Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"155310 Employee reports he found approx. 1 gallon of an unknown oil and 20 gallons of water in M43883, which is located at the N/E/C of e. 42 st and 3 ave. There was no fire or smoke involved and no sewers or waterways affected. The source and cause of the spill is unknown. The water in M43883 is standing and no sump is visible. There are no substantial cracks in M43883. A yellow environmental tag will be hung in M438, Three samples are being taken; PCB, OIL ID and Flashpoint. All will be marked priorty E. C.Pettway #15204 tried to diaper up the spill, but nothing would stick to the pads. Lab Sequence Number: 04-07241-001: PCBs < 1 ppm Lab Sequence Number: 04-07241-002: Flash Point, PMCC > 140 deg F Lab Sequence Number: 04-07242-001: Analysis indicates the presence of a substance similar to a lubricating oil. 9/13 & 05:37 Turiano informed me that the tanker removed approx 1600 gallons of mixed liquids from the structure and the Vactor truck removed another 200 gallons. The cleanup is now approximatly half complete. At this point in time I am making the determination to change the status of this incident to a reportable Spill-unknown oil . The reasons were unforseen delays concerning safety working conditions. The job has resumed but it will complete on the next shift. 9/14 @ 04:10 Spoke to Seleski # 20525 of UG at 03:55 and he informed me that the cleanup has completed at 03:00. (2) drums of solid waste was removed containing debris, PPE's and used diapers. The tanker removed 300 gasllons of mixed liquids. The structure was double-washed with SLIX . The Environmental tag # 38776 was removed."
Remarks:	"1 gallons of unknown on 20 gallons of water in manhole. Due to some unforeseen delay cleanup is still pending - will be cleaned up no earlier than noon. Ref. 155310 "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS NOTES 144731 R Allen #10800 discovered 100 gallons of an unknown oil in v5673. Transformer is on feeder # 4m64. Source and cause are unknown. Spill is on the concrete floor of the structure. There is oil filled equiptment in the structure (transformer). 2 lquid samples taken from the spill, 1 for id and 1 for pcb. J Liguori #14084 was notified and responded to this incident - he reports that it appears that the drain in the structure is clogged. He also requsted feeder 4m64 off the system due to condemning the transformer. lab sequence # 02-07985-001 PCB 15 ppm UPDATE 27-AUG-02 @ 2130 hrs. I&A Dept. Reports that a partial was done in V5673. And that the tanker removed approx 375 gallons of oil and water Mix. And also drained unit. Final clean up is pending the removal of defective unit. 9-13-02 @ 03:30 V Mirance #58484 reports that the cleanup is complete as of 0:0. Double washed with slix and flushed. The transformer was removed prior to the final cleanup."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL DEC INSPECTOR'S NOTES Arrived on site @2:30pm location is in center lane of 42nd. St. approx. 25' west of Lexington Ave. Oil is contained to this structure- oil level is below conduits, and adjacent structures are clean. Oil visibly appears to be dielectric cable oil. However there is no transformer feeder or transformer in structure, only distribution cables. Due to location on busy street in front of Grand Central Station, cleanup will begin on midnight shift. Samples were taken for PCB & Oil ID. Once structure has been cleaned the will be able to investigate the source. 5-10-01 0445hrs. Copy of notes to ECO Duty Officer. 5-17-01 Voice mail update from Lou First. Oil/water pumped out, total water 200gals. total oil 25-50gals. Found blown joint andcut cables in MH PCB count 28ppm. Measurement origanny made in sump- actual thickness was less than 1 of oil. CON ED E2MIS REPORT 5-16-01 1,000gals. of unknown oil found at the C/O E. 42St. 30'W/O Lexington Ave. in MH 56570. No water in the structure, all oil. No sewer connection as per conduit plate 26-j-2. Took 2 samples 1 for oil ID and 1 for PCB. Aroclor 1254 ; <27.8ppm Analysis indictes a substance similar to dielectric fluid. 3:00am Tanker has removed approx. 250gals.of fluids, 220water & 25-30gals. of oil. The problem with the original estimate was that when the oil probe was put into the manhole it went into the sump that is directly below the opening. This gave the appearance that there was a considerably larger amount of oil. In reality there was only about two inches of fluid in the hole. They found a joint that had been cut out on the floor and the six cable ends uncapped. They were capping these ends, removing the old joint and cleaning the hole. 0900hrs. Approx. 40gals.of oil and approx. 250gals. of water ws pumped out of the MH. Underground crews are presently cleaning the manhole. They expect to be completed during the day shift. 1030hrs. As of 10:15am cleanup is complete. Manhole was washed twice with slix cleaning agent, 3 cable joints washed and removed to 28th St. yard."
Remarks:	"1000 gals oil found in manhole. con ed states they have no oil based machinery in manhole. con ed 137-120. clean up crews enroute upon availability"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT Con Ed e2mis #120505: 10/14/98 10:20 o.s k.marks(80976) reports while checking open network protector in v3486 f/o 144 e.43rd st found 16 ounces of unknown oil ontop of 5 gallons of water. no entry into the sewer or waterway. product appears to be brown/muddy.. found by p.lennon(14727) at 09:30 hrs... sample taken and tag#1356 installed. cleanup pending results. v3486 is a oil filled unit.. i&a checking same. If this is a Con Edison manhole it contains electrical cable and splices. Many manholes have a sealed sump in the floor which is used to allow runoff when pumping the structure. A hose is place in this sump and water on the floor will flow into the sump allowing the floor to be cleaned. If cleaned prior to analysis of the fluid, the structure will be cleaned as >50 PPM and all liquid and waste will be manifested accordingly. The structure will be double washed with a degreaser, i.e. Slix. All cleaning material and PPE will also be treated as >50. If any sludge is found within a manhole

