The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 8 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 4 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/07/2023 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 06/26/2023 has revealed that there is 1 NY SWF/LF site within approximately 0.5 miles of the target property.

ATLANTIC AUTO SALES	1120 ATLANTIC AVE	WSW 1/4 - 1/2 (0.375 mi.)	BF411	915

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/07/2023 has revealed that there are 41 NY LTANKS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 105 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 12/31/2019 has revealed that there are 143 NY MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
STN TRADING HOUSE	1257 FULTON ST	SW 0 - 1/8 (0.077 mi.)	I89	185

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Tank Info:

Tank Number:	001
Tank Id:	47706
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
K00 - Spill Prevention - None
A01 - Tank Internal Protection - Epoxy Liner
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
I02 - Overfill - High Level Alarm
L09 - Piping Leak Detection - Exempt Suction Piping

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	12/01/1993
Capacity Gallons:	5000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	MJGRIFFI

Spiller Name:	KENNETH HOOD
Spiller Company:	ARK SUPPLY COMPANY
Spiller Address:	132 STUYVESANT AVENUE
Spiller Company:	999
Contact Name:	EDWIN MATHIEU
DEC Memo:	1714 THE CALLER ADVISED DISPATCH THE SPILL WAS DUE TO A DELIVERY ERROR. A COMPANY DELIVERED HEATING OIL TO THE WRONG ADDRESS. OIL HAS CURRENTLY AFFECTED GROUND AND HAS NOT BEEN CONTAINED. THE SPILL IS LOCATED IN THE CELLAR. THE CLEAN UP IS PENDING.
Remarks:	10/24/09-Vought-Off hours primary responder. Spill was of approximately 150 gallons of #2 fuel oil caused by a misdelivery to wrong address. DEC Hotline received call from NYCDEP and indicated that they had no further spiller or site contact information as spill came in from 311. Spill holtine indicated that spiller was: Ark Supply Company 132 Stuyvesant Avenue Brooklyn, NY 11221 Contact: Ursula Ph: (718)443-4579 Vought called NYCDEP Hazmat Jon Wilson (Ph:646-879-7329) (Wilson called in other unrelated spill during same day as was on shift) to see if he had any further information or was notified of spill. Wilson indicated that he was actually ten minutes away from site and had to wait for coworker as well but would be performing site inspection. Vought requested that wilson call him back with initial site inspection results confirming there was a spill as it came in via 311. Wilson returned call and indicated that there were VOC's throughout the building and that the spill was indeed caused by a misdelivery of up to 150 gallons of #2 fuel oil. Wilson indicated that there was impacted concrete in the basement that required powerwashing as well as a 15 gallon overpacked drum of impacted sand (placed by FDNY who was onsite previously) used for absorbent. Wilson also indicated that the site owner: Mr. Edwin Mathieu Ph: (718)607-2907 Ph: (212)442-4807 edwinm1804@hotmail.com Ms. Nicole Halsey Mathieu Ph:(917)538-2241 nicolenhalsey@gmail.com and his wife and son lived on the first floor of the building and spill was to sub-basement. The supers wife and son were staying at grandparents home. As per Wilson, Mr. Mathieu indicated that the misdelivery occurred on Friday 10/23 at 1:45pm. The misdelivery was witnessed by the resident at 125 Halsey Street who was the correct recepient of the delivery (Ark Supply Company was her fuel oil supplier). Wilson and Mathieu did not have contact information for resident of 125 Halsey and she was not at home during time of Voughts call. As per Wilson, Mr. Mathieu indicated also that no delivery receipt was left by company and that he saw puddle of oil day during day of spill but puddle is no longer there (suggesting oil seepage into subsurface) and he also stated that when he discovered oil spill in basement, he was the one to notfiy 311 who in turn notified FDNY. Wilson indicated that initial cleanup should consist of powerwashing basement. Vought called Ark Supply Company and left very strong message that callback must be received immediately to avoid fines and

MATHIEU RESIDENCE (Continued) **S110044421**

penalties. Vought notifed DEC Austin of spill and as per Austin, dispatched DEC Zhune to site. Vought later received call from ECO Mathis that he was onsite as well. Vought informed Austin and Zhune of ECO presence at site. Vought later spoke to DEC Austin and Zhune who confirmed that Matheiu and his family would be staying at relative's home for night and that if callback was not received from oil company by Sunday 10/25 that PIN Contractor would be hired to perform powerwash. Zhune indicated that spill is four story brownstone building. Other residents were not at home during DEC site visit however, Mr. Mathieu indicated that no complaints were received from upper floor tenants. Zhune also indicated that vapors on first floor (above the residence of Mr. Mathieu) were negligible via olfactory evidence. 10/24/09-Zhune responded to this site. ECOs were in the sceene. Spoke to owner Edwin Mathiew. He said the oil company Ark Supply pumped 150 gallons of oil #2 in his basement causing the spill (Neigbor gave him a copy of the receipt. he paid for 150 gallons). This happened friday I called the oil company several time and drove to the office they never showed up. Fire Department put sand on the spill removed it put it in a drum. Left drum in place. Owner said there was a level of liquid in the basement before F.D came the liquid sipped into the concrete. The floor is concrete with no cracks. There is strong smell in the basement nobody occupy the basement. First floor and subbasement no oil smell noticed (Owner ocupied first floor and subbasement). Second and tird floor could not be inspected tenants were outside. Mr. Mathiew said tenants are not complaing. His wife and three month old baby stayed in his mother house. Jeff and ECO tried to contact Ark Supply. Before to leave the scene I instructed Mr. Mathiew that if DEC did not hear from the oil company Sunday morning a contractor would be hired to perform the clean up. 10/25/09- Zhune called Jeff at 10:00 am to check if heard from oil company. He said no. zhune spoke to Randy. Randy instructed Jeff to make arragement with contractor Fenley and Nicol Environmental. Called Jeff he said contrartors will be in the site at 2:00pm. Contractors arrived at 4:00pm. Spoke to Mike Sepe and Mark Ferber from fenley. They inpected the basement. Immediately they installed the ventilation system, sealed off basement and first floor and performed a surface investigation to see the extend of contamination. He said the concrete is very porous is not a good concrete. All oil was absorbed by the concrete. He said power wash in not going to work. They will removed the concrete.
10/25/09-Vought-Spoke to DEC Austin and Zhune and informed them that to date no callback received from oil company. Austin instructed Vought to mobilize Fenley and Nicol. Vought called and spoke to F&N Brian Linehan and he will mobilize vacuum truck and box truck to site for powerwash. Vought also instructed him to bring in ventilation unit as well. F&N estimated time of arrival at 2pm. Vought called and notifed Mathieu, Zhune and Austin of 2pm contractor arrival time.
10/26/09-Vought-Called and spoke to NYSDOH Gerry McDonald (NYSDOH Hughes day off) and informed him of relocation and vapor impact and notified him that Vought would send email with spill report and would call him back with further information. Vought also receive call from F&N Jason Fenley who requested CWA form and further instructions onsite. Vought told him that DEC would try to contact oil company one more time and then would call him back after discussion with DEC Austin. DEC Zhune informed Vought that F&N was unable to perform powerwash due to poor condition of concrete and desire not to drive seepage further. DEC Zhune installed ventilation system and sealed

MATHIEU RESIDENCE (Continued) **S110044421**

off basement and first floor. Vought called Ark Supply Company and spoke with manager (Kenny Hood fax:718-919-3713) who stated that he had just got off the phone and arranged a site visit with Mr. Mathieu for today at 12:30pm and he also expressed desire to comply with all of DEC's requirements. Vought explained spill history to date and that call must be placed to F&N to arrange private rate reimbursement if NYSOAG Spill Fund case was to be averted. Kenny indicated he would call F&N Jason Fenley immediately to arrange payment. Vought also noted to Kenny the initial scope of work, that he must provide for relocation of Mr. Mathieu and his family and decide on consultant today due to the relocation. Vought requested that Kenny return call immediately to Vought upon deciding a consultant. DEC Zhune will attend site visit today at 1:30pm as well. Vought called ECO Mathis and informed him of 12:30 site visit and he indicated that he would be at meeting as well. Vought spoke to F&N Fenley and he will also send someone to attend site visit. Fenley indicated that he spoke to Kenny and would be sending him private rate invoice. 11:30am-Vought received call from and spoke to Ark Supply Company (Kenny Hood) who indicated that he had spoke with F&N and requested invoice and that he also would be contacting Miller Environmental. Vought informed him that F&N would be onsite as well during meeting. Hood also confirmed he received faxed copy of spill report. Onsite meeting with DEC Zhune, Ark Supply (Kenny Hood), F&N (Brian Linehan), ECO Mathis and owner (Mr. Mathieu). Ark Supply Company has retained F&N to continue work as per F&N Linehan. Linehan will perform begin with soil excavation due to poor condition of concrete and also to avoid remedial delays due to submission of boring samples and report generation as Mr. Mathieu's family relocated. Mr. Mathieu and family will be staying with grandparents while work is done. 10/27/09-Vought called and F&N Linehan (cell:516-768-1765) and linehan will be removing impacted plywood and debris today and sawcut concrete tomorrow and Hood signed paperwork. Negative air machine will be installed as opposed to two exhaust fans which are in operation and PID survey will be performed. DEC Zhune received a phone call from Mr. Mathieu who indicated that he would prefer to stay in a hotel and no longer stay at relatives house and he also inquired as to the health and safety of his tenants. Vought dicussed with DEC Austin and DEC will request site visit to screen upper floors via email and will also contact Hood with respect to hotel for Mr Mathieu and family. Voutht called Ark Supply (Hood) and left message to call back ASAP. Vought called Mr. Mathieu to discuss hotel relocation and left message to return call. Received email from F&N Linehan Allow this email to serve as an update regarding the fuel oil spill at the above referenced site. As you know, we mobilized to the site today, October 27, 2009, to perform further spill clean up and prepare the site for remediation. Mr. Hood of Ark Supply Company had given us authority to return yesterday during a walk through of the site with Brian Linehan. In furtherance of same, we forwarded a written proposal to Mr. Hood detailing our rates to perform the further cleanup and remediation. After failing to receive a signed proposal, we called Mr. Hood and a contact at his office informed me that the matter had been forwarded to Ark's insurance company, Coverage Concepts, specifically being handled by a Mary Allen (Coverage Concepts can be reached at (631) 331-7700). In a conversation with Ms. Allen of Coverage Concepts, we were informed that a claim number was being established. However, at this time, we do not have a claim number from Coverage Concepts or a contract in place to secure payment for

MATHIEU RESIDENCE (Continued) **S110044421**

our ongoing services at the site. We will continue to keep you updated. 2:30pm-Vought-Spoke with Nicole Mathieu (Ph:917-538-2241) and requested that she inquire as to feasible local hotels to stay in. She indicated that she could stay in relatives home for one more night if need be but would like to stay in a hotel. Vought called and spoke to NYSDOH Hughes who will call Nicole to discuss relocation options. Vought called Ark Supply and spoke to Ursula and provided contact information for NYSDOH Hughes and requested that she contact Hughes to dicuss NYSDOH relocation requirements. Vought called NYSDOH Hughes who confirmed that he discussed site with Nicole and she would be staying at relatives for tonight. Vought received email from NYCDOH Stallbohm that they will be performing site visit this afternoon to screen upper floors. 10/28/09-Vought-Received email form NYCSDOH Shallbohm that Results of the survey revealed a very faint petroleum odor on the 2nd & 3rd floor apts. and hallways with no detection on the PID. A reading of 1-2ppm on the PID for the 1st floor apt. and hallway and 20ppm in the basement. Active ventilation was observed in the basement. Vought received call from NYCDOH Hughes who noted that based on results, no relocation of upper floors was required to date and he will contact Nicole Mathieu and inform her of same. NYSDOH Hughes also noted however that the Mathieu family was still required to be relocated and that he received message from Ark Supply (Ursula) last night with respect to the relocation. Insurance company for oil company: Ms. Mary Allen Coverage Concepts Ph:(631) 331-7700 maryellen@coverageconcept.com Vought called and spoke to Allen and she is insurance broker and insurance company is: Zurich Environmental Amy Paplanus Ph:(847)762-7148 email: amy.paplanus@zurichna.com Claim # 4340003962 Vought received email from NYSDOH Hughes that he was in conctact with Ark Supply (Ursula) and she will contact Ms. Mathieu to arrange for accomodations. Vought called and spoke Amy Paplanus for insurance company information. Vought discussed spill history with paplanus and sent her copy of spill notes to date. Paplanus was unaware that F&N was contractor onsite. Vought called Nicole Mathieu and she was contacted by Ark (Ursula) and she will return call to Vough with update on relocation. Vought spoke to Nicole and she is providing info for Brookly Courtyard Mariott to Ark (Ursula) as this hotel is under NYSDOH per diem requirements and is close proximity to her husbands job. 2pm-Vought called Nicole and she and her husband are staying at Brooklyn Mariott and she is content with relocation. As per Nicole F&N was onsite this morning at 8:30am and began work. Vought called F&N Fenley for update on status of work and he was at site and F&N is sawcutting concrete which should be completed tomorrow and on Friday guzzler will be removing dirt. Daily PID surveys will be performed daily. 10/28/09-Vought-Vought called Mr. Mathieu for details of spill and as per Mr. Mathieu on Friday 10/23/09 he saw oil spill in cellar and he contacted neighbor at 125 Halsey Street who indicated that they ordered 150 gallons of #2 fuel oil from Ark Supply Company. The neighbor called Ark Supply and spoke to Ursula on Friday at 6pm and informed her of the oil spill at 123A Halsey Street. According to ECO Shea Mathis who was onsite on Friday, the neighbor at 125 Halsey Street witnessed Ark Supply Company delivering oil to 123A Halsey Street. Ursula initially denied the misdelivery to the neighbor and then she said that oil would be delivered to 125 Halsey Street on Monday. Mr Mathieu called Ark Supply company four times and the message machine responded and he left four messages. On Saturday morning (10/24), Mr. Mathieu received a call from a gentlemen at Ark

MATHIEU RESIDENCE (Continued) **S110044421**

Supply (Ron or Robert) who worked in the electrical supply department. Ron or Robert stated that crew would be at 123A Halsey in 30 minutes to assess situation. No one arrived from Ark and Mr. Mathieu called again and spoke to Ron or Robert and he said that he stated again that crew would be there in another 30 minutes. Mr. Mathieu again waited another 30 minutes to no avail and he again called numerous times and he spoke to Ron or Robert every time who said the he notified crew and they were on there way. Mr. Mathieu continued to call and evenutally only the answering machine responded. At 1pm on Saturday (10/24), Mr. Mathieu drove to 132 Stuyvesant Avenue(Ark Supply Co) and he met Ron or Robert who replied that they requested the cleanup crew but he was only the electrical supply person and could do no more. Mr Mathieu called oil company repeatedly again upon his return and left additional messages. 10/29/09-Vought-Received call from and spoke to F&N Linehan and Zurich will be at site meeting at 9:30am. 10/30/09-Vought-Site visit by Vought. Onsite was Mr Edwin Mathieu, Ms. Nicole Mathieu, F&N Linehan, Craig Werle (Roux Associates 631-793-1535), Jessica (Roux Associates). Roux was hired by Zurich Environmental to supervise F&N work. Werle requested that he be primary contact for further requirements as opposed to Zurich. Werle also noted that F&N was under contract with Ark Supply Company and Zurich Environmental as well. Vought inspected site and noted concrete chips from fill port as per F&N Linehan. Minimal vapors via olfactory on second and third floors and first two floors are occupied by Mathieu family. Vought inspected basement which had 1/4-1/2 thick concrete with heavy oil staining in front and rear of property. Noticeable odors in basement with operational ventilation system and crew of four breaking impacted concrete and performing shallow test pits. PID monitoring daily. Impacted concrete and soil removal to take place at minimum for next week. Vought reviewed photos taken by Mr. Mathieu immediately after discovery of the spill (see edocs) and large pools of fuel oil in the front and rear of the basement separated by high point in floor suggesting widespread seepage and subsurface impact. Scope of work includes breaking of remaining impacted concrete, removal of impacted soil via guzzler, collection of endpoint soil samples, DEC visit prior to backfill, installation of SSD and vapor barrier, and epoxy of floor. Received email from Roux (Werle) that I wanted to let you both know that Roux will have someone stopping by 123A Halsey on a more or less daily basis to monitor the progress of the cleanup, record all PID readings, and identify any issues as soon as possible. We don’t anticipate being onsite for more than an hour so each day but his should be sufficient to stay fully up to speed and keep an eye on F&N. I anticipate that our onsite rep going forward will be Renee Wong who lives in Brooklyn and can efficiently stay on top of developments at the house. Renee’s cell phone is 631-774-7346. Please let me know if you need any additional involvement or support from Roux. 11/4/09-Vought-Received message from Roux (Werle) that I stopped by Edwin’s house this morning to check on the status of the cleanup. Fenley & Nicol (F&N) had most of the concrete floor chopped up and piled in the front of the basement. They were in the process of using a vacuum truck hose to suck the concrete chunks up directly into the vac truck parked in front of the house. The hose was brought in through the basement window in front of the house. This is a time consuming process but is quicker and cleaner than bringing the material out of the basement by hand with buckets. They expected to have most of the concrete out by the end of

MATHIEU RESIDENCE (Continued) **S110044421**

the day and will then begin excavating soil and vaccing it out of the basement. The cleanup will clearly extend into next week. We will have Jessica Diminich, who was at the site last Thurs and Friday, stop by on Thurs 11/5 to see where things stand. If need be I can have people stop more frequently however F&N seems to be moving as fast as possible. They have a 3 man crew and I don't think additional people will make it go any faster. 11/6/09-Vought-Site visit with DEC Repsher, Mr. Mathieu, Roux (Werle), F&N Linehan to inspect progress of excavation. Nicole noted concern over lack of documentation of current work to date. Vought noted spill notes, consent order being drafted and will email request of scope of work to Werle and Linehan. Werle also requested Department review of plans for SSD system. No odor complaints from upstairs during past week and excavation activities to be completed by 11/9/09 and backfill will hopefully be completed by Friday 11/13/09. PID surveys being performed daily. NYCDOH site visit will be tentatively scheduled for later next week. Tentative schedule as follows: 11/9-stone backfill and SSD installation, 11/11-vapor barrier installation, 11/12-11/13: concrete placement. Further borings to be peformed via hand auger by Roux in areas of remaining contamination that cannot be removed due to structural conditions including collection of soil samples for 8260/8270. Entire basement excavated to approximately 2'bg with fine sands as soil. Nicole Halsey also noted that due to the young age of her child, she would rather reoccupy when work is completed due to excessive noise caused by stone backfill and concrete emplacement. DEC also requiring cleaning of impacted stairway as wood on bottom is soaked with petroleum and may serve as additional source of vapors. Roux Werle indicated that Zurich Environmental will be paying initial F&N mobilization costs (during initial callout by Department). Meeting to be held at site tenatively on 11/13 at 9:30am. Vought sent email to all parties with update. 11/9/09-Vought-Reviewed draft consent order and sent request to Mathieu to confirm information. Received email from Edwin Mathieu with following corrections: Correction: Friday, October 23rd -On Friday, October 23rd the owner of 125 Halsey Street did not witness the discharge. He actually ordered the oil the morning of October 23rd. -A neighbor of mine, who does not live at 125 witnessed the oil being discharged around 1:45pm. The neighbor did not realize the oil was being delivered to the wrong house, so no one was alerted. -When I got home from work at 5:20pm, I could smell the oil from the sidewalk. -When I unlocked the door I realized that there was an oil spill in the basement. -I surmised that someone who was supposed to deliver the oil to 123 or 125 Halsey Street must have inadvertently delivered it to 123A Halsey Street. -I immediately went to 123 Halsey Street. By 6PM I was able to get hold of the owner and he informed me that he did not ask for and was not expecting an oil delivery on October 23rd. -Next I contacted the owner at 125 Halsey Street. His son Kieran informed me that they were expecting a delivery on October 23rd and he'd confirm with his father Mr. Robert. -Kieran calls me back a few minutes later saying yes his father ordered 150 gallons of oil from Ark Supply Company and was talking to them about the mis-delivery. -Mr. Roberts called me by 6:20pm and told me that Ark Supply Company had confirmed the delivery and once he informed them about the mis-delivery, they then denied the delivery. -Mr. Roberts said he spoke to Ursula. After Ark was informed about the spill they stopped answering any calls. -Mr. Roberts gave me Ark's number. My neighbors, friends, wife and I called Ark Supply Company repeatedly after 6:20pm on October 23rd to

MATHIEU RESIDENCE (Continued) **S110044421**

no avail. -We also left messages asking Ark to come clean up the spill. Left with no other choice, around 7PM one of my neighbors called 911 to get the Fire Department. The fire Department did not show up, so we called the NYPD. A police officer called the Fire Department, and the FDNY was on site within 2 minutes or so. -FDNY came by with a Hazmat team, who moped up the initial top coat of the oil spill. -The FDNY also tried to call Ark that night and got no answer. They informed me to try to call Ark the following day (Saturday, October 24), so that they could clean up the spill. -We had to spend the night at my mother's house. Correction: Saturday, October 24th -Ark called me on saturday morning at 9am, saying that they would send two people in 30 minutes to asses the damage. -I called Ark Supply Company at 9:45am and was informed that a crew of two was on their way. By 10am no one showed up. -I called repeatedly until around 1PM, when I drove to their storefront. -At Arks storefront, I was told that a crew was called and nothing further could be done. -Finally later that afternoon, out of frustration, I called 311 to report the discharge and the New York City Department of Environmental Protection then alerted the New York City Fire Department who in turn notified Department's Spill Hotline. 11/12/09-Vought-Received plans from Roux (Werle) for SSDS and Vought sent reply with no objections to design. Vought also repeated request for email scope of work summary as requested by Nicole Halsey. Site meeting scheduled for 11/13 at 9:30am. Vought called and spoke to F&N Linehan and gravel backfill being installed today, tomorrow will be SSD installation, Monday and tuesday will be additional gravel fill and concrete emplacement. As such reoccupation will not occur until at least Tues or Wed of next week as Nicole Halsey requested to reoccupy after odors and excessive noise from backfill and concrete emplacement are completed. Vought received call from and spoke to F&N Linehan who indicated that NYCDOB site (Arte) who as per his supervisor (Islam 718-802-4406) is writing a violation to the homeowner (Mr. Mathieu) for not having building permits for excavation. Islam's supervisor is Gordon (718-802-3734). Vought left message with NYCDOB Gordon and NYCDOB Islam with respect to the guidance on when permits are needed, what is needed for the permit and the timeframe for obtaining permits (due to the emergency nature of DEC excavation). Vought discussed work stoppage with DEC Austin as well. 11/12/09-Vought-Site visit by Vought with Roux(Werle), F&N Linehan, Nicole Mathieu. F&N installating SSD piping today and Monday 11/19, gravel backfill, vapor barrier installation on 11/20, concrete pour and epoxy on 11/21 and 11/22. Therefore reoccupation by Mathieu family not to take place until 11/23 at earliest. F&N replacing impacted staircase. PID surveys still being performed and no readings or complaints received. Teleconference with Nicole, her attorney, DEC Vought, DEC Urda and DEC Repshner scheduled for today at 12pm. Consent order being hand delivered by ECO Mathis today to Ark Supply Co. Teleconference held as above with attorney JP Van Lent (718-780-0118). 11/17/09-Vought-Received call from Chris Horan (Synergy Environmental 484-365-5000). Vought returned call and left message in unknown mailbox. Vought received call from and spoke to Horan and he was hired by Van Lent. Vought discussed SSD system and PID survey for reoccupation and Horan expressed concerns over adequacy of PID survey and Vought referred him to NYSDOH Hughes and also suggested that he send email to all so that we may all be informed of discussion and possible changes. Vought also informed Horan of site visit scheduled for 11/20 at 9:30am.

