Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"1/19/2012- Sangesland spoke to ProTest: Work is not yet finished. ProTest returned to the site on 1/5/12 to isolate and retest. Tank passed. Vent line and Remote Fill Line both failed. Building accepted ProTest Proposal to do addtional repairs - Work should be done by Feb 1st, 2012. 3/1/2012 Sangesland reviewed a letter/test report from ProTest dated Feb 7th which shows repairs to a small dry leak. isolated tank passed a test, but the vent and remote fill line failed. new lines were installed with a new vent alarm. The fill box was removed from the sidewalk and a new fill port installed at the building. System was retested on Feb 2nd and passed. No evidence of contamination within the excavation. 5-6-14 - Dupigny - notes from Sangesland 1/5 & 1/6 Isolate and retest - tank passed - vent -failed -remote fill, Failed. "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

Registry ID: 110004478805

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #143459: On 6/20/02 at 08:15 Felix Contracting while digging for new electrical lines hit the insulation a steam main with possible asbestos insulation wrapping. H. Dosantos of Felix Contracting reported to R. Gronberg # 12145 of Construction Management of the incident. R. Gronberg then went to the site to verify. At 09:49 R. Gronberg called the incident into the environmental desk with the information. He stated that appox a 2' x 3' section of insulation was struck by a backhoe. The steam main was not ruptured. He is not to clear of the amout of the insulation that was disturbed because Felix covered it up with a plastic tarp. Felix stated that they had noticed the insulation in the spoils of the digging. R. Gronberg called R. Yako # 52636 of the Steam dept & he is going to send someone there at this time to do the cleanup. No sewers or waterways affected. No private property affected. No injuries were related to this incident. No fire or smoke was involved. 6/20/02 10:00 CIG A. Morris # 85791 was notified of the incident, however the report was not made out. 6/20/02 10:58 CIG A. Morris was called & instucted the the incident was was logged in on e2MIS. 6/20/02 11:25

MADISON AV (Continued) **S106004718**

J. Fleigner # 26955 EH&S from Consruction Management called to report that he was on site to assess the situation & states that the insulation on the steam main was not struck today. What he reports is that the insulation discovered today he believes is to be from backfilled from a previous dig."

Remarks: "WHILE EXCVATING HOLE MACHINERY CAME IN CONTACT WITH STEAM PIPE KNOCKING INSULATION OFF update - contractor only discovered this and did not cause it"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"e2mis no. 153559: 2 gal. of unknown oil in V9433. Employee was inform to take three oil sample one for pcb and two for oil id, from the unit (transformer). One from spill. Upon further investigation by the supervisor, the unknown oil discovered in this vault is from the transformer. The transformer failled the pressure test and the oil level is below minimum. The I&A will be requesting that the transformer be taken out of service for repair or replacement. Cleanup will be scheduled when unit is de-energized. Lab Sequence Number: 04-04059-001 TOTAL PCB 7 ppm Update: 7/12/04 L. Guglielmetti #38952 reported at 12:15 hrs. on 7/10/04 that the cleanup was completed. No solids were removed from the vault. Liquids removed by the Vactor truck were 2 gallons of oil & water mixed. The vault was double washed with Slix & rinsed with the Vactor truck. Cleanup crew consisted of Supervisor - L. Guglielmetti #38952 and Crew - E. Weinstein #12230 and R. Maingo #13148. Spill tag #33533 was removed. The defective transformer was removed, the final cleanup was completed at 12:00 hrs. on 7/10/04 and the new transformer was installed."

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to

BRISTOL MYERS SQUIBB (Continued) **1016281071**

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: "01/07/09 I responded to the spill site on behalf of Veronica Zhune as I had another site inspection in Manhattan.The spill occurred in the Postal Service's vehicle shop from a motor oil line and spilled onto the floor(40x30 ' area).Postal service cordoned the area and putdown speedy dry on it, was waiting for their stand by contractor to be on the site and start the clean up. Apparently, there was no cracks/holes,drain on the floor and spill was contained on the floor.A closure report will be sent to DEC after the clean up is done.(sr) 01/08/09 Rec'd call from Ismael Velez,USPS. Clean up has been completed by OP-TECH.Disposal manifest provided.As per Mr. Velez, the floor is sealed and as such, oil has no way to escape to the subsurface. I told him to send us few pictures of the cleaned site to keep in our records, he said he would do that.(sr)"
Remarks: "A line rupture cause oil to flow out of the tank onto the concrete

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Classification:	Non-Generator
Description:	Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

CON ED - V 1912 (Continued) **1007205312**

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Classification: Conditionally Exempt Small Quantity Generator
Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Registry ID: 110055453780

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no 155873 10-18-04 @ 16:20 L Leardi # 13625 reports that he discovered 5 gallons of tranformer oil had leaked from the unit onto the concrete floor of the structure and mixed with dirt that is also on the concrete floor of the structure. No sewer or waterway affected. The trap was inspected and there is no eveidance of a release from the structure. No measuring device was used to determine the amount of the spill. Source of spill is the transformer and the cause is possibly bottom leak. Environmental yellow tag # 44892 was applied. No substantial cracks observed. 1 sample, dirt and oil mixed taken from the spill. Cleanup is pending deenergization of equiptment and transformer removal. Lab Sequence Number: 04-08491-001 - TOTAL PCB 17 ppm Update 12-11-04 @ 03:30 G Byrne # 81264 reports that the cleanup is complete as of 03:30. 1 bag of ppe. 5 gallons of oily mud removed bt vactor. Double washed with slix and flushed. Tag # 44892 removed. Cleanup persons are listed in the evnt involved person screen. Defective transformer was removed and a new one was installed."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department

211 EAST 53RD STREET BUILDING (Continued) **1008233465**

of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "R.Allen#10800, Sr. field oper., notified the control center on

VAULT 7351 (Continued) **S106736567**

01/04/05 at 04:00hrs. to report he found approx. 1 quart of unknown oil mixed with dirt in V7351, which is located in front of 12-18 E. 49 st east of Madison ave. R.Allen #10800 was at this location to check tracing current on feeder 29M51, when he discovered the spill, the unknown oil is on the top of the transformer. There was no smoke or fire involved and no sewers or waterways were affected. There were no injuries related to this spill and the weather conditions did not contribute to the hazards of this spill. There was no private property affected. The source and the cause of the spill is unknown at this time. There is oil filled equipment in V7351, the transformer. There is no water in V7351. A yellow environmnetal tag #45077 was hung in V7351. There were two samples taken from V7351, one for PCB's and one for oil ID. The samples are marked priority E. The chain of custody form number is #DD20527. There was no initial cleanup action taken. The cleanup is pending investigation of the transformer and test results. 1/4 @ 15:45 Lab Sequence Number: 05-00043-001 TOTAL PCB 20 ppm Lab Sequence Number: 05-00044-001 analysis indicates the sample is similiar to a grease type substance. Update 1-10-04 @ 17:37 L Roman # 27270 reports that the cleanup is complete as of 17:30. Double washed with slix and flushed. All solids removed by vactor. 25 gallons of oil and water mixed removed. Tag #45077 removed. No visible sign of the source of the oil was observed."

Remarks: "1 qt of unkn oil in vault, unkn cause & source. clean-up pending pressure testing, & samples. Con Ed ref 156768. no to 5 questions."

