Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

SIMON DEVELOPMENT GROUP, INC. (Continued) **1016008479**

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact address:	Not reported Not reported
Contact country:	Not reported
Contact telephone:	(212) 460-3770
Contact email:	Not reported
EPA Region:	02
Classification:	Non-Generator
Description:	Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No

CON EDISON SERVICE BOX: 8795 (Continued) **1016968951**

User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/26/2014
Site name: CON EDISON SERVICE BOX: 8795
Classification: Conditionally Exempt Small Quantity Generator

Violation Status: No violations found

DEC Memo: "12/31/11-Hiralkumar Patel. tried FDNY, but no response. as no contact info available for property owner, asked DEC Veronica to visit the site who was in Manhattan at that time. 12/03/11- Zhune responded to this site on 12/31/11. spoke to Robert Dilorenzo Chief Engineer of the building located at 750 Third Ave. As per Robert the building has a diesel tank use for emergency generator. Petro brought the delivery of diesel last week. The maintenance people from the building took the gauge out from tank to check the gallons of diesel in the tank and the diesel came out from tank onto the floor. They spread speed-dry on the spill. They will removed the speedy-dry and disposal properly. He also said on 12/31/11 they run a monthly test in the generator and that caused diesel spilled by the vent pipe. The fire department cleaned the spill on the sidewall and the curb. Robert Dilorenzo Chief Engineer *** 212- 9078921 12/18/11- Robert sent the waste manifest and pictures. The pictures show the tank room cleaned."
Remarks: "Unknown what happened might be an overfill"

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
TSCA SUBMITTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS 148695 6-11-03 @ 16:35 M Milano # 68073 reports he discovered 5 gallons of unknown oil mixed with 2 gallons of water and dirt had spilled onto the concrete floor of the structure. It is possibly transformer oil due to a hole in the unit. There was smoke and fire involved, there is now just light smoke. Verification of sewer or waterway is unverified at this time. There is a sump, sump pump was found disconnected upon arrival. Further investigation is pending safe access and an i&a crew. Update 6-11-03 @ 17:30 P Arroyo #15642 states that he will dispatch an I & A crew to v8770 to investigate the trap for a release and do an initial cleanup. P Arroyo reported @ 18:50 hrs that there is no sign of release of oil into the trap in the structure. Also a partial cleanup and a drain and disconnect of the unit has been scheduled for 23:00 hours using an over 50 tanker which has been ordered. Lab Sequence Number: 03-04882-001 PCB 17 ppm. 6/12/03 05:00 hrs the partial cleanup was complete. Approx 35 gallons of oil and water mix was removed from the floor of the vault and 80 gallons of oil was removed from the unit. The capacity of the unit is 295 gallons. I asked Mr Ligouri if he

V8770 (Continued) **S106014932**

checked the trap for oil and he stated the trap was clean of any oil. Absorbent was put down and final cleanup will be done after the unit is removed. The initial discovery was 5 gallons oil and 2 gallons water. During the partial cleanup 35 gallons of oil & water mix was removed and 80 gallons of oil was drained from the transformer. There is approx. 180 gallons of oil unaccounted for. According to Supervisors Arroyo & Liguori there was no evidence of oil in the trap and, therefore, no release to sewer. 6/13/03 cleanup is complete as of 18:55. Double washed with slix and flushed. UPDATE: New transformer installed 6/23/2003."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NEW YORK TELEPHONE CO (Continued) **1016281098**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID: 110009468502

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Region: 02
Classification: Conditionally Exempt Small Quantity Generator
Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Emis# 241212 (same Emis as a previous one at this location) 11/12/2015 - Feng - Spoke to Jordan of ERT (212-580-8383). Con Ed crew was onsite to clean up the adjacent structure and found oil in the sump of this vault and contained. The transformer oil sampling in the previous oil spill found in the adjacent structure show it exhibited 10 ppm PCBs. They will take the sample to confirm it is from the same transformer. then to clean it up. Spill is assigned to Con Ed Unassigned. Talked to Jordan Hall again. Back in 6/2015, it was 1 gallon oil found and it was not reported. But today, they found more oil and then they reported it and updated their Emis report"
Remarks:	"c/u nad investigation pending"

DEC Memo:	"Albany assignment: adebong 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Ketani) for review and closure - end 10/5/06 - Raphael Ketani. The contact is Jim Carey at Castle Oil (718) 579-3414. 5 gals. of #2 oil spilled due to an equipment failure. It was being addressed. I tried reaching Mr. Carey, but he was no longer with the company. Instead, I talked to Robert Hill. He said the spill

RESIDENCE (Continued) **S104787759**

	was completely cleaned up by Castle and regular deliveries resumed right afterwards. Based upon the information from Mr. Hill and the small size of the spill, I am closing the spill case. "
Remarks:	"caller reporting a spill due to equip. failure clean up inthe process no callback necessary"

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

MITSUI & CO. (U.S.A.), INC. (Continued) **1004565998**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GREENHOUSE GAS REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110037433970

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110056421162

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 4/9/2002 Sangesland spoke with Mr. Ram Tarumalla (consultant) Contamination was found on the site. He believes it came from off site. The building next door has an oil fill port on the sidewalk which appears to be the source. The old building which was removed from this site was 3 floors and had only an above ground tank that did not appear to be leaking. After the problem was found, the construction company excavated out the contamination (manifested removal) They then took endpoint samples (quantity? locations?) They also tested these endpoint samples (not to 8021 or 8270... unknown what was tested) Problem is only at depth a certain depth.... No problem on the surface. Consultant will send in a report of what he has and hopefully this will be enough. 1/16/2003 - Sangesland reviewed a 3 volume Remedial Action Report prepared by Langan Engineering. The report indicated that 2 locations on site had petroleum contamination. These sites correspond to an old AST which

NEW CONSTRUCTION SITE (Continued) **S106000676**

was in the building which was demolished on this site. The second problem area appears to have migrated from the building immediately to the east. During construction of this new building, considerable excavation was performed, including the removal of all contaminated soil from both locations. Based on the information in this report, the spill number is closed out. Spill Closed "

Remarks: "THEY TOOK SAMPLES LAST WEEK AND FOUND CONTAMINATED SOIL. THE RESULTS CAME BACK TODAY. CELL PHONE FOR RAM IS 201-665-6437 IF NEEDED CALL COMPLAINT "

DEC Memo:	"05/15/06 - See e-docs for Con Ed report detailing cleanup and closure. 05/15/06 - See e-docs for Con Ed report detailing cleanup and closure. 163644. 4/4/ @ 12:59. Turiano # 14461 of UG reported to me that an Unknown Non-company Vehicle spilled ~ 12 gallons of Antifreze on the Asphalt street. The Vault being worked in was F/o 115 e 45 st and Madicson av. The Vehicle was parked on the n/s e 45 st 50' w/o madison av. When the crews informed the driver that the spill was coming from his truck - he took off before getting an information. No sewer/waterway affected, no fire/smoke involved, no private property affected, no injuries and weather did not contribute. the spill is on the Asphalt street. The spill is contained and being cleanup and is delayed due to the need for more absorbent material. Logger R Pagano # 48703 4/4/ @ 14:20. I spoke to A Drummings @ 13:55 and 14:10 HRS and he informed me that since this was a third party spill and it did not impact eirther our structures or any other part of the environment we are not responsible for the cleanup. Turiano # 14461 of UG @ 14:08 HRS had already contained the spill and approx. 1/2 of the cleanup was completed. He used Balonies and absorbent pads , rags and one 50-pound bag of speedy dry to soak up that much of the spill. A Drummings said he would contact the appropriate City agencies. Logger R Pagano # 48703 "

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number: 001
Tank Id: 12601
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
L09 - Piping Leak Detection - Exempt Suction Piping
F00 - Pipe External Protection - None
G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle
B01 - Tank External Protection - Painted/Asphalt Coating
H00 - Tank Leak Detection - None
C00 - Pipe Location - No Piping
I04 - Overfill - Product Level Gauge (A/G)
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
J02 - Dispenser - Suction Dispenser
K00 - Spill Prevention - None

Tank Location: 3
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1961
Capacity Gallons: 7500
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 147-275: 02/24/03 17:45hrs I & A found approx 2 pints of transformer oil on top of concrete and soil in V 860. The source of the spill was the transformer possibly a bushing leak. Mr Hardin was pumping out the vault when he discovered the oil. He also stated that while pumping the vault discovered possibly some oil had hit the street at this time there is a small sheen and it is contained. At this time the crew is cleaning up the street using pads and oil absorbent and is contained. There was two samples taken one for P C B and one for oil ID. As per Mr Roman there is a historic of 11 PPM. A partial cleanup is being done and a final cleanup will be done after the unit is removed. Clean up on street is complete. He used oil absorbent & spill kit. Filled two drums with snow and water mixed with approx 2 pts of oil and he also reports at this time in V-860 that oil absorbent has been put on floor and a partial clean up was done. Complete clean up will be pending removal of transformer. Lab Sequence Number: 03-01543-001 TOTAL PCB: 59 ppm 3/12/03 tanker removed 630 gallons of oil out of the transformer. 4/19/03 Transformer removed and replaced. Clean up is complete, in V-860. Method used to clean : triple wash,and power wash vault using Slix."
Remarks:	"leaky bushing clean up in progress 147275"

DEC Memo:	"09/6/13-Zhune spoke to Mark Salamack 718-624-4842 from Petroleum Tank Cleaners. As per Mark they received a call from Bill Bailey (Building Mnager) 212-557-0610 requesting to pump out the oil from the 7500 gallons # 2 fuel AST at 317 Madison Ave. Mark also said there are 6 of oil on the floor in the tank room. The Fire Department is on the scene. 09/6/13- Zhune spoke to Bill. He said the oil is contained in the tank room. There is no release outside the containment of the tank. The building is a commercial building. There is no odors in the building. He also said the building went on fire and the Fire Department asked him to pump out the oil from the tank. He assumed that CON-Ed touched the tank with a wire and made a hole while doing work on their structure. They had the last delivery couple of years ago because they run the boiler on Con-Ed gas. 1/22/15 TJD File review. WCD Group has submitted a closure report consisting of 710 pages summarizing the results of a geophysical investigation associated with the redevolpment of 4 seperate buildings encompossing 43,313 sq ft. The closure report indicates the spill was reportedly contained within the concrete AST vault room and cleaned up immediately . The heating system at the source property

BASEMENT (Continued) **S113915779**

has been converted to natural gas and the AST is currently out of service. A soil and groundwater investigation was performed which did not identify any VOC's or SVOC's above unrestricted use SCO's. Based upon the above information, no further action is required associated with the reported petroleum discharge affecting the tank room. Closure report has been uploaded to DECDOCS. Spill closed."

