park, NY 11416Ph. Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

(908) 451-0956email: kenneth.j.drake@exxonmobil.com11/23/09-Hiralkumar Patel.10:23 AM:- spoke with Ken. he mentioned that spill was reported based on field observations and are waiting for sample analyticals from lab. soil investigation was done for potential sale of the property.10:31 AM:- spoke with Wendy. they found contaminated soil at depth of about 38-40 ft. they installed wells also and will collect groundwater samples.11:35 AM:- sent email to Ken requiring to submit site assessment report by the end of 12/31/09. email copied to Wendy.01/21/10-Hiralkumar Patel.3:26 PM:- left message for Ken.3:28 PM:- spoke with Wendy at Roux who refused to give any information and asked to contact Ken.3:31 PM:- sent email to Ken inquiring about report. email copied to Wendy.02/04/10-Hiralkumar Patel.9:21 AM:- spoke with Ken about report. Ken mentioned that they are doing investigation on multiple sites as part of their real estate transaction and report is not ready yet. asked Ken to submit scaled site map with sampling locations, boring/well logs and sampling results. Ken will talk to Roux Associates and will call back. asked Ken to submit these informations by end of tomorrow.11:08 AM:- received email from Wendy with lab data summary table and site plan. according to data table, soil samples collected between 32 and 38 ft depth during installation of five moniroing wells (MW-1 to MW-5). no contamination found in soil samples from MW-1, MW-2, MW-4 and MW-5. very minor contamination found in MW-3. site map includes groundwater analyticals and groundwater flow direction. as per site map, groundwater flows in southwest direction. no contamination found in groundwater samples from MW-1, MW-2, MW-4 and MW-5. found high contamination in groundwater sample from well MW-3.soil/groundwater analyticals:
----------MW-3----------MW-3 SOIL at 36-38 ft GROUNDWATER at 36.99 ftEthylbenzene----------286Xylene----------7561,2,4-Trimethylbenzene--------1,320----------1,6501,3,5-Trimethylbenzene----------311----------335Naphthalene----------137----------14202/09/10-Hiralkumar Patel.1:44 PM:- left message for Wendy.1:45 PM:- left message for Ken.03/23/10-Hiralkumar Patel.1:01 PM:- left message for Ken to submit report by end of 03/26/10.1:33 PM:- sent letter to Ken requiring Phase I, groundwater delineation around MW-3 and scaled site map including all former/current tank system and boring/well locations. letter emailed to Ken and Wendy.03/25/10-Hiralkumar Patel.11:24 AM:- received call from Mr. Adrian from Kleinfelder. he will submit recent investigation report by tomorrow.Joel AdrianKleinfelderPh. (845) 567-6530 Ext. 111 (914) 263-4970 (C)Fax (845) 567-6542email: jadrian@kleinfelder.com03/26/10-Hiralkumar Patel.2:06 PM:- received Phase II report (work done by Roux Associates before letter was sent out) from Mr. Adrian. abstract:- Phase I done on 12/29/08- found three RECs: REC-1. current USTs, dispensers and product piping; REC-2 and REC-3. former USTs/former usage as a filling station and REC-4. offsite sources of groundwater

MOBIL STATION (Continued) **S110044776**

impact- installed three wells (MW-1 to MW-3) as part of REC-1- did GPR survey as part of REC-2 and REC-3- installed two wells (MW-4 and MW-5) as part of REC-4- based on soil lithology, the soil at the site predominantly consists of light brown to brown fine sand with some medium to coarse sand, little silt and trace gravel- a subway tunnel lies beneath Atlantic ave- at least one soil sample from each boring was submitted for analysis based on the highest PID reading and/or the observed depth to water- five 2 inch wells installed with 15 ft of screen- well MW-1 was installed to 49 ft bg with screen from 34 to 49 ft bg- well MW-2, MW-3 and MW-5 were installed to 48 ft bg with screen from 33 to 48 ft bg- well MW-5 was installed to 50 ft bg with screen from 35 to 50 ft bg- found high PID readings (1,362 ppm) at 35-40 ft bg during installation of well MW-3- soil sample collected at 37-38 ft bg from MW-1, 32-34 ft bg from MW-2, 36-38 ft bg from MW-3, 34-36 ft bg from MW-4 and at 33-35 ft bg from MW-5- groundwater found between 35.65 and 36.33 ft bg (no information about groundwater depth in each well)- no product found in eight tank field observation wells- groundwater flow direction to the southwest <---------- no anomalies found during GPR survey- no soil or groundwater contamination found in MW-1, MW-2, MW-4 and MW-5- found soil and groundwater contamination in MW-3 (see results above)08/02/10-Hiralkumar Patel.4:06 PM:- spoke with Mr. Adrian about additional investigation work. Mr. Adrian doesn't know anything about that. he asked to send copy of Mar. 2010 letter.4:09 PM:- sent email to Mr. Adrian with copy of the deaprtment's letter dated 03/23/10 and a letter that was received from Kleinfelder dated 03/26/10. asked Mr. Adrian to submit update. email copied to Ken.08/03/10-Hiralkumar Patel.10:39 AM:- received email from Ken. Ken is no longer working in NY and he asked to contact Scott Bushore for NY projects.Scott BushroeExxonMobil - Environmental Services464 Doughty Blvd.Inwood, NY 11096Ph. (516) 239-5388 (O) (718) 734-7450 (C)email: scott.bushroe@exxonmobil.com08/04/10-Hiralkumar Patel.3:54 PM:- received email from Mr. Adrian. he mentioned that on-site wells were sampled on 06/22/10 and report will be submitted in September 2010. Mr. Adrian requested a meeting to discuss the results.1:26 PM:- left message for Mr. Adrian.2:00 PM:- sent email to Mr. Adrian and Mr. Bushroe. asked Mr. Adrian to submit Phase I, groundwater delineation report and scaled site map with all current/former tank systems (including pinping, remote fill ports and dispenser islands) prior to any meeting. asked Mr. Bushroe to submit required documents by end of 08/16/10.2:58 PM:- received call from Mr. Adrian. asked him to refer to earlier email regarding required documents prior to any meeting.08/09/10-Hiralkumar Patel. received message from Mr. Bushroe (at 5:13 PM on 08/06/10).08/10/10-Hiralkumar Patel.10:35 AM:- spoke with Mr. Bushroe. they did sampled wells again but haven't delineated soil/groundwater contamiantion yet. Mr. Bushroe will submit Phase I, scaled site map with existing tank system and approximate location of old tanks (based on Phase I) and work plan for additional invetigation (including work schedule). these documents will be submitted by 08/13/10.08/13/10-Hiralkumar Patel.1:50 PM:- received work plan from Kleinfelder. proposed to install three borings to 36 ft depth and collection of at least three soil samples. work plan doesn't include collection of groundwater samples. also work plan proposed to start work within 60 days of approval, which is not acceptable.3:18 PM:- sent email to Mr. Adrian and Mr. Bushroe requiring to submit revised work plan including collection of groundwater samples also. also informed that report must be submitted

MOBIL STATION (Continued) **S110044776**

within 90 days of approval. asked to submit revised work plan.received Phase I in CD. as per Sanborn maps, site is being used as filing station since 1951 with auto repair shop. CD also included a site map showing location of most recent five dispenser islands, but doesn't include location of old 550 gal tanks and associated piping/dispensers.08/16/10-Hiralkumar Patel.11:32 AM:- sent email to Mr. Bushroe requiring to submit a scaled site map including former 550 gal tank systems, 4,000 gal tank systems and previous borings/wells. asked him to submit site map alongwith the revised work plan. email copied to Mr. Adrian.4:29 PM:- received email from Mr. Bushroe. he mentioned that the former 550 tank system location is not known and nothing shown on GPR results. also, fill ports for recent tanks were on top of tanks. Mr. Bushroe doesn't have 'as built' drawings for the piping so doesn't know where pipes run.09/07/10-Hiralkumar Patel.2:56 PM:- left message for Mr. Adrian.3:00 PM:- spoke with Mr. Bushore. he will talk to Mr. Adrian and asked to submit revised work plan.09/27/10-Hiralkumar Patel.3:04 PM:- received site status update report/work plan from Kleinfelder. abstract:- on 06/22/10, four wells (MW-1 to MW-4) were gauged and sampled- well MW-5 was inaccessible due to parked vehicle- no product found on water- found VOC contamination in sample from well MW-3 only (Ethylbenzene: 89 ppb and Xylene: 248 ppb)- will continue quarterly gauging and sampling, next sampling will occur in Oct. 2010- groundwater was found between 35.70 ft bg (in MW-1) and 36.07 ft bg (in MW-4)- groundwater flows to the northwest- propose to install three borings/temporary monitoring wells (1 inch diameter) to approx. 40 ft bg- borings will be hand cleared to approx. 8 ft bg and then soil will be screened continuously from 8 ft to boring termination- soil and groundwater samples will be collected from boring- samples will be analyzed for STARs VOCs + MTBE via 8260- wells will be installed with 15 ft of screen- temporary wells will be removed and filled with ground following groundwater sampling activities09/30/10-Hiralkumar Patel.4:56 PM:- sent work plan approval letter requiring to submit report by end of 12/10/10.10/20/10-Hiralkumar Patel.7:50 AM:- received email from Mr. Adrian. boring/well installation will occur on 10/27/10.10/25/10-Hiralkumar Patel. received email from Mr. Adrian (at 1:29 PM on 10/22/10). Mr. Adrian mentioned that based on the GPR survey results, they have to move proposed boring locations. Mr. Adrian included a site map with new proposed boring locations.12/06/10-Hiralkumar Patel.11:18 AM:- received call from Mr. Adrian. as the quarterly groundwater monitoring report is due at the end of the month, Mr. Adrian asked if they can combine investigation report with the monitoring report and send at the end of the month. the investigation report is due on 12/10/10. based on available information, approved his request and asked him to submit both reports by the end of 12/31/10.12/23/10-Hiralkumar Patel.11:08 AM:- received report from Jovan Shedd from Kleinfelder. abstract:- advanced three soil borings around well MW-3: SB-1 to 42 ft bg, SB-2 to 44 ft bg and SB-3 to 45 ft bg- installed temporary wells in three borings- five monitoring wells (which wells????) were gauged and surveyed- no free product found in any well- groundwater found between 36.24 ft bg (in MW-1) to 36.91 ft bg (in MW-4)- groundwater found flowing to the southeast (it was found to the northwest during previous investigation)- three soil samples collected each from borings SB-1 and SB-2 and two soil samples collected from SB-3- found high PID readings in all three borings at and below water