DEC Memo:	"e2mis no. 156135: On 11/5 @ 12:20 Tamez # 88368 of I&A reported to me that at 130 E 51 St in V-1923 approx 9 gal dielectric fluid and 100 gal water was found. They were there to do repairs. No sewer/waterway affected. The source is the Transfromer and the cause is damaged equipment. The spill was on the concrete floor. The drain was found clogged by using a burnout slick to probe into the area, and there is no sump pump running. There was no movement on the standing water. At this time there is no reason to suspect any impact to the Environment. Follow up inspection to verify this will be taken

VAULT #1932 (Continued) **S106721633**

when the area is safe. Environmental tag # 35906 was hung. Two samples for PCB and ID will be taken by the finder. Chain of Custody # DD 02979 will be used for this incident. Diapers were used to try and soak up the spill unsuccessfully. Cleanup action will commence when the Feeder is taken out of service. 11/5 @ 14:00 Cleanup set up for 15:00 on 11/5/2004. Feeder has been taken out of service. Transportation notified and faxed documentation for an over 50 tanker. I&A notified and fxed documentation. Vactor services notifed and faxed documentation. EPA # NYP 004 126 231 11/5/04 Received lab results, Lab Sequence Number: 04-09233-001 Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082 11/5/04 S. Brenseke # 05729 I&A/Cleanup supervisor called to report that there was a partial cleanup done in V-1923. The tanker removed 280 gallons of oil from the transformer. Granuals were put down on the floor. The drain was re-clogged. The crew was T. Conway # 14691 W. Hunter # 87321. The final cleanup will be pending transformer removeal. 11/6/04 00:12 Received lab results Lab Sequence Number: 04-09234-001 Analysis indicates the presence of a substance similar to a lubricating oil. 1/29/05 L. Gugliemetti # 38952 Cable supervisor called to report that the final cleanup was completed at 20:30. 150 gallons of of water/oil was removed by a tanker. All debris was removed by flush truck. The spill tag # 35906 was removed. The crew was: T. Lewis # 17814, R. Gallagher # 61749 The transformer was removed & a new one installed."

Remarks: "ONE QUART OF MATERIAL SPILLED: TRANSFORMER SEEMS TO BE DAMAGED AND TWO SAMPLES WERE TAKEN. CON ED #156135"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"3/8/05: Spill transferred from Okwuoha to O'Connell. (JHO) ~~~~~~~~~~~~~~~~~~~ e2mis no. 135311: While inspecting M-43976 S/W/C E.52ST & 3AVE Richard Channer found approximately 2 ounces of oil dripping from a cable end. Channer placed an oil pad under the cable end to contain the spill. The cable end is on the east wall of the structure.Channer reports no sewer. Channer reports he placed oil sample sign #29142 and is in the process of taking samples. UPDATE: 2/02/01 @ 22:16 hrs. Lab Sequence #01-00986 PCB = 166 ppm NOTE: Manhole ID on lab report indicates M43996. As per the Chem Lab this number was taken from the Chain of Custody form. I called Richard Channer the Finder of the Incident to verify the manhole number. He checked his records and reported that the correct manhole number is M43976. This was the manhole no. reported on the hand written e2MIS document. ERT Masood Akbar issued EPA # NYP 004 071 205 UPDATE: 2/05/01 @ 17:35 hrs. Cleanup completed on 2/03/01 on 3 to 11 pm shift as per Feeder Control Rep. Waiting for Supervisor's cleanup report.

MANHOLE 43976 (Continued) **S104952477**

Update: 5/27/05 @ 07:28 hrs Jason Brown # 87629 reports on 5/26/05 at 18:05 hrs manhole inspected today and no oil observed in structure. All cable ends are properly sealed."

Remarks: "2 OUNCES LEAKING FROM A CABLE END - CONTAINED - CASE #135311 SAMPLE TAKEN"

DEC Memo:	"e2mis no. 156916: 01/20/05 04:10 N.Brown#86118, underground splicer found approx. 2 gallons of cable oil leaking from capped cable ends in M10118, which is located on the south side of E.52 st 185' west of Lexington ave. N.Brown#86118 was preinspesting manholes when he found the spill in M10118, he was working under account number #12017 at the time he found the spill. There were no sewers or waterways affected. There is no water in M10118, there is a sump, but no sump pump. A yellow environmental tag numbered #46428 was hung in M10118. There were two samples taken from M10118, one for PCB's and one for

MANHOLE # 10118 (Continued) **S106736936**

oil ID. The samples were marked priority E. The chain of custody form number is #AA27381. N.Brown#86118 placed oil absorbent pads down in M10118, he also said he would seal the leaking cable ends, to stop the leak. The cleanup is pending crews and a tanker. Jan. 20, 2005 Due to Mid-town traffic conditions. Incident has to be de-classified to a regular spill. 1/20/05 11:56 Received lab results, Lab Sequence Number: 05-00533-001 Total PCB <1 PPPM Lab Results 01/20/05 @ 14:01 hrs Lab Sequence Number: 05-00535-001 analysis indicates the presence of a cooking oil. Update: 2/14/05 @ 14:50 hrs. Manhattan Environmental Desk coordinated with Jason Brown #87629, UG Oper. Supervisor to schedule a cleanup in this manhole for 2/11/05. Under 50ppm PCB tanker, Vactor truck and UG crew scheduled. Update: 2/14/05 @ 15:00 hrs. Jason Brown #87629, Operating Supervisor UG South, reported at 16:56 hrs. on 2/11/05 that the cleanup was completed. No solids were removed from the structure. Approx. 2 pints of oil and 2 gallons of water were pumped out of the structure by the Vactor truck. The Tanker arrived on location but was not needed and so it was released. The manhole was double washed with Degreaser (like Slix) . Environmental spill tag #46428 was removed. Cleanup crew consisted of Supervisor: Jason Brown #87629 and Crew: Pat O'Neil #28250, Frank Farrugia #18462 and Paul Trinchese #86144. The leaking cable ends were found capped and sealed. There is no active leak. The cleanup was completed at 16:50 hrs. on 2/11/05. The lab results indicate the presence of a cooking oil change this to a Third Party Spill...non-company material discovered on/in Con Ed Facility...amount of has been changed to reflect 2 pints versus 2 gallons and Dielectric has been changed to Oil (unknown type)...report modified. 2/23/2005 @ 22:302hours"

Remarks: "NO TO 5 QUESTIONS: TOOK TWO SAMPLES: CLEAN UP IS PENDING CREWS AND A TANKER: CONED # 156916"

