located in a commercial and residential section of Brooklyn with the zoning designation (R6A residential with a C2-4 commercial overlay), allowing for mixed-use development. Past Use of the Site: According to historical Sanborn maps and regulatory database files for the site, the ground floor and basement of the BCP site were utilized as a dry cleaner from the early 1960s to about 2005. During renovations and improvements to the ground-floor commercial office space and basement, the Applicant observed odors within the basement. The Applicant conducted a Phase I ESA and a Limited Phase II ESA, which revealed impacts in soil and soil vapor likely caused by the historic dry-cleaning operations. As a result, and as a temporary mitigative measure, the Applicant installed a venting/exhaust system in the basement consisting of a false floor and ductwork that vents the space to the exterior of the building via two separate exhaust fans. The Applicant subsequently conducted indoor air sampling. Although no chlorinated solvents were detected in the indoor air sample, the ground-floor commercial office operations were indefinitely ceased on November 2, 2017. The Applicant was adjudged to be a Volunteer on successfully applying to the BCP. The BCP site was subsequently re-occupied by the commercial office operations which consisted of a pediatric health clinic on December 3, 2018 following the installation of SVE wells and associated piping, and restoration of the cellar concrete slab and ventilation/exhaust system. Site Geology and Hydrogeology: Based on the RI and prior investigations conducted on the BCP site, historic fill material, predominately consisting of brown fine-to medium-grained sand with varying amounts of brick, gravel and silt, was encountered from the ground surface to about 4 feet below surface grade in the rear yard located on the western portion of the BCP site. Historic fill material was also observed in the eastern portion of the site to about 4 inches below the cellar slab (bcs). Native soil was encountered below the historic fill material layer and the cellar slab, and generally consisted of brown and gray, fine- to medium-grained sand with varying amounts of silt and gravel. Perched water was observed from 13 to 23 feet bcs. The actual water table is estimated to be some 42 feet bcs.

Env Problem: Based on investigation conducted to date at the BCP site, the anticipated primary contaminants of concern are chlorinated solvents, specifically tetrachloroethylene (PCE) and its degradation products trichloroethene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE) in soil, perched groundwater and soil vapor. Because contaminants of concern were detected near the BCP site perimeter, it is predicted that CVOCs in sub slab vapor may migrate off site under current, remediation, or future conditions. Off site receptor populations may be affected by impacted sub slab vapor via inhalation. Therefore, the BCP site is considered to pose a significant threat to public health and/or the environment.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Update By:	JHOCONNE
Site Description:	Location: The site is located within the densely populated, mixed-use, urban neighborhood of Crown Heights, specifically at 702 Nostrand Avenue, Brooklyn, 11216. The site is bounded by Nostrand Avenue to the east, mixed-use commercial/residential structures followed by St. Mark s Avenue to the north, residential structures followed by Rogers Avenue to the west, and mixed commercial/residential structures followed by Prospect Place to the south. Site Features: The site is comprised of a 0.04-acre parcel that is improved with a two-story mixed-use building with a basement, ground-floor commercial office space, and a second-floor residential tenant space. There is a small yard in the rear of the building. Current Zoning and Land Use: The ground-floor commercial office space is occupied by a pediatric health clinic, and the second-floor residential space is also occupied. The current use is consistent with the zoning designation (R6A residential with a C2-4 commercial overlay), allowing for mixed-use development. Past Use of the Site:

702 NOSTRAND AVENUE (Continued) **S128906206**

According to historical Sanborn maps and regulatory database files for the site, the ground floor and basement of the site were utilized as a dry cleaner from the early 1960s to about 2005. During renovations and improvements to the ground-floor commercial office space and basement, the Applicant observed odors within the basement. The Applicant conducted a Phase I ESA and a Limited Phase II ESA, which revealed impacts in soil and soil vapor likely caused by the historic dry-cleaning operations. As a result, and as a temporary mitigative measure, the Applicant installed a venting/exhaust system in the basement consisting of a false floor and ductwork that vents the space to the exterior of the building via two separate exhaust fans. The Applicant subsequently conducted indoor air sampling. Although no chlorinated solvents were detected in the indoor air sample, the ground-floor commercial office operations were indefinitely ceased on November 2, 2017. Subsequently the first floor was re-occupied by the pediatric health clinic in December 2018 following the installation of SVE wells and associated piping, and restoration of the cellar concrete slab and ventilation/exhaust system. This work was done under the air monitoring and sampling requirements for re-occupation approved by NYSDOH and NYSDEC. An interim Site Management Plan (SMP) has been approved to monitor the existing ventilation system until the final remedial actions are completed. Site Geology and Hydrogeology: Historic fill material, predominantly consisting of brown fine- to medium-grained sand with varying amounts of brick, gravel and silt, was encountered from the ground surface to about 4 feet below surface grade in the rear yard located on the western portion of the site. Historic fill material was also observed in the eastern portion of the site to about 4 inches below the cellar slab (bcs). Native soil was encountered below the historic fill material layer and the cellar slab, and generally consisted of brown and gray, fine- to medium-grained sand with varying amounts of silt and gravel. Perched water was observed from 13 to 23 feet bcs. The actual water table is estimated to be approximately 42 feet bcs. The topography of the land surface suggests that groundwater flow across the site is in a northeasterly direction.

Env Problem:

Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE and breakdown products TCE and cis-DCE in soil, groundwater and sub-slab vapor. Remedial actions have successfully achieved the remedial action objectives to achieve restricted residential use. Residual contamination in the soil, groundwater, and sub-slab vapor is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: Based on investigations conducted, the primary contaminants of concern were chlorinated solvents, specifically tetrachloroethylene (PCE) and its degradation products trichloroethene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE)in soil, groundwater and sub-slab vapor. Soil - Sampling from four soil borings revealed PCE at a maximum concentration of 94 parts per million (ppm), compared to the applicable restricted residential soil cleanup objective (RRUSCO) of 19 ppm and the protection of groundwater (PGW) SCO of 1.3 ppm. Breakdown products namely TCE and Cis-1,2-DCE exhibited similar exceedances. Several SVOCs were detected at concentrations above the RRUSCOs, with benzo(b)fluoranthene being the highest at 3.2 ppm compared to the RRUSCO of 1ppm. No metals, pesticides or PCBs were detected at concentrations exceeding their respective RRUSCOs. Data does not

702 NOSTRAND AVENUE (Continued) **S128906206**

	indicate any off-site impacts in soil related to this site. Groundwater - The VOCs detected at concentrations exceeding ambient water quality standards (AWQS) included PCE at 64 parts per billion (ppb), TCE at 9.3 ppb and cis-1,2-DCE at 22 ppb. Each of these compounds has an individual AWQS of 5 ppb. Petroleum related VOCs were also detected in groundwater at elevated concentrations. Emerging contaminants were detected at concentrations below the existing screening level. Sampling data from the perched groundwater does not indicate any off-site impacts in groundwater related to this site. Soil Vapor and Indoor Air - Two sub-slab soil vapor samples revealed elevated concentrations of PCE (maximum concentration 30,000 micrograms per cubic meter, or ug/m3), TCE (8,120 ug/m3) and cis-DCE (5,750 ug/m3). Air samples collected from within the first floor of the on-site building did not detect PCE or its breakdown products. Data indicates that additional investigation is needed to further evaluate soil vapor intrusion off-site.
Health Problem:	Measures are in place to control the potential for coming in contact with residual subsurface soil, groundwater, and soil vapor contamination on the site. Environmental sampling indicates soil vapor intrusion may be a concern for offsite properties.

