EXECUTIVE SUMMARY

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) completed a Phase I Environmental Site Assessment (ESA) of the property located at 240 Nassau Street in Brooklyn, New York (the "subject property") under the written authorization of 240 Nassau Street, LLC (the "Client" and the "user").

The Phase I ESA was completed following the guidelines of ASTM International Standard Practice E1527-21 (ASTM E1527-21), the United States Environmental Protection Agency's (US EPA) All Appropriate Inquiries (AAI) Rule, and industry standard practice. The user requested this ESA as part of their environmental due diligence related to a potential transaction involving the subject property.

Subject Property Layout

The 0.56-acre subject property is improved with one 24,180-square foot building with a two-story gymnasium and community space and a one-story classroom area. A narrow concrete paved area runs along the western and southern boundary of the building, followed by an asphalt-paved parking lot. A 400-square-foot garden is present in the southwest corner of the parcel. A shipping container used for storage is present adjoining the southern boundary of the parcel. A subterranean Consolidated Edison (Con Edison) easement exists in the western portion of the subject property.

Subject Property Current Use

The subject property most recently operated as a community youth center and was in the process of being vacated during the site reconnaissance.

Subject Property History

The subject property was occupied by residential dwellings; a street terminating into a cul-de-sac, storefronts including a horseshoe maker and blacksmith, stables, and open space in the late 1800s and early 1900s. By 1950, an automobile parking lot was constructed. By 1954, the block that contains the subject property (Block 110) was razed during construction of the Brooklyn-Queens Expressway and used as an automobile parking lot. The subject property was improved with a one- to two-story building used as an after-school recreation, learning, and enrichment center for youth ages 6-18 by 1975. A second story was added onto the northern half of the structure by 2006, bringing the building into its current configuration. The Madison Square chapter of the Boys and Girls Club operated a youth community center known as the 'Navy Yard Clubhouse' at the subject property from 1975 until the summer of 2023, when it was permanently closed.

Conclusions

Langan completed a Phase I ESA of the subject property using the scope guidelines and inherent limitations of ASTM E1527-21. Table ES-1 presents the conclusions of the Phase I ESA.

Table ES-1 Conclusions, Findings and Opinions

ASTM E1527-21 Scope Items
Recognized Environmental Conditions (REC)
Historical Uses of Adjoining and Surrounding Properties: Historical operations/uses at surrounding properties include a dry cleaner, an industrial school, an iron scrap yard, a filling station, manufacturing facilities, and machine shops. One or more of these properties are listed in environmental regulatory databases for petroleum bulk storage, closed petroleum spills, or historical drycleaner facilities. Releases of petroleum and/or hazardous substances at surrounding properties may have migrated to and impacted groundwater and/or soil vapor quality at the subject property; therefore, the historical operations at the adjoining and surrounding properties are considered a REC.
Controlled Recognized Environmental Conditions (CREC)
Langan did not identify CRECs.
Historical Recognized Environmental Conditions (HREC)
Langan did not identify HRECs.
De Minimis Conditions
Langan did not identify de minimum conditions.
Significant Data Gaps
Langan did not identify significant data gaps.
Business Environmental Risks (BER)
Utility Easement: A subterranean Con Edison easement exists in the western portion of the subject property. The easement may limit the development potential of the subject property and require additional specialized work at a cost premium. Therefore, the presence of the Con Edison easement on the subject property is considered a BER.

1. INTRODUCTION

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) completed a Phase I Environmental Site Assessment (ESA) of the property located at 240 Nassau Street in Brooklyn, New York (the "subject property") under the written authorization of 240 Nassau Street, LLC (the "Client" and the "user"). A Subject Property Location Map is provided in Appendix A (Figure 1).

The Phase I ESA was completed following the guidelines of ASTM International Standard Practice E1527-21 (ASTM E1527-21), the United States Environmental Protection Agency's (US EPA) All Appropriate Inquiries (AAI) Rule, and industry standard practice. The user requested this ESA as part of their environmental due diligence associated with a potential transaction involving the subject property.

1.1 Purpose

The purpose of this Phase I ESA is to identify recognized environmental conditions (REC) associated with the subject property. This purpose also includes identifying controlled recognized environmental conditions (CREC), historical recognized environmental conditions (HREC), de minimis conditions, and significant data gaps. The definitions of REC, CREC, HREC, de minimis condition and other select ASTM terms used in this report are in Section 8.

1.2 Scope of Services

Langan's scope of services consisted of the completion of a Phase I ESA following the guidelines of ASTM E1527-21. Langan's scope of services as it pertains to the elements of a Phase I ESA as specified in ASTM E1527-21 is described below.

1.2.1 Records Review and Local Government Interviews

Langan contracted a third-party provider to search environmental regulatory databases and provide historical records. The database search included select federal, state, local and tribal standard source environmental databases within the approximate search radii specified by ASTM E1527-21.

Langan submitted Freedom of Information Act (FOIA) requests to supplement environmental database listing information. The FOIA requests were submitted to the New York City Department of Environmental Protection (NYCDEP), New York City Department of Health (NYCDOH), New York City Fire Department (FDNY), New York State Department of Health (NYSDOH), New York State Department of Environmental Conservation (NYSDEC), and USEPA, Region 2. Langan also reviewed online records including the DECinfo Locator database and USEPA Cleanups in My Community database. Agency FOIA-requested information, where received, is discussed in relevant sections of this report and referenced in Section 7.

Langan supplemented the third-party-provided historical records with review of online historical record sources including Google Earth Pro and Nationwide Environmental Title Research (NETR) Online.

1.2.2 Site Reconnaissance and Owner/Operator/Occupant Interviews

Langan completed the site reconnaissance on 4 August 2023. Vincent Carolina (Navy Yard Clubhouse superintendent; the "key site manager") accompanied Brad Koontz of Langan during the site reconnaissance. Vincent Carolina has been associated with the subject property since 2006. The site reconnaissance focused on the spatial extent of the subject property and associated structures, and progressed to the adjoining and surrounding properties. The adjoining properties were observed from the subject property or from public right-of-ways. The weather at the time of the site reconnaissance was about 80°F and sunny. Limiting conditions encountered during the site reconnaissance, if any, are discussed in Section 8.3.

Langan interviewed Mr. Carolina during the site reconnaissance.

1.2.3 Evaluation, Report and Parts Used in Concert

Langan evaluated the pieces of information obtained from the records reviews, site reconnaissance and interviews described above, and from the user as described in Section 1.3 in concert with each other. Langan's findings, opinions, and conclusions are discussed throughout this report. Significant assumptions, or deletions, deviations or exceptions to ASTM E1527-21 are noted in Section 8.3.

1.2.4 Non-ASTM Scope Services

The scope of services for the Phase I ESA did not include non-scope ASTM considerations, including per- and polyfluoroalkyl substances (PFAS).

1.3 User Responsibilities

Langan requested that the user provide the results of tasks the user is responsible for completing to satisfy the requirements of AAI. The tasks include: searching for known environmental liens and activity and use limitations (AUL) filed or recorded against the subject property, and provision of information related to specialized knowledge or experience of the user or the degree of obviousness relative to conditions indicative of releases or threatened releases; actual knowledge of the user regarding environmental liens or AULs related to the subject property; specialized knowledge or experience of the user; reasons for significantly lower purchase prices, and commonly known or reasonably ascertainable information within the local community about the subject property. Langan also requested that the user state the reason the Phase I ESA was requested. A summary of the user's responses is provided in Appendix B and relevant information provided by the user is discussed in applicable sections of this report.

Unless specifically included in the scope of services, Langan did not complete a title search or a search for environmental liens or AULs, as that is the responsibility of the user. If the user requested that Langan complete such searches on the user's behalf, the information was supplied to Langan by a vendor, and to the vendor by government sources; therefore, neither Langan nor the vendor can verify the completeness or accuracy of the title search, or AUL searches.

2. SUBJECT PROPERTY DESCRIPTION AND CURRENT USE

The following sections describe the subject property location, ownership, physical setting, and current layout and operations.

2.1 Location, Legal Description, and Ownership

The 0.56-acre subject property is located about 200 feet southwest of the intersection of Nassau Street and Navy Street. The subject property is described by the Brooklyn Borough Tax Map Block 110, Lot 25. A legal description of the subject property was not reasonably ascertainable. The subject property owned by Madison Square Boys' Club, Inc.

2.2 Physical Setting

The physical setting that includes the geologic, hydrogeologic, hydrologic, and topographic characteristics of the subject property and surrounding area are discussed below.

2.2.1 Topography

The subject property appears on the 2013 United States Geological Survey (USGS) 7.5-minute series topographic quadrangle map for Brooklyn, NY. According to the USGS quadrangle map, the elevation of the subject property is about 20 feet above mean sea level. Based on subject property observations and the topographic quadrangle map, the subject property is characterized by generally level terrain.

2.2.2 Geology

Based on a review of the Bedrock and Engineering Geologic Maps of New York County and Parts of Kings and Queens Counties, New York and Parts of Bergen and Hudson Counties New Jersey, by Charles A. Baskerville, dated 1994, the bedrock formation underlying the subject property is the Ravenswood Granodiorite, which consists of hornblende- and biotite-layered gneiss and felsic granite.

2.2.3 Hydrogeology

Groundwater flow is typically topographically influenced, as shallow groundwater tends to originate in areas of topographic highs and flow towards areas of topographic lows, such as rivers, stream valleys, ponds, and wetlands. A broader, interconnected hydrogeologic network often governs groundwater flow at depth or in the bedrock aquifer. Groundwater depth and flow direction are also subject to hydrogeologic and anthropogenic variables such as precipitation, evaporation, extent of vegetation cover, and coverage by impervious surfaces. Other factors influencing groundwater include depth to bedrock, the presence of artificial fill, and variability in local geology and groundwater sources or sinks.

Groundwater is anticipated to flow to the northeast, towards Wallabout Bay, which is located about 2,400 feet northeast of the subject property.

Groundwater in Brooklyn is not used as a potable water source. Potable water is provided to the subject property by the New York City Department of Environmental Protection (NYCDEP) and is obtained from reservoirs in the Croton, Catskill, and Delaware watersheds.

According to the New York State Department of Environmental Conservation (NYSDEC) Environmental Resource Mapper, there are no mapped wetlands at the subject property. The closest mapped waterbody is the East River.

According to the Federal Emergency Management Agency (FEMA) Preliminary Flood Insurance Rate Map (PFIRM) dated December 5, 2013 (Map Number 3604970203G), the subject property is located in an area of minimal flood risk hazard (outside of both the 100-year [1% chance] and 500-year [0.2% chance] floodplains).