MATHIEU RESIDENCE (Continued) **S110044421**

11/20/09-Vought-Vought called and spoke to NYSDOH Hughes. Hughes noted that he received call from and spoke to Horan and indoor air sampling will be via SUMMA canister and associated inventory. Site visit by Vought with Edwin and Nicole Mathieu, F&N Linehan, Roux (Werle), JP Van Lent and Horan (Synergy). Excavation currently filled to grade with gravel and concrete pour scheduled for 11/24 and will dry over holiday. Epoxy scheduled to be applied Monday 12/1 and work should be completed (including installation of SSD blower and venting to roof) by Wednesday 12/2. Sample analysis will be expedited as well due to urgent nature of confirming air quality as ongoing relocation. SUMMA sampling will be scheduled for 12/2 or after. Floor will be finished to grade with level surface. Vought to send indoor air sampling paramters to Werle, Linehan and Horan. SUMMA sampling most likely will be performed by Roux Associates. Fill pipe at 123A removed by F&N. Vought required that breif proposal be submitted by Roux associates for indoor air sampling (number and location of samples and method of analysis) and Vought will forward to NYSDOH Hughes for review. Horan noted additional suggestions of placing blower outside residence and installation of a gauge for SSD system and F&N will research options. F&N Linehan will also send epoxy specs to Horan for review as well. Next site meeting tentatively scheduled for 12/2 however Vought will be on vacation for week of 12/30 and as such case will be referred to another project manager for oversight. Vought called and spoke to NYSDOH Hughes and he will email Vought expanded list of analytes for indoor air sampling and Guidance link. Upon reception Vought will forward list of analytes and notes of this day to all parties. 11/24/09-Vought-Sent email with update and analytes to all parties. Received email from Edwin Mathieu that I've noticed some cracks on the celing of the parlor floor. They are near the rear windows. I wonder if the vibrations or digging caused the house to further settle. 11/25/09-Vought-Received email from JP Van Lent that Can you find out from Fenley & Nicol if before the concrete pour they drilled and pinned the interface between the old concrete slab along the perimeter walls and the mid-line columns/piers with rebar? Also, I understand from consultation with architects that evidently, separate and apart from the epoxy sealant to be applied to the concrete surface, that an epoxy-binder should be applied to the thickness of the interface between the remaining old concrete and the new concrete. Also, there should be an epoxy additive to the concrete mix being poured and a steel mesh reinforcing the new concrete slab. Thanks Vought replied to all parties that structural engineer must be contacted immediately as well as NYCDOB inpsection. Vought called and spoke to F&N Linehan who will inquire as to structural engineer and NYCDOB permit and possibly associated inspection. Vought discussed site with DEC Austin and DEC will encourage a report be made to NYCDOB by concerned parties with regards to structural concerns. 12/2/09 - Raphael Ketani. Cheyl Neary of Fenley & Nicol (631) 586-4900 sent Randall Austin, Chief of the Spills Unit, an e-mail requesting that the DEC write a letter to the NYC DOB in order to obtain the necessary permits for the interior demolition work. I drafted a letter for Mr. Austin's review which described the spill incident and its impact, and which requested the issuing of permits for the demolition and remediation work. Mr. Austin approved the letter and it was e-mailed to Ms. Neary with my signature. She will combine the letter with the remediation plans and submit it to Thomas Farello, Brooklyn Borough Commissioner, NYC DOB, in order to get the permits. 12/7/09-Vought-File review by Vought to date: Email from

MATHIEU RESIDENCE (Continued) **S110044421**

Edwin Mathieu-11/30/09. Hi Everyone, I hope you've had a great Thanksgiving holiday. I passed by the house yesterday and noticed that oil is seeping through the newly poured cement. (Please see attached photos.) Is this supposed to happen? I've Also attached pictures of the cracks that are appearing over the back parlor floor window. Email reply from Van Lent to Mathieu-11/30/09. Edwin - It is pretty clear to me that this is not supposed to happen. I am going to forward the pictures to an architect consultant among others. Email to DEC Austin from Van Lent-11/30/09- Dear Mr. Austin - I understand that you are supervising this matter during Jeff Vought's absence. Cullen and Dykman represent the homeowners with respect to this matter, which appears to be becoming increasingly problematic. I believe that it is imperative to address all aspects of the attempted remediation, including structural concerns about the building and the methodology used for the concrete-pour. We would appreciate the DEC's in-put with on those issues within its purview, but also feel that there must be a way to establish a coordinated rapport with the NYC Department of Buildings beyond the hit or miss of making a 311 call. After all, the homeowners have been displaced from their residence and are not on-site when DOB inspectors arrive. We look forward to your response and any suggestions that you may have. Thank you Email from Roux Werle to all parties-11/30/09. Brian Linehan and I are meeting at the site tomorrow morning at 9:30 to investigate the issues raised by the photos. Email from Van Lent to F&N Linehan-12/2/09. Brian - Have you had any success in determining the structural engineer's (Mr. Bronzino) availability for a site inspection? Please advise so that we can coordinate . Email from Werle to DEC-12/3/09- Edwin says there are cracks over the back parlor floor window.- It occurs to me what these are almost certainly from. When I was in the back yard looking back at his house, I was struck by the bay window bulge in the back of the house that didn't extend down to the ground but ended one story above grade. You walk underneath this extension when you exit the ground floor rear door. I was struck by the sagging appearance of this bay window bulge and the two steel poles that appeared to be supporting all three floors of it. I believe Edwin is saying there is a crack over the bay window on the parlor floor which is the second floor, the ground floor is the where the kitchen is and wouldn't be referred to as a parlor. The cracks are due to the poor support of the bay window extension. We can take photos to document when we're there tomorrow morning. 12/08/09-Vought-Site visit by Vought with Nicole and Edwin Mathieu, F&N Linehan, Roux Werle, Synergy Horan, JP Van Lent, Van Lent senior, structural engineer (Robert Bronzino-Bronzino Engineering 631-751-8299). Four drums of contaminated soil remain outside residence and Vought requested immediate removal to prevent neighbor complaints. Concrete placed over excavation and SSD and concrete application not uniform with presence of scour marks . Vought discussed concrete with DEC Austin and the Department recommends reapplication of a new layer of concrete over existing concrete in lieu of a scour machine that will produce cement dust. F&N Linehan noted that contaminated concrete adjacent to walls was powerwashed and a bonding agent was used to apply new concrete over these locations. F&N Linehan will send manufacturers specifications of epoxy to Horan. Edwin Mathieu noted one drop of dark liquid substance (possible fuel oil and/or bonding agent) seeping through concrete. F&N Structural Engineer (Bronzino) noted that he would not sign off on feasibilty of excavation until baseline structural report was

MATHIEU RESIDENCE (Continued) **S110044421**

produced for entire building. Roux (Werle) will send proposal of excavation work to Zurich Environmental for possible approval. JP Van Lent will send letter expressing his concerns of staining in concrete to insurance company with cc to DEC. Vought informed DEC Austin and Urda of updates and continued relocation and decision was made that DEC requires excavation of impacted concrete and soil is possible and sealing with moisture barrier above gravel backfill and/or epoxy below new concrete application as long as structurally feasible. 12/9/09-Vought-Called and spoke to DEC Linehan and informed him of excavation requirements of impacted concrete as long as structurally feasible. Bronzino will prepare structural report and scope of work for borings to determine footing depth which will be used to assess excavation feasibility. Vought noted that if excavation of concrete adjacent to walls occurs, then DEC will require placement of a moisture barrier above the gravel backfill and below the concrete to prevent further concrete staining. Vought also noted that DEC recommends placement of new layer of concrete in lieu of scarifying ridges and Linehan noted that after further consideration he had decided to pour a new layer of concrete above the current layer with some minor scouring to raise drains and SSD manways. Vought called Roux (Werle) and left message of same. Vought called and spoke to JP Van Lent and left message with Nicole Halsey with respect to excavation if structurally feasible requirement. 12/9/09-Vought-Received email copy of letter from JP Van Lent to Zurich Environmental (Paplanus) summarizing issues of 12/7/09 site visit including probably DEC requirement of stained concrete removal, participant list in meeting, requirement of existing conditions survey by Bronzino, determination of footing depth via borings, note that DEC has regulatory say over specifics of approach, note that he contacted DOB Micheal Maffei(Head of Construction Division in DOB in Brooklyn) and proposal that Zurich retain professional engineer to perform existing conditions survey so that it is performed by a party independent of Bronzino as he will be possibly performing excavation). 12/16/09-Vought-Received email from Werle that Fenley & Nichol is expecting to hear tomorrow from Mr. Bronzino concerning the results of last Mondays meeting at the Mathieu's. A plan outlining the investigation of the basement footings, inventory of the building's current structural issues and remediation of the concrete staining is expected shortly thereafter. Roux will review this plan with Zurich as soon as we receive it. Additionally, Brian Linehan from F&N will be meeting with Building Dept personnel at the site tomorrow as part of the BOD permit application process. Received second email from Werle that I just spoke to the structural engineer- I was starting to lose my patience- and he has just sent a letter to Fenley & Nichol outlining what is necessary to move forward: basically a third party structural inspection and a test pit to evaluate the footings. I've organized a conference call with Brian Linehan and Bronzino, the structural engineer for 4 PM- My goal is tot set up a schedule to get the inspection and test pit work done next week. Hopefully we'll then be able to do the excavation the week between Christmas and New Years- at least that's my hope. We'll have to see how much review JP and the Mathieus want before committing to a plan. I will stay involved from here on in and not rely on F&N to make sure things keep moving forward. I will brief Amy this afternoon as well. 12/16/09-Vought-Received copy of letter from Bronzino dated 12/14/09 addressed to F&N Linehan. Based on our visual inspection, we found no signs of recent damage to the foundation and the overall

MATHIEU RESIDENCE (Continued) **S110044421**

condition can be classified as good . We found no visual cracks in the rubble walls that normally accompany building settlement and found no signs of vertical deflection in any of the cellar beams or joist in the locations of the foundation walls. Cracks wre found on all three floors in the areas adjacent to the windows suggesting that the windows have separated and deflected vertically from the structure. It is our opinion that these cracks are relatively old and were not caused by the recent remediation work in the cellar. Our opinion is formed based on the lack of visible signs of damage to the foundation wall in the cellar as well as evidence of paint within several of the cracks adjacent to the windows. The location of the paint suggests that the walls were painted while the cracks were already present. With respect to the additional removal of stained concrete, It is our recommendation that, prior to the start of any removal of concrete or soil, an existing conditions survey of the structure is completed to document any existing structural anomolies in place before we start work. This survey should include crack monitors and optical tags to detect any settlement or deflection of the structure while remedial work is being performed. Once survey is completed, recommendation of for test pit to be hand excavated to determine the exact location and construction of the existing building footing. This information will be needed to determine the amount of soil that can be safely removed adjacent to the footing in the cellar. After a scope of work can be finalized and permitted via NYCDOB. 12/17/09-Vought-Conference call at 11:30am to discuss additional soil and concrete excavation and structural requirements. Particpants included: Urda, Vought, Werle, Linehan, Bronzino, Van Lent, Van Lent Sr, Horan, E. Mathieu. F&N hiring Richmond Engineering to perform independent existing conditions survey which is scheduled for 12/21. Agreement reached that impacted sections adjacent to wall will be removed in 3-4 sections if survey and footing depth is assessed. Bronzino (structural engineer) will be on-site during excavations. Vapor barrier will be installed over gravel backfill. Concrete not to be scarified and entire basement will have concrete pour after impacted concrete excavation. Post holes will be performed in excavation to determine footing depth. Site visit scheduled for 12/22 at 10am. 12/21/09-Vought-Received email from JP Van Lent to Werle/Linehan that I assume that the existing conditions inspection of the premises is occurring today and that the plan for tomorrow regarding testing for the footing etc. remains in place. There are a number of other items that we need information about - are the soil sample results available? Do we have specifications for the epoxy to be used on the surface of the final concrete pour as well as on the bonding agent for interface of the concrete with the concrete to be poured over the newly-contemplated excavation? Also, has the engineer been advised about NYC Department of Building's requirements, if any, for the contemplated excavation work near structural members? Thanks . Reply from Werle to Van Lent that Brian informed me this morning that the inspection was definitely taking place today. I'll remind him about the epoxy spec and soil sample results. We'll talk to him tomorrow about any DOB requirements. See you tomorrow around 9AM. 12/21/09-Vought-Received email from Werle that I was just informed by Brian Linehan that his engineer that was applying for the DOB permit has not received the permit yet and therefore no intrusive work can be started tomorrow. We need to postpone tomorrow's meeting until the DOB permit is in hand and a large team meeting will be productive. There's a chance that work can begin on Wed. I expect to hear from

MATHIEU RESIDENCE (Continued) **S110044421**

Brian with an update tomorrow. The engineering inspection did take place today at 123A Halsey St. and all four floors were inpsected. I apologize for the late notice, I hope no one will be inconvenienced. 12/22/09-Vought-Received email from Werle that Brian has just informed me that he believes the DOB paperwork is going to be submitted tomorrow, pending getting Edwin's signature tomorrow. The expediting engineer is seeking a waiver on an asbestos inspection requirement. We're told the permits should take a maximum of 10 days however there is a chance the permit will be available before 12/31. Brian will keep us informed of the progress at DOB. I'll let everyone where things stand next week. We apologize for the delay however F&N is reluctant to do any intrusive work until the DOB permit is in place to avoid additional DOB violations. Please email me with any questions or comments. 1/4/09-Vought-Called F&N Linehan for update and he received permit application from NYCDOH and is sending it today to Mr. Mathieu via Fed Ex for his signature. If Mathieu signs promptly permit for additional excavation could be received as soon as 1/8. 1/5/09-Vought-Received email from Roux (Werle) that The firm that is handling the Dept of Building permit for F&N is Highpoint Engineering. Brian arranged for Highpoint to fed ex the permit application to Edwin for his signature tomorrow and I believe, informed Edwin of this plan earlier today. The signed application needs to then be returned by fedex to Highpoint for submittal to DOB. We are hoping that if the application moves along as quickly as possible, the permit may be in hand by Friday. If this does take place, the test pit excavation can begin next Monday. I suggest next Wed. 1/13 as a backup date if needed. We will keep everyone informed of developments as they occur. 1/7/09-Vought-Scheduled conference call from 1/8 at 10am to discuss updates on DOB permit, scheduling of tests pits and current status of site. Vought spoke to Werle who indicated that the Mathieus would or have moved back in prior to the SUMMA sampling. Vought received reply from Nicole Mathieu that she is moving back into the residence tomorrow. 1/8/10-Vought-Conference call with Edwin Mathieu, Werle, Linehan, Bronzino, JP VanLent, Horan. NYCDOB permit to be signed by Bronzino today (application already signed by Mathieu) and permit to be taken to NYCDOB. DOB permit to be obtained by 1/14. Upon obtaining of permit, soil borings will be performed adjacent to impacted walls with presence of structural engineer Bronzino. Mathieus will be staying in home tonight for first time and are no longer staying at hotel. Ventilation to be running during test pitting. Excavation to possibly take place during week of 1/18 with new concrete pour the week of 1/25. 1/13/10-Vought-Received email from Roux (Werle) that I've been informed by Brian Linehan that the permit application has been filed but, because of the fine last year, the DOB permit is taking longer than expected. The test pits are definitely off for this week. F&N has suggested setting a tentative schedule for next Wed., 1/20, for the exploratory borings to evaluate the footings and begin remediatingthe stained concrete. We will confirm this date on Friday, if possible.
01/21/10-Vought-Received email from Roux (Werle) that Please see the string of emails below from Larry O'Brian at HighPoint Engineering describing the status of DOB permits. Does anyone have a suggestion on how to move this forward? If there is a fine that needs to be paid, let's discuss how much it is? I'm going to call the expediter Roux is using at our ExxonMobil Greenpoint site and see what he has to say. I will keep everyone in the loop as information comes in on this. Received email from Highpoint (Larry O'Brien) that Once a

MATHIEU RESIDENCE (Continued) **S110044421**

violation is issued, it stays with the site until resolved. When a permit is requested, the first thing they do is look at the open violations. We'll keep you updated. Received email from Nicole Halsey that Hi all: What violation are they talking about? I thought the one issued to our home the day DOB stopped by unannounced was taken care of. (At least that's what I remember being told.) Craig, yesterday you asked us to give you an update. We've begun to notice a stronger smell coming from the cellar on the ground floor. Inside the livinquarters the smell is not discernable. Vought sent email to Werle/Linehan requesting copies of application info and specifics so that info could be forwarded to NYCDOB Helen Gittleson for possible assistance on expediting permits due to vapor concerns. Received email from Highpoint that Permit has been issued. I'll get a copy emailed to you this afternoon and approved plan to you on Monday. 01/25/10-Vought-Received email from Roux (Werle) that Rob Bronzino is available on Friday 1/29 to begin the test pit borings to investigate the existence and depth of the footings at 123A Halsey St. F&N's crew is lined up to begin the work at 9AM this coming Friday. Site visit scheduled by Vought for Friday at 9am. 01/27/10-Vought-Copied on email from Van Lent to F&N Linehan Brian - Would you please provide us with copies of the application for the recently-issued DOB Permit including the plans, diagrams etc. as well as a copy of the Permit? It would be helpful to have these materials for purposes of review before this Friday. I thought that we had previously discussed the homeowner's need for the application materials some time ago.We take it that based on Friday's efforts and results that a scaled structural engineering diagram of the exact conditions discovered (cross-section of the wall showing the bearing condition, the existence of any footing and the relationship to the elevation of the existing concrete floor slab) will be prepared and circulated to the parties. Naturally, we would expect that there would be identification of the location of the test pits and the nature of the underlying soils etc. Thanks . Copied on email response from Linehan to Van Lent I will forward them to you when I recieve them. Brian . 01/29/10-Vought-Site visit by Vought. Onsite was Edwin Mathieu, Werle, Linehan, Horan, Bronzino and F&N crew. Footing depth determined to be approximately 1.5' bg via hand excavation. Ventilation system set up. NYCDOB permit obtained however plans for permit will be ammended and addendum submitted. As per Bronzino, work can proceed under current permit as long as addendum submitted. Excavation of remaining impacted areas adjacent to foundation walls will be performed on 2/1/10 and structural engineer (Bronzino) will be onsite to ensure excacation to bottom of footing but not below. 2/3/10-Vought-Received email from Werle that We are 95% complete with removal and backfill. It'll be complete tomorrow. On Friday 1-5-10 we will be restoring the concrete. Monday we hope to start installing the epoxy, moving on to completion. Based on this news, it seems that a meeting this coming Friday will be productive and it will give everyone a chance to review the extent of the re-excavation of the stained concrete prior to the application of surficial coatings and final concrete cover. I suggest we plan to meet this Friday at 9:30. . Vought sent email confirming site visit on 2/5 at 9:30am. 02/4/10-Vought-Received email from Linehan that Gentleman I will be at a seminar with my boss. Brian McCabe will be filling in for me. We will be installing concrete around the edges tommorow. EPOXY,STAIRS, PIPING TO FOLLOW. . Vought received email from Van Lent that Brian -I will be present tomorrow at the 9:30 meeting. Please respond ASAP to

MATHIEU RESIDENCE (Continued) **S110044421**

Chris Horan's e-mail questions from yesterday. Also, has Highpoint Engineering provided you with the remainder of the materials we have requested? Thank you . Vought received email from Van Lent that Brian -A conference call today is in order based on your responses to Chris Horan's questions. Evidently, unless I'm missing something, the previously discussed concrete pinning is omitted from your plan. This is unacceptable based on conversations on our end and as previously communicated to you without objection. The concrete pour should not occur until we have resolved this subject. Moreover, question is raised about the exact thickness of the replacement slab as to whether or not it is the standard 4 in thickness. Please respond to everyone ASAP . Vought received reply from Werle that Brian and I tried to reach JP in response to his request for aconference call but he was not available. Therefore we have decided that the concrete pour will be postponed and will not take place tomorrow, however, I recommend that the meeting still take place as planned. F&N will pin the concrete as requested on three sides of the excavation-the fourth side along the outer wall cannot be pinned. The excavated stained areas will be available for inspection tomorrow so everyone can see the extent of the removal , the depth of the backfill and the depth of the upcoming concrete pour to fill the excavated areas. Based on the outcome fo tomorrow's meeting, the concrete pour will be scheduled next week when we're certain that all are in agreement with moving forward. Please call with questions. 2/5/10-Vought-Received email from Van Lent that Gentlemen - We understand, but do not know for sure, that the existing replacement slab may be between 2 and 4 in thickness according to Brian Linehan. The 2008 NYC Building Code at section 1911.1 requires a minimum of 3 1/2 inches for slab on grade (earthen). We would like to discuss tomorrow compliance with the Building Code as to both the existing replacement slab and the new concrete pour. It certainly seems that one possibility, if indicated, would be to add a new layer of concrete over the existing replacement slab. Vought discussed site with DEC Austin and floor must be replaced to NYCDOB specifications (if replacement in like and kind is substandard to building codes). Site visit by Vought. Onsite was Van Lent, Edwin Mathieu, Chris Horan, Brian McCabe(F&N). Vapor barrers placed over excavations adjacent to walls and two additional endpoint samples collected from two areas of noted contamination. Samples collected at depth of 16 bg from bottom of excavations. Pins will be installed in new concrete floor for attachement to concrete being poured along excavations adjacent to walls to prevent mechanical settling of floor. After pin installation, self leveling epoxy based concrete will be poured over entire floor (exluding drains and SSD manways). After pins installed, work expected to take additional two weeks. Van Lent satisifed with concrete thickness as it is 3-4 thick. Vapor barrier installation and dowling will begin today. Meeting at site set for next week (2/12) at 9:30am to inspect progress. Edwin Mathieu noted no odors in above residences during recent excavation and backfill activities. 02/12/10-Vought-Received email from Werle that JP/Jeff- Attached are photos from F&N showing the drilling and concrete reinforcing that has been installed. They are waiting for JP and the Mathieu's to approve the work before the concrete is poured. I am very busy with several projects and suggest that JP, since you're in Brooklyn, may be you could inspect the work with Edwin and Jeff, if he cares to join you. If you have any issues you could call me to discuss. I really need the time in the office tomorrow, if possible. I will call to discuss this with you.