DEC Memo:	While removing a 10k tank a quantity of contaminated soil was found contractor doing work - Yellowstone environmental - 516-485-0000 contact michael alletto (supv).
Remarks:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY 11/03/05: This spill transferred from J.Kolleeny to S.Kraszewski. 11/30/05: Reviewed Post-Excavation Site Assessment Report prepared by Laurel Environmental Associates, LTD. dated October 2003. Six end point samples were taken from the bottom of the excavation site and the fill port area. PID readings detected volatiles in three of the samples. Lab analysis revealed that four of the samples contained SVOC concentrations above RSCO standards. Samples SB-1 and SB-6 contained two SVOCs marginally above RSCOs. Samples SB-5 and SB-7(fill port) contained 4 to 5 SVOCs significantly above RSCOs. No VOCs were detected by laboratory analysis. - SK 03/22/06: This spill transferred to K.Tang - SK 12/3/07: Spill transferred to J.Kann. Investigative Work Plan submitted on 11/5/07 and under review. J.Kann 7/22/14: J.Kann - based on review of file and the IWP, I sent out an email approving the IWP. No permanent wells are necessary - minimal impacts were noted and minimal stained soils seen in the tank removal photos in the file. Final SIR due to the Department by 1/22/15. 12/30/14 - J.Kann - part of multi site stip and SIR is due 3/14/15. 6/2/15: J.Kann - Remedial Investigation Report received on 5/3/15. Report reviewed. 5 borings advanced, 2 groundwater samples collected. All detections below CP51 RSCOs and TOGS 1.1.1. Spill closed. NFA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 1/14/2004 Sangesland spoke to Ray Lara at PTC. Boro Fuel made a Miss Delivery to a house that appears to have converted to gas. Most of the spill was outside (PTC cleaned this up). There was no access to the basement, a legal eviction notice was on the door. Through the window, PTC could see a possible oil red stain on the wall. According to City Tax records property taxes on this house have not been paid in over 12 months. The property owner is: Claudette Davis ..... No phone number was listed 65 kingston Ave, Brooklyn, NY 10/29/04 - Sawyer - Received from Jeff Cone at Boro Fuel 718 854 7500 detailed information on the cleanup. Boro subcontracted PTC for the cleanup and no subsurface investigation was needed. Minor spill quantity released. No further action required. Closed.
Remarks:	CLEANUP PENDING.

HW Code: C224293
SWIS: 2401
Town: New York City
Record Added Date: 04/02/2019
Record Updated Date: 05/17/2019
Update By: LSZINOMA
Site Description: Location The Site is located in the Bedford Stuyvesant section of Kings County and is comprised of a single tax parcel totaling 7,650 square feet (0.175 acres). The Site is located in the City of New York and Borough of Brooklyn. The Site is irregular in shape with 96.87 feet of frontage along Atlantic Avenue and 128.25 feet of frontage along Classon Avenue. The north and west sides of the property are bordered by multi-unit residential buildings. The south side is bordered by Atlantic Avenue and the east side is bordered by Classon Avenue. Commercial properties including a gas station, storage facility and refrigerator manufacture are present along the south side of Atlantic Avenue. A tire shop and church are present along the east side of Classon Avenue. Site Features The Site is developed with a gasoline filling station with a single-story auto repair shop with three service bays and three dispenser islands in the south and east portions of the Site. There are three underground storage tanks registered to the property and which remain in use including: a 4,000 gallon diesel fuel tank, a 12,000 gallon gasoline tank and a 6,000 gallon gasoline tank. Fifteen 550 gallon tanks were previously removed from the property in 1999. Current Zoning and Land Use The property is currently zoned R7A with a C2-4 commercial overlay. Residence districts are the most common zoning districts in New York City, accounting for about 75 percent of the city s zoned land area. These districts accommodate an extraordinary variety of residential building forms - ranging from the single-family homes set amid wide lawns on the city s outskirts to the soaring towers of Manhattan. All residence districts permit most community facilities, such as schools, houses of worship and medical facilities. In certain districts, the maximum permitted floor area ratio (FAR) for community facilities exceeds the maximum permitted FAR for residential uses in order to accommodate needed services, such as medical centers or schools. Contextual districts are designed to maintain the scale and form of the city s traditional moderate and higher-density neighborhoods. These districts, which have an A, B, D or X letter suffix (R6A, R6B, R7A, R7B, R7D, R7X, R8A, R8B, R8X, R9A, R9D, R9X, R10A and R10X) are mapped where buildings of similar size and shape form a strong neighborhood context, or where redevelopment would create a uniform context. The bulk regulations for these districts are known as Quality Housing regulations. Commercial activities in the city are permitted in eight commercial districts based on their functional similarities and locational requirements. Small retail and service shops in C1 and C2 districts serve the immediate needs of surrounding residential communities. Some C1 and C2 districts are mapped as overlays, usually within low- and medium-density residential neighborhoods. In these districts, residential bulk is governed by the residence district within which the overlay is mapped, whereas all other commercial districts that permit residential use are assigned a specific residential district equivalent. In all mixed buildings, commercial uses must be located below any residential use. The planned residential use of the building will be in full compliance with the R7A/C2-4 zoning. Adjacent land use includes multi-family residential properties to the

1015 ATLANTIC (Continued) **S125298837**

north and west, a warehouse and tire shop to the east and a gas station, storage facility and refrigerator manufacturer to the south. The area surrounding the property is highly urbanized and predominantly consists of commercial buildings with mixed use (retail / residential) buildings north of the Atlantic Avenue corridor and commercial/ industrial properties, lightly interspersed with residential properties to the south. There are three schools located within 1,000 feet of the Site including the Brooklyn Prospect Charter School located approximately 550 feet to the northeast and the Brooklyn Waldorf School located approximately 998 feet to the north-northeast. There were no nursing homes or hospitals identified within 1,000 feet of the Site. Past Use of the Site The environmental history of the subject property was previously investigated through the review of Federal and State Environmental databases, Environmental Sanborn Fire Insurance maps, NYC Department of Building records and the NYC Department of Finance databases. Historically, the property has been used as a gas station since 1961. Prior to that, it was occupied by a diner since at least 1934. The Requestor purchased the property in November 2018. Site Geography and Geology Subsurface soils at the Site consist of historic fill materials to a depth of approximately 5 to 10 feet below grade followed by native silty-sand and clay. According to the USGS topographic map for the area (Brooklyn Quadrangle), the elevation of the property is approximately 88 feet above mean sea level. The topography within the immediate area slopes gradually to the northeast. Groundwater occurs beneath the Site at a depth of approximately 70 to 75 feet below grade. Based on regional groundwater flow maps the site is located near a groundwater divide though flow would be expected to be generally north-northeast. The Site is not located within a designated flood zone area.