40 GAL UNKNOWN OIL IN VAULT 3499 (Continued) **S104505905**

it is treated as lead contaminated and manifested accordingly. The spill identification tag will remain secured to the structure until the analysis is completed and if <500 PPM the signage will be removed. If the analysis is >499 PPM, a grid will be prepared for wipe testing the area. Until the analysis of the wipes are proven to be <10ugs/100cme2 all additional waste produced from the structure will be treated as the original analysis. If this spill occurred in a transformer vault containing a sump pump and there was a possible release, the drainpipe trap will be dismantled to determine if oil was released. Sludge found in a vault, through historical analysis, has been determined not to contain lead. PCB = 13PPM, Lab sequence Number 98-11082 dated 10/16/98. 11/17/98 Ray Browne, I&A OS, reports unit was drained and disconnected on 10/20/98 by I&A OS L. Roman and I&A Crew M. Wiggins. Unit drained by Astoria tanker <50PPM. Unit is pending removal. However, there is scaffolding over vault and therefore, unit cannot be removed until scaffold is removed. Job pending FER."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

CON EDISON (Continued) **1014818865**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was HINTON/SANGESLAND 9/18/2001 Sangesland spoke to Jim Simori (212-867-2120) He has a contractor who completed a Closure Report for the spill and he wanted to know what the correct process was to close the spill out. Sangesland told him to submit the report, color photos of the clean site along with a coverletter requesting that the spill be closed out. Overfill onto basement floor and vent line to sidewalk. 10/26/2001 - Spill was reviewed and closed out by Michael Hinton (DEC region #9) while he spent 1 week in NYC helping after WTC incident. According to a copy of a work report prepared by Eastmond & Sons Boiler Repair Inc., on 1/4/01 Eastmond was called to the site by Stuyvesant Fuel. Tank had been overfilled. 30 to 40 gallons spilled on the sidewalk. Speedie Dry was laid on the sidewalk and then it was pressure washed. Water/oil was vaccumed up. Eastmond provided a waste manifest for everything removed. Eastmond also provided color photos of the sidewalk and basement to confirm the cleanup. "
Remarks:	"SUPERINTENDANT GAVE INACCURATE READING TO DRIVER. SUPER CLAIMED TANK WAS EMPTY AND TANK WAS NOT. EASTMAN ENROUTE TO CLEAN UP SPILL. PHOTOS AND CLEAN-UP REPORT SUBMITTED - SPILL CLEANED AND CLOSED - R. AUSTIN"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS NOTES: 12/14/2001 4:47 HOURS: 4 OZ. OF DIELECTRIC FLUID LEAKING FROM AN UNKNOWN FEEDER JOINT. HOLE VISIBLE IB THE FEEDER JOINT. NO SEWER CONNECTIONS. SAMPLE TAKEN FOR PCB. THERE IS A POSSIBILITY THAT THIS IS AN OLD DEAD FEEDER CABLE FROM WHAT THE DUCT DRAWINGS SHOW. PCB RESULTS: 1254, 952 PPM. INCIDENT RECLASSIFIED FROM A DEMINIMUS TO SPILL-DIELECTRIC DISTRIBUTION FEEDER. AFTER THE MANHOLE IS CLEANED, WIPE SAMPLES WILL BE REQUIRED BY THE CHEM LAB. 12-14-2001: 9:34 HOURS. CLEANUP IS COMPLETED. DOUBLE WASHED THE STRUCTURE WITH SLIXX AND FLUSHED. WIPE SAMPLES WILL BE NECCESARY TO CLOSE THE SPILL. 12/15/2001: 07:00 HOURS. CHEM LAB IN LOCATION TO TAKE SAMPLES. 12/18/2001: PCB RESULTS 6. 1254 >268, 1260 >194 fAILED 7. 1254, 222.2 FAILED 8. 1254=12.5, 1260=2.9 9. 1254=740.3 FAILED 20. 1254=11 FAILED 22. 1254=19.1 FAILED 23. 1254=11.8 FAILED 24. 1254=1914.5 FAILED 25. 1254=125.8 FAILED THESE POINTS THAT FAILED WILL HAVE TO BE CLENED AGAIN. E2MIS 07-MAY-2003 11:41:22 Page 4 of 12 UPDATE: Environmental Desk made arrangements for the manhole to be re-cleaned, specifically the test points that failed the analysis. The cleanup was scheduled for 15:00 hrs. on 12/18/01. Underground crews, Over 50 Tanker and flush truck ordered. R. Pellegrino #38620 Update: 12/18/01 U.G Supv. M.Baratta reports that clean up is complete in m-38626 at this time 21:hrs And that also Chem Lab is on location to take wipe samples. Tanker truck took on approx. 300 gallons of oil & waste water. Flush truck power washed twice , and also wased twice with slix. Clean up crew is posted in EVENT INVOLVED PERSON site. Lgger F.Curtis #38078 UPDATE: 12/20/01 Lab Sequence #01-11998-001 Date Approved: 12/20/01 @ 13:51 hrs. Date Received: 12/19/01 Date Sampled: 12/18/01 PCB Analysis: Test Point # Aroclor PCB Results (in ug/100 cm^2) 6 1254 2.7 = 3 (ok) 7 1254 1.3 = 1 (ok) 8 1254 2.6 = 3 (ok) 9 1254 3.6 = 4 (ok) 20 1254 1.5 = 2 (ok) 22 1254 3.3 = 3 (ok) 23 1254 2.1 = 2 (ok) 24 None < 1.0 25 None < 1.0 - All points have met the wipe analysis criteria of 10 or less ug/100 cm^2 and have passed. The manhole is considered clean. An underground crew will bemdispatched to remove the environmental spill tag. UPDATE: 2/01/02 Pending removal of environmental tag and Over 500 ppm Cleanup Checklist to be prepared and signed by the supervisor in charge of the cleanup. UPDATE: 2/7/02 Mike Baratta, Underground Supervisor, reported on 2/06/02 at 14:30 hrs. that environmental spill tag number 33318 was removed on 12/22/01 at 20:00 hrs. This incident is pending the Over 500 ppm Cleanup Checklist to be prepared and signed by the supervisor in charge of the cleanup. "
Remarks:	"4 oz leaked into 100 gals of eater from a leaking feeder joint con ed #140594 - sample results were 952 ppm (@11:30am) - later on the spill date(21:00) - initial clean up was complete - on 12/15 - at 15:00 - 25 post cleanup wipe samples were taken and on 12/18 @ 08:06 the wipe sample results were posted and 9 samples failed - area will be re-cleaned - no fire/smoke"

DEC Memo: "CSL sent to: John Witty The Durst Organization 1155 Ave of Americas NY NY 10036 They have found an 800 gal ast behind a wall. they are going to overexcavated and collect samples. will send report at later time. 9/25/07- DEC Piper recieved tan kclosure report. The 800 gal tankwas rmeoved along with500 gal of fuel in tank. Additionally 23 tons of soil was removed of and disposed of. Endpoint sampling of excavation revealed no VOC's over TAGM and slight exceedances in SVOC's, which may be related to fill material since construction debris was encountered in excavation. Based on efforts to date, this spill is closed. See e-docs if warranted."