MOBIL STATION (Continued) **S110044776**

10-Hiralkumar Patel.4:55 PM:- sent email to Alex Wirth at
Kleinfelder. informed him that the case will not be closed and the
department requires further soil and groundwater investigation. asked
him to submit work plan for complete delineation and corrected boring
log for SB-3 (including PID readings for every two ft depth). email
copied to Jovan Shedd, Joel Adrian and Seth Herman at Kleinfelder.
email also copied to Mr. Bushore at Exxon.01/04/11-Hiralkumar Patel.
discussed with DEC Austin regarding heavy soil contamination on an
ExxonMobil station. Austin mentioned that case should be transferred
to DEC Albany office as part of ExxonMobil work.10:48 AM:- spoke with
Scott at Exxon. they are still negotiating property sale and doesn't
know what will be future use of the property.10:58 AM:- sent email to
DEC Austin with case summary. he will talk to DEC Cozzy regarding
case transfer.01/14/11-Hiralkumar Patel. received email from DEC
Austin (at 5:22 PM on 01/13/11). Austin forwarded email from DEC
Cozzy confirming that DEC John Durnin will handle this project.case
transferred to DEC John Durnin.3:21 PM:- sent email to DEC Durnin and
informed him about case transfer.01/20/11-Hiralkumar Patel. received
a letter from Harvinder Singh from Bolla EM Realty, LLC. Mr. Singh
mentioned that as of 01/19/11, Bolla will assume all responsibility
for the remedial activities.Harvinder SinghBolla EM Realty, LLC.809
Steward AvenueGarden City, NY 11530Fax (516) 512-65561:33 PM:- sent
email to DEC Durnin with copy of letter from Bolla.**need copy of
tank closure report from tank systems removed in 1995.**-- subway
tunnel under Atlantic aveDEC requires: 1) complete delineation of GW
contamination found in MW-3 (to find out source of contamination), 2)

MOBIL STATION (Continued) **S110044776**

scaled site map including entire tank system (including current/former tanks, piping, dispenser islands etc.), 3) may require soil/gw samples in area of remote fill and dispenser islands based on spill #: 9403819.This site has been transferred to John Durnin, Bureau B, Section B. Ownership of this site has been transferred from ExxonMobil to Bolla EM Reality. As per the Bolla 1-19-2011 letter, Arcadis will replace Kleinfelder for the remediation work. (J. Durnin 1-24-2011)The Site Status Update Report (SSUR) for the time period of November 2010 to January 2011 was submitted on by Arcadis on March 28, 2011 and is under review. Arcadis is requesting that this spill be closed. (4/20/2011)The SSUR for the time period of November 2010 to January 2011 and February 2011 to April 2011 were reviewed and discussed with Arcadis on June 30, 2011. Arcadis is requesting that this spill be closed. A site visit during the next groundwater sampling event is scheduled for July 20, 2011. (7/7/2011)The PM visited the site on July 20, 2011 during the quarterly groundwater sampling event. The site status was discussed with Arcadis. The results of this July 20, 2011 sampling round will be evaluated and if there are no increases in dissolved petroleum concentrations in MW-3, Arcadis will provide an Expoosure Assessment and request that this spill be closed. (7-26-2011)Preliminary groundwater samples results from the July 20, 2011 event were submitted which showed no increse in dissolved petroleum concentrations in MW-3. The next Quarterly Site Status Update Report will include a closure request for Spill No. 0908744 with the required Exposure Assessment. (8-30-2011)As a result of a complete project file review including the Site Status Update Report dated September 27, 2011, the following notes are provided for clarification:No information has been found on the location of the former 550 gallon underground storage tanks.The SB-2 soil data, presented earlier in this spill report, is in parts per billion (ppb) but the Soil Cleanup Objectives in 6 NYCRR Part 375 and Table 2 of CP-51 are in parts per million (ppm).Six groundwater sampling events took place over a 20 month period (December 2009 to July 2011). Benzene, toluene and MTBE were not detected in any of the groundwater samples from any of the monitoring wells MW-1, MW-2, MW-3, MW-4 and MW-5.No petroleum contamination at all was detected in the groundwater samples from MW-1, MW-2, MW-4 and MW-5 during the 20 month period.The groundwater sample results from MW-3 show a significant decrease in levels of petroleum contamination over the 20 month period (i.e. ethyl benzene: 286 ppb to 10 ppb, xylenes: 756 ppb to 28 ppb).Based on this review, Spill No. 09-08744 was closed on October 21, 2011. (Durnin 10-21-2011)

Remarks: Soil testing at the above site reveals contaminated soil

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Region:	2
DER Facility ID:	189529
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"Operated as a Mobil as of approx. 10/95. All 550's pulled 5/95 as per Mobil's new PBS report #2-602236. GOC never notified DEC when tanks were pulled or when property transferred. Tank closure report pending. 1/27/2003-Vought-Spill transferred from Rommel to Vought. Vought spoke to Steven Muller and site is currently Mobil Exxon. This spill closed due to historic spill (at least ten years old) and tank overfill spill on concrete. Tanks involved in original spill were removed and replaced by Mobil. Spill closed by Vought.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"Sangesland DDO No Spills or PBS records for this addressSpoke to Susan Mirando. She said this address used to be a gas station over 20+ years ago. She says there are construction workers pulling down the building and they will be putting up 2 houses.Sangesland told her that since there are no reported spills at the site and there is no sign now that a problem exists, there is nothing DEC is able to do about the site. If any contamination is found during excavation, the contractor is supposed to call in the spill. Sangesland told Ms. Mirando that she can call in a Spill if she sees or smells a problem at the site.
Remarks:	citizen concerned with the property next door being developed for residential use - was once a gas station many years ago and is concerned about product in tansks, proper disposal etc. req callback.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

HW Code: 224054
Record Add: 03/27/2007
Record Upd: 08/06/2014
Updated By: GWHEITZM
Site Description: Location: The Union Station (Citizens Branch) Holder site is located at 2940 Atlantic Avenue in Brooklyn, New York in Kings County. The site is 1.3 acres in size. Site Features: The site has been used by Consolidated Edison for commercial uses and a parking lot for vehicles since at least 1965. A two-story brick building is located in the northeast corner of the site.Current Zoning/Use: The site is currently an active Con Edison Service Center, and is zoned for commercial use. The surrounding parcels are currently used for residential, commercial and manufacturing/industrial. The closest residential area is within 150 feet, due west of the site.Past Use of the Site: The first two gas holders (north and center) were constructed in approximately 1887. The center gas holder was dismantled in 1906, and the north gas holder was dismantled in 1908. The southern holder was constructed in 1908 and operated until approximately 1928, then dismantled around 1950. The site was used as a distribution facility. The Con Edison facility removed two underground storage tanks (USTs) in 1998, and as a result of the impacts found in groundwater and soil, a spill number was assigned (98-06522), and remains open.Site Geology and Hydrogeology: The site is underlain by artificial fill and glacial deposits (outwash sands and gravel). The outwash sand and gravel beneath the site consists of coarse to fine gravel with sand, and ranges from 2 to 250 feet in

K - UNION STATION HOLDER (Continued) **S109580117**

thickness. The depth to groundwater is approximately 25 to 30 feet below ground surface (bgs), and general flow direction is to the east-southeast.

Env Problem: There have been multiple spills at the site of petroleum products and one spill remains open, associated with the removal of two USTs in 1998. Both the soil and groundwater contain elevated levels of volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs), with the highest concentrations near the former UST area.The Site Characterization for the MGP area is planned, but delayed due to access issues.