Env Problem: Nature and Extent of Contamination: Based upon investigations conducted to date, the primary contaminants of concern for the site include petroleum related volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Soil VOCs including m&p-Xylene was found in soils 18 20 inches (shallow soil) below grade surface (bgs) around the center of the site. The maximum concentration of Xylene was found at and 310 parts per million (ppm) compared to restricted residential soil cleanup objectives (RRSCO) of 100 ppm. Toluene was found in shallow soil around the center of the site. The maximum concentration of Toluene found on site was 250 ppm compared to RRSCO of 100ppm. Lead and Barium (metals) were also found in shallow soil at the south-eastern corner of the site. Lead was found at concentrations of 817 ppm compared to RRSCO of 400 ppm. Barium was found at concentrations of 799 ppm compared to RRSCO of 400 ppm. Groundwater No groundwater data was collected to date Soil Vapor No soil vapor data was collected to date

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	11/7/18 - Obligado - DEsk Duty - Gross dry leak. They are putting together a proposal to isolate repair and retest. Underground 1000 gallon tank. Multifamily home. EBI consulting - Kenneth Lukas, 631 456 3972. 12/03/18 - Lakhani Spoke to Chris, 347-723-3298, who informed that the site is being refinanced. The building is currently undergoing conversion from oil to gas. The 1000 gallon will be abandoned in-place. The tank has not passed a tightness test yet. DEC Lakhani suggested that the oil be removed from the UST and put in a temporary tank for use during the conversion. Deadline extended to 12/17/18. 12/18/18 - Lakhani Chris emailed to inform that a new boiler was installed on 12/17/18, converting from oil to gas. As for the underground tank, Boro Waste Oil will complete the job today discarding the remaining oil and taking the tank out of service. 12/24/18 - Lakhani Chris submitted the tank affidavit for the removed tank. 12/28/18 - Lakhani Chris submitted the disposal manifest for the oil pumped from the 1080 gallon UST. Spill is closed.
Remarks:	dry leak - repair and retest

Spiller Company:	1010 PACFIC ST LLC-MOTTY BINIK
Spiller Address:	1010 PACIFIC STREET
Spiller Company:	999
Contact Name:	KEVIN BRUSSEE
DEC Memo:	btex compound in soil
Remarks:	8/12/2020 - Feng - Desk Duty in office. Called EBC and left call back info. Environmental Business Consultants Kevin Brussee 631-504-6000 x114 KBrussee@EBCIncNY.com Zhune-Spoke to Kevin Brussee of Environmental Business Consultants. It is an OER project. They did a Phase 2 and found one soil sample of the boring at 0-2 feet sampling depth show exceedances of BTEX and related gasoline compounds. Additional delineation has been done around that boring and found only some minor exceedance and mainly naphthalene. The OER RAWP is not approved yet pending on the spill reporting. The RAWP calls for excavation of the soil down to 12 feet for 90% of the celler. They will excavate down 4-5 feet and then 45 degree sloping for the rest of the depth excavation. The site is 200'x100' in size. They will submit spill closure report upon the completion of the excavation and collecting the endpoint samples. He will forward the link for the OER reports. Spill is assigned to V. Zhune. Kevin Brusee(cell) 631-338-1749 10/27/20- Kevin Brusee sen the following email The developer anticipates starting immediately after the DOB plans are approved. He is expecting the start date to be in January. 10/27/20 Kevin Brusee emailed the phase I and phase II Phase 1 ------- Environmental Planning & Management performed the phase I. The Phase I ESA Repor (dated February 13, 2015) identified the following Recognized Environmnental Conditions: Building cellar. Historic use. Vacant lot Off-site impacts. Ground Penetrating Radar (GPR) Survey ---------- No indication of a subsurface tank were identified in the area of the cellar. However, ananomaly with the approximate dimensions of a 10,000 gallon tank was found within the vacant lot in the location of the gasoline tank identified in the phase I ESA. Phase II ---------- On march 14, 2015, AARCO Environmental Services Corp. (AARCO) installed six (6)soil

CON EDISON (Continued) **S116043817**

borings under the supervision of an Integral geologist. Soil Analytical Results and Analysis. The results from the soil samples were compared to the New York State Department of Environmental Conservation (NYSDEC) CP-51 Unrestricted Use Soil cleanup Objectives (SCOs). VOCs ------ No unrestricted Use SCOs were exceeded for VOCs in the soil samples. However, several VOCs were detected at lower concentrations: acetone, ethylbenzene, naphthalene (an SVOCs), xylene, and toluene. The detection of these compounds in the borings immediately adjacent to the suspected gasoline UST on the vacant lot (SB-3, SB-4 and SB-5)could indicate a historic release from the tank; however, it is likeky that, if a release had occurred, it was relatively minor in nature due to the low concentration in the samples. SVOCs ====== Seven (7)SVOCs were detected above unrestricted Use SCOs in the shallow soil samples (5-10 ft)below ground surface (BGS)of two borings SB-4 and SB-5 (both near the vacant lot gasoline UST). However, all concentrations were within one order of magnitude of its SCO. Low levels of SVOCs found within these two borings could be attributed to the placement of historic fill. Metals ======== Concentrations of lead, mercury, and nickel exceeded their respective SCOs in three of the borings advance on the local lot. Similarly to SVOCs the presence of low levels of these metals could be attributed to the placement of historic fill. PCBs ====== NO PCBs were detected in any of the soil samples. Please see attchedment B for the table of all detected compounds and attachment C for the full laboratory report. 3/5/21-Zhune - Kevin sent the following email Two crushed 275-gallon aboveground storage tanks and some other metal structure were found at 1010 Pacific Street, Brooklyn, NY in the hotspot area that high VOCs. Picture provided below. The hotspot is being excavated and loaded into trucks for transport to Clean Earth of North Jersey. Leszek I don t think either tank needs to be recorded with the DEC on a PBS Application or a Pre-Work Notification is required because they are both aboveground tanks that someone crushed and used as backfill, but I wanted to check to make sure. The VOC hotspot was previously delineated with insitu soil borings/samples and the hotspot will be excavated to at least the boundaries of the delineation samples, but we ll be collecting some soil samples from the area after it is excavated as a pre-caution . 4/9/21-Kevin Brusee emailed the Remedial Investigation Report A summary of the subsurface Investigation performed by Integral Engineering P.C. in February of 2015 and the Remedial Investigation performed by EBC in January and February of 20920 is summarized below. Imtegral Engineering P greater than C greater than performed the following scope of work within the boundary of Site in May of 2015: 1. Installed six soil borings and collected eleven soil samples and one duplicate for chemical analysis from the soil borings to evaluate soil quality. 2. Performed a GPR survey. EBC performed the following scope of work within the boundary of Site in January and February of 2020. 1. Conducred a Site inspection to identify AOVs and physical obstructions (i.e. structures, building etc.): 2. Installed nine soil borings(SB1 through SB9) and collected eighteen soil samples and one duplicate for chemical analysis from the soil borings to evaluate soil quality; 3. Installed two groundwater monitoring wells, One of the monitoring wells was dry, and very little water was present in the second monitoring well. The third monitoring well was not attempted. Therefore, only one groundwater sample could be collected for chemical analysis of VOCs to evaluate groundwater quality; and 4. Installed one sub-slab soil gas implant (SG1) and collected one