DEC Memo:	"10/23/06 - See e-docs for Con Ed report detailing cleanup and closure. Prior to Sept, 2004 data translation this spill Lead_DEC Field was ~~~~~~~~~~~~~~~~~~~ e2mis no. 155613: I&A mechanic found approx. 4 gallons of unknown oil and 80 gallons of water in V6224. There is a sump pump that is off and unplugged in V6224. There were three samples taken from V6224, one for PCB'S, one for oil ID, and one for Flashpoint. The samples are marked priority E. The chain of custody form is #DD12979. There was no initial cleanup action was taken. The cleanup is pending I&A investigation, lab results and possible feeder deenergization. 10/1 @ 0103 Lab Sequence Number: 04-07855-001 TOTAL PCB 28 ppm Lab Sequence Number: 04-07854-001 Analysis indicates the presence of a transformer oil. Lab Sequence Number: 04-07855-002 Flash Point, PMCC > 140 deg F 01/20/05 06:15 G.Byrne#81264, of Cable Dept., notified the control center on 01/20/05 at 06:00hrs. to report the cleanup in V6224 was completed. This was a final cleanup. There was no solids removed and no drums or barrels used. There was liquids removed, G.Byrnes#81264 did not know how much, Via Vactor truck. The method used to clean was double washed with Slix. The transformer in V6224 was removed and a new one was installed. The cleanup was completed on 01/20/05 at 04:30hrs."
Remarks:	"MATERIAL IS MIXED WITH 80 GALLONS OF WATER. NO TO 5 QUESTIONS. THIS IS A TRANSFORMER VAULT, UNKNOWN AT THIS TMIE IF THE TRANSFORMER IS INVOLVED. CON ED #155613"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "03/25/10-Vought-Duty desk officer. Called and spoke to Mr. Lara (917) 709-3317 fax:718-378-4560 and spill is under a Food Emporium and there is a 10000-gallon UST complete buried UST with access via manhole in floor. Oil was observed dripping out of wall in boiler that is leaking from fill line from tank room into boiler room. Fill line also runs underground and was never replaced. Eastmond on site and excavated out a portion of the line and observed free product coming into the excavation. Additional excavation is needed but storage units need to be emptied prior. 2600 gallons in tank currently and Lewis will have tank tightness tested immediately. Vapors in basement only and being mitigated via plastic and ventilation fans. Owner as per PBS #2-600915 is: Gramercy Park Condominiums 300 West 55th Street Suite 25 New York, NY 10019 Attn: Steven Hoffman Ph:(212)247-4975x305 Fax:(212) 262-6335 Vought called Steven Hoffman and noted below requirements and also sent him CSL with one month due date and same requirements. DEC requires to date:

GRAMERCY PARK CONDOMINIUM (Continued) **U001329643**

1)Tightness testing of UST. 2)Collection of endpoint samples. 3)cc to Rene Lewis 3/26/10 - Raphael Ketani. I made an unannounced site visit. There was an Eastmond vacuum truck on site and it was sucking up the oil from the tank. I met the super., Hector Diaz (347) 387-5458. He agreed to show me the tank room/locker room where the spill had occurred. Before I went to the basement, I used my PID meter to measure the oil vapors. The vapors were noticeable, but not strong. The meter registered 1550 ppb in the entranceway to the condo building. At the elevators nearby, the reading was as high as 330 ppb. I told Mr. Diaz to have Eastmond move the truck away from the entrance way so that the vapors don't come into the building when the doorman opens and closes the door. He said that he will have this done. He told one of the Eastmond site supervisors to move the truck and it was backed away from the entrance. Next, we went to the basement. The vapors in the inner hallway to the basement were as high as 2800 ppb. There was a definite draft coming from the outside and going through the open door and towards the elevator banks and the laundry room. I told Mr. Diaz to close the door separating the inner hallway from the laundry room and the elevators. He did this and the draft subsided a little. Then we entered the tank room (see E-docs). Eight workers were there. The dust was everywhere in the air from the soil digging. I could see black soil where the fuel pipe had leaked. The vapors in the room were 33 ppm. Only one worker had a mask and it had filters for dust, not vapors. I saw the piece of the fuel pipe with the hole in it. I told Mr. Diaz about the high vapor reading and he said that this was partly due to the tank, itself, being open. He said that Eastmond was going to inspect and cleanout the tank. After this, we went to the boiler room. There were noticeable odors in the boiler room. It was warm, almost to the point of being hot. I could see black streaks on the far wall which separates the boiler room from the tank room. The oil had seeped through the wall, but there was very little oil on the floor. The PID meter registered 11.3 ppm. I told Mr. Diaz about the vapor reading. He said that there was a very large overhead fan in the room that sucks air and feeds it to the boilers. I saw the fan and it was running. I told Mr. Diaz to close the boiler room door and to contain the vapors so that the fan can suck them into the boilers. He did this. Soon, Renee Louis of Eastmond arrived. I told Mr. Louis and Mr. Diaz to bring in some large commercial fans to suck the vapors out of the tank room and the inner hallway and to blow them out the back freight door to the building. They said they would do this. Mr. Diaz brought out a large (maybe 2.5' diameter) floor fan and turned it on. Mr. Louis went outside to get more large fans. There was still a noticeable draft in the inner hallway. I saw an open door just inside the hallway next to the freight door. It looked like it lead to a sub-basement. I told Mr. Diaz to close this door, too. He did and the draft almost ceased. I went back to the mainentrance and the elevators in the lobby. The entrance vapors were now about 150 ppb and the elevator shaft vapors were from 20 ppb to about 130 ppb. The oil odors were almost not noticeable in the lobby. I told Mr. Diaz and Mr. Louis that I would return soon to check the vapors. I told Mr. Louis to send me the tank test report. He said that he will. Mr. Diaz and Mr. Louis assured me that once the tank was cleaned out, the oil vapors will cease. After this, I left. 4/7/10 - Raphael Ketani. I made an unannounced site visit and met the handyman for the building, Patrick Corcoran. He said that Mr. Diaz wasn't able to be here because he was in the hospital. I measured the vapor concentrations

GRAMERCY PARK CONDOMINIUM (Continued) **U001329643**

in the lobby with the PID meter. The values were zero. However, when I put the meter next to the elevator shafts, the readings jumped to 1140 ppb and then to 0 ppb, and then wildly between the two values, but mostly near zero ppb. We went to the basement and the reading in front of the elevators was about 479 ppb, but, again, the meter readings were jumping wildly. I noticed that the maintenance crew had the garbage storage and handling area doors open and that there was a moderate odor of garbage. We entered the boiler room. There was a moderate oil odor, but the air was warm and stagnant. I noticed that the 6 small seeps on the back wall had not been cleaned up. However, they were dry. Mr. Corcoran stated that they hadn't been cleaned up as the remediation crew from Eastmond wasn't finished digging out the contaminated soil. The meter reading was more consistent and varied between 340 ppb to 430 ppb. Next, we went to the storage locker area. The door was locked, but Mr. Corcoran let me in. I saw that there was no one inside digging. The meter reading was about 370 ppb to about 450 ppb. The end of the tank had been exposed and there was a large earthen pit between the tank and the common wall for the storage room and the tank room. I could see a little oil staining, but the odors in the room were light to moderate. It didn't look like there was much more to dig, if anything. After this, I checked the vapors in the basement hallway, which were about zero ppb, and left the site. 5/24/10 - Raphael Ketani. I tried to contact Rene Louis of A.L. Eastmond (718) 378-3000, x111 regarding progress at the site, but could only leave a message. 5/26/10 - Raphael Ketani. I spoke to Mr. Louis. He said that the project hasn't ended and has become more serious. He said that they haven't stopped digging since the spill was first reported. He said that they are digging at the head of the tank. They reached the bottom of the tank and found that the tank is resting on wooden railroad ties. Everytime they remove a tie or more soil, more #6 oil comes bubbling up. He said that they have a mix of oil and water. The area that has been excavated at the head of the tank is so large, Mr. Louis said, that you can fit a 2,000 gal. tank inside. He said that they now have structural concerns because so much soil was removed. Mr. Louis wants to install recovery wells to collect the oil and water and fill up the old tank with cement. He said that he will suck up as much oil and water as he can. He asked whether I can come down and see the site. I said that I could and we set up an appointment for tomorrow at 12:30PM. 5/27/10 - Raphael Ketani. The meeting took place as scheduled. I met Mr. Louis (718) 378-3000 and Mr. Diaz at the site. We went down to the basement. There were no odors in the area of the laundry room and the elevator bank. The PID meter registered 900 ppb of vapors at the closed door to the tank room. Once inside, the meter eventually registered 35 ppm of vapors. The air inside the room was very warm. I asked Mr. Louis whether the vapors were always so high in the room. He said that the door had been closed for 3 days as his crew hadn't been working there. He added that when they are there, they set up several large fans for ventilation. A trench had been dug around the north and east sides of the tank. The trench was from 7 to 8 feet deep. A boulder glacial till soil was exposed in the walls of the trench. It was not possible to get close enough to sample the till to determine how well held together it was, but it looked dense. Black oil was floating on top of the water in the trench. I could see a railroad tie in the trench. Mr. Louis said that the tank was tested and found to be tight, but the vent pipe and the fuel pipe couldn't pass the tests. He said that there were 3 options. The first was to replace the vent