Remarks: "There is 6 inches of oil on the floor of the oil room in the basement. Clean up is pending crew arrival."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GRAND CENTRAL TERMINAL (Continued) **1016199335**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE See also 0203738. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 12/30/10 - Raphael Ketani. A new spill case was called into DEC on 12/22/10. It was assigned #1010077. The spill consisted of the seepage of several gallons of oil through the walls of the #7 subway line tubes. It is a reoccurrence of a historical spill that has been going on for over 10 years and is being managed through active spill case #0010754. As there is an older active spill case for the site, I have closed spill case #1010077. 1/4/11 - Raphael Ketani. Randy Austin, Chief of the Spills Unit, requested an update regarding the seepage. I tried to contact Haroon Aslam of the Environmental Protection Division (646) 252-5774 of the NYCTA, but I could only leave a message. Mr. Aslam returned my call and left a message. He said that workers are still going into the tunnels to mop up the seep with pads. Otherwise, noting else has changed. 4/24/14 - Obligado - I emailed Sherry Bulkey to get an update on this spill. 9/2/14-Vought-DEC Obligado out of office and Vought received email that Jeffrey and Santosh, There is an ongoing 3rd party spill that has been impacting the Steinway Tube (subway) on Track C-1. I am trying to locate the historic spill number, and will send it to you when I retrieve it. Many inspectors, including one of my staff will be going out tonight to walk the tracks and try and identify at least the point of entry. I am extending an invitation to the DEC to see if anyone would like to join. Please keep in mind the DEC representative needs to be track qualified. It is my current understanding that there will be no power (third rail will be off) during the inspection. I will call Jeffrey about the message that was left Friday. Please see the invitation below (11:30 to 2am at Vernon-Jackson Tool Booth). Thank you, Francine. Vought sent reply that Francine,After our phone conversation, I was able to locate the open Spill Number referenced above and the case is currently assigned to Andre Obligado in my Spills Remediation Unit. Andre is out of the office on vacation and is also not NYCT track qualified. Myself and Santosh, however, are certified and will meet you at the Jackson Avenue station at 11:30pm. I also have the advantage of having personal experience with the prior cleanup efforts including personal

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

observations of the fuel oil formerly seeping from the tunnel ceiling and walls as well as OM&M of our former recovery system. After discussing the site with Randy (copied above), who is also historically familiar with the site, we are hoping NYCT can provide some information on how long the current seepage event has been occurring. Also our contractor has recently changed and as such may not by NYCT certified which may take time and such, pending the schedule, it may be more feasible for NYCT to perform the initial cleanup. We can discuss further when we meet your team tonight. With respect to Ray Favis's note that DEC should investigate the source of the spill after all these years , DEC performed thorough searches of adjacent spills and PBS sites and had not been able to locate any direct sources. Unfortunately due to the depth of the seepage (bedrock at least 50' down), it is not cost feasible (as was determined by Central Office) to perform bedrock fracture trace analysis, borehole geophysics or other bedrock surveys over such a wide area. As such the decision was made by Central Office to use Spill Fund monies for remediation only and not further investigation. Finally, just a logistical note: When DEC and NYCT mobilized site and seepage location during my prior years, it was via the entrance by a doorway adjacent to the FDR at the base of the United Nations (that included a seven story stairway down that opened directly onto the location). Is this more feasible to avoid the long walk from the Queens side? Regardless, Santosh and I look forward to meeting your team at Jackson Avenue at 11:30pm unless we hear otherwise. Thanks 9/3/14-Vought-Site visit to inspect track with DEC Mahat and MTA team including Capital Project Management and Systems Safety (Richard Iyasere) and seepage at same location that Vought observed in prior years. Impact also to sump pump room #2. Vought spoke with RSE and due to logistical difficulties associated with work (eg general work orders, insurance requirements and training requirements), if seepage persists, DEC may ask MTA to use Spill Fund monies for the cleanup as they can use there contractors and only submit work plans and results to DEC. Vought called and spoke to MTA Maibauer and forwarded her photos from site visit and Maibauer noted MTA would perform the initial cleanup via simple green and barrels and will also clean Sump Pump #2. They will monitor and maintain after and if problem persist will approach DEC with either using a State contractor or making a claim to the Fund for cleanup costs. 9/10/14 - Obligado - C.Sastry to inquire about the status of the fuel entering the subway and the clean up. I left a message to call back the DEC. 9/12/14 - Obligado - Mr. Sastry called back and provided me with the phone number for Francine Maubuer who is the System Safety Manager and is in charge of the project. I spoke to Francine. She said MTA had an internal meeting yesterday and were not inclined to hire their own remediation contractor but rather train the DEC and DEC's contractor on track safety and request we do the work. We will schedule a conference call to discuss the issue further. She said she would provide 7 line tube as built drawings. 9/23/14 - Obligado- We (Obligado,Vought, and Austin) had a conference call with NYCT, including Francine Maubaier, Eric Jones, and others as well as CPM, the contractor who will be doing construction work in the tunnl. According to transit, the seepage is very slow,minor . They inspect he rail regularly. They have put socks in the sump to recover oil. According to NYCT they inspect the track weeekly. The August appearance of free product is the first time its been seen in several years according to NYCT. NYCT was not inclined to do the cleanup, and would rather DEC hire

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

contractor. We discussed the scope moving forward. DEC contractors will do the initial cleaning. Following the cleaning, NYCT will inspect and monitor the area for additional seepage to determine if we need to reactivate the recovery system. DEC stated that if the amount of product is small, as it appears to be, it may not warrant restart of the full system and other recovery methods could be used. DEC and NYCT discussed potentail sealing/grounting the tunnel walls to prevent further infiltration. DEC and NYCT set up a tentative dates of October 18th, 25, Nov, 8 to do the cleaning. There is a General Order on those weekends for CPM's work so the DEC contractor could piggy back on those GOs to do the cleaning. 10/6/14 - Obligado - I had email discussions with Francine regarding the inspection and cleaning. I suggested doing the initial inspection on the 18th and then do the cleaning on the 25th of October. FRancine responded that she would not be able to get all Miller personnel track trained until mid Nov, so the cleaning would have to wait until mid Nov. However she aggreed to move the initial inspection to the 18th. 10/8/14 - Obligado - PIN Callout for MIller, signed by Austin and sent to Rob Ferguson. 10/13/14 - Obligado - Obligado and Vought attended a pre-General Order (GO) meeting at NYCTransit offices with NYCT, in particular, Francine Maibauer, to discuss logistics for the 18th site visit. DEC PIN Contractor Miller environmental attended as well. Tentative inspection time/date of 10AM Sat 10/18. 10/17/14 - Obligado - Email from Francine, inspection scheduled for 7AM October 18 meeting at the Grand Central platform. 10/17/14 - Obligado - I reviewed desing drawings of subway tunnels provided to me by transit to pin point the location of the seep. The reported seep locations I have in my file at 43 + 25, 44 +60 and 45 + 10, which based on the drawings provided puts the seep under the east river. I emailed Francine to see if their are more updated drawings with different survey markers. 1/17/15 - GO tube cleaning and wall sealing Ao on site 645 Miller full crew on-site 720. 725 H and S meeting 730 ready to go. 740 talk to richard. Still waiting for flaggers. 7328488420 yu 6464631390 rich Flagger #14681 800 start work train 815 stop work train, still on platform Miller has one crew cleaning oil from trench with pads. Another crew scaling and gring solidified oil from the walls and ceiling. Once cracks are exposed Miller applies epoflex. 1/18/15 - GO tube cleaning and wall sealing AO Onsite at 935. Walk out to c1 wprktrain. Oil intrusion at the ceiling has gotten considerably worse. Oil slowly dripping from the Oil going right through the epoflex. Overnight flowed downWork train set up below leak area. Naminder subeda onsite for transit. We asked trNsit to provide another cement material DAN yu onsite as well. 1500 hours identify major oil infiltration 11 ties south of 432c wall oil seep. Oil flowing down trench. There is seepage at wall at that point but doesnt flow into the trench. Meaning oik may coming ing from the bottom of the trench. Miller cleans up additional oil with pads. Adjusts water capture shield device to capture dripping oil to prevent it from falling on the track. 1600 exit tunnel 1/25/15 -GO tube cleaning and wall sealing Work train on c2 6 Miller guys Cameron is the foreman dan yu from nyct 745 work train starts 800 drop trench guys down track to pad and bag 815 start scraping c2 seep area 10 ft east of 4450 10 am, walked the C2 trench. I identified another large seep in the trench at signal 461c. Oil actively seeping out the bottom of wood rail ties directly into trench Complete surface prep of C2 wall seep. 1015 break 1030 resume work. Crew starts to walk c1 trench I walk c1 trench. Signal 432 c 37 ties west of nyct marker 44