CON EDISON (Continued) **S116043817**

sub-slab soil gas sample, and installed seven soil vapor probes (SV1 through SV7) and collected seven soil vapor samples for chemical analysis. . Eight VOCs were detected above UUSCOs in one shallow soil sample (B6(0-2)) including acetone (maximum (max.)of 2,500 ug/kg), benzene (at 72 ug/kg), ethlylbenzene at (4,000 ug/kg), m&p-xylenes (max. of 17,000 ug/kg), Naphthalene (max. of 25000 ug/kg)o-Xylene (at 6,100 ug/kg), tetrachloroethene (at 1,500 ug/kg)and Toluene (max. 64,000ug/kg. Several additional VOCs were detected at trace concentrations within several soil samples; . Seven SVOCs including Benzo(a)anthracene (max.of 7,500ug/kg, Benzo(a) pyrene (max.of 12,000ug/kg,Benzo(b)fluoranthene (max.9,200 ug/kg), Benzo (K) fluoranthene (max. of 7,100 ug/kg), Chryzene (max. of 7,700 ug/kg), dibenz (a,h) anthracene (max. of 2,700 ug/kg), and indeno (1,2,3-cd) pyrene (max. 9,100 ug/kg)were detected above RRSCOs; . Two Pescticides including 4,4'-DDE (at 4.2 ug/kg and 4,4'DDT (max. of18 ug/kg) were detected above UUSCOs. No pestices were detected above RRSCOs. . On PCB, PCB-1254 (at 2,000 ug kg) was detected at the RRSCO of 2,000 ug/kg. . Seven metals including cadmium (max. 7.6 mg/kg), Chromium (max. 550 mg/kg), Copper (max of 104 mg/kg,lead (max.of 719 mg/kg)mercury (max.of 3,01 mg/kg), nikel (max.of 86.1 mg/kg)and zinc (max. of 1,310 mg/kg were detected above UUSCos. Of the detected metals, cadmium, lead, and mercury were detected exceeding RRCOs . Five PFA compounds were detected in the sample for a total of 1046 ug/kg Groundwater ---------- Groundwater samples results were compared to New York State 6 NYCRR Part 703.5 class GA groundwater quality standards (GQS) . Two VOCs, acetone (at 52 ug/L) and methylene chloride (at 54 ug/L) were detected above their respective GQS. Soil Vapor ---------- Figure 8 shows the location and posts the values for sub-slab soil gas and soil vapor samples with detected concentrations. The sub slab soil gas and soil vapor results collected during the Remedial Investigation were compared to the compounds listed in Table 3.1 Air Guidance Values derived by the New York State Department of health (NYSDOH) located in the NYSDOH Final Guidance for Evaluating Soil Vapor Intrusion, dated October 2006 and the revised NYSDOH Decision Matrices dated May 2017. . The sub slab soil gas and soil vapor results indicated low levlesl of petroleum related VOCs and low levels of chlorinated VOCs: . Total concentrations of petroleum-related VOCs (BTEX)within the eight soil vapor /gas samples ranged from 0 ug/m3 to 1.81ug/m3. . The chlorinated solvents detected include 1,1,1,-trichloroethane (TCA)at a concentration of 2.20 ug/m3 in one of the eight samples, carbon tetrachloride ranged from 0.22 ug/m3 to 0.4 ug/m3, tetrachloroethene (PCE) at a concentration of 0.33 ug/m3; . The chlorinated VOs 1,1-dichloroethene, cis-1,2 dichloroethene, methylene chlorine, trichloroethene (TCE)and vinyl Chloride were not detected within any of the soil vapor samples . All chlorinated VOCs were detected below the monitoring level ranges established within the NYSDOH soil vapor guidance matrix. 3/31/21- Zhune- Kevin Brusee sent the RAWP dated April 2020 approved by the office of environmental Remediation. 5/8/21-Zhune-Kevin Brusee sent the Spill Closure Letter dated March 11, 2021. Conclusions ---------- Gasoline related VOCs were detected above Unrestricted Use SCOs within a surface (0-2 ft)soil sample collected in the northeast of the property. Delineation sampling indicated the impacted area was smaller than 20ft by 20ft area. On March 5,2021 a25ft by 45 ft area was over excavated and transported to Clean Earth North Jersey for proper off site disposal. No PID or olfactory evidence of petroleum soil was observed after the

CON EDISON (Continued) **S116043817**

excavation was completed, and the laboratory results of endpoint soil samples collected after the excavation was completed indicate all of the petroleum impacted has been removed. Spill Closed.

DEC Memo:	CONSTRUCTION SITE; C/U PENDING
Remarks:	08/13/21-Hiralkumar Patel. alternate address: 963-965 Atlantic Ave no PBS or other spills found. 6:22 PM:- spoke with Shaya. he mentioned that during excavation of new building foundation, crew noted a 550 gal tank in ground. 08/16/21-Hiralkumar Patel. 9:34 PM:- spoke with

LOT 80,TAXBLOCK 2019 (Continued) **S121796965**

Tom at EBC. he mentioned that during excavation for new building foundation, crew found a previously unknown tank at a depth of 12 ft bg. during excavation, crew thought tank top as just a piece of metal in the ground and tried to pulled it out which caused damage to the tank. mostly water, with petroleum odors, spilled onto excavation surface. the impacted soil has been removed and stockpiled on plastic. the remaining tank is still in ground and will be removed after pumping remaining liquid. Tom stated that endpoint samples will be collected after tank removal. Thomas Gallo EBC, Inc. PH. (516) 972-5354 email: tgallo@ebcincny.com 963 Holdings LLC. **property owner** c/o NY Developers & Management **construction management company** Attn.: Shaya Mehring **on-site construction project manager** PH. (718) 541-5749 email: smehring@nydevelopers.net 10:09 AM:- sent email to Mr. Mehring and asked him to submit site map with tank/sample locations, endpoint sample results and disposal manifests for review. email copied to DEC Piper and Tom. case assigned to DEC Piper. 9/8/22- DEC Piper received and reviewed spill closure report. 1080 tank and 50 yds of soil removed. Endpoints were clean of VOCs. Low level SVOCs . Spill closed. Report is in DEC Docs.