Remarks: "CONTAMINATED SOIL AT ABOVE ADDRESS"

DEC Memo:	"05/19/08 - See eDocs for Con Ed report detailing cleanup and closure. 207136. see eDocs 7/30/07 - Austin - On afternoon of 7/18/07, I received initial reports of a pipe explosion in midtown Manhattn via news reports. I monitored such reports for details of the event, and also spoke with Amar Nagi and RD Suzane Mattei. For DER/Spills, I formulated a plan to have staff check nearby PBS facilities and remediation sites for any disruptions/damage to tanks/pipes/remediation systems, once the area was reoccupied. On 7/19/07, I received a request to have personnel deployed to the scene of the event to act as a DEC relay for information and regulatory inquiries. Dispatched staff (Krimgold) to Command Post on E43 St. to assist in comms from event site, and had Jeff Vought act as office contact to relay requests and info to and from Jake Krimgold. Once the issues were identified for DEC's involvement (waste transport and disposal, material waste analysis and sampling, air monitoring for suspended particulate), DER went back to the original assignemt of checking and ascertaining the condition of the three PBS sites in the immediate vicinity of the explosion(#2-317616 @ 369 Lexington Ave., #2-601831 @ 425 Lexington Ave., and #2-610296 @ 450 Lexington Ave.) All three were apparently unfazed by the impact of the explosion. No remedial systems were installed/oiperating in the immediate vicinity. On 7/26/07, participated in RD debreifing regarding chronology and response to this event by DEC. - end 08/07/07-Vought-Notes entered for spill as per DEC Austin. In morning of 7/19/07 DEC Vought and DEC Krimgold notified that DEC Emergeny Response center set up and DEC Gilmore is DEC On-scene coordinator. As per Gilmore, EPA sending response team to site. Concerns expressed included possible damage to adjacent PBS sites. DEC involvement being coordindated via DEC Shovelin and DEC Milstry. Also presenet at DEC center was DEC McDonald, DEC Krimgold, DEC Southwell, DEC Brezner, DEC Lieblich, DEC Nagi and DEC Mattei. DEC Krimgold will perform site visit to Command Center to obtain more information and return call to Vought to covey info to DEC Gilmore. Vought received call back from Krimgold who attended 1pm meeting at Command Center and as per Command, all debris will be treated at ACM (asbestos containing material) and will be handled and disposed of accordingly. As per DEC O'Connell no tranformers were involved in explosion. Also as per Krimgold, FDNY will hose down buildings and ConEd will collect washwater for disposal. As per DEC Lieblich, DEC air monitoring stations show no impact but are also not monitored for asbestos. Vought received callback from DEC Krimgold at 2pm and debris sampling was completed and asbestos was found less than 0.5% but material will be treated as ACM nonetheless. Also as per Krimgold, 3rd avenue will be reopened and materials removed will be bagged and disposal location still unknown. Next meeting at Command Center scheduled for 3:30pm. DEC Mattei expressed concern over who is transporter, are they permitted

STEAM PIPE RUPTURE WITH ASBESTOS (Continued) **S108762794**

and location of disposal. Soil being removed by Asbestos Transportation Corp. ECO Komanchek and ECO Matteri arrived at command center and ECO Komanchek will go to site to ensure Part 364 compliance. Decision made later by NYCDEP to allow washwater to enter sewers and DEC Southwell notified. DEC Brezner to handle all disposal issues as per DEC Gilmore and DEC Lieblich to handle any air concerns. Seach of adjacent spill site and adjacent PBS sites show no adjacent spill sites and only one adjacent PBS site. Vought called all PBS sites as per DEC Austin and no problems observed with ASTs and USTs. "

Remarks: "underground explosion poss asbestos realease netween 41 and 42 street-CON ED cleanhjup ending-spill not assigned. 207136"

DEC Memo:	"e2mis no 159420 Peter Sepulveda discovered 1 qt. of unknown oil in the structure. On top of 200 gallons of water. No sewer/waterways affected. Substance is unknown Source/cause is unknown. Standing water; yes. Sewer connection and concrete sump not verified. No visual water movement. Environmental tag #42793 was hung. Chain of custody #ee05092. two samples taken. Lab Sequence Number: 05-06166-001 - TOTAL PCB: 62 ppm Oil Identification - no oil extracted from sample for analysis. June 26,2005 @ 08:10 clean-up is still continuing. There is a lot more work to be done. Structure is filled w/debris. INSERT 7/7/05. Closure of this incident was pending a signed >50 PCB Cleanup Checklist. R. Pellegrino #38620. Update: 7/6/05 @ 11:05 hrs. PCB Spill Cleanup checklist faxed to environmental desk on 7/6/05 and correction to above cleanup activity per the following e-mail: Regarding the clean-up my crews performed on 6/26/05 at E.39th Street & Madison Avenue (e2mis 159420), the cleaner simple green was NOT used. This was due to a miscommunication between myself and the EH&S desk. The cleaner we did use on this job was BG-Solv 760. Please correct the e2mis report to reflect this information. UPDATE: 07/07/05. This manhole was cleaned as 50 to 499 ppm PCB's. The signed over 50 cleanup checklist was received from EH&S Project Specialist, Anthony Drummings. This incident can be closed. R. Pellegrino #38620. Closed. 8-31-05. GB"
Remarks:	"1 quart of unknown oil on 200 gallons of water. Cleanup being done at this time. Con Ed ref 159420"