GRAMERCY PARK CONDOMINIUM (Continued) **U001329643**

pipe and the fuel pipe and reconnect them to the tank. However, the fiberglass covering was already coming off of the tank and the tank was 46 years old. Mr. Louis believed that it was only a matter of time before the tank would have a large oil spill due to corrosion. The next option would be to remove the tank in order to get to the oil and contaminated soil around it. However, that would mean manually installing shoring to hold back the soil that the tank was protecting. The shoring would preclude collection of the oil and the removal of any more soil, not to mention that there would be a question regarding the stability of the soil and the safety of the building. The last option, the one that Mr. Louis favors, is to leave the tank in place to hold up the soil and to drill holes in the bottom or install wells through the bottom in order to collect as much oil as possible. I told Mr. Louis to discuss the options with the owners of the building and to get back to me. I added that if there are structural issues regarding removing the tank, then he should get an engineer to look at the tank and the soil surrounding it. The DEC would need a letter signed by a structural engineer indicating why the tank can't be removed in order to get to the rest of the contaminated soil and the free product. Mr. Louis said that he will talk to the owners of the building and get back to me. After this, the meeting ended. 6/22/10 - Raphael Ketani. I received a call from Andrew Zimmerman of Howard Zimmerman Architects. He said that his company was hired to investigate the structural issues regarding the tank and submit a report to the DEC. He asked for my mailing address and I gave it to him. 6/29/10 - Raphael Ketani. Yesterday, I received a letter dated 6/24/10 from Mr. Zimmerman stating what was observed when he inspected the tank at the site. In the letter, he made the recommendation to leave the tank in place for structural reasons. I contacted Rene Louis of A.L. Eastmond (718) 378-3000/cell (917) 299-9302 and told him that the letter was fine and to construct the oil recovery piping as soon as possible. I added that the DEC should receive a report regarding the amount of oil recovered. I asked Mr. Louis to collect as much oil as possible. He said that he will and that the tank will be filled with cement after the collection pipes are installed. 12/6/10 - Raphael Ketani. I tried to contact Mr. Louis(347) 585-2986, but could only leave a message. I spoke to Steven Hoffman (212) 247-4975, ext 305 of Hoffman Management. I told him that the DEC never received the cleanup/closure report. He said that the cleanup and report were A.L. Eastmond's responsibility. He will call Eastmond and have them send the report. I spoke to Lizette Hernandez of Eastmond (cell (917) 299-7257). She said that the soil end point samples were taken. She expected the results in about two weeks. The excavated areas were backfilled. The oil recovery wells were installed. She will send a man to the site to see how much oil is present to collect. She will let me know what the entire situation is in about two weeks. 2/1/11 - Raphael Ketani. Joe Lombardi, Operations Manager for Anchor Tank Lines (718) 932-9075, ext 246, called. He said that a resident of the condominium was suing his company through Liberty Mutual. The resident was claiming that his belongings that were in one of the lockers above the tank were damaged by the spill. Mr. Lombardi wanted to know the details of the spill event and what was discovered about the fuel system. I read some of the notes to him. He said he understood that a rusted fuel line had failed. After this, the conversation ended. 3/14/11 - Raphael Ketani. I spoke to Ms. Hernandez cell (917) 299-7257. She said that they have installed the

GRAMERCY PARK CONDOMINIUM (Continued) **U001329643**

new oil tank, but they can't fill it until they get permission. Oil is still being collected from the old tank. Eastmond was there twice already. However, they are not collecting much. Ms. Hernandez will send the DEC some reports regarding the oil collection tomorrow. 6/7/11 - Raphael Ketani. I tried to contact Ms. Hernandez (917) 299-7257 regarding progress at the site and submission of the status report of cleanup report, but I could only leave a message. 6/8/11 - Raphael Ketani. I spoke to Ms. Hernandez regarding progress at the site. She said that the building was still using the old tank for oil collection. So it could not be abandoned. She added that they have completed the new tank. I asked Ms. Hernandez whether the wells and the old tank had collected more oil. She said that they haven't seen any oil for a while. I told her that sounded good and to proceed with the abandonment. 7/27/11 - Raphael Ketani. Ms. Hernandez (917) 299-7257 called and requested more time for submission of the closure report. I gave her until 8/12/11 to send the DEC the report. 8/12/11 - Raphael Ketani. Ms. Hernandez had left Eastmond. So I was directed to Mike Hummel of Eastmond (718) 378-3000. He said that Neal Tomasetti was handling the spill report requests. He gave my request to him, but could not tell me when I would receive the closure report. Later, Mr. Tomasetti called me. He said that he should be able to send me the closure report sometime next week. He added that he knows this job and can explain the details on paper. 9/13/11 - Raphael Ketani. I tried to contact Mr. Tomasetti (718) 378-3000 regarding the closure report, but I could only leave a message. Mr. Tomasetti called me back. He said that he hadn't forgotten about the spill case. However, the previous Eastmond case manager had left the information for the site investigation in many places. So he is still trying to put it all together. He has ordered copies of the disposal manifests from the contaminated soil acceptance facility. Once he has the manifests, then he can put the report together and send it to the DEC. 10/20/11 - Raphael Ketani. I spoke to Mr. Tomasetti. He said that he hadn't forgotten about sending the DEC the investigation and cleanup reports. However, he said, he is the only one who knows what to do, and he is getting more spill cases all of the time and he is also trying to run his company and make money. He said that he will try to send the reports sometime next week. 11/17/11 - Raphael Ketani. Mr. Tomasetti sent me the remediation report dated 11/17/11. A tank removal affidavit was included and indicated that the old UST was filled with slurry on 5/29/11. There were sets of soil analytical data. A soil sample was taken on 4/20/10 in order to characterize the contaminated soil which was being disposed of. There were a number of very high analyte hits. On 7/26/11, six soil endpoint samples were taken. The results were virtually non-detect. Based upon the information in the 11/17/11 remediation report and the information in the case file and database, I have determined that the residual contamination is not a threat to the public or the environment. Therefore, I closed the spill case today. "