Health Problem: The NYSDOH will evaluate the potential for impacts to public health from exposure to site contaminants once sufficient information from the investigation of the site becomes available for review.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIBBE"LOT WAS A REPAIR SHOP. ACCORDING TO NYCT, LOT CONTAINED APPROX. 20 DRUMS OF WASTE OIL. NYCT WAS SUPPOSED TO START USING THE LOT TODAY TO STORE BUSES, WHEN THEY NOTICED THAT MOST OF THE DRUMS WERE GONE EXCEPT FOR A FEW CRUSHED ONES. THERE APPEARED TO BE STAINING AROUND THE STORM WATER DRAIN ON THE PROERTY. NYCT (SANJIV'S PAGER # 917-651-4670) OBSERVED SERVERAL INCHES OF WASTE OIL IN THE STORM WATER DRAIN. DEP NOTIFIED. DEP REQUESTED THAT I NOTIFY ENCON POLICE.9/29/00 SITE VISIT. MET WITH SANJIV KURAY (NYCT), CECIL MORRIS

SPILL NUMBER 0007586 (Continued) **S104790043**

(CARAVAN TRANSPORTATION), ALDO VASAPOLLI (CONTRACTOR), MARK TIBBE (DEC). MR. VASAPOLLI INFORMED TIBBE THAT THERE WERE SEVERAL DRUMS ONSITE THAT HIS COMPANY TOOK DURING THE CLEANING OF THE LOT. MOST OF THEM WERE EMPTY AND WERE TAKEN BACK TO HIS YARD. ONE CONTAINED WATER, ONE CONTAINED ANTI-FREEZE, ONE CONTAINED WINDSHIELD WASHER FLUID, ONE CONTAINED A LITTLE WASTE OIL AND TWO CONTAINED WHAT APPEARED TO HYDRALIC OR TRANSMISSION FLUID. NONE OF THE DRUMS WERE FULL. ACCORDING TO MR. VASAPOLLI, ALL BUT THE HYDRALIC FLUID WERE DUMPED IN THE STORM WATER DRAIN ON THE PROPERTY. THE HYDRALIC OIL DRUMS WERE PUNCTURED BY THE BACKHOE WHILE IT WAS CLEANING SOME DEBRIS. THE RESULTING SPILL WAS SWEPT INTO THE SAME DRAIN. TIBBE PLACED A CALL TO IRA TURRET (OWNERS ATTORNEY) AND INFORMED HIM THE THE SPILL AND THE DRAIN WOULD HAVE TO BE CLEANED. HE INFORMED TIBBE THAT HE WAS ALREADY WORKING ON GETTING A CONTRACTOR, BUT HE WOULD LIKE A LETTER DIRECTING THEM WHAT TO DO. THE OWNER OF THE PROPERTY IS LAWRENCE GREEN.As per 10/19/00 letter from Ira Turret, the spill was cleaned by Dola Construction.

Remarks: PARKING LOT - NYC TRANSIT WAS SUPPOSED TO OCCUPY THIS TODAY, BUT THERE A LOT OF DRUMS ON SITE - SUBJ MAY HAVE DUMPED THE OIL INTO SEWER

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	Sangesland spoke to Joe Rennie at EnviroTrak. He said the site was MW7 on the West side of Barbey St, Brooklyn. At the time person sampling the well said they had a trace amount of oil on the outside of the bailer. 8270 results showed minor hits for the "benzos" and 8260 was Non-Detect.No additional information was available.
Remarks:	Caller advised that unknown material possibly fuel oil spilled in a monitoring well. Caller also advising that the material possibly came from the adjacent property at 2840 atlantic ave.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"12/10/2004 Reassigned from Sangesland to Sun.10/31/05: Project reassigned from Sun to Andersen. Site needs Stip and RAP. 1/26/06: 1/25/06 meeting with Quantum, NYSDEC, and GSC/Kleinfelder: Additional delineation difficult because of residential area, an RAP will be prepared.2/13/06: Reviewed the quarterly report dated 1/24/06. BTEX concentration in MW-6 is 7,530 ppb. Sent an RAP required letter. RAP due 4/13/06.4/17/06: RAP not received. Sent stipulation agreement. Stip due back 5/29/06.6/26/06: Received a RAP. Vertical delineation around MW6 proposed. Biosolve use proposed. RAP states that MW6 is too close to the tanks and remote fills for the use of chemical injection.6/30/06: Meeting on 6/28/06 with Hess, Quantum, NYSDEC, EnviroTrac and GSC. RAP approved. Stip will be delayed for another triannual sampling period.7/25/06: Received email from Albert Tonn of GSC/Kleinfelder: Please be advised that the soil boring adjacent to MW-6 will be advanced on August 8, 2006.8/15/06: Received email from Al Tonn of GSC/K: "Please be advised that the soil boring was completed on 8/8/06. There were no impacts observed until the water table interface. Therefore, Kleinfelder will proceed with the Bio-Solve injection on 8/22/06, followed by an EFR event on 8/24/06."10/4/06: Reviewed update report dated 9/27/06. Seven wells sampled on 7/20/06. Max BTEX 3,226 (MW4). No MTBE present. Report states that the approved workplan will be"implemented during the third quarter of 2006". 1/17/07: Meeting on 1/16/07 with Hess, Delta, NYDEC. Biosolve injection/EFR in August, September, and October 2006 from MW4 and MW6. 400-600 gallons recovered. 2/12/07: Received the third triannaul 2006 site status report. Biosolve injection and EFR performed in August, September, and October. There may have been some mobilization into MW1. Wells sampled on 12/26/06. Max BTEX 3,405 ppb (MW6). Emailed Hess, Delta asking if additional work is planned (RAP dated 6/23/06 only proposed 3 Biosolve and EFR events), and suggested that EFR should be performed in MW1.3/13/07: Received email from Tim Fisher:"As discussed during the 1/16/07 site review meeting, our approach for this site is to complete March’s sampling event and then evaluate theeffectiveness of the biosolve / EFR events."5/16/07: Reviewed update report. Wells sampled on 3/28/07. Fluctuating concentrations in MW1/MW6. Max BTEX 5,069 ppb in MW1. MTBE ND in all wells. Biosolve/EFR no longer in use? What is the RAP now?5/17/07: Received email from Timothy Fisher :"Since part of the manufactured claims of Biosolve is to increase the bioavailability of the contaminants, we will be monitoring the attenuation of the residual concentrations. As expected, there was an initial increase in dissolved phase (increase in bioavailability), so the plan is to monitor the effectiveness of the injection."5/21/07: Received email from Timothy Fisher:"We intend to complete 2 additional ground water monitoring events in July and November before completing an assessment of the biosolveapplications conducted in August, September, and October 2006. This will provide us a full year of monitoring data which will help us factor in season dissolved concentration fluctuations." 9/21/07: Reviewed site status report. Fluctuating concentrations in some wells. Wells sampled on 7/10/07.

