Racial equity report on housing and opportunity

Project name: Brooklyn Yards

Contact: Meir David Tabak, Brooklyn Yards Development, LLC

Prepared by: Philip Habib & Associates Date: 9/19/2023

Note: Racial equity reports are prepared prior to the certification of the subject application by the City Planning Commission (CPC). A description of the final adopted application is available in the associated CPC report.

APPLICATION TYPE

Applications that meet one or more of the following criteria are subject to the racial equity report requirement. Please select all relevant criteria:

☐ Text amendment to the zoning resolution affecting 5 or more community districts

☐ Historic district designation affecting 4 or more city blocks

☐ Seeking a change to the use regulations or permitted floor area for any use in a manufacturing district where a building in the project contains at least 100,000 square feet of floor area

Applications submitted pursuant to subdivision a of section 197-c of the charter that seek approval for:

☐ Acquisition or disposition of land to facilitate a non-residential project containing at least 50,000 square feet of floor area

☐ Acquisition or disposition of land to facilitate a residential project, other than a residential project consisting of a building to be preserved, provided that such equity report shall only be required related to a building in such project containing at least 50,000 square feet of floor area

✓ An increase in permitted residential floor area of at least 50,000 square feet

☐ An increase in permitted non-residential floor area of at least 200,000 square feet

☐ A decrease in permitted floor area or number of housing units on at least four contiguous city blocks

If the application meets the above criteria but the proposed development does not, please explain the difference between the proposed development and the application.

Section 1: Executive summary

Provide a short, plain-language summary of the subsequent sections of the racial equity report, including major project elements and key neighborhood and demographic conditions.

The Project Area is located in Brooklyn Community District ("CD") 11 (Bensonhurst & Bath Beach) and Brooklyn CD 12 (Borough Park, Kensington, & Ocean Parkway). The Project Area is located within a transit-accessible area of New York City, with proximity to the 62nd Street Station (serving the D subway line) and the New Utrecht Avenue Station (serving the N and, selectively, the Q/W subway lines). In addition, the B9 local bus route operates along 60th Street and features stops at 15th Avenue and 16th Avenue within the Project Area.

The Proposed Actions would facilitate the development of 12 residential buildings, one mixed-use building, and one commercial building ("the Proposed Development"). The Proposed Development would include residential buildings ranging from four- (plus penthouse) to six-stories and would provide approximately 275,442 square feet ("sf") of residential floor area. A two-story commercial building and a 10-story portion of the proposed mixed-use building would together contain a total of 63,582 sf of commercial office and retail floor area. The Proposed Development would contain 270 dwelling units, of which 81 are proposed to be permanently affordable pursuant to MIH Workforce Option. In addition, the Proposed Development would facilitate approximately 3,674 sf (0.08 acres) of public access area ("PAA"), comprised of an approximately 2,015 sf publicly accessible area, an approximately 512 sf publicly accessible area, and an approximately 1,148 sf publicly accessible area that would include an approximately 815 sf play area. Approximately 40 accessory parking spaces would be provided.

The Proposed Actions would facilitate residential development that would provide affordable housing opportunities in two CDs of New York City that contain large numbers of rent-burdened households (defined as households paying more than 30% of income on rent) and severely rent-burdened households (defined as households paying more than 50% of income on rent). In CD 11, approximately 58% of residents are rent-burdened and approximately 33% of residents are severely rent-burdened as compared to Brooklyn (approximately 54% and 30% of residents, respectively) and New York City as a whole (approximately 53% and 28% of residents, respectively). In CD 12, approximately 68% of residents are rent-burdened and approximately 45% of residents are severely rent-burdened as compared to Brooklyn (approximately 54% and 30% of residents, respectively) and New York City as a whole (approximately 53% and 28% of residents, respectively).

The Proposed Actions would result in new residential development on a site that does not currently contain any housing units; the Development Site is improved with an auto repair use and also contains an open rail cut with tracks for the Long Island Rail Road ("LIRR") Bay Ridge Branch. Housing production in CDs 11 and 12 has lagged behind population growth in each CD. Between 2010 and 2020, the populations of CDs 11 and 12 increased by approximately 9% and 8%, respectively. However, in the same time period, the number of housing units in CDs 11 and 12 increased by approximately 1% and 3%, respectively. In comparison to New York City as a whole, between 2010 and 2020 the population of the city increased by approximately 8% and housing production increased by approximately 6%, and during the same time period in Brooklyn, the population increased by approximately 9% and housing production increased by approximately 8%.

The populations of CDs 11 and 12 have become more diverse since 2000; in CD 11, the population is majority-minority. Based on the 2020 Census, CD 11's population is approximately 44% Asian, 1% Black, 16% Hispanic, 36% White, and 3% other; CD 12's population is approximately 17% Asian, 2% Black, 11% Hispanic, 65% White, and 6% other. Based on the 2015-2019 ACS PUMS data, in CD 11, the median household income is approximately $55,649 for all households, $63,060 for Asian households, $83,291 for Black households, $54,348 for Hispanic households, and $51,028 for White households. Based on the 2015-2019 ACS PUMS data, in CD 12, the median household income is approximately $49,867 for all households, $49,696 for Asian households, $82,459 for Black households, $47,295 for Hispanic households, and $49,235 for White households.

In CDs 11 and 12, minority residents are more likely than White non-Hispanic residents to experience overcrowding (defined as occupied units with more than 1 person per room). Based on the 2015-2019 ACS PUMS data, in CD 11, approximately 8% of White non-Hispanic households experience overcrowding in comparison to approximately 26% of Hispanic households and approximately 18% of Asian households. Based

on the 2015-2019 ACS PUMS data, in CD 12, approximately 18% of White non-Hispanic households experience overcrowding in comparison to approximately 17% of Hispanic households and approximately 34% of Asian households.[1]

The new residential development facilitated by the Proposed Actions would occur in two diverse and diversifying CDs of New York City that currently experience elevated levels of displacement risk and overcrowding. As shown in the two maps provided in Section 5, the Project Area spans two Neighborhood Tabulation Areas ("NTAs"), Bensonhurst West (NTA BK28) and Borough Park (NTA BK88). In Bensonhurst West, the displacement risk is "highest" and in Borough Park, the displacement risk is "higher."

As detailed in Section 4, the Proposed Development would advance Goals 2, 3, and 6 of New York City's fair housing plan, Where We Live NYC. The Proposed Actions would result in the development of 81 units of new, permanently income-restricted housing units; increasing housing availability in this manner is consistent with Where We Live NYC.

As discussed in detail in the following sections of this report, the Proposed Development is consistent with the goals identified in New York City's fair housing plan. The following sections of this report are summarized below:

Section 2: Project Specific Information – This section provides details about the Proposed Development's estimated new housing units, income restrictions, anticipated affordability, and projected construction jobs.

Section 3: Community Profile Summary – This section provides graphs and charts depicting neighborhood demographics, socioeconomic conditions, and housing conditions. These data are sourced from the New York City's Departments of City Planning ("DCP") and Housing Preservation and Development's Equitable Development Data Explorer.

Section 4: Narrative statement – This section provides a statement describing the proposal's commitment to affirmatively further fair housing and promote equitable access to opportunity, in conjunction with the goals and strategies outlined in New York City's fair housing plan, Where We Live NYC.

Section 5: Community Profile – This section provides, for reference, the complete data of all indicators in the Equitable Development Data Explorer applicable to CDs 11 and 12, the borough, and the city.

[1] The 2015-2019 ACS PUMS data for overcrowding for Black Non-Hispanic households is not cited for CDs 11 and 12 as these data have poor statistical reliability.

Section 2: Project specific information

Before completing Section 2, please review the racial equity report submission guide.

2.1 Description of residential space and affordability

2.1.1 Reporting residential floor area

Total residential zoning square feet: 275,442

2.1.2 Profile of anticipated residential affordability

Report the number of anticipated housing units. Describe the expected rents or prices for all proposed housing units.

Income Restriction	Units		Anticipated Affordability				
			AMI Band	Rent (2022)*		Eligible Income (2022) **	
	#	%		1-bedroom	2-bedroom	2-person HH	4-person HH
Low Income	4	1%	70%	$1,750	$2,100	$74,800	$93,400
Low Income	4	1%	90%	$2,250	$2,700	$96,200	$120,100
Moderate Income	73	28%	120%	$3,000	$3,600	$128,200	$160,100
Not Income Restricted	189	70%	N/A	$2,040	$2,530	$81,500	$122,000
Total	270	100%					

*Rents are based on unit size. Rents shown are illustrative (based on 2022 AMI, rounded to the nearest $10) and will change. Final rents will be determined based on the HUD Income Limits in place at time of project construction.