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

00. 1st smal seep 19 ties west of major seep. Oil still seeping. Walked to the second seep area on C1 north of major seep, appromimately 200 ft north. Primed and sealed areas were seeping oil through seal. Small seeps, approximately 4 or 5. 12pm finish 2nd coat 1/28/15 830 AM Inspect 300 East 40th Street Miker Tarku not on-site, at Jury Duty The assistant super showed me around I saw the abandoned 40,000 gallon #6 oil tank. The UST is located in the very bottom of the parking garage. The manhole was sealed shut. Photographs taken. The assistant showed me the current tank. Its an AST in the boiler room. The tank is shown to contain #2 fuel oil. According to the assistant, this tank is a temporary tank for when temperatures go below -10 F, otherwise, the boiler runs on gas. The system was converted last year. I asked him to show me the fill ports for both the old tank and the new tank. The fill port for the new tank is located on 40th St. I asked him where the old fill was, he did not know. We went into his office and he showed me paperwork, no info was available on the old fill port, but he showed me a letter from the withrdrawing notice of complaint with regard to overdue tightness test.stating that no tightness testing was required. He called his supervisor Mike Tarku. I asked Mike what happened to the old fill line. He said it was in the same location as the new. They took the old line out and put a new fill port. 930 Andre Off-site. 12:28 - I emailed Mr. Lazarri and requested tank abandonment report. I later identified a closed spill report for 300 EAst 40th St due to a hole in the 40,000 gallon UST. Spill No. 0801691 closed by Vought. The 40,000 gallon tank had a cracked seam identified during the tank closure. A limited investigation was performed. 6 Borings were advance with a concrete coring machine on the sides of the tank. The borings were advanced to the tank at the midpoint depth. Laboratory samples of the soils reported no contamintion. I later emailed Mr. lazarri and notified him that I found additional information in my files and that i did not need the abandonment report at this time but I would let him know if I needed additional info. 1/29/15 - I measured the elevation of the platform by counting steps - 101 steps. Each step is approximately 7.25 inches, equals 61 ft down to the north (aka east) side of the #7 platform. According to GIs, the elevation of the top of the stairwell is 37 ft above msl. I insepcted The Woodstock building on 42nd street. Pbs # 2-116440. The pbs lists a 10,000 gallon #6 oil tank. I met the super Al on-site. He showed me the tank. It was in a concrete vault with access to inspect concrete floors. No staining or evidence of spills. They swithced to #2 oil last year. I advised him that his registration was not current and he should update the records with the DEC. He showed me the fill pipe, which runs above ground in the basement until it goes through the basement wall to the sidewalk fill port. No staining or spills were evident at the entry point. The shchist bedrock was exposed at the north basement wall. The tank was installed in 1979. Prior to the use of the the tank, the heating equipment ran on city steam. HE showed me the old steeam pipes which were disconnected. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. 1/31/15 - AO onsite 645 Miller onsite 7 AM As of 8 AM, still waiting for NYCiT flaggers 830. Start walking trench. Measure off from edge of platform to 1st seep on C2. 687.1 ft to start of first major bench seep. Identified a location where yhe bench was broken. 2 pipes run inside the trench. Suspect oil migrating through pipes east of the bench seep location and emptying at the trench seep area, where 2

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

pipes enter the trench 126.1 ft from edge of paint to first trench seep. Rob Cameron and helper apply final coat to the left side of C2 bench and epoxy to right side of C2 bench. Other crew switches up pads on C2. Francine will not let us keep pads in the trench due to fire hazard. All pads picked up. Bags from C2 brought to the GC 7 platform temporarily Finish up C2 work, move to C1 to switch pads along c1 trench and apply another top coat to the wall seeps. Major seep at C1 ceiling is 579.9 ft from edge of platform. 1017 ft to smaller wall seep area on the south wall of C1. significant oil still in trench at certain locations. Heavy oil accumulation in trench at 879.5 ft. Miller collects a product sample from the trench at this location for oil ID. We are not able to store bags of waste near system as planned. Francine spoke with another transit worker who said the system area is outside the assigned flagging area. Miller would need to take the bags back with them, however, they don't have a waste transporting vehicle. 2 guys will need to go back to the shop to get a truck to bring back. 2/2/14 - Obligado - Inspect 801 2nd Ave, PBS #2-600069. See spill number 1410622. 2/13/15 - Obligado - DEC Vought and Obligado inspect neighboring properties and pbs facilities around the seep location. PBS # - 2-6005823 - 212 East 42nd Street, Westen Hotel. - Met with Javier Reyes and Raphael. We inspected the 2 ASTs in the sub basement. The ASTs are 20,000 gallon #4 oil tanks in a large concrete vault. The tanks are on racks with the concrete bottom visible for inspection. A slight oil drip was observed from the union fitting above Tank #1, which dripped down the side of the tank, and formed a couple small stains on the tank vault floor. Other then this slight drippage, no evidence of significant oil spills was apparent in the vault. The vault was generally clean and well kept. The oil drip from the union was brought to the attention of Mr. Reyes. According to Mr. Reyes, this facility predominantly uses natural gas, and the #4 fuel oil tanks are back up fuel supplies. They have not run the boilers on #4 oil since last year. When they did use oil, according to Raphael, the oil was delivered by Hess, 10-13 K gallons every 10 days approximately. We inspected the sumps, and no oil was apparent. We isnpected the remote fill. Their are 2 remote fill ports, 1 for each tank, in the sidewalk on 41st street. The fill lines run under the sidewalk. We advised Mr. Reyes that his registration needs to be updated and the certificate needs to be displayed. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS # 2-315484 - 333 East 41st street - We met the super, Aden Nefjalic. According to the super, they switched to #2 oil approximately 2 years ago. They have a dual fuel gas/#2 oil system. The #2 is a backup fuel. Prior to the switch, according to Aden, they used #4. We inspected the tank vault. Vought entered the vault. The tank is a rectangular with the bottom in direct contact with the vault floor. No oil spills were apparent in the vault. We inspected the sumps, which were dry. We inspected the boiler room which was clean. We inspected the fill port, which ran aboveground attached to the building wall. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS #2-359122 - Essex Owners Corp, 325 E. 41st Street. We met Louie Nieves, the super on site. The site has a 7500 gallon #2 fuel oi AST in a vault. We entered the vault and inspected around the tank. The tank is cylindrical in shape and the invert of the tank rests directly on the vault room floor, so it was not possible to see

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

completely beneath the tank. However, there were no oil spills apparent anywhere on the tank vault floor. According to Louis, they had the tank completely cleaned out when they switched fuels. We inspected the pump room sump and found no oil. We inspected the remote fill, which was in the sidewalk on 41st street. According to Mr. Nieves, they have been running solely on gas since the switch, as they have a contract agreement to run gas only for 5 years after conversion. We advised Mr. Nieves that the building needs to update their PBS registration and display the certificate. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. . 304 East 42nd Street - The Hilton Manhattan East. While walking on 41st street, a fill port and vent pipe was observed in the back of the building. We entered inside the building to inspect. They had a 275 gallon Diesel AST in the basement on a concrete floor. No significant spillage was observed. We inspected the basement sumps and elevator sumps. No oil was present in sumps. No current or historic source of #4 or #6 oil is present at this facility. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS #604594 - The News Building - 220 East 42nd Street. We met with Frank Paselli, the building manager. We inspected the sub basement and 3 sump pits. All pits were free of oil. We inspected the 1000 gallon diesel tank. The tank room was clean with no spills. The tank is for the emergency generator. We asked if they ever had oil intrusion, he said no, but they do get water seepage in some areas of hot water. The building is heated by Coned supplied Steam. We advised Mr. Paselli that his PBS certificate needs to be displayed. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS # 2-610034 - Pfizer Building - We met Mr. Paul Bryne, the Chief Engineer and Mr. Everett Jackson, the building manager. We inspected the basement sumps - no oil in the sumps. We inspected the diesel AST and it was in a vault and extremely clean with no oil spillage. The AST is for the emergency generator. The building runs on Coned supplied Steam. We asked if they every had any oil seepage into the basement. They said no. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures which were apparent at this location which would indicate this facility is the source of the spill #0010574. 675 3rd Ave/ 201 -205 E 42nd - These buildings do not have a PBS ID, however we inspected them anyway. According to the building manager, Angelo Maniello, they have no oil tanks and they have never used #4 or #6 to his knowledge. The 2 buildings are connected and have the same ownership. We inspected both basements. There was no oil storage in the basement. We inspected the sumps and found no evidence of oil in sumps. Both building heating systems run on Coned supplied steam. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures which were apparent at this location which would indicate this facility is the source of the spill #0010574. 2/28/15 - AO onsite for track cleaning and tunnel sealing. Miller onsite as well as NYCT system safety - Richard and NYCT Structrual inspector to inspect integrity of the tunnel ceiling. We inspected the ceiling seeps and found the flow decreased significantly from previous visit. Milelr wiped of oil, cleaned the

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

ceilind and applied a top coat of epoxy. I collected product samples from 3 different seep locations, 1 from the Track C1 Tunnel Ceiling SEep, 1 from the Track C1 South Wall seep area, and one from TRack C2 wall seep. Milelr applied plug and seal to wall seeps on C1. We also inspected track C2 - Significan oil seepage through the prior epoxy layers. Oil puddles were evident on the floor. 3/1/15 - Obligado - returned to the Tunnel for additional track cleaning and sealing. DEC Obligaod, Miller Crew, and NYCT Dan Yu. Inspect the cieling seep. 3 Miller guys go down track with pads. 10 to 11 small drips of oil over night. Wiped the oil of and Miller aplied plug and dyke at each seep point. Covered with shield. Inspected down gradient wall seep. No oil seep appent over night. Estimated less than a 1 oz of oil seeped over 24 hours. 1 boom set down gradient of all seeps. On track c2 there is significantly morr oil intrusion. One crew sets 3 booms. 1 down gradient from bench seep. 1 down gradient from trench seep. 1 down gradient of all oil in trench. Crew works to try to seal trench. Oil/water could be seen trapped in bubbles under epoxy seal - not permanent seal. When pierced oil and water seeps out. Prior to cement application, water flows in continuos stream out of a weep hole in the seam with a drop of oil every 10-20 seconds or so. Miller grinds out the whole length of bench seam. Applies an alternate hydraulic cement product to the seam. Upon leaving the site, no oil seep however water seeps present and oil likely to be able to bleed through eventually. 6/1/15 - Obligado - I emailed Francine regarding continuing clean up activities. We were trying to coordinate a date to get on both tracks to do a clean-up of any additional oil seepage since our last visit. NYCT responded that we would not be able to get on both tracks, but only one, since there is no GO. Also, any oil or oil impacted material removed from C2 would not be able to be stored in the system area and would need to be taken out of the tunnel the same day through Grand Central terminal. After discussion with Vought and Austin, I sent email to NYCT notifying them that we would perform clean up going forward on an as needed basis based on NYCT inspections. 7/17/15 - Obligado - I called Francine to inquire about the soil seepage and left a message on her voicemail. 7/24/15 - Obligado - I received an email from Francine - According to Francine, Hydraulics division has not indicated that there is an issue with the oil intrusion. 8/27/15 - Obligado - Inspection of Tunnel C2 scheduled for 9/9/15 "