HESS#32518 (Continued) **1000263774**

Max BTEX 4,472 ppb (MW6), MTBE ND. One additional sampling event and then evaluate for additional action. 2/14/08: Reviewed September 2007 through December 2007 Site Status Report. Wells sampled on November 20, 2007. Max BTEX 2,673 ppb (MW6). MTBE ND. Flucutating concentrations in MW6.5/6/08 - Carlson: Reviewed First Triannual 2008 Update Report dated April 30, 2008. Wells sampled on March 28, 2008. Maximum BTEX concentration 8,883 ppb (MW6). MTBE below detection limit. Hess intends to submit a RAP. When will it be submitted? Meeting scheduled for May 7, 2008.9/2/08 - Carlson: Received email from Ed Russo (Envirotrac) indicating that off-site delineation on the adjacent residential property is impossible and that they would like to install AS wells to perform short term AS/SVE. Mark Tibbe (NYSDEC) sent email in response indicating that delineation may be possible in a driveway and that short term AS/SVE is unacceptable. Sent email requesting a site meeting and a formal RAP be submitted.9/17/08 - Carlson: Site visit. Envirotrac will submit a workplan for soil borings/SVE/AS pilot testing.10/3/08 - Carlson: Reviewed workplan submitted by email on 9/18/08 for installation of 3 wells and STRE pilot testing. Approved workplan. Report due by 1/3/09.10/08/08 - Carlson: Received notification that wells will be installed on 10/15 - 10/16/2008. 10/16/08 - Carlson: Reviewed September 2008 Update Report. Wells sampled on 7/2/08. Maximum BTEX concentration 5,850 ppb (MW6). 10/22/08 - Carlson: Meeting with Hess/Envirotrac.2/20/09 - Carlson: Reviewed January 2009 Update Report. STRE were conducted. High effluent PID during pilot testing. RAP for STREs will be submitted. Wells sampled on 11/19/08. Maximum BTEX concentration 6,041 ppb (MW1).3/18/09 - Carlson: Meeting with Hess and Envirotrac. Need to complete review of submitted RAP. Quarterly gauging requested.4/10/09 - Carlson: Reviewed workplan. STRE pilot testing was conducted. Workplan requested two additional quarters to evaluate STRE effectiveness. Sent email requiring a revised workplan in 30 days. The following modifications are required:1) addition of SVE radius of influence for MW4 and MW6 to the site plan2) an additional air sparge well should be installed between AS-3 and AS-13) remedial action should begin immediately upon receipt of NYSDEC workplan approval.5/27/09 - Carlson: Emailed Envirotrac regarding overdue revised workplan.6/5/09 - Carlson: Reviewed May 2009 Update Report. Wells sampled on March 25, 2009. Maximum BTEX concentration 3,294 ppb (MW4). MTBE ND in all wells. Revised RAP overdue.8/19/09 - Carlson: Meeting with Hess and Envirotrac. Revised RAP submission deadline extended to 9/15/09.12/18/09 - Carlson: Revised work plan overdue. Reviewed update report. SVE/AS wells will be installed in January 2010.1/22/2010 - Carlson: Meeting with Hess. Revised RAP will be submitted. 3/11/2010 - Carlson: Reviewed update report. Revised work plan received. 3/18/2010 - Carlson: Approved work plan for installation of 2 additional AS wells and an additional STRE pilot test with new and existing wells.4/6/2010 - Carlson: Notified drilling will commence on 4/13/2010.6/11/2010 - Carlson: Reviewed update report. Wells sampled on 3/31/2010. Maximum BTEX concentration 3,620 ppb (MW6). Air sparge wells AS4 and AS5 installed on 4/13/2010. STRE conducted on 4/23/2010. 9/30/2010 - Carlson: Reviewed update report. Air sparge wells AS4 and AS5 installed on 4/13/2010. STRE conducted monthly. Soil data for AS4 and AS5 included. Soil impact at 40-45 ft.4/21/11 - Obligado - I reviewed the November 2010 Status report. STREs conducted during August and September 2010. BTEX concentrations up to 959 ug/L in MW1. February 2011 update report. No

HESS#32518 (Continued) **1000263774**

short term remediation events were conducted during the 4th quarter. BTEX concentrations were detected up to 3400 ug/L in MW1. Hess to continue STREs.10/21/11 - Obligado - This spill is reassigned back to Sarah Carlson as per Brevdo.2/9/2012 - Carlson: Reviewed November 2011 Update Report. BTEX groundwater impact remains in MW-1, MW-4, and MW-5. STRE conducted in July and September 2011.8/29/2012 - 1Q2012, 5/31/2012, by EnviroTrac. Hess/EnviroTrac requested to abandon monitoring wells MW-2 and MW-3 based on the historical and current groundwater sampling data. Groundwater was sampled 3/16/2012. DTW 31.32 to 34.41'. Flows to southwest. The next sampling will be in 6/2012. Hess will continue with the STRE events. MW-1, 3,605.6J BTEX. MW-2, ND. MW-3, ND. MW-4, 39.3 BTEX. MW-5, 84.9 BTEX. MW-6, 1.6 BTEX. 11/13/2012 - 2Q2012, 8/31/2012, by EnviroTrac. The groundwater was sampled on 6/19/2012. DTW 31.61 to 34.52. Flows to southwest. NO LNAPL. MW-4, 114.9 BTEX, MTBE ND. MW-5, 18.6 BTEX, MTBE ND. MW-1, 998 BTEX. MTBE ND. MW-6, 9.2 BTEX, MTBE ND. The next sampling will be in September 2012. Hess to continue STREs. Based on historical and current groundwater sampling data from MW-2 and MW-3, and based on the fact that both wells are upgradient of site features, Hess proposes to abandon those wells. 1/25/2013 - 3Q2012, 11/30/2012, by EnviroTrac. The groundwater was sampled on 9/27/2012. On 8/6, 9/26/2012, conducted STRE on MW-5 and MW-1. MW-4, 151.2 BTEX, MTBE ND. MW-5, 18.7 BTEX, MTBE ND. MW-1, 3,828 BTEX, MTBE ND. MW-6, 1,055.98J BTEX, MTBE ND. The next sampling will be in 12/2012. Hess to contiune STRE events.9/25/2013 - 1Q2013, 5/31/2013, by EnviroTrac. Groundwater was sampled on 3/11/2013. On 1/4, 2/25, 3/6/2013, STRE on selected wells, i.e. MW-1/AS-3, and MW-5/AS-3. DTW 26.16 to 33.67 feet. Flows to southwest. NO LPH. MW-4, 596 BTEX, MTBE ND. MW-5, 88.9 BTEX, MTBE ND. MW-1, 3,188.3 BTEX, MTBE ND.9/15/2014 - 2Q2014, 9/4/2014, by EnviroTrac. Groundwater was sampled on 6/18/2014. DTW 32.21 to 33.03 feet. Flows to southwest. Hess to continue STRE events. MW-4, 83.4 BTEX. MW-5, 33.2 BTEX. MW-1, 4,500.9 BTEX. MW-6, 63.2 BTEX.

Remarks: STAINING ON SOIL. SAMPLES SUBMITTED TO THE LAB.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "FOLEY"CON ED E2MIS REPORT 4-15-01Found approx. 5gals.unknown oil while looking for fault. Crew to be dispatched to location to do a pressure test on unit. Only oil filled equipment instructure is transformer. 1 liquid sample taken.LSN 01-03698 61ppmDue to no I&A netwrok crew on schedule will be unable to pressure test and drain transformer FOD confirmed fault to be transformer. Unit to be pressure tested and drained on Monday morning. An over 50 tanker will start to remove all liquid from structure.4-16-01 03:00hrs.While on location for cleanup found that this oil is from the transformer. Env. Ops crew and tanker remain on location.0910hrs.I&A netwrok reports that there is more than 10gals. oil in structure. Network crew will start to pressure test and removed liquid from transformer as soon as FOD identify and tag transformer. Transformer has been dropped from FDR 9B08 Dipped unit and found no oil intransformer. Plate on transformer says cap. is 465gals. Tanker pulled out 260gals. in hole.engineer plates was unclear if structure is wewered.There is 205gal.of oil missing from transformer. Transformer holds 465gals. of oil and tanker removed approx. 260 gals. of oil. No water instructure. No sewer connection is visible at this time. Floor ducts visible, no sign of oil in ducts. Does not see any sign of oil in ducts. MH line was also checked and found no signs of oil.Flush crew removed 12 drums of oil soaked solid waste from structure.The dirt line is approx. 2' high from the floor. Emv.Ops crew has approx. another 3-55gal. drums of oil soaked dirt to complete a partial cleanup.Removal of transformer is scheduled for 4-17-01 0700hrs. After TM is removed there will be approx. another 10-55gal. drum of oilsaoked dirt to be remoed.1225hrs.At this time we believe 205gals,of unaccountable oil is soaked in the dirt that is/has been removed from structure. After the cleanup is completed structure will be checked for any major cracks and any escape into the environment.Three more drum sof oil soaked waste was removed. Found floor drain pack with dirt. They removed dirt and found no signs of oil.Cemented floor drain.Crew removed 7more drums of dirt for a total of 22 55-gal drums removed. Double washed structure with Bio Gen 760. Tanker moved additional 100gals. of liquid for a total of 360gals. Liquid removed by tanker.DEF Reactor was removed at 2030hrs. They install new reactor at 2200hrs.
Remarks:	they have to pressure test it before they start clean up - ref #136458 - transformer is not involved in the spill itself per the caller

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	DEC Piper reposnded to site. FDNY was on scene earlier and placed speedy dry down. They recoevered approx 55 gal of #2 and is in a 55 gal drum outside residence. Heavy staining and speedy dry present in boiler room. Mr. Stewart Brebnar ordered fuel delivery and forgot this address was on gas. He will take responsibility for cleanup. Adjacent resident has oil seepage through foundation wall. Piper mailed CSL on 1/29/07- stating additional requirements. 5/14/07- DEC Piper recieved and reviewed closure request. Based on information provided. Site has been cleaned. Spill closed. See e-docs if warranted. 5/23/07 - Raphael Ketani. The woman who owns the property called (917) 803-4296. She wanted an NFA letter. I told her she can go to the public spills website, put in the spill number for the case and see that the spill is closed. She said she will do this.
Remarks:	oil to gas conversion - did not fill the fill pipe with cement Delivered to the oil to the wrong address - were supposed to deliver to a different addressCELL 347-203-6886Oil company guage indicated they pumped in around 100 gallons - HAZMAT pumped out 55 gallons - about 10 gallons in the trap - unknown how much went into the sewer??