**Qualifying incomes are based on household size. Incomes shown are illustrative (based on 2022 AMI, rounded to the nearest $100) and will change. Final qualifying incomes will be determined by the HUD Income Limits in place at time of project marketing.

Provide additional details below as needed. If applicable, report the proposed Mandatory Inclusionary Housing option. If applicable, describe any affordable housing financing programs.

The Proposed Development would contain a total of 270 dwelling units ("DUs"), of which 81 DUs would be income-restricted pursuant to MIH, and 189 would be market rate (not income-restricted).

The Applicant proposes to map MIH Option 1, MIH Option 2, and MIH Workforce Option. The Proposed Development would comply with MIH Workforce Option. MIH Workforce Option requires that 30 percent of new residential floor area on a zoning lot be set aside for permanently affordable housing for households making an average of 115 percent of AMI. Of that 30 percent, at least 5 percent of the residential floor area must be affordable to households at 70 percent of AMI, and another 5 percent must be affordable to households at 90 percent of AMI. This option allows for a maximum of four income bands, with no income band exceeding 135 percent of AMI. No public funding is available under MIH Workforce Option.

The Proposed Development would contain 81 affordable DUs provided pursuant to MIH Workforce Option and 189 market rate DUs. The Proposed Development's exact unit size is not known at this time. However, it is expected that households occupying the Proposed Development would range in size from two to four persons per household. The Proposed Development is expected to contain one, two, and three bedroom units.

(2.1.2 continued)

It is expected that four DUs would be available to households with incomes at 70 percent of AMI (in the low-income band); four DUs would be available to households with incomes at 90 percent of AMI (in the low-income band); and 73 DUs for households with incomes at 120 percent AMI (in the moderate-income band).

Example rents and example eligible incomes for the income-restricted housing units are based on 2022 U.S. HUD AMI and are for illustrative purposes only. (Data source: https://www1.nyc.gov/site/hpd/services-and-information/area-median-income.page).

For the housing units not subject to income restrictions, example rents and example eligible incomes have been cited from the analysis provided in Attachment D, "Socioeconomic Conditions" of the Brooklyn Yards EAS. The analysis presented within Attachment D demonstrated a one bedroom market rate unit is anticipated to rent for $2,040 per month, which corresponds to an estimated yearly income of $81,500. A two bedroom market rate unit is anticipated to rent for $2,530 per month, which corresponds to an estimated yearly income of $101,000. A three bedroom market rate unit is anticipated to rent for $3,050 per month, which corresponds to an estimated yearly income of $122,000.

2.2 Description of non-residential space and jobs

Report building area and job sector details for specific non-residential uses. Specific non-residential uses are those where a space is being built for the use of a specific tenant or business. This might be an anchor tenant that is only occupying a portion of the proposed space, or it might be that the applicant is seeking the proposed action to build for their own use.

If the proposal includes non-residential space but no specific tenants or businesses, do not complete this section. General non-residential space can be discussed in Section 4.

2.2.1 Reporting non-residential floor area

Total non-residential zoning square feet:

Non-residential zoning square feet to be occupied by unknown tenants:

Non-residential zoning square feet to be occupied by known tenants:

2.2.2 Profile of anticipated new jobs for non-residential space with a known tenant

If the application proposes specific non-residential uses, report the projected number of permanent jobs in each sector. Specific non-residential uses are those where there is a known tenant for the space.

In cases where there is not a known tenant, do not report the projected number of jobs or the characteristics of the potential sectors. Without a specific tenant/business, future industry sectors cannot be known and therefore all wage and workforce reporting would be speculative.

Sector (name and NAICS code)	Job count
Total	0

For each sector, use most recent available data to describe the educational attainment and racial/ethnic composition of the workforce and median wages for those sectors in New York City.

(2.2.2 continued)

2.3 Estimating construction jobs

Report anticipated construction jobs in both person-years and average yearly workers for each development site.

As detailed in the Brooklyn Yards EAS, it is expected that construction of the Proposed Development would occur over a period of approximately seven years. The values provided below have been calculated using the RER submission guide, as well as the quarterly average of construction workers as summarized in Attachment K, "Construction" of the Brooklyn Yards EAS. The analysis presented within Attachment K provides the following quarterly average of construction workers:

- Quarters 1-2: 16 workers per quarter
- Quarter 3: 67 workers
- Quarters 4-5: 92 workers per quarter
- Quarter 6: 81 workers
- Quarter 7: 65 workers
- Quarters 8-11: 60 workers per quarter
- Quarters 12-15: 44 workers per quarter
- Quarters 16-19: 35 workers per quarter
- Quarter 20: 26 workers
- Quarter 21: 9 workers
- Quarters 22-23: 22 workers per quarter
- Quarter 24: 19 workers
- Quarters 25-26: 18 workers per quarter

Development site	Person-years	Average yearly workers
Applicant-controlled Development Site	280	40
Totals	280	40

Section 3: Community Profile Summary

The community profile summary provides a graphic snapshot of household, housing, and neighborhood indicators from the Equitable Development Data Explorer for the relevant Community District[1]. Data tables and sources can be found in the full community profile (Section 5 of this report.)

Community Profile Summary

Bensonhurst & Bath Beach

(PUMA 4017, approximately Brooklyn CD 11)

Each figure includes a description and a sample interpretive sentence. Data is sourced from the U.S. Census, the American Community Survey, and the NYC Housing and Vacancy Survey. For more detailed data sourcing, see the associated source table in the Equitable Development Data Explorer, available here.

Demographic Conditions

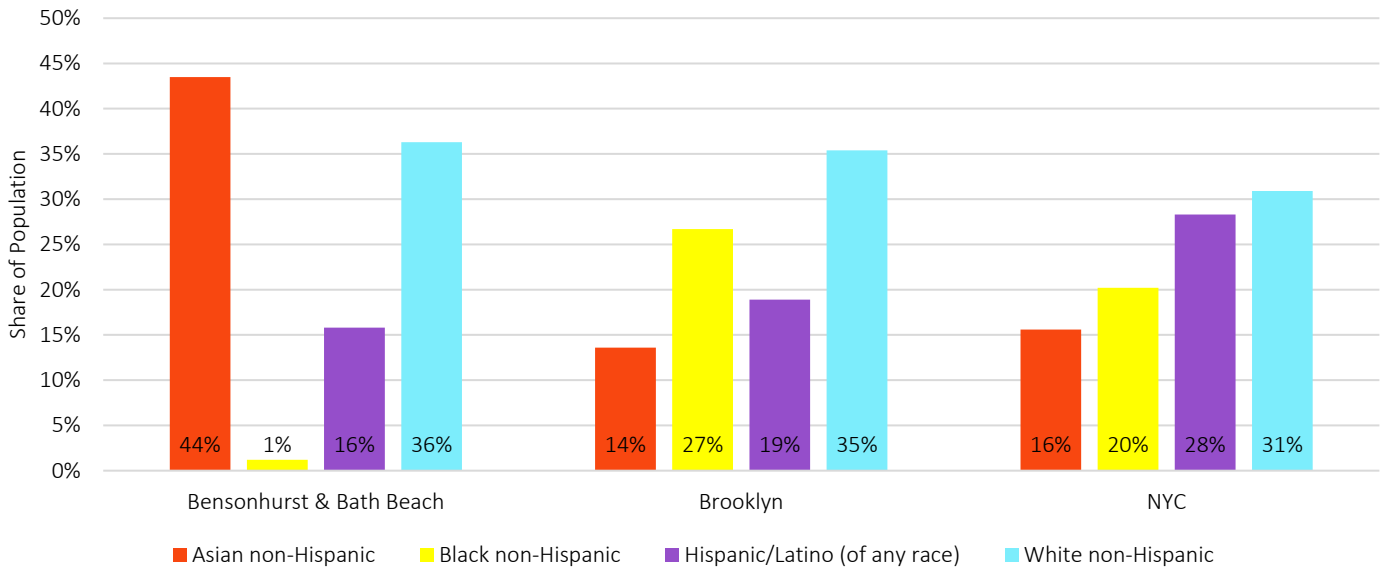
Figure 1: Race & Ethnicity, 2020

Shows the share of area population by mutually exclusive race and Hispanic ethnicity. Compares the local area to the borough and city.

"In 2020, [percent] of the population in [area] identified as [race/ethnicity]."