Remarks: "CALLER STATES THERE IS SEEPAGE OF PRODUCT INTO TRACK AREA UNKNOWN SOURCE - NO CLEAN UP "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE See also 0203738. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 12/30/10 - Raphael Ketani. A new spill case was called into DEC on 12/22/10. It was assigned #1010077. The spill consisted of the seepage of several gallons of oil through the walls of the #7 subway line tubes. It is a reoccurrence of a historical spill that has been going on for over 10 years and is being managed through active spill case #0010754. As there is an older active spill case for the site, I have closed spill case #1010077. 1/4/11 - Raphael

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

Ketani. Randy Austin, Chief of the Spills Unit, requested an update regarding the seepage. I tried to contact Haroon Aslam of the Environmental Protection Division (646) 252-5774 of the NYCTA, but I could only leave a message. Mr. Aslam returned my call and left a message. He said that workers are still going into the tunnels to mop up the seep with pads. Otherwise, noting else has changed. 4/24/14 - Obligado - I emailed Sherry Bulkey to get an update on this spill. 9/2/14-Vought-DEC Obligado out of office and Vought received email that Jeffrey and Santosh, There is an ongoing 3rd party spill that has been impacting the Steinway Tube (subway) on Track C-1. I am trying to locate the historic spill number, and will send it to you when I retrieve it. Many inspectors, including one of my staff will be going out tonight to walk the tracks and try and identify at least the point of entry. I am extending an invitation to the DEC to see if anyone would like to join. Please keep in mind the DEC representative needs to be track qualified. It is my current understanding that there will be no power (third rail will be off) during the inspection. I will call Jeffrey about the message that was left Friday. Please see the invitation below (11:30 to 2am at Vernon-Jackson Tool Booth). Thank you, Francine. Vought sent reply that Francine,After our phone conversation, I was able to locate the open Spill Number referenced above and the case is currently assigned to Andre Obligado in my Spills Remediation Unit. Andre is out of the office on vacation and is also not NYCT track qualified. Myself and Santosh, however, are certified and will meet you at the Jackson Avenue station at 11:30pm. I also have the advantage of having personal experience with the prior cleanup efforts including personal observations of the fuel oil formerly seeping from the tunnel ceiling and walls as well as OM&M of our former recovery system. After discussing the site with Randy (copied above), who is also historically familiar with the site, we are hoping NYCT can provide some information on how long the current seepage event has been occurring. Also our contractor has recently changed and as such may not by NYCT certified which may take time and such, pending the schedule, it may be more feasible for NYCT to perform the initial cleanup. We can discuss further when we meet your team tonight. With respect to Ray Favis's note that DEC should investigate the source of the spill after all these years , DEC performed thorough searches of adjacent spills and PBS sites and had not been able to locate any direct sources. Unfortunately due to the depth of the seepage (bedrock at least 50' down), it is not cost feasible (as was determined by Central Office) to perform bedrock fracture trace analysis, borehole geophysics or other bedrock surveys over such a wide area. As such the decision was made by Central Office to use Spill Fund monies for remediation only and not further investigation. Finally, just a logistical note: When DEC and NYCT mobilized site and seepage location during my prior years, it was via the entrance by a doorway adjacent to the FDR at the base of the United Nations (that included a seven story stairway down that opened directly onto the location). Is this more feasible to avoid the long walk from the Queens side? Regardless, Santosh and I look forward to meeting your team at Jackson Avenue at 11:30pm unless we hear otherwise. Thanks 9/3/14-Vought-Site visit to inspect track with DEC Mahat and MTA team including Capital Project Management and Systems Safety (Richard Iyasere) and seepage at same location that Vought observed in prior years. Impact also to sump pump room #2. Vought spoke with RSE and due to logistical difficulties associated with work (eg general work

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

orders, insurance requirements and training requirements), if seepage persists, DEC may ask MTA to use Spill Fund monies for the cleanup as they can use there contractors and only submit work plans and results to DEC. Vought called and spoke to MTA Maibauer and forwarded her photos from site visit and Maibauer noted MTA would perform the initial cleanup via simple green and barrels and will also clean Sump Pump #2. They will monitor and maintain after and if problem persist will approach DEC with either using a State contractor or making a claim to the Fund for cleanup costs. 9/10/14 - Obligado - C.Sastry to inquire about the status of the fuel entering the subway and the clean up. I left a message to call back the DEC. 9/12/14 - Obligado - Mr. Sastry called back and provided me with the phone number for Francine Maubuer who is the System Safety Manager and is in charge of the project. I spoke to Francine. She said MTA had an internal meeting yesterday and were not inclined to hire their own remediation contractor but rather train the DEC and DEC's contractor on track safety and request we do the work. We will schedule a conference call to discuss the issue further. She said she would provide 7 line tube as built drawings. 9/23/14 - Obligado- We (Obligado,Vought, and Austin) had a conference call with NYCT, including Francine Maubaier, Eric Jones, and others as well as CPM, the contractor who will be doing construction work in the tunnl. According to transit, the seepage is very slow,minor . They inspect he rail regularly. They have put socks in the sump to recover oil. According to NYCT they inspect the track weeekly. The August appearance of free product is the first time its been seen in several years according to NYCT. NYCT was not inclined to do the cleanup, and would rather DEC hire contractor. We discussed the scope moving forward. DEC contractors will do the initial cleaning. Following the cleaning, NYCT will inspect and monitor the area for additional seepage to determine if we need to reactivate the recovery system. DEC stated that if the amount of product is small, as it appears to be, it may not warrant restart of the full system and other recovery methods could be used. DEC and NYCT discussed potentail sealing/grounting the tunnel walls to prevent further infiltration. DEC and NYCT set up a tentative dates of October 18th, 25, Nov, 8 to do the cleaning. There is a General Order on those weekends for CPM's work so the DEC contractor could piggy back on those GOs to do the cleaning. 10/6/14 - Obligado - I had email discussions with Francine regarding the inspection and cleaning. I suggested doing the initial inspection on the 18th and then do the cleaning on the 25th of October. FRancine responded that she would not be able to get all Miller personnel track trained until mid Nov, so the cleaning would have to wait until mid Nov. However she aggreed to move the initial inspection to the 18th. 10/8/14 - Obligado - PIN Callout for MIller, signed by Austin and sent to Rob Ferguson. 10/13/14 - Obligado - Obligado and Vought attended a pre-General Order (GO) meeting at NYCTransit offices with NYCT, in particular, Francine Maibauer, to discuss logistics for the 18th site visit. DEC PIN Contractor Miller environmental attended as well. Tentative inspection time/date of 10AM Sat 10/18. 10/17/14 - Obligado - Email from Francine, inspection scheduled for 7AM October 18 meeting at the Grand Central platform. 10/17/14 - Obligado - I reviewed desing drawings of subway tunnels provided to me by transit to pin point the location of the seep. The reported seep locations I have in my file at 43 + 25, 44 +60 and 45 + 10, which based on the drawings provided puts the seep under the east river. I emailed Francine to see if their are more updated drawings with different

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

survey markers. 1/17/15 - GO tube cleaning and wall sealing Ao on site 645 Miller full crew on-site 720. 725 H and S meeting 730 ready to go. 740 talk to richard. Primed and sealed areas were seeping oil through seal. Small seeps, approximately 4 or 5. 12pm finish 2nd coat 1/28/15 830 AM Inspect 300 East 40th Street Miker Tarku not on-site, at Jury Duty The assistant super showed me around I saw the abandoned 40,000 gallon #6 oil tank. The UST is located in the very bottom of the parking garage. The manhole was sealed shut. Photographs taken. The assistant showed me the current tank. Its an AST in the boiler room. The tank is shown to contain #2 fuel oil. According to the assistant, this tank is a temporary tank for when temperatures go below -10 F, otherwise, the boiler runs on gas. The system was converted last year. I asked him to show me the fill ports for both the old tank and the new tank. The fill port for the new tank is located on 40th St. I asked him where the old fill was, he did not know. We went into his office and he showed me paperwork, no info was available on the old fill port, but he showed me a letter from the withrdrawing notice of complaint with regard to overdue tightness test.stating that no tightness testing was required. He called his supervisor Mike Tarku. I asked Mike what happened to the old fill line. He said it was in the same location as the new. They took the old line out and put a new fill port. 930 Andre Off-site. 12:28 - I emailed Mr. Lazarri and requested tank abandonment report. I later identified a closed spill report for 300 EAst 40th St due to a hole in the 40,000 gallon UST. Spill No. 0801691 closed by Vought. The 40,000 gallon tank had a cracked seam identified during the tank closure. A limited investigation was performed. 6 Borings were advance with a concrete coring machine on the sides of the tank. The borings were advanced to the tank at the midpoint depth. Laboratory samples of the soils reported no contamintion. I later emailed Mr.