DEC Memo:	found two 550 gal ust/tanks removed/loss of product to soil/clean up crew enroute
Remarks:	3/31/2014 - Feng - Called EBC and spoke to Kevin (631-504-6000, kbrussee@ebcincny.com). It is an empty lot and they are doing excavation for development. They came across (2) 550-gallon gasoline USTs. The USTs were abandoned with water but some residual oil is on top of the water. They tried to lift one and broke the UST and the water spilled out. They have tank remover ABC to come to remove the tanks and have them to excavate the impacted soil. The excavation is at 2 feet at this time for this area, which aimed for future parking lot and was not planned for much excavation. But at this time, they plan to excavate as much as possible to remove the impacted soil and will collect endpoint samples. The other portion of the site have been excavated and no impacts have been encountered. This is also a NYCOER project. The owner is Cecily Norton 435-757-6268. 4/21/16- DEC Piper received and reviewed closure report. Based on work t o date no further action is granted. This spill is closed. See Dec Docs for report if warranted. Closed.

DEC Memo:	ust tank found during excavation some product lost to soil all contained and placed on plastic sheathing final disposal pending
Remarks:	6/29/22-Lin-Office closed and unable to reach caller. 7/5/22-Lin-Address corrected to 1499 Bedford Ave, Brooklyn. They found a 275 gallon UST (suspected to be a waste oil tank) during excavation. There was contamination beneath the tank and they dug down to 11' bgs and collected endpoint samples. They have backfilled the area for construction site safety and they will go down to 15' in

1499 BEDFORD LLC (Continued) **S128912551**

that area for the cellar. This is a E designated site and they are in the city's VCP program. OER PM is Taylor hart (VCP#22CVCP008k). They will send endpoint samples results to DEC piper. Phone number for RSK environmental group is 718-438-2200 ext 205. 4/18/23- DEC piper received closure documentation. Based on work to date, removal of 3 275 gal USTs, this spill is closed. No further action is granted. See reports in DEC Docs if warranted.

DEC Memo:	1 PINT OIL ON 5 GALS OF WATER. NO TO ALL 5 QUESTIONS. SPILL COMING OFF 24 HR PROGRAM DUE TO LACK OF RESOURCES. CON ED REF # 156133.
Remarks:	e2mis no. 156133: 11/5/04 11:20 HRS ENV OPS C. LUGO #03594 ENV OPS REPORTS FINDING APPROX 1 PT OF UNKNOWN OIL ON APPROX 5 GAL OF WATER IN V4724. THIS WAS FOUND WHILE ATTEMPTING TO CLEAN STRUCTURE FOR BQE WHO WAS THERE TO REPLACE A SUMP PUMP ON ACCT#C3275. THE SOURCE AND CAUSE OF THE SPILL IS UNKNOWN. THERE WERE NO SUBSTANTIAL CRACKS IN THE STRUCTURE AND THE STANDING WATER HAD NO MOVEMENT. THERE DID NOT APPEAR TO BE ANY SEWER CONNECTIONS AND THERE IS A CONCRETE SUMP. ENV STOP TAG# 45119 WAS PLACED AND ONE LIQUID SAMPLE TAKEN ON E PRIORITY FOR PCB ANALYSIS ON CHAIN OF CUSTODY# DD11404. HISTORICAL RECORDS INDICATE PCB 1PPM DATED 11/29/01. THE BQE CREW ON LOCATION WAS ADVISED TO PRESSURE TEST THE UNIT. CLEANUP IS PENDING LAB RESULTS. UPDATE 11/5/04 12:59 HRS BQE J. GUARDARRAMA REPORTS THE UNIT PASSED THE PRESSURE TEST. Lab Sequence Number: 04-09232-001 TOTAL PCB: 83 ppm Saturday, November 06, 2004 9:12 PM An Environmental Crew made up of A. Gladowski, R. Vega and R. Esponda completed the cleanup of VS 4724 on 6 Nov 04. The structure was double washed with 5 gal. Biogen 760, 5 gal. of Biogen 715 and 5 gal. bulldog. 110 gal. of liquid were removed via Astoria >50 tanker. Three drums of debris were removed and brought to 3rd Ave Yard via the 'one trip rule'. The sump was found cemented. Environmental stop tag # 45119 was pulled from the

DEC Memo:	UPON EXCAVATION OF 12 (550) GAL TANKS SOIL CONTAMINATION WAS DISCOVERED. 200 CUBIC YARDS OF IMPACTED SOIL WAS REMOVED AND POST EXCAVATION SAMPLING COMPLETED AND AWAITING DATA.
Remarks:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL C 04/12/04 TRANSFERRED FROM ODOWD TO ROMMEL March 22, 2006, Jones, no recent work done on this site. Contacts provided in spill report unsuccessful. March 29, 2006, next step, establish contact with current site occupant. 5/22/2006 - Mike Scibel - Current Occupant is McDonalds, property shark reveals owner as an Mmb Associates, reverse phone directory has no listing for address given by property shark. Currently can not contact owner. From file DEC requested 3MW's, soil delineation and documentaion in 2000. Need to find if those tests were performed. Needs additional work. 2/23/10 - Austin - Reassigned to Ketani to followup and bring spill to closure - end 3/3/10 - Raphael Ketani. I restarted the management of the spill case. The spill was called in on 3/19/1998 due to the discovery of contaminated soil while removing gasoline tanks from this former gas station. The caller was Marc Godick of Lexicon Environmental Associates (516) 488-8742. Twelve 550 gal. gas tanks were removed. They appeared to be in good condition. The source of the gas was believed to be the pump island. Initially, 200 cubic yards of contaminated soil were removed by Lexicon. The site is at the intersection of Atlantic and Vanderbilt avenues (northern edge of Prospect Heights). From Property Shark, the block and lot are 1122 and 0001. The prime address is 547 Vanderbilt Avenue. The alternates are 850-852 Atlantic Avenue, 855-857 Pacific Street (the lot extends to the south side of the block). A DOB picture shows a TEXACO gas station. A 2006 picture shows a McDonalds with a paved area in front. ACRIS lists the ownership as follows: Janet H. Brooks sold the property to M&B Associates c/o Crosstown Management on 10/27/99 (she was a 1/4 owner of the property - M&B owned the other 3/4); in 2/2/2000 M&B assigned a lease to the McDonald's Corp; in 1/29/04 Musto of M&B sold the property to MMB Associates, LLC, 320 Heather Lane, Hewlett Harbor, NY, 11557 (MMB consists of the three people who always owned the property). An attempt was made to locate a PBS