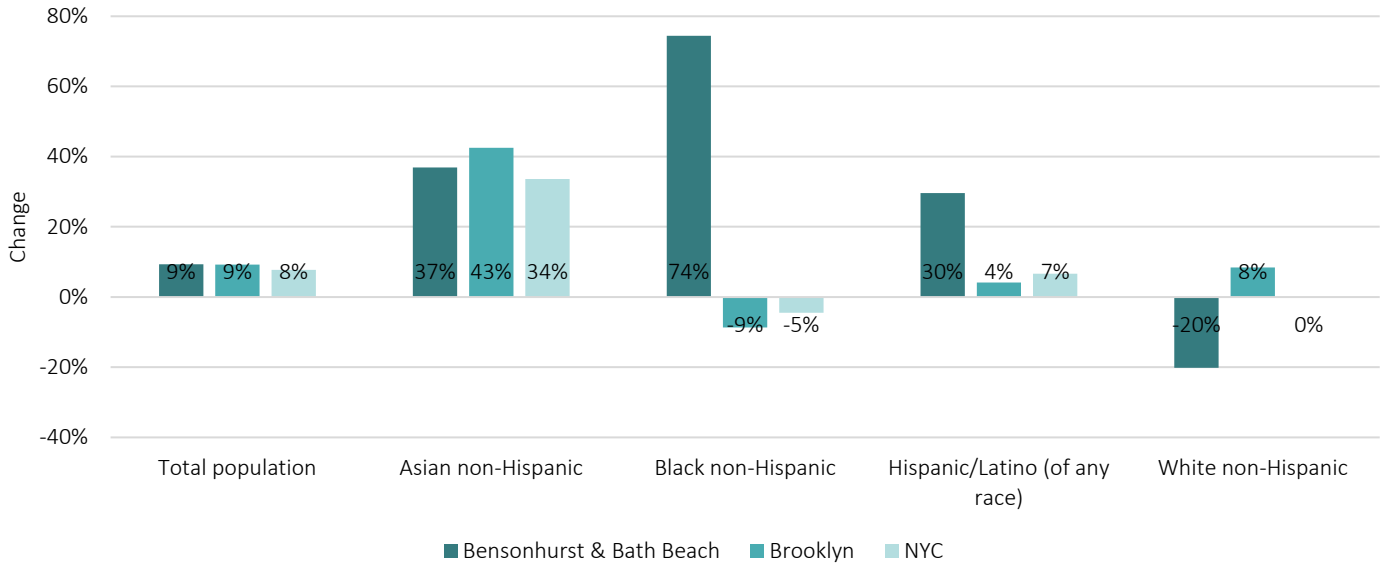


Source: Census 2020; Community Profile Table 1.01

Figure 2: Percent Change in Race & Ethnicity, 2010 to 2020

Shows the percent change of the area population by mutually exclusive race and Hispanic ethnicity. Compares the local area to the borough and city.

"From 2010 to 2020, the [race/ethnicity] population in [area] increased/decreased by [percent]."



Source: Census 2010, 2020; Community Profile Table 1.01

Household Economic Security – Income

Figure 3: Median Household Income, 2015-2019 (Five-Year Estimate)

Shows the estimated median household income (in 2019 dollars) for the local area, borough, and city. Median means half of all households in the area make more than this amount and half make less. Compares the local area to the borough and city.

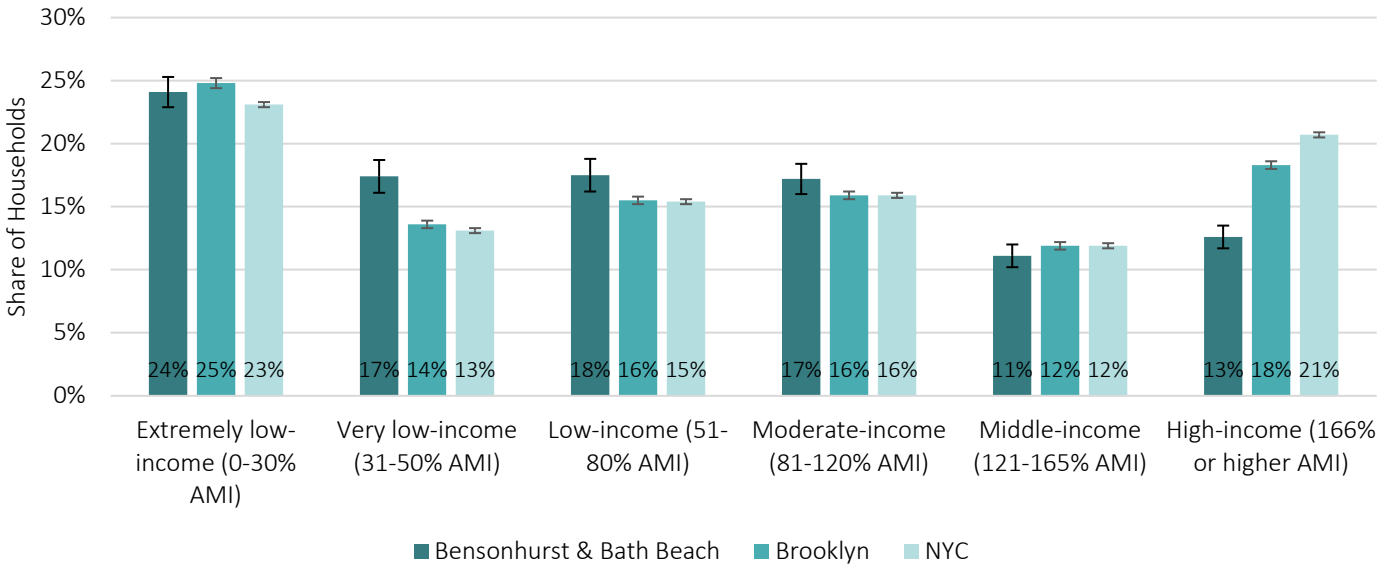
"For 2015-2019, the estimated median household income in [area] was [$]."

Source: American Community Survey 2015-2019; Community Profile Table 2.02

Figure 4: Share of Households in Each HUD AMI Band, 2015-2019 (Five-Year Estimate)

Shows the share of households within each 2017 U.S. Housing and Urban Development (HUD) Area Median Income (AMI) band. Compares the local area to the borough and city. U.S. Housing and Urban Development (HUD) Area Median Income (AMI) is based on rental prices.

"For 2015-2019, an estimated [percent] of households in [area] were in [HUD AMI band]."

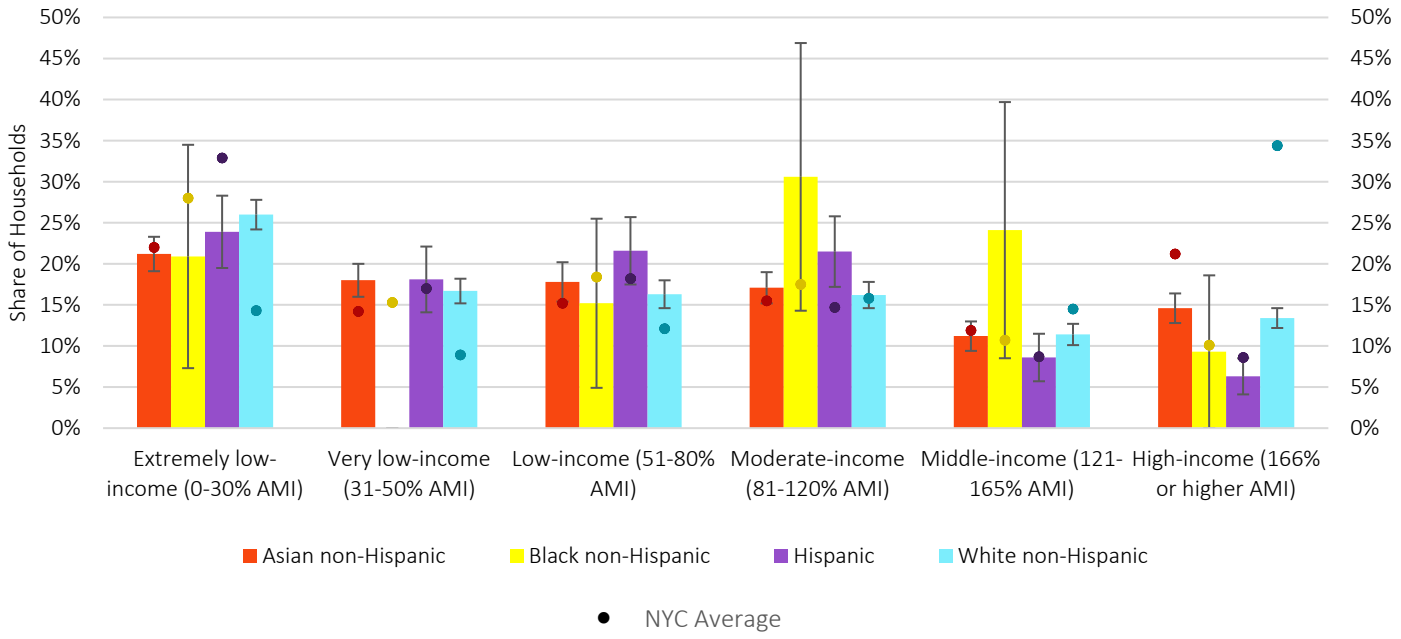


Source: American Community Survey 2015-2019; Community Profile Table 2.03

Figure 5: Share of Households in Each HUD AMI Band by Race & Ethnicity, 2015-2019 (Five-Year Estimate)

Shows the share of PUMA households within each 2017 U.S. Housing and Urban Development (HUD) Area Median Income (AMI) band, by mutually exclusive race & Hispanic ethnicity of householder. HUD AMI bands are used to determine eligibility for income-restricted housing.