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region:	2
DER Facility ID:	268724
DEC Memo:	During excavation to re-develop the lot, two 550 gallon gasoline ust's were uncovered. DC Env. was retained to remove the tanks. A gas-water mix was pumped from the tanks and soil contamination was encountered. A contaminated soil letter was sent. New Owner Maurice Shami- #212-656-1338 Maurice called and stated that DC spilled the gas while conducting the pump out. Maurice requested and was given the names and numbers of 6 additional consultants upon his request.11/17/04-Vought-Spoke to Reza Khanbilzardi who is a consultant (Indertech Consultants 914-329-3440) who is requesting DEC requirements. DEC requires: 1)collection of five endpoint soil samples and EPA Methods 8260/8270 2)collection of one groundwater sample 3)locations of fill ports and pump islands 4)copies of soil disposal manifests 5)site plan with sampling locations.1/12/04Bill Vardy left message 914-329-3440 requesting 10 day extension to submit report. Rommel1/26/05-Vought-Spoke to Reza and he is requesting an additional ten days to submit report. Report will be submitted by 2/8/05.02/08/05Reza called 914-329-3440. He is the engineer representing the owner. He will overnight the report tomorrow. Rommel2/11/04-Vought-Received message from Reza on 2/9/05. Vought returned call and he sent report via FedEx to Rommel. Vought told him to call Rommel on 2/14/05.3/3/05 - Spoke to Reza Khanbilvardi, he is asking a quick review of the closure report. He stated that only minor contamination found with the soil boring and sampling. Need to find the report and get back to him for a determination. - KST3/8/05 - Owner, Maurice, called and begging to review the closure report. I told him that we have not received the report. He will called his consultant to get a copy and hand deliver it to DEC. - KST3/9/05-Vought-Spill transferred from Rommel to Vought as per Tang. Review of Subsurface Investigation Report submitted by InterTech Inc (Reza Khanbilvardi)dated 2/9/05 and received on 3/7/05. Owner of property is Maurice Shami. "The site is vacant land..." "A small excavation (approximate size of 12 ft wide by 16 foot long and 7 ft deep were noticed on the southwest portion of the site." "This is the location of the two empty oil tanks which resulted in above spill number to be issued". Five endpoint soil samples were collected on 12/7/05. One groundwater sample was also collected. "Since all soil samples taken at the site meets recommended soil cleanup objective criteria and semi-volatile compounds in groundwater are not detected, the elevated volatile amount in groundwater could not have been due to any element on the property. It must be noted that an active commercial gas station is on the other corner of Monaco Place and Atlantic Avenue". Report recommends that "we don't believe that any action with respect to soil cleanup is warranted for this site". Site plan shows three proposed two-story buildings onsite. Groundwater at

AKA 31-33 MONACO PLACE (Continued) **S106971540**

depth of 12’ below grade. Groundwater analyticals show 61ppb benzene, 300ppb toluene, 72ppb ethylbenzene, 200ppb xylene and 14ppb MTBE. DEC requires signing of Stipulation Agreement: 1)locations of fill ports and pump islands 2)notification to NYC agencies requesting no development of site 3)determination of groundwater flow direction via installation of three monitoring wells 4)installation of vapor barrier upon development of site 5)installation of passive venting system or performance of soil gas sampling as per NYSDOH guidance upon development of site 6)surrounding area site plan. Vought called Khanbilvardi and left message to return call to DEC. Vought sent Stipulation with above requirements with due date of 4/18/05.3/10/05-Vought-Received message from Reza. Vought returned call and left message to return call to DEC.3/14/05-Vought-Meeting at DEC with Reza and Maurice Shami. DEC will give approval to start construction once we receive and approve plan for vapor barrier and three onsite monitoring wells. No passive ventilation system or soil gas sampling will be required due to clean soil endpoints, lack of basement, relatively minor groundwater contamination and 6’ depth to groundwater.3/15/05-Vought-Received call from Maurice Shami (516-482-0276) and copy of bargain and sale deed which referred to previous owner as:Stephen Carter679 East 98th StreetBrooklyn, NY Vought called Shami and left message to return call to DEC.3/22/05-Vought-Received fax from Inter Tech dated 3/16/05. ...."we came to the decision to do the following: 1)the owner of the above referenced property will install a vapor barrier under the footings and basement floor slabs of the proposed construction on the site. This will be done after the excavation and prior to pouring the concrete of the foundation." "The owner will install three monitoring wells...to determine groundwater flow direction with respect to the above site". "You will provide approval letter to install these wells on the sidewalk". "I appreciate your acknowledgement of receiving this letter and also your consent to it and start of the construction at the site so Mr. Shami can proceed with the construction ". Vought sent out sidewalk permit letter and called Inter Tech to explain that consent to begin construction will not be given until groundwater results are received and groundwater flow direction is determined.3/29/05-Vought-Called Maurice Shami for update on site and left message to return call.3/31/05-Vought-Received call from Reza that wells were scheduled to be installed tomorrow and whether sidewalk permit was needed due to DEC sidewalk permit letter. Vought explained that letter was to effectuate the obtaining of a permit and that the permit was still required from DOT.4/5/05-Vought-Received message from Reza. Vought returned call and left message to return call to DEC. Vought spoke to Reza and he will install wells onsite as opposed to sidewalk so that sidewalk permits are not needed.5/19/05-Vought-Reviewed Investigation Report (Inter Tech) dated 5/17/05 and received on 5/18/05. Installation of three 4-inch monitoring wells. Contractor who installed wells was American Environmental Assessment Corp. Report recommends "....we do not believe that any action with respect to cleanup is warranted for this site. We therefore, request your approval to start the construction project as the owner is patiently waiting for the last 6 months". Groundwater analyticals show: 13ppb ethylbenzene(MW2), 82ppb MTBE(MW2), 120ppb n-propylbenzene(MW2), 72ppb isopropylbenzene(MW2), 440ppb MTBE(MW3). Source of minor groundwater contamination may be from onsite UST excavation (despite clean endpoints) or from upgradient site(due to minor groundwater contamination in well MW2).

AKA 31-33 MONACO PLACE (Continued) **S106971540**

DEC sent letter approving construction of residence with installation of vapor barrier as per 3/16/05 letter and requiring as per 3/9/05 STIP cover letter: 1)surrounding area site plan with possible upgradient sources 2)continued quarterly monitoring of groundwater 3)installation of well downgradient from former tankfield and Boring B1 on sidewalk of Atlantic Avenue 4)submission of PBS registration 5)locations of remote fill and dispenser islands. Vought called Maurice and left message.5/27/05-Vought-Spoke with Maurice and five additional tanks discovered during excavation for building. Maurice is hiring American Environmental to remove the tanks. Maurice will call back with update on tank removal. Maurice returned call and American (631-586-2000 Danny Herzberger) will do tank removal on 6/6/05. 6/1/05-Vought-Received call from Herschberger. Vought returned call and left message to return call.6/6/05-Vought-Received call from Herschberger(516-852-4713). Vought returned call and tanks registered with PBS. Five endpoint samples will be collected and sampled for 8021 plus MTBE and 8270. Dan will call DEC when excavation is complete so that site visit may be scheduled. Received call from Dan that tanks were removed and impacted soil was found. Vought required excavation of impacted soil and called Maurice to restate requirement.6/7/05-Vought-Received call from Herschberger. Vought returned call and American will only be removing tanks and underlying pad. A sixth tank was discovered and Maurice's contractor will be removing contaminated soil. American will be collecting endpoint samples. Vought received call from Maurice and returned call and left message to return and stated requirement of disposal manifests. Vought received second message from Maurice and returned call. 6/8/05-Vought-Received third message from Maurice and returned call. Vought spoke to Maurice and stated requirement of disposal manifests and site visit. Maurice will collect two soil samples and submit to laboratory for analyses to see if further excavation is warranted. Vought advised use of field screening device however due to possibility of saving further cost of excavation Maurice decided to collected samples.6/10/05-Vought-Received call from Maurice. Vought returned call and arranged site visit for Wed 6/15.6/15/05-Vought-Site visit by Vought with Maurice, Dan Herschberger and Reza. Contaminated soil at former UST location and DEC required 1)additional excavation to groundwater 2)collection of four sidewalls and one bottom groundwater endpoint sample 3)installation of vapor barrier(agreed to by Maurice) 4)well installation downgradient from tankfield along Atlantic Ave. Vought also suggested groundwater treatment when excavation was open and boring by Amoco to see if they are contributing source. Vought will send above requirements upon receiving endpoint analyticals.7/26/05-Vought-Called Maurice for status update of site. No work has been performed as of yet due to unable to find contractor. 7/29/05-Vought-Spoke to Gerard Rutigliano (Rutigliano Environmental 516-314-1553) and he may be performing soil removal and vapor barrier installation. Vought approved installation of a 6.mil vapor barrier under building footprints. Four sidewall endpoint and one bottom groundwater sample will be collected.8/8/05-Vought-Called El-Shami, Reza and Rutigliano and informed them of new project manager (DEC Zhitomirsky). Vought spoke to Maurice El-Shami and approved that he install vapor barrier provided that he sent letter in writing to DEC. Vought also stated that vapor mitigation system was not necessary as long as excavation was performed to groundwater (12' below grade).8/8/2005 Zhitomirsky spoke with Maurice Shami and