CON EDISON (Continued) **S103571868**

record for the site using all of the known addresses. However, nothing could be found. As the tanks were never registered, this is a violation of 6 NYCRR Part 612 and Part 613. The situation was referred to Leszek Zielinski, EE I of the PBS Unit, for action. The E-docs contains only one document file. This file contains the 6/2/98 Underground Storage Tank Closure Report, and the 8/21/98 Subsurface Investigation Report. The 6/2/98 Underground Storage Tank Closure Report was written by Lexicon Environmental Assessment for Yellowstone Industries (which has since gone out of business). The USTs were removed, but the piping was left in place. 200 to 300 cu. yds. of contaminated soil were removed. The tanks were in good condition with no holes. The excavation went down to 10' to 12', and to within 10' of the sidewalk. Groundwater was not encountered. End point samples ranged in total VOC concentration from 7 ppb to 1,149,000 ppb (bottom of pit). Four of the eight samples were above TAGM limits. No wells were installed. The end points were taken at 11.5' below grade. Samples 3 to 5 and 8 were below TAGM. Samples 1 and 2 had high VOCs above TAGM. Sample 6 had high VOC hits with 480,000 ppb total xylenes. Sample 7 had high VOC hits with 524,000 ppb total xylenes. The 8/12/98 Subsurface Investigation Report was written by Lexicon. The site elevation was indicated as 70' to 75' above sea level. (From the USGS maps, groundwater is at about 15' above sea level.) Borings were drilled to 53' below grade. From 0' to 15' was natural fill. From 15' to 53' was cobbles and boulders with thin layers of natural fill. Nine (9) borings were performed in the vicinity of the former UST locations from 6/22-30/98. SB-3 at 12.5' to 13' was 42,946 total VOCs. SB-4 at 8.5' to 9' was 7,698,160 total VOCs. SB-4 at 12.5' to 13' was much lower, but above TAGM. SB-5 and SB-7 to SB-9 were drilled to 53' and there were no VOC concentrations above the DEC Alternative Guidance Value standards. SB-6 at 11.5' to 12' was drilled, according to the drawings, at the location of SS-7 of the UST Closure Report, but the results were non-detect for the soil sample. It is not known how the SS-7 sample with total VOCs of over one million parts per billion could have dropped to non-detect during a time interval of several months. The locations of the two borings must have been far enough removed from each other to be in separate geochemical regimes. There are no other spill cases associated with this site. 3/4/10 - Raphael Ketani. I reviewed the 5/19/99 Site Remediation Report that was produced by HydroScience, Inc. From the analytical results and figures contained in the report, it appears that all of the contamination that was above the TAGM RSCO limits was removed, except for the West Wall-3 location and the Southwest Bottom location. There were only 2 and 3 analytes, respectively, that had exceeded the TAGM limits at these locations. Given that 11 years have passed since the samples were taken, it is believed that natural attenuation and evaporation of the volatile components have reduced the concentrations further. The sampling at depth below 15' also showed that the contaminant concentrations were very far below the TAGM limits and would not have been a threat to the groundwater, which was about 60 feet below the site. Given the data in the HydroScience Site Remediation Report, I have determined that the residual contamination at the site is not a threat to the public or the environment. Therefore, I am closing the spill case. 6/24/10 - Raphael Ketani. Anthony Musto (718) 937-8100 called today. He said that he had been talking to Leszek Zielinski, acting head of the PBS Unit. Mr. Zielinski had referred him to me. He said that he had never known he was supposed to register the tanks that had been

CON EDISON (Continued) **S103571868**

pulled. He said that he thought the contractor was going to do this 11 years ago. I told Mr. Musto that the contractors don't always do the PBS registrations unless they are asked to. He asked who he is supposed to talk to regarding registering the tanks. I told him that Mr. Zielinski is in charge of the PBS Unit here in Region 2. Mr. Musto said that he was given the telephone number of the PBS Bureau in Albany and that he saw the name John Urda on a piece of correspondence. I told him to talk to both parties in order to resolve the matter. He asked how much the registration will cost. I told him that it is relatively inexpensive, when compared to any fines or penalties. I added that since Mr. Urda is involved there may be fines and penalties as there are outstanding violations because the tanks were never registered. Mr. Musto said that he will talk to Albany PBS and Mr. Urda.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/19/2023
Date Data Arrived at EDR: 10/03/2023
Date Made Active in Reports: 10/19/2023
Number of Days to Update: 16

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023

Next Scheduled EDR Contact: 01/08/2024
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Next Scheduled EDR Contact: 11/28/2011
Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/19/2023
Date Data Arrived at EDR: 10/03/2023

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/25/2023

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

PFAS 3: PFAS Environmental Site Remediation List

Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Fluoropolymer coatings are blends of resins and lubricants used in products such as water-repellent clothing, furniture, adhesives, paint and varnish, food packaging, heat-resistant non-stick cooking surfaces and insulation of electrical wires. Chemicals in this group include perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS).

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/07/2023

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

UTM Y (Meters):	4503722.5
Elevation:	52 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14115940 BROOKLYN, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

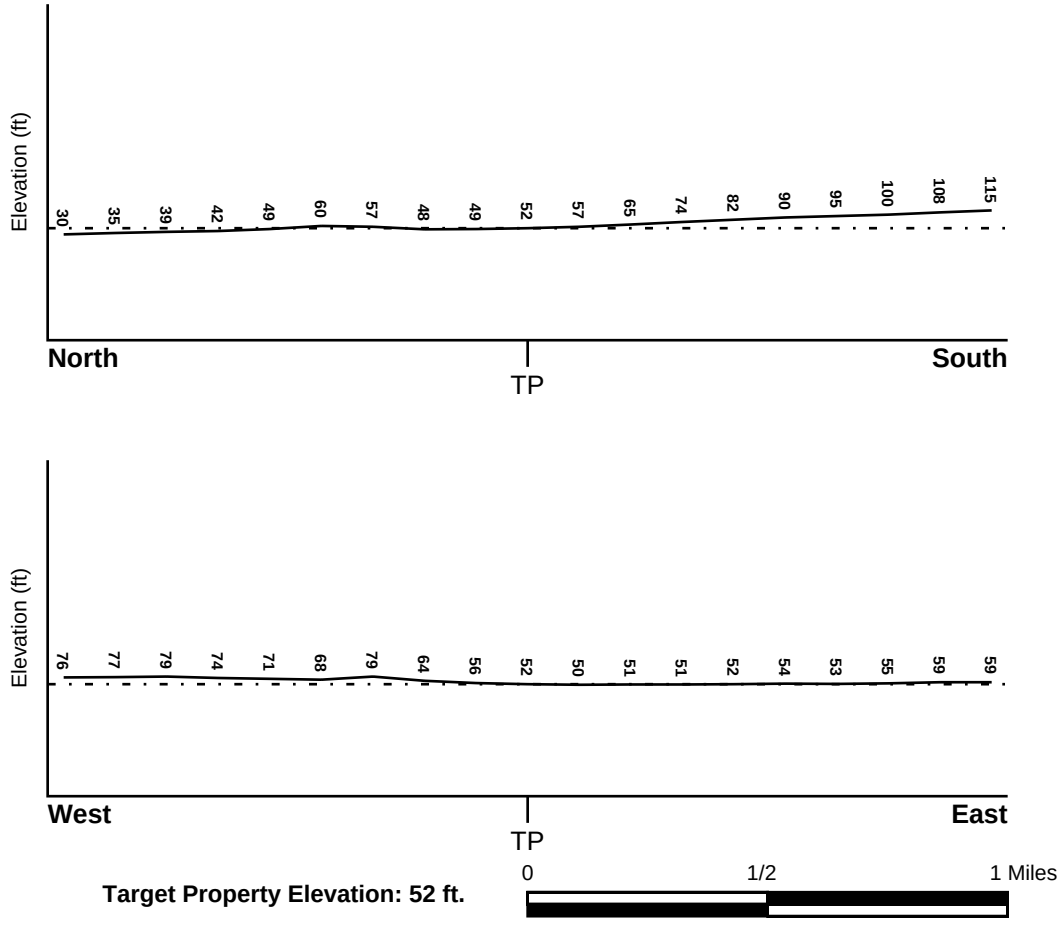
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970064B	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type