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"e2mis no 159597 T. Conway 14691, discovered 4 gallons of dielectric fluid on 5 gallons of water in V-3054. He stated, possible leak from transformer. Feeder 25M44. Acct. H3435. No sewer/waterways affected. Cause is unknown. Oil filled equipment in structure; yes. Standing water; yes. no sewer connection. No visual water movement. No sump pump in structure. No cracks. Environmental tag# 24713. 2-samples taken 1-pcb and 1-oil id 07/18/05 10:05 Lab Sequence Number: 05-06545-001 TOTAL PCB 44 ppm 07/18/05 10:10 Lab Sequence Number: 05-06546-001 Analysis indicates the presence of a substance similar to a dielectric fluid. 07/18/05 12:01 Update : M.Tamez#88368, I&A Supervisor, notified the control center on 07/18/05 at 11:55hrs. to report a partial cleanup in V3054 that was done 07/08/05. M.Tamez#88368 states that 2 bags of oil absorb were placed in V3054, and the final cleanup is pending Transformer removal. The partial cleanup was completed on 07/08/05 at 11:00hrs. 08/14/05 15:05 T.Lynch#10878, I&A, notified the control center on 08/14/05 at 15:00hrs. to report that the transformer in V3054 was drainned and disconnected. There was 475 gallons of dielectric fluid drainned from the unit in V3054. The final cleanup is pending the transformer removal. 8/14 @ 19:05 Hulzer # 39723 of I&A reported to me that the Final cleanup completed 8/14 @ 18:30. All liquid wate was removed by the Vactoe truck. The structure was triple-washed with Simple Green . Environmentasl tag # 24713 was removed. The spill was remediated by the installation of a new Transformer unit."
Remarks:	"ON 5 GALLONS OF WATER: FEEDER 25F44 OR A TRANSFORMER STILL INVESTIGATING: CONTAINED: NO TO 5 QUESTIONS: CONED # 159597"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS NOTES 144877 NOTE:: THIS INCIDENT IS BEING PUT IN @ 05:05 ON 9/6/2002 BECAUSE THE SYSTEM WENT DOWN . Spoke to CIG, A Morris @ 03:13 HRS. On 9/6 @ 02:40 R Jenkins reported to me that attempting to Flush M-50263 he noticied approx 1 pound of an unknown substance on the west side of the structure. There is no water in the strucutre. Sewer/waterway being affected cannot be determined at this time. There is a sump and there is a sewer connection according to Conduit plate # 28-i-1. No injuries and no weather contributed. No private proprty was affected. The floor of the structure is concrete. Environmental tag # 37329 was hung. No sample was taken at this time due to a rodent condition in the structure. The Contractor El Toro was called to the scene and arrived @ approx 04:30 HRS. Sample will be taken after corporate procedure on time limit is reached for entering a structure after application of pest chemicals. Chain of Custody will be made out and cleanup will be scheduled. UPDATE: 00:45 hrs 09/07/02 R.Jenkins #56929 flush dept. Reported to W.Lee #33243 mcc. Substance is a unknown oil type Took two sample one for pcb & one for oil id. Chain of custody id #CC06597. Update 9-7-02 @ 09:20 Lab Sequence Number: 02-08350-001 PCB 3ppm Update 9-7-02 @ 17:14 Lab Sequence Number: 02-08355-001 Analysis indicates the presence of a substance similar to a dielectric fluid. UPDATE 09/07/02 20:15 HRS A.Meragliouolo #16106 ogs ug reported that cleanup was completed at 20:00 hrs. Remove one barrel of ppe. Remove tag #37329. Double wash with bio-gen and flush manhole with vactor truck. Cleanup Supv: A.Smeragliouolo #16106 Cleanup persons. S.Merkl #17249, J.Joseph #86109, A.Saladeen #16648, A.Muller #05384 vactor operation. "

DEC Memo: "e2mis no. 158437: 5/5/05 13:15 hrs. Nat Brown #86118, UG South, reported at 12:57 hrs. that he found at 12:40 hrs. approx. 1 gallon of unknown oil on top of approx. 150 gallons of water in manhole M50259. He found the oil on top of the water in the concrete strcuture. He tried to diaper up the oil, but could not. The source and cause of the spill is unknown. There is oil filled equipment in the structure -- primary cables. There is also secondary cables. There is standing water but no visual water movement. There is no sewer connection as per Conduit Plate 28-I-1. A concrete sump cannot be verified. Environmental spill tag #46429 was installed. Two liquid samples for PCB & Oil ID were taken from the spill by Nat Brown #86118 on a priority E basis. Chain of Custody #EE04639 was issued. Initial cleanup action was taken by Mr. Brown by putting down absorbent pads. He could not diaper up the oil. Update 5-5-05 @ 20:21 Lab Sequence Number: 05-04184-001 - analysis indicates the presence of asphalt. 5/6/05 07:50 After speaking with A. Munro Underground/Cleanup supervisor it was reported that the cleanup is in progress. PCB Analysis by EPA 608/8082

---------- Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082

------- Update: 5/9/05 @ 17:39 hrs. Al Munro #13615, UG South Operating Supervisor, reported at 11:53 hrs. on 5/6/05 that the cleanup was completed. Two (2) barrels of solid waste consisting of oily sludge, dirt, debris and PPE was generated and removed. 595 gallons of oil and water mix were removed from the manhole by the Corpaorate Tanker. The walls & floor of the manhole were double washed and rinsed by the Vactor truck. Slix was used as the cleaning agent. Environmental tag #46429 was not removed since the PCB sample results were not received yet. Cleanup crew consisted of Supervisor - Al Munro #13615 and Crew - Nat Brown #86118, Ambro Chirelli #00519 and Sean Walsh #02623. Mr. Munro was asked if there was any visible sign of the source of the spill. He stated that he believes the source was possibly oil and asphalt dumped into the manhole when the street was re-paved. The cleanup was completed at 11:40 hrs. on 5/6/05. The PCB lab results were posted at 13:11 hrs. on 5/6/05 and the supervisor was notified. Al Munro #13615, UG South Oper. Supervisor, reported at 13:35 hrs. on 5/6/05 that the tag was removed. R. Pellegrino #38620 Closed. 7-12-05. George Breen "

DEC Memo:	"11/10/06 - Raphael Ketani. I spoke to Scott Sarnell (347) 203-6886 of the FDNY HAZMAT 1. He said that it was a truck driver who had a saddle tank leak on the street and the driver poured water on it to wash the diesel fuel away. The driver didn't stick around and drove off before HAZMAT could arrive on the scene. He said that he didn't think much went down the sewer drain. He added that HAZMAT cleaned up the spill and the NYC DOS was called to put down sand. Based upon the information above, I am closing the spill case. 12/1/06 - Raphael Ketani. I received a note from Sharif Rahman, Spills Region 2, that FDNY Chief Ed Berganini (212) 360-4485 called regarding a drum that was filled and in front of a police precinct. Mr. Rahman said that it was part of this spill case. I told Mr. Rahman that I will contact Chief Berganini. I tried calling Chief Berganini, but instead got Chief Naglieri. He explained to me that he was getting calls about a sealed drum that was sitting in front of a police precinct. He asked