MATHIEU RESIDENCE (Continued) **S110044421**

2/12/10-Vought-Received email from Roux (Werle) that Roy van Lent has reviewed and approved the installation of wire mesh that has been installed into the open excavations in the basement. Based on this approval Fenley & Nicol will remove the drums in front of the Mathieu's house on Tuesday in preparation for pouring concrete on Wed. 1/17. If anyone has a question or comment regarding this schedule please contact me or the appropriate project team member. 02/12/10-Vought-Received email from Van Lent that Craig - Possibly a fine point, but as I advised you, Roy van Lent, looking solely at the photographs provided, as a consultant to the homeowners, has no objection to scheduling the concrete pour as the wire mesh is better than nothing for creating attempting to create a mechanical connection between the existing replacement slab and the new pour. As previously pointed out, however, actual structural rebar, minimum #4 pins, would have been preferable because it would ensure a better connection. Please advise in detail of the steps to occur before the concrete pour such as the topping over the surface of the existing replacement slab and the surfaces to be epoxied. Thanks . 02/19/10-Vought-Received email from F&N Linehan that Good Afternoon, we have completed the concrete repairs on Thursday 2-18-10. We will allow the concrete to cure 'til Monday and then begin the installation of the leveling mortar epoxy. Once the mortar install is complete we will install the top coat epoxy. Prior to the install of the top coat epoxy, we will need to install a primer on the walls, there is no need for the primer on the bare concrete floors.Once the epoxy is complete we will finish the stairs, doors and vent piping. We hope to be done by Friday 3-5-10. Brian 3/1/10-Vought-Received email from Roux (Werle) that Brian Linehan reports that Fenley & Nicol will be installing theleveling top coat of concrete tomorrow and possible into Wed. Followingthat an epoxy will be applied to the floor and 18 inches up the walls.The staircase, sub-slab system and the front window will then becompleted. When the epoxy has completely dried, Roux will do the summacanister sampling in the basement and first floor. Although we know ithas been difficult to accurately predict events on this project, it seems that summa sampling will be conducted the week of March 15 orperhaps the week after. When do folks think a meeting at the house to inspect the progress is warranted? March 12, I think would provide a comprehensive review opportunity unless some feel an earlier meeting, perhaps this Friday, would be desirable. Please let me know. Vought replied that he would be out on vacation on upcoming Friday. Vought received copy of reply to Werle from Van Lent that Craig - Thanks for the update. Let me confer with the clients and consultants, and we'll get back to you ASAP. 3/3/10-Vought-Receied copy of reply from Van Lent to Werle that Craig - I think a meeting at the house when the floor is ready for the epoxy (but before it's applied) would be in order. I don't think that there is need for a major huddle by the homeowner's consultants. I'll be there if the timing is acceptable for such a meeting. Thanks . Received email from Werle that I just checked with Brian and he said he's had trouble with his supplier and they will not finish the leveling top coat until net week, although it has been started. He is going to call me when the top coat is complete but before the epoxy goes down so we can meet at the site to inspect. He said to anticipate next Thurs or Fri for a meeting. Any questions or comments on this, please contact me. 03/9/10-Vought-Sent email to Linehan, Werle, Van Lent and NYSDOH Hughes that ...The Department will be looking forward to an all inclusive report upon the completion of the

MATHIEU RESIDENCE (Continued) **S110044421**

remediation that will also include the below and all other soil sample analyticals and site plan. Also continue to keep me posted on the status of the top coat application. Prior to the SUMMA sampling, I would like a brief scope of work submitted including analytical parameters so that I can run it by NYSDOH for approval prior to implementation... . Received email from Roux (Werle) that We've ordered the summa's assuming the sampling will take place the week of 3/22 or 3/29. I'm planning on emailing you a scope of work in the next day or two. I will be touching base with Brian today to see if a Friday meeting this week is warranted. I think it probably will be. 3/9/10-Vought-Received email from Roux (Werle) that Brian Linehan has reported that the self leveling concrete installation is being completed today and tomorrow. I think a meeting on Friday morning at 9:30, as usual, will be productive. An inspection of the status of the basement prior to the installation of the epoxy will be the primary objective. Roux has ordered the summa canisters in preparation for final indoor air sampling which we are hoping will take place the week of 3/22. A work plan specifying the indoor air sampling procedures will go out to everyone shortly. Please contact me with questions or comments. 3/10/10-Vought-Received email from Roux (Werle) that As requested, attached please find Roux Associates' Indoor Air Sampling Work Plan that describes the procedures and protocols that will be utilized during the collection of samples at 123A Halsey St. TracyBispham, a Roux project hydrogeologist will conduct the pre-samplinginventory and the actual sampling. Tracy has been responsible for the majority of the residential air sampling at the ExxonMobil Greenpoint project and has extensive experience with the full range of issues associated with the collection of indoor air samples. Vought received reply from NYSDOH Hughes that Craig, Our (NYSDOH) only comment is I did not see any reference as to the minimum reporting limit for the individual compounds. We specify this level to be 1 microgram per cubic meter of air or less so that the results can be adequately compared with background values. Vought received email from Van Lent to Werle that Dear Craig - Can you provide us with MSDS sheet[s] for the epoxy [product 7100?] [and any other products] to be put down? Please confirm that there are no inhalation etc. hazards from the epoxy etc. to the residents. Am I correct that there is waiting period (per Sherwin Williams) from application of the leveling compound before application of the epoxy of something like 28-days? If I recall correctly (not sure), the Sherwin Williams application instructions referenced the need for a primer before application of the epoxy? If so, is primer needed over the leveling compound before application of the epoxy? Vought received copy of reply from Werle to Van Lent that JP- to respond to your questions in order: I just spoke with Brian and he will send out the MSDS for the epoxy tomorrow morning. This MSDS has already been sent to Chris in February, who reviewed the form and had no issues with its use. That was the basis for F&N ordering enough of the product for application after the meeting on Friday. There are no inhalation hazards from the product- it's a specially formulated low-VOC epoxy for interior use. Epoxy coverage of oil stained floors is the routine recommendation of NYSDEC in situations like this. An epoxy primer is the first step in the epoxy process. There is a 24 hour waiting period (not a 28 day period) between the installation of the leveling compound and the epoxy primer. Vought received reply from Van Lent to Werle that Thanks Craig - If the epoxy is from Sherwin Williams, what I saw from SW were not MSDS docs. If Chris has

MATHIEU RESIDENCE (Continued) **S110044421**

any additional questions or comments, I'll leave it to him to e-mail you. Received email from Werle that Attached is a chart showing reporting limits for summa samples at the Test America Burlington lab we are using. All limits are significantly below DOH requirements. Site visit set of Friday 3/12 at 9:30am. Vought received copy of email from Werle to Van Lent that I've asked Brian to bring the MSDSs for the primer and harder to the meeting tomorrow. We'll talk about the application issue tomorrow- although it seems to me that if the leveling mortar says it can accept epoxy after 24 hours that supercedes the epoxy instructions which are intended for a primary concrete pour and not a thinner coat of a specialty product. I'm sure F&N can wait 28 days to finish the project, if prolonging this is what you want. 3/12/10-Vought-Site visit with Van Lent, Werle, Edwin Mathieu and Linehan. Removal of impacted soil adjacent to foundation walls, collection of endpoint samples, backfill with gravel and vapor barrier and application of concrete skim coat completed. Primer will be applied Monday and ventilation units will be running during and after primer and epoxy application. SSD blower and stairwell scheduled to be installed next week as well as SSD piping on outside of building. SUMMA sampling tentatively scheduled for week of 3/29. Vought noted to all parties that due to completion of backfill and concrete application, that DEC would most likely not be performing site visits as SUMMA sample review could be done via the office and assistance of NYSDOH Hughes. 3/26/10-Vought-Received email from Werle that I just want to confirm that Tracy Bispham and I will be coming to Edwin and Nicole's house on Tuesday morning about 9 AM for Tracy to conduct the product inventory. She will be setting the 8 hour summa canisters on Wed. morning and recollect Wed. afternoon. If there is any problem with these arrangements please email me over the weekend or on Monday. I will be in court on jury on Monday but will be able to check my email at lunch time. Otherwise we'll be in Brooklyn on Tuesday morning. Received second email from Werle with correction that summas are 24 hour and not 8 hour. 3/27/10-Vought-Received email from Ediwn Mathieu that Can we move the appointment to Wednesday? Nicole and I won't be able to be there on Tuesday morning. 4/9/10-Vought-Coped on email from Roux (Werle) to Edwin Mathieu that I spoke with Brian this morning and Fenley & Nicol expects to begin work on the remaining items this coming Wed. with an expected finish by Friday. They still need to install the fan and outside piping for the sub slab depressurization system. The piping to the roof needs to be steel and a lift will be required to put this pipe into place. A door needs to be installed in the front of the basement where the window was. The front hallway needs to be cleaned when when all other work is done. They expect to be done by next Friday. Please let me know if you have any other questions. 5/10/10-Vought-Copied on email from Roux (Werle) to Edwin Mathieu that Edwin/Nicole-Please let me know if Fenley & Nicol have completed the work restoring the basement. I am preparing the final report and want to verify that the work is complete. Thanks for your help. Craig Received email reply from Mathieu to Werle that Hi Craig, Fenley & Nicol still haven't finished the work in the basement. Also we still haven't received the money for our expenses from December to January. 5/11/10-Vought-Copied on emails from Horan and Van Lent to Werle that Craig - Chris beat me to the punch on the air results. It also appears that the wrap-up of the remediation/restoration is lagging. Would you also please advise us on that subject? Thanks JP and Craig- Have you received the air sampling results? can you forward the

MATHIEU RESIDENCE (Continued) **S110044421**

laboratory reports to me? Thanks. Chris Received email from Werle that I spoke with Brian Linehan today and he informed me that F&N has completed the installation of the new door where the window was in the front of the basement. The work that remains to be done includes the installation of the blower motor in the basement and connection to the SSDS and the installation of the external exhaust stack from the rear basement window up to the roof. These activities require: 1) an electrician for the blower motor; and 2)a lift to hoist the metal piping up to the roof. These specialized requirements are why there has been a delay. Brian has the work scheduled for next Tuesday 5/18, He expects to be done within 2 to 3 days. If there is going to be a problem on his end with these arrangements, he will let me know on or before Tuesday. If anyone has any questions concerning this work, please let me know.Thanks Craig 6/2/10-Vought-Receieved call from and spoke to NYSDOH Hughes who reviewed SUMMA canister results and noted that levels are below background concentrations for homes with heating oil. Hughes will send email for teleconference.
6/3/10-Vought-Received email from NYDSOH Hughes. Vought also received email from Werle that The sub-slab depressurization system (SSDS) is scheduled to be completed by Monday, June 7 based on conversation with the Fenley & Nicol project manager, Brian Linehan.
6/4/10-Vought-Teleconference with NYSDOH Hughes, NYSDOH McDonald, Roux (Werle) and Vought. SSD installation will be completed by 6/7 excluding installation of riser above roof line. Riser will have to be installed by chimney contractor hired by F&N. NYSDOH will send summary letter of results review to DEC. Vought reviewed Remedial Action Report from Roux (Werle) dated 5/27 and received via email on 5/27/10. Report includes chronological overview of oil spill and remediation response as well as soil endpoint analyticals and indoor air analyticals. Soil analyticals show: 16,000ppb toluene(HB1 3'bg), 19000ppb ethylbenzene(HB1 3'bg), 70000ppb xylene(HB1 3'bg), 58000ppb napthalene(HB1 3'bg), 16,000ppb xylene (Well Across From Boiler Room), 47,000ppb 1,2,4-trimethylbenzene(Well Across From Boiler Room), 14000ppb xylene(Boiler Room Door), 33,000ppb 1,2,4-trimethylbenzene (Boiler Room Door). Indoor air samples collected on 4/2/10. Vought received email from Werle that I just checked with Brian Linehan of Fenley & Nicol about SSDS details. The blower motor has been mounted outside not inside the basement. A flow meter has been mounted inside so the homeowner can easily determine if the system is working. The piping beneath the floor and on both sides of the blower including the entire stack going to the roof is four inch diameter. The outdoor piping is stainless steel. F&N 's people are working at the site today and will complete the work on Monday. Vought sent email to JP Van Lent requesting his comments or concerns after review of the Summary Report submitted by Roux.
6/7/10-Vought-Received email from Van Lent that Jeff -- I haven't had an opportunity to look at the report in-depth or to speak with Chris Horan about it. I will say that we will be looking at the report very closely, among other things, because of potential litigation arising out of this matter. JP 6/8/10-Vought-Teleconference with DEC Austin, DEC Vought, NYSDOH Hughes and NYSDOH McDonald. NYSDOH will require operation of SSD for one year with monthly PID monitoring of system. NYSDOH will draft letter and send to Vought. DEC Austin noted that upon reception of letter from NYSDOH, spill to be transferred to Petroleum Remediation Unit. 6/10/10-Vought-Received email from Van Lent that My e-mail is jpvanlent@cullenanddykman. The mailing address is: Jean-Pierre van Lent Cullen and Dykman 177 Montague Street

MATHIEU RESIDENCE (Continued) **S110044421**

Brooklyn, New York 11201 Jeff -- we will have comments on the Roux letter and ask that you await those. Thanks DEC requires: 1)operation of SSD for one year with monthly PID monitoring of system. 2)transfer of spill to Petroleum Remediation Unit. 6/11/10-Vought-Spill transferred from DEC Vought to DEC Patel as per DEC Austin and Vought transfer to Section A. 06/11/10-Hiralkumar Patel. 1:45 PM:- received email from Mr. Lent with letter. Mr. Lent mentioned that they will review the Roux's report and will send response by end of 06/17/10. 06/14/10-Hiralkumar Patel. 2:21 PM:- received letter from Mike from NYS DOH recommending operation and monitoring of an active SSD system. Mike mentioned In summary, the April 2 air testing data show that the indoor air of the Mathieu home did not appear to be adversely affected by fuel oil vapor contamination. Novertheless, we recommend the ASD (active sub-slab depressurization) system be operated in order to minimize the potential for residual fuel oil to affect the indoor air. 06/16/10-Hiralkumar Patel. discussed with DEC Austin, DEC Vadim and DEC Vought regarding possible transfer of this case into remediation group as requires long-term monitoring of an active SSD system. Vadim requested meeting with DEC Amar to discuss this further. DEC Austin discussed case with DEC Amar and concluded that the spill case will be handled in spills unit. Austin asked to contact Mike Hughes at NYS DOH about frequency and type of monitoring. 2:57 PM:- spoke with Mike at DOH. asked him to send email/letter specifying monitoring frequency and method (PID or air sampling). Mike mentioned that as there is no odor complaints from owner currently, he recommends monthly PID monitoring only, but if anything change (either higher PID or odor complaints), they may require air sampling. Mike will send email with details. 06/17/10-Hiralkumar Patel. 9:46 AM:- received email from Mike from NYSDOH. To clarify, I recommend a small monitoring port be installed in the discharge side of the depressurization fan to allow access for taking direct readings with a calibrated portable photoionization detector capable of measuring organic vapors in the low parts per billion range. System effluent readings should be taken and recorded on a monthly basis over the course of the year. At the end of the year the NYSDOH, NYSDEC and staff from the New York City Department of Health and Mental Hygiene can discuss the data and determine, in conjunction with representatives for the Mathieu's, if the system can be turned off; if additional testing is warranted; or if the system should continue to run. hired by insurance company overseeing cleanup** Roux Associates Ph. (631) 232-2600 email: cwerle@rouxinc.com Brian Linehan **cleanup contractor** Fenley & Nicol Environmental PH. (631) 586-4900 (O) (516) 768-1765 (C) email: blinehan@fenleynicol.com 4:05 PM:- spoke with Ursula at Ark Supply to get person's name who is incharge of this oil copmany. she refused to give anybody's name and asked to send letter to the office address. 4:11 PM:- left message for Ms. Allen as Zurich environmental sounds like environmental company and not insurance company. 07/30/10-Hiralkumar Patel. 9:07 AM:- received call from Ms. Allen who confirmed that Zurich Environmental is the insurance company. 9:11 AM:- received call from Craig inquiring case status. informed him that based on NYSDOH's recommendation, the Department requires monthly monitoring (via PID) of an indoor air and SSDS exhaust point, for a minimum of one year. 10:27 AM:- sent letter to Ursala (certified mail: 7009 0820 0000 8687 1279) requiring operation of an active SSDS for a minimum of one year and monthly PID monitoring of indoor air and at SSDS exhaust for a minimum of one year. letter emailed to DOH Hughes, Mr. Mathieu, Mr. Lent, Mr. Horan, Ms.Allen, Ms. Paplanus, Craig and Brian. 08/19/10-Hiralkumar Patel. 3:19 PM:- received email from Craig. he inspected SSDS with Brian and Tracy Bishpham. when they turned on SSD system, air was being drawn into the three floor drains reducing the sub slab collection of vapor. so, F&N will install polyethylene liners immediately below the drains to seal the drains and optimize the SSDS s extraction of vapor from beneath the slab. additionally, a sample tap has to be added to the effluent piping in the basement so that the required effluent monitoring can be conducted. F&N will do required changed on 08/27/10. Craig mentioned that Roux will do monthly PID monitoring at five different points: SSDS effluent sample tap, basement breathing zone- 60 inches off the floor, basement- floor level, first floor- hallway, first floor- kitchen. PID monitoring will start on 09/17/10 and be conducted on the middle of Friday of each month. 09/29/10-Hiralkumar Patel. 11:27 AM:- received email from Craig including monthly monitoring report. found 2599 to 7488 ppb on PID at the effluent pipe and below 50 ppb inside building. 12/06/10-Hiralkumar Patel. 2:27 PM:- received email from Craig including monthly monitoring report. at the effluent pipe found 301-497 ppb in Oct. 2010 and 1309-2243 ppb in Nov. 2010. found high PID readings inside building. as per Mr. Mathiew, the first floor was painted on couple of days ago the PID monitoring. 01/03/11-Hiralkumar Patel. 11:12 AM:- received email from Craig including monthly monitoring report. found 2670 to 3332 ppb on PID at the effluent pipe and below 44 ppb inside building. 02/14/11-Hiralkumar Patel. received copy of email from Mr. Mathieu to Craig. Mr. Mathieu mentioned that he found some oil spotting in back of the house. discussed with DEC Austin and DEC Vought. Austin asked to inspect site. 02/17/11-Hiralkumar Patel. 10:10 AM:- spoke with Edwin Mathiew and scheduled a site visit at 9:30 AM tomorrow morning. 02/18/11-Hiralkumar Patel. 9:30 AM:- visited site. Mr. Mathiew left note regarding observation of oil stains in two areas: one by washer/dryer and another by gas meter. inspected both site. found a hole in ground by washer/dryer, which was covered by plastic. don't know the size of the hole, but found an old copper line in ground right near this hole (in area between the hole and foundation wall). Mr. Mathiew had wood plate on top of plastic cover. found stain on wood plate and this stain area was right above the copper tube. very minor odors found in stain on wood. no sign of oil seepage found on

MATHIEU RESIDENCE (Continued) **S110044421**

floor around copper tube or exposed soil in the hole. found some brick pieced in hole which looks like oil drops in pics taken. inspected gas meter area and could not find any location with oil seepage. found some red colored small cobbles in area underneath the hatch and these cobbles looks like oil stains in pics taken. (see pics on e-docs). 04/28/11-Hiralkumar Patel. 4:16 PM:- sent email to Craig and asked him to submit monthly monitoring report for Jan. to Apr. 2011, by end of 05/02/11. email copied to Mr. Horan. 05/03/11-Hiralkumar Patel. 2:15 PM:- received monthly air screen results. detected odor of dish detergent in kitchen and upstairs hallway during Jan. and Feb. 2011 screening. during Feb. 2011, noticed hydrocarbon odors in front portion of basement (towards Halsey St). also during Feb. 2011, based on complaint from Mr. Matheiu, Craig screened area where stain found on plywood near washer/dryer area. found 80-372 ppb underneath the plywood and 7-33 ppb in breathing zone. during Apr. 2011 monitoring, found higher readings on PID in basement and upstairs, compare to previous readings. Craig noted that first floor and basement area were being renovated and paint fumes and dust were noted in both areas. 06/01/11-Hiralkumar Patel. received monthly air screening results (at 2:32 PM on 05/31/11). found 1945-2861 ppb on PID at the effluent pipe and below 152 ppb inside building. 08/26/11-Hiralkumar Patel. 1:40 PM:- received email from Craig including monthly air screening results. in Aug. 2011, found 2396-3004 ppb on PID at the effluent pipe and below 68 ppb inside the building. 12/15/11-Hiralkumar Patel. 3:31 PM:- received email from Craig including monthly air screening results from Sep. 2010 to Sep. 2011. in Sep. 2011, found 172-2138 ppb on PID at the effluent pipe and below 226 ppb inside the building. laundry detergent odor detected in basment and mountwash odor detected on first floor. 01/11/12-Hiralkumar Patel. 11:15 AM:- sent email to Mike at NYS DOH and asked for comments. 03/28/12-Hiralkumar Patel. discussed with DEC Austin about air monitoring results. he asked to discuss with DOH. 2:08 PM:- sent email to Mike at NYS DOH with copy of air monitoring data and asked for comments. 03/29/12-Hiralkumar Patel. 8:05 AM:- received email from DOH Mike. he mentioned that effluent appears to still have a significant source of VOCs. he also mentioned that the indoor air levels appear to be similar to background. he inquired if effluent was filtered before exhausting to the atmosphere. 11/17/14-Hiralkumar Patel. 12:07 PM:- spoke with Craig regarding any filter on passive venting system effluent pipe. he confirmed that there was no filter on effluent pipe and they have not responded to site since Sep. 2011. 11/20/14-Hiralkumar Patel. 11:26 AM:- left message for DOH Mike. 01/12/16-Hiralkumar Patel. 1:26 PM:- sent email to Mr. Mathieu requesting call back. 01/13/16-Hiralkumar Patel. 10:18 AM:- received call from Mr. Mathieu. inquired him about any air quality issues within building due to oil spill. Mr. Mathieu confirmed no more odors in the building and case can be closed. 10:27 AM:- spoke with NYSDOH Mike. based on available information and confirmation of no issues from Mr. Mathieu, Mike mentioned that DOH has no further requirements and case can be closed. case closed based on available information. 11:05 AM:- sent spill closure letter to Ark Supply. letter emailed to Mr. Mathieu and Mike.