"In the local area, an estimated [percent] of [race/ethnicity] households were in [HUD AMI band] in 2015-2019."



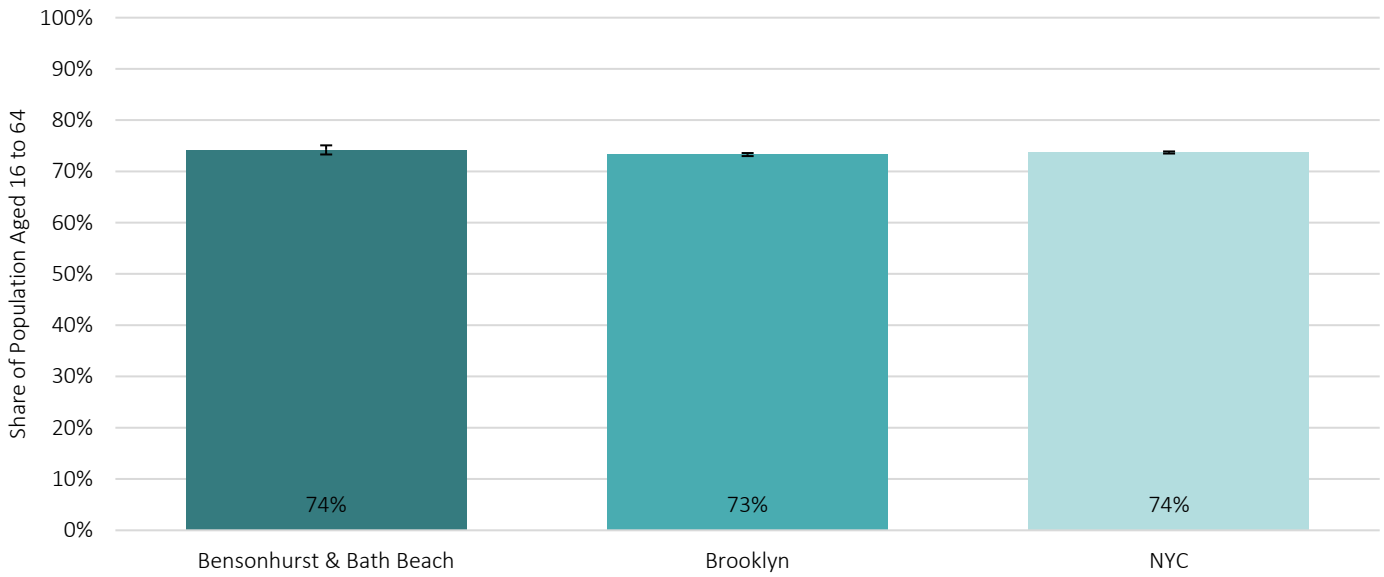
Source: American Community Survey 2015-2019; Community Profile Table 2.03

Household Economic Security – Jobs

Figure 6: Labor Force Participation, 2015-2019 (Five-Year Estimate)

Shows the share of the total population aged 16-64 who is employed or seeking work. Compares the local area to the borough and city.

"In 2015-2019, an estimated [percent] in [area] were employed or seeking work."

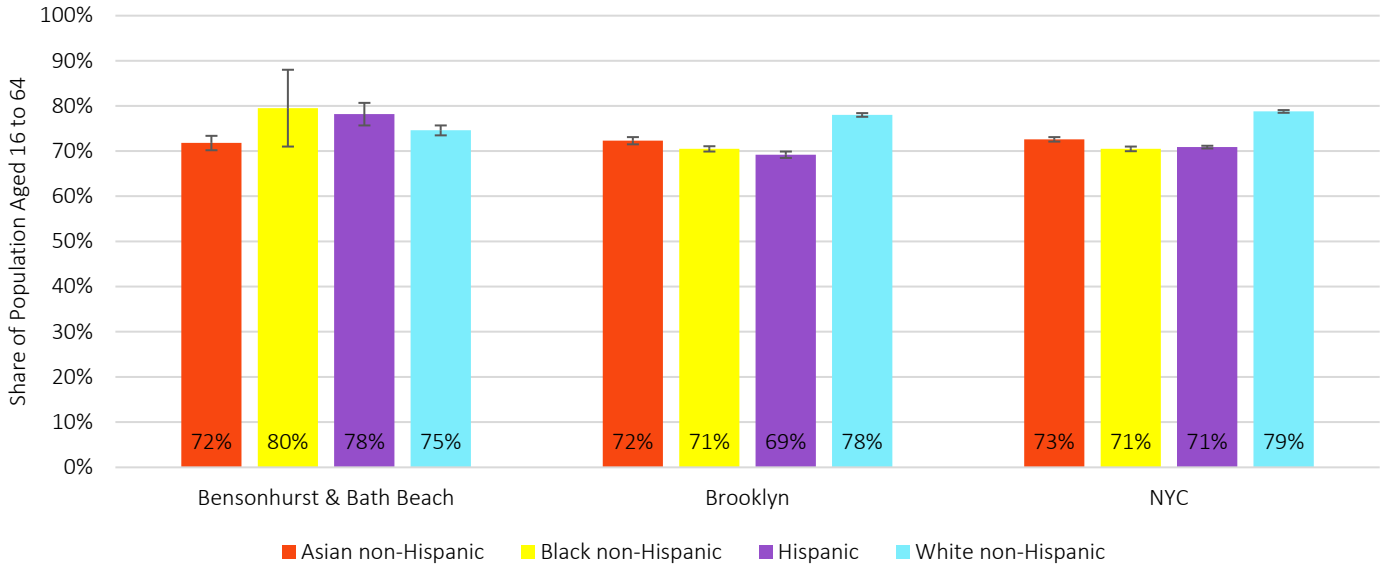


Source: American Community Survey 2015-2019; Community Profile Table 2.04

Figure 7: Labor Force Participation by Race & Ethnicity, 2015-2019 (Five-Year Estimate)

Shows the share of the total population aged 16-64 who is employed or seeking work, by mutually exclusive race & Hispanic ethnicity. Compares the local area to the borough and city.

"In 2015-2019, an estimated [percent] of [race/ethnicity] group in [area] were employed or seeking work."