2.3 Subject Property Description

The 0.56-acre subject property is improved with one 24,180-square foot building with a two-story gymnasium and community space and a one-story classroom area. A narrow concrete paved area runs along the western and southern boundary of the building, followed by an asphalt-paved parking lot. A 400-square-foot garden is present in the southwest corner of the parcel. A shipping container used for storage is present adjoining the southern boundary of the parcel. A subterranean Consolidated Edison (Con Edison) easement exists in the western portion of the subject property.

A Subject Property Layout Map is provided in Figure 2 of Appendix A. Photographs of the subject property and a checklist documenting Langan's observations relative to the features, activities, uses and conditions outlined in Section 9.4 of ASTM E1527-21 are in Appendix B. User provided-information is in Appendix C.

2.4 Current Subject Property Use

The subject property most recently operated as a community youth center and was in the process of being vacated during the site reconnaissance. The following table summarizes subject property utility providers.

Table 2-1 Utility Providers

Utility	Providers
Electricity (used for cooling)	Con Edison
Natural gas (used for heating)	National Grid
Water	The subject property is serviced by municipal (New York City) drinking water
Sewer	The subject property is serviced by municipal (New York City) sanitary and storm utilities

A subterranean Con Edison easement exists on the western part of the subject property. This area is subject to restrictions on disturbing the ground surface. The easement is shown on the Subject Property Layout Map, and the easement agreement is included in Appendix C.

2.5 Hazardous Substances and Petroleum Products

Langan observed hazardous substances stored at the subject property. Langan did not observe evidence of leaks, spills, pools of liquid or releases such as staining, or sheens.

2.5.1 Underground Storage Tanks (USTs)

Langan did not observe or identify any evidence of USTs.

2.5.2 Aboveground Storage Tanks (ASTs)

Langan did not observe or identify any evidence of ASTs.

2.5.3 Drums, Totes, and Intermediate Bulk Containers

Langan did not observe or identify any evidence of drums, totes, or intermediate bulk containers.

2.5.4 Other Chemical Storage, Containers, or Equipment

Langan observed several shelves and boxes containing retail-size containers of paint and cleaning-related products and janitorial products in the janitorial areas. Langan did not observe interior or exterior transformers at the subject property.

2.6 Air Emissions

Air emission sources at the subject property include HVAC equipment and natural gas-fired boiler units. Langan did not identify obvious impacts, such as visible emissions or odors, from air emission sources at the subject property.

Langan does not consider the air emissions an environmental concern for the subject property.

2.7 Waste Management

The following sections describe current hazardous and non-hazardous waste streams, and observations of fill areas or other solid waste throughout the subject property.

2.7.1 Hazardous Waste

No obvious hazardous wastes were observed at the subject property. Historical hazardous waste generation is discussed further in Section 3.2.

2.7.2 Non-Hazardous Waste

Langan observed several shelves and boxes containing retail-size containers of paint and cleaning-related products and janitorial products in the janitorial areas.Langan observed the containers to be intact without obvious indications of a release or material threat of a future release.

General refuse is generated at the subject property. According to the key site manager, during youth center operation, about seven 50-gallon garbage bags of general refuse were generated per day, and about ten 50-gallon garbage bags of recycling were generated each week. General refuse was picked up weekly by the New York City (NYC) Department of Sanitation.

2.7.3 Fill Areas or Solid Waste

Langan did not observe areas that were apparently filled or graded by non-natural causes (or filled with material of unknown origin) that suggest the presence of garbage, construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting solid waste disposal.

2.8 Wastewater

The subject property generates sanitary wastewater which is assumed to be discharged to the municipal sanitary sewer. According to the key site manager, the building has been connected to the municipal sanitary sewer since construction in 1975.

A sump and area of patched concrete was observed in a room with utility connections. One floor drain was observed in the boiler room and one floor drain was observed in an office connected to the gymnasium. The configuration of the piping leading to the sump was unable to be determined. Langan did not observe or identify evidence of septic systems or cesspools at the subject property.

2.9 Storm Water

Storm water at the subject property percolates through pervious areas or sheet flows to the adjoining roadways into the municipal storm sewer system. One storm water drain was observed in the parking lot, which is assumed to drain to the municipal storm sewer system. The entire subject property is covered with impervious surfaces, with the exception of an about 400-square-foot garden in the southwest corner.

3. SUBJECT PROPERTY HISTORY AND RECORDS REVIEW

The following sections provide summaries of the historical uses of the subject property, and available information regarding documented environmental conditions associated with the historical uses.

3.1 Historical Summary

Langan compiled the following summary of the subject property history based on a review of readily available and reasonably ascertainable sources and interviews. Historical resources are provided in Appendix D.

Table 3-1 Subject Property History

Time Period	Historical Discussion
1880s – 1930s	The subject property was occupied by a street terminating into a cul-de-sac, residential dwellings, storefronts including a horseshoe maker and blacksmith, stables, and open space in the late 1880s to early 1930s.
1930s – 1950s	The subject property was occupied by a street terminating into a cul-de-sac, residential dwellings, storefronts, and an automobile parking lot.
1954 – 1975	The subject property was razed and utilized for automobile parking.
1975 – 2006	The subject property was improved with a one- to two-story building by 1975, and was used as a community youth center (the Navy Yard Clubhouse).
2006 – 2023	The Navy Yard Clubhouse was expanded with a second story addition across the northeastern part of the structure by 2006 to bring the building into its current configuration. The Navy Yard Clubhouse was permanently closed in June 2023 and is currently being vacated.

Environmental concerns related to historical operations are discussed further in Section 3.3.

3.2 Regulatory Database Review

The subject property was not identified under any regulatory database.

3.3 Prior Report Review

No prior reports for the subject property were provided to Langan.

4. ADJOINING PROPERTIES AND SURROUNDING AREA

The following sections describe current and historical uses of and database listings for adjoining properties and the surrounding area.

4.1 Current Use of Adjoining Properties and Surrounding Area

The current use of adjoining and surrounding properties is summarized in Table 4-1.

Table 4-1 Current Use of Adjoining Properties and Surrounding Area

Direction	Adjoining Properties	Surrounding Area
North	Nassau Street, followed by the Farragut Public Housing Complex	Farragut Public Housing Complex, churches and commercial properties
East	PS 287 Dr. Baily K. Ashford public middle school	Commodore Barry Park
South	Golconda Playground and Brooklyn Queens Expressway	NYC Department of Transportation operations yard and field office
West	Golconda Playground and Brooklyn Queens Expressway	Multi-story residential buildings, building supply yard

Langan did not observe obvious conditions likely to represent environmental concerns for the subject property from current uses of adjoining or surrounding properties.

4.2 Adjoining Properties and Surrounding Area History

Langan compiled the following summaries of the adjoining properties and surrounding area history based on a review of historical resources and interviews.

Table 4-2 Historical Use of Adjoining Properties

Direction	Adjoining Properties
North	The northern adjoining property is depicted as developed with dwellings and storefronts in the late 1800s. By 1950, the present configuration of public housing buildings comprising the Farragut Houses was apparent. Building permit records and city directory entries indicate that a drycleaner operated on the northern adjoining property from 2011 to 2014. Langan considers the historical use of the northern adjoining property as a drycleaner an environmental concern for the subject property.
East	From the late 1880s to 1951, the subject property was adjoined to the east by Hudson Avenue, followed by dwellings and commercial storefronts, including a filling station. By 1954, the PS 287 Dr. Baily K. Ashford public middle school was apparent in its present configuration. Langan considers the historical use of the eastern adjoining property as a filling station an environmental concern for the subject property.
South	The southern adjoining property is depicted as developed with dwellings and an industrial school on Sanborn maps from the late 1880s until 1915. By 1937, the industrial school was demolished. By 1950 until 1954, an iron scrapyard operated on the corner of Concord Street and former Hudson Avenue. Langan considers the historical industrial use of the southern adjoining property an environmental concern for the subject property.

Direction	Adjoining Properties
West	The western adjoining property was developed with dwellings and storefronts by the late 1880s until 1954, when the block was razed during construction of the BQE. The property was undeveloped from 1954 to 2003, when the space was converted into its present use as the Golconda Playground. Database listings associated with the western adjoining property are discussed in Section 4.3.

The surrounding area was depicted in the topographic and Sanborn maps as developed with evolving configurations of dwellings, storefronts and industrial, and recreational buildings from the late 1880s to the present.

Langan considers the historical uses of the adjoining properties an environmental concern for the subject property.

4.3 Regulatory Database Review

Langan reviewed the environmental database report to evaluate if adjoining or surrounding area properties identified in the database report are suspected to represent an environmental concern for the subject property (see Section 8.2). Langan did not consider review of regulatory agency files necessary to evaluate potential RECs for the subject property unless discussed in Section 4.3.1 or 4.3.2 below. Environmental Data Resources, Inc. (EDR) deliverables are in Appendix E. FOIA-related information is in Appendix F.

4.3.1 Adjoining Properties

Database listings for adjoining properties are summarized as follows.

Lapels Garment Pressing and Cleaners' Agents – 237 Nassau Street (northern adjoining, inferred down-gradient)

This facility was identified on the EDR historic cleaner database. The facility operated as a dry cleaning service from 2011 to 2014. The use and possible release of chlorinated solvents into the environment during the dry cleaning process is a REC.

NYC Department of Education PS287K – 50 Navy Street (eastern adjoining, inferred cross-gradient)

This facility was identified on the LTANKS, AST, and Spills database. The LTANKS listing (Spill No. 1903757) is related to a 10,000-gallon No. 4 fuel oil tank that failed a tank tightness test in 2019. The listing shows that the leak was discovered in the vent line and no release was observed. The LTANKS listing was closed September 21, 2020. The Spills listing (Spill No. 2104867) was related to equipment failure that caused a release of about two gallons of No. 4 fuel oil. The spill was closed September 24, 2021. The AST listing is related to a 4,000-gallon No. 4 fuel oil AST with secondary containment.

The documented storage of petroleum and history of spills at the adjoining site is considered an environmental concern to the subject property.

4.3.2 Surrounding Area

Langan evaluated each of the database listings for surrounding area properties (see Section 8.2). Those warranting further discussion in the context of potential to represent an environmental concern for the subject property are discussed below.

200 Gold Street – (about 0.2 miles west, inferred cross-gradient)

EDR records indicate a 6000-gallon UST containing No. 2 fuel oil was present on the property from 1966 to 2013, when it closed and removed. According to the petroleum bulk storage (PBS) database, an unknown amount of No. 2 fuel oil spilled onto soil during a tank test failure in 2007 (Spill No. 0706102). The spill was closed in 2010. Closure documentation was not provided in the PBS database. Based on the distance and cross-gradient location relative to the subject property, the former spill is unlikely to represent an environmental concern for the subject property.

Based on information in the environmental database report, Langan did not consider submitting FOIA requests to supplement the database listings for adjoining or surrounding area properties necessary, except as discussed above.