DEC Memo:	leaking oil tank caller says oil tank is leaking and oil company knows about it
Remarks:	10/18/22-Hiralkumar Patel 6:23 PM:- left message for Carl. 6:31 PM:- received message from Carl. 6:47 PM:- spoke with Carl. he mentioned that the site has one (1) 275 #2 oil AST. a small amount of spill was noted on basement floor beneath the tank as a result of small leak in

RESIDENTIAL (Continued) **S129115803**

tank bottom. oil company responded and placed a magnetic patch on the leak point and has cleaned up spilled material on basement floor. Carl confirmed no petroleum odors within the building. he stated that oil company will remove the faulty tank tomorrow and install a new tank. asked him to send site pics. 10/19/22-Hiralkumar Patel. 10:20 AM:- left message for Carl. 10/20/22-Hiralkumar Patel. 7:52 AM:- spoke with Carl. he mentioned that Paragon Oil has transferred oil from the faulty tank into barrels and now waiting for installation of a replacement tank. he also stated that there is no odor complaint from on-site tenants. asked him to submit site pics, contact info at Paragon Oil and contact info for building tenant. 10/21/22-Hiralkumar Patel. received pics form Carl (at 11:28 PM on 10/20/22). pic shows stained surface around aboveground tank. 1:28 PM:- left message at Paragon Oil (718-252-9000). 1:34 PM:- left message for Carl. 1:37 PM:- received call from Frank from Paragon Oil. he mentioned that they pumped out leaking tank and cleaned up spilled material on basement floor. Frank stated that the basement floor was found in good condition. 1:43 PM:- sent email to Frank (paragonoil@gmail.com) and asked him to submit cleanup summary and site pics. 10/24/22-Hiralkumar Patel. received email from Frank (at 11:37 AM on 10/22/22) including site pics. he mentioned that oil company received an odor complaint on 10/19/22. the oil company technician discovered a minor breach in the oil tank and placed a patch to stop the leak. approx. 10-15 gal of oil had leaked. oil company cleaned the concrete floor using oil absorbent and emptied out the tank of remaining oil. odor neutralizer was deployed over several days to aid in eliminating the oil smell and the cellar hatch was left open in order to ventilate the tank room. 10/28/22-Hiralkumar Patel. 8:01 AM:- spoke with Carl and inquired him about status of tank replacement. he mentioned that he has paid deposit for new tank installation, but the oil company is waiting for approval from the department. 8:04 AM:- sent email to Frank requesting a call back. 11/15/22-Hiralkumar Patel. 10:51 AM:- spoke with Carl inquiring updates. he has no knowledge of removal of old tank or installation of a new tank. asked Carl to send tenant’s contact info. 10:53 AM:- spoke with Frank at Paragon Oil. he stated that they are unable to reach property owner and have not discussed any tank replacement work. 10:57 AM:- called Carl again but no response and could not leave message as voicemail box was full. 11/17/22-Hiralkumar Patel. 1:30 PM:- visited site. 2nd floor tenant provided access to the building basement. noted 55-gal drum being used for temporary oil storage. an empty 275-gal AST also noted in the basement. a small container is placed beneath the tank to catch dripping of any remaining oil. basement floor beneath/around the tank was found in good condition. no petroleum odors were noted in the basement or 1st floor hallway. Jamie Fox **building super** Ph. (917) 670-2594 case closed.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	RESOURCE: UNKNOWN CONDUCTED A SUBSURFACE INVESTIGATION IN THE BASEMENT OF THE BUILDING. 3 SOIL BORRINGS WERE CONDUCTED TO A DEPTH OF 4 FEET, SOIL SAMPLE ANALITICAL RESULTS INDICATE LEVELS, CONCENTRATIONS OF MATERIAL BETWEEN 330 PPB AND 1.3 PPB. HASNT BEEN CLEANED UP
Remarks:	2/22/05 - Austin - Had phone conversation with Mustapha of Hydrotech - This site has PCE contamination; as per prior phone call, they will dig out hot spot, and submit post-ex sample results to DEC, with their determination that site meets TAGM objectives - Mustapha indicated that they would proceed with hot spot excavation and sampling. - end 3/11/05 - Austin - Received and reviewed 2/11/05 investigation report from Hydrotech. Replied to the report via 3/11/05 letter, wherein we expanded the number of excavation samples and informed the consultant to get NYCT concurrance before excavating adjacent to the subway. - end 4/29/05 - Austin - Received and reviewed 4/5/05 report from Hydrotech entitled Soil Excavation Report - 36 Macon Street, Brooklyn, NY , which described the excavation and post-ex sampling results. Based upon the information provided in this report, the Department is closing this spill in our records. The NYCT was informed by DEC of the excavation, after the work had occurred. No further remedial action is required - end

DEC Memo:	Sangesland spoke to Tom Butler with Vijax Fuel. He said a delivery was made this morning. At lunch time the owner's granddaughter came home from work and smelled oil. NYC Fire Dept arrived, contained the spill and laid speedie dry. The granddaughter then went back to her job. Vijax will send someone to the house today at 4PM when she comes home to inspect and clean the basment area. Unknown how much spilled, unknown what impact was made to the basement area. (could be a minor

FARROW HOME (Continued) **S107417109**

spill all cleaned up, or it could need remediation) Sangesland spoke to Miss Foster granddaughter of owner. She said the spill was rather small and only on the cement floor of the basement. Vijax was in the process of cleaning it up as of 4:30 PM on10/27. Probably OK to close out if we don't hear back from Ms Foster in the next couple of days. 11/8/05 - Raphael Ketani. I called up Vijax and spoke to Thomas Butler. He said that everything is cleaned up and working well in the home. He said Mr. Farrow is happy with the cleanup and how things are working now. So I am closing the case.

Remarks: TANK FAILURE ON A GAUGE: FIRE DEPT. SPEEDI DRI WAS PLACED DOWN;

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Backflowing sewer drain in basement of KFC. The spill contains petro. based products, used clasifyer stip. Spill has been stopped, but don't know source of the petro products. Plumber is on scene. Spill was overpacked by Hazmat and will be the responsibility of the owner to have the packs removed.
Remarks:	12/19/07-Zhune spoke to Rosangela Robles employee from KFC Ph # 718-622-4108. She said Diesel Fuel were coming through a sewer pipe in the basement. The Fire Department stopped the spill and did the cleaned up. Spill was overpacked by hazmat and will be the responsability of the owner to have the packs removed. Rosangela also said There are strongs odors in the store. I called Owner Mr. Clinton Ph # 516-2050678. He will return call back. Clinton called back. He said maintenance people are washing the floor. They are using ammonia. bleach and powerwash. The plumber is fixing the sewer line. Odors are almost gone. 12/20/07-Hiralkumar Patel. case closed.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	VALVE OR GAUGE ON TRANSFER TANK AND STILL INVESTIGATING:
Remarks:	2/15/07-Vought-Daytime runner. As per DEC Sangesland who spoke to Vujnovich, spill occurred last night due to malfunction of transfer pump which transferred oil from tank to boiler. As per Vujnovich, new

COMMERCIAL PROPERTY (Continued) **S108466031**

boiler was installed by oil company last week but transfer pump was not touched and therefore they are not responsible. Vought performed site visit and spill in concrete pit that also contains boiler. Current standing product in pit and heavy odors in liquor store above. Unable to see tank (reportedly 1080 gallons AST). Vought visited liquor store and spoke to manager (David 718-230-5421) and as per David, odors began approximately three days ago. As per Vujnovich last delivery of 504 gallons occurred on 1/27/07. Vought spoke to site owner contact (Debbie 718-756-8177) and told her that she must hire contractor to clean oil as owner is repsonsible for maintenance of tank and lines. Vought explained that if owner felt oil company was resposible than they could litigate at a later date. Vought told Debbie and Donald to call Vought as soon as cleanup contractor was scheduled. Vought received call from Debbie that contractor was Branch Restoration (Melanie 631-563-7300). Vought called Melanie who explained that property owner was not covered under insurance policy and they were performing site visit to determine scope of work and price. Vought called back Wilford to explain that contractor must be hired and phone was answered but hung up approximately six times. 2/15/07- 600pm. Piper left message for Wilford requesting callback. 800pm DEC Piper spoke w/ Laverne requesting Wilford to return call. 2/16/07- Due to non response from phone calls. DEC Piper responded to site. Piper gained access to basement from Liquor store employee key. Piper observed 4 of oil in concrete pit with bathtub line 3-4 above oil. Pics on e-docs. It is highly likely that it is not a solid bottom. 1100a -Piper returned to office and phone Wilford. Wilford spoke to him and he stated that Branch wanted $8000 to do cleanup. It was too much money. Piper faxed list of contractors and CSL to Wilford. fax=718-756-8208. Piper gave deadline of 1200pm to hire contractor. 1145a - Piper recieved call from wilford stating he will get a contractor in. 1200pm Piper recieved another call from wilford stating he will get a contractor in. He has called AL Eastmod and PTC. 1245p- AL Eastmond was not available to respond and PTC was waiting for confirmation. 0100p- Piper responded to site. DLE Jeff Conway to arrive shortly behind Piper. 0200- Piper arrived on site, no DLE, and spoke with Wilford. Wilford stated that he will have his two sons do cleanup. Piper stated that that was insufficient and DEC is now going to perform cleanup. Wilford was resisting me and stated that no one is going to go in his building. Piper offered NAV Law to Wilford and separate S 178- Right to enter and inspect fact sheet. Wilford refused and did not care. Piper phoned Sangesland/ Krimgold to initiate PIN. Milro enroute. DLE conway arrived and Piper informed him to status of cleanup. DLE Conway spoke w. Wilfrod and offered him option to let us in or he will arrest him. Wilford began cooperating. DLE conway called in additional ECO''s to ensure safety and cleanup initiation. 430pm- Just prior to Milro showing up with vac truck, ABC tank arrived. Owner said that he had just called them and they were here in 20 min. Since DEC already initiated cleanup and ABC DID NOT have vac truck, ABC was asked to leave. Milro pulled in as ABC was leaving and Vacced out pit. Upon clearing of free product, a sump a large hole (10 dia) in the cocnrete was observed. Milro took shovel to clean out sump and could not find solid bottom They were down approx 30 . SOil contamination is present and will need to be dug out. Milro hired by DEC to pump out and clean surface spill only. Piper instructed Wilford to have service man in and repair lines to boiler to return heat to the building. Piper left business card with liqor store to call if heat was not returned during day tomorrow.

COMMERCIAL PROPERTY (Continued) **S108466031**

2/19/07-0745a DEC Piper received call from Milro, they were planning on sending crew to didgout soil though Piper said not to. Milro was hired to do surface cleanup only though may need to be hired in future if Wilford is unwilling to continue work. 2/21/07- DEC Piper called David at Liquor Store. He confirmed that heat was restored Saturday and vapors are currently non-existent. 2/23/07-Vought-As per DEC Piper DEC requires: 1)removal of petroleum contaminated debris and sealing of floor 2)collection of endpoint samples from excavation. Vought called Wilford for status of cleanup and offered one time option to pay Milro private rates for response (as per DEC Austin). Vought called Milro and spoke to Basso who will put together private rate bill for Ward. Vought called Debbie and requested that Ward call Milro for private rate to pay bill and determine which contractor will excavate and seal floor. 03/01/07-Vought-No response received from Wilford to date. Vought called Debbie and informed her that if Vought did not receive call from Wilford by 3/2/07 with cleanup contractor, additional criminal violation will be issued by ECO's. Vought spoke to Debbie who inquired to Milro for additional costs required for soil excavation. Milro has not repsonded to date. Vought explained that it was Wilfords responsibility to call contractor and call must be received by tomorrow or case will be referred again to ECO's. 03/15/07-Vought-No call received from Wilford to date. Vought called and left message that if call not received by this afternoon. Criminal violation will be pursued. Vought spoke to Debbie who will call Vought back with [INVALID] by today. Vought received callback from Debbie asking for additional contractor info. Debbie spoke to Milro and Paul Basso busy today and Debbie left message to return call ASAP. Debbie will be back to work on Monday 3/26 and Vought required call back with contractor status on that date. 03/19/07-Vought-Received call from Yasser Lewis (646-772-3057) who is grandson of Mr. Ward. Lewis has hired contractor (Doug Anderson 718-604-4709 and 718-221-2462 ph). Vought called Anderson and he works independently but did confirm that he had part 364 license and was familar with sample collection and analysis protocols. Vought faxed Andeson copy of letter. 03/20/07-Vought-Received call from Milro that they deposited check and it was cancelled so they were unable to obtain funds. Vought called Milro and left message to return call. Vought called Yasser Lewis and he will contact Wilford Ward regarding cancelled check and call back to DEC. Vought received call from Debbie and returned call and she is calling Bank for information and also called Milro and left message. 3/23/07-Vought-Received message from Lewis and returned call and left message to return call. 6/11/10-Vought-Spill transferred from Vought to Piper as per DEC Austin due to Vought transfer to section A. 2/23/16- DEC Piper sent info req to : Ward Family Trust c/o Madison-Ward Realty Inc 247 Decatur Street Brooklyn, NY 11233 3/8/17- DEC Piper discussed site with DEC Austin and DEC Vought. Based on one time event, removal of oil via vac truck, this spill is administratively closed.

Contact Name:	MANHOLE 3238
DEC Memo:	POSSIBLY #6 FUEL OIL IN THE MANHOLE - A SMALL AMT IS ON THE GROUND & SOMEONE PUT SPEEDY DRY ON THAT - SAMPLES TAKEN FOR ID & FLASH POINT
Remarks:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL E2MIS Notes 2/2/01:Appears to be a third party spill from a truck that leaked onto the ground and made it's way into a manhole. 3 gallons of fuel oil leaked onto dirt and a small area on sidewalk next to manhole 3238. No sewers or waterways affected. No smoke or fire. Spill appears contained in structure.Oil ID and flashpoint sample was taken. 2-07-01 0830hrs. Because sample taken from manhole was a solid sample, flashpoint results are not possible, results received for two service boxes that were involved in the same spill should be incorporated into this incident so that incident can de fielded. The two service boxes that were part of the same spill were SB# 20585, LSN 01-01113-001 192 degrees SB# 20586, LSN 01-01113-002 185 degrees Update 2-07-01 17:30hrs. Hole double washed, tag removed, no sump, cleanup complete. Cleanup completed by double washing structure with slix. Liquids were removed by tanker and solids by vactor. No leaking company equipment. Incident closed.

DEC Memo:	oil oozing from wall,saw guage on wall. apt building converted to gas, walled in the oil tank.spill observed by con ed reapir men. ***FAXED FROM REGION AS WRITTEN..
Remarks:	9/20/05, Dyber: No return call from Ed. Refer back to region. Next Step: Perform state funded investigation. 8/30/05, Dyber: Have not heard back from Ed Nugent - left message. 8/15/05, Dyber: Spoke with Ed Nugent. Asked him to get a statement from employee with the facts of the tank removal. 8/9/05, Dyber: Left another message for Ed Nugent. 7/26/05, Dyber: Ed Nugent left a message: He has no paperwork on tank but talked to an employee who remembered the tank removal. I left a message for him. 7/20/05, Dyber: I have not heard back from Ed

1281 FULTON ST (Continued) **S102555945**

Nugent. Left message. 7/8/05, Dyber: Call Glen Miller from Con Edison, who called in the spill. He didn't remember anything. Property owner is Carver Federal Savings Bank, 75 West 125 Street, New York, NY 10027-4512. Ed Nugent, facilities manager, will look into spill and call back (212) 360-8837. He said that the building is a bank. Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Rahman) for review and closure - end 06/13/07 No file available in region 2 office.(SR) 12/11/08 Letter was sent asking pertinent documentation regarding the clean up to Carver Federal Savings Bank (owner as per city tax record) 75 W 125th Street New Work, NY 10027(sr) 03/24/09 Left a voice messege for Federal Savings Bank@(212)360-8837 regarding this outstanding spill case.(sr) 03/25/09 Performed site visit today.Old and dry black stain still persist on the wall that indicates some oil seepage through the wall.A gauge is mounted on the wall, do not show any level of oil.Unsure where the tank is.I walked around the boiler room and showed the spill evidence to Branch Manager, Nicole Bayley.No PBS on the property found. Dec 11'2008 was resent to Joel Sosa, VP General Services & Facilities Carver Federal Savings Bank 75 West 125th Street New York, NY 10027, Ph:(212)360-8816,fax:(212)426-6159. with copy to Nicole Bayley(via facsimile@(718)398-4223).(sr) 08/13/09 December 11, 2008 letter was sent out again with 2nd notice stamped on it to General Services & Facilities Carver Federal Savings Bank 75 West 125th Street New York, NY 10027. Few weeks ago the same letter was sent (via facsimile@212-426-6155)to Thomas Labelle.No response received.(sr) 09/24/09 Rec'd call from Carlose Oplacio @(212)360-8801.He indicated that Carver Bank initiated the investigation with help of a consultant to locate the abandoned tank and extent of the oil release.(sr) 01/13/10 Rec'd report from Action Remediation, Inc.All oil stained wall and floor area has been cleaned up. UST is 3,000 gallon located in the basement.A hole was cut through the bottom of the tank in order to retrieve soil samples.Soil samples came back clean.Tank bottom is 19' below the sidewalk surface.Soil borings were advanced in the sidewlak area next to the old fill port to a depth of 28' below the surface. No water table was encountered.All soil borings near the fill port area are clean.Report in edocs.Case closed.(sr)

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	repairs are being planned/clean up pending
Remarks:	Sangesland spoke to Mrs. Anderson. She says Petro delivered oil and there was a spill in the basement around the fill pipe. Petro has a repair crew scheduled to replace the fill line on Tuesday Nov 3rd (Election Day). She will not get any more deliveries until the repairs are made. Petro # 718-354-3835 - Sangesland called, but got no answer. 10/27/11 - Austin - Spill Transferred from Ahmed to Rahman - end 5/30/14 - Austin - Spill transferred from Rahman to Mahat for followup - end 11/6/14: Mahat DEC Mahat contacted Ms. Oliia Anderson (Property Owner) inquiring about the repairs. She mentioned that the repair has been performed and there has not been any issue associated with the tank. No further investigation is required by the Department.Hence, the spill case will be closed in the database.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Caller reporting a leak of an unknown amount of #2 fuel oil to basement floor. Clean up pending. *** EDIT-2105-1/12/10 CALL FROM CLAUDIA UMANA OF PETRO CO.- ADDRESS AND HOMEOWNER CONTACT CHANGED DUE TO WRONG INFORMATION AT TIME OF REPORT***
Remarks:	01/13/10-Vought-Primary off-hours responder. Called and spoke to

HORSEFORD RESIDENCE (Continued) **S110139551**

Denise Horseford (718-789-8842) and oil was found seeping out of formerly abandoned supply line from old gas heater. Spill was approximately 2' in length on concrete and was cleaned using absorbent material. Horseford indicated that there were no petroleum vapors in residence. Vought spoke to Petro serviceman on-scene who noted that entire supply line ran above concrete and no sewers or drains were affected and as such no subsurface investigation is required. Spill closed by Vought.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	BOTTOM LEAKING TRANSFORMER. LEAK NOT STOPPED.
Remarks:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis Notes: 8/17/01 Found 200gal oil had leaked from transformer onto soil on top of concrete floor of manhole. Historical PCB count is 10ppm. Treating as 50-499ppm. Manhole is sewered. 100gal of oil removed from transformer. DEP issued Commissioner's Order. Sample returned <1ppm PCB. Clean Harbors released from job, Env Ops to continue with own equipment. Double washed with bio-gen 760. No sump. Liquids removed by tanker, solids by vactor. No leaking company equipment. Defective transformer was removed and replaced on 8/22/01.

DEC Memo:	CALLER HAS OIL STAIN & ODOR IN BASEMENT. CALLED MS. BOYCE, SHE SAID THAT OIL IS COMING OVER FROM THE NEXT DOOR NEIGHBOR SINCE 1992, JUST STAIN, NO OIL PUDDLE. REFER TO 9412049
Remarks:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 5/10/04 - AUSTIN - TRANSFERRED FROM TOMASELLO TO TIPPLE - END 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 10/2/08 S. Paige conducted Technical Review of spill file. Dorothy Boyce, a resident of 145 Herkimer Street, called in spill due to oil stain and odor in her basement. The stain and odor were caused by a tank overfill of #2 fuel oil to outside vent area and basement tank area. C. Tomasello (DEC) sent a letter of responsibility to the property owner, NYC Department of Housing and Preservation and Development (HPD), on 4/19/1995. The letter required HPD to remove all contamination and to clean and seal concrete walls and floor with 2 part epoxy paint. C. Tomasello called out Winston Contracting Corporation to clean the basement at 145 Herkimer Street on 11/2/1995. Before commencing work, contractors noticed a stench of #2 fuel oil. Winston Contracting scrubbed walls, ceiling and floor with grease be gone. Contaminated portion of ceiling was removed and replaced with sheet rock. Contractors painted walls and ceiling, and floor was refinished. When contractors left the site, no fuel oil odor was evident and there was also no evidence of a spill outside. A review of the spills database showed that there are no open spills in close proximity to this site as of 10/8/2008. Given readily available documentation and the completed cleanup activities, no further action is required at this time.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Name:	IRIS JOHN
Spiller Company:	IRIS JOHN
Spiller Address:	147 HERKIMER ST
Spiller Company:	999
Contact Name:	IRIS JOHN
DEC Memo:	Caller states he made a delivery to above address yesterday and this date the tank failed causing oil to spill onto the dirt floor. Cleanup pending DEC response/assistance coordination with oil company and callers company.
Remarks:	Hasan Ahmed made a site visit. 02/04/2009-HRAHMED-Day Time Runner-Responded to the site. Called the owner IRIS JOHN at (718) 399-7870. She said she is alone in the home and she wouldn't allow DEC Ahmed to come inside. Called NEW UTRECHT FUEL at (718) 435-5103. As per the oil company they refer the house owner to contact True Blue Environmental Services (Kevin Bartley 718 981 5710, 646 244 0188) regarding cleanup and tank replacement. Called Kevin and left a message requesting callback. Called the owner again and this time she said one of her friend (Charles: 347 200 4738) will assist to inspect the basement. Ahmed went to the basement with Charles. True blue environmental put some sand on the concrete floor of the basement which was soaked with oil. The condition of the floor was unknown. Noticed and old abandoned tank covered with concrete. As per the house owner she never used that tank. The current tank was installed in 1989. Noticed strong petroleum odor in the basement and mild odor in the hallway of 1st floor. Talked with Kevin. As per him they will start cleaning the basement from tomorrow and install one blower in the basement and one in the hallway tomorrow morning. 02/05/2009-HRAHMED-Called Ms. Iris. She said true Blue Environmental started the cleanup this morning. Spoke to Donny of True Blue Environmental. As per him, they cleaned the contaminated sand in drums which they will dispose later, removed the tank and will install a new tank. They ventilated the basement. They will powerwash the floor. As per him the floor has no crack or hole. No house trap in the basement. 02/09/2009-HRAHMED-Spoke to Keith of Tru Blue Environmental (718 981 5710). As per him they power washed the floor, replaced the tank and transported 2 drums of contaminated sand for

RESIDENCE (Continued) **S109414998**

disposal. DEC Ahmed will call Ms Iris to schedule a site visit. 02/11/2009-HRAHMED-Went to Iris residence for a schedule visit at 9:30AM today. Knocked on the door, no body responded. Waited there for 15 minutes and left 2 messages for Iris. No body responded to the second knocking. I came back to Office. 02/18/2009-HRAHMED-Called Iris and left a message requesting call back. Called Charles, a friend of Iris, requesting to contact Iris. He said Iris went somewhere for couple of days. As soon as she returns, he will tell her to call me back. 3/6/09-HRAHMED-Visited the site. Met with Charles. Notice no petroleum odors. The floor looked ok. They epoxy the floor after cleaning. Noticed some oil leaked from the fill-line on top of the newly installed tank during oil delivery yesterday. Charles said the plumber will fix the line. Later in the afternoon Charles confirmed that the line was fixed. This case is closed.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and

CON EDISON (Continued) **1018280990**

Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Site Description: Site Location: The 0.177-acre site is located at 517-523 Nostrand Avenue, in the Bedford-Stuyvesant section of Brooklyn. The site occupies Tax Block 1867 Lots 15, 16, 17, and 18. The site is bounded to the north by Herkimer Street followed by commercial and residential buildings; to the east by a residential building; to the south by a mixed-use residential and commercial building; and to the west by Nostrand Avenue followed by mixed-use buildings and commercial buildings. Site Features: The site is a vacant, vegetated lot. Current Zoning and Land Use: The site is currently zoned C4-5D and vacant. The proposed development will consist of a seven-story residential building. Past Use of the Site: By the late 1880s, there were residential and commercial sites fronting Nostrand Avenue. Commercial buildings were fronting Herkimer Avenue by the early 1930s. Historical records indicate that a dry cleaner was among the commercial uses. The buildings along both streets were demolished by the early 1990s and the site has been vacant since demolition. Site Geology and Hydrogeology: The site is underlain with historic fill up

517-523 NOSTRAND AVENUE (Continued) **S129982658**

to 15 feet below ground surface (bgs). Fill material is underlain by glacial till consisting of brown, fine to coarse-grained sand, pebbles, cobbles, and rock fragments. Bedrock was not encountered during site investigation. Groundwater occurs approximately 50 feet bgs and flows to the southwest.