3604970074B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BROOKLYN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Mesozoic
System:	Cretaceous
Series:	Upper Cretaceous
Code:	uK *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New York Public Water Wells
Source: New York Department of Health
Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

Contact: CAROLINE.DAVIS

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results
Certification #: 84C4-4AE2-A064

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

WSP USA, Inc (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

of oil in sump. Sump was operational but sump pump was not operational. Historical records indicate PCB le
odate Dept if necessary.

a soil bottom. DEP was told there was dumping there for years.
ts. This spill is closed.

evels of 112 ppm maximum. The transformer was tested and found to be tight - oil was not from the transfo

rmer. Looks like motor oil. Sample collected for PCB analysis and fingerprinting. Mr. Campbell (Con Ed Under

rground Transmissions) reported that float switch on sump pump was broken, and that no oil was found in t

he sump pump trap and none in adjacent sewer. There is evidence of oil on the grating above the vault and

oil staining on the walls of the sump. Possible case of illegal dumping of used motor oil. Awaiting lab results

before cleaning the vault. 12/9/97, 8:45Am - Stan P. called with analysis results. PCb <1 ppm, oil ID'd as lubr

icating oil.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 NPL

site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ULANO CORP Site ID: 0206422 EPA Id: NYD001725878	***601 BERGEN ST.***	***SSW 1/8 - 1/4 (0.183 mi.)***	***AM209***	***767***

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 19 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: NYR000212449

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/07/2023 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 06/26/2023 has revealed that there are 3 NY SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/07/2023 has revealed that there are 40 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 31 NY UST sites within approximately 0.25 miles of the target property.

NY CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS UST site within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

NY RES DECL: A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

A review of the NY RES DECL list, as provided by EDR, has revealed that there is 1 NY RES DECL site

within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 76 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/05/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
FULTON WORKS	DEGRAW STREET AND NE	W 1/2 - 1 (0.906 mi.)	414	1312
FULTON MUNICIPAL WOR	NEVINS, DEGRAW AND S	WSW 1/2 - 1 (0.926 mi.)	418	1316

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

DER Facility ID:	61096
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY HOUSING AUTHORITY WILL NOTIFY KOLLEENY OF DEC BEFORE RE-TEST. 11/07/05: This spill transferred from J.Kolleeny to S.Kraszewski. 12/23/05: Tank has been removed and replaced (2004.) No tank closure assessment performed. - SK 07/07/06: NYCHA summary report states no recovery system and no MWs on-site. A site assessment is available and NYCHA recommends the Department review it. - SK 02/06/07 - J.Kann - site reassigned from S. Kraszewski to J.Kann. 7/22/10: J.kann - investigation work plan received on 7/15/10. 12/27/12: J.Kann - reviewed IWP. Emailed NYCHA requesting that the SAR referenced in the IWP be submitted for review before comments can be finalized on the IWP. 1/14/13: J.Kann - comments on the IWP sent to NYCHA on 1/9/13. 3/4/13: J.Kann - An addendum to the Work Plan and a revised Figure was received on February 27, 2013. The addendum and the revised figure were reviewed and the IWP with addendum approved on March 4, 2013. The SIR is due September 4, 2013. 1/28/14: J.Kann - a modification was approved to the SIR and edoced. 3/4/14: J.Kann - SIR received. 3/20/14: J.Kann - looked briefly at report. No groundwater sample collected at SB-3 as discussed (see email from 1/28). Spoke to Steve of JCB earlier this month and pointed that out to him. He said he would get back to me with a response. 6/13/14: J.Kann - sent an email to NYCHA indicating that a gw sample was supposed to be collected at the SB-3 location and was not. This information is necessary to consider the investigation complete and review the site for closure. 04/04/17: J.kann -Additional attempts were made to obtain groundwater in 2014. Refusal was met at each attempt. Based on the following: --Records indicate that one (1) 20,000-gallon, single-wall, steel underground storage tank (UST) was installed in 1976 that contained No. 4 and No. 6 fuel oil. This UST was replaced with one (1) 15,000-gallon, double wall, steel UST in 2004 that is currently in service and contains No. 2 fuel oil. Records also indicate that Gordon Environmental & Mechanical Corporation (Gordon) prepared a Site Assessment Report dated April 2005 that documents the closure activities associated with the 20,000-gallon UST. The report documented that the excavation for the UST removal/replacement extended to 19 feet below grade surface and that a total of 566 tons of soil was exported off-site. The report stated that no evidence of gross contamination was observed in the endpoint samples, and that the laboratory analysis revealed no contamination concentrations above the NYSDEC standards. --JCB prepared a Remedial Investigation Report dated February 2014 detailing the findings of the investigation. The report concluded that the soil samples collected indicated no significant impact from the former or current USTs. Although groundwater at the site could not be assessed through sample collection and analytical testing, based on the background information provided and the geology encountered at the site and the findings of the soil investigation performed, it is highly unlikely that contamination from the use of the USTs adversely impacted the groundwater beneath the subject site.