ON SIDEWALK (Continued) **S108297022**

who takes drums with oil away. I told him that DEC does. He said he was sure this was at 866 3rd Avenue in Manhattan. I told him that we will add it to our drum run list and pick it up. Based upon the information above, I am reopening the spill case and reassigning it to Sharif Rahman who is in charge of the drum run. 01/04/07 Rahman-Drums were found on 01/03/07 in front of that address.Removed the waste oil, put 'Empty' stickers on the drums and NYC Sanitation was notified to pick up the empty drums. Spill closed. "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"11/10/06 - Raphael Ketani. I spoke to Dave Duke of the Con Ed Environmental Group (212) 580-8383. He said that, originally, the NYFD called Con Ed at 7:42AM. The FDNY thought that Con Ed facilities were impacted. However, a Con Ed inspection crew found that their facilities were not impacted. The spill is either diesel fuel or heating oil. The spill occurred only on the street. The area covered is 52 Street from Lexington Avenue to Third Avenue and Third Avenue from 52 Street to 53 Street. The NYFD put down absorbent. The FDNY contacted the NYC DOS and left it to the DOS to clean up. Mr. Duke said that the DOS has been mobilized. His crew told him that no catch basins were affected. He added that the initial spill location was listed as 866 Third Avenue. There are cars parked along 52 Street and so the clean up will be hampered by this. I could not find a PBS case listed for 866 Third Avenue. This is the SAME SPILL as the one in case #0609194. This spill case was closed out. Based upon this information I am closing the case."
Remarks:	"CLEANUP IS IN PROGRESS: THIS IS A THIRD PARTY SPILL THAT WAS REPORTED TO CONED BY FDNY TO CONTROL CENTER AND THEN TO CONED CENTRAL OFFICE:"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

DEC Memo:	"Sangesland - Sidewalk transformer had an Arc fire caused by ice on the lines. There was a sudden flash fire that self extinguished . Loss of 40 gal of transformer oil into contained vault. Oil had historical PCB levels of 10ppb, so Con Ed will clean it up with the assumption of 50-500ppb. Unit is out of service and will be repaired over this weekend. 6/16/10 - Austin - Unit had blown a bushing and a door, from the electrical explosion - Spill contained and cleaned up by Con Ed - See eDocs for further information - Spill closed - end "
Remarks:	"TRANSFORMER ON FIRE - ALL CONTAINED IN VAULT WITH 300 GAL OF WATER MIXED IN - CLEANUP PENDING"

DEC Memo:	"11/30/15 - Obligado - Desk Duty - I called Kelly at JM Trucking. She said it was a tank overfill, 10 to 15 gallons came out of the vent. Clean up is complete. No soil impact. Spill to sidewalk. She will email me pictures of the clean up. PBS # 2-282634 Site has 1 14,000 gal AST, in subterranean vault with access. 12/2/15 - Obligado - I called Kelly to request the photos again 12/3/15 - Obligado - I received photodocumentation of the clean up. Spill closed."
Remarks:	"defective gauge or incorrect tank size caused loss to soil/pavement. C/u in progress"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 145-246: Brenseke # 05729 I&A reported to me that while checking switches in V-1371 he discovered approx 20 gal dielectric transformer oil and 300 gal water in the structure. No sewer/waterway was affected, no injuries, no weather contributed, no fire/smoke was involved. NO private property was affected.The Unit was found below mimimum . The source of the spill was the transformer and the cause was corrosion. There is no movement on the standing water, there is a sewer connection, but the pump was off and the oil is contained. Environmental tag # 17495 was hung. Two samples for PCB and ID will be taken and the courier is to be called. Chain of Custody # AA 03935 is to be used. No initial cleanup action is being taken at this time. 1/20/04 Spilled material contained 35 ppm PCBs and was similar to dielectric fluid. The transformer was replaced and cleanup completed on 10/19/02."

Remarks: "20 gollons on 300 gallons water. pending sample. "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BEAR STEARNS WORLD HEADQUARTERS (Continued) **1007786808**

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

MARRIOT EAST HOTEL (Continued) **S105994931**

DER Facility ID: 113401
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 1/16/2002 - Sangesland spoke with John Kaub (212-715-4277) who is a facilities person at the Marriot Hotel. He said he noticed an oil smell this afternoon and looked in the containment room. There was a small spill of oil (about 2 gallons) coming out of a small hole near the bottom of the tank. Mr. Kaub called Petroleum Tank Cleaners. PTC responded and cleaned the 2 gallon spill and laid out speedie dry to absorb the continued drip. Marriot management is working out hiring someone to drain the tank ASAP and then they will determine if they repair or replace the tank. According to DEC PBS records, the tank holds #2 oil, is 15,000 gallons and was installed in 1978."

DEC Memo:	"e2mis # 153528 L.Leardi found approx.1 pint of transformer oil in V5197; he noticed a broken bushing leaking oil. There was no fire or smoke involved. There were no sewers or waterways affected. There is no sewer connection or sump in V5197. There is a drain in V5197, but L.Leardi#13625 said the spill is not near it. There are no visible substantial cracks in V5197. Ther were two samples taken, one for PCBs and one for ID. L.Leardi#13625 poured oil absobent powder on the spill. The cleanup is pending the unit will need to be drained & disconnected. Lab Sequence Number: 04-03985-001: PCBs < 1 ppm

VAULT # 5197 (Continued) **S106469349**

Incident #: 153528 Location: 120 East 50th St - V-5197 - this spill was cleaned on 5/26/04 at 5:00 hrs. After Astoria Shops repaired the cause of the spill - a leaking secondary bushing - the spill was cleaned. The vault was double washed with Slix and the spill tag was removed. The clean-up crew consisted of: Supervisor: Roman (27270), Crew: Lennon (14727) and Stack (88760). Spill tag was removed."

Remarks: "DEFECTIVE BUSHING ON THE TRANSFORMER CAUSED 1 PINT OF TRANSFORMER OIL TO SPILL INSIDE OF VAULT #5197. CLEAN-UP PENDING. NO SMOKE FIRE SEWERS OR WATERWAYS INVOLVED. REF# 153528"

DEC Memo:	"05/03/07 - See e-docs for Con Ed report detailing cleanup and closure. 159670. On 7/11/05 at 13:07 L. Roman I&A supervisor called to report that while on location on a spill for an adjacent vault he found oil in vault 4007. He states that there is 1 gallon on the floor that came from this transformer and 2 gallons in the sump that has come form the adjacent vault v-3994. These vaults are located at 129 E. 49 St. He is working on acct # 80484. He says the oil is coming from a bottom leak & will condemn the transformer. This unit is on feeder 24M74. There was no sewers or waterways affected as of now. He will check the trap to verify. No smoke or fire. No Private property affected. No injuries were related to the spill. He will take 3 samples for pcb from the floor, the sump & the transformer itself. The chain of custody # EE-08766. He hung a tag # 44754. 7/11/05 13:37 CIG M. Piropato # 18699 was notified R. Bruns # 21106 "