5. CONCLUSIONS, FINDINGS, AND OPINIONS

Langan completed a Phase I ESA consistent with the scope and limitations of ASTM E1527-21 for the subject property at 240 Nassau Street in Brooklyn, New York. Exceptions to, or deletions from, ASTM E1527-21 are described in Section 8 of this report. This assessment has revealed the RECs, CRECs, HRECs, de minimis conditions, and significant data gaps presented in Table 5-1.

Table 5-1 Conclusions, Findings, and Opinions

ASTM E1527-21 Scope Items
Recognized Environmental Conditions (REC)
Historical Uses of Adjoining and Surrounding Properties: Historical operations/uses at surrounding properties include a dry cleaner, an industrial school, an iron scrap yard, a filling station, manufacturing facilities, and machine shops. One or more of these properties are listed in environmental regulatory databases for petroleum bulk storage, closed petroleum spills, or historical drycleaner facilities. Releases of petroleum and/or hazardous substances at surrounding properties may have migrated to and impacted groundwater and/or soil vapor quality at the subject property; therefore, the historical operations at the adjoining and surrounding properties are considered a REC.
Controlled Recognized Environmental Conditions (CREC)
Langan did not identify CRECs.
Historical Recognized Environmental Conditions (HREC)
Langan did not identify HRECs.
De Minimis Conditions
Langan did not identify de minimum conditions.
Significant Data Gaps
Langan did not identify significant data gaps.
Business Environmental Risks (BER)
Utility Easement: A subterranean Con Edison easement exists in the western portion of the subject property. The easement may limit the development potential of the subject property and require additional specialized work at a cost premium. Therefore, the presence of the Con Edison easement on the subject property is considered a BER.

6. ENVIRONMENTAL PROFESSIONAL STATEMENT

Resumes outlining the qualifications of the project team are included in Appendix G.

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and I have the specific qualifications based on my education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mimi S. Raygorodetsky

Principal/Vice President (Environmental Professional)

8. LIMITATIONS AND DEFINITIONS

This Phase I ESA report was prepared for Client and is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. The Client is the sole intended beneficiary of the report. The user requested no special terms or conditions regarding this Phase I ESA.

Langan's scope of services, which is described in Section 1.2 and in the contract executed between Langan and the Client, was limited to that agreed to with the Client/user and no other services beyond those explicitly stated are implied. To the extent possible, the services performed and agreed upon for this Phase I ESA are consistent with the guidelines of ASTM E1527-21.

This report is not intended to be an exhaustive assessment of the subject property. The purpose of the Phase I ESA is to reduce uncertainty about unknown conditions at the subject property. No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a subject property. Therefore, Langan cannot "verify", "insure", "certify", or "guarantee" that the subject property is free of environmental concerns.

No expressed or implied representation or warranty is included or intended in this report, except that our services were completed using the care and skill ordinarily followed by professionals providing similar services under similar circumstances in similar locations at the same point in time.

The conclusions provided in this report are based solely on information obtained through completing the standard activities required by ASTM E1527-21 and are intended exclusively for the purpose stated herein, at the specified subject property, as it existed at the point in time the assessment was completed. The conclusions provided in this report do not apply to conditions and features of which Langan was not made aware of through good faith efforts to complete the activities required by ASTM E1527-21 and did not have the opportunity to evaluate.

8.1 ASTM Definitions

The following definitions are provided in ASTM E1527-21 and presented below for reference. This section is not a comprehensive list of definitions provided in ASTM E1527-21 and is intended to summarize those pertinent to this Phase I ESA report.

Activity and use limitations (AUL): legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effective-ness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

Adjoining properties: any real property or properties the border of which is contiguous partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property but for a street, road, or other public thoroughfare separating them.

All Appropriate Inquiries: that inquiry constituting all appropriate inquiries into the previous ownership and uses of the subject property consistent with good commercial and customary practice as defined in CERCLA, 42 U.S.C.§ 9601(35)(B) and 40 C.F.R. Part 312, that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the LLPs to CERCLA liability (42U.S.C. §§ 9601(35)(A) & (B), § 9607(b)(3), § 9607(q), and§ 9607(r)), assuming compliance with other elements of the defense.

Approximate minimum search distance: the area for which records must be obtained and reviewed pursuant to ASTM E1527-21 Section 8 subject to the limitations provided in that section. This may include areas outside the subject property and shall be measured from the nearest subject property boundary. This term is used in lieu of radius to include irregularly shaped properties.

Business environmental risk (BER): a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations.

Controlled recognized environmental condition (CREC): recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

Data gap: a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

De minimis condition: a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.

Engineering controls: physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on a property. Engineering controls are a type of AUL.

Environment: environment shall have the same meaning as the definition of environment in CERCLA 42 U.S.C. § 9601(8).

Historical recognized environmental condition (HREC): previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).A historical recognized environmental condition is not a recognized environmental condition.

Institutional controls (IC): a legal or administrative mechanism (for example, "deed restrictions," restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An institutional control is a type of AUL.

Key site manager: the person identified by the owner or operator of a subject property as having good knowledge of the uses and physical characteristics of the subject property.

Material threat: obvious threat which is likely to lead to a release and that, in the opinion of the environmental professional, would likely result in impact to public health or the environment.

Obvious: that which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer.

Property use limitation: limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous sub-stances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria.

Reasonably ascertainable: information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

Recognized environmental conditions: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. For the purposes of this definition, "likely" is that which is neither certain nor proved, but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinions given therein.

Release: a release of any hazardous substance or petroleum product shall have the same meaning as the definition of "release" in CERCLA 42 U.S.C. § 9601(22). There are a number of statutory exclusions from the definition of release that may impact the environmental professional's opinions and conclusions, such as the normal application of fertilizer.

Significant data gap: a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

Site reconnaissance: that part that is contained in Section 9 of ASTM E1527-21 and addresses what should be done in connection with the site visit. The site reconnaissance includes, but is not limited to, the site visit done in connection with such a Phase I Environmental Site Assessment.

Site visit: the visit of the subject property during which observations are made constituting the site reconnaissance section of this practice.

Subject property: the property that is the subject of the environmental site assessment described in this practice.

User: the party seeking to use ASTM E1527-21 to complete an environmental site assessment of the subject property.

8.2 Standard Environmental Record Sources

Langan reviewed an environmental database search report prepared by an environmental database search provider for the subject property and surrounding area. The database search report includes a listing of properties identified on select federal, state, local and tribal standard source environmental databases within the approximate minimum search radii outlined in ASTM E1527-21. This information was supplied to Langan by the environmental database search provider, and to the environmental database search provider by government sources; therefore, neither Langan nor the environmental database search provider can verify the completeness and accuracy of the database information. Appendix E contains a copy of the report, with specific source and property descriptions, and the dates of the last update for each database searched. Langan reviewed the database search report on a record-by-record basis to evaluate if certain properties identified in the database report are likely to represent an environmental concern for the subject property. The evaluation criteria included factors such as distance, groundwater gradient, nature of the listing, and regulatory status. Unless specifically discussed in the body of this report, the facilities listed on the database do not appear to represent an environmental concern to the subject property.

8.3 Limiting Conditions/Deviations

Langan did not encounter any limiting conditions.

Langan did not delete or deviate from the ASTM E1527-21 guidelines during this Phase I ESA.

8.4 Data Gaps

Langan did not identify any significant data gaps.

User Provided Information

Clear Form

ASTM E1527-21 User Questionnaire

Please complete the below form and return to Langan.

Providing the following information (if available) to the environmental professional (Langan) is one of the requirements to qualify for one of the Landowner Liability Protections (LLP) offered under CERCLA. Missing or incomplete information for questions 1 through 6 could result in a determination that "all appropriate inquiry" is not complete. Additional information should be provided for "Yes" answers where relevant.

General Information

User/Client Names: AJ Pires, Authorized Representative, 240 Nassau LLC

Reason for the Phase I ESA: Acquisition Due Diligence

Type of property: 2-Storey Recreational Facility

Type of property transaction (e.g. sale, purchase, exchange): Purchase

Subject property address (provide documentation of subject property boundary):

240 Nassau Street, Brooklyn NY

Site Contact and Contact Information: AJ Pires, 215 868-8400

Relying Party(ies):

Required Information

(1.) Environmental liens that are filed or recorded against the subject property (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?

Yes ○ No ○

(2.) Activity and use limitations that are in place on the subject property or that have been filed or recorded against the subject property (40 CFR 312.26(a)(1)(v) and (vi)).

Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

Yes ◉ No ○

*Con Ed Easement

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes ○ No ○

(4.) Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29).

	Yes	No
Does the purchase price being paid for this subject property reasonably reflect the fair market value of the subject property?	◉	○
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?	○	○

(5.) Commonly known or reasonably ascertainable information about the subject property (40 CFR 312.30).

	Yes	No
Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases?	◉	○
For example,		
(a.) Do you know the past uses of the subject property? *Recreational Facility; Boys & Girls Club	◉	○
(b.) Do you know of specific chemicals that are present or once were present at the subject property?	○	○
(c.) Do you know of spills or other chemical releases that have taken place at the subject property?	○	○
(d.) Do you know of any environmental cleanups that have taken place at the subject property?	○	○

(6.) The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

	Yes	No
Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?	○	○
Do you have knowledge or experience with the subject property that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the property and its environmental condition)?	○	○

Signature

It is understood that the information presented in this form is an integral part of the Phase I ESA process and that Langan will evaluate and rely on this information in the development of the final Phase I ESA report.

EASEMENTS, RIGHT OF WAYS, COVENANTS, RESTRICTIONS, ETC. IF ANY NOT SHOWN HEREON. NO PLOTTABLE EASEMENT INFORMATION PROVIDED TO LAND SURVEYOR.

UNAUTHORIZED ALTERATION OR ADDITION TO THIS SURVEY IS A VIOLATION OF SECTION 7209 OF THE NEW YORK STATE EDUCATION LAW. COPIES OF THIS SURVEY MAP NOT BEARING THE LAND SURVEYOR'S INKED SEAL OR EMBOSSED SEAL SHALL NOT BE CONSIDERED TO BE A VALID TRUE COPY.

CERTIFICATION INDICATED HEREON SHALL RUN ONLY TO THE PERSON FOR WHOM THE SURVEY IS PREPARED, AND ON HIS BEHALF TO THE TITLE COMPANY, GOVERNMENTAL AGENCY AND LENDING INSTITUTION LISTED HEREON, AND TO THE ASSIGNEES OF THE LENDING INSTITUTION. CERTIFICATIONS ARE NOT TRANSFERABLE TO ADDITIONAL INSTITUTIONS OR SUBSEQUENT OWNERS.