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

lazarri and notified him that I found additional information in my files and that i did not need the abandonment report at this time but I would let him know if I needed additional info. 1/29/15 - I measured the elevation of the platform by counting steps - 101 steps. Each step is approximately 7.25 inches, equals 61 ft down to the north (aka east) side of the #7 platform. According to GIs, the elevation of the top of the stairwell is 37 ft above msl. I insepcted The Woodstock building on 42nd street. Pbs # 2-116440. The pbs lists a 10,000 gallon #6 oil tank. I met the super Al on-site. He showed me the tank. It was in a concrete vault with access to inspect concrete floors. No staining or evidence of spills. They swithced to #2 oil last year. I advised him that his registration was not current and he should update the records with the DEC. He showed me the fill pipe, which runs above ground in the basement until it goes through the basement wall to the sidewalk fill port. No staining or spills were evident at the entry point. The shchist bedrock was exposed at the north basement wall. The tank was installed in 1979. Prior to the use of the the tank, the heating equipment ran on city steam. HE showed me the old steeam pipes which were disconnected. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. 1/31/15 - AO onsite 645 Miller onsite 7 AM As of 8 AM, still waiting for NYCiT flaggers 830. Start walking trench. Measure off from edge of platform to 1st seep on C2. 687.1 ft to start of first major bench seep. Identified a location where yhe bench was broken. 2 pipes run inside the trench. Suspect oil migrating through pipes east of the bench seep location and emptying at the trench seep area, where 2 pipes enter the trench 126.1 ft from edge of paint to first trench seep. Rob Cameron and helper apply final coat to the left side of C2 bench and epoxy to right side of C2 bench. Other crew switches up pads on C2. Francine will not let us keep pads in the trench due to fire hazard. All pads picked up. Bags from C2 brought to the GC 7 platform temporarily Finish up C2 work, move to C1 to switch pads along c1 trench and apply another top coat to the wall seeps. Major seep at C1 ceiling is 579.9 ft from edge of platform. 1017 ft to smaller wall seep area on the south wall of C1. significant oil still in trench at certain locations. Heavy oil accumulation in trench at 879.5 ft. Miller collects a product sample from the trench at this location for oil ID. We are not able to store bags of waste near system as planned. Francine spoke with another transit worker who said the system area is outside the assigned flagging area. Miller would need to take the bags back with them, however, they don’t have a waste transporting vehicle. 2 guys will need to go back to the shop to get a truck to bring back. 2/2/14 - Obligado - Inspect 801 2nd Ave, PBS #2-600069. See spill number 1410622. 2/13/15 - Obligado - DEC Vought and Obligado inspect neighboring properties and pbs facilities around the seep location. PBS # - 2-6005823 - 212 East 42nd Street, Westen Hotel. - Met with Javier Reyes and Raphael. We inspected the 2 ASTs in the sub basement. The ASTs are 20,000 gallon #4 oil tanks in a large concrete vault. The tanks are on racks with the concrete bottom visible for inspection. A slight oil drip was observed from the union fitting above Tank #1, which dripped down the side of the tank, and formed a couple small stains on the tank vault floor. Other then this slight drippage, no evidence of significant oil spills was apparent in the vault. The vault was generally clean and well kept. The oil drip from the union was brought to the attention of Mr. Reyes. According to Mr. Reyes, this facility

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

predominantly uses natural gas, and the #4 fuel oil tanks are back up fuel supplies. They have not run the boilers on #4 oil since last year. When they did use oil, according to Raphael, the oil was delivered by Hess, 10-13 K gallons every 10 days approximately. We inspected the sumps, and no oil was apparent. We isnpected the remote fill. Their are 2 remote fill ports, 1 for each tank, in the sidewalk on 41st street. The fill lines run under the sidewalk. We advised Mr. Reyes that his registration needs to be updated and the certificate needs to be displayed. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS # 2-315484 - 333 East 41st street - We met the super, Aden Nefjalic. According to the super, they switched to #2 oil approximately 2 years ago. They have a dual fuel gas/#2 oil system. The #2 is a backup fuel. Prior to the switch, according to Aden, they used #4. We inspected the tank vault. Vought entered the vault. The tank is a rectangular with the bottom in direct contact with the vault floor. No oil spills were apparent in the vault. We inspected the sumps, which were dry. We inspected the boiler room which was clean. We inspected the fill port, which ran aboveground attached to the building wall. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS #2-359122 - Essex Owners Corp, 325 E. 41st Street. We met Louie Nieves, the super on site. The site has a 7500 gallon #2 fuel oi AST in a vault. We entered the vault and inspected around the tank. The tank is cylindrical in shape and the invert of the tank rests directly on the vault room floor, so it was not possible to see completely beneath the tank. However, there were no oil spills apparent anywhere on the tank vault floor. According to Louis, they had the tank completely cleaned out when they switched fuels. We inspected the pump room sump and found no oil. We inspected the remote fill, which was in the sidewalk on 41st street. According to Mr. Nieves, they have been running solely on gas since the switch, as they have a contract agreement to run gas only for 5 years after conversion. We advised Mr. Nieves that the building needs to update their PBS registration and display the certificate. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. . 304 East 42nd Street - The Hilton Manhattan East. While walking on 41st street, a fill port and vent pipe was observed in the back of the building. We entered inside the building to inspect. They had a 275 gallon Diesel AST in the basement on a concrete floor. No significant spillage was observed. We inspected the basement sumps and elevator sumps. No oil was present in sumps. No current or historic source of #4 or #6 oil is present at this facility. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS #604594 - The News Building - 220 East 42nd Street. We met with Frank Paselli, the building manager. We inspected the sub basement and 3 sump pits. All pits were free of oil. We inspected the 1000 gallon diesel tank. The tank room was clean with no spills. The tank is for the emergency generator. We asked if they ever had oil intrusion, he said no, but they do get water seepage in some areas of hot water. The building is heated by Coned supplied Steam. We advised Mr. Paselli that his PBS certificate needs to be displayed. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS # 2-610034 - Pfizer Building - We met Mr. Paul Bryne, the Chief Engineer and Mr. Everett Jackson, the building manager. We inspected the basement sumps - no oil in the sumps. We inspected the diesel AST and it was in a vault and extremely clean with no oil spillage. The AST is for the emergency generator. The building runs on Coned supplied Steam. We asked if they every had any oil seepage into the basement. They said no. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures which were apparent at this location which would indicate this facility is the source of the spill #0010574. 675 3rd Ave/ 201 -205 E 42nd - These buildings do not have a PBS ID, however we inspected them anyway. According to the building manager, Angelo Maniello, they have no oil tanks and they have never used #4 or #6 to his knowledge. The 2 buildings are connected and have the same ownership. We inspected both basements. There was no oil storage in the basement. We inspected the sumps and found no evidence of oil in sumps. Both building heating systems run on Coned supplied steam. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures which were apparent at this location which would indicate this facility is the source of the spill #0010574. 2/28/15 - AO onsite for track cleaning and tunnel sealing. Miller onsite as well as NYCT system safety - Richard and NYCT Structrual inspector to inspect integrity of the tunnel ceiling. We inspected the ceiling seeps and found the flow decreased significantly from previous visit. Milelr wiped of oil, cleaned the ceilind and applied a top coat of epoxy. I collected product samples from 3 different seep locations, 1 from the Track C1 Tunnel Ceiling SEep, 1 from the Track C1 South Wall seep area, and one from TRack C2 wall seep. Milelr applied plug and seal to wall seeps on C1. We also inspected track C2 - Significan oil seepage through the prior epoxy layers. Oil puddles were evident on the floor. 3/1/15 - Obligado - returned to the Tunnel for additional track cleaning and sealing. DEC Obligaod, Miller Crew, and NYCT Dan Yu. Inspect the cieling seep. 3 Miller guys go down track with pads. 10 to 11 small drips of oil over night. Wiped the oil of and Miller aplied plug and dyke at each seep point. Covered with shield. Inspected down gradient wall seep. No oil seep appent over night. Estimated less than a 1 oz of oil seeped over 24 hours. 1 boom set down gradient of all seeps. On track c2 there is significantly morr oil intrusion. One crew sets 3 booms. 1 down gradient from bench seep. 1 down gradient from trench seep. 1 down gradient of all oil in trench. Crew works to try to seal trench. Oil/water could be seen trapped in bubbles under epoxy seal - not permanent seal. When pierced oil and water seeps out. Prior to cement application, water flows in continuos stream out of a weep hole in the seam with a drop of oil every 10-20 seconds or so. Miller grinds out the whole length of bench seam. Applies an alternate hydraulic cement product to the seam. Upon leaving the site, no oil seep however water seeps present and oil likely to be able to bleed through eventually. 6/1/15 - Obligado - I emailed Francine regarding continuing clean up activities. We were trying to coordinate a date to get on both tracks to do a clean-up of any additional oil seepage since our last visit. NYCT responded that we would not be able to get on both tracks, but only one, since there is no GO. Also, any oil or oil impacted material removed from C2 would not be able to be stored in the system area and would need to be taken out of the tunnel the

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

same day through Grand Central terminal. After discussion with Vought and Austin, I sent email to NYCT notifying them that we would perform clean up going forward on an as needed basis based on NYCT inspections. 7/17/15 - Obligado - I called Francine to inquire about the soil seepage and left a message on her voicemail. 7/24/15 - Obligado - I received an email from Francine - According to Francine, Hydraulics division has not indicated that there is an issue with the oil intrusion. 8/27/15 - Obligado - Inspection of Tunnel C2 scheduled for 9/9/15 "