DEC Memo:	"156775. On 1/4 @ 12:30 L Roman # 27270 of I&A reported to me that while at 16 E 47 st in V-1677 he discovered a Dielectric leak of approx 1 pint from the Transformer unit and 100 gallons of water in the structure. He was working on Feeder 25M51. No sewer/watrerways affected, no private property affected, no fire/smoke involved, no injuries and weather did not contribute. The source and cause of the spil is a FIN on the Transformer. There is no movement on the standing water, No sewer connection, there is a concrete sump, but the drain is clogged. There are no substantial cracks. The Unit will need to be taken off line (out of service) to start the Cleanup. Environemntal tag # 17567 was hung. Two samples for PCB and ID will be taken. The Chain of Custody # DD 15231 will be used. The Finder will call the courier and will give him the Order Release # O-146-04-00003. Account # F3246. Logger R Pagano # 48703 1/4 @ 13:05. Notified CIG, spoke to Elliott # 81653 @ 13:03. Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"01/06/09-Hiralkumar Patel. spoke with Warren Robateau, building super. site has one 5000 gal #2 oil AST in contact with floor. Warren mentioned that oil spilled from fill line. last oil delivery was for 3000 gal on 01/02/09. he also mentioned that there is stain on wall where fill line enters into tank room. currently tank room has about 2 inches of oil/water inside tank room. no odors inside building. management company has hired cleanup company. Warren measured 2882 gal in tank this morning. PBS #: 2-197718. 146 East 49th Street Owners **property owner** c/o Carlton Management **property management** 87-47 Merengo Street Holliswood, NY 11423 Attn.: Steve Schwinder **property manager** Ph. (516) 609-8200 Ext. 11 01/07/08-Zhune spoke to Sheila from Property management (516 609-8200. She said there are people working there. PTC and ABC Tank are coming. 01/07/08-Zhune spoke to Steven Schwinder (516)609-8200, cell (917)747-5866 (Property manager). He said we are working on it. We are waiting for price. A CSL was sent to: 138 Glenwood Rd. Glenwood Landing NY 11547 Att: Steven Schwinder 01/07/08 Steven called to say that PTC has been hired to do the clean up. 01/07/08 Mark from PTC called to say that they get the approval to do the cleanup at 146 east 49th St. They are going to be pumping oil today and will continue with the cleanup tomorrow. 05/15/09-PTC sent the closure report dated 05/13/09. The report included a cover letter, copy of the disposal manifest for the drums, a disposal receipt for the liquid, a site plan and some photographs after the cleanup. The letter stated that on 06 January 2009 an oil delivery of #4 fuel oil was made to this building. After the delivery the building's superintendant checked the boiler and tank room and noticed oil on the floor. It is estimated that there was about 100 gallons of the #4 oil on the ground. The fill line was found to have a separation that caused the spill. The fill line is from the curb in a small tuunel that at one time served as a coal chute. The tuunel acted as secondary containment and prevented any oil from impacting the soil. It runs from the curbs, runs under the sidewalk, enters the tank room and is connected to the top of the 5000 gallon storage tank in the basement. The fill line was replaced without the need to performed any excavation of the sidewalk. The interior surface of the coal chute were cleaned and the materials on the floor was vacuumed into a vacuum truck and legally disposal. The solid materail was placed into drums for disposal. After all the solid material was removed and as much liquid as possible removed, the floor was pressure washed. The liquid from this operation was also collected into a vacuum truck for legal disposal. The floor turned to be a solid concrete surface free of any cracks or voids. For this reason, no samples were taken. The spilled was #4 fuel oil, not #2 oil as noted on the DEC website. Spill closed "
Remarks:	"Caller states a line failure caused fuel to spill into the dirt floor. Spill was just discovered and process is ongoing."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no. 156464: On 12/4 at 23:10 D Smith # 74905 of FOD reported he discovered at 134-40 e 49 st approx 50 gallons of an unknown oil in the Vault. No sewer/waterway affected. The source and the cause are unknown. The spill was in the concrete structure. No substantial cracks were observed. Saw no sump pump, heard no motor. Environmental tag # 41324 was hung. Two samples for PCB and ID will be taken. Chain of Custody form # CC 19991 will be used. Account # 42224. Cleanup will commence when conditions are safe and Unit is pressure tested to see if Transformer is defective and Feeder will need to be taken out of service. 12/5 @ 01:30 As reported before this is not a TM . It is a Vault - V-2733 12/05/04 09:30 Lab Sequence Number: 04-10067-001 MATRIX: OIL GRAB TOTAL PCB 8 ppm Update: 12/6/04 As per discussion with Rob Pettenato today, the I&A pressure tested the transformer on Sunday, 12/5/04. The transformer failed the test and was condemned. At 12:30 hrs. on 12/5/04 the I&A was preparing to Live-end cap (LEC) the transformer for isolation and to restore the feeder. The transformer has been liveend capped and is ready for a partial cleanup. 12/7/04 17:58 L. Roman # 27270 I&A supervisor called to report that at this time a partial cleanup was done. The tanker

VAULT 2733 (Continued) **S106735943**

removed 60 gallons of water/oil from floor and 276 gallons of oil from the unit. The vault was washed with Bio-Gen. & flush truck rinsed down. The flush truck removed all solids. The cleanup crew was: J. Lusardi # 11287, A. Perrin # 18138. The final cleanup to be done when unit is removed. 1/29 @ 17:00 Guglielmetti # 38952 of cable rreported to me that the cleanup wa complete at 16:40. All liquid and solid waste was removed by the Vactor Truck. The structure was double-washed with SLIX:. Environmental tag # 41324 was removed. The spill has been remediated by the installation of a new Transformer unit. Crew....Lewis # 17814....Gallagher # 61749. 7/6/05 Received lab results 12/5/04 16:56 Lab Sequence Number: 04-10073-001 MATRIX: WATER&OIL GRAB Analysis indicates the presence of a transformer oil."

Remarks: "NO SEWERS OR WATERWAYS AFFECTED. SPILL IS CONTAINED TO THE VAULT. CLEAN UP IS PENDING."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is

209 E 51ST ST BUILDING (Continued) **1016118980**

used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"5/7/07- DEC Piper performed site visit with ECO Bush due to anaonymous complaint stating oil was leaking onto floor in boiler. Upon inspection, it was observed that oil existed along bottom of tank vault of 3K #4 oil tank. Speedy dry was down. Staining was observed approx 2' above grade indicating there may be a large quantity of oil in the vaulted area. The vault is filled w. fill debris so may have to create hole on bottom to access underneath. An investigation is warranted. CSL sent to Hamne Colon 400 Madison Ave New York, NY 10017-1909 fax 212 527 2358 csl resent 3 25 08 via mail and fax. ********** ********** Macklowe Management 767 5TH Ave Fl 21 New York NY 10153-0023 Community Newco, Inc. Joseph Walpole 212-755-3123 ********** ********** 7/10/08- DEC Piper spoke w. Joe. Proposal is being drawn up. 11/6/08- DEC Piper received and reviewed closure report. AST was removed, solid concrete floor that was cleaned and painted. Soils in intersticial space between vault and tank were cont and removed. Closed. See e-docs if warranted."
Remarks:	"exact cause is unknown may have been caused by someone opening a valve spill has been cleaned by callers company tank is in a concrete enclosure chris tomasello from dec did talk to caller about this spill "

NOT REQUIRED, WY 99999
Owner/operator country: US
Owner/operator telephone: (212) 555-1212
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2006
Site name: CON EDISON - MADISON AVENUE
Classification: Not a generator, verified

Date form received by agency: 07/08/1999
Site name: CON EDISON - MADISON AVENUE
Classification: Not a generator, verified

Date form received by agency: 03/23/1987
Site name: CON EDISON - MADISON AVENUE
Classification: Large Quantity Generator

. Waste code: X002
. Waste name: POLYCHLORINATED BIPHENOLS (PCBs)

Violation Status: No violations found

FINDS:

CON EDISON - MADISON AVENUE (Continued) **1000111676**

Registry ID: 110004413858

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no 159658 R Allen # 10800 reports that while locating a fault on feeder 29m72 in v3994 located at 129-41 e 49 st, he discovered 100 gallons of transformer oil had leaked from the transformer onto the concrete floor and walls of the structuree. No indication of sewer or waterway being affected. No measuring device was used to determine the amount of the spill. Source of spill is the transformer and the cause is equipmnet failure. There is oil filled equipment in the structure (the transformer). Environmental yellow tag # 44352 was applied. Sewer connection not verified. No substantial cracks observed. 1 liquid sample was taken from the spill by R Allen # 10800 for pcb. A lab sample from 11-1-04 of lab sequence # 0409239009 indicates 13 ppm pcb. Cleanup is pending crews and most likely transformer removal. July 11, 2005 11:41. Supervisor L. Roman reported to T. Hayne mcc. that the transformer oil from V-3994 migrated into the adjoining throught a weep hole. V-4007, 29M74. No amount was given. 1 sample will be taken for pcb. Logger: T. Haynes Lab Sequence Number: 05-06811-001. TOTAL PCB 15 ppm. Logger: T. Haynes 82326 Update 7-12-05 @ 05:40. R Stiles # 03740 reports that the cleanup is complete as of 05:30. Double washed with citrus clean and flushed. 100 gallons of oil removed by tanker. The transformer which was the cause of the spill was removed and a new one installed. Tag # 44352 removed. Cleanup people are listed in the event involved person screen. J Moran # 01182 Update: 7/13/05 @ 18:36 hrs. Additional cleanup info: As reported by R. Stiles #03740 on 7/12/05 @ 05:40 hrs. one bag of solid debris (PPE) was generated and removed. The tanker removed 100 gal of oil. The vault was double washed with Citrus Cleaner and rinsed with the Vactor truck. Cleanup Supervisor: R. Stiles #03740 and Crew: W. Holder #85940, C. Platt #13218 and G. Rosario #11464. The cleanup was completed at 05:30 hrs. on 7/12/05. Note: Environmental Desk changed the responsible party from I&A North to I&A South since this vault is the responsibility of I&A South. R. Pellegrino #38620. Closed. 9-16-05. GB. "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of

ROOSEVELT HOTEL (Continued) **1016097315**

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

EPA Region: 02
Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:
Owner/operator name: MELVIN KAUFMAN
Owner/operator address: THIRD AVE
NEW YORK, NY 10017
Owner/operator country: US
Owner/operator telephone: (212) 758-0437
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 06/01/1845
Owner/Op end date: Not reported

Owner/operator name: GLEN DIBIASE
Owner/operator address: Not reported
Not reported
Owner/operator country: Not reported
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 09/01/1845
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002

SAGE REALTY (Continued) **1000912455**

. Waste name: CORROSIVE WASTE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Historical Generators:

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 148748: 15 gallons of an unknown oil mixed with 100 gallons of water on the concrete floor of the structure. There is a drain in the floor but it is clogged. Sewer connection could not be verified, structure does not show up on conduit plate. Oil absorbent pads were placed on the spill as initial cleanup action. Cleanup to start as soon as resources are available. D Pontecorvo # 85413 reports that he re-calculated the amount of the oil spill to 5 gallons. He also stated that he is going to ask cig to request an ivestigation from the dep industrial waste hotline, due to the fact that the oil seems to have been dumped into the vault, (possibly from a nearby restaraunt). He also agrees with the initial report that the oil is possibly cooking oil. Lab Sequence Number: 03-04979-001 Insufficient amount of sample extracted to perform oil identification. Lab Sequence Number: 03-04980-001 PCB <1 ppm 6/21/03 21:10 R. Bracco # 12609 of the I&A called to report that the cleanup was completed at 18:30. The structure was double washed with degreaser. The flush truck removed all debris & liquid."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL CON ED E2MIS NOTES Approx. 2 gals. of unknown fluid on approx. 60 gals. of water. Fluid is contained to the vault did not enter any sewers or waterways. Structure has a sump pump and sewer connection, on arrival found pump disconnected. There are no cracks in structure. Two samples taken and sign #25438 hung. 5-11-99 Final cleanup on 5-10-99 @18:00hrs. Used Astoria <50ppm tanker to remove liquid from vault. Used Flush truck to flush vault after Astoria tanker complete. In accordiane with I&A OS P. Renzulli, this job was completed using a hard copy dated in Feburary from E2MIS incident #123221. The hard copy showed the pill was <49ppm. However, final sample result were not yet received from this job at time of final cleanup. The I&A discovered this at 5-11-99. 5-11-99 09:15 While I & A planner A. Johnson #81226 was updaing spill that occured in V3686, it was discovered that PCB sample results were not yet recieved. This was verified with the I&A OS involved in the job. The identification sample results posted stated that there was not enough of a sample to identify. 5-11-99 Chem Lab stated that the lab sequence number for the PCB analysis would be 99-04779, the results wer not yet posted and within a half an hour the Chem Lab could tell us when the sample would be posted. 5-11-99 09:30 Astoria Transp., tanker might be on way to Bklyn, hw willtry to catch it before it gets there and put the tanker on hold. 5-11-99 09:35 Flush advised us that the truck that flushed the spill location was #60533. The truck dumped it's load from last night this morning at approx. 08:30 in the W 28 St. WOL PCB pit. They will contact driver of the truck an put the truck on hold

CON EDISON MANHOLE #8595 (Continued) **S104506706**

in W. 28th St. yard. 5-11-99 09:40 Pump and waste treatment facility at W 28th St. WOL shut down. 5-11-99 09:45 Called Chem Lab for status on ext.4123- was told that the chain of custody requests only a 4 day turn around, not an emergency turn-around. I&A Planner explained circumstances and requested an excalation to immediate results. 5-11-99 09:50 Chem Lab supervisor, Lima Jones contacted and agreed to escalate sample results. 09: 55 Astoria tanker is on hold in Astoria until sample results received. 10:05 No further notification required at this time. We need to page him back as soon as sample results are recieved. He verified the waste treatment facility was shut down as soon as the lack of a official hard copy was discovered. 14:00 Chem Lab results recieved.Lab Seq#99-04779 Aroclor, none PCB <1ppm 5-11-99 14:10 All involved departments and managers listed in this note were advised of sample results. Hold was taken off flush pit, waste treatment plant, flush truck, and Astoria tanker."

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ e2mis 140500 @ 21:10 hrs R.Muccio #18771 fod reportrd to M.Gallagher #57624 at 21:17 hrs. he found 1 qt dielectric fliud and 20 gal of water in v0565. No fire, no sewer/waterway affected. No substantial cracks, no sump pump running, cause of spill unknown; took two sample - one for oil id and one for pcb; hung sign #29632. UPDATE 12/6 @ 11:30 HRS Spoke to Luis Roman of I & A and on his info of this being a bottom leak; I de-classified this incident from a 24-hour deminimus to Spill-Dielectric; Transformer and Unit needs to be drained. Lab results for Lab sequence # 01-11576-001 TOTAL PCB 10 ppm. Lab results for Lab sequence # 01-11577-001 Analysis indicates

VAULT #0565 (Continued) **S105236457**

the presence of a substance similar to a dielectric fluid. UPdate on 12/07/01 F.Roman reported that the transformer was drained. UPDATE: 2/11/02 Ed Hulser #39723, Cable Dept., reported at 08:11 hrs. on 2/11/02 that the cleanup of vault V0565 was completed on 1/21/02 at 10:00 hrs. The vault walls & floor were doubled washed with Bio-Gen solution and rinsed with the Flush's vactor truck. One quart of dielectric fluid and 20 gallons of water were removed. No solids were removed except one bag of PPE. Spill tag #29632 was removed."

Remarks: "1 pt spilled on 20 gals of water con ed #140500 transformer must be drained and replaced - pas 24 hr clean up"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

230 PARK AVE BLDG (Continued) **1016117912**

redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