EASEMENT R 995 P495

AGREEMENT made this 16th day of May 1978, by and between NAVY YARD BOYS CLUB, INC., a membership corporation having its principal office and place of business at 240 Nassau Street, Borough of Brooklyn, City and State of New York (hereinafter the "Boys Club") and CONSOLIDATED EDISON COMPANY OF NEW YORK, INC., a New York corporation having its principal office and place of business at 4 Irving Place, Borough of Manhattan, City and State of New York (hereinafter "Con Edison").

In consideration of Twenty Thousand Dollars ($20,000.00) and other valuable consideration, receipt of which is hereby acknowledged, the Boys Club hereby grants unto Con Edison, to have and to hold the same unto said Con Edison and its successors and assigns forever, subject to the conditions hereinafter expressed, the permanent, perpetual and non-exclusive easement, right, privilege and authority to install, construct, operate, maintain and remove subsurface electric utility facilities, together with all appurtenances thereof, in, under, through and across a portion of the premises of the Boys Club in the Borough of Brooklyn, City and State of New York, said parcel of land being more particularly bounded and described as follows:

Beginning at a point on southerly side of Nassau Street, distant 171.21' in an easterly direction measured along the southerly side of Nassau Street from the easterly side of Gold Street, as said streets are laid out on the Borough of Brooklyn Topographical Bureau Final Maps; thence in an easterly direction along the said southerly side of Nassau Street, South 88°-03'-27.7" East a distance of 40.00'; thence South 11°-55'-06.6" East, through the land of the Grantor, a distance of 115.81'; thence North 88°-03'-27.7" West, along the southerly lot line of land of the Grantor, a distance of 40.00'; thence North 11°-55'-06.6" West, through the land of the Grantor, a distance of 115.81' to the southerly side of Nassau Street the point or place of beginning.

RECORDED 490

The area intended to be described by the foregoing description is the area delineated in heavy black line on the sketch marked Exhibit I attached hereto and made a part hereof.

Including also the perpetual but non-exclusive right to Con Edison, its successors, servants and employees to have access thereto at all reasonable times for all such easement purposes.

The easement and rights hereby granted are so granted subject to and upon and the following conditions:

1. Construction, maintenance and operation of Con Edison's facilities shall at all times be in conformity with the requirements of any and all public or municipal authorities having jurisdiction of the premises.

2. In the event that, in the exercise of any of the rights hereby granted to Con Edison excavation shall be made or the surface of the easement area shall otherwise be disturbed or any pavement is broken, Con Edison shall restore said surface.

3. Con Edison shall indemnify the Boys Club against loss or damage and shall hold the Boys Club harmless from any and all claims and demands and cause and causes of action whatever on the part of any person, resulting from acts or omissions to act of Con Edison, its agents, employees, representatives, contractors and subcontractors, arising out of or in connection with the use, exercise or enjoyment of the easement and rights hereby granted.

4. Con Edison shall pay any and all taxes, assessments, liens or other charges levied, assessed or imposed, which arise out of or are attributable to the facilities and equipment of Con Edison installed hereunder. In the event of the termination of such easement rights Con Edison shall pay such taxes, assessments, liens or other charges as are attributable to its facilities and equipment installed hereunder until the same are removed from the tax rolls.

5. If the use of Con Edison's facilities is hereafter voluntarily discontinued or abandoned for a period of twelve consecutive months, the rights hereby granted shall cease and

REEL 955 PAGE 497

and terminate and revert to the Boys Club, and Con Edison will then execute and deliver any and all appropriate instruments, in recordable form, releasing and terminating such easement rights.

6. The Boys Club may install subsurface facilities for its own use in or across the easement area and may use the surface of the easement for any purpose provided that such installation or such use shall not interfere with Con Edison's facilities or with the operation or maintenance of the same or with reasonable access thereto.

7. The facilities of Con Edison shall be and remain at all times its exclusive property.

8. This easement shall run with the land and shall bind the parties hereto and their respective successors and assigns.

Con Edison for itself, its successors, and assigns does hereby cancel, terminate and release to the Boys Club any and all easements, rights, privileges and authorities which it has or may have by reason of an Easement Grant to said Con Edison dated December 8, 1931 and granted by John Kay, John Anderson Leach and Grace F. Boardman, Executors of the Estate of William Boardman in and to a portion of the premises now owned by the Boys Club in the Borough of Brooklyn said parcel being formerly shown on the land map of the County of Kings as a private street known as Nassau Court, as it existed in 1931,

RE 6935 PAGE 498

and being more particularly bounded and described as follows:

Beginning at a point on the south side of Nassau Street, distant 100 feet, more or less, west of the westerly side of Hudson Avenue, running thence in a southerly direction for a distance of 185 feet, more or less; thence in a westerly direction for a distance of 20 feet, more or less; thence in a northerly direction for a distance of 185 feet, more or less, to the south side of Nassau Street.

REEL 937 PAGE 499

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed by their duly authorized officers and their corporate seals to be hereunto affixed the day and year first above written.

CITY REGISTER

THE TITLE GUARANTEE COMPANY

RECORDED 5013

A portion of the subject property is encumbered by a subterranean easement in favor of Con Edison. The easement area measures approximately 40’ in width and 116’ in depth, traversing the westerly portion of the property

Our cursory analysis of the easement suggests that any new development on the subject cannot disturb this easement area and no improvements may be developed on this area. We note that the current improvements have no basement; and it is assumed for this analysis that any redevelopment of the property will lack a basement in this portion of the property.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan Engineering, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Langan Engineering, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 170789101

Project: 240 Nassau Street

Coordinates:

Latitude:	40.69805 40° 41' 53" North
Longitude:	-73.981938 -73° 58' 55" West
UTM Zone:	Zone 18 North
UTM X Meters:	586010.81
UTM Y Meters:	4505736.93
Elevation:	20.00' above sea level

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Langan Engineering, Inc. on Aug 02, 2023.

TARGET PROPERTY

240 Nassau Street
Brooklyn, NY 11201

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 396 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

NO COVERAGE

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations (BFEs) shown on this map apply only landward of 0.0' National Geodetic Vertical Datum of 1929 (NGVD 29). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was New York State Plane FIPSZONE 3104. The **horizontal datum** was NAD 83, GRS80 spheroid. Differences in datum, spheroid, projection or State Plane zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the National Geodetic Vertical Datum of 1929. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov or contact the National Geodetic Survey at the following address:

NGS Information Services
NOAA, N/NGS12
National Geodetic Survey
SSMC-3, #9202
1315 East-West Highway
Silver Spring, Maryland 20910-3182
(301) 713-3242

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at **(301) 713-3242**, or visit its website at http://www.ngs.noaa.gov.

Base map information shown on this FIRM was provided in digital format by the Department of Information Technology and Telecommunication, City of New York. This information was derived from digital orthophotos produced at a scale of 1:1,200 with 2-foot pixel resolution from photography dated 2004.

Based on updated topographic information, this map reflects more detailed and up-to-date **stream channel configurations and floodplain delineations** than those shown on the previous FIRM for this jurisdiction. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study Report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map. Also, the road to floodplain relationships for unrevised streams may differ from what is shown on previous maps.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map showing the layout of map panels for this jurisdiction.

Contact the **FEMA Map Service Center** at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://msc.fema.gov.

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call **1-877-FEMA MAP** (1-877-336-2627) or visit the FEMA website at http://www.fema.gov.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE A	No Base Flood Elevations determined.
ZONE AE	Base Flood Elevations determined.
ZONE AH	Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
ZONE AO	Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
ZONE AR	Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
ZONE A99	Area to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevations determined.
ZONE V	Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
ZONE VE	Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS

ZONE X	Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X	Areas determined to be outside the 0.2% annual chance floodplain.
ZONE D	Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

- 1% annual chance floodplain boundary
- 0.2% annual chance floodplain boundary
- Floodway boundary
- Zone D boundary
- CBRS and OPA boundary
- Boundary dividing Special Flood Hazard Area Zones and boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
- 513 — Base Flood Elevation line and value; elevation in feet*
- (EL 987) — Base Flood Elevation value where uniform within zone; elevation in feet*

* Referenced to the National Geodetic Vertical Datum of 1929

- (A)—(A) Cross section line
- (23)—(23) Transect line
- 87°07'45", 32°22'30" — Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), Western Hemisphere
- $^{2}76^{000}$N — 1000-meter Universal Transverse Mercator grid values, zone 18

Federal Emergency Management Agency

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations (BFEs) shown on this map apply only landward of 0.0' National Geodetic Vertical Datum of 1929 (NGVD 29). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was New York State Plane FIPSZONE 3104. The **horizontal datum** was NAD 83, GRS80 spheroid. Differences in datum, spheroid, projection or State Plane zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the National Geodetic Vertical Datum of 1929. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov or contact the National Geodetic Survey at the following address:

NGS Information Services
NOAA, N/NGS12
National Geodetic Survey
SSMC-3, #9202
1315 East-West Highway
Silver Spring, Maryland 20910-3182
(301) 713-3242

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at **(301) 713-3242**, or visit its website at http://www.ngs.noaa.gov.

Base map information shown on this FIRM was provided in digital format by the Department of Information Technology and Telecommunication, City of New York. This information was derived from digital orthophotos produced at a scale of 1:1,200 with 2-foot pixel resolution from photography dated 2004.

Based on updated topographic information, this map reflects more detailed and up-to-date **stream channel configurations and floodplain delineations** than those shown on the previous FIRM for this jurisdiction. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study Report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map. Also, the road to floodplain relationships for unrevised streams may differ from what is shown on previous maps.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map showing the layout of map panels for this jurisdiction.

Contact the **FEMA Map Service Center** at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://msc.fema.gov.