Remarks: "CALLER STATES THERE IS SEEPAGE OF PRODUCT INTO TRACK AREA UNKNOWN SOURCE - NO CLEAN UP "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DER Facility ID:	436704
DEC Memo:	"05/01/13- Zhune spoke to Robert Hil from Rightway 718-855-7272. He said they cleaned the tank then after they performed a tank test. The tank falied the test. They sent the proposal to the owner to do the isolate test. If the owner approved the proposal they will test the lines (vent. fill, suction and return separetly and the tank itself. Plumber checked the lines and found the vent and fill are very old. 06/18/13- Zhune spoke to Robert. He said they isolated the lines and found fill line failed the test. Riteway is fixing the line. 6/13/14- Riteway sent the report dated 6/13/14. On April 30, 2013 Riteway Maintenance Corp. was contracted to perform a tank cleaning for a fuel oil conversion. Part of the conversion requirement is prforming a tank tightness test. Riteway proceeded to pump and clean the tank. The tank was left empty for the conversion. the tank was then tested. The tank tightness test failed with an ullage (dry) portion leak. Line were isolated and a tank only test was performed with passing results. The source of the leak was determined to have been a fulty fill line. The old fill line was excavated and removed. soil was field screened via PID during the excavation and there was no contamination found. A new fill line was installed up to the first available fitting inside. The area was then backfilled, compacted and re-cemented to grade. the site is clean and free from contamination Spill Closed. 6/13/154- David from Riteway sent the following email. The area was only excavated in order to remove the fill line, but no contamination was found"
Remarks:	"6000G #6 Oil tank was empty and failed tank test."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS 139983 notes: On 10/26 J. Thelian that he discovered 1 gallon of unknown substance and there was no water in the manhole. The spill was on the concrete floor of the manhole. The cause of the spill is unknown. There is no sewer connection. Two samples for PCB and ID were taken. 10/27/2001 9:35 hours There was a partial cleanup at this location. There was approximately 450 gallons of fluid removed from the unit and the cleanup will continue at a later time. EPA # NYP 004 091 393 Lab results for Lab sequence # 01-10429-001 TOTAL PCB 131 ppm Lab Sequence #01-10431-001 Analysis indicates the presence of a substance similar to a dielectric fluid. UPDATE 10/27 @ 18:32 HRS A. Zapone # 85207 reported to W. Boomer that the Cleanup was completed on 10/27 @ 12:30 HRS. 10 gallons of oil and water mix was removed and one(1) barrell of solid waste with PPE's. Removed all solid debris, double-washed structure with Slix solution. Properly bagged and placed on Barrell for proper transportation. Removed Environmental Yellow tag # 20729."
Remarks:	"under a transformer.con ed #139983 ***lab results back 131 ppm. pcb"

DEC Memo:	"Jane O'Connell asked Rahman to visit the site. DEP, OEM & Con Ed on site. 210751. see eDocs 04/09/08-Ahmed- DEC Ahmed and Rahman responded to the site at 2:30 PM and met ConEd Mike Pilling (347 386 5506) on site. While excavating to replace a pipe that was connected from water main to the fire hydrant, DEP hit ConED 138KV feeder line and broke the casing, causing Dielectric fluid spilled out to the outer casing and excavation area. ConEd contractor Allstate was excavating contaminated soil and pumping out Dielectric fluid from the feeder casing to a Vac truck. ConED was fixing that feeder line. The excavation was about 6 feet deep. Water was flowing from the hydrant to a near catch basin at cross street of 3rd Ave & 45 St. ConED placed some absorbent pads on the water. Oil sheen was observed near that catch basin. Three lanes were closed on 3rd Avenue between 45 st & 46 st. No reported injury. ConEd took oil samples to laboratories, pending analyticals Other agencies present on site: DEP-Hazmat - Chris Yesmont, Faisal Aldafar (718 595 5000) DEP-Industrial Waste NYC OEM - Rohl (917 416 2520) 4/10/08: Site inspection. Excavation is on west side of 3rd Avenue between 44th and 45th Street - location is in first travel lane immediately east of the parking lane. Barrel has been welded and soil cleanup will begin today. Con Ed Emergency Management (Mike Spall) has been contacted by NYCOEM - this excavation is on the route planned for the pope's visit next week. they have to restore the site before Monday the 14th and may have to come back at a later date to complete the cleanup. There is a crew attempting to trace the casing (located around the feeder) signal weakens/dies approximately 10 feet south of the excavation. See eDocs for photos. (JHO) 4/14/08: e-mail from Con Ed S&TO (Mike Pillig): The subject spill on 3rd Ave between 44th and 45th was cleaned. Post ex samples attached. Subsequent there was a minor amount of oil observed that presumable dripped out from the 12 inch casing. Allstate was called back in and remove a very small amount of contaminated soil (approximately 2 - 5 gallon pails). All visible signs of contamination were removed and the site was backfilled by DEPs contractor. Samples were taken from the walls of the excavation, with the exception of the west wall which was concrete. One was also taken from the floor below the repair. See eDocs for sample results and site sketch. Close. (JHO) "
Remarks:	"DEP WAS DOING AN EXCAVATION AND HIT A LINE AND IS CONTAINED IN EXCAVAVTION. 210751"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 150-697: 10/10/03 found at 10:15 hrs. approx. 1 gallon of transformer oil had leaked from the transformer down the side and onto dirt on the concrete floor in vault V5705. He found the dirt soaked with oil. The oil never migrated to the sump pit. The source of the spill is the transformer and the cause is a leak from the top of the transformer probably caused by corrosion. One liquid sample taken for PCB. Initial cleanup action taken by placing absorbent pads down. This will not be classified as a 24 hr. spill since the transformer is being condemned and requested OOE Cat II. There is scaffolding over the vault, which needs to be removed in order to remove the transformer & perform the final cleanup. The transformer is a G.E. 1,000 kVA unit with Serial #F529854. The fluid capacity is 385 gallons. The transformer was pressure tested and it failed. The transformer must be de-energized in order to perform a cleanup. 10/10 @ 20:44 Lab Sequence Number: 03-08409-001 TOTAL PCB 18 ppm Update 01/07/04 Transformer 5705 has been drain & disconnected wait for scaffold to be removed 07/30/05 04:15 E.Hulser#39723,Cable Supervisor, notified the control center on 07/30/05 at 03:40hrs. to report the cleanup in V5705 was completed, this was a final cleanup. There were no solids removed and no drums or barrels were used. There was liquids removed Via vactor truck from V5705. The method used to clean was double washed with simple green. The yellow environmental tag numbered #17505 was removed from V5705. The cleanup crew were; G.Rosario#11464 and A.D'ateno#20237. The source of the spill, a leking transformer, was removed and replaced with a new unit in V5705. The cleanup was completed on 07/30/05 at 03:30HRS."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

PINNACLE ENVIRONMENTAL CORP (Continued) **1016455577**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is

LA MODE CLEANERS (Continued) **1016115740**

used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Facility address: 105 E 42ND ST
NEW YORK, NY 10017
EPA ID: NYR000161398
Mailing address: 7TH AVE - 16TH FLOOR
NEW YORK, NY 10018
Contact: GARTH LAWRENCE
Contact address: 7TH AVE - 16TH FLOOR
NEW YORK, NY 10018
Contact country: US
Contact telephone: (718) 391-4709
Contact email: GLAWRENC@MTA-ESA.ORG
EPA Region: 02
Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:
Owner/operator name: MIDTOWN TRUCKAGE VENTURES LLC
Owner/operator address: LEXINGTON AVE
NEW YORK, NY 10017
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: State
Owner/Operator Type: Owner
Owner/Op start date: 01/25/2007
Owner/Op end date: Not reported

Owner/operator name: MTA-LIRR EAST SIDE ACCESS
Owner/operator address: Not reported
Not reported
Owner/operator country: Not reported
Owner/operator telephone: Not reported
Legal status: State
Owner/Operator Type: Operator
Owner/Op start date: 09/04/2007
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No

GRAND CENTRAL TERMINAL (Continued) **1012186278**

Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:
Waste type: Other Universal Waste
Accumulated waste on-site: No
Generated waste on-site: Yes

Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Waste type: Lamps
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Waste type: Pesticides
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Waste type: Thermostats
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when

TISHMAN SPEYER PROPERTIES (Continued) **1001229331**

complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Conditionally Exempt Small Quantity Generator
Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

DEC Memo:	"e2mis no 155131 M. Tamarez found approx. 50 gallons of an unknown oil and approx. 100 gallons of water in V4012. There were three samples taken; one for PCBs, one for oil ID and one for flashpoint. There was no intial cleanup action taken, the cleanup is pending crews and a tanker. [Notify Michelle Tipple if oil ID shows #2 fuel oil - she's working on a spill a block away.] 08/30/04 19:15 M.Tamez#88368 of I&A notified the control center on 08/30/04 at 18:30hrs. to report that she found approx. 50 gallons of an unknown oil and approx. 100 gallons of water in V4012. The location of V4012 is F/O 301 Madison Ave.(the cross street is E. 41 st) M.Tamez#88368 was at V4012 because Feeder 4M65 had opened auto. M.Tamez#88368 was working under account number #H3282 at the time of the spill. There was no fire or smoke involved and no sewers or waterways were affected. There were no injuries related to this spill and the weather conditions did not contribute to the hazards of this spill. There was no private property affected. There is oil filled equipment in V4012, the transformer. A yellow environmental tag #35946 was hung in V4012. The water in V4012 is standing. There are no substantial cracks in V4012. M.Tamez#88368 could not see a sump or a sump pump at this time. There were three samples taken; one for PCB'S, one for oil ID and one for flashpoint. The samples are taken from the spill. The samples are marked priority E. The chain of custody form is # DD06641. There was no intial cleanup action taken, the cleanup is pending crews and a tanker. 08/31/04 04:50 Lab Sequence Number: 04-06913-001 TOTAL PCB 13 ppm 08/31/04 04:52 Lab Sequence Number: 04-06914-001 Analysis indicates the presence of a transformer oil. 08/31/04 04:55 A partial cleanup was set up for 08/30/04 at 23:00hrs. The partial cleanup is still in progress at this time. Update 9-9-04 @ 16:25 M Tamez # 88368 reports that a partial cleanup has been completed as of 9-4-04 @ 17:30. 268 gallons of transformer oil were removed by a tanker. Oil absorbent pads and speedy dry were applied. Cleanup crew and supervisor are listed in the event involved person screen. Final cleanup is pending transformer removal. Update 1-22-05 @ 06:09 G Byrne # 81264 reports that the cleanup is complete as of 05:50. Double washed with slix and flushed. All liquid removed by vactor truck. Tag #35964 removed. Cleanup persons are listed in the event involved person screen. Transformer has been removed and a new transformer installed."
Remarks:	"50 gal of unknown oil on 100 gal of water. Material contained to the vault. Clean up crew is already there. There is a transformer in the vault but they are unsure if it is actually involved with the spill."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