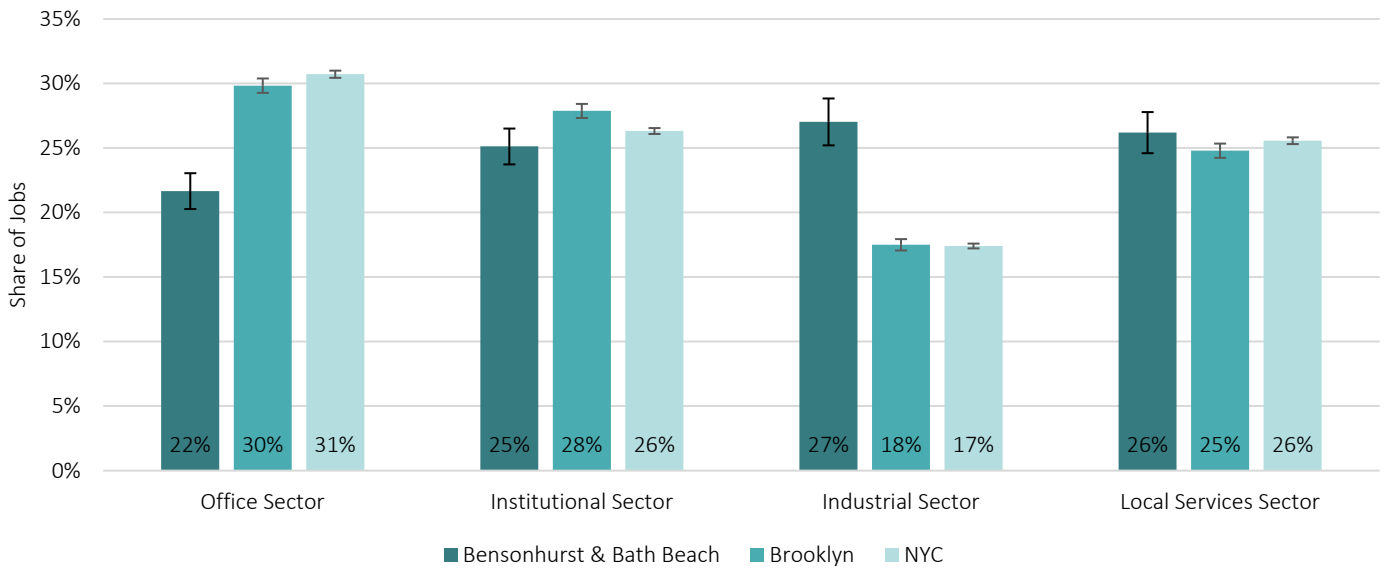


Source: American Community Survey 2015-2019; Community Profile Table 2.04

Figure 8: Share of Employed Residents by Business Sector[1], 2015-2019 (Five-Year Estimate)

Shows the share of workers who live in an area by the business sector in which they work. Compares the local area to the borough and city.

"In 2015-2019, an estimated [percent] of employed people in [area] worked in [business sector]."



Source: American Community Survey 2015-2019; Community Profile Table 2.06

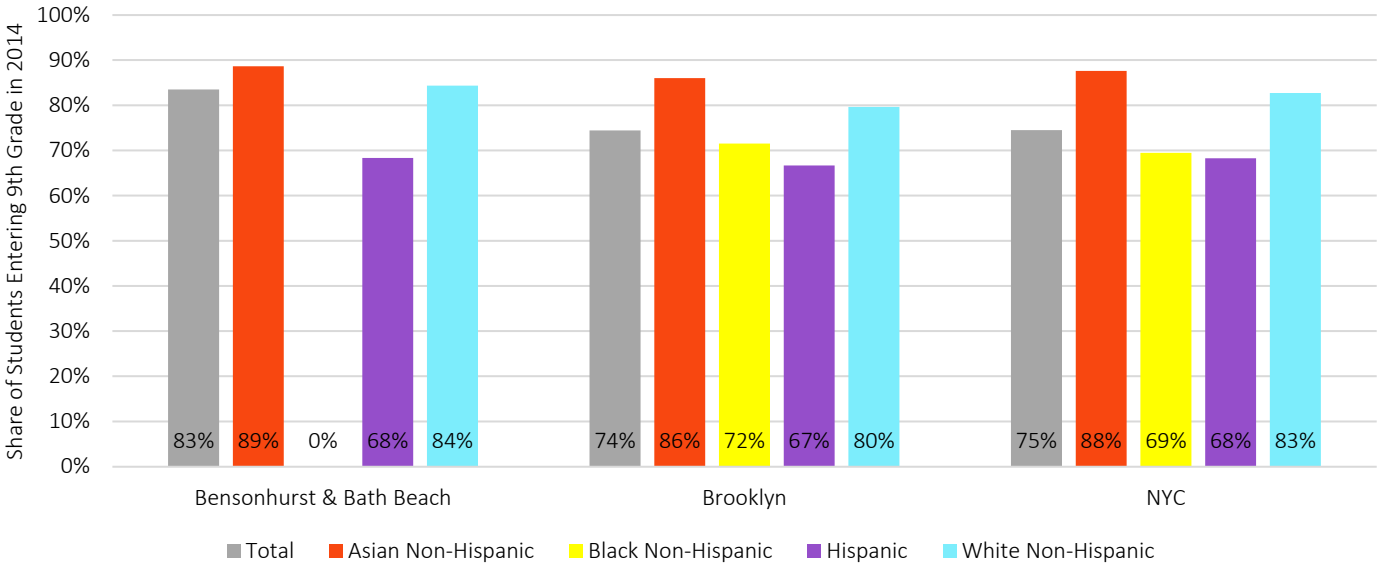
[1] Business sectors are shown as macro-sectors as defined by NYC Department of City Planning. Office sector includes professional, management, finance businesses, and others; institutional sector includes educational services and health care and social assistance; industrial sector includes construction, manufacturing, warehousing businesses, and others; local services sector includes retail, arts and entertainment, food service businesses, among others.

Education & Access to Transit

Figure 9: High School Graduation Rate, 2018

Shows the rate of students who entered 9th grade in 2014 and graduated by 2018. Shows the share of total students and share of students by mutually exclusive race and ethnicity groups. Compares the local area to the borough and city.

"The 2018 graduation rate for [race/ethnicity] group in [area] was [percent]."

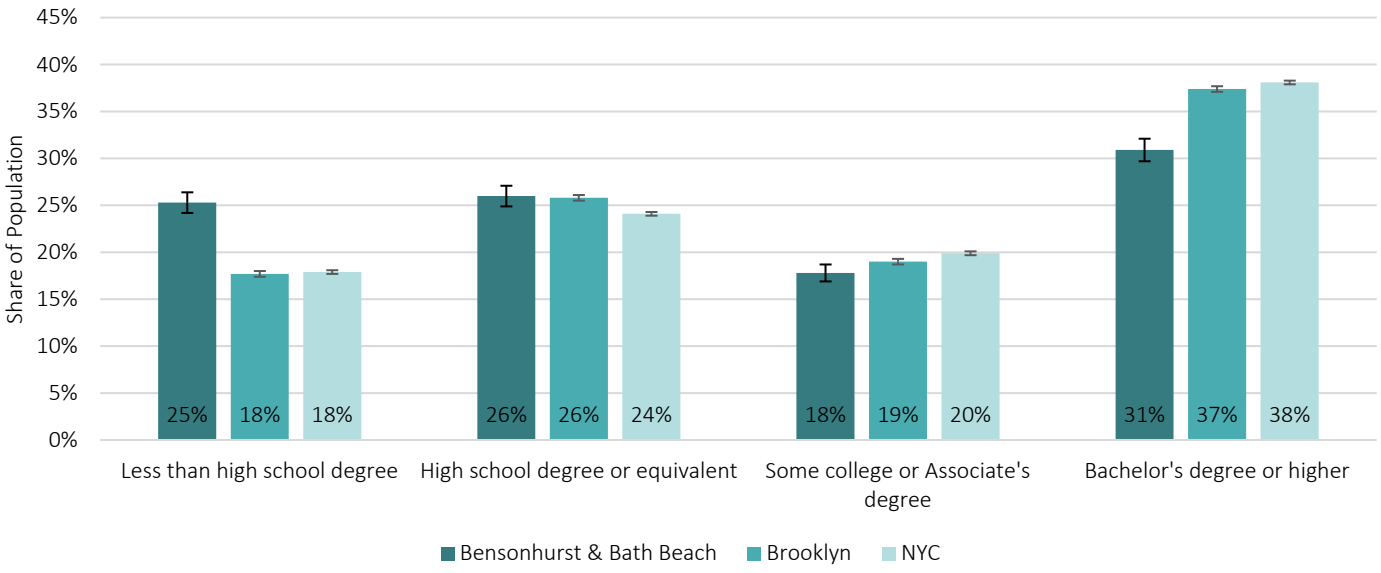


Source: NYC Department of Education 2018; Community Profile Table 5.13

Figure 10: Educational Attainment, 2015-2019 (Five-Year Estimate)

Shows the share of the population 25 years and over, by highest level of educational attainment. Compares the local area to the borough and city.

"In 2015-2019, an estimated [percent] of the population 25 years and over in [area] had [educational attainment]."