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call **1-877-FEMA MAP** (1-877-336-2627) or visit the FEMA website at http://www.fema.gov.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE A	No Base Flood Elevations determined.
ZONE AE	Base Flood Elevations determined.
ZONE AH	Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
ZONE AO	Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
ZONE AR	Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
ZONE A99	Area to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevations determined.
ZONE V	Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
ZONE VE	Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS

ZONE X	Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X	Areas determined to be outside the 0.2% annual chance floodplain.
ZONE D	Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

- 1% annual chance floodplain boundary
- 0.2% annual chance floodplain boundary
- Floodway boundary
- Zone D boundary
- CBRS and OPA boundary
- Boundary dividing Special Flood Hazard Area Zones and boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
- 513 — Base Flood Elevation line and value; elevation in feet*
- (EL 987) — Base Flood Elevation value where uniform within zone; elevation in feet*

* Referenced to the National Geodetic Vertical Datum of 1929

- (A)—(A) Cross section line
- (23)—(23) Transect line
- 87°07'45", 32°22'30" — Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), Western Hemisphere
- $^{2}76^{000}$N — 1000-meter Universal Transverse Mercator grid values, zone 18
- 600000 FT — 5000-foot grid ticks: New York State Plane coordinate system, Long Island zone (FIPSZONE 3104), Lambert Conformal Conic projection
- DX5510 × — Bench mark (see explanation in Notes to Users section of this FIRM panel)
- ●M1.5 — River Mile

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

Federal ERNS list

ERNS ---------- Emergency Response Notification System

Lists of state and tribal leaking storage tanks

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land
NY HIST LTANKS ---------- Listing of Leaking Storage Tanks

Lists of state and tribal registered storage tanks

FEMA UST ---------- Underground Storage Tank Listing

NY CBS UST ---- Chemical Bulk Storage Database
INDIAN UST ---- Underground Storage Tanks on Indian Land

State and tribal institutional control / engineering control registries

NY RES DECL ---- Restrictive Declarations Listing

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ---- Voluntary Cleanup Priority Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

NY SWTIRE ---- Registered Waste Tire Storage & Facility List
INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands
ODI ---- Open Dump Inventory
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
IHS OPEN DUMPS ---- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---- Delisted National Clandestine Laboratory Register
NY DEL SHWS ---- Delisted Registry Sites
US CDL ---- National Clandestine Laboratory Register

Local Lists of Registered Storage Tanks

NY HIST UST ---- Historical Petroleum Bulk Storage Database
NY HIST AST ---- Historical Petroleum Bulk Storage Database

Local Land Records

NY LIENS ---- Spill Liens Information
LIENS 2 ---- CERCLA Lien Information

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
NY Hist Spills ---- SPILLS Database
NY SPILLS 90 ---- SPILLS 90 data from FirstSearch
NY SPILLS 80 ---- SPILLS 80 data from FirstSearch

Other Ascertainable Records

DOD ---- Department of Defense Sites
SCRD DRYCLEANERS ---- State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR ---- Financial Assurance Information
EPA WATCH LIST ---- EPA WATCH LIST
2020 COR ACTION ---- 2020 Corrective Action Program List
TSCA ---- Toxic Substances Control Act
TRIS ---- Toxic Chemical Release Inventory System
SSTS ---- Section 7 Tracking Systems

ROD	Records Of Decision

NY RGA LF..... Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 06/22/2023 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 06/22/2023 has revealed that there

are 7 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 9 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 5 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 05/05/2023 has revealed that there are 7 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 03/31/2023 has revealed that there are

2 NY SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/05/2023 has revealed that there are 52 NY LTANKS sites within approximately 0.5 miles of the target property.

Spill Date: 2004-01-12

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 22 NY UST sites within approximately 0.25 miles of the target property.

NY MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY MOSF UST site within approximately 0.5 miles of the target property.

NY ERP: In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

A review of the NY ERP list, as provided by EDR, and dated 05/05/2023 has revealed that there is 1 NY ERP site within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 05/05/2023 has revealed that there are 105 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 79 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY PFAS: DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received..

A review of the NY PFAS list, as provided by EDR, has revealed that there is 1 NY PFAS site within approximately 0.25 miles of the target property.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there are 5 NY HSWDS sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 5 EDR MGP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
FRONT STREET STATION	BRIDGE ST, FRONT ST,	NNW 1/4 - 1/2 (0.263 mi.)	344	832
PLYMOUTH STATION	PLYMOUTH, HUDSON, WA	N 1/4 - 1/2 (0.351 mi.)	AJ365	913

Lower Elevation	Address	Direction / Distance	Map ID	Page
BROOKLYN GAS AND LIG	MARSHALL ST., ST. JO	NNE 1/4 - 1/2 (0.439 mi.)	AQ397	1155
BU-NASSAU BRANCH	KENT AVE AND CROSS,	NE 1/2 - 1 (0.853 mi.)	425	1272
PEOPLES WORKS	KENT AVE. S. 10TH ST	NE 1/2 - 1 (0.955 mi.)	429	1309

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Tank Info:

Tank Number:	001A
Tank Id:	231573
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
	C01 - Pipe Location - Aboveground
	I04 - Overfill - Product Level Gauge (A/G)
	G02 - Tank Secondary Containment - Vault (w/access)
	F00 - Pipe External Protection - None
	E00 - Piping Secondary Containment - None
	I02 - Overfill - High Level Alarm
	L09 - Piping Leak Detection - Exempt Suction Piping
	J02 - Dispenser - Suction Dispenser
	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	K00 - Spill Prevention - None
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	10/10/2009
Capacity Gallons:	3000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D018
Waste Description: Benzene

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BROWNFIELDS:

Name:	PRD ELECTRONICS MANUFACTURING SITE
Address:	202-208 TILLARY AVENUE & N/A MYRTLE AVENUE
City,State,Zip:	BROOKLYN, NY 11201
Program:	BCP
Site Code:	628294
Acres:	0.759
HW Code:	C224342
SWIS:	2401
Town:	New York City
Record Added Date:	11/09/2021
Record Updated Date:	03/27/2023
Update By:	SMQUANDT
Site Description:	Site Location: The 0.759-acre site is located at 202-208 Tillary Street in downtown Brooklyn and is comprised of tax parcels Block 2050, lots 98 and 100.The site is in a mixed-use area with surrounding property uses including several residential apartment complexes, restaurants, stores, and municipal buildings. Tillary Street, an apartment complex, and an entrance ramp to Route 278 are located north of the site. The NYC Housing Authority Ingersoll House apartment complex is located east and south of the site. The Tillary Street Woman's Shelter, Prince Street, the NYC 84th Precinct Police Department, and a NYC Fire Department Station, are located west of the site. Site Features: The site has been vacant since August 2021. Lot 98 is currently developed as an outdoor, atgrade asphalt paved parking lot. A six-foot chain-link perimeter fence encloses the outdoor parking lot. The entire footprint of lot 100 is a basement foundation slab associated with fivestory self-storage building that is now demolished. Current Zoning and Land Use: The site is currently located in the C6-4 Commercial and the Special Downtown Brooklyn (DB) Districts, which allows for commercial and residential uses. The surrounding property uses include several residential apartment complexes, restaurants, stores, and municipal buildings. The closest residential buildings to the site are the apartment complexes located on the adjacent Lot 1. The B Subway line is located approximately a tenth of a mile to the west of the site. Past Use of the Site: In 1887, the footprint of Lot 100 was occupied by stores, dwellings, and stables. Maps from 1904 and 1915 show a hides and tallow factory, and a wool factory were located north of the site. By 1938, many of the dwellings and stores were demolished. Four dwellings were present on the western side of the site along Prince Street. In 1948, a manufacturing building was constructed which had various operators including an electronic company known as PRD Electronics, a garage, headwear/curtain/textile companies, a binding company, wholesalers/traders, a beverage company, a vegetable company, and a self-storage facility. By 2001, the usage had changed to include commercial space on the first floor. The second floor appears vacant in maps from 2001 to 2007. Site Geology and Hydrogeology: The site is located approximately 20 feet above mean sea level and is generally flat. Groundwater at the site is encountered at approximately 15 feet below ground surface (ft-bgs) and flows in the northerly direction from beneath the site towards the East River. The stratigraphy of the site, from the surface down, consists of approximately 16 feet of

PRD ELECTRONICS MANUFACTURING SITE (Continued) **S127990287**

urban historic fill overlying native fine to medium grained sand. The urban historic fill layer consists of brown silty sand with varying amounts of gravel, concrete, and brick fragments. The site is located approximately 0.44 miles from the Navy Yard Basin, which connects to Wallabout Bay and the East River.

Env Problem: Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern include VOCs, SVOCs (primarily PAHs), and metals. Soil: Exceedances of the Restricted Residential Use Soil Cleanup Objectives (RRSCOs) were only found in two of the eight samples across the site at varying depths. The highest concentrations of VOCs were detected in a single sample, SB-1 at the sample interval depths of 12 14 and 16 18 ft. The highest concentrations of SVOCs were found outside the building footprint in SB-8 at the surface from 0 2 ft. VOCs detected at levels exceeding RRSCOs include: benzene up to 16 mg/kg (RRSCO of 4.8 mg/kg), ethylbenzene up to 190 mg/kg (RRSCO of 41 mg/kg), toluene up to 540 mg/kg (RRSCO of 100 mg/kg), 1,2,4-trimethylbenze up to 110 mg/kg (RRSCO of 52 mg/kg), and xylenes up to 300 mg/kg (RRSCO of 100 mg/kg). SVOCs detected at levels exceeding RRSCOs from 0 2 ft. bgs. include: benzo(a)anthracene up to 6.4 mg/kg (RRSCO of 1 mg/kg), benzo(a)pyrene up to 6.8 mg/kg (RRSCO 1 mg/kg), benzo(b)fluoranthene up to 8.7 mg/kg (RRSCO of 1 mg/kg), chrysene up to 5.3 mg/kg (RRSCO of 3.9 mg/kg), dibenzo(a,h)anthracene up to 0.8 mg/kg (RRSCO of 0.33 mg/kg), and indeno(1,2,3-cd)pyrene up to 3.8 mg/kg (RRSCO of 0.5 mg/kg). No metals, pesticides, or PCBs exceeded their RRSCOs. Data does not indicate any off-site impacts in soil related to this site. Groundwater: VOCs detected above Class GA Ambient Water Quality Standards (AWQS) include: sec-butylbenzene at 7.4 ppb and 1,2,4,5-Trimethylbenzene at 12 ppb, both with a AWQS value of 5 ppb. Both VOCS were detected in TWP-1. No SVOCs, metals, pesticides, or PCBs were detected above their AWQS. For PFAS compounds, PFOA and PFOS were reported at concentrations up to 55.1 parts per trillion (ppt) and 67.1 ppt respectively, exceeding the Maximum Contaminant Levels (MCLs) (drinking water standard) of 10 ppt each in groundwater. The compound 1,4- dioxane was not detected. There are no public water supply wells within a half a mile and there is a municipal prohibition for use of groundwater at the site. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor: Chlorinated-related VOCs including, vinyl chloride (max 598 [micrograms per cubic meter] ug/m3), methylene chloride (max 184 ug/m3), cis-1,2-dichloroethene (max 1,300 ug/m3), trichloroethene (TCE) (max 3.97 ug/m3), and tetrachloroethene (PCE) (max 54.9 ug/m3) were detected in several soil vapor samples. Concentrations of vinyl chloride (598 ug/m3) and cis-1,2-dichloroethene (1,300 ug/m3) were detected above the mitigate action level established by the NYSDOH in soil vapor sample SV-1. Methylene chloride (184 ug/m3) was detected above the monitor/mitigate action level established by the NYSDOH in soil vapor sample SV-4. Data does not indicate any off-site impacts in soil vapor related to this site.