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

NIPPON PAINT CORP (Continued) **1004566481**

has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: "03/06/13 Rec'd Investigation Summary report prepared by TRC. Three 600 gallon USTs were removed along with associated pipings.USTs were used for fueling rental cars.The surrounding properties are occupied by high rise residential and commercial structures.The tanks were found to be in good condition,free of pitting and perforations.Underground fill and vent pipes were removed along with dispenser, dispenser pans.Petroleum contamination observed in the pea gravel bedding below the USTs and on the ground water in the excavation.The standing water level was observed to be approx 4 ft below the top of the basement slab.The pea gravel bedding material was removed from the excavation for disposal.During excavation activities, approx 13,000 gallons of ground water were pumped out. Following excavation, neither a petroleum sheen nor separate phase liquid were observed on groundwater in the excavation.Bed rock present immediately below the tank excavation.Therefore, it was not possible to collect post excavation soil samples for lab analysis.A ground water sample was collected for analysis from the tank excavation.VOCs in ground water, Benzene 6.6 ug/l, Toluene 21 ug/L,Napthalene 16 ug/l,Xylenes 78 ug/L. Application of ORC is proposed by TRC.One 2 monitoring well will be installed in the excavation.(sr) 1/14/14: Mahat A spill closure report was received from Mr. Charles Guder (TRC Companines Inc.)requesting to review the case with an appeal for closure. Spill is transfered to DEC Mahat as per DEC Demeo. Report is under review at the moment. 1/15/14: Mahat A phone call was received from Mr. Dan Warren (Project Manager @ 917.232.9837) inquiring the status of the case review. 1/22/14: Mahat A complete case review on the spill has been performed. 2/1/13: On February 1, 2013, during UST removal, olfactory indications of petroleum contamination were observed in the pea gravel bedding below the USTs. Visual indications of petroleum contamination were observed in the groundwater in the excavation as well. NYSDEC was notified and Spill Case No. 12- 15225 was assigned. Additionally, bituminous waterproofing material was observed directly beneath the basement floor slab. 3/1/13: TRC s subcontractor, Brookside Environmental, Inc. (Brookside), completed removal of the three (3)USTs during January and February 2013. TRC maintained a full-time inspector on-Site during performance of the work. A Petroleum Bulk Storage (PBS) Notification for Tank Closure was submitted to NYSDEC by TRC and Brookside submitted a tank closure affidavit to New York City Fire Department(FDNY). A PBS registration change notification documenting the closure has been submitted to the NYSDEC by ABG. 3/19/13: On March 19, 2013, TRC advanced six (6) borings around the vicinity of the UST excavation to confirm the presence of bedrock beneath the basement floor slab.Results of analysis of the soil sample indicate that naphthalene was the only VOC.Naphthalene is a common constituent of bituminous waterproofing. Considering that naphthalene was the only petroleum-related compound detected in soil, the detected concentration of naphthalene in soil is attributable to the building waterproofing and not a gasoline release from historic fueling operations. Conclusions and Recommendations Based on the existing environmental conditions of the Site and the findings of the QHHEA, the following can be concluded: 1. The sources of historic petroleum impacts to soil and groundwater at the Site [three (3)

AVIS RENT A CAR SYSTEM INC. (Continued) **1007205113**

600-gallon gasoline USTs and associated piping and appurtenances] have been removed from the Site. 2. Bedrock is present either immediately below, or within one (1) foot of, the basement floor slab.There are no contaminants of concern in soil at the Site. 3. The results of analyses of groundwater samples collected from monitoring well TRC-MW-2 indicate residual gasoline-related VOCs are present at concentrations marginally above drinking water standards. However, there are no complete exposure pathways for petroleum-impacted groundwater at the Site. Therefore, exposure to petroleum-related VOCs in groundwater is not a concern at the Site. Based on these conclusions, no further groundwater sampling, investigation or remedial action is recommended. TRC respectfully requests NYSDEC approval for no further action (i.e., no further investigation or remedial actions) and closure of NYSDEC Spill Case 12-15225. 2/4/14: Mahat A call was received from Mr. Warren inquiring the status of the case status. 3/12/14: Mahat Entire report(edocs) from both Environmental consultant (PR and AP) has been reviewd. Based on the report, the Department will not conduct any further investigation on the site. The Department decided to close the spill, however the level of contamination is little above TOGS standard. Spill closure letter is sent to the property manager."

Remarks: "Caller advised found contamination in the process of removal of tanks. Clean up is pending."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of

AVIS RENT A CAR SYSTEM INC. (Continued) **1016062740**

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"L Roman # 27270 Operating Supervisor Manhattan I&A reported to N Muldoon # 18723 that @ 0:45 hrs M Pina # 11652 also of the I&A reported to him that while inspecting Vault 4638 located at F/O 354 Lexington Ave (40 -41 St) discovered approx 1 gallon of unknown oil (possible cooking oil) on top of 200 gallons of water. No private properties affected. The source and cause of the spill are unknown. There was no fire or smoke involved. There were no injuries related to the spill. There was no evidence of release to sewer or waterways as per Mr Roman. Weather conditions did not contribute to the hazard of the spill. There is oil filled equipment in the structure the transformer. There is standing water but no visual movement. A sewer connection, concrete sump and any substantial cracks could not be verified. No sump pump running. Spill tag # 17465 was installed Two liquid samples were taken one for OIL ID and one for PCB on a