CON EDISON - 395 LEXINGTON AVE (Continued) **1000111697**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "e2mis no 157411 While Sinclair was Flushing N-50208 with Vehicle # 60533,he sprang a Hydraulic leak from the Vactor system and approx 20 gallons of Hydraulic fluid spilled into the adjacent M-50206 along with approx 50 gallons of water. The truck was temporarily repaired and the cleanup of the truck was started at 18:35 and completed at 18:45.. The truck can be driven into the W.28 St yard without an other Environmental impact and will be permently repaired there either by the driver or Transportation. No sewer/waterway affected. The spill was in the Mankole, no movement on the standing water, no sumps verified, no cracks. Environmentag Tag # 38687was hung. Two samples for PCB and ID will be taken. Cleanup for the M-50206 will be pending Sample results. 2/28 @ 19:50 According to Conduit plate E 26 - I - 1, there is no sewer connection. Update 3-1-05 @ 06:07 Lab Sequence Number: 05-01745-001 - PCBs < 1 ppm Lab Sequence Number: 05-01747-001 - Analysis indicates the presence of a substance similar to a lubricating oil. Update: 3/1/05 @ 17:21 hrs. Manhattan Environmental Desk added manhole M50206 to the Description and Location fields in order to track the completion of the cleanup in this structure. This was discussed with ERT, Paul Walsh and he agreed with this change. In addition, the Responsible Operation was changed from Flush Operations to Underground South since they are responsible for the cleanup in the manhole. Based on the results of the sample analysis the oil in the manhole is the lubricating or hydraulic fluid spilled by the Vactor truck. The cleanup of the vehicle was completed but the cleanup of the manhole is pending scheduling of UG crews and Tanker or Vactor truck. Update 3-25-05 @ 05:25 A Munro # 13615 reports that the cleanup is complete as of 05:25. 2 bags of ppe. 650 gallons of oil and water mixed removed by tanker. Double washed with slix and flushed. Tag # 38687 removed. Source of spill was a vactor truck that was on location previously. Cleanup crew and supervisor are listed in the event involved person screen."
Remarks: "sprang leak on hydraulic hose. leak from vehicle recovered. manhole affected 60533"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 8/30/99, 2:50 PM - Spill in vault VS4090. Historical results 10 ppm. Spilled material sampled at 432 ppm. Initial visual assessment was 350 gallons gallons cooking grease on >400 gallons water. Final cleanup as >500 ppm. >1 lb release. 200 gallons oil in unit. Unti capacity is 355 gallons according to nameplate data. Partial cleanup done. Drain clogged, put plug in. 4 other adjacent vaults also affected. 1000 gallons water removed from these vaults in >50 tanker. (CAE) ~~~~~~~~~~~~~~~~~~~~~~ e2mis no. 127463: 28-AUG-1999 -- V4090--FDR-4M99 -- 279-93 MADISON AVE FOUND APPROX 350-GALS UNKNOWN OIL MIXED W/ 400-GALS WATER....C.BRUCE STATES SUBSTANCE LOOKS LIKE COOKING OIL.....NO VISUAL MOVEMENT OF FLUID....SPILL CONTAINED IN VAULT.....NO SUMP PUMP.....SUMP OR DRAIN NOT VISIBLE....NO CONDUIT PLATE AVAILABLE FOR REFERENCE TO CHECK IF THERE IS SEWER CONNECTION....2-SAMPLES TAKEN (PCB/ID)...SIGN#22473 PLACED....RED WAGON CREW ON LOCATION IN RESPONSE TO SMOKING VAULT...OIL FILLED TRANSFORMER IN VAULT....UNABLE TO CHECK AT THIS TIME DUE TO SPILL AND SMOKE CONDITION... CLEAN UP PENDING CREW/EQUIPMENT.....TANKER ORDERED @ 10:50 HRS. RESULTS OF LAB ANALYSIS 99-09000 RECEIVED ON 8/28/99 @1437 HRS AROCLOR 1260, PCB 432 PPM. 08/28/99 15:30 E.S#9 C.BRUCE REPORTS OIL MIGRATED INTO ADJACENT VAULTS (V2917, V2852, V4107, V5481) VIA WEEP HOLES... THESE 4 VAULTS HAVE SHEENS.... CLEANUP WITH ORIGINAL SPILL(V4090) ... ERT(PEREZ) ON LOCATION AND OKAYED SAME. 8/28/99 I&A OS J. Gnall #19045 reports all vault floors were drained in total of approximately 1,000 gallons of water from Vaults 2917, 5481, 2852, and 4107 and oil-water mixture in V4090 by Astoria >49PPM tanker. Also, drained transformer in V4090 of approximately 200 gallons of oil by Astoria >49PPM tanker. Maximum capacity of transformer is 355 gallons in accordance with its nameplate data. Disconnected transformer for removal. Partial cleanup was completed using oil absorbant, oil aborbant pads, and oil absorbant pigs. All drains at the location were clogged upon arrival. Also put drain plug in drain of V4090. No sump pumps at location. Final cleanup pending transformer removal. From: Shah, Dan Sent: Sunday, August 29, 1999 22:16 To: Radtke, Edward Jr.; Jones, Paula E.; First, Louis W. Jr. Cc: dl - Environmental Response Team; Cohen, Barry; Barry, Martin Subject: E2MIS 127463 Good morning: We had a spill in Vault 4090, @ 279-93 Madison Avenue over the weekend. Number 9 received a call that the unit was smoking. Crews responded and found approximately 350 gallons of oil thought to be possibly cooking oil. The unit had a historical of 10 PPM PCBs. A sample was taken from the spilled oil and results came up as 432 PPM PCBs making this a 'one pound' release inside the vault. The clean up requirements are same as a >500 ppm spill because of the >1 lb. Release. This was confirmed with Barry Cohen. Please check with Barry Cohen, EH&S if you need additional assistance. 9/6/99 I&A OS L. Roman #27270 reports V4090 has cleanup complete. Powerwashed floor and walls twice with 760 bio-cleaner. Then completed powerwash twice more. Generated and removed 8 - 55gal >49PPM solid waste drums and 2 - 55gal >49PPM liguid waste drums. Waste was picked up by Astoria transportation from spill location. Cleanup was started at 08:30hrs and completed at 18:45hrs. Oil notification tag could not yet be removed due to the requirement of post cleaning grid samples. Final closeout of job is

VAULT 4090 (Continued) **S104507968**

pending post cleanup grid samples. Also, I&A supervisor L. Roman reports there are no weep holes and therefore no migration of oil into nearby vaults. There was no oil in vaults 2917, 5481, 2852, 4107. This has also been confirmed by I&A OS J. Gnall who stated only water was in the nearby vaults and he drained same on 8/28/99. 9/12/99 I&A OS L. Roman #27270 reports ERT representative Wendell Fenner has been informed that there was no oil migration from spill into nearby vaults 2917, 5481, 2852, and 4107. ERT representative Wendell Fenner will meet I&A crew on location at 08:00AM on 9/13/99 for grid samples in vault 4090. On 10/7/99 a 2nd clean up was completed in vault 4090 at 1430hours. Wipe sample taken and returned indicating wipe samples are acceptable and clean up is completed based on these results. LSN 99-10614 dated 10/10/99 wipe sample 18 < 1.00 ug/100cm-2 wipe sample 19 2. ug/100cm-2 wipe sample 14 1ug/100cm-2 wipe sample 17 <1.00 ug/100 cm-2 "

Remarks: "cooking oil mixed w/ 400 gallons of water contained in the manhole - believed a restaurant may have been dumping their cooking oil in the manhole - they will clean up assuming 50-499 ppm pcb as soon as they get a tank to pick it up - samples for id & pcb's"