Env Problem: Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), pesticides and 1,4-Dioxane. Soil vapor was analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for the site include SVOCs, pesticides, PCBs, and metals in soil; VOCs, SVOCs, and PFAS in groundwater; and petroleum-related VOCs and chlorinated VOCs in soil vapor. Soil: Soil data were compared to Restricted Residential Soil Cleanup Objectives (RRSCOs), Unrestricted Use Soil Cleanup Objectives (UUSCOs), and Protection of Groundwater Soil Cleanup Objectives (PGSCO). The contaminants of concern in soil are PCBs, SVOCs, and metals. Total PCBs were detected at a maximum of 71 parts per million (ppm) above the RRSCO of 1 ppm. PAHs were detected throughout the site. The PAHs detected include benzo(a)anthracene detected at a maximum of 29 ppm above the RRSCO of 1 ppm; benzo(a)pyrene at a maximum of 22 ppm above the RRSCO of 1 ppm; benzo(b)fluoranthene at a maximum of 21 ppm above the RRSCO of 1 ppm; chrysene at a maximum of 29 ppm above the RRSCO of 3.9 ppm; and indeno(1,2,3-cd)pyrene was detected at a maximum of 16 ppm above the RRSCO of 0.5 ppm. Barium was detected at a maximum of 1,170 ppm above the RRSCO of 400 ppm; cadmium was detected at a maximum of 11.7 ppm above the RRSCO of 4.3 ppm; lead was detected at a maximum of 2,650 ppm above the RRSCO of 400 ppm; and mercury was detected at a maximum of 3.84 ppm above the RRSCO of 0.81 ppm. 1,4-dioxane was not detected above the reporting limit. No PFAS compounds were detected above guidance values. PFOA, PFOS, and 1,4-dioxane are not considered contaminants of concern at this site. Data does not indicate any off-site impacts in soil related to this site. Groundwater: Groundwater data was compared to the NYS DEC TOGS Ambient Water Quality Standards (NY-AWQS). Chloroform was detected at 18 parts per billion (ppb) which is above the NY-AWQS of 7 ppb. PAHS were detected throughout the site and include benzo(a)anthracene detected at a maximum of 0.07 ppb above the NY-AWQS of 0.002 ppb; benzo(a)pyrene at a maximum of 0.02 ppb above the NY-AWQS of not detectable; benzo(b)fluoranthene at a maximum of 0.04 ppb above the NY-AWQS of 0.002 ppb; and chrysene at a maximum of 0.07 ppb above the NY-AWQS of 0.002 ppb. 1,4-dioxane was detected at a maximum of 61 parts per trillion (ppt) above the EPA Cancer Reference Concentration of 35 ppt. Perfluorooctanoic Acid (PFOA) was detected between 53.8-132 ppt; the maximum contaminant limit, or MCL (drinking water standard) of PFOA is of 10 ppt. Perfluorooctanesulfonic Acid (PFOS) was detected between 14.5-41 ppt above guidance value of 10 ppt; the maximum contaminant limit, or MCL (drinking water standard) of PFOS is of 10 ppt. Data does not indicate potential for off-site impacts to groundwater related to this site. Soil Vapor/Indoor Air: PCE was detected throughout the site ranging from 1.36-13.6 micrograms per cubic meter g/m3. TCE was detected between 1.51-12.9 g/m3. Cis-1,2-DCE was detected between 0.793-15.5 g/m3. Vinyl chloride was detected at 0.511-1.69 g/m3. 1,1,1-Trichloroethane was detected between 1.09-1.22 g/m3. Petroleum-related compounds, namely benzene, toluene, ethylbenzene, and xylenes, were detected between 7.28-16.56 g/m3.

517-523 NOSTRAND AVENUE (Continued) **S129982658**

Health Problem:	As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	65242
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	I05 - Overfill - Vent Whistle
	J02 - Dispenser - Suction Dispenser
	C01 - Pipe Location - Aboveground
	H00 - Tank Leak Detection - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	G99 - Tank Secondary Containment - Other
	A00 - Tank Internal Protection - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	F00 - Pipe External Protection - None
	B00 - Tank External Protection - None
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	Not reported

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	CALLER STATES THAT THERE ARE TWO FULL 55 GALLON DRUMS OF WASTE OIL AND ONE 5 GALLON BUCKET ON THE SIDE OF THE STREET. NO SPILL HAS OCCURED. CLEAN UP IS PENDING.
Remarks:	10/2/08 - Raphael Ketani. I spoke to Donald Eng (646) 584-6483 of NYC DEP. He said that the drums are across from 27 Herkimer Place. He said that they are not overpacked as they are in good shape. NYC Sanitation had called DEP regarding the drums. They contain oil. I told him that DEC will investigate the situation and take care of the contents of the drums. 5/5/10-HRAHMED-This was never included in drum run list, becuase it was not labeled as DRUM RUN. Probably the drum was taken by any City agency. This case is closed.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001

I.S. 258 - BROOKLYN K258 (Continued) **U003394211**

Tank Id: 34477
Material Code: 0002
Common Name of Substance: #4 Fuel Oil (On-Site Consumption)

Equipment Records:

H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
L00 - Piping Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
E00 - Piping Secondary Containment - None
K01 - Spill Prevention - Catch Basin
C03 - Pipe Location - Aboveground/Underground Combination
J02 - Dispenser - Suction Dispenser
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1955
Capacity Gallons: 10000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DER Facility ID:	194921
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 12/12/2003 Lisa from Tristate Envir. (914-592-3385) called to say her crew was on their way to the site. 12/15/2003 Lisa said her crew did a cleanup both outside and inside the basement. Basement floor was cement. Some personal property was impacted. She will check with her crew for more details and get back to the DEC. 12/19/2003 Sangesland spoke again with Lisa at Tristate. The borings taken near the tank were a little high. Tristate will do more work next week and will get back to the DEC. 2/5/2004 Lisa from Tristate called from the site. They're digging out the basement today and will probably get endpoint samples by the end of the day. The homeowner had issues about the length of time it would take to complete the job. Sangesland said the DEC would work with Tristate to turn around the sample results and approve a closure ASAP. 3/5/2004 Sangesland called Lisa for a status update. Tristate still needs to get into basement to finish digout. Scheduling is a problem with the homeowner. Sangesland tried to call homeowner- no answer, no message machine 6/7/04 Tipple reviewed/// report reviewed ///nfa issued
Remarks:	leak in fuel oil tank. tank is 275 gallons and is located in the basement. Ambrose Environmental will be handling the cleanup.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	65086
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

D00 - Pipe Type - No Piping
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
K00 - Spill Prevention - None
A00 - Tank Internal Protection - None
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	06/29/1924
Capacity Gallons:	5000

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	61261
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

F01 - Pipe External Protection - Painted/Asphalt Coating
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
K00 - Spill Prevention - None
I04 - Overfill - Product Level Gauge (A/G)
L00 - Piping Leak Detection - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
C03 - Pipe Location - Aboveground/Underground Combination
J02 - Dispenser - Suction Dispenser
E00 - Piping Secondary Containment - None
I02 - Overfill - High Level Alarm
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1996
Capacity Gallons:	7750
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Region: 2
DER Facility ID: 158293
DEC Memo: 8/1/95 Northland Marketing Corp. (Joseph Macchia) submitted corrective action plan. 8/7/95 Macchia informed DEC that borings were performed and to contact Walter Berninger at (516) 588-2251. Walter received info for Fenley & Nichol borings. Will mail 4 boring logs and associated lab analysis. No map indicating locations. Investigation most probably performed in conjuction with tank test failure and in vicinity of tanks & piping. 8/11/95 Received boring logs from F&N 1/2/89 completed due to TTF. 8/15/95 J. Rommel and K. O'Dowd conducted PBS inspection. Unregistered tanks in leased portion of property (minimum 3). Product in stick manhole for Regular U/L. Apparent antifreeze and transmission fluid surface spills. Apparent recurring spill by diesel pump island. 6 vent lines and 4 tanks. Concrete in very poor condition-increased possibility for surface spills to leach into subsurface. Could not ID location of F&N 12/89 borings. Leasing portion of property since 8/7/95. 8/21/95 DEC approved CAP. CAP to be implemented within 10 days of receipt. An investigation plan will be submitted within 15 days. 9/29/95 DEC sent Northland comments on Investigation Plan. 12/4/95 As per W. Berninger. BEI on site today with air rotary rig. Down 35' and did not encounter GW. Maybe caused by hot air injected (maybe within water table but can't tell). Rethinking approach. 12/6/95 Down hole hammer got stuck, formation caved in. Propose to case top 20' and drill deeper. Air rotary to break rubble and then switch to hollow-stem auger(small diameter). 1/30/96 S. Muller, BEI, called to report 2 wells were installed last week. DTW 68'bgs. Boring near Atlantic clean. He determined that groundwater flow direction probably NNW. He wants to gain access into fenced area. 2 more wells are planned for installation. 1/31/96 On site during installation. 4/15/96 MW-1 Pet. Odor 70', 5.5ppm HNU soil, 3392ppb gw MW-2 Clean, 1.8ppm HNU soil, 1134ppb gw MW-3 27.4ppm HNU soil, 25,436ppb gw BEI recommends additional MWs to define plume and confirm its origin. As per C. Nalbone, flying Citgo flag. Singh (Citygas) operating/testing. Spill 9614595 reported 3/13/97 for product in wells and odor complaints. J. Rommel/K. O'Dowd Notes: 3/20/97 Spoke to Manager of Wendy's, Rommel Smith. Vapor problem during deliveries, especially in women's bathroom. Floor drain in office did not show readings with Crocon. Stated there's usually a delay between delivery and when vapors start. Singh and L. Macchia on site. Checked 3 wells with bailer. S. Muller's sonic tap - 3.875 product detected in MW-3. Required that weekly monitoring and bailing visits start immediately and that DEC be present during first visit. Continue delineation as previously required. Schedule to take readings at Wendy's during next delivery. (Appears to be same situation as Cooper Ave. Singh's delivery trucks not properly using stage II vapor recovery.) Wendy's manager says theres a delay of about 2 weeks but deliveries every week?? 3/31/97 Site visit with S. Muller, BEI, and Singh, Citygas. Macchia did not show. Checked 3 MWs. No product in any. MW-3 strong gas odor. No vapor complaints from Wendy's since last visit. Northland must perform investigation of entire site. Singh states Northland owns carwash, Wendy's and Citgo property. 3/31/97 DEC sent requirements of Northland. Investigation Plan due 4/15/97. 4/2/97 Site visit, K. O'Dowd & J. Rommel. Witnessed delivery of 2400gal regular and 400gal premium. Checked Wendy's electrical circuit board

CITGO STATION (Continued) **S102560459**

bathroom and office drain/house trap. No vapors detected. Wendy's at 1125 Atlantic Ave (718-622-1381). Savoy car wash at 1119 Atlantic Ave (718-622-7429). Thieved 3 MWs. No product. Need to sample wells for dissolved. Odor in all wells is of a new release. Strongest downgradient. Wendy's has an unusually large Brooklyn Union Gas meter in back. Vapors possibly travelling through electrical conduits. Located upsidedown J sanitary vent in back of Wendy's. Where does sewer leave Wendy's? Savoy car wash has a GW pump in front of bay area to supplement city water supply when very busy. Supposedly, they have a LI Well permit, but were unable to present it. He did not know pumping rate. Overflow from wash area discharges to sewer. 4/24/96 Received Subsurface Investigation Report(BEI, 4/15/96) for spill #8808500. MW-1 and MW-2 were installed to 78'bgs and MW-3 to 76'bgs. Total BTEX 3392ppb, 1134ppb and 25,436 respectively. 7/23/96 DEC requires additional delineation. 11/6/97 Berninger requested weekly groundwater monitoring stop. Reply sent 11/25/97 denying request. 8/26/98 DEC approves Investigation Plan (Impact, 8/12/98). 9/24/98 Spill #9807751 reported as UST line failure. 12/98-1/99 Three additional monitoring wells(MW-4, MW-5, MW-6) installed. 2gal water/product was bailed from MW-4 (5.3 LNAPL). 3/10/99 Impact Environmental reports MW-3 and MW-4 observed with 0.13' and 0.74' LNAPL respectively. An automated free product recovery system being considered. 8/19/99 Impact reports a new Mobil station being constructed and all USTs and system components removed. 10/22/99 UST Closure Report submitted (Impact, 10/20/99). 21 USTs removed. 3 X 4000gal gasoline tanks removed from the north area(concrete encased). 9 X 750gal tanks were removed from the south area(concrete encased). 2 X 3000gal, 1 X 1000gal gas USTs in south area were observed to be abandoned and filled with concrete. 5 X 100gal empty tanks removed from the south area. 1 X 1000gal fuel oil tank removed from area 3. Endpoint samples show VOC/SVOC concentrations above soil cleanup guidance in all three excavations. Removed 3200 tons of contaminated soil. All wells destroyed and replaced. Report recommends remediation. Quarterly monitoring reports received 7/24/01, 12/5/01, 8/27/02, 1/15/04 prepared by Impact. 6/13/01, 7/18/01 EFR events for MW-3, MW-4, MW-5. 30gal LNAPL was recovered during each event. The recovery system is a compact skimming system used in conjuction with the SVES. Wells were on monthly product recovery schedule. The remediation system that was installed on the property consists of two soil vapor extraction well clusters(SVE-1/MW-5, SVE-2/MW-3), one monitoring well (MW-4) and two blowers. Screens of SVE wells are set at different levels through vadose and saturated zones. The SVES is manifolded to operate each well cluster independent of the other. (Startup date unknown). 3/10/04 Received 1Q04 monitoring report. MW-3, MW-4 and MW-5 are hottest. MW-6, across Bedford Ave is the edge of the plume. Upgradient wells Mw-1 and MW-2 are clean. May need to install well downgradient/north of MW-4 but appears plume migration is minimal. GW direction varies. Monthly monitoring for LNAPL. SVE effluent is below benzene emission limit(250cfm, 20' stack). 6/18/04 Received 2Q2004 monitoring report. BTEX ranged from ND(MW-1, MW-2, MW-6) to 22526ppb(MW-4). MTBE ranged from ND(MW-1, MW-2, MW6) to 95ppb(MW-5). 6/21/04 Received addendum to approved RAP. Three air sparge wells will be installed to approx 78'bgs, with 2' of screen, connected to 1 pipe. A 3HP compressor is expected to provide approx 8-10CFM at 10psi to each sparge well. Air sparge pilot testing will be conducted to verify pressure, flow and equipment size assumptions. The existing SVE system consists of two SVE well clusters, one well

CITGO STATION (Continued) **S102560459**

MW-4 that is connected to the SVE system and two blower units. Each blower is capable of inducing airflow of 125cfm at approx 60 of water for a total flow of 250cfm. Startup testing will be done upon completion of upgrade activities. SVES & Sparge vacuums, pressures and radii of influence will be measured to ensure vapor capture and sparge system efficacy. Following startup, the system will be monitored weekly for one month to assure proper system operation. 6/30/04 Meeting with Spartan Petroleum and Impact Environmental. Previously an Exxon. Impact plans on system modification. Asked them to confirm the well screen was above the water table and water is where it was last year. Proposing to sparge. March 2003 was the last time free product was detected. Dissolved now. 200tons of contaminated soil was removed. 9/15/04 Received 3Q2004 monitoring report. BTEX ranged from ND(MW-1,2,6) to 8180ppb(MW-4). MTBE ranged from ND(MW-1,2,6) to 644ppb(MW-4). 2/8/05 Received 4Q04 monitoring report. BTEX ranged from ND(MW-1,2) to 7527ppb(MW-4). MTBE ranged from ND(MW-1,2,3) to less than 100ppb(MW-5, diluted). 7/7/05 Received 1Q05 monitoring report. BTEX ranged from ND(MW-1,2) to 5650ppb(MW-5). MTBE was ND in all wells. Estimated 454lbs of hydrocarbons recovered. 8/9/05 STIP effective. 9/28/05 Received 2Q05 and 3Q05 monitoring reports. 2Q05- results from 5/23/05 - BTEX ranged from ND(MW-1,2) to 6448ppb(MW-5/SVE-1). Max MTBE at 3ppb in MW-1. As of 8/2/05, estimated 594lbs of hydrocarbons recovered. 3Q05- results from 8/2/05- BTEX ranged from ND(MW-1,2,6) to 5290ppb(MW-5/SVE-1). 4Q05 - results from 11/14/05 - BTEX ranged from ND(MW-1,2) to 4953ppb(MW-5/SVE-1). 3/30/06 1Q06 - results from 2/15/06 - BTEX from 70ppb(MW-6) to 3590ppb(SVE-1/MW-5). 6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM 11/14/06 Reviewed Quarterly Monitoring Report for 2nd Qtr 2006, submitted by Impact Env. Total VOCs in groundwater ranged from ND to 6760 ug/L in well MW-5. The system is operating in compliance. Reviewed Quarterly Monitoring Report for 3rd Qtr 2006, submitted by Impact Env. Total VOCs in groundwater ranged from ND to 6630 ug/L in well MW-3. The system is operating in compliance. - JAM 3/21/07 Reviewed Quarterly Monitoring Report for 4th Qtr 2006, submitted by Impact Env. Total VOCs in groundwater ranged from ND to 4683 ug/L in well MW-5. The system is operating in compliance. - JAM 6/14/07 Reviewed Quarterly Monitoring Report for 1st Qtr 2007, submitted by Impact Env. Total VOCs in groundwater ranged from ND to 4799 ug/L in well MW-5. The system is operating in compliance. - JAM 11/26/07 Reviewed Quarterly Monitoring Rpt for 2nd Qtr 2007, submitted by Impact Envt'l. Total VOCs in GW ranged from ND to 3833 ug/L in well MW-3. System is operating in compliance. Reviewed Quarterly Monitoring Rpt for 3rd Qtr 2007, submitted by Impact Envt'l. Total VOCs in GW ranged from ND to 3279 ug/L in well MW-5. System is operating in compliance. I called Hal Benjamin at Impact Envt'l and requested that influent and effluent air streams be sampled and analyzed for VOCs. He said he will discuss with RP and get back to me. - JAM 02/09/11: This spill case transferred from J. Maisonave to J. Kolleeny. - JK 01/09/12: Reviewed 2nd Quarter 2011 monitoring rpt by Impact Envt'l (in eDocs), dated 8/10/11 (CD submitted 10/10/11). Results of 5/27/11 GW sampling event show MW-8 had 6,444 ug/L total VOCs (up from ND in Feb. 2011). Rpt says PID screening of AS/SVE system vapor discharge shows discharge in compliance with benzene limit. - J. Kolleeny 02/24/12: Reviewed 3rd Quarter 2011 mon rpt by Impact Envt'l (in eDocs), dated 12/30/11. GW samples collected on 9/12/11 showed low to moderate levels of dissolved-phase contam in wells MW-4 & MW-6; however, MW-5 and MW-8

CITGO STATION (Continued) **S102560459**

were dry and could not be sampled. Rpt says PID screening of AS/SVE system vapor discharge shows discharge in compliance with benzene limit. - JK 03/09/12: I closed spill case 0912321 for waste oil UST at this site. Sent spill closure letter via email to Mr. Harvinder Singh of Bolla EM Realty LLC, stating: Dear Mr. Singh: Please see attached spill closure letter regarding spill case 0912321. A hard copy of this letter will not be forwarded. As noted in letter, spill no. 8808500, for gasoline-related contamination at site, remains open. All monitoring, vapor extraction and air sparging wells at site should remain open for ongoing monitoring and remediation of contamination related to that spill. Feel free to contact me if you have any questions. - J. Kolleeny 02/13/13: On 2/12/13, I sent email to Hal Benjamin of Impact Envt'l, cc's to Kevin Kleaka and Michael Bluight also of Impact: Hal, I haven't received any monitoring rpts for this site since 3rd quarter 2011 rpt; I think I had some discussions with either you or Kevin Keaka regarding work done at site by Exxon-Mobil's consultant (Kleinfelder), and fact that their site plans differed considerably from Impact Envt'l's site plans. But I never heard back from Impact after that. Can you please provide an update on this spill site, and/or let me know who is now project manager for Impact? After sending email, received phone call from Michael Bluight of Impact, who said he is now PM and that they are finishing up monitoring rpts for 4th qtr 2011 and all 4 qtrs of 2012, with sampling of wells installed by Impact and also wells installed by Kleinfelder. He sent follow-up email: Jon, I will be taking over as project manager for this site. I am currently finalizing QMR rpts for Site. Said final rpts will include sampling results from: 4th qtr 2011 (sampled 12/13/11) 1st qtr 2012 (sampled 2/14/12) 2nd qtr 2012 (sampled 6/27/12) 3rd qtr 2012 (sampled 10/5/12) 4th qtr 2012 (sampled 12/28/12) As per our conversation, GW samples were collected during 2nd, 3rd and 4th quarters of 2012, from wells in current monitoring network, and from on-site monitoring wells installed by Kleinfelder East, Inc. during its 2010 Phase II Envt'l Site Assessment work. An annual GW monitoring rpt for 2012, consolidating data obtained from all four quarters in 2012, can be constructed and submitted to NYSDEC in lieu of four separate rpts, if preferred. Please call me if you have any questions and/or concerns. On 2/13/13, I sent email reply: Michael, Thanks for your response, it was nice speaking with you yesterday. Please send a separate rpt for 4th Quarter of 2011, but I like your suggestion of sending one annual rpt for 2012 consolidating data for four quarters of 2012. However, let's return to quarterly monitoring rpts for 2013. Most importantly, rpt for 2012 should include evaluation of remedial progress and recommendations for further actions to move this spill case toward closure. - J. Kolleeny 03/27/13: On 3/25/13, received Quarterly Monitoring Rpt for 4th Quarter 2011 and GW Mon Rpt - 2012 Annual Rpt by Impact Envt'l, both dated 3/21/13 (both in eDocs). On 3/27/13, received email from Michael Bluight of Impact: Jon, we are having a few problems with our UPS overnight service as of late just wanted to make sure you received hard copy (with electronic copy on CD) of rpts for this site? 1st quarter [2013] GW monitoring / sampling event is scheduled to be performed within next 5 to 7 business days. I sent email reply if rpt(s) include any recommendations that require DEC response. Michael sent reply: For Atlantic Avenue, we will still continue monitoring and operating remedial system as before. Only revision was incorporation of certain monitoring wells installed by Kleinfelder during a phase II investigation a few years back and