V4638 (Continued) **S106018398**

priority E basis. Chain of Custody # BB06626 was used. Account # 80484 is also used. Cleanup pending lab results and will try to get an over 50 tanker as soon as possible so I & A can see if there is a leak on the unit or it is cooking oil. This incident meets the criteria of a 24 Hr spill. Note: There is a scaffolding over the vault. No parking anytime. Logger: N Muldoon #18723 Update 9-23-03 @ 18:25 S Brenseke # 05729 reports that a partial cleanup is complete , final cleanup is pending transformer removal. 250 gallons of oil and water mixed removed. Speedy dry applied , drain is clogged. Transformer is leaking from the fin and S Brenseke #05729 stated that he will request the transfomer ooe-2. Cleanup crew and supervisor are listed in the event involved person screen. Incident is being re-classified from a 24 hour deminimis spill to a spilldielectrictransformer. J Moran #01182 Lab Sequence Number: 03-07877-001 Analysis indicates the presence of a substance similar to a dielectric fluid. Lab Sequence Number: 03-07876-001 TOTAL PCB 17 ppm Update: Clean up complete as of 05/04/04 @ 05:00 hrs Reports V.Mirance 58484 O.S., and that flush truck removed approx. 55 gallons of mud,oil & water mix. V4638 was washed twice with slix,no barrels used,tag 17465 pulled. Old unit removed and was the source of the spill & new unit installed"

Remarks: "transformer oil and water mixed - total 250 gals - unk how much of each involved - removed 150465"

CON EDISON MANHOLE 43883 (Continued) **1015747042**

Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 03/27/2012

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"9-30-04 @ 17:50 V Vales #15638 reports that he discovered 5 gallons of transformer oil mixed with 15 gallons of water on the concrete floor and on the side of transformer. No sewer or waterway affeceted. Leak is possibly coming from the ground handle on the transformer. Drain in structure is clogged. Source of spill is the transformer and the cause is a leak. No substantial cracks. 1 sample will be taken for pcb. 10/1 @ 04:25 Lab Sequence Number: 04-07862-001 TOTAL PCB 37 ppm @ 08:30 A partial clean-up was done. 1 drum of soilds and 300 gal. of oil & water mixed was removed. A vactor and tanker was used. Unit was double washed w/slix. Tranf. was not removed or repaired. Source of spill; Leaking from ground handle. diapers were placed to absorb the oil. Jan 19, 2005 @ 04:30 clean-up was completed. Unit was double-washed w /slix. No soilds were removed. A small amount of water was removed with vactor truck. Transformer was removed and installed. Source of spill; transformer."
Remarks:	"MATERIAL IS MIXED WITH 15 GALLONS OF WATER. TRANSFORMER BROKE. CON ED #155617"

DEC Memo:	"159614. July 07, 2005. @ 11:00 Flush Supervisor R. Carty reported to T. Haynes 82326 that 1 pint of insulatum was discovered in mh-56581 E Lexington Av 47' NNC 40 St. The insulatum was splattered on the walls and floor of the concrete structure. Clean-up will begin at 15:00 today. Acct. F3243. Spill was discovered at 10:40. No fire/smoke involved. No sewer/waterways affected. No injuries related to the spill. Weather condition did not contribute to the spill. Source/cause, blown joint. No private property affected. No standing water. Sewer connection not verified. No concrete sump. No cracks in structure. Environmental tag# 428225 Chain of custody #ee02172 1-sample taken for pcb. Sent priority E. 7/7/05 20:24 Received lab results, Lab Sequence Number: 05-06589-001 MATRIX: OIL GRAB Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082 --- ---------- 7/7/05 21:30 This spill is being changed from deminimus to spill dielectric fluid due to crew will be spicing on another 43M feeder which is on the same network. The cleanup will start on 7/8/05. July 8, 2005 @ 13:46 Supervisor Jason Brown reported to T. Haynes clean-up was completed at 13:30. Vactor truck on location, removed a small amount of water and mud. Structure was scrumb down with safe wash (solution). Environmental tag #48225 was removed. See clean-up crew on people involved screen. Source of spill; was a blown lead joint, in which, was removed yesterday. A new joint was made. "
Remarks:	"1 PINT OF INSULATUM WAS SPILLED. NONE RECOVERED. NO TO FIVE QUESTIONS. 159614"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS 147480 On 3/12/03 at 10:40 J. Rodriguez # 82289 Field operator found a spill of unknown oil. He states that in manhole-56217 he found 1 gallon of oil & 3 gallons of water. He does

MH 56217 (Continued) **S106012149**

not know the cause or source of the spill. He states that there is black top over the sump & no sump pump. Lab Sequence Number: 03-02048-001 TOTAL PCB 1349 ppm. 3/13/03 Neal McGowan from clean harbors reports that the cleanup is complete as of 05:00. Triple washed with citrus clean. 5 barrels of debris and ppe generated from the cleanup. 545 gallons of oil and water mixed removed. Environmental yellow tag #36391 will stay in place pending passing wipe sample results. 3/25/03 Lab Sequence #03-02108-001 9 of 19 wipe samples fail cleanup criteria of 10 ug/100cm2. 3/26/03 N.Mc Gowan of Clean Harbors called to report that M-56217 was re-cleaned. And reports that 3 barrels of mud, and 3 barrels of water removed from location. Manhole was power washed 3 times with citra-clean,and flushed. Tag remains in manhole until additonal sample wipes are taken. 3/30/03 LSN # 03-02581-001 6 of 9 re-samples still fail cleanup criteria. 4/11/03 Clean Harbors re-cleaned manhole - generated 5 drums of liquids and 3 drums of debris. The manhole was triple rinsed with citrus. 4/23/03 Lab Sequence #03-03275-001 All 9 test points failed. 4/24/03 Clean Harbors re-cleaned manhole. 4 x 55 gallon drums of liquids were removed from the manhole, no solids were removed from the manhole. Manhole was triple washed and rinsed and the center area where the wipe samples came up high was washed again - aquanex was used to clean the manhole. 4/28/03 Lab Sequence #03-03382-001 2 samples failed. 4/30/03 Clean Harbors re-cleaned manhole. 4 x 55 gallon drums of liquids were removed from the manhole, no debris was removed from the manhole. Manhole was triple washed and rinsed - citrus was used to clean the manhole. 5/20/03 while preparing to soda blast the structure to clean up the failed wipe samples they discovered that there is a leaking feeder in the structure which is presumably the cause of the original spill Approx. 1 pint of oil leaked from the cable. 5/21/03 the leaking cable has been repaired. 5/29/03 The cleanup was completed by Con Ed crew. There was 2 barrels of rags, diapers, & ppe generated as the result of the cleanup. An over 50 ppm tanker removed 150 gallons of liquid. The structure was triple washed with slix. 6/5/03 Lab Sequence Number: 03-04694-001 1 of 4 wipe samples failed. 6/9/03 cleanup was completed as of 01:45 by Con Ed crew and the Chem Lab took his sample of the previously failed point in the structure. One drum of solids were removed that contained PPE's and used absorbent diapers. The structure was double-washed with SLIX The tanker took 100 gallons of mixed liquids. 6/9/03 Lab Sequence Number: 03-04778-001 1 0f 4 samples failed. 6/15/03 Manhole re-cleaned. 6/17/03 Lab Sequence #03-04981-001 All wipe samples passed."