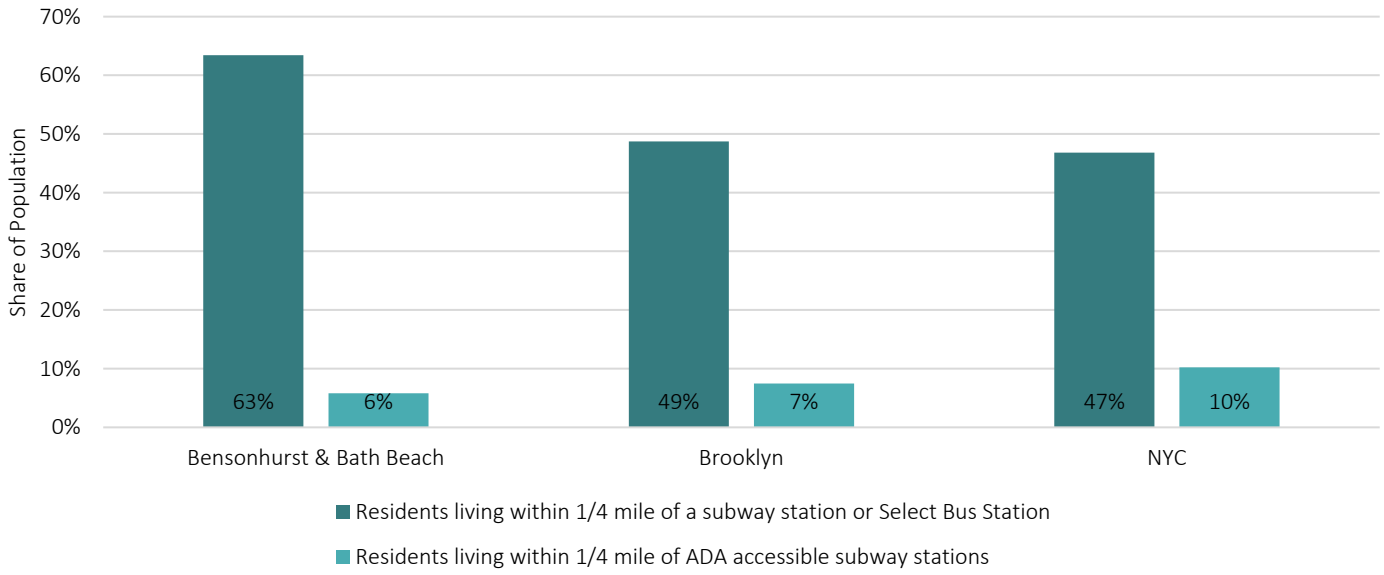


Source: American Community Survey 2015-2019; Community Profile Table 2.01

Figure 11: Access to Transit, 2020

Shows the share of population that lives within ¼ mile of a subway station or select bus service stop; and share of population that lives ¼ mile of an ADA accessible subway station. Compares the local area to the borough and city.

"In 2020, about [percent] of residents in [area] lived near an ADA accessible subway station."



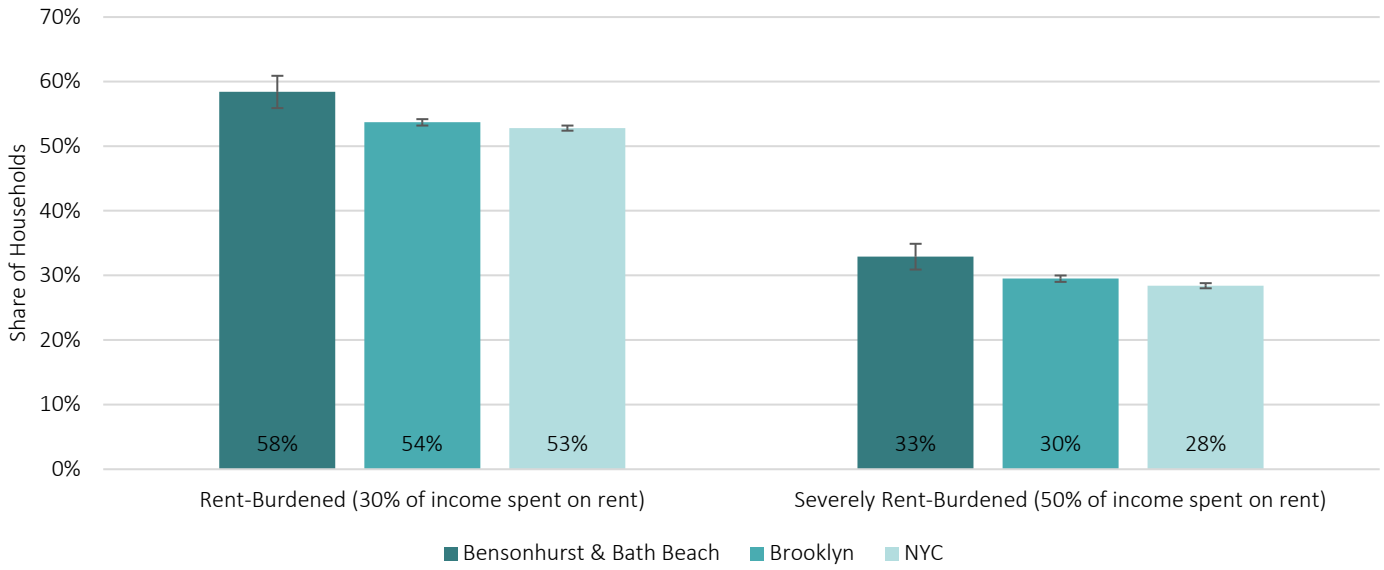
Source: Department of City Planning 2020; Community Profile Table 5.09

Housing Security, Affordability, and Quality

Figure 12: Rent-Burdened & Severely Rent-Burdened Households, 2015-2019 (Five-Year Estimate)

Shows the percent of households who spent 30% or more of their income on rent (rent-burdened) and the percent who spent 50% or more of their income on rent (severely rent-burdened). Compares the local area to the borough and city.

"In 2015-2019, an estimated [percent] of households in [area] were severely rent-burdened."

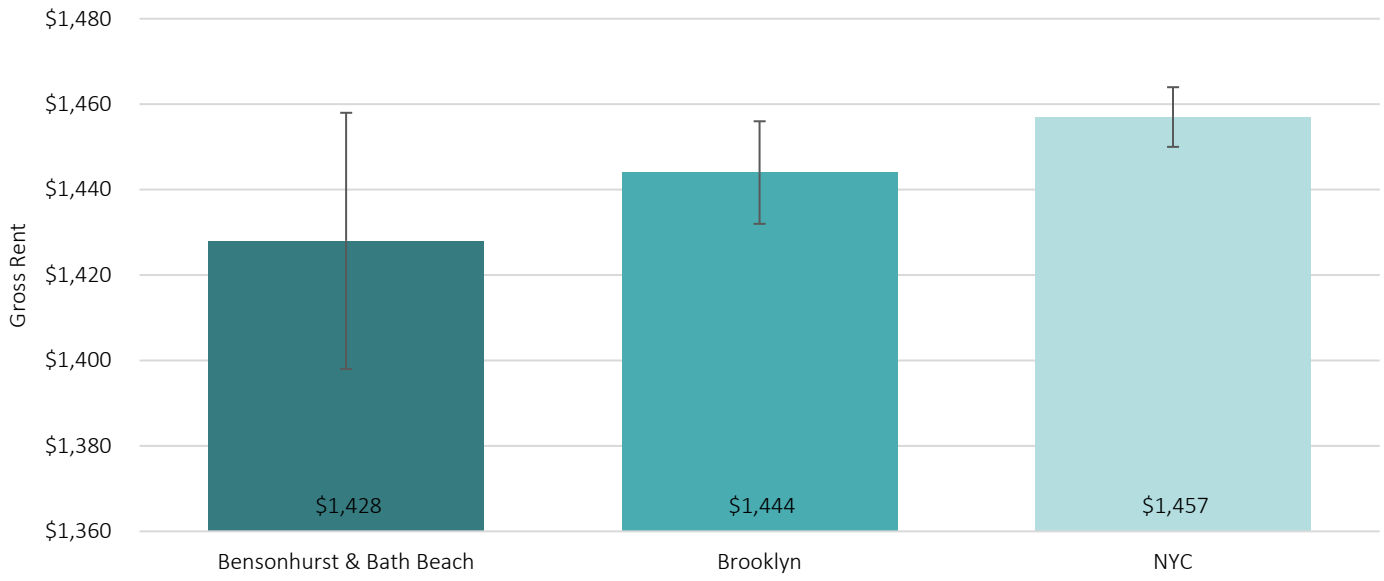


Source: American Community Survey 2015-2019; Community Profile Table 3.04

Figure 13: Median Gross Rent, 2015-2019 (Five-Year Estimate)

Shows the median rent for occupied units paying rent. Median means half of all units have rental costs higher than this amount and half have rents lower than this amount. Compares the local area to the borough and city.