AKA 31-33 MONACO PLACE (Continued) **S106971540**

requested submittal of soil disposal manifest, drawings showing where the soil was excavated from, drawings and description of vapor barrier installation. Jeffry Voight informed me that he requested from the site owner a description of the vapor barrier. In this case Vought would not require a vapor mitigation system and allow RP to install the vapor barrier himself. AZ8/10/2005 I discussed this site with K.Tang. I told him I am requiring environmental report describing soil excavation with pictures, drawings and disposal manifest. Also, RP should include specifications and drawings for vapor barrier. K.Tang concurred and stated that we can issue permission to start construction and install vapor barrier. K.Tang thinks that 6 mil thickness polyethylane sheeting may be not thick enough and RP consultant should suggest another one. I conveyed this information to Morris Yeroshalmi and provided him with K. Tang phone number upon his request. AZ8/17/2004 KT visited the site on 8/12/2005. He noticed that the excavation could cave in because it is 11 feet deep. He said that there is not much to see in the excavation except gravels and dirt. No petroleum odor, no stained soil. They have put some soil back in the tank pit. He asked a soil sample at the center of the tank pit taken at the water table. He could smell a slight petro odor. Not bad though. Due to safety concern of the side walk on Atlantic Ave side of the excavation collapsing, he told Maurice to go ahead with his construction work and backfill the hole, with the condition that he put down the vapor barrier material (15 mil) below the foundation of the buildings he is putting up.He also told him to compile all the tank removal, soil excavation, wells installation, soil removal activities, soil samples, water samples and the soil disposal manifest in a report for you. He also told him to install 4 wells - 1 on Monaco Pl, 3 on Atlantic Ave. for GW monitor and/or remediation. AZ11/22/2005 I received an e-mail from K Tang. He asked me to issue a letter to Moris Shami (Mfund Company 516-482-0276). I called him and conveyed that as per K.Tang 4 wells should be installed one on Monaco Place and three on Atlantic Avenue. His address is: 1 Linden Place Suite#302 Great Neck, New York 11021.AZ11/29/2005 I called Moris and informed him that he should install 3 wells on Atlantic Ave. and one well between his place and BP station. I confirmed this request with K. Tang. I sent him a letter so he can obtain a permission from DOT to install sidewalk wells. AZ1/18/2006 The owner (Moris) has contacted me. He needed some kind of a letter for the City. I replied that we do not isuue such letters. He is going to proceed with the well installation. AZ4/4/2006 I left a message for owner Moris (516-482-0276). He called me back. Hydro Tech installed wells and is working on the report for DEC. AZ5-11-2006 Left a message for Rachel Ataman (Hydro Tech Environmental). AZ5-16-2006 I contacted Sharissa Singh 718-636-0800(Hydro Tech Environmental). She informed me that Rachel Ataman is no longer handles this project. I conveyed to Ms. Singh that the plume should be delineated and once the delineation has been completed a remedial plan should be sumbitted. AZ5-17-2006 Reviewed the Groundwater Investigation Report prepared by Hydro Tech Environmental Corp., dated April 4, 2006. The report states that VOCs were detected in the groundwater samples obtained from wells MW-1 through MW-4 at concentrations exceeding their respective TOGS standards. The total VOC concentrations at the site range from 1,111 ppb to 523 ppb in downgradient wells. Hydro Tech Environmental recommended groundwater monitoring. After consultation with Koon Tang, I requested delineation of the groundwater plume in the

AKA 31-33 MONACO PLACE (Continued) **S106971540**

southern area of the site by installing two new wells. If contamination is encountered by these downgradient wells, additional wells should be installed to fully delineate the plume. Once the plume has been delineated, a remedial plan to address the contamination should be submitted to DEC. A letter was sent to the RP and the consultant. AZ5-25-2006 I reiterated myc comments regarding the submitted report to the owner Maurice Shami over the phone. AZ10-24-2006 Left a message for the owner Maurice @ 516-482-0276. AZ10/25/2006 Contacted the owner Maurice @ 516-482-0276. He is hiring an environmental consultant American Environmental Co. He will get back to DEC when the consultants are hired. AZ11-5-2007 Contacted the owner Maurice @ 516-482-0276 and requested about the site status. He stated that he thinks that no work should be done at this site. He will contact me with more information ASAP. AZ11-7-2007 Spoke with Maurice Chami (M Fund 45 North Station Plaza Great Neck New York 11021). Mr. Shami is stating that he sold the property but he does not know whom he sold the property to, since the sale was handled by his broker. He will get back to me with this information ASAP. Mr. Shami contacted me later and informed that the buyer is Victor Inwang 31 Monaco Place, Brooklyn, New York 11221. He sold the property in May or June of 2006 (his guess).It is a private dwelling. AZ11-14-2007 Case Initiation Form was signed by Vadim Brevdo and forwarded to John Urda. AZ7-29-2008 J. Urda requested that CSL, STIP are send to RP. I sent drafts of CSL, STIP and CAP to John Urda and V. Brevdo for review. They approved the documents. CSL,STIP and CAP were sent to Maurice Chami- M Fund, 45 North Station Plaza, Great Neck, NY 11021 and Victor P. Inwang 1400 Bedford Avenue, Brooklyn, New York 11216. Copies were sent to V.B and John Urda. AZ8-21-2011 The letter was returned to DEC stating: "Return to Sender unclaimed unable to forward" AZ3-17-2011 As per J. Urda request, STIP, CSL and CAP were resent to Victor P. Inwang 1400 Bedford Avenue, Brooklyn, New York 11216 and send to Victor P. Inwang 583 Eastern Parkway, Brooklyn, NY 11216. AZ4-11-2011 Two letters were returned to DEC stating"Return to sender unclaimed unable to forward." I informed J. Urda about the returned letters. AZ

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department

VENTURE METAL PRODUCTS CORP (Continued) **1001405076**

of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	contact at Petro is:Sangesland spoke to Mr. Karp. Yesterday during a fuel delivery they noticed oil coming through the wall around the fill line. Probably oil in the soil under the sidewalk cement along the remote fill pipe line.Mr. Karp said that Petro would be repairing the pipe, but Sangesland specifically wanted to know who would do the

FACTORY (Continued) **S108956688**

soil digout/remediation once the sidewalk was opened up and the fill line exposed. Mr. Karp said Petro would come back on Nov 20th to make the repairs. There is a chance that the sidewalk fill line is installed through a coal chute into the basement wall and NOT through soil. When Petro opens up the sidewalk on Nov 20th they will call the DEC to confirm that either No soil was impacted OR there was soil impact and they will hire a company to do the cleanup.12/19/08 Spoke with Mr. Karp. Mr. Karp told me the spill in the basement was cleaned up with speedy dry.He has no idea about any soil contamination at the site. I told him to find out exactly where was the leak on fill line and if the leaky portion of the line runs underground through the soil.He said he would contact Petro oil to find out the information. Letter was sent toApex Airtronics Inc2465 Atlantic AvenueBrooklyn, NY 11207-2305Attn: Howard Karp(sr)03/31/09 Performed site visit today. Tank is totally vaulted,i.e can't be seen without taking the top cement off.No PBS registration found though the capacity is above 1,100 gallon. Tightness testing required.As per Mr. Karp, the spill was minor quantity from the fill line in the tank room.Spill was on the concrete floor that was cleaned up by Petro Oil.Fill line has been replaced.No evidence of spill exists in the tank room.I told Mr. Karp to register the tank and have the tightness testing done.(sr)** Case closed as there is no evidence of oil spill present at the site**S.R.

Remarks: FILL PIPE IS LEAKING AND SEEPED THROUGH THE WALL; PETRO ON SCENE

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"1/26/2004 Sangesland spoke to Charlie Schmindgall of Agressive Enviornmental (631-224-1680). He said the old 550 tanks were pulled "several months ago" (no update was made to PBS).PID readings at the time of the pull were 0.Lab results from endpoint samples showed some VOC & SVOC hit.Agressive is preparing a Tank Closure Report, that will show the VOC and SVOC hits are still there. Agressive has NOT been hired to do additional work. DEC will need to direct RP to do this additional work.3/15/04-Vought-Spill transferred from Rommel to Vought.4/13/04-Vought-File review by Vought:Closure Report for the Excavation of Underground Storage Tanks at Service Station (Charles Schmidgall Aggressive Environmental 631-224-1680) January 2004. Removal of twelve (550-gallon) gasoline USTs, and one (550-gallon) waste oil UST. Gasoline USTs were located to the east-northeast of the subject building and the waste oil UST was located directly to the east of the subject building. Thirteen soil endpoint samples were collected (eight from gasoline excavation and five from waste oil excavation). Soil analyticals showed minor PAH exceedences of up to 1170ppb benzo(a)anthracene(S12 7-8'), 1210ppb chrysene(S12 7-8'), 998ppb benzo(b)fluoranthene(S12 7-8'), 1040ppb benzo(k)fluoranthene(S12 7-8') and 1100ppb benzo(a)pyrene(S12 7-8'). No conclusions in report.DEC requires: 1)groundwater sample at former sampling location S3 (to incorporate adjacent former pump island) and a pump island along Pitkin Avenue 2)updated PBS registration.4/13/04-Vought-According to PBS records mailing contact is:Joseph Machia Jr.PJ Christy Inc.121-03 Dupont StreetPlainview, NY 11803Closure report prepared for:PJ Christie Inc.556 Central AvenueBethpage, NY 11714(note:this is the same address as current mailing address for Northland Citgo and as a result the requirement letter sent by DEC will contain BOTH addresses with Joseph Machia Jr. as contact). Vought prepared letter and transferred spill to Sun.4/13/04-Sun-Sent out requirement letter prepared by Vought via certified mail with due date of May 13, 2004.11/18/05-File Update by Sun: Final New Order of Consent was sent to Howard D. Stave, Esq. (Attorney for Northland) on 11/15/05. (Sun)01/03/06-A fully-executed original Order on Consent-effective December 30, 2005 was mailed from DEC's Attorney, John Urda, to Howard D. Stave, Esq. Attorney for the RP. (Sun)01/18/06-Sun sent a letter to Joseph Macchia to remind him that he must submit a Final Site Investigative Work Plan by February 24, 2006. (Sun) 03/14/06-Reassigned this P3 site to Tang. (Sun)03/24/06-Sun approved Site Investigative Work Plan submitted by Berninger Environmental. Per Consent Order, the Final Site Investigation Report is due 06/21/06. (Sun)03/24/06_Reassigned to