Tank Info:

Tank Number:	T1
Tank Id:	63838
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	H00 - Tank Leak Detection - None
	G01 - Tank Secondary Containment - Diking (Aboveground)
	A00 - Tank Internal Protection - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	I03 - Overfill - Automatic Shut-Off
	B00 - Tank External Protection - None
	C00 - Pipe Location - No Piping
	F00 - Pipe External Protection - None
	I04 - Overfill - Product Level Gauge (A/G)
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	07/01/2002
Capacity Gallons:	8000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	08/30/2004
Register:	True

DEC Memo:	Caller advised did analysis on soil and found contamination of gasoline unk amount. Clean up is pending.
Remarks:	7/15/11-HRAHMED-Spoke to Jessica of Roux Associates(631) 232-2600. As per her, the site is a former gas station. They will begin to pull out the tanks. They already innert the tanks by filling with nitrogen. This is part of Atlantic Yards Redevelopment project. They did some soil boring utilizing Sonic Rig and collected soil samples. Based on the PID readings they called in the spill. Jessica will forward the analytical report as soon as it available. 10/31/11-Hiralkumar Patel. case transferred from DEC Hasan to DEC Patel. 01/13/12-Hiralkumar Patel. 1:00 PM:- received message from Frank Cherena from Roux. Frank Cherena Roux Associates Ph. (631) 232-2600 email: fcherena@rouxinc.com 1:31 PM:- spoke with Frank. he mentioned that the site is under redevelopment. it will a railroad yard. due to the location of existing rail yard, site will be excavated down to 50 ft bg for new yard. initially, they planned for removal of four 4,000 gal tanks, but during excavation found additional 550 gal tanks. all tanks are removed and has excavated down to 40 ft bg. during july 2011, Roux collected soil samples for waste characteriazation and found ocntamination. no formal report was made for waste characterization sampling. asked Frank to submit waste characterization sampling results and a site map. asked him to include waste characterization sample locations, tank locations and excavation boundaries on the site map. they have planned for endpoint sample collection on 01/23/12. Frank mentioned that as per previous study, groundwater is at 75 ft bg. asked Frank to follow DER-10 for number and location of endpoint samples. alternate address: 514-522 Vanderbilt Ave, 836 Atlantic Ave PBS #: 2-337501. as per PBS record, site had following tanks: - four 4,000 gal gasoline USTs - eleven (11) 550 gal gasoline USTs - one 550 gal waste oil UST all tanks were removed in Aug. 2011. other spill #: 0503961. about 1 gal gasoline spilled onto pavement due to failed shut-off valve on gas pump. case closed. 01/20/12-Hiralkumar Patel. 11:54 AM:- received email from Frank. they have postponed the drilling next week and will submit a site status letter next week. 02/10/12-Hiralkumar Patel. received email from Jessica Taylor (at 6:25 PM on 02/09/12) from AKRF including status update. abstract: - inn order to facilitate the disposal of excavated soil, Roux performed an in situ soil characterization investigation - site was divided into four grids - each grid consists of 8 ft deep cube shaped cells containing approx. 800 cubic yards of soil - site was a gas station - total of 16 tanks removed from the site: four (4) 4,000 gal USTs and twelve (12) 550 gal USTs - 550 gal tanks were unknown prior to excavation - majority

MARTINEZ SERVICE STATION INC (Continued) **1004758305**

of 550 gal tanks were encased in and filled with concrete with the exception of tanks 5, 6 and 16, which were situated in the soil <---------- - approx. 5,500 tons of soil was excavated from grids that displayed petroleum contamination through analytical data and field observations - majority of the site has been excavated to approx. 40 ft bls - six endpoint samples (EP-1 through EP-6) will be collected: one sample per 900 sq. ft. - endpoint sample locations will be biased toward former tank locations and areas previously exhibiting soil contamination - two additional samples (EP-7 and EP-8) will be collected from the location where UST # 16 was discovered - excavation sidewall samples are not proposed due to the presence of support of excavation in form of wood lagging - found very high contamination (e.g. 400,000 ppb Toluene) in soil (NEGS-2) from 11 to 35 ft bls from grid 2; found clean soil below 35 ft - found high contamination (e.g. 57,000 ppb 1,2,4-Trimehtylbenzene) in soil (NEGS-4) from 5-13 ft bls from grid 4; found clean soil below 13 ft - sample NEGS-2 was collected from grid 2 which contained eleven 550 gal tanks (tank # 5 to 15) - sample NEGS-4 was collected from grid 4 which contained four 4,000 gal tanks (tank # 1 to 4) Jessica asked for approval for endpoint sample collection plan. Jessica Taylor AKRF, Inc. Ph. (631) 232-2600 (O) (631) 831-4205 (C) Fax (631) 232-9898 email: jtaylor@rouxinc.com 02/13/12-Hiralkumar Patel. 4:13 PM:- spoke with Jessica at AKRF. asked her to collect endpoint samples as per DER-10. as excavation is open for more than a week, asked her to collect endpoint bottom samples at least six inches below the excavation bottom surface. she mentioned that groundwater under the site is about 60 ft bg and they dug to 40 ft depth. she also mentioned that the rail tracks on north side of the property is about 35 ft bg and there was about 40 ft high concrete wall between the rail tracks and the site. based on these information, no investigation needed on north (concrete wall) and east side (no groundwater, which could spread contamination horizontally) of former 550 gal tank group, at this point. informed her that the department may require additional investigation after reviewing the endpoint sample results. asked her to provide work schedule. 4:53 PM:- sent email to Jessica and asked to collect endpoint samples as per DER-10. informed her that additional investigation may be needed. email copied to Frank. 02/17/12-Hirlakumar Patel. received email from Jessica (at 4:39 PM on 02/16/12). endpoint samples will be collected today. 03/02/12-Hiralkumar Patel. 1:44 PM:- received call from Frank from Roux. no contamination found in endpoint samples. asked him to submit final closure report. 03/23/12-Hiralkumar Patel. 4:34 PM:- spoke with Frank. he is waiting for ok from one of the owner's rep and will release report by end of next week. 04/23/12-Hiralkumar Patel. received email from Frank (at 6:37 PM on 04/20/12) including closure. total of eight endpoint bottom samples were collected. no PID or visual signs of contamination were observed at any of the endpoint sample locations. no contamination found in endpoint samples. based on available information, case closed.

DEC Memo:	Shut-off valve on gas pump (#9) failed, causing .5-1 gallon of gasoline to spill onto pavement. Not cleaned up as of yet.
Remarks:	7/5/05 Spoke to Brad Fuller, citizen who reported spill. His tank overflowed and now his gas gauge appears to be broken. He stated that he also reported it to the EPA. And he received a phonecall from the USCG. He said the station looked independently owned and wasn't sure if BP was responsible. PBS 2-337501 shows BP as operator. 7/6/05 Paula Skryja, BP Environmental Compliance Specialist (skryjapj@bp.com, 410-551-6074, 410-551-3686(f),443-310-2099 (c))will research and forward any information. 7/7/05 Email from Heidi Beatty, Compliance Coordinator Delta Environmental Consultants PO Box 14, 418 Wall St, Gibbstown, NJ 08027. Phone: (856) 423-3101, Fax: (856) 423-6593 The nozzle was replaced on the pump and the spill was cleaned up with absorbent by the site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