"In 2015-2019, the estimated median price of rental units in [area] was [$]."



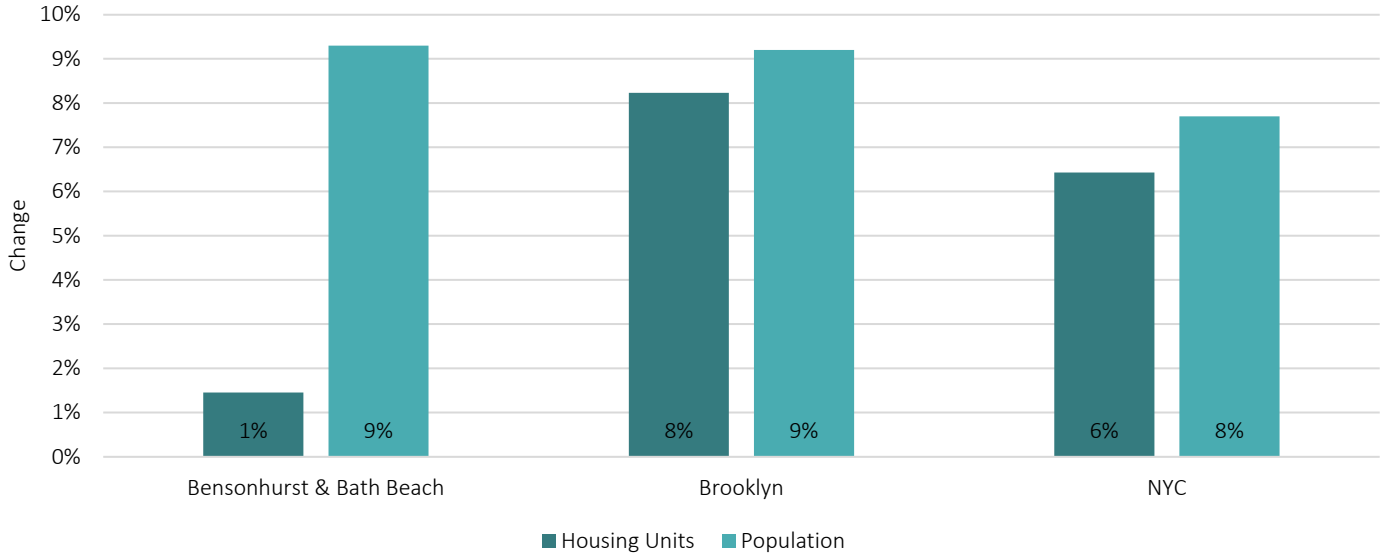
Source: American Community Survey 2015-2019; Community Profile Table 3.03

Housing Production

Figure 14: Percent Change in Housing Supply and Population, 2010 to 2020

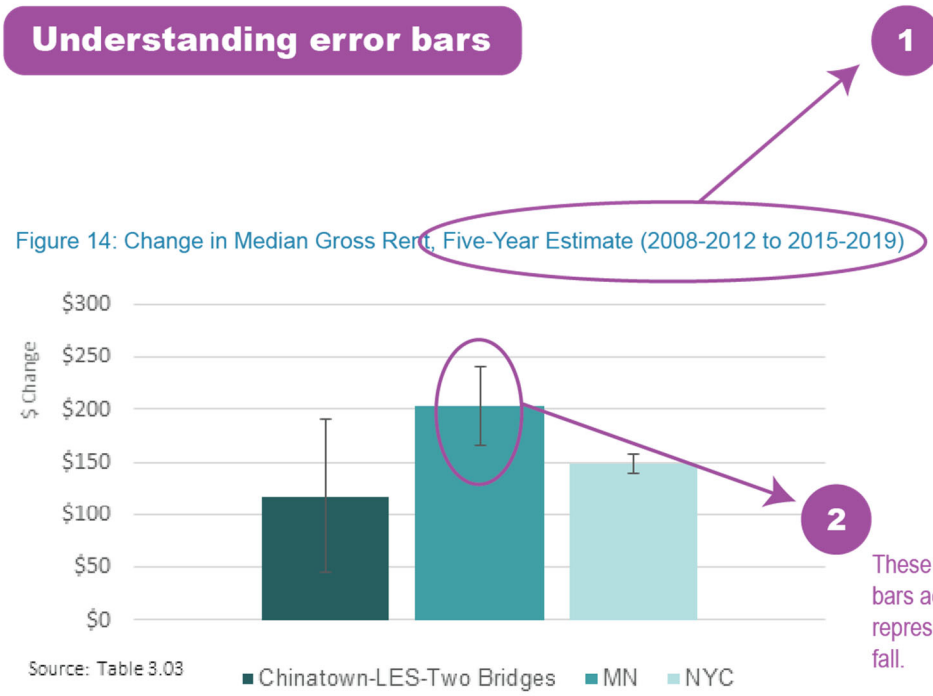
Shows the percent change in the number of housings units and population. Compares the local area to the borough and city.

"From 2010 to 2020, housing units in [area] increased/decreased by [percent] and population increased/decreased by [percent]."



Source: NYC Department of City Planning Housing Database 2020 Q4 and Census 2010, 2020; Community Profile Tables 4.01 and 1.01

Understanding error bars



Five-year estimates refer to data from the American Community Survey (ACS). The ACS is a monthly survey sent to a sample of households throughout the country. To have a large enough sample to create estimates of characteristics for small areas, the ACS "rolls-up" the sample for five-year periods.

Because the ACS data are from a sample, the estimates comes with some uncertainty, which is shown in the chart as ***errror bars.***

These "I" figures are called ***error bars***. Error bars account for uncertainty in ***sample data*** by representing the range in which the data could fall.

In this example, the ***error bars*** tell us that the change in rent in Manhattan is somewhere between about $160 and $245.

Data drawn from a larger sample are more accurate and have a smaller ***error bar***, which is why the size of the ***error bar*** gets smaller as the geography increases in size.

Correct intrepretation of this chart:

"Rents in Chinatown increased between about $50 and $190."

Based on the ***error bar*** for Chinatown, this is correct.

Incorrect intrepretation of this chart:

"Changes in rents in Manhattan were larger than those in Chinatown."

Because the ***error bars*** for Chinatown and Manhattan overlap, we cannot say for certain whether changes were higher or lower. In other words, the range of rent changes in Manhattan ($160-$245) overlap with the range in Chinatown ($45-$195).

Bensonhurst & Bath Beach

PUMA 4017

The city's Displacement Risk Index (DRI) estimates comparative levels of residential displacement risk for New York City's neighborhoods. The DRI ranks neighborhoods from lowest to highest risk based on recent population characteristics, housing conditions, and market pressures.

There are five ranks with equal numbers of neighborhoods. For example, neighborhoods ranked "lowest" are among the 20% of NYC neighborhoods with the least intense displacement risk factors while neighborhoods ranked "highest" are among the 20% of neighborhoods with most intense displacement risk factors.

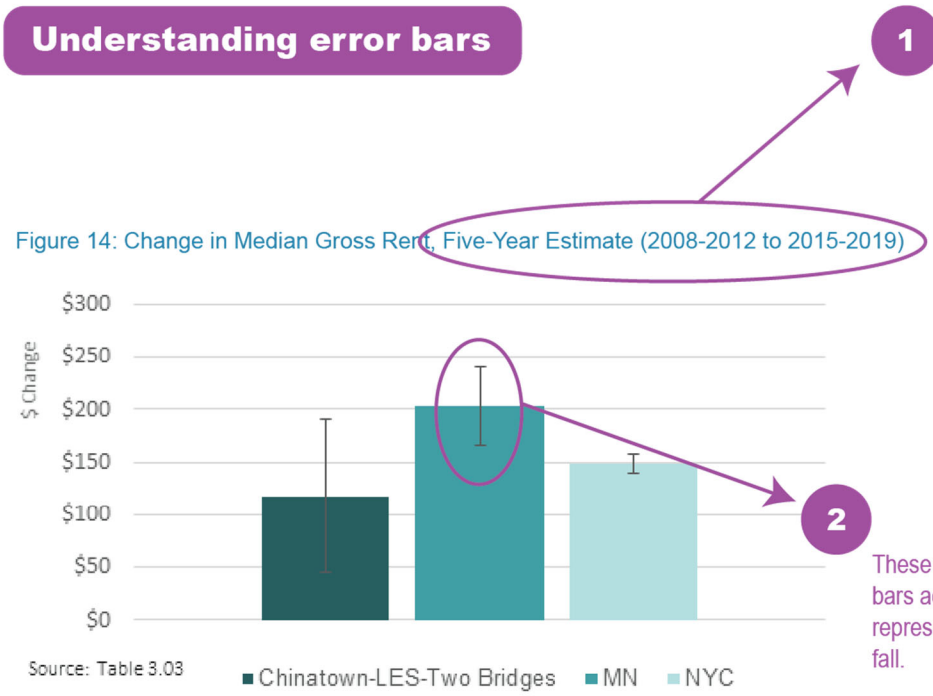
Understanding error bars



Five-year estimates refer to data from the American Community Survey (ACS). The ACS is a monthly survey sent to a sample of households throughout the country. To have a large enough sample to create estimates of characteristics for small areas, the ACS "rolls-up" the sample for five-year periods.