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Con Ed e2mis #149134: On 7/7 @ 18:23, Balaguer # 39485 of FOD reported to me that while responding to a situation in M-43864 on FDR 26M50 he observed the Feeder on fire and a blown 3W *1W joint on that feeder. He put out the fire with his fire extinguisher. He noticied a spill which seems like Insulatum. The spill is approx 1 qt. and no water is involved. The location is SEC E. 41 st & Third av. No sewer/waterways were affected, no injuries, weather probably contributed because of the Heat conditions . The source of the spill was the blown jopint and the cause was equipment failure. The spill is spattered over the strucutre and the other cables in the structure. NO private property was affected. There is no standing water, no sewer connections, no substantail cracks observed. Environmental tag # 33492 was hung. Two samples for PCB and ID will be taken and courier called for pickup. The Chain of Custody CC - 19966. No initial cleanup is being taken. 7/7 @ 19:20 This cleanup is scheduled for 7/7/2003 @ 23:00 UPDATE 07/08/03 00:45 hrs. As per Shift Manager J Mejias this cleanup has been cancelled due to Emergency Restoration of the Feeder. Cleanup to be rescheduled. Lab Sequence Number: 03-05622-001 Analysis indicates the presence of a mixture similar to a dielectric fluid and lubricating oil. UPDATE 07/08/03 01:10 hrs Lab Sequence Number: 03-05621-001, 4ppm PCB One barrel of PPE,Rags,& Oil pads removed Washed twice with flush truck, and removed approx 50 gallons of oil & water mix. 8/1/03 0942 The cable ends were capped per Pete O'Brien, Planner Underground South."
Remarks:	"mh 43864 cleanup pending con ed # pending - fire was involved - extingushed"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"2/2/15 - Obligado - I inspected the 801 2nd Ave site. The super showed me the boiler room and the oil tank vault. According to the super, the building uses #4 oil, despite the fact that the registration lists the tank as #6 oil. The tank is a 4000 gal AST. Upon initial inspection of the vault, no oil spills were observed. From the vault access, looking in, the bottom of the tank is not visible, as it is sitting in concrete berm. No oil stains were immediately apparent. However, I was able to slide through around to the other side of the tank and on that site of the tank, oil stains and seepage were evident runnind down the sides of the the tank at the location of the fill pipe. Oil could be seen seeping down the fill pipe. A large area of oil soaked floor was evident on the ground beneath the fill pipe side of the tank. Oil stained soil was observed underneath the tank. There were several oil filled buckets sitting around the back of the UST vault area. There was a wall in between the current tank and the abandoned tank. I was able to climb a ladder to peer down on the abandoned tank. I told the super the DEC would likely require a full tank system test to determine if the tank is actively leaking. Back at the office I spoke with Mr. Lichtman and notified him of the spill and that the Departmetn would require a full tank tightness test. I will send letter with requirements to slichtman01@gmail.com 2/3/15 - Obligado - I returned to the Site with Rob Fergussen. I inspected the tank vault again. This time I noticed their was also staining on the base of the wall of the abandoned tank 2 vault, where oil seeped through the dividing wall and into the Tank 1 area, where presumably a historic spill had migrated through the wall. I also noticed their appeared to be another leaking location of the remote fill line where it runs above the abandoned AST which was dripping down onto the abandoned AST. I also noticed oil staining on the top of the south side of the abandoned Tank 2 AST. I determined the PBS records for this facility are inacurate. The tank #1 is

801 2ND AVE (Continued) **S117535038**

listed as being installed in 2002. I spoke to the Super and he said this same tank has been here as long as he has worked here, for almost 30 years. The tank is also listed as a #6 oil tank. According to the Super, the tank stores #4 oil. Rob Fergussen collected a sample of the oil for potential forensic analysis from a collection bucket below the filter to the oil pump. We also inspected the fill port, which is located on 2nd Ave. 2/4/15 - Obligado - I spoke to Steve Lichman again, he said he is in the process of scheduling a tightness test with Abilene, the boiler company, and he would call me back with the date and time. 2/5/15 - Obligado - I spoke to Mr. Lichman, he said they will probably be testing the tank system this weekend and would have a report to me by Monday. He said he will call me to confirm the exact date and time. 2/6/15 - Obligado - I called Mr. Lichman again, to confirm the date and time of the tightness test. No answer, left message to call back DEC. 2/9/15 - Obligado - I called Steve Lichman 917-685-1107 to inquire about the status of tightness testing. No answer, left message to call DEC. I then called the # listed for Site Owner - (718) 372-4210. This turned out to be phone # for Abilene, Inc. the boiler company, I asked them about the status of the tigntenss test. They will call back. 2/17/15 - Obligado - I received a voice mail from Donna at ABC tank. I called her back. She said the system test was performed on Thursday. She said their was a leak on the fill line at valve above the tank. She said they need to repair/replace the valve and retest the system. They will do that this week. I told her to notify me prior to doing the work. She requested additional time to do the work as they don't have anyone to go their today and the requirments are due today the 17th. I said that was ok. AFter discussion with DEC Vought, I spoke to her again to inquire about more details regarding the specific repair work. They need to repalce the entire valve above the tank. I notified her that I wanted to be there when they do the repair because the DEC will be collecting a sample out of the tank for forensic analysis. She will contact dispatch and notify me when they schedule the repair. 2/18/15 - Obligado - I received an email from Donna. She provided a draft Monthly Inspection Form for use by the owner for inspections going forward. I replied by email that the draft was ok but stressed that the operator needs to be able to access behind the tank in order to do a complete inspection. I also emailed her to clarify as to who did the tightness testing on the 12th and requested a tightness testing report. She said ABC did not do the tightness testing but she would try to get a copy of the report. She also notified me that they woudl be doing the repair on Friday. Donna also provided an updated registry for the PBS records. According to the application, they list the tank install date as 1949. 2/20/15 - Obligado - I visited the site again. Upon arrival, the super showed me to the tank vault. The super asked if I would be collecting a sample. I replied yes. He said ABC tank was not onsite for repairs and he didn't know if they were coming. I inspected the vault. The original valve which appeared to be leaking above the tank was replaced since my last visit. The original globe type valve was replaced with a new brass ball valve. The back of the tank area was apparently cleaned also since my last visit. No oil buckets were present and the floor and tank were partially cleaned. Contaminated soil was still apparent below the tank however and I collected a sample of the contaminated soil for forensic analsyis. Despite the fact that the valve was replaced, the fill line still appeared to be leaking above the valve. The side of the tank still had oil staining,