Health Problem: Since the site is covered by asphalt or concrete, people will not come into contact with site-related soil and groundwater contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Volatile organic

PRD ELECTRONICS MANUFACTURING SITE (Continued) **S127990287**

compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because there is no on-site building, inhalation of site contaminants in indoor air due to soil vapor intrusion does not represent a concern for the site in its current condition. However, the potential exists for the inhalation of site contaminants due to soil vapor intrusion for any future on-site development. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

PFAS 3:

Name:	PRD ELECTRONICS MANUFACTURING SITE
Address:	202-208 TILLARY AVENUE & N/A MYRTLE AVENUE
City,State,Zip:	BROOKLYN, NY 11201
Site Code:	628294
HW Code:	C224342
Program:	BCP
Class Code:	A
Region:	2
Acres:	0.759
Date Record Added:	11/09/2021
Date Record Updated:	03/27/2023
Water Quantity:	UNKNOWN
Updated By:	SMQUANDT
Site Description:	Site Location: The 0.759-acre site is located at 202-208 Tillary Street in downtown Brooklyn and is comprised of tax parcels Block 2050, lots 98 and 100.The site is in a mixed-use area with surrounding property uses including several residential apartment complexes, restaurants, stores, and municipal buildings. Tillary Street, an apartment complex, and an entrance ramp to Route 278 are located north of the site. The NYC Housing Authority Ingersoll House apartment complex is located east and south of the site. The Tillary Street Woman's Shelter, Prince Street, the NYC 84th Precinct Police Department, and a NYC Fire Department Station, are located west of the site. Site Features: The site has been vacant since August 2021. Lot 98 is currently developed as an outdoor, atgrade asphalt paved parking lot. A six-foot chain-link perimeter fence encloses the outdoor parking lot. The entire footprint of lot 100 is a basement foundation slab associated with fivestory self-storage building that is now demolished. Current Zoning and Land Use: The site is currently located in the C6-4 Commercial and the Special Downtown Brooklyn (DB) Districts, which allows for commercial and residential uses. The surrounding property uses include several residential apartment complexes, restaurants, stores, and municipal buildings. The closest

PRD ELECTRONICS MANUFACTURING SITE (Continued) **S127990287**

residential buildings to the site are the apartment complexes located on the adjacent Lot 1. The B Subway line is located approximately a tenth of a mile to the west of the site. Past Use of the Site: In 1887, the footprint of Lot 100 was occupied by stores, dwellings, and stables. Maps from 1904 and 1915 show a hides and tallow factory, and a wool factory were located north of the site. By 1938, many of the dwellings and stores were demolished. Four dwellings were present on the western side of the site along Prince Street. In 1948, a manufacturing building was constructed which had various operators including an electronic company known as PRD Electronics, a garage, headwear/curtain/textile companies, a binding company, wholesalers/traders, a beverage company, a vegetable company, and a self-storage facility. By 2001, the usage had changed to include commercial space on the first floor. The second floor appears vacant in maps from 2001 to 2007. Site Geology and Hydrogeology: The site is located approximately 20 feet above mean sea level and is generally flat. Groundwater at the site is encountered at approximately 15 feet below ground surface (ft-bgs) and flows in the northerly direction from beneath the site towards the East River. The stratigraphy of the site, from the surface down, consists of approximately 16 feet of urban historic fill overlying native fine to medium grained sand. The urban historic fill layer consists of brown silty sand with varying amounts of gravel, concrete, and brick fragments. The site is located approximately 0.44 miles from the Navy Yard Basin, which connects to Wallabout Bay and the East River.

Summary:

Since the site is covered by asphalt or concrete, people will not come into contact with site-related soil and groundwater contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because there is no on-site building, inhalation of site contaminants in indoor air due to soil vapor intrusion does not represent a concern for the site in its current condition. However, the potential exists for the inhalation of site contaminants due to soil vapor intrusion for any future on-site development. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Summary:

Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern include VOCs, SVOCs (primarily PAHs), and metals. Soil: Exceedances of the Restricted Residential Use Soil Cleanup Objectives (RRSCOs) were only found in two of the eight samples across the site at varying depths. The highest concentrations of VOCs were detected in a single sample, SB-1 at the sample interval depths of 12 14 and 16 18 ft. The highest concentrations of SVOCs were found outside the building footprint in SB-8 at the surface from 0 2 ft. VOCs detected at levels exceeding RRSCOs include: benzene up to 16 mg/kg (RRSCO of 4.8 mg/kg), ethylbenzene up to 190 mg/kg (RRSCO of 41 mg/kg), toluene up to 540 mg/kg (RRSCO of 100 mg/kg),

PRD ELECTRONICS MANUFACTURING SITE (Continued) **S127990287**

1,2,4-trimethylbenze up to 110 mg/kg (RRSCO of 52 mg/kg), and xylenes up to 300 mg/kg (RRSCO of 100 mg/kg). SVOCs detected at levels exceeding RRSCOs from 0 2 ft. bgs. include: benzo(a)anthracene up to 6.4 mg/kg (RRSCO of 1 mg/kg), benzo(a)pyrene up to 6.8 mg/kg (RRSCO 1 mg/kg), benzo(b)fluoranthene up to 8.7 mg/kg (RRSCO of 1 mg/kg), chrysene up to 5.3 mg/kg (RRSCO of 3.9 mg/kg), dibenzo(a,h)anthracene up to 0.8 mg/kg (RRSCO of 0.33 mg/kg), and indeno(1,2,3-cd)pyrene up to 3.8 mg/kg (RRSCO of 0.5 mg/kg). No metals, pesticides, or PCBs exceeded their RRSCOs. Data does not indicate any off-site impacts in soil related to this site. Groundwater: VOCs detected above Class GA Ambient Water Quality Standards (AWQS) include: sec-butylbenzene at 7.4 ppb and 1,2,4,5-Trimethylbenzene at 12 ppb, both with a AWQS value of 5 ppb. Both VOCS were detected in TWP-1. No SVOCs, metals, pesticides, or PCBs were detected above their AWQS. For PFAS compounds, PFOA and PFOS were reported at concentrations up to 55.1 parts per trillion (ppt) and 67.1 ppt respectively, exceeding the Maximum Contaminant Levels (MCLs) (drinking water standard) of 10 ppt each in groundwater. The compound 1,4- dioxane was not detected. There are no public water supply wells within a half a mile and there is a municipal prohibition for use of groundwater at the site. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor: Chlorinated-related VOCs including, vinyl chloride (max 598 [micrograms per cubic meter] ug/m3), methylene chloride (max 184 ug/m3), cis-1,2-dichloroethene (max 1,300 ug/m3), trichloroethene (TCE) (max 3.97 ug/m3), and tetrachloroethene (PCE) (max 54.9 ug/m3) were detected in several soil vapor samples. Concentrations of vinyl chloride (598 ug/m3) and cis-1,2-dichloroethene (1,300 ug/m3) were detected above the mitigate action level established by the NYSDOH in soil vapor sample SV-1. Methylene chloride (184 ug/m3) was detected above the monitor/mitigate action level established by the NYSDOH in soil vapor sample SV-4. Data does not indicate any off-site impacts in soil vapor related to this site.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	1
Tank Id:	71977
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	I00 - Overfill - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	G03 - Tank Secondary Containment - Vault (w/o access)
	B01 - Tank External Protection - Painted/Asphalt Coating
	F01 - Pipe External Protection - Painted/Asphalt Coating
	C01 - Pipe Location - Aboveground
	D02 - Pipe Type - Galvanized Steel
	H04 - Tank Leak Detection - Groundwater Well
	H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
	J02 - Dispenser - Suction Dispenser
	A00 - Tank Internal Protection - None
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	08/01/1971
Capacity Gallons:	8000

DEC Memo:	"09/08/16-Hiralkumar Patel. 2:53 PM:- spoke with Debbie. she mentioned that a 5,000 gal tank failed in wet portion. 2:56 PM:- left message for Ryan Brown (cell: 516-492-4628), property manager. 3:10 PM:- received call from Mr. Brown. site has one (1) 5,000 gal tank sitting on floor. due to tank test failure in wet portion of the tank, asked Mr. Brown to either confirm tank's integrity via an isolation test or empty it out immediately. he mentioned that GC Env. will do the job. 3:14 PM:- spoke with Greg Collins at GC Env. he mentioned that the tank test was conducted as part of routine PBS compliance. the tank is approx. 8 inches into the slab. Greg confirmed that there is no sign of oil on tank room floor or any petroleum odors in the building. he has scheduled an isolation test tomorrow morning. if tank fails the test, it will be pumped out immediately. Greg Collins GC Env. Ph. (516) 680-6348 DEC Omar responded. 9/9/2016: Rashad Responded to site yesterday 9/8. Inspected tank in secondary containment unit, there was no evidence of discharge and no odors were observed. 9:45am: Called Greg Collins, mail box was full, unable to leave voice message. 11:45am: Called

IN THE BASEMENT (Continued) **S118953554**

Debbie Brown she said they are on site now and will give me an update after tests are completed. 9/12/2016: Rashad Called Debbie, tank passed tank only test, repairs were performed and the tank was retested and passed, she will be emailing me summary and tank results today. 9/13/2016: Rashad Received email from Debra Brown with 2 attachments they have been uploaded to D2. Closure report states that they performed isolation tests and that the tank passed the test. The initial leak was found coming from the gauge piping assembly. GCE replaced a bushing associated with the petro meter assembly, they re-pressurized and repaired, no other leaks were found. Also on September 9th GCE conducted a tank system test which passed. GCE is requesting closure of spill. Also additional document is passing tank system test. As per passing tank system test, report stating gauge and bushings were cause of leak and repairs were made, spill will be closed."