CONDUIT GAS & MART INC. (Continued) **U003241859**

Sun. (Sun)07/21/06: The Department approves Site Investigation Report prepared by Berninger, dated 6/19/06. The Remedial Action Plan is due 07/21/06. (Sun)09/11/06-Sun-The Department grants a 45 days extension request to complete the investigation. The Remedial Action Plan must be submitted by October 20, 2006. (Sun)11/13/06-Sun: The Department received the Supplemental Investigation and Proposed Remedial Work Plan on 10/25/06. Review of this report is pending.
(Sun)01/02/07-Sun: Sun approves the Supplemental Investigation and Proposed Remedial Work Plan. The Department requires that the Remedial Work Plan must be implemented by February 28,2007.
(Sun)07/10/07-Sun: Based on Quarterly sampling report taken on 1/15/07, the max BTEX concentration is 25, 830 ug/L in MW-4, including 130 ug/L (Benzene), 2,700 ug/L (Toluene), 4,000 ug/L (Ethylbenzene), 15,000 ug/L (m,p-Xylene) and 4,000 ug/l (o-Xylene). MTBE was Non-detected. Groundwater flow is in southwesten direction. Depth to water table is approximately 20 ft. bgs. No floating product was detected in any well. (Sun)09/10/07-Sun: Based on Quarterly sampling report taken on 5/31/07, the max BTEX concentration is 5,809ug/L in MW-4, including 19 ug/L (Benzene), 790 ug/L (Toluene), 700 ug/L(Ethylbenzene), 3,100 ug/L (m,p-Xylene) and 1,200 ug/l (o-Xylene). MTBE was Non-detected. Groundwater flow is in southeastern direction. Depth to water table is approximately 20 ft. bgs. No floating product was detected in any well. (Sun)10/29/07-Sun: Based on Quarterly sampling report taken on 8/20/07, the max BTEX concentration is 1,473 ug/L in MW-4, including ND (Benzene), 83 ug/L (Toluene), 210 ug/L(Ethylbenzene), 670 ug/L (m,p-Xylene) and 510 ug/l (o-Xylene). MTBE was Non-detected. Groundwater flow is in southeastern direction. Depth to water table is approximately 20 ft. bgs. No floating product was detected in any well. (Sun)07/09/08-Sun: Sun received the Monitoring Report dated May 2008. Total BTEX concentrations ranged from nd to 439 ppb and MTBE concentrations ranged from nd to 24 ppb.
(Sun)

----------07/24/08: Reassigned from Joe Sun to Chanda.8/5/08: Chanda received a Monthly Monitoring Report, prepared by Berninger Environmental, Inc., dated July 2008. This Monitoring Report stated that monitor site wells (MW-1 through MW-5) on monthly basis. No floating product was detected during this monitoring period. Site monitored, DO readings and iSOC operations and maintenance performed on July 01, 2008. (see eDocs)The next quarterly groundwater sampling report will be submitted to DEC by September 2008.9/8/08: Chanda received a Quarterly report prepared by BEI dated August 2008.(eDocs)Based on Quarterly sampling report taken on 8/18/08, the max BTEX concentration is 2,960 ug/L in MW-4. MTBE was Non-detected. Groundwater flow is in southeastern direction. Depth to water table is approximately 22 ft. bgs. No floating product was detected in any well.Next Quarterly Report be submitted to DEC by 12/15/08.10/6/08: Chanda received a Monthly Monitoring Report, prepared by Berninger Environmental, Inc., dated September 2008.5/27/09 This spill case transferred from K. Chanda to J.A. Maisonave. - JAM7/21/09 Received a Monitoring Report for the month of June 2009 submitted by Berninger Env., Inc. dated June 30, 2009. Five wells were gauged and no free product was detected during this monitoring period.I called Walter Berninger and told him that monthly monitoring and quarterly groundwater sampling should continue; however, report frequency can be reduced from monthly to quarterly.

CONDUIT GAS & MART INC. (Continued) **U003241859**

Reports should summarize all monitoring and sampling events for the previous quarter. This includes all sites under the Northland Marketing Consent Order. - JAM9/14/09 Reviewed Groundwater Monitoring Report for 3rd Qtr submitted by Berninger Env., Inc. dated August 31, 2009. On August 7, 2009, Berninger monitored 5 wells for free product and sampled for lab analysis. No free product was observed in any of the 5 wells. Total BTEX concentration for wells MW-1 through MW-5 were, 4ug/L, 80ug/L, ND, 1,111ug/L, and 2ug/L, respectively. MTBE was only detected in well MW-5 at 14ug/L. Well MW-4 had the highest concentration of BTEX and is the well furthest downgradient on-site. Delineation will be required. The next monitoring event is scheduled for November 2009. This report is uploaded to eDocs. - JAM1/25/10 Reviewed Groundwater Monitoring Report for 4th Qtr 2009 submitted by Berninger Env., Inc. dated December 31, 2009. On December 3, 2009, Berninger monitored for free product and sampled five wells for lab analysis. No free product was observed in any of the 5 wells. Total BTEX concentration for wells MW-1 through MW-5 were, 3ug/L, 4ug/L, ND, 1,634ug/L, and 3ug/L, respectively. MTBE was detected in wells MW-1, MW-4 and MW-5 at 14ug/L, 3ug/L and 39ug/L, respectively. Well MW-4 had the highest concentration of BTEX and is the well furthest downgradient on-site. This report is uploaded to eDocs. - JAM2/4/10 Issued letter to Joseph Macchia regarding several spill cases managed under the Northland Marketing Consent Order. The letter, with the excerpt regarding this spill is as follows:"The New York State Department of Environmental Conservation (NYSDEC) has reviewed several quarterly monitoring reports for the above referenced spill cases, which are being managed under an Order on Consent between NYSDEC and the Respondent. Our review has identified a number of problems with the reports and with the way the spills are being addressed. To remedy these problems, the NYSDEC requires the following:1.Groundwater samples collected from all sites should be analyzed for the TAGM 4046 list of petroleum related VOCs (see attached).2.Groundwater sample result summary tables must indicate the proper units of concentration (e.g., g/L, mg/L, etc.) and should include a column totaling the VOC concentrations for each well.3.Groundwater gauging data, including water table elevation, should be included in all reports along with an updated water table contour map indicating the groundwater flow direction determined during that monitoring event.4.The reports should include a discussion of the data gathered during that monitoring event. If an active remedial system is operating at a specific site, then a discussion of system performance should be included.5.The monitoring reports should include an additional section presenting recommendations for future work at the site based on the data gathered during that monitoring event.After reviewing several quarterly reports, the NYSDEC has the following site-specific comments:""586 South Conduit Avenue, Brooklyn - NYSDEC Spill No. 0311992Water table elevations in each well should be calculated for each gauging event and included in each monitoring report along with an updated figure showing groundwater flow direction. Additional monitoring wells must be installed to fully delineate the contaminant plume down-gradient of existing well MW-4."Letter uploaded to eDocs. - JAM3/23/10 Meeting held today at DEC Region 2 Offices to discuss the status of sites included in the Northland Marketing Consent Order. Those in attendance were as follows:Joseph Maisonave, NYSDECJon Kolleeny, NYSDECJoseph Macchia, Northland MarketingWalter Berninger, Berninger EnvironmentalThe discussion regarded items