801 2ND AVE (Continued) **S117535038**

and the new valve had oil staining on it. I noticed that in addition to the new valve, the fill line had been modified, and portions of the line removed/replaced. After 1 hr, ABC did not show up. I called Steve to inquire about the work and left a message. I left the site but shortly after leaving received a call from Donna that ABC has arrived. I returned to the site. Douglas Bartholomew from ABC and one other worker. Douglas inspected the piping above the tank and said that there should not be a valve on the fill pipe. He also noted the valve assembly which was installed was likely leaking above the valve. ABC removed the fill/valve piping assembly. After they removed the piping I collected a sample of the oil in the tank with a bailer for forensic analysis. They continued their repair work and I inspected the AST2 which was abandoned. Heavy oil staining was apparent on the east side of the AST 2 tank indicating historic release. I collected a sample of the oil sludge off the site of the tank for forensic analysis. I left the site and ABC tank continued to do the repair work. 2/23/15 - Obligado - I emailed Donna to inquire about the tank tightness testing. According to Donna they made the necessary repairs to the fill line & are looking to set up the tightness test for Wednesday or Thursday. She also provided a tank tightness test report for the first test. According to the report, the tank passed the tightness test, but the test did not included the fill line. 2/26/15-Obligado- I received a 2nd tightness test report. This report tested the whole system and reported that the system passed. I forwarded the test report to Moses in PBS section. 3/4/15 - Obligado - Recieved delivery confirmation of letter to 43&2nd Property Co LLC. According to USPS website, the letter was delivered on 12/17/15. Due date for the report is and work plan is 30 days from confirmed receipt or 3/19/15. 3/19/15 - No Investigation Report Or Work Plan has been received and this spill has been transferred to the Office of General Counsel for enforcement 4/8/15 - Obligado - I was cc'd on an email from John Urda to Mr. Steve Lichtman with Order on Consent attached. 6/9/15 - Obligado - Urda Sends fully executed Order to RP's attorney. Order signed by VLannon on 6/2/15. 6-9-15 - Obligado - Email from Keith Brodock regarding an upcoming site meeting - I sketched the cross-section of the tank room from the last time I was out there (attached). The #4 fuel oil tank rests fully on the concrete that was poured above the floor (hatched in the sketch). There may be a floor drain in the #6 fuel oil area (not shown on the sketch) last time I was there, it was hard to tell if it was a drain, but the owner has swept the room since then, so we should be able to evaluate it today. 6/9/15 - Obligado - I met Keith Brodock and Steve Lichtman at the site. Upon arrival, it was apparent that both the boiler room and the tank vaults had been cleaned. However, while the AST 1 vault was cleaned, oil staining/contamination was still present underneath the AST1. AST2 had been removed since my last visit, and a hole was broken through the separation wall to provide access for inspection of the AST2 vault floor. Keith and I inspected the floor and found that the floor was completely deteriorated, and it wasn't really apparent whether or not the floor was solid concrete. I was able to dig with the heal of my boot through several areas of the floor and encounter sand below. In 3 of the 4 locations I dug the soil appeared clean. However, in the center of the floor, corresponding with the center of the former tank, I dug down with the heal of my boot and encountered contaminated soil. A handful of the impacted soil was observed to have petroleum odors and was dark grey to black in color. We discussed the potential methods for

801 2ND AVE (Continued) **S117535038**

investigation. Keith stressed that his client prefere to do core/soil borings rather than trenching. I indicated that I would prefer trenching. We also discussed the course of action for AST1. Steve requested to reconsider the need for removal of the tank. Keith suggested angled borings to screen sample beneath the tank. I said the Department may consider borings in lieu of trenching if removal of the tank would cause hardship. I told him I would require 3 borings on each side of the tank. While in the AST1 room I took several photos of the tank bottom. We agreed to discuss the scope of work further. Keith also wanted Steve to have workers do a better job of cleaning the AST2 vault room floor to better assess the condition. 6/9/15 - Obligado - AFter return to office i received an email from Periconi requesting the clock for submission of work plan to start today, since the executed order was signed a week ago, yet they only just received it. I concurred. 6/10/15 - Obligado - I reviwed the 2nd AVe Subway boring logs collected by NYCT to try and estimate the depth of bedrock beneath the Tank Vault. According to the NYCT borings, decomposed bedrock is present at about 10-12 ft below the west sidewalk of 2nd Ave. Review of the geologic information suggests that the AST2 may have been installed directly ontop of the decomposed bedrock. I emailed Keith and provided the cross sections and boring logs. I told him the Department would require a linear trench along the center axis of former AST2. I also reviewed my photo graphs from the prior days visit. The photograph from the AST1 tank bottom revealed areas of severe wear, corrosion and thinning of the steel, and structural and foundation weaknesses. I consulted with Moses in PBS and he concurred that the tank is in extremely bad condition and is susceptible to failure. I sent an email to Steve Lichtman and Keith, cc to Periconi directing that AST1 should be permanently closed and removed to prevent catastrophic failure of the tank. The work plan must have a plan and schedule for the AST removal. 7/8/15 - Obligado - I received an email from Keith indicating that they have reached the actual floor of the #6 tank vault room and he provided pictures. A couple of the pictures showed bedrock protruding above the floor. I scheduled a site visit. 7/9/15 - Obligado - I inspected the site. I met Keith Brodock and Steve Lichtman, as well as Leigh and another person from 801 2nd Ave Company. We inspected the vault room. It appears that apparently 6 to 12 inches of the material which I was previously able to dig my boot through on the prior visit had been removed and the floor had been attempted to be cleaned. Despite the attempt to clean the floor, it was stained black from oil stains. parts of the floor were actually manhattan schist bedrock. It looks as though some areas of manhattan schist may have been covered with cement to provide a level surface for the AST. Both the cement and schist bedrock were stained black from oil historic oil spillage. I broke apart part of the floor with my rock hammer and observed a tarry substance, most likely solidified historic #6 oil. I collected a couple samples for potential forensic analysis. I told steve and keith that the bedrock was obviously impacted by oil. As the surface had now been lowered about 6 to 12 inches, the same oil stain which was apparent on the base of the other side of the dividing wall was now apparent on this side of the dividing wall as well, confirming my prior suspicion that oil at one time had spilled out of the Tank Vault 2 and down into Tank Vault 1. Due to confirmed bedrock impact and the fact that the spill was not contained to the vault, as there was no actual competent floor, I told STeve and Keith that they would need to perform a bedrock