Remarks: "Failed Tank Test 5000 gallon tank."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	W/O 1
Tank Id:	208293
Material Code:	0022
Common Name of Substance:	Waste Oil/Used Oil

Equipment Records:

G01 - Tank Secondary Containment - Diking (Aboveground)
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
C01 - Pipe Location - Aboveground
E10 - Piping Secondary Containment - Impervious Underlayment
I02 - Overfill - High Level Alarm
L09 - Piping Leak Detection - Exempt Suction Piping
J02 - Dispenser - Suction Dispenser
K00 - Spill Prevention - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	10/01/1994
Capacity Gallons:	275
Tightness Test Method:	NN

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	34536
Material Code:	0002
Common Name of Substance:	#4 Fuel Oil (On-Site Consumption)

Equipment Records:

G02 - Tank Secondary Containment - Vault (w/access)
I04 - Overfill - Product Level Gauge (A/G)
L00 - Piping Leak Detection - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
E00 - Piping Secondary Containment - None
J02 - Dispenser - Suction Dispenser
C03 - Pipe Location - Aboveground/Underground Combination
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1965
Capacity Gallons:	7500
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported

Environmental Interest/Information System:
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
Registry ID: 110004472482

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Region:	2
DER Facility ID:	164331
DEC Memo:	"10/4/04 Met with GSC and ExxonMobil on site. Station was under construction due to the retrofitting of steel product delivery lines with fiberglass. Discussed the location of the two downgradient monitoring points to evaluate the effectiveness of the ORC. Downgradient monitoring wells will be installed on the same side of Flatbush Ave as the station. Waiting for GSC include in the RAP the location of the downgradient monitoring wells. 2/7/05 Approved Remedial Action Plan dated 9/28/04. January 2010 - Haggerty: assumed management of spill April 2010 - PM approved request to install ORC socks, but required additional delineation 1/14/10. Additional off-site wells installed, report due by the end of May 2010 May 2010 - SIR report due May 31"
Remarks:	"NYCFD ON SITE, ISSUED VIOLATION FOR NO TIGHTNESS TEST, GASOLINE RAN ALONG GOLD STREET, SAND WAS APPLIED, ENGINE 207 RESPONDED."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 02/10/2004. DEC Sigona sent tank test failure notice to ExxonMobil on April 22, 2003. See ExxonMobil files under Mobil files for additional information. This site cleanup (Spill No. 9004727) is consolidated under Spill No. 0300775. 08/17/04 Sidewalk opening permit mailed to Melissa Winsor ExxonMobil for the installation of wells along the west side of Gold St Between Johnson and Myrtle and the east side of Flatbush between Johnson and Myrtle. Rommmel. May 2010 - PM approved request to install ORC socks, but required additional delineation 1/14/10. Additional off-site wells installed in April, report due by the end of May 2010 July 2010 - Subsurface Investigation Report approved. March 2011 - reviewed SSUR and provided comments. ORC socks have been in place for a year. Instructed EM to remove them to see if the dissolved conc rebound July 2011 - Additional groundwater monitoring required based on current gw data November 2011 - required additional monitoring to measure rebound effect December 2011 - SSUR under review January 2012 - asked for one last gw sampling event. If consistant with last year of quarterly reports, Spill will be closed"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Region:	2
Acres:	1.000
HW Code:	224006
Record Add:	11/18/1999
Record Upd:	12/16/2003
Updated By:	kstang
Site Description:	The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites. This site was listed in the Eckhardt subcommittee report as having had disposal from 1960-'79. An on-site inspection was carried out by DEC, Region 2 on April 29, 1980. The entire manufacturing buildiing is four stories high and there was a freight unloading area adjacent to the buildings and parking lot. Facility is bounded by Prospect Street and York Street. There appears to be no disposal ever practiced here.

Site Description:	This BCP site is +/- .76 acres, and is located at 166-180 Myrtle Avenue, City of New York, Borough of Brooklyn, Kings County. Historic uses of the property have been commercial in nature. Surrounding uses include residential apartment buildings, commercial office buildings, day care centers and retail stores. The site is occupied by a one-story brick building with a cellar. It is bounded by Myrtle Avenue to the north, a construction area to the east, Fair Street to the south, and Prince Street to the west. The BCP application was denied by letter dated 4/28/09.

Town:	New York City
Record Added Date:	10/20/2011
Record Updated Date:	06/29/2012
Update By:	KALEWAND
Site Description:	Site Location: The subject property is located at 160-180 Myrtle Avenue and is identified in New York City Tax Maps as Block 2061, Lot 1. The subject property consists of a total land area of approximately 1.8 acres. The site is bounded by Myrtle Avenue to the north, a commercial/residential building to the east, commercial and residential buildings to the south and a parking garage to the west. The site is presently vacant land, which is utilized as on-grade parking. Two combined-sewer DEP easements (50-feet wide) traverse the site north to south. Site Features: An active NYCT subway tunnel, IRT lines N, Q, B and D, is located approximately 350 feet to the west of the site beneath Flatbush Avenue. Current Zoning: The site is zoned as an R7-1 residential district with a C2-2 commercial overlay. Both residential and commercial uses are allowed under this type of zoning. The New York City Department of Environmental Protection has assigned an E-124 designation to the Subject Site concerning noise and hazardous materials. Historical Use: Sanborn Maps indicate that the property was developed with commercial and residential properties as early as 1887. Former one-story retail buildings with single level basements were demolished in early-to-mid 2007. Site Geology/Hydrogeology: The site is currently paved; subsurface soil at the site consists primarily of urban fill to a depth of approximately 16 feet, with native soils beneath that depth. Native soils are expected to be somewhat stratified, containing beds of fine soils (silts and clays) with low rates of hydraulic conductivity and beds of coarse soils (sand and gravels) with high rates of hydraulic conductivity at greater depths. The surface elevation of the site is approximately 35 feet above mean sea level. The topography of the site is generally flat. Regional topography is generally flat, with a slight elevation drop to the west and to the north. According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map

THE GIOVANI (PROPOSED) (Continued) **S113916505**

for the City of New York (Panel 203 of 457, effective date September 5, 2007; FEMA Map # 3604970203F), the Site is located in a Flood Zone X - an area outside the 0.2 annual chance floodplain. The East River is located approximately 1 mile northwest of the Subject Site. The limited studies concluded that the general direction of surface and groundwater flow is northwesterly and hence any contaminants released from the Site have a limited potential to migrate towards the East River. Depth to groundwater at the Site is approximately 30 feet below ground surface (bgs). The BCP application was denied by letter dated June 29, 2012.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 9/24/03 There was a Ferric Chloride spill called in to the DEC Hotline by DEP James Daley at 8:37 AM on September 24,2003. Reportedly, the spill was caused by a tank failure. DEC Spill responder Michelle Tipple and Joseph Kudirka from the Water unit responded to this spill. Upon investigation, an 8000 gallon tank of Ferric Chloride had an internal failure and released some of it's contents to a secondary containment tank, this secondary tank released some of the Ferric Chloride into the containment area surrounding the secondary tank. The containment area surrounding the secondary tank had been modified with the installation of a wooden structure secured with steel bolts around the top of the containment. When the chemical hit the bolts they were dissolved, allowing a small amount,10-15 gal of Ferric Chloride beyond the containment areas. Soda Ash was applied to the Ferric Chloride as required by DEP

SECONDARY BI-PASS AT THE REDHOOK TREATMENT PLANT (Continued) **U003075007**

protocol. Mats were placed on the drain inlets in the vicinity to reduce the possibility of the chemical reaching the water. Eagle Brook Pump and repair were in route to remove all product from the tanks and containment area, assess and repair the system. DEP Plant Superintendent Joseph Massaro will keep DEC updated. 9/25/03 Tipple followed up with James Daly- DEP safety. Eagle Brook worked until 4:30 this AM removing product and thoroughly cleaning the tanks and impacted area, all product removed from the site was carried by the eagle brook company's properly tagged tank trucks. Upon inspection of the cleaned system it was determined that the discharge line on the bottom of the tank was compromised causing the release. The system repairs are scheduled to begin later today. "

Remarks: "ruptured tank caused materal to leak - attm to stop leak now - haz mat enroute - 10 to 15 gal on the ground -- over 1000 gal in the tank -- potential for a large spill"

DEC Region:	2
DER Facility ID:	391124
DEC Memo:	"8/05/2015: Rashad Spill transferred from Sangesland to Rashad as per RSE. 8/18/2015: Rashad Caller remarks tank test failure. Retest and isolation test planned, pending approval 12-41a 15K AST failed on 6/16/10 DEC Piper spoke with Bob Urban, He stated they tested 2-14,500 AST systems and they failed. Tank #'s 10-41a, 11-41a. As per NYC building records 63 Flushing Ave 12-41A (Brooklyn Navy Yard) does not have an alternate address. According to PBS#2-602406, there are 20 tanks listed with 7 out of service (all 7 closed in 1999). The 13 tanks include 2 14,500 gallon #2 fuel oil aboveground contact with

BROOKLYN NAVY YARD TTF (Continued) **S110490705**

impervious barrier, 1 15,000 gallon #2 fuel oil tank aboveground contact with impervious barrier, 1 1,080 gallon diesel tank underground, 3 5,000 gallon diesel tanks aboveground on saddles, 3 100 gallon diesel tanks aboveground contact with impervious barrier, 1 1,500 gasoline/ethanol tank underground, 1 10,000 gallon #2 fuel oil underground tank, and 1 8,000 gallon #2 fuel oil tank aboveground on stilts. An additional PBS#2-254673 lists 7 active tanks, 4 25,000 gallon diesel underground tanks as well as 2 2,500 gallon diesel aboveground in contact with impervious barrier. There also are 3 tanks which are listed as tank converted to non-regulated use. PBS#2-602567 also has various tanks for this site. There are approximately 50 other spill cases for this site however most of them are sewage overflows during large storm events (Red Hook water treatment plant). No documents found in D2. 8/19/2015: Rashad Email sent to Pro test: After reviewing the spill reports for 974 Saint Nicholas Ave, New York NY spill#1006576 dated 9/17/2010 and 63 Flushing Ave 12-41A, Brooklyn NY (Brooklyn Navy Yard) spill#1003000 dated 6/16/2010. I would like to request the following information for each site: Failed system test reports. Test results for supply/return and vent/fill lines Property owners information. 9/9/2015: Rashad Sent Email to Protest: I am following up on an email I sent to you on 8/19/2015 for Brooklyn Navy Yard, 63 Flushing Ave spill#1003000 dated 6/16/2010. I am looking for the most recent passing or failing tank tests for tanks 10-41A -14,500 gallon, 11-41A 14,500 gallon, and 12-41A 15,000 gallon (PBS#2-602406). Any documentation you could provide is greatly appreciated. Received email from Pro Test: I have attached the passing system tests for all three tanks from 2010. Let me know if you need anything else. Three documents were received and uploaded to D2. Tightness test report for tank 10-41A 14,500 gallon AST conducted on 8/18/2010 has passing tank and system test. Tightness test report for tank 11-41A 14,500 gallon AST conducted on 8/20/2010 has passing tank and system test. Tightness test report for tank 12-41A 15,000 gallon tank AST was conducted on 8/20/2010 has passing tank and system test. All piping is aboveground and all tanks are aboveground contact with impervious barrier. Due to passing tank tests and aboveground tanks as well as piping the spill will be closed. Closure letter uploaded to D2. "

Remarks: "tank test failure. Retest and isolation planned, pending approval 12-41a 15K AST failed on 6/16/10 DEC Piper spoke with Bob Urban, He stated they tested 2- 14,500 AST systems and they failed. Tank #'s 10-41a, 11-41a"

Program:	BCP
Site Code:	535137
Acres:	3.101
HW Code:	C224248
SWIS:	2401
Town:	New York City
Record Added Date:	10/31/2016
Record Updated Date:	04/03/2020
Update By:	JCGRATHW
Site Description:	Location: The 85 Jay Street (Brooklyn) LLC Site is a 3.101-acre site located in an urban area. The site is bounded to the north by Front Street, to the east by Bridge Street, to the south by York Street, and to the west by Jay Street. Site Features: The development consists of a 21-story building with ground floor retail and commercial space, and four upper residential sectors. The lower level cellar will include bike storage, residential and commercial storage, a dog spa, and building mechanical and service rooms. The lowest