CITGO STATION (Continued) **S102560459**

deletion of existing wells in profile, located on western side of Site. Majority of detections in GW samples and identified location of dissolved phase in GW, is located on eastern side of Site. I listed our proposed revised monitoring network in conclusions section of 2012 annual rpt. Please call me if you have any questions and or concerns with rpt information and thank again for your assistance. - JK 04/03/13: Received email from Michael Bluight of Impact Envt'l: Jon, just a follow-up for 1143 Atlantic Avenue, Brooklyn, NY. We were planning to conduct next quarterly sampling round tomorrow at site. As per your below correspondence, we recommended revising GW monitoring network to consist of wells: MW-1, MW-4, MW-5, MW-8, MW-E, MW-G and MW-H. We will gauge ALL site wells (helps tighten up GW contour map). Is this recommended revision OK?Thanks as always for your assistance with this project and please call me if you have any questions and/or concerns. I sent email reply: Michael, I've quickly looked over 4th quarter 2011 monitoring rpt and 2012 annual monitoring rpt for this site, and wells you've listed are approved for sampling, but in addition to those wells, I'd like you to also include well MW-6. Well MW-6 helps provide off-site delineation, and had 196 ug/L total BTEX when last sampled in December 2012. Not a very high result, but evidence of an off-site impact that should continue to be monitored. I also want to reserve right to request that other wells be added back into monitoring program, if there are reasons to do so. Please let me know if you have any questions or comments. - J. Kolleeny 04/03/13: Completed review of QMR for 4th Quarter 2011 by Impact Envt'l, dated 3/21/13 (in eDocs). Rpt states that SVE/AS system is operating, recovering hydrocarbons, and that PID screening of vapor effluent indicates benzene is in compliance with discharge limit. GW sampling in Dec. 2011 shows significant impact in well MW-3, with 2,677 ug/L total BTEX (was reportedly ND for BTEX when sampled in May and Sept. 2011, but had 2,940 ug/L tBTEX in Sept. 2009); off-site well MW-6 had 123 ug/L tBTEX (down from 415 ug/L in Sept. 2011). Several important wells were not sampled, e.g., MW-5 and MW-8, nor were any of wells installed by Kleinfelder as part of Phase II Assmt sampled. Rpt states that Impact will attempt to recondition wells MW-5 and MW-8 so they can be sampled in future monitoring events. - JK 04/04/13: Reviewed GW Mon Rpt 2012 Annual Rpt by Impact Envt'l, dated 3/21/13 (in eDocs). Rpt presents data for all four quarters of 2012. On-site AS/SVE system operated throughout period; PID screening indicates effluent was in compliance with benzene discharge limit. GW samples were collected from usual wells in Feb. 2012, and from most of those wells plus wells installed by Kleinfelder in June, October and December 2012. Overall, data show significant GW impacts in wells MW-3, which had 2,730 ug/L total BTEX in Feb. 2012, up from 2,677 ug/L in Dec. 2011 (not sampled in 2nd, 3rd & 4th quarters of 2012); well MW-G, which had 920 ug/L tBTEX in June 2012, 1,190 ug/L in Oct. 2012 and 3,100 ug/L in Dec. 2012 (had 4,794 ug/L tBTEX when sampled in June 2010); and well MW-H, which had 6,050 ug/L tBTEX in June 2012, 3,110 ug/L in Oct. 2012 and 910 ug/L in Dec. 2012. Off-site well MW-6 had 196 ug/L tBTEX in Dec. 2012. Wells MW-5 and MW-8 were not sampled during 2012. Rpt proposes revised well network for quarterly monitoring, comprising wells MW-1, MW-4, MW-5, MW-8, MW-E, MW-G and MW-H (Impact will attempt to recondition wells MW-5 and MW-8 for sampling). As noted above, I sent email on 4/3/13 approving these wells for sampling but adding well MW-6 to monitor off-site impacts and stating that DEC reserves right to add back other wells as needed. Operation and monitoring of SVE/AS

CITGO STATION (Continued) **S102560459**

system and quarterly GW monitoring will continue, with 1st quarter 2013 GW sampling event expected to occur in late March 2013. - J. Kolleeny 03/18/14: Reviewed 2013 Semi-Annual GW Monitoring Rpt dated 11/20/13, by Impact Envt'l, received by email from Julianna de la Fuente of Impact on 12/2/13 (in eDocs). Results of GW sampling in April & June 2013 (i.e., 1st & 2nd quarters 2013) showed well MW-4 had 171 ug/L total BTEX in April 2013 (up from 1 ug/L in Dec. 2012), and had 20 ug/L tBTEX in June 2013; well MW-6 had 546 ug/L tBTEX in April 2013 (up from 196 ug/L in Dec. 2013) and 475 ug/L tBTEX in June 2013; well MW-G had 2,190 ug/L tBTEX in April 2013 (down from 3,100 ug/L in Dec. 2012) and 560 ug/L tBTEX in June 2013; well MW-H had 1,799 ug/L tBTEX in April 2013 (up from 910 ug/L in Dec. 2013) and 2,840 ug/L in June 2013. Well MW-3 has been damaged and could not be accessed for sampling in April/June 2013, but well MW-H is very close by; wells MW-5 and MW-8 were dry and could not be sampled in April/June 2013. Based on data, Impacts recommends continuing with quarterly GW monitoring/sampling from agreed-upon well network. - J. Kolleeny 08/15/14: Reviewed Semi-Annual GW Mon Rpt for 3rd & 4th Quarters 2013 by Impact Envt'l, dated 4/11/14 (in DecDocs). Results of GW sampling in Sept. & Dec. 2013 showed only significant GW impacts in well MW-G, which had 1,499 ug/L total BTEX in Sept. 2013 (up from 560 ug/L in June 2013) and increased to 1,910 ug/L tBTEX in Dec. 2013; and well MW-H, which had 2,594 ug/L tBTEX in Sept. 2013 (down from 2,840 ug/L in June 2013), and decreased to 761 ug/L tBTEX in Dec. 2013. Wells MW-5 and MW-9 were dry and could not be sampled. I sent email to Juliana de la Fuente of Impact, cc to Kevin Keaka of Impact, asking if Impact ever tried to recondition wells MW-5 & MW-8 as stated in an earlier rpt, noting that it's important to sample these wells, which have had high VOC levels in past, and that if wells cannot be reconditioned, they may have to be reinstalled to greater depth to hit GW. I also asked that GW data tables in future rpts include line for total VOCs in addition to total BTEX. - J. Kolleeny 01/22/15: Received phone call from Kevin Kleaka of Impact Envt'l, asking if he could meet with me on 1/28/15 to discuss improvements in GW quality and possibility of shutting down SVE system at site. I agreed to meet on 1/28/15; Kevin sent site map and GW data table with recent sampling data. I asked if he had any SVE system vapor recovery data, he sent table with data from PID screening of system's vapor recovery. Site plan and data tables in DecDocs as brief. - J. Kolleeny 01/28/15: Met with Kevin Kleaka of Impact Envt'l to discuss site. GW data for 4 quarters of 2014 show all wells being sampled below 1,000 ug/L total BTEX, except for well MW-H which had 1,386 ug/L tBTEX on 9/16/14 (but decreased to 798 ug/L tBTEX in Dec. 2014). These wells also show fairly consistent decreasing trends over time. However, well well MW-5 had 1,093 ug/L tBTEX when last sampled in Sept. 2009 and well MW-8 had 3,427 ug/L tBTEX when last sampled in May 2011, but sampling of these wells was discontinued because they have gone dry. According to Kevin, depth to water at site is ~80 ft. PID screening of SVE system vapor recovery shows mainly low PID readings for past several yrs, with temporary increases in first half of 2014 - went from 3 ppm in Dec. 2013 to 127 ppm in Jan. 2014, 21.5 ppm in Feb. 2014, 59.6 ppm in March 2014, 25.8 ppm in May 2014, 16.0 ppm in June 2014, then settled back to single digitsin July 2014 and was only 0.5 ppm in Dec. 2014. Based on decreasing GW contam levels & trends and low hydrocarbon vapor recovery of system, Impact is proposing shutting down system and considering site for spill closure. I asked that system be pulsed,

CITGO STATION (Continued) **S102560459**

that a vapor influent sample be collected for lab analysis, and that another round of GW sampling of selected wells be performed to confirm levels and trends, and that if data support closure in their view, they include risk assessment/sensitive receptor evaluation for residual impacts in report requesting closure. They agreed to these requests. Afterward, Kevin sent follow-up email to summarize discussion at meeting: Jonathan - Thank you again for meeting with me today regarding this site. As discussed, below is a brief summary of tasks we agreed to complete for 1st quarter [2015] pursuant toward closure of spill. 1. A system influent sample will be collected and analyzed for VOCs by TO-14 during next site visit. 2. Remedial system will be pulsed during first quarter. Pulsing will include effluent readings with a PID for possible rebound . 3. Next quarterly GW sampling event for 1st Qtr (likely in March) will only include wells MW-H, MW-4, MW-E and MW-G. DTW readings will be recorded from all on-site wells during above GW sampling event for purpose of providing current GW flow direction. If system shutdown/pulsing doesn t show any significant recovery of residual contamination and next GW sampling data is consistent with and/or lower than existing data set, we will be requesting closure of spill inclusive of a risk assessment. Thank you, please advise if you have any comments based on above points. I wrote back: Kevin, It was nice meeting with you today. My only comment on your summary of today s discussion is that I was thinking that system influent sample for TO-14 analysis should be taken when pulsing system, i.e., after system has been down for a while and then re-started, which would presumably be maximum hydrocarbon recovery one is likely to see from system at this point. If you think this doesn t make sense, please let me know. Another option (though more expensive) would be to collect a vapor sample for lab analysis during next site visit, as you ve stated below, and then collect one more TO-14 sample after pulsing system off and back on (as I suggested above), which would allow a direct comparison of pre-pulsing and post-pulsing hydrocarbon recovery. Kevin replied: Thanks Jonathan - We will collect an influent sample both before system is shut down for pulsing and at end of 1st qtr (likely when we collect GW samples) after a few cycles of pulsing. I agree this will be useful for comparison purposes. - JK 10/20/15: Reviewed Closure Request Rpt by Impact Envt'l dated 9/21/15 (in DecDocs). Rpt summarizes past investigative and remedial actions at site, presents recent & historical GW sample data and system operational data, plus includes risk assessment/sensitive receptor survey in support of spill closure request. Rpt states that total of 21 USTs were removed from site in 1999, and ~3,200 tons of petroleum-impacted soil were excavated and removed. An SVE system was installed in 2000; VEFR events were performed on several wells in 2001-2002, recovering ~325 gals of LNAPL; no LNAPL has been observed in site wells since 2003. In 2004, system was upgraded to include air sparging. As requested by DEC, remedial system was pulsed by alternately being shut down & restarted in Feb. and March 2015; vapor influent samples collected before shutdown and after re-start showed no significant increase in hydrocarbon recovery (in fact, neither sample had significant VOCs), suggesting system has reached limit of effectiveness. GW data for March and June 2015 showed well MW-4 had 23 ug/L total VOCs in March 2015 (down from 909 ug/L in Dec. 2014; had 11 ug/L tVOCs in Sept. 2014) and had 56 ug/L tVOCs in June 2015; well MW-E had 782 ug/L tVOCs in March 2015 (up from 69 ug/L in Dec. 2014) and had 225 ug/L tVOCs in June 2015; well MW-G had 709 ug/L tVOCs in March 2015 (down

CITGO STATION (Continued) **S102560459**

from 1,552 ug/L in Dec. 2014) and had 1,627 ug/L tVOCs in June 2015; well MW-H had 3,940 ug/L tVOCs in March 2014 (up from 1,065 ug/L in Dec. 2014) and had 1,713 ug/L tVOCs in June 2015. Well MW-3 was found to be damaged and was replaced by well MW-H; wells MW-5 and MW-8 have been dry since 2013, and other wells were dropped from monitoring program due to low or ND levels of VOCs. Impact Envt'l concludes that altho VOC levels remain somewhat elevated in wells MW-G and MW-h, both wells show decreasing trends over time. Depth to water at site is more than 60 ft, and GW flow, altho it has varied over time, has been to N or NW since 2013 and wells down-gradient from MW-G and MW-H show impacts in those wells are limited in extent and not migrating. Rpt states that site is likely to remain a gas station. Receptor analysis concludes that altho some residual soil & GW impacts remain at site, considering that bulk of contaminated soil was excavated, AS/SVE system operated on-site for years and had virtually no hydrocarbon recovery towards end of operation, and depth to GW is more than 60 ft, residual impacts are not likely to pose a threat to public health or environment. Based on remedial actions performed and data presented, I closed spill case and sent closure letter (in DecDocs) by email to Mr. Hank Alpert of Spartan Petroleum, Inc. (hank@spartanpetro.com), with cc's to Julianna de la Fuente and Kevin Kleaka of Impact Envt'l. - J. Kolleeny

Remarks:	02/25/10-Vought-Off hours responder. Called Kleinfelder (Sondra Malek Ph:(631) 218-0612) and left message to return call to DEC. Spill assigned to DEC Rahman as site is part of ExxonMobil portfolio review and possible closure or transfer to Albany if necessary. 09/14/10-Farrell-CD File review requested by S. Rahman. Spill closure request for Spill #09-12321 & 09-12250 by (Kleinfelder East, Inc.-Joel Adrian/Alex Wirth-(845)-567-6530) July 8, 2010 SAR prepared by (Kleinfelder East, Inc.-Lisa Messinger/Laurie Smith-(631)-218-0612) May 25, 2010 for ExxonMobil Environmental Services Company, Fairfax, VA. Location of interest: ExxonMobil Station No.12141 (17-TJ8) 1143 Atlantic Avenue Brooklyn, NY KEI (listed above) evaluated recognized environmental conditions (REC) conducted in 12/08 by KEI. Active retail petroleum fuel station with convenience store. A grassy area, a car wash driveway, & further a church (north), Bedford Avenue followed by Quizit Motor Sports, Inc. and an inactive gas station (Gaseteria) (east), Atlantic Avenue and a US Army Armory beyond (south), & a car wash (west). Ground surface elevation is about 75 above sea level, groundwater found at depths of 11.67-67.92 bgs, north and east flow determined. Two tank field observation wells are monitoring points, located at the corners of the tank field. KEI (above) reported ten (10) Federal water-supply wells within 1 mile of the property, one (1) private non-potable well within 300 ft of the property, & one (1) private water well within 1000 ft of the property. REC s include 2 current 12,000-gal gasoline USTs with piping and dispensing units, one (1) current 8,000-gal diesel UST, ten (10) current dry wells utilized for surface storm water drainage, a historical record of gasoline sales and automobile service since the 1930s, and potential impact from several surrounding off-site properties. The property has been indicated to have had 21 USTs removed from site in 1999. Seven (7) previous spill cases have been noted: #8808500 assigned to CITGO/Spartan Petroleum (Follow-up indication of contaminated soil and groundwater from determined air pressure test fail on 4,000 gal UST in 1989. This case remains open and active.). Case #8903335, #9614595, #0111876, #0507954, and #0800461 have all been closed (no description listed), #0513211 (discharge of 20 gal of gasoline from motor vehicle striking

CITGO STATION (Continued) **S102560459**

MPD) opened 2/16/06 closed 3/20/06, & the Spill numbers listed above are open currently due to elevated PID measurements & discovery of a UST in the northeastern portion of the property (included water and several inches of petroleum; also sampled 3/20/10). ERI began Phase II ESA on 1/13/10 with site-wide GPR survey. Five of twelve (5) soil borings were advanced, (5) monitoring wells were installed, and (1) combined soil boring/monitoring well was established beginning on 2/15/10. Results of soil sample analysis included: VOC detect above NYSDEC RSCO in MW-H: Xylenes(63.5ppmppm), Naph(46.3ppm), 1,2,4-TMB(294ppm), & 1,3,5-TMB(92.3ppm) SVOC detect above NYDEC RSCO: MW-A Benz(a)anth(1.65ppm), Benz(a)pyr(1.7ppm), Benz(b)fluor(1.47ppm), Benz(k)fluor(0.85ppm), Chrysene(1.61ppm), & Dibenz(a,h)anth(.528ppm) MW-F - Benz(a)anth(1.11ppm), Benz(a)pyr(1.06ppm), Benz(b)fluor(.753ppm), Benz(k)fluor(0.74ppm), Chrysene(1.06ppm), & Dibenz(a,h)anth(.314ppm) High levels of Barium & Lead also detected On 4/8/2010 groundwater samples were collected and analyzed. The two (2) tank field observation wells & one monitoring well (TF1, TF2, & MW-2) were gauged on 4/8/2010 as well. They were all dry with no presence of LPH. Free-phase product was found in the abandoned UST (above). Results of groundwater sample analysis included (existing wells MW-1 MW-4 were also sampled): VOC detect above NYSDEC cleanup level in MW-1, MW-E, MW-G, & MW-H: MW-1: Toluene(9.9ppb), EthBenz(442ppb), Xylenes(1850ppb), IPB(33.3ppb), Naph(170ppb), n-PB(111ppb), 1,2,4TMB(1210ppb), 1,3,5TMB(173ppb) MW-E: Toluene(143ppb), EthBenz(85.6ppb), Xylenes(2030ppb), IPB(16.8ppb), Naph(100ppb), n-PB(111ppb), 1,2,4TMB(710ppb), 1,3,5TMB(239ppb) MW-G: Toluene(39.6ppb), EthBenz(669ppb), Xylenes(4090ppb), IPB(91.5ppb), Naph(596ppb), n-PB(249ppb), 1,2,4TMB(3030ppb), 1,3,5TMB(796ppb) MW-H: Toluene(55.4ppb), EthBenz(239ppb), Xylenes(2940ppb), IPB(48.4ppb), Naph(338ppb), n-PB(122ppb), 1,2,4TMB(2530ppb), 1,3,5TMB(725ppb) PID MW-B at 68-69 bgs (1,740ppm) PID MW-H at 67 bgs (940ppm) PID MW-K at 67 bgs (940ppm) PID SB-C/MW-E at 68-69 bgs (1,740ppm) Reviewer Recommendations: 1) Further remediation is need at the four locations directly above due to the PID readings and their downgradient position 2) The abandoned UST will have to be purged and removed to confirm that it isn t a source of the contamination at the surrounding borings/wells. If a different process is warranted at this time, then that procedure should be undertaken 3) Surrounding groundwater flow needs to be determined to indicate if off-site sources are contributing environmental factors 10/26/2010: Site transferred from Region 2 to Central Office (Remedial Bureau B, Section C) for management. 11/9/2010: Based on document review and conversations with Region 2 personnel familiar with the case (Kolleeny and Maisonave), the abandoned UST noted under this spill is related to an earlier spill number (88-08500, assigned to CITGO/Spartan Petroleum). This historic spill is currently being addressed under a STIP, and is being managed in Region 2. Therefore, it is recommended that this spill be transferred back to Region 2 for management. (Harrington) 08/17/11: This spill case transferred from J. Maisonave to J. Kolleeny. I was contacted by Jessica Kruczek of ARCADIS regarding plans to close this UST (which is suspected to have been a waste oil or heating oil UST based on small size). She forwarded an email she had sent to Joseph Maisonave of DEC (currently on extended leave): Mr. Maisonave, After identifying locations of utilities at site in advance of UST removal, we are requesting to abandon UST in place rather than remove it. Please see attached Figures (2 & 3) [in eDocs as drawing] for locations of utilities

CITGO STATION (Continued) **S102560459**

relative to UST location (marked as abandoned; we were already preparing for rpt). Please note that there is an unidentified utility within 1 ft of tank, an active water line and AS/SVE components within 2.75 ft, and active sewer and gas lines less than 9 ft from UST. In addition, there is a retaining wall within 3 ft. This makes for a very difficult and potentially dangerous removal. Please advise. After getting Joe M's auto reply, Jessica contacted me, stating that, altho they wanted to remove UST, due to proximity of tank to utilities, components of AS/SVE system, and retaining wall, they prefer to close UST in place. I said that's ok, but they should advance 3 or 4 borings as close as possible to tank, down to 15 ft or so, to collect soil samples and evaluate any possible release from tank. I mentioned that site is being remediated under sp8808500, consultant Impact Envt'l, and Jessica said she would contact Impact and coordinate closure activities with them. She will send email confirming closure sampling plan and schedule. - J. Kolleeny 10/17/11: Sent email to Jessica Kruczek of ARCADIS requesting site update. She called back and said UST was abandoned in place during Sept. 2011, two closure borings were drilled, but in trying to drill 3rd boring, they hit an unmarked gas line and stopped. She said results of soil samples from two borings showed only traces of one VOC (toluene) and several PAHs. They will forward rpt with request for spill closure in several weeks. - J. Kolleeny 10/25/11: On 10/24/11, received UST Abandonment Rpt by ARCADIS (in eDocs). Will review. - JK 12/23/11: Completed review of 10/24/11 UST Abandonment Rpt by ARCADIS. Rpt summarizes UST abandonment activities in Sept. 2011. Top of former waste oil tank was exposed; tank contained mixture of product/water (suggesting tank was tight). Tank was vacuumed out, cut open and cleaned. Three borings were attempted, but only two were successfully advanced to target depth (3rd boring hit an unmarked gas line). Soil data showed no significant soil contam. No boring logs included in rpt; I contacted Jessica Kruczik of ARCADIS and requested boring logs. - J. Kolleeny 01/05/12: Received soil boring logs from ARCADIS via email from Jessica Kruczik on 12/29/11 (in eDocs). Logs show two borings extended to 15 ft bgs, no PID readings detected. - JK 03/09/12: In February 2012, I contacted Hal Benjamin and Kevin Klaeka of Impact Envt'l, they are addressing spill no. 8808500 at this site, using AS/SVE to remediate gasoline-related soil and GW contam. I told them I intended to close this spill; Kevin brought to my attention a Kleinfelder Phase II rpt done for site (in eDocs for closed spill no. 0912250). That rpt shows wells not shown in Impacts monitoring rpts; one such well, MW-G, has significant GW contam and is located not far from closed-in-place waste oil UST. I contacted Jessical Kruczik of ARCADIS to discuss whether contam in this well could be related to waste oil UST. She noted that tank had been tight, with no sign of pipes going in/out that could have leaked, and that GW data show high levels of gasoline-related compounds, unlikely to have been generated by release from a waste oil UST. In any case, she noted that Impact is contracted to perform remediation of site, ARCADIS was only responsible for tank closure and soil delineation. Based on available data, I agree that waste oil UST is not likely source of GW contam at site. Closed spill and issued closure letter (in eDocs) to RP, Harvinder Singh of Bolla EM Realty LLC, cc's to Paul Pingile of Bolla, Jessica Kruczik of ARCADIS. - JK

DEC Memo:	HIGH P.I.D RATING (940 PPM) AT MONITORING WELL: H, ENCOUNTERED DURING SOIL BORING.
Remarks:	Report in edocs. 09/14/10-Farrell-CD File review requested by S. Rahman. Spill closure request for Spill #09-12321 & 09-12250 by (Kleinfelder East, Inc.-Joel Adrian/Alex Wirth-(845)-567-6530) July 8, 2010 SAR prepared by (Kleinfelder East, Inc.-Lisa Messinger/Laurie Smith-(631)-218-0612) May 25, 2010 for ExxonMobil Environmental Services Company, Fairfax, VA. Location of interest: ExxonMobil Station No.12141 (17-TJ8) 1143 Atlantic Avenue Brooklyn, NY KEI (listed above) evaluated recognized environmental conditions (REC)