Because the ACS data are from a sample, the estimates comes with some uncertainty, which is shown in the chart as ***errror bars.***

These "I" figures are called ***error bars***. Error bars account for uncertainty in ***sample data*** by representing the range in which the data could fall.

In this example, the ***error bars*** tell us that the change in rent in Manhattan is somewhere between about $160 and $245.

Data drawn from a larger sample are more accurate and have a smaller ***error bar***, which is why the size of the ***error bar*** gets smaller as the geography increases in size.

Correct intrepretation of this chart:

"Rents in Chinatown increased between about $50 and $190."

Based on the ***error bar*** for Chinatown, this is correct.

Incorrect intrepretation of this chart:

"Changes in rents in Manhattan were larger than those in Chinatown."

Because the ***error bars*** for Chinatown and Manhattan overlap, we cannot say for certain whether changes were higher or lower. In other words, the range of rent changes in Manhattan ($160-$245) overlap with the range in Chinatown ($45-$195).

Borough Park, Kensington & Ocean Parkway

PUMA 4014

The city's Displacement Risk Index (DRI) estimates comparative levels of residential displacement risk for New York City's neighborhoods. The DRI ranks neighborhoods from lowest to highest risk based on recent population characteristics, housing conditions, and market pressures.

There are five ranks with equal numbers of neighborhoods. For example, neighborhoods ranked "lowest" are among the 20% of NYC neighborhoods with the least intense displacement risk factors while neighborhoods ranked "highest" are among the 20% of neighborhoods with most intense displacement risk factors.

Section 4: Affirmatively furthering fair housing and promoting equitable access to opportunity

Provide a narrative statement describing how the project relates to New York City's goals and strategies to affirmatively further fair housing and promote equitable access to opportunity. These goals and strategies are described in the city's fair housing plan, Where We Live NYC.

As detailed below, the Proposed Development would advance Goals 2, 3, and 6 of New York City's fair housing plan, Where We Live NYC.

Goal 2: Facilitate equitable housing development in NYC and the region.

The Proposed Development advances this goal for several reasons, including: creating new housing in two CDs that have experienced little housing production in recent years; establishing new, permanently affordable (income-restricted) housing units; and constructing new market-rate and affordable housing in a location that is both walkable and transit-accessible.

Between 2010 and 2020, the populations of CDs 11 and 12 increased by approximately 9% and 8%, respectively. However, in the same time period, the number of housing units in CDs 11 and 12 increased by approximately 1% and 3%, respectively. In comparison to New York City as a whole, between 2010 and 2020 the population of the city increased by approximately 8% and housing production increased by approximately 6%, and during the same time period in Brooklyn, the population increased by approximately 9% and housing production increased by approximately 8%. In addition, for 2015-2019, approximately 14% and 20% of occupied housing units in CD 11 and CD 12, respectively, were considered overcrowded; these figures are higher when compared to Brooklyn and New York City as a whole (10% and 9% of occupied housing units, respectively, were considered overcrowded for 2015-2019). CDs 11 and 12 have larger numbers of rent-burdened and severely rent-burdened households (approximately 58% and 33% of residents, respectively, in CD 11 and approximately 68% and 45% of residents, respectively, in CD 12) as compared to Brooklyn (approximately 54% and 30% of residents, respectively) and New York City as a whole (approximately 53% and 28% of residents, respectively).

The Proposed Development would create an additional 270 housing units, comprising 189 market-rate (not income-restricted) units and 81 permanently affordable (income-restricted) units. The provision of 81 affordable housing units would contribute a significant amount of affordable housing to two CDs in which only 172 total new rent regulated units (with regulatory agreements with HPD) have been constructed since 2014 (107 new rent regulated units were constructed in CD 11 and 65 new rent regulated units were constructed in CD 12). The creation of new affordable housing units would provide rent-stabilized rents for middle-income tenants looking to remain in place. Based on the 2015-2019 ACS PUMS data, in CD 11, approximately 24% of all households are considered middle- and high-income (>120% AMI), while in CD 12, approximately 22% of all households are considered middle- and high-income (>120% AMI).

The introduction of both new market-rate and income-restricted housing in the Project Area would provide housing opportunities for households of varied incomes in two diverse and diversifying CDs of New York City. CD 11 in particular is majority-minority, with minority groups continuing to grow in CDs 11 and 12. Based on the 2020 Census, CD 11's population is approximately 44% Asian, 1% Black, 16% Hispanic, 36% White, and 3% other; CD 12's population is approximately 17% Asian, 2% Black, 11% Hispanic, 65% White, and 6% other. Based on the 2015-2019 ACS PUMS data, in CD 11, the median household income is approximately $55,649 for all households, $63,060 for Asian households, $83,291 for Black households, $54,348 for Hispanic households, and $51,028 for White households. Based on the 2015-2019 ACS PUMS data, in CD 12, the median household income is approximately $49,867 for all households, $49,696 for Asian households, $82,459 for Black households, $47,295 for Hispanic households, and $49,235 for White households.

Additionally, the Proposed Development would be located in a transit-accessible area of the city. The Proposed Development, at its closest point, is adjacent to the 62nd Street Station (serving the D subway line) and the New Utrecht Avenue Station (serving the N and, selectively, the Q/W subway lines). Importantly, both subway stations are ADA-accessible.

(Section 4 continued)

Goal 3: Preserve affordable housing and prevent displacement of long-standing residents.

The Development Site does not currently contain any residential use. Therefore, no housing units are threatened by the Proposed Development. The Proposed Development affirmatively furthers the goal of creating affordable housing by producing 81 permanently affordable housing units pursuant to MIH Workforce Option. Moreover, the new permanently affordable housing units would be subject to HPD Marketing Guidelines, which provide a preference for applications from within CDs 11 and 12. This serves to specifically prevent the displacement of existing residents.

Goal 6: Make equitable investments to address the neighborhood-based legacy of discrimination, segregation, and concentrated poverty.

The Project Area spans two NTAs, Bensonhurst West (NTA BK28) and Borough Park (NTA BK88). In Bensonhurst West, the displacement risk is "highest." The displacement risk sub-indicators of population vulnerability, housing conditions, and market pressure are “highest,” “intermediate,” and “higher,” respectively. In Borough Park, the displacement risk is “higher.” The displacement risk sub-indicators of population vulnerability, housing conditions, and market pressure are “higher,” “intermediate,” and “lower,” respectively.

The Proposed Development would provide approximately 0.08 acres of public access area (“PAA”) on the Development Site. The PAA would provide publicly accessible café tables and chairs, planting areas with seating, circulation paths, fixed benches, and an 815 sf play area featuring climbing, sliding, and spinning areas. The Proposed Development’s newly added PAA, to be comprised of passive and active open space uses, would be accessible to all residents of nearby neighborhoods. In CDs 11 and 12, approximately 65% and 70% of residents, respectively, live within walking distance of a park.

Therefore, through the creation of new housing units and publicly accessible open space, the Proposed Development would advance Goals 2, 3, and 6 of New York City's fair housing plan, Where We Live NYC.

Section 5: Community profile

The community profile provides data tables for all indicators from the Equitable Development Data Explorer (EDDE) for the relevant Community District[2]. Includes approximately 50 indicators across five categories:

- *demographic;*
- *household economic security;*
- *housing affordability, quality, and security;*
- *housing production; and*
- *quality of life and access to opportunity.*

Where possible, these indicators are broken down by mutually exclusive race/ethnicity and show change over time.

All community profiles can be downloaded from the Equitable Development Data Explorer.

[2] The EDDE reports data by Public Use Microdata Areas (PUMA), statistical areas defined by the U.S. Census. PUMAs in New York City generally approximate Community Districts. Displaying the data at the PUMA scale enables data reporting broken down by race and ethnicity.