85 JAY STREET (BROOKLYN), LLC (Continued) **S120706188**

level will be designated as parking, which will include ventilation in accordance with the New York City Department of Buildings (NYCDOB) code requirements. The entire footprint of the site is covered by a building, with some landscaping within an above-grade courtyard in the center of the residential sectors. Current Zoning and Land Use: The current zoning designation for the site is light manufacturing and residential and the site is in the Special Mixed Use District MX-2. The Special Mixed Use District was established to encourage investment in existing neighborhoods with mixed residential and industrial uses. The proposed use is consistent with the existing zoning for the site. The site is not an e-designated property. Past Use of the Site: Historic records indicate that the site was developed with industrial and manufacturing uses by at least 1887. The Bradley White Lead Company and/or Lenox Smelting occupied the site between 1887 and 1989. Additionally, an electrical substation occupied the western portion of the site from circa 1904 to 1950. A brewery, a paper goods company, and an electrical repair company also historically occupied the site. The buildings were subsequently demolished by 1996 and the site has since been used as a private parking lot and for construction materials storage. Site Geology and Hydrogeology: Due to the sloping elevation across the site, groundwater was encountered at depths ranging from approximately 24 to 40 feet below grade (bgs) on the western and eastern portions of the Site, respectively. Groundwater flow is in a WNW-direction beneath the site and surrounding area, toward the East River. The stratigraphy of the site, from the surface downward, generally consists of fill comprising sand, silt, gravel, cinders, concrete, and brick down to approximately 15 feet bgs, underlain by apparent native sand with varying amounts of gravel and silt up to the maximum boring termination depth of 40 feet bgs. Bedrock was not encountered during the investigation.

Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were heavy metals and polycyclic aromatic hydrocarbons (PAHs), located primarily in the top fifteen feet of soil with isolated exceedances of SCGs down to 30 feet below ground surface (bgs). Remedial actions have successfully achieved cleanup objectives for unrestricted use.
Health Problem:	Remedial actions are complete and have eliminated the potential for contact with site related contaminants.

Record Added Date: 11/17/2021
Record Updated Date: 03/10/2023
Update By: CXMAYCOC
Site Description: Site Location: The site is located at 101 Fleet Place, Brooklyn, NY 11201 and is designated as Tax Block 2061, Lot 100. As of December 2022, a former one-story slab-on-grade building on the site is still in the process of being demolished. The site is bounded to the north by a mixed-use residential and commercial development followed by Myrtle Avenue, to the east by a parking lot and residential development, to the south by parking and a residential development followed by Willoughby Street, and to the west by Fleet Place. The site is located within an urban area of Downtown Brooklyn characterized by multi-story institutional, commercial, and residential buildings. The Metropolitan Transit Authority (MTA) subway B, D, N and Q lines are located approximately 380 feet to the west below Flatbush Avenue. Site Features: The 0.460-acre (20,000 square foot) site is an irregular-shaped parcel. Records for on-site historic bulk petroleum storage (PBS No. 2-344176) include one 1,200-gallon #2 fuel oil and five 550-gallon gasoline USTs. All six USTs were reportedly closed and removed in March 1993. A spill of an unknown quantity of gasoline was also reported to the NYSDEC in June 1989 (Spill No. 8902455) due to a tank test failure and reported air pressure loss. The spill case was closed by the NYSDEC on 23 June 2004. Current Zoning and Land Use: According to the New York City Planning Commission Zoning Map 16c, the site is located within a residential and commercial zoning district (R6 and C6-4 DB). The proposed development of this property is consistent with the current zoning. Past Land Use: The site was developed in the late 1880s, as multiple lots with multiple residential-use buildings and a church. By 1915, the church was replaced with four residential buildings, and by 1938 the site was vacant. By 1969, the site was redeveloped with the existing one-story building identified as, N.Y. Telephone Co. Garage. Records indicate the site operated as a garage from 1969 until 1993 when it was converted into a childcare center. The site operated as the Duffield Children Center from the early 1990s until early 2022. Site Geology and Hydrogeology: Based on findings from the October 2021 Limited Phase II ESI, the site is underlain by historic urban fill predominantly consisting of dark brown to olive, coarse to medium sand with varying amounts of glass, gravel, brick, asphalt, cinder, and silt. The urban fill was observed to extend to depths of 10 feet below ground surface (ft-bgs), however may extend further due to shallow boring refusal encountered in some areas of the site. The average depth to groundwater is approximately 30 ft-bgs. The inferred

LOT 100,TAXBLOCK 2061 (Continued) **S106703334**

regional groundwater flow direction is to the west-northwest toward the East River.

Env Problem: Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern include SVOCs and metals in soil and groundwater, and VOCs in soil vapor. Soil One VOC, 2-butanone, was identified at a concentration of 0.19 parts per million (ppm), exceeding the unrestricted use soil cleanup objective (UUSCO) of 0.12 ppm. SVOCs were detected at concentrations exceeding UUSCOs in samples collected from shallow soil and historical fill, including benzo(a)anthracene at a maximum concentration of 31 ppm (UUSCO is 1 ppm), benzo(a)pyrene at a maximum concentration of 26 ppm (UUSCO is 1 ppm), benzo(b)fluoranthene at 29 ppm (UUSCO is 1 ppm), and chrysene at 27 ppm (UUSCO is 1 ppm). Pesticides were detected in historical fill 4,4'-DDE at 0.00789 ppm (UUSCO is 0.0033 ppm). Several metals were detected at concentrations exceeding UUSCOs in samples collected from historical fill and native material, including hexavalent chromium (max. 2.05 ppm, UUSCO is 1 ppm), trivalent chromium (max. 37 ppm, UUSCO is 30 ppm), barium (max. 460 ppm, UUSCO is 350 ppm), lead (max. 2,150 ppm, UUSCO is 63 ppm), and mercury (max. 1.69 ppm, UUSCO is 0.18 ppm). Perfluorooctane sulfonic acid (PFOS) and perfluorooctanoic acid (PFOA) were measured in historic fill at maximum concentrations of 2.3 parts per billion (ppb) and 2.88 ppb, respectively, exceeding the guidance values for unrestricted use of 0.88 ppb and 1.1 ppb. Data does not indicate any off-site impacts in soil related to this site. Groundwater For VOCs, chloroform was identified at concentrations above the Ambient Water Quality Standards (AWQS) at 21 ppb (AWQS is 7 ppb). SVOCs were identified at concentrations exceeding the AWQSs, including benzo(a)anthracene (max. 2 ppb), benzo(a)pyrene (max. 1.8 ppb), benzo(b)fluoranthene (max. 2.2 ppb), and chrysene (max. 1.9 ppb). All of the aforementioned analytes have an AWQS of 0.002 ppb, with the exception of benzo(a)pyrene, which has an AWQS of non-detect. Dissolved metals were identified at concentrations exceeding the AWQSs including dissolved sodium (max. 139,000 ppb, AWQS is 20,000 ppb). Sodium is a naturally occurring metal and is not considered to be a contaminant of concern for this site. For PFAS, PFOA and PFOS were reported at concentrations of up to 125 and 217 parts per trillion (ppt), respectively, exceeding the Maximum Contaminant Level (drinking water standard) of 10 ppt in groundwater. 1,4-dioxane did not exceed the Maximum Contaminant Level (drinking water standard) of 1 ppb with a maximum concentration of 0.081 ppb. Data does not indicate any off-site impacts in groundwater-related to this site. Soil Vapor, Sub-Slab Soil Vapor and Indoor Air - TCE and carbon tetrachloride were detected in sub-slab soil vapor at concentrations of up to 48 micrograms per cubic meter (ug/m3) and 1,990 ug/m3, respectively, and PCE was detected in soil vapor at a maximum of 67 ug/m3. Carbon tetrachloride was also detected in indoor air samples at a maximum concentration of 0.503 ug/m3. Data does not indicate any off-site impacts in soil vapor related to this site.

Health Problem: The site is completely fenced which restricts public access. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by site-related contamination. Volatile organic compounds in the soil vapor (air

LOT 100,TAXBLOCK 2061 (Continued) **S106703334**

spaces within the soil) can move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant, soil vapor intrusion is not a current concern; however, it may be a concern for future on-site buildings. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D018
Waste Description: Benzene

Waste Code: D019
Waste Description: Carbon Tetrachloride

NEW YORK UNIVERSITY - TANDON SCHOOL OF ENGINEERING (Continued) **1000442411**

Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	D027
Waste Description:	1,4-Dichlorobenzene
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D036
Waste Description:	Nitrobenzene
Waste Code:	D038
Waste Description:	Pyridine
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	LABP
Waste Description:	Lab Pack
Waste Code:	P028
Waste Description:	Benzene, (Chloromethyl)- (Or) Benzyl Chloride
Waste Code:	P030
Waste Description:	Cyanides (Soluble Cyanide Salts), Not Otherwise Specified
Waste Code:	P048

NEW YORK UNIVERSITY - TANDON SCHOOL OF ENGINEERING (Continued) **1000442411**

Waste Description: 2,4-Dinitrophenol (Or) Phenol, 2,4-Dinitro-

Waste Code: P077
Waste Description: Benzenamine, 4-Nitro- (Or) P-Nitroaniline

Waste Code: P095
Waste Description: Carbonic Dichloride (Or) Phosgene

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: U001
Waste Description: Acetaldehyde (I) (Or) Ethanal (I)

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U004
Waste Description: Acetophenone (Or) Ethanone, 1-Phenyl-

Waste Code: U006
Waste Description: Acetyl Chloride (C,R,T)

Waste Code: U007
Waste Description: 2-Propenamide (Or) Acrylamide

Waste Code: U008
Waste Description: 2-Propenoic Acid (I) (Or) Acrylic Acid (I)

Waste Code: U012
Waste Description: Aniline (I,T) (Or) Benzenamine (I,T)

Waste Code: U019
Waste Description: Benzene (I,T)

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U056
Waste Description: Benzene, Hexahydro- (I) (Or) Cyclohexane (I)

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U112

NEW YORK UNIVERSITY - TANDON SCHOOL OF ENGINEERING (Continued) **1000442411**

Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U138
Waste Description: Methane, Iodo- (Or) Methyl Iodide

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U170
Waste Description: P-Nitrophenol (I,T) (Or) Phenol, 4-Nitro-

Waste Code: U188
Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U208
Waste Description: 1,1,1,2-Tetrachloroethane (Or) Ethane, 1,1,1,2-Tetrachloro-

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U219
Waste Description: Thiourea

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U328
Waste Description: Benzenamine, 2-Methyl- (Or) O-Toluidine