CITGO STATION (Continued) **S102560459**

conducted in 12/08 by KEI. Active retail petroleum fuel station with convenience store. A grassy area, a car wash driveway, & further a church (north), Bedford Avenue followed by Quizit Motor Sports, Inc. and an inactive gas station (Gaseteria) (east), Atlantic Avenue and a US Army Armory beyond (south), & a car wash (west). Ground surface elevation is about 75 above sea level, groundwater found at depths of 11.67-67.92 bgs, north and east flow determined. Two tank field observation wells are monitoring points, located at the corners of the tank field. KEI (above) reported ten (10) Federal water-supply wells within 1 mile of the property, one (1) private non-potable well within 300 ft of the property, & one (1) private water well within 1000 ft of the property. REC s include (2) current 12,000 gal gasoline USTs with piping and dispensing units, one (1) current 8,000 gal diesel UST, ten (10) current dry wells utilized for surface storm water drainage, a historical record of gasoline sales and automobile service since the 1930 s, and potential impact from several surrounding off-site properties . The property has been indicated to have had (21) USTs removed from the site in 1999. Seven (7) previous spill cases have been noted: #8808500 assigned to CITGO/Spartan Petroleum (Follow-up indication of contaminated soil and groundwater from determined air pressure test fail on 4,000 gal UST in 1989. This case remains open and active.). Case #8903335, #9614595, #0111876, #0507954, and #0800461 have all been closed (no description listed), #0513211 (discharge of 20 gal of gasoline from motor vehicle striking MPD) opened 2/16/06 closed 3/20/06, & the Spill numbers listed above are open currently due to elevated PID measurements & discovery of a UST in the northeastern portion of the property (included water and several inches of petroleum; also sampled 3/20/10). ERI began Phase II ESA on 1/13/10 with site-wide GPR survey. Five of twelve (5) soil borings were advanced, (5) monitoring wells were installed, and (1) combined soil boring/monitoring well was established beginning on 2/15/10. Results of soil sample analysis included: VOC detect above NYSDEC RSCO in MW-H: Xylenes(63.5ppmppm), Naph(46.3ppm), 1,2,4-TMB(294ppm), & 1,3,5-TMB(92.3ppm) SVOC detect above NYDEC RSCO: MW-A Benz(a)anth(1.65ppm), Benz(a)pyr(1.7ppm), Benz(b)fluor(1.47ppm), Benz(k)fluor(0.85ppm), Chrysene(1.61ppm), & Dibenz(a,h)anth(.528ppm) MW-F - Benz(a)anth(1.11ppm), Benz(a)pyr(1.06ppm), Benz(b)fluor(.753ppm), Benz(k)fluor(0.74ppm), Chrysene(1.06ppm), & Dibenz(a,h)anth(.314ppm) High levels of Barium & Lead also detected On 4/8/2010 groundwater samples were collected and analyzed. The two (2) tank field observation wells & one monitoring well (TF1, TF2, & MW-2) were gauged on 4/8/2010 as well. They were all dry with no presence of LPH. Free-phase product was found in the abandoned UST (above). Results of groundwater sample analysis included (existing wells MW-1 MW-4 were also sampled): VOC detect above NYSDEC cleanup level in MW-1, MW-E, MW-G, & MW-H: MW-1: Toluene(9.9ppb), EthBenz(442ppb), Xylenes(1850ppb), IPB(33.3ppb), Naph(170ppb), n-PB(111ppb), 1,2,4TMB(1210ppb), 1,3,5TMB(173ppb) MW-E: Toluene(143ppb), EthBenz(85.6ppb), Xylenes(2030ppb), IPB(16.8ppb), Naph(100ppb), n-PB(111ppb), 1,2,4TMB(710ppb), 1,3,5TMB(239ppb) MW-G: Toluene(39.6ppb), EthBenz(669ppb), Xylenes(4090ppb), IPB(91.5ppb), Naph(596ppb), n-PB(249ppb), 1,2,4TMB(3030ppb), 1,3,5TMB(796ppb) MW-H: Toluene(55.4ppb), EthBenz(239ppb), Xylenes(2940ppb), IPB(48.4ppb), Naph(338ppb), n-PB(122ppb), 1,2,4TMB(2530ppb), 1,3,5TMB(725ppb) PID MW-B at 68-69 bgs (1,740ppm) PID MW-H at 67 bgs (940ppm) PID MW-K at 67 bgs (940ppm) PID SB-C/MW-E at 68-69 bgs (1,740ppm) Reviewer Recommendations: 1) Further remediation is need at the four locations

CITGO STATION (Continued) **S102560459**

directly above due to the PID readings and their downgradient position 2) The abandoned UST will have to be purged and removed to confirm that it isn t a source of the contamination at the surrounding borings/wells. If a different process is warranted at this time, then that procedure should be undertaken 3) Surrounding groundwater flow needs to be determined to indicate if off-site sources are contributing environmental factors 10/26/2010: Site transferred from Region 2 to Central Office (Remedial Bureau B, Section C) for management. 11/9/2010: Based on document review and conversations with Region 2 personnel familiar with the case (Kolleeny and Maisonave), the contamination noted under this spill is consistent with an earlier spill number (88-08500, assigned to CITGO/Spartan Petroleum). This historic spill is currently being addressed under a STIP, and is being managed in Region 2. Therefore, no further work will be conducted under this spill number. (Harrington)

DEC Memo: annual inspection failure for spill bucket;
Remarks: Sangesland spoke to Kleinfelder about this spill. They will contact Veeder Root and get back to the DEC with the results. 9/30/2008 Sangesland reviewed a report from Kleinfelder dated June 9, 2008. Apparently there were 2 bolts missing from the spill bucket encasement which prevented the line tightness test from happening. Once these bolts were replaced, the system passed. Based on this information and a telephone conversation with rep from Kleinfelder, this case is closed out. See attached report in eDocs to review repairs made to the spill bucket encasement at the site.

BOLLA EM REALTY LLC # 12141 (DBA MOBIL) (Continued) **1001818336**

Registry ID: 110059791569

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Contact Name:	BOB KANAPARTHI
DEC Memo:	Phase 2 results from soil sample. Indications of what appears to be #6 oil. Samples were located in soil borings in the area of 2 7500G abandoned USTs.
Remarks:	T/C : DEC Mahat contacted Mr. Kanaparthi inquiring more about the remediation of the site. An email address was provided in oder to receive a progress report on the case. DEC IS WAITING ON A REPORT. 10/22/14: Mahat DEC Mahat received an email from the Mr. Kanaparthi explaining the current status of the case, Email goes like this : Per you request, please see the following status for spill# 1407344 at Public School 3K At the direction of the New York City School Construction Authority, our consultant Divirka and Bartilucci Consulting Engineers (D&B) performed a soil sampling program on October 13, 2014 at P.S. 3 located at 50 Jefferson Avenue, Brooklyn, New York. This work was conducted to support the closure of two underground storage tanks as part of a proposed heating plant upgrade at Public School 3K. Soil samples collected from borings around the perimeter of the tanks indicated visual and PID impacts at the elevation of the tank invert (approximately 18-23 feet bgs). Analytical results from the soil sampling program are pending from the laboratory. Following receipt of the analytical data a report will be prepared describing the nature and extent of the contamination and will provide recommendations for closure. The report will be submitted to NYSDEC. Concurrently, NYCSCA will be proceeding with the preparation of a bid package to include plans and

PSB #3 (Continued) **S103558124**

specifications for the proper closure of these tanks and closeout of the spill. It has been reported that these tanks have not been used in approximately 30 years. Also, during the site inspection by D&B, the tanks were observed to be filled with sand. Therefore, it is unlikely that this is an on-going release. Please feel free to contact me if you have any questions Thank you Steve Goldberg NYCSCA IEH Division 718-752-5022 DEC is waiting for laboratory analysis and a complete report. 12/17/14: Mahat A complete report has been submitted to the Department for a review. It has been uploaded on D2 for a reference. Collected end point samples are below CP 51 guidance standard. The potential source has been reomoved from the site. Futher excavation and remedial activities are not practical due to structural limits. Based on the report, any further investigation is not warrented by the Department. Hence, the spill case will be closed on the DEC database.

DEC Memo:	8/17/2011 Sangesland spoke to Chris at ABC Tank. 5,000 gal UST that has not been used for 8+ years. Owner wants to abandon it. Failed a tank test causing this spill report to be filed (TTF). Sangesland told ABC to take a soil sample through the bottom of the tank and send in closure report. Tank will be abandoned in place per PBS requirements. 9/13/2011 Sangesland reviewed a tank closure report which analyzed 5 soil samples taken under/adjacent to the existing buried tank. (Report is attached in eDocs). 4 of the soil samples were well below CP51 Recommended Soil Cleanup Objectives. 1 sample had some minor SVOC exceedances in the Benzos but the case is OK to close out.

BROWNFIELDS:

Name:	ATLANTIC BROOKLYN PROJECT
Address:	1045 - 1065 ATLANTIC AVENUE
City,State,Zip:	BROOKLYN, NY 11238
Program:	BCP
Site Code:	598940
Acres:	1.070
HW Code:	C224305
SWIS:	2401
Town:	New York City
Record Added Date:	12/04/2019
Record Updated Date:	06/02/2023
Update By:	AAOBLIGA
Site Description:	Location: The site is located within an urban area at 1045 - 1065 Atlantic Avenue in the Bedford-Stuyvesant neighborhood of Brooklyn, NY. The approximately 1.07 acres site is identified on the New York City Tax Map as Block 2020, Lot 68 (formerly Lots 68, 70, 73, 74 and 77). The site is bounded by residential properties to the north followed by Lefferts Place, commercial properties to the west, south, and east, and elevated railroad to the east followed by Franklin Avenue, and Atlantic Avenue to the south. Site Features: The site is currently vacant, and all on-site buildings have been demolished as of January 2023. The site was previously improved as follows: 1065 Atlantic Avenue (former Lot 68) was formerly occupied by a two-story

ATLANTIC BROOKLYN PROJECT (Continued) **S127750690**

building with a garage on the first floor and office space, storage, and an artist's loft on the second floor. The building occupied the entire lot. 1061-1063 Atlantic Avenue (former Lot 70) was formerly occupied by a two-story commercial/light industrial building with a partial cellar on the south side of the building. The building occupied the entire lot. 1059 Atlantic Avenue (former Lot 73) was formerly occupied by a concrete paved lot. 1053 and 1057 Atlantic Avenue (former Lot 74) was formerly occupied by a one-story building with two commercial units. There was a small paved rear yard behind 1053 Atlantic Avenue that contained a walk-in freezer and storage. 1045 Atlantic Avenue (former Lot 77) was formerly occupied by a one-story industrial building, a warehouse building, and a concrete paved rear yard. Current Zoning and Land Use: The site is currently vacant and is zoned M1-1 light manufacturing and is surrounded by similarly zoned properties to the east, west, and south. Properties to the north are zoned R6B residential with a C2-4 commercial overlay; the majority of the properties to the north long Lefferts Place appear to be single family residences. Past Use of the Site: 1065 Atlantic Ave (former lot 68) was first developed between 1888 and 1908 and used for commercial/industrial purposes, including a wagon house in 1908 and an auto repair shop with battery service by 1932 to present. 1061 to 1063 Atlantic Ave (former Lot 70) was first developed sometime prior to 1888 and use for commercial and industrial purposes. Historical uses included an auto repair and brake shop, office space, a church, and a variety of commercial usages. 1059 Atlantic Ave. (former Lot 73) was developed prior to 1888 with a building for beer bottling. Between 1908 and 1932, it was redeveloped into an auto repair shop. The building was demolished between 1965 and 1976 and has been vacant since. 1053 and 1057 Atlantic Ave (former Lot 74) was developed prior to 1888 and used for commercial and industrial purpose from at least 1888 to present. Historical usage of the subject site indicative of potential recognized environmental concerns includes auto painting and auto repair from 1965 to 2007. 1045 Atlantic Ave (former Lot 77) was first developed prior to 1888, used for residential purposed from at least 1888 to 1908 and commercial and industrial purposes from at least 1932 to the present. historical usage of the subject site indicative of potential recognized environmental concern includes metal manufacturing, auto repair, and petroleum delivery services. Site Geology and Hydrogeology: The site is underlain by historic fill material to approximately 6 feet below grade (ftbg) on the western portion of the site and down to about 9 ftbg on the eastern portion of the site. Underlaying the historical fill materials are native soil which were mostly poorly graded, with alternating layers of fine to medium grained sands with occasional layers of gravel around 30 - 40 ftbg. Groundwater is present at depths of approximately 70-73 ftbg and flows generally to the northwest.

Env Problem:

Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil, and VOCs in soil vapor and groundwater. Soil Several VOCs were found at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the protection of groundwater soil cleanup objectives (PGSCOs), including tetrachloroethene (PCE) at 4.6 parts

ATLANTIC BROOKLYN PROJECT (Continued) **S127750690**

per million or ppm (PGSCO is 1.3), trichloroethene (TCE) at 17 ppm (PGSCO is 0.47 ppm), and naphthalene at 320 ppm (RRSCO is 100 ppm). SVOCs exceeding RRSCOs include benzo(a)anthracene up to 230 ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 200 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 250 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 82 ppm (RRSCO is 3.9 ppm), chrysene up to 220 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 26 ppm (RRSCO is 0.33 ppm), fluoranthene up to 470 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 110 ppm (RRSCO is 0.5 ppm), phenanthrene up to 490 ppm (RRSCOs is 100), and pyrene up to 400 ppm (RRSCO is 100 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including total chromium at 7960 ppm (RRSCO is 180 ppm), trivalent chromium at 420 ppm (RRSCO is 180 ppm), lead at 754 ppm (RRSCO is 400 ppm), mercury at 3.96 ppm (RRSCO is 0.81 ppm), and nickel at 714 ppm (RRSCO is 310 ppm). Generally, most of the metal impacts were found in the fill layer and appear to be related to historical fill, with the exception of chromium which extended deeper into the native material and may be related to historic site uses.
PFOS and PFOA were not detected in soil at concentrations exceeding the restricted residential guidance values. No pesticides, PCBs and herbicides were found at concentrations exceeding RRSCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including chloroform at a maximum concentration of 34 parts per billion, or ppb (AWQS is 7 ppb) and TCE at 42 ppb (AWQS is 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 1 ppb, benzo(b)fluoranthene at 1.5 ppb, benzo(k)fluoranthene at 0.49 ppb, indeno(1,2,3-cd)pyrene at 0.97 ppb, and chrysene at 0.96 ppb compared to their respective AWQS of 0.002 ppb. PFAS were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) each with perfluorooctanesulfonic acid (PFOS) at a maximum concentration of 19 ppt and perfluorooctanoic acid (PFOA) at 79.3 ppt. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Chlorinated VOCs were detected in soil vapor samples including PCE at 42,200 micrograms per cubic meter (ug/m3), and TCE at 190,000 ug/m3. Data indicates that there is the potential for off-site impacts in soil vapor related to this site.

Health Problem: The site is fenced and mostly covered by broken up concrete so people are not expected to come into contact with site related soil and groundwater contamination unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because there are no on-site buildings, inhalation of site contaminants in indoor air due to vapor intrusion does not represent a concern for the site in its current condition. However, the potential exists for the inhalation of site contaminants due to soil vapor intrusion for any future on-site development. Sampling indicates that soil vapor intrusion from site contaminants is a potential concern for off-site buildings.

Dump: False

DEC Region:	2
DER Facility ID:	301032
DEC Memo:	Sangesland spoke with Clarinda at Milro. As of 4:10PM The vac truck is on it's way already, the spill guys are loading up now 11/3/05-Vought-Recieved case from DEC Sangesland. Insurance coverage covers house only and not soil contamination remaining in drywell in basement. As per Milro approximately 3'x3' area of oil impacted soil. Neighbors property also affected through foundation. Vought called and spoke with Gadi Weinreich (646-642-6044) and two tanks were onsite (275-gallon manifolded tanks). One tank was leaking and was emptied by Milro. Site visit scheduled by Vought for 11/5 to inspect drywell and neighbors property. Vought called Milro and tanks were cleaned out by Milro. Floor was cleaned with speedy dry. In 653 Saint Marks (Mr. Bernard Jones) floor was pressure washed, contaminated debris was removed. Received call from David Oloke that he will be performing site visit tomorrow to inspect site. Vought faxed him copy of spill report. 11/7/05-Vought-Site visit by Vought on 11/5/05 due to unavailability of owner during week. Onsite were two 275-gallon manifolded USTs in brand new condition. As per owner of property (Gadi), the former 275-gallon #2 fuel oil UST was leaking from the bottom and he placed to service calls to Petrol to have tank repaired. No spill out of vent or fill was visible. As per Gadi, Petro performed site visit in response to his calls on 7/13/05 due to fuel odors. On 10/7/05, a delivery was performed by Petro and during the delivery the tank failed causing the contents of to fall onto the basement floor. Basement floor is mostly concrete however some of the spill ran into the boiler room and into an approximate 2'x3' soil patch. Gadi contacted Travelers insurance who is filing a case against Petro. Contact info for Travelers is George Coch (631-577-7293 Claim #LOA7455). No odors present in living quarters of 651 and 653 St. Marks Avenue. A site visit was performed in 653 St. Marks Avenue (owner: Bernard Jones 347-643-3951) and no odors were present. Mortar in schist block walls however smelled of petroleum upon very close inpspection and Mr. Jones indicated that puddles of oil were on floor at his time of spill (oil had saturated walls between two residences). 653 St. Marks Avenue is on natural gas heating. Vought sent soil contamination letter to Weinreich requiring: 1)excavation of soil from pit and collection of endpoint

WEINREICH RESIDENCE (Continued) **S107416915**

samples 2)sealing of basement floors and walls of both residences 3)possible soil boring under 653 St Marks Place to investigate possibility of contamination under foundation. Vought called Coch (Travelers) and left message to return call. 11/14/05-Vought-DEC Sangesland received call from Milro regarding site. Vought returned call and insurance is not paying bills. Vought faxed copy of 11/7/05 letter to Basso. 11/18/05-Vought-Called George Coch and left message to return call. Vought recevied call from Gadi on 11/17/05 regarding status of spill. Vought called Gadi (212-840-6977) and left message to return call. Vought received message from Gadi and returned call. Vought spoke to Gadi and informed him of message left with Coch and advised him to call Travelers for update. Gadi provided number of Judy Helm (Travelers 800-624-6007x4736). Vought called Helm and left message to return call. Vought received message from Judy and returned call. Vought received third message from Judy and returned call and left message to return call. Vought received call and spoke to Judy. Letter sent to Petro by Travelers stating that Petro was responsible. Liability claim being handled by Andrew Follo (Claim# LOA7698 877-828-4110x48653) who is also reviewing claim by Milro. Vought called Follo and left message to return call. Vought spoke to Follo who is only handling third party claim. Letter sent to Petro to pay for bill by Milro. Possible third party coverage of soil under 651 due to third party impact. DEC will ask for two soil borings on adjacent property. Follo will return call to DEC. Vought called Gadi and delivery was 150-gallons and tank was filled (275-gallons). Approximately 175 gallons was lost. 11/22/05-Vought-Spoke to Gadi and Milro contacted Wienreich and insurance company did not pay Milro. Vought advised that Gadi contact insurance company with respect to suit against Petro and possible coverage under third party claim. 11/29/05-Vought-Spoke with Gadi and his insurance company approved work at both 651 and 653 St. Marks Place. Insurance company will be hiring a contractor to perform work. 1/3/06-Vought-Received call and spoke to Gadi and contractor will be starting work tomorrow to inspect 651 St. Marks and take pictures/samples.
1/23/06-Vought-Received call from Gadi that soil borings are scheduled to be performed by insurancce company on 1/19/06.
1/25/06-Vought-Received call from and spoke to Gadi. Gadi spoke to Travelers and as per Gadi, sample analyticals will be returned in one to two weeks. 2/27/06-Vought-Received call and spoke to Gadi and borings were performed and samples were collected by Liberty Mutual. 3/9/06-Vought-Reviewed AST Spill Investigation Report dated 2/10/06 and received on 3/2/06 from Madison Environmental and Tank Services (Joe Tomasulo 914-276-8690). Four soil borings performed. Soil borings performed to a maximum depth of 3.7 feet below grade. Soil analyticals show: 12000ppb xylene(GB2 2'bg), 7400ppb xylene(GB3 2'bg). Madison proposes minor hand excavation of soil be completed in the vicinity of GB-2 and GB-3 and the basement be treated with a bioremediation application. . Also reviewed AST Spill Investigation report dated 2/23/06 and received on 2/27/06. Vought sent letter approving of report recommendations with requirements: 1)collection of soil endpoint samples. Vought called Tomasulo and left message of approval and cc'd above letter. 3/23/06-Vought-Received call from Gadi and letter was sent to Travelers by Weinreich. As per Weinreich, Milro will be doing work. 03/28/06-Vought-Received call and spoke to Follo and DEC requires excavation as opposed to more borings. 05/10/06-Vought-Received call and spoke to Gadi and excavation has not started yet and Gadi expecting to receieve call today with start

WEINREICH RESIDENCE (Continued) **S107416915**

date by Milro. Gadi had received proposal from contractor and proposal was agreed to by Follo. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin. 6/22/06 - Raphael Ketani. I spoke to Mr. Gadi Weinrich (212) 840-6977. He said that the insurance company and MILRO had been going back and forth on the prices for the digging. However, they came to an agreement and MILRO is supposed to start digging next week. 7/20/06 - Raphael Ketani. Mr. Weinrich [(212) 840-6977/(212) 840-6500] left a message that Madison Environmental (914) 276-8690 finished the digging of the contaminated soil and took soil samples. He said that Joey of Madison will contact me soon. 7/21/06 - Raphael Ketani. Mr. Weinrich said that Madison dug and sampled 2 weeks ago. They will send the results and report. 7/27/06 - Raphael Ketani. Mr. Weinrich called to ask whether Madison had sent the spill closure report to me. I told him I hadn't received anything yet and to call Madison to get them to send it to me very soon. Joe of Madison Environmental (914) 276-8690 called to say that the closure report is being mailed out today, but it is addressed to Jeff Vought. He said to keep an eye out for it. 8/3/06 - Raphael Ketani. I received the spill cleanup report dated 7/24/06 from HyrdoEnvironmental Solutions. I am reviewing the report. 8/7/06 - Raphael Ketani. I reviewed the 7/24/06 cleanup report and there were no exceedences of TAGM 4046 standards for any of the soil samples from the site. In fact, the results were very low (i.e. in the hundreds of ppb at most). 8/8/06 - Raphael Ketani. I reviewed the entire case file for the site. Based upon the analytical results in the 7/24/06 cleanup report, the pictures in the report showing that the bottom of the wall was sealed to prevent any future oil spills from traveling to 653 St. Marks Avenue, the cleaning of the neighbor's floor on 11/3, and the inspection by the former case manager, Jeff Vought, on 11/7 whereby it was seen that the oil at 653 St. Marks Avenue was cleaned up and there were no odors, I am closing the spill case.