CONDUIT GAS & MART INC. (Continued) **U003241859**

included in the DEC letter issued to Joseph Macchia on February 4, 2010. Items 1 through 5 should be included in the next quarterly groundwater monitoring reports and all site-specific requirements will be addressed under separate letters. The DEC verbally approved reducing the groundwater gauging/monitoring and reporting requirements from monthly to quarterly events. - JAM7/1/10 Reviewed Groundwater Monitoring Report for the 1st Qtr 2010 submitted by Berninger Env., Inc. (BEI) dated March 31, 2010. On March 8, 2010, Berninger gauged and sampled five wells for lab analysis. No free product was observed in any of the 5 wells. Total VOC concentrations ranged from ND in well MW-3 to 1,343 ug/L in well MW-4. Well MW-4 is the most down-gradient well and is the only will with an iSOC vessel installed. BEI recommends continuing monitoring and maintenance of the iSOC vessel. No monitoring wells were proposed down-gradient of well MW-4, which was required in the DEC letter issued on February 4, 2010. Report is uploaded to eDocs. - JAM10/11/11: This spill case transferred from J. Maisonave to J. Kolleeny. On 10/5/11, received email from Walter Berninger of Berninger Envt'l Inc. (BEI): "Jonathan, I have been reviewing our Northland projects and see that we have been finally reached reductions at 586 South Conduit Ave, Brooklyn site to request site closure on behalf of our client. Please review our latest quarterly sampling results for S. Conduit site and advise if I can submit a formal letter to request closure of spill number. Thanks for your help in resolving this site." After reviewing June 2011 rpt by BEI (in eDocs, as well as March 2011 rpt), on 10/11/11 I sent email reply to Mr. Berninger: "I looked over most recent report I have for 586 South Conduit Ave. site (dated June 30, 2011), and also reviewed site history in our database, and I have several questions. First, I don't seem to have a pdf version of "Supplt'l Investig and Proposed Remedial Work Plan" rpt dated 12/19/06 by BEI. Can you please provide an electronic version of that rpt? Next, I noticed that in Joe Sun's approval letter for remedial plan, dated 1/2/07, he stated that BEI's remedial proposal involved installing a 2-inch well adjacent to well MW-4 for install'n of iSOC gas infusion probe; however, your monitoring rpts indicate that probe was installed directly in well MW-4. Can you explain/clarify this issue?Next, June 30, 2011 rpt states that at a "March" meeting, BEI informed me that subway system is present immediately south and east of site and prevents install'n of a well down-gradient of MW-4, as requested by Joseph Maisonave of our office. I don't recall any meeting in March 2011; we did meet in March 2010, but Joe Maisonave's meeting notes from that occasion do not mention any discussion of subway system preventing install'n of a down-gradient well. Can you please revise site plan to show UST location(s), location(s) of subway, and provide a scale so I can get sense of how far MW-4 is from sidewalk along Pitkin Ave.? Finally, June 30, 2011 rpt includes recommendations for both continued use of oxygen infusion vessel, and for site/spill closure; these two recommendations are at odds, since closure of site/spill would mean approval of No Further Action at site. Has Sept. 2011 GW sampling been performed? If so, I'd like to see results. Also, I think it might be a good idea to remove oxygen infusion vessel from MW-4 and conduct several rounds of GW sampling to confirm that total VOC and total BTEX concentrations remain low without probe in well. Please let me know." - JK10/14/11: After reviewing water table maps in several rpts for this site, sent email to Walter Berninger of BEI: "Dear Mr. Berninger: I've looked at several rpts for this spill site (June 2010, March 2011, June 2011),

CONDUIT GAS & MART INC. (Continued) **U003241859**

and noticed that water table contour map diagram in each rpt uses same depth to water measurements for each well over and over again from one rpt to next, rather than using depth to water measurements taken during monitoring event which is subject of each rpt. As I mentioned recently for another site (4090 Boston Rd, sp0513437), depth to water measurements collected during each quarterly GW monitoring event should be used to calculate water table elevations and generate a water table contour map corresponding to water levels measured during that monitoring event, so each rpt should include an up-to-date water table contour map. Please include up-to-date water table contour maps using latest depth to water measurements in all future rpts for this spill site, and in rpts for other spill sites being managed by BEI. Please let me know if you have any questions." - JK12/05/13: Reviewed Sept. 2013 Mon Rpt by Berninger Envt'l, dated 9/30/13 (in eDocs). Results of gauging/sampling of five on-site wells on 9/3/13 showed no LNAPL detected in any well, and all wells were ND for dissolved VOCs. Based on data, Berninger recommends removal of iSOC oxygen emitter from well MW-4 and closure of spill, but states that until spill closure is approved, they will continue to conduct monthly maintenance of iSOC oxygen emitter and to do quarterly GW sampling, with next event scheduled for Dec. 2013. This site will be discussed at meeting with Berninger & RP on 12/6/13. - J. Kolleeny12/18/13: At 12/6/13 meeting with Berninger Envt'l (Walter B.) and Joseph Macchia (RP), this site was discussed. Prior to meeting, Berninger provided pdf with site plan and GW data table for reference during meeting (in eDocs as "brief"). GW data (from Sept. 2013 Rpt mentioned in above 12/05/13 entry) show no VOCs detected in latest GW sampling event (9/3/13), and good decreasing trends in wells that had impacts leading up to that last sampling event. I asked about down-gradient delineation of impacts in well MW-4 (historically worst well), and Berninger explained that they were unable to install a down-gradient well due to presence of subway tunnel to south of site. I agreed that based on available data, this spill can be closed. On 12/18/13, sent closure letter (in eDocs) to Mr. Macchia, cc to Berninger. - JK

Remarks: they were removing tanks when they noticed a residual of gasoilne from the labrotory data

DEC Memo:	10/29/09-Vought-Primary off-hours responder. Vought called Nova Consulting (Nick Canonico 516-352-3233) and left message to return call to DEC. As per PBS #2-15884, site has one 1500-gallon diesel UST and site owner info is:Mr. Barry FrankensteinWartburg Lutheran Home For the Aging50 Sheffield AvenueBrooklyn, NY 11207Ph: 718-345-2273Fax: (718)485-9236Vought sent TTF with cc to Canonico via email. Spill assigned to DEC Krimgold as site is PBS site. Vought received email reply from Canonico that two tanks failed (one wet and one dry leak). Vought required PBS registration to be updated and that tank with wet leak be emptied immediately to prevent release to soil and or groundwater. Requested confirmation from Canonico that UST will be emptied.01/15/10. J. Krimgold reviewed the letter report submitted by Pro Test Env. dated Dec. 28, 2009. According to the report the tank failed due to the old abandoned fill line. The line was disconnected and tank retested and passed. During line and tank top excavation no contamination was found. Case closed.
Remarks:	underground tank test failure. removal- investigation will be done.

DEC Memo:	1/14/2015 - Feng - Duty Desk. Talked to Larry Vetter of WE Science (631-406-3155, LVetter@VEScience.com). The attorney of the current property owner called him and asked him to review the Phase 2 report. There is a potential buyer, Partner, did the Phase 2 to fulfill the bank, Wells Fargo, requirement for a loan to purchase the property. Before the Phase 2, Phase 1 was done. Some of the historical use of the property has triggered the Phase 2 investigation. In 1908, it was used for iron workshop; 1928-1934, current building was built and used for auto repair shop; 1940-1945, oil company; 1945-1979, wood work facility; 1980-2007, truck garage; 2007-present, Vision Moving and Storage. Under the Phase 2, 4 soil borings were installed with Geoprobe and hit refusal at 3, 12, 16, and 20 feet before encountering groundwater. Regional Groundwater might be at 30-35 feet. There were 2 soil vapor samples, 4 soil samples were collected and analyzed. No groundwater sample has been collected. Benzo-(a)-Pyrene is 2.5 ppm in one of the samples. At this time, the buyer wants the current owner to resolve the problem before any transaction could be done. The Phase 2 report will be sent over.
Remarks:	contact larry for more information - caller advises report says out of 600 samples - 2 samples have elevated reading - cleanup pending

Tank Info:

Tank Number:	01
Tank ID:	21808
Tank Status:	In Service
Material Name:	In Service
Capacity Gallons:	4000
Install Date:	10/01/1982
Date Tank Closed:	Not reported
Registered:	True
Tank Location:	Underground
Tank Type:	Steel/carbon steel
Material Code:	2712
Common Name of Substance:	Gasoline/Ethanol

Tightness Test Method:	21
Date Test:	06/03/2014
Next Test Date:	06/03/2019
Pipe Model:	Not reported
Modified By:	MSBAPTIS
Last Modified:	09/17/2014

Equipment Records:

A00 - Tank Internal Protection - None
D02 - Pipe Type - Galvanized Steel
F08 - Pipe External Protection - Retrofitted Impressed Current
G00 - Tank Secondary Containment - None
J01 - Dispenser - Pressurized Dispenser
B08 - Tank External Protection - Retrofitted Impressed Current

RAM JAN OIL CORP (Continued) **U000404944**

C02 - Pipe Location - Underground/On-ground
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
L99 - Piping Leak Detection - Other
H05 - Tank Leak Detection - In-Tank System (ATG)
E00 - Piping Secondary Containment - None
L07 - Piping Leak Detection - Pressurized Piping Leak Detector