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit

JOHN BUCK CO (THE) (Continued) **1005882704**

Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"e2mis no 159150 M Zaccardo #11549 discovered 3 gallons of transformer oil mixed with dirt on the concrete floor of the structure. No sewer or waterwat affected. No measuring device was used to determine the amount of the spill. Source of spill is the transfomer and the cause is a leak(a possible bottom leak). Environmental yellow tag # 46096. The drain in the structure is clogged. No substantial cracks. 1 dirt and oil sample was taken from the spill by M Zaccardo # 11549 for pcb. Chain of custody # ee09000. Cleanup is pending transformer removal. Update 6-14-05 @ 00:39 Lab Sequence Number: 05-05670-001 TOTAL PCB 27 ppm 16 @ 00:25 Stlies # 03740 of Cable called mre up to find out the status of this structure. I informed him that a Contractor was assigned to flush this structure.Ticket # 29740. He informed me that the structure looked crystal clean in his opinion like it was double-washed and cleaned in the proper manner. He is treating this like a completed situation and will be dropping the Unit this morning. He said he will remove the tag. 8/16 @ 02:37 Spoke to Stiles and he informed me that the Flush Foreman told himn that the Vendor did in fact complete the washing of the structure. Environmental tag # 46096 was removed. Crew...Pirrello # 12120....Platt # 13218...Rosario # 11464....Holder # 85940 The spill was remediated the the replacement with a new Transformer unit. Completion 8/16/2005 @ 02:05"
Remarks:	"BELIEVED THAT THE TRANSFORMER IS LEAKING FROM THE BOTTOM. NO PRIVATE PROPERTY EFFECTED. CLEAN UP IS PENDING REMOPVAL OF TRANSFORMER. CON ED# 159150"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT e2mis 120501 10/14/98 03:05 SKRETKOWICZ(FOD) REPORTS WHILE ATTEMPTING TO IDENTIFY DISTRIBUTION FEEDER CABLES TO LIVE END CAP A TRANSFORMER ON FDR 4M59, HE FOUND SPILL OF APPROX. 25 GALLONS OF UNKNOWN OIL MIXED WITH 500 GALLONS OF WATER IN MH57881 LOCATED E/S THIRD AVE 19' N/O E 44 ST. SPILL IS CONTAINED, THERE WAS NO ENTRY TO ANY SEWERS OR WATERWAYS. UNABLE TO VERIFY AT THIS TIME IF THERE ARE ANY CRACKS IN THE STRUCTURE OR A DRAIN DUE TO THE LARGE AMOUNT OF WATER THAT THE STRUCTURE CONTAINS. SKRETKOWICZ TOOK A SAMPLE AND INSTALLED SPILL TAG #18151. THERE WERE NO AGENCIES ON LOCATION. P.MCHUGH IN THE CONTROL CENTER WAS NOTIFIED OF THE SPILL AT 03:05 HRS ON 10/14/98. THERE IS A POSSIBILITY THERE IS SOME PILC CABLE IN THE STRUCTURE BUT THE CABLES ARE BELOW THE WATER LINE AND CAN'T BE INSPECTED AT THIS TIME. LOGGER PGM If this is a Con Edison manhole it

MANHOLE 57881 (Continued) **S103572916**

contains electrical cable and splices. Many manholes have a sealed sump in the floor which is used to allow runoff when pumping the structure. A hose is place in this sump and water on the floor will flow into the sump allowing the floor to be cleaned. If cleaned prior to analysis of the fluid, the structure will be cleaned as >50 PPM and all liquid and waste will be manifested accordingly. The structure will be double washed with a degreaser, i.e. Slix. All cleaning material and PPE will also be treated as >50. If any sludge is found within a manhole it is treated as lead contaminated and manifested accordingly. The spill identification tag will remain secured to the structure until the analysis is completed and if <500 PPM the signage will be removed. If the analysis is >499 PPM, a grid will be prepared for wipe testing the area. Until the analysis of the wipes are proven to be <10ugs/100cme2 all additional waste produced from the structure will be treated as the original analysis. If this spill occurred in a transformer vault containing a sump pump and there was a possible release, the drainpipe trap will be dismantled to determine if oil was released. Sludge found in a vault, through historical analysis, has been determined not to contain lead.
10/14/98 03:25 MCHUGH NOTIFIED DEVOTI(CIG) OF THE SPILL.. LOGGER PGM
10/15/98 O.S. (UG) P. Setaro reports clean up complete in MH #57881
E/S 3 Ave 19' N/O E. 44 St. on 10/14/98 @ 18:30 hrs. Treated clean up as >50 ppm PCB Removed 1400 gals. Oil/Water to >50 tanker Generated 1 drum solid debris - Taken to Chemwaste via Corporate Transportation EPA ID # NYP004019154 Double washed & rinsed structure received SA 98-11008 <1. ppm PCB while clean up was in progress. DEC Memo:	"e2mis no 153706 M. Milano found at 19:05 in V-1200 approx 30 gallons of unknown oil. The source and the cause are unknown at this time, There was no visible leak coming from the Unit. The spill was in the concrete structure and there are no Substantial cracks in that structure. The sump pump was found unplugged . Two samples for PCB and ID will be taken. No initial cleanup action to be taken at this time. Upon further investigation it is determined that the unknown oil in the structure is from a known source - has come from the Unit V-1200. Said Unit seems to have a Bottom leak condition. Cleanup to be set up for :00 on 6/6/2004. Lab Sequence Number: 04-04394-001: Analysis indicates the presence of a substance similar to a dielectric fluid. Lab Sequence Number: 04-04393-001: TOTAL PCB 34 ppm 6/7 @ 06:20 The partial cleanup was completed at 06:00. 225 gallons of oil removed from the unit and structure. All othret sludge was shoveled into the pit and sucked up by the Vactor truck. The source can now be said to be the Transformer. 8/28/04 11:41 E. Hulser # 39723 cable/cleanup supervisor called to report that the cleanup was completed at 11:35. The flush truck removed all debris & liquids. The structure was double washed with slix. The spill tag # 41220 was removed. G. Rosario # 11464 did the cleanup. The defective transformer was removed & a new one installed."
Remarks:	"30 GALLONS OF UNKNOWN OIL. SUMP PUMP UNPLUGGED."

Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Phone:	(212) 226-1520
DEC Memo:	"10/24/08 - Raphael Ketani. The spill was called in on 10/23/08 as oil under a removed tank. According to Property Shark, the site is located at block and lot 301 and 30. The address is 39 Eldridge Street. The alternate address is 39-41 Eldridge Street. The site is a 5 story concrete and steel commercial building. The owners are 39-41 Eldridge Street Corporation. The management company is Great World Management, 207 Canal Street, NY, 10013. Mr. Chan's phone number is (212) 226-1520. I spoke to Mr. Chan. He said that MILRO is supposed to give him a proposal by teusday for doing the investigative work at the site. I spoke to Paul Basso of MILRO (516) 379-1500. He said that they will first wash the concrete floor and then do 2 to 4 soil borings through the floor. 10/27/08 - Raphael Ketani. Dorothy from MILRO called me. She said that MILRO took one soil sample at the site and found 4.2 ppm of total VOCs by using the PID meter. She said that they want to install the replacement tank today. I told her that I had spoken to Paul previously about this tank pull and he had told me that 3 or 4 borings would be done and that the soil samples would be analyzed. She said that she wasn't aware of this. I added that MILRO can either dig everything out to where there are no detections, or do more sampling and wait for the lab results. I told her that the PID reading is a field screening and can't be relied upon to tell you that the contamination limits are below TAGM. She then called Anthony by cell phone, who was at the site with his crew. She spoke to him while I was on hold for a long time. Then she got back to me and told me that he agreed to do at least a couple of samples and to wait and see what the lab results are. 10/29/08 - Raphael Ketani. Paul form MILRO called me up. He said that they did 5 borings. The PID meter registered 9.5 ppm to 54.9 ppm of total volatiles for the samples. He said that he is putting together a proposal for the client desrcibing work to break up the concrete slab and remove contaminated soil below it. He said that they tested the fill pipe, fill box, and vent pipe, and had good tests for all. So the oil spill was due to just the tank, which has been removed. 11/21/08 - Raphael Ketani. Paul called me to say that they received the soil analytical results. They were all non-detect. He added that MILRO will send the results along with a closure letter. I asked him about the size of the tanks to be installed. He said they will be two 275 gal. tanks. 12/8/08 - Raphael Ketani. Today I received the site investigation and closure report from MILRO. I reviewed the report and found it to be acceptable. The

COMMERCIAL BUILDING (Continued) **S109372821**

analytical results for the 5 end point samples were all non-detect. Based upon the 11/26/08 investigation and closure report from MILRO, I am closing the spill case. "

Remarks: "Caller co did a tank removal on a vault mounted 1000 gallon tank and found oil contamination under the tank on the floor of the vault. Further investigation is pending."

EPA Region: 02
Classification: Conditionally Exempt Small Quantity Generator
Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY e2mis 139001 On 8/17/2001 @ 12:20 T. Coghlan # 01215 reported to me that while placing grounds for Feeder 4m86 he found 1/2 pint of oil on the side of Transformer in V-0.There are no sewer / waterways affected, No private property is affected and no sewer connection as of Conduit plate # 25-i-1. The substance is an unknown oil and the source and cause of the spill is unknown. It was spilled on the concrete floor of the structure. No substantial cracks were observed in the structure. No initial cleanup action was taken and Environmental tag # 20732 was left in place. Update 8/18 @ 18:57 B. Pettenato put a pressure test on unit and it failed @ 18:00. He put down Absorbent pads to ocntain the spill. The final cleanup will be pending Transformer removal. He took a new sample. Lab results for Lab sequence # 01-08346-001 that was taken from the side of the Unit before the Pressure test was taken. TOTAL PCB 88 PPM. Received lab results from from second sample taken, lab sequence # 01-08348-001. TOTAL PCB 10 ppm. Analysis indicates the presence of a substance similar to a dielectric fluid. For information purposes only -- this transformer was retrofilled on 12/15/98 and analyzed on 8/27/99 as containing 13 PPM PCBs. V0710 - UNIT WAS REPLACED ON 10/12/01 AND MADE AUTO 10/24/01. UPDATE: 9/09/02 This manhole was cleaned as 50 to 499 ppm PCB's. The signed over 50 cleanup checklist was received from Operating Supervisor, V. Mirance on 9/09/02."
Remarks:	"CAUSE OF THE SPILL IS UNKNOWN.1/2 PINT WAS SPILLED "

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"05/03/07 - See e-docs for Con Ed report detailing cleanup and closure. 162390. 30-DEC-2005 10:03. S Brenseke # 05729, I&A Supervisor reports that while doing a preinspect in vault 3571, located at 120 e 41 street, he discovered 10 gallons of dielectric fluid on the concrete floor of the vault. Work was being performed under acct # F3293. There was no fire or smoke involved and no release to sewers or water ways. No injuries were reported and weather conditions did not contribute to the hazard of the spill. Yellow tag # 44236 was installed and samples of oil were taken for PCB and ID. No private property was affected and the substance is owned by Con Ed. Brenseke will get back with chain of custody form # . CIG notified spoke to T Enright #48536 At 09:50 hrs. logged by : G Anelli 14059 "
Remarks:	"NO TO 5 QUESTIONS, NO PRIVATE PROPERTY. HAS NOT BEEN CLEANED UP. 162390"

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