Remarks: MILLRO IS ON THE WAY FOR CLEAN UP.LOCATED ON THE BASEMENT FLOOR

DEC Region: 2
DER Facility ID: 446381
DEC Memo: 2/4/2014 - Feng - Talked with Mark Salamack (917-559-5519, mlsalamack@aol.com). The owner suspected the tank leaked as stains were found on the concrete pad. The tank is empty now, and tested and failed the test. It could have been a wet leak. They will send the proposal of removing the tank to the owner. There is a temporary tank onsite. TTF letter sent to PBS owner Rabel Realty Co., LLC (PBS No. 2-318507). Rpt to be submitted by 3/4/2014. 03-18-2015 - V. Brevdo This TTF Spill Case is re-assigned to Remediation Section B as per discussion with Chief of Spill Response on 3/17/2015. Case is further assigned to Mr. Jonathan Kolleeny as Project Manager. - VB 05/21/15: I contacted Mr. Edward Rabin (site contact on PBS Facility Info Rpt), he said tank has been cut up and bldg has switched to gas heat. Tank was above-ground, within concrete containment resembling a sarcophagus. I asked if there were any indications that leaked oil may have reached environment, i.e., soil beneath concrete floor, Mr. Rabin said no. I asked that he either send rpt alluded to above prepared by Mark Salamack of Petroleum Tank Cleaners, or send an email with photos showing tank location and condition of concrete

UNKNOWN RESIDENCE (Continued) **S116156846**

floor, along with statement that tank has been removed and there are no indications of a release to environment. Mr. Rabin said he will work on this and get back to me. - J. Kolleeny 06/11/15: Received email from Mr. Edward Rabin (site contact, emrabin@rabinmanagement.com). Email states: Mr. Kolleeny, We spoke by telephone during past several weeks regarding closing captioned matter. Towards that end, I recently conferred with Mr. Mark Salamack, who is duly licensed by New York governmental agency having jurisdiction for oil spills. He was present and inspected site at time spill was reported to Petroleum Tank Cleaners, Company that performed remedial work to remove oil from tank, such as it existed, and also cleaned premises. Mr. Salamack has credentials to close out spill. Prior to doing so, he requested that he make an inspection early next week to determine existing condition at premises. This writing is to serve to confirm that this matter is being attended to. Would you kindly provide a telephone number so that either of us may contact you. I sent email reply, with cc to Mark Salamack (mlsalamack@aol.com): Mr. Rabin, Thank you for getting back to me regarding this spill case. My direct phone number is 718-482-6388. I look forward to hearing from you and/or Mr. Salamack to resolve this case. - J. Kolleeny 07/29/15: Received email from Mark Salamack of Mercury Pump & Tank Service, Inc.: I know it has been some time since I communicated with you regarding this open spill...at this point I have had affected area pressure washed and just waiting for water to dry to get some photos of it to send...floor is solid and crack-free so I don't believe any soil sample from underneath are necessary...staining was minimal to begin with. I expect to go back to site tomorrow and obtain the photos, and have a report to you within a few days. - J. Kolleeny 08/04/14: On 7/30/15, received letter rpt from Mark Salamack of Mercury Pump & Tank Service, Inc. Letter rpt states that in Feb. 2014, bldg. mgmt. detected oil odor after fuel delivery and had Petroleum Tank Cleaners test tank (a 2,000-gal no. 2 fuel oil AST in basement; tank failed test and was taken out of service, and spill was reported to DEC. Temporary tanks were set up and old tank was removed [PBS Facility Info Rpt confirms this], and several months later, temporary tanks were removed and bldg. switched to gas heat. According to letter rpt, tank was on solid concrete floor with some old staining that appeared unrelated to recent problem (no wet oil was observed by Salamack); affected area was ~ 15 ft by 5 ft, and showed no cracks or voids thru which oil could have reached soil below. Rpt states that floor was pressure washed on July 28, 2015; rpt is accompanied by Waste Disposal Manifest for 150 gals of wash water. Also attached are photos showing concrete floor, free of any petroleum stains. Letter requests spill closure. Although text of letter rpt states that concrete floor was pressure washed on 7/28/15, disposal manifest is dated 7/27/15. I sent email to Mark Salamack pointing out this discrepancy. On 7/31/15, received revised rpt stating that floor was pressure washed on 7/27/15 (in DecDocs). On 8/4/15, I closed spill, sent closure letter (in DecDocs) to RP Edward Rabin, cc to Mark Salamack. - J. Kolleeny

Site Description: Location: The site is located within the densely populated, mixed-use, urban neighborhood of Crown Heights, specifically at 702 Nostrand Avenue, Brooklyn, 11216. The site is bounded by Nostrand Avenue to the east, mixed-use commercial/residential structures followed by St. Mark s Avenue to the north, residential structures followed by Rogers Avenue to the west, and mixed commercial/residential structures followed by Prospect Place to the south. Site Features: The site is comprised of a 0.04-acre parcel that is improved with a two-story mixed-use building with a basement, ground-floor commercial office space, and a second-floor residential tenant space. There is a small yard in the rear of the building. Current Zoning and Land Use: The ground-floor commercial office space is occupied by a pediatric health clinic, and the second-floor residential space is also occupied. The current use is consistent with the zoning designation (R6A residential with a C2-4 commercial overlay), allowing for mixed-use development. Past Use of the Site: According to historical Sanborn maps and regulatory database files for the site, the ground floor and basement of the site were utilized as a dry cleaner from the early 1960s to about 2005. During renovations and improvements to the ground-floor commercial office space and basement, the Applicant observed odors within the basement. The Applicant conducted a Phase I ESA and a Limited Phase II ESA, which revealed impacts in soil and soil vapor likely caused by the historic dry-cleaning operations. As a result, and as a temporary mitigative measure, the Applicant installed a venting/exhaust system in the basement consisting of a false floor and ductwork that vents the space to the exterior of the building via two separate exhaust fans. The Applicant subsequently conducted indoor air sampling. Although no chlorinated solvents were detected in the indoor air sample, the ground-floor commercial office operations were indefinitely ceased on November 2, 2017. Subsequently the first floor was re-occupied by the pediatric health clinic in December 2018 following the installation of SVE wells and associated piping, and restoration of the cellar concrete slab and ventilation/exhaust system. This work was done under the air monitoring and sampling requirements for re-occupation approved by NYSDOH and NYSDEC. An interim Site Management Plan (SMP) has been approved to monitor the existing ventilation system until the final remedial actions are completed. Site Geology and Hydrogeology: Historic fill material, predominantly consisting of brown fine- to medium-grained sand with varying amounts of brick, gravel and silt, was encountered from the ground surface to about 4 feet below surface grade in the rear yard located on the western portion of the site. Historic fill material was also observed in the eastern portion of the site to about 4 inches below the cellar slab (bcs). Native soil was encountered below the historic fill material layer and the cellar slab, and generally consisted of brown and gray, fine- to medium-grained sand with varying amounts of silt and gravel. Perched water was observed from 13 to 23 feet bcs. The actual water table is estimated to be approximately 42 feet bcs. The topography of the land surface

702 NOSTRAND AVENUE (Continued) **S121933790**

	suggests that groundwater flow across the site is in a northeasterly direction.
Env Problem:	Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE and breakdown products TCE and cis-DCE in soil, groundwater and sub-slab vapor. Remedial actions have successfully achieved the remedial action objectives to achieve restricted residential use. Residual contamination in the soil, groundwater, and sub-slab vapor is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: Based on investigations conducted, the primary contaminants of concern were chlorinated solvents, specifically tetrachloroethylene (PCE) and its degradation products trichloroethene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE)in soil, groundwater and sub-slab vapor. Soil - Sampling from four soil borings revealed PCE at a maximum concentration of 94 parts per million (ppm), compared to the applicable restricted residential soil cleanup objective (RRUSCO) of 19 ppm and the protection of groundwater (PGW) SCO of 1.3 ppm. Breakdown products namely TCE and Cis-1,2-DCE exhibited similar exceedances. Several SVOCs were detected at concentrations above the RRUSCOs, with benzo(b)fluoranthene being the highest at 3.2 ppm compared to the RRUSCO of 1ppm. No metals, pesticides or PCBs were detected at concentrations exceeding their respective RRUSCOs. Data does not indicate any off-site impacts in soil related to this site. Groundwater - The VOCs detected at concentrations exceeding ambient water quality standards (AWQS) included PCE at 64 parts per billion (ppb), TCE at 9.3 ppb and cis-1,2-DCE at 22 ppb. Each of these compounds has an individual AWQS of 5 ppb. Petroleum related VOCs were also detected in groundwater at elevated concentrations. Emerging contaminants were detected at concentrations below the existing screening level. Sampling data from the perched groundwater does not indicate any off-site impacts in groundwater related to this site. Soil Vapor and Indoor Air - Two sub-slab soil vapor samples revealed elevated concentrations of PCE (maximum concentration 30,000 micrograms per cubic meter, or ug/m3), TCE (8,120 ug/m3) and cis-DCE (5,750 ug/m3). Air samples collected from within the first floor of the on-site building did not detect PCE or its breakdown products. Data indicates that additional investigation is needed to further evaluate soil vapor intrusion off-site.
Health Problem:	Measures are in place to control the potential for coming in contact with residual subsurface soil, groundwater, and soil vapor contamination on the site. Environmental sampling indicates soil vapor intrusion may be a concern for offsite properties.

Site Geology and Hydrogeology: Historic fill material, predominantly consisting of brown fine- to medium-grained sand with varying amounts of brick, gravel and silt, was encountered from the ground surface to about 4 feet below surface grade in the rear yard located on the western portion of the site. Historic fill material was also observed in the eastern portion of the site to about 4 inches below the cellar slab (bcs). Native soil was encountered below the historic fill material layer and the cellar slab, and generally consisted of brown and gray, fine- to medium-grained sand with varying amounts of silt and gravel. Perched water was observed from 13 to 23 feet bcs. The actual water table is estimated to be approximately 42 feet bcs. The topography of the land surface suggests that groundwater flow across the site is in a northeasterly direction.

Env Problem: Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE and breakdown products TCE and cis-DCE in soil, groundwater and sub-slab vapor. Remedial actions have successfully achieved the remedial action objectives to achieve restricted residential use. Residual contamination in the soil, groundwater, and sub-slab vapor is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: Based on investigations conducted, the primary contaminants of concern were chlorinated solvents, specifically tetrachloroethylene (PCE) and its degradation products trichloroethene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE)in soil, groundwater and sub-slab vapor. Soil - Sampling from four soil borings revealed PCE at a maximum concentration of 94 parts per

702 NOSTRAND AVENUE (Continued) **S121933790**

million (ppm), compared to the applicable restricted residential soil cleanup objective (RRUSCO) of 19 ppm and the protection of groundwater (PGW) SCO of 1.3 ppm. Breakdown products namely TCE and Cis-1,2-DCE exhibited similar exceedances. Several SVOCs were detected at concentrations above the RRUSCOs, with benzo(b)fluoranthene being the highest at 3.2 ppm compared to the RRUSCO of 1ppm. No metals, pesticides or PCBs were detected at concentrations exceeding their respective RRUSCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - The VOCs detected at concentrations exceeding ambient water quality standards (AWQS) included PCE at 64 parts per billion (ppb), TCE at 9.3 ppb and cis-1,2-DCE at 22 ppb. Each of these compounds has an individual AWQS of 5 ppb. Petroleum related VOCs were also detected in groundwater at elevated concentrations. Emerging contaminants were detected at concentrations below the existing screening level. Sampling data from the perched groundwater does not indicate any off-site impacts in groundwater related to this site. Soil Vapor and Indoor Air - Two sub-slab soil vapor samples revealed elevated concentrations of PCE (maximum concentration 30,000 micrograms per cubic meter, or ug/m3), TCE (8,120 ug/m3) and cis-DCE (5,750 ug/m3). Air samples collected from within the first floor of the on-site building did not detect PCE or its breakdown products. Data indicates that additional investigation is needed to further evaluate soil vapor intrusion off-site.

Health Problem: Measures are in place to control the potential for coming in contact with residual subsurface soil, groundwater, and soil vapor contamination on the site. Environmental sampling indicates soil vapor intrusion may be a concern for offsite properties.

Site Code: 565005
Site Description: Location: The site is located within the densely populated, mixed-use, urban neighborhood of Crown Heights, specifically at 702 Nostrand Avenue, Brooklyn, 11216. The site is bounded by Nostrand Avenue to the east, mixed-use commercial/residential structures followed by St. Mark s Avenue to the north, residential structures followed by Rogers Avenue to the west, and mixed commercial/residential structures followed by Prospect Place to the south. Site Features: The site is comprised of a 0.04-acre parcel that is improved with a two-story mixed-use building with a basement, ground-floor commercial office space, and a second-floor residential tenant space. There is a small yard in the rear of the building. Current Zoning and Land Use: The ground-floor commercial office space is occupied by a pediatric health clinic, and the second-floor residential space is also occupied. The current use is consistent with the zoning designation (R6A residential with a C2-4 commercial overlay), allowing for mixed-use development. Past Use of the Site: According to historical Sanborn maps and regulatory database files for the site, the ground floor and basement of the site were utilized as a dry cleaner from the early 1960s to about 2005. During renovations and improvements to the ground-floor commercial office space and basement, the Applicant observed odors within the basement. The Applicant conducted a Phase I ESA and a Limited Phase II ESA, which revealed impacts in soil and soil vapor likely caused by the historic dry-cleaning operations. As a result, and as a temporary mitigative measure, the Applicant installed a venting/exhaust system in the basement consisting of a false floor and ductwork that vents the space to the exterior of the building via two separate exhaust fans. The Applicant subsequently conducted indoor air sampling. Although no chlorinated solvents were detected in the indoor air sample, the ground-floor commercial office operations were indefinitely ceased on November 2, 2017. Subsequently the first floor was re-occupied by the pediatric health clinic in December 2018 following the installation of SVE wells and associated piping, and restoration of the cellar concrete slab and ventilation/exhaust system. This work was done under the air monitoring and sampling requirements for re-occupation approved by NYSDOH and NYSDEC. An interim Site Management Plan (SMP) has been approved to monitor the existing ventilation system until the final remedial actions are completed. Site Geology and Hydrogeology: Historic fill material, predominantly consisting of brown fine- to medium-grained sand with varying amounts of brick, gravel and silt, was encountered from the ground surface to about 4 feet below surface grade in the rear yard located on the western portion of the site. Historic fill material was also observed in the eastern portion of the site to about 4 inches below the cellar slab (bcs). Native soil was encountered below the historic fill material layer and the cellar slab, and generally consisted of brown and gray, fine- to medium-grained sand with varying amounts of silt and gravel. Perched water was observed from 13 to 23 feet bcs. The actual water table is estimated to be approximately 42 feet bcs. The topography of the land surface

The current use is consistent with the zoning designation (R6A residential with a C2-4 commercial overlay), allowing for mixed-use development. Past Use of the Site: According to historical Sanborn maps and regulatory database files for the site, the ground floor and basement of the site were utilized as a dry cleaner from the early 1960s to about 2005. During renovations and improvements to the ground-floor commercial office

702 NOSTRAND AVENUE (Continued) **S121933790**

space and basement, the Applicant observed odors within the basement. The Applicant conducted a Phase I ESA and a Limited Phase II ESA, which revealed impacts in soil and soil vapor likely caused by the historic dry-cleaning operations. As a result, and as a temporary mitigative measure, the Applicant installed a venting/exhaust system in the basement consisting of a false floor and ductwork that vents the space to the exterior of the building via two separate exhaust fans. The Applicant subsequently conducted indoor air sampling. Although no chlorinated solvents were detected in the indoor air sample, the ground-floor commercial office operations were indefinitely ceased on November 2, 2017. Subsequently the first floor was re-occupied by the pediatric health clinic in December 2018 following the installation of SVE wells and associated piping, and restoration of the cellar concrete slab and ventilation/exhaust system. This work was done under the air monitoring and sampling requirements for re-occupation approved by NYSDOH and NYSDEC. An interim Site Management Plan (SMP) has been approved to monitor the existing ventilation system until the final remedial actions are completed. Site Geology and Hydrogeology: Historic fill material, predominantly consisting of brown fine- to medium-grained sand with varying amounts of brick, gravel and silt, was encountered from the ground surface to about 4 feet below surface grade in the rear yard located on the western portion of the site. Historic fill material was also observed in the eastern portion of the site to about 4 inches below the cellar slab (bcs). Native soil was encountered below the historic fill material layer and the cellar slab, and generally consisted of brown and gray, fine- to medium-grained sand with varying amounts of silt and gravel. Perched water was observed from 13 to 23 feet bcs. The actual water table is estimated to be approximately 42 feet bcs. The topography of the land surface suggests that groundwater flow across the site is in a northeasterly direction.

Env Problem: Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE and breakdown products TCE and cis-DCE in soil, groundwater and sub-slab vapor. Remedial actions have successfully achieved the remedial action objectives to achieve restricted residential use. Residual contamination in the soil, groundwater, and sub-slab vapor is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: Based on investigations conducted, the primary contaminants of concern were chlorinated solvents, specifically tetrachloroethylene (PCE) and its degradation products trichloroethene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE)in soil, groundwater and sub-slab vapor. Soil - Sampling from four soil borings revealed PCE at a maximum concentration of 94 parts per million (ppm), compared to the applicable restricted residential soil cleanup objective (RRUSCO) of 19 ppm and the protection of groundwater (PGW) SCO of 1.3 ppm. Breakdown products namely TCE and Cis-1,2-DCE exhibited similar exceedances. Several SVOCs were detected at concentrations above the RRUSCOs, with benzo(b)fluoranthene being the highest at 3.2 ppm compared to the RRUSCO of 1ppm. No metals, pesticides or PCBs were detected at concentrations exceeding their respective RRUSCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - The VOCs detected at concentrations exceeding ambient water quality standards (AWQS) included PCE at 64 parts per billion (ppb), TCE at 9.3 ppb and cis-1,2-DCE at 22 ppb. Each of these

702 NOSTRAND AVENUE (Continued) **S121933790**

compounds has an individual AWQS of 5 ppb. Petroleum related VOCs were also detected in groundwater at elevated concentrations. Emerging contaminants were detected at concentrations below the existing screening level. Sampling data from the perched groundwater does not indicate any off-site impacts in groundwater related to this site. Soil Vapor and Indoor Air - Two sub-slab soil vapor samples revealed elevated concentrations of PCE (maximum concentration 30,000 micrograms per cubic meter, or ug/m3), TCE (8,120 ug/m3) and cis-DCE (5,750 ug/m3). Air samples collected from within the first floor of the on-site building did not detect PCE or its breakdown products. Data indicates that additional investigation is needed to further evaluate soil vapor intrusion off-site.

Health Problem: Measures are in place to control the potential for coming in contact with residual subsurface soil, groundwater, and soil vapor contamination on the site. Environmental sampling indicates soil vapor intrusion may be a concern for offsite properties.

Site Code: 565005
Site Description: Location: The site is located within the densely populated, mixed-use, urban neighborhood of Crown Heights, specifically at 702 Nostrand Avenue, Brooklyn, 11216. The site is bounded by Nostrand Avenue to the east, mixed-use commercial/residential structures followed by St. Mark s Avenue to the north, residential structures

702 NOSTRAND AVENUE (Continued) **S121933790**

followed by Rogers Avenue to the west, and mixed commercial/residential structures followed by Prospect Place to the south. Site Features: The site is comprised of a 0.04-acre parcel that is improved with a two-story mixed-use building with a basement, ground-floor commercial office space, and a second-floor residential tenant space. There is a small yard in the rear of the building. Current Zoning and Land Use: The ground-floor commercial office space is occupied by a pediatric health clinic, and the second-floor residential space is also occupied. The current use is consistent with the zoning designation (R6A residential with a C2-4 commercial overlay), allowing for mixed-use development. Past Use of the Site: According to historical Sanborn maps and regulatory database files for the site, the ground floor and basement of the site were utilized as a dry cleaner from the early 1960s to about 2005. During renovations and improvements to the ground-floor commercial office space and basement, the Applicant observed odors within the basement. The Applicant conducted a Phase I ESA and a Limited Phase II ESA, which revealed impacts in soil and soil vapor likely caused by the historic dry-cleaning operations. As a result, and as a temporary mitigative measure, the Applicant installed a venting/exhaust system in the basement consisting of a false floor and ductwork that vents the space to the exterior of the building via two separate exhaust fans. The Applicant subsequently conducted indoor air sampling. Although no chlorinated solvents were detected in the indoor air sample, the ground-floor commercial office operations were indefinitely ceased on November 2, 2017. Subsequently the first floor was re-occupied by the pediatric health clinic in December 2018 following the installation of SVE wells and associated piping, and restoration of the cellar concrete slab and ventilation/exhaust system. This work was done under the air monitoring and sampling requirements for re-occupation approved by NYSDOH and NYSDEC. An interim Site Management Plan (SMP) has been approved to monitor the existing ventilation system until the final remedial actions are completed. Site Geology and Hydrogeology: Historic fill material, predominantly consisting of brown fine- to medium-grained sand with varying amounts of brick, gravel and silt, was encountered from the ground surface to about 4 feet below surface grade in the rear yard located on the western portion of the site. Historic fill material was also observed in the eastern portion of the site to about 4 inches below the cellar slab (bcs). Native soil was encountered below the historic fill material layer and the cellar slab, and generally consisted of brown and gray, fine- to medium-grained sand with varying amounts of silt and gravel. Perched water was observed from 13 to 23 feet bcs. The actual water table is estimated to be approximately 42 feet bcs. The topography of the land surface suggests that groundwater flow across the site is in a northeasterly direction.

Env Problem: Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE and breakdown products TCE and cis-DCE in soil, groundwater and sub-slab vapor. Remedial actions have successfully achieved the remedial action objectives to achieve restricted residential use. Residual contamination in the soil, groundwater, and sub-slab vapor is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: Based on investigations conducted, the primary contaminants of concern were chlorinated solvents, specifically tetrachloroethylene (PCE) and its degradation products

702 NOSTRAND AVENUE (Continued) **S121933790**

trichloroethene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE)in soil, groundwater and sub-slab vapor. Soil - Sampling from four soil borings revealed PCE at a maximum concentration of 94 parts per million (ppm), compared to the applicable restricted residential soil cleanup objective (RRUSCO) of 19 ppm and the protection of groundwater (PGW) SCO of 1.3 ppm. Breakdown products namely TCE and Cis-1,2-DCE exhibited similar exceedances. Several SVOCs were detected at concentrations above the RRUSCOs, with benzo(b)fluoranthene being the highest at 3.2 ppm compared to the RRUSCO of 1ppm. No metals, pesticides or PCBs were detected at concentrations exceeding their respective RRUSCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - The VOCs detected at concentrations exceeding ambient water quality standards (AWQS) included PCE at 64 parts per billion (ppb), TCE at 9.3 ppb and cis-1,2-DCE at 22 ppb. Each of these compounds has an individual AWQS of 5 ppb. Petroleum related VOCs were also detected in groundwater at elevated concentrations. Emerging contaminants were detected at concentrations below the existing screening level. Sampling data from the perched groundwater does not indicate any off-site impacts in groundwater related to this site. Soil Vapor and Indoor Air - Two sub-slab soil vapor samples revealed elevated concentrations of PCE (maximum concentration 30,000 micrograms per cubic meter, or ug/m3), TCE (8,120 ug/m3) and cis-DCE (5,750 ug/m3). Air samples collected from within the first floor of the on-site building did not detect PCE or its breakdown products. Data indicates that additional investigation is needed to further evaluate soil vapor intrusion off-site.

Health Problem: Measures are in place to control the potential for coming in contact with residual subsurface soil, groundwater, and soil vapor contamination on the site. Environmental sampling indicates soil vapor intrusion may be a concern for offsite properties.

Site Description: Location: The area of concern subject to the site is considered off site from BCP site C224270 and reflects the investigation and possible remediation of contamination that may have migrated from that site. This work is being carried out as provided for under the Environmental Conservation Law Section 27-1411.5. Please see C224270 for further information regarding the status of the site in the BCP. Site Features: The site is comprised of a 0.04-acre parcel that is improved with a two-story mixed-use building with a basement, ground-floor commercial office space, and a second-floor residential tenant space. There is a small yard in the rear of the building. Current Zoning and Land Use: The BCP site and the off-site area are