801 2ND AVE (Continued) **S117535038**

investigation, which should be included in the investigation work plan. 7/31/15 - Obligado - I received a request to extend the deadline for the workplan to 8/10/15 due to the RP is having family health issues. I approved the extension. 8/26/15 - Obligado -I reviewed and disapproved the workplan. Among other comments, I required installation of a bedrock monitoring well to determine if product has entered the bedrock fractures. If bedrock monitoring well within the tank room is not feasible, than the Department will require a well in the down dip direction of predominant fracture as identified from nearby geophysical borehole. I required the revised workplan to be submitted within 15 days of receipt of the letter. 10/1/15 - Obligado - Meeting with Integral (Keith Brodock, Alana Carroll), 43 and 2 LLC (Jack Forgash), Jim Periconi, and DEC (Obligado, Vought, Urda). Integral requested not to install well at this time but instead, if bedrock contamination is evident, than to excavate into the bedrock with jackhammer to determine extent of any fracture zones. DEC agreed to postpone well install requirement until after excavation reveals what is beneath both tanks. 10/9/15 - Obligado - Revised workplan submitted 10/14/15 - Obligado - I approves the work plan. According to the plan, If, upon complete excavation of the slab, petroleum migration in to bedrock fractures is evident, the DEC will be notified and provided an opportunity to inspect the bedrock. After photodocumenting and characterizing the fractures (orientation, frequency, aperture thickness, staining, etc.), and upon DEC approval, Integral will direct the contractors to continue the excavation into bedrock with a jackhammer in an attempt to delineate the extent of the petroleum contamination and determine its terminus According to email from Alanna Carroll, the excavation will begin on 10/20/15."

Remarks: "DEC inspection of the tank system identified oil leak at the fill pipe seeping down the side of the tank to the ground. Oil stained soil observed below the tank."

DEC Memo:	"01/10/08 - See eDocs for Con Ed report detailing cleanup and closure. 09/30/04 18:24 V.Vales#15638, discovered approx. 5 gallons of unknown oil and 15 gallons of water in V2357. V.Vales#15638 thinks this spill could be connected to a spill he turned in from V695, but does not actually see it leaking or spilling over into V2357. #155617 is the incident that V695 is on.There was no sewers or waterways affected. The source and the cause of the spill is unknown at this time. There are no substantial cracks in V2357. The drain in V2357 is clogged. There was two samples taken from V2357, one for PCB's and one for oil ID. V.Vales#15638 placed oil absorbent pads down in V2357. The cleanup is pending test results and possible feeder deenergization. 10/1 @ 01:23 EPA # NYP 004 125 159 10/1 @ 04:20 Lab Sequence Number: 04-07862-002 Oct. 1, 2004 @ 08:30 a partial clean-up was done. 1-drum of debris and 550 gal. of mixed oil and water was removed. A tanker and vactor truck was used. Unit was double washed w/slix. Environmental tag was not removed. Clean-up crew on person screen. Transf. was not removed or repaired. Source of spill is a bottom leak. Area was blocked off, using oil absorbent pads. Jan. 19, 2005 @ 02:30 clean-up was completed. Unit was double-washed w/slix.

VAULT #2357 (Continued) **S106721052**

No solids were removed. Small amount of water was removed with vactor. Environmental tag was removed #44752. See clean-up crew on people screen. Transformer was removed and installed. Source of spill; Transfromer. "

Remarks: "5 GAL. UNKNOWN OIL ON 15 GAL WATER. IN TRANSFORMER VAULT. TRANSFORMER MAY NOT BE INVOLVED. THERE IS ALSO A LEAK IN AN ADJOINING VAULT. UNKNOWN IF CONNECTED."

DEC Memo:	"11/25/2015 - Feng - Duty Desk. This spill incident is at the same location as the Spill 15-08793 reported by Robert Hill of RiteWay Tank. DEC S. Mahat talked to Robert Hill and found that spill is from the oil truck on the street, about 50-60 gallons. Fire Department was on the scene and applying SpeedyDry and also try to prevent the impact to Con Ed's vault/manhole. S. Mahat will do a site inspection. Spill is assigned to S. Mahat. Truck driver/owner: Frank 917-337-4150 JAG Express 11/25/15: Mahat Response: DEC Mahat responded to a reported 50 gallon #4 fuel oil from the top of the delivery truck. It was a roadway spill impacting a Con Ed Manhole and NYC Catch basin.

ON STREET IFO HOTEL (Continued) **S118459911**

Spill occurred due to loose manhole gasket on the top of the truck. Repaired was performed on site and truck was removed from the site immediately. Con Edition EH&S , DEP Industrial Waste, FDNY and DEC Spill staff was on the scene. Responsible party has retained a professional contractor to perform the clean up. A power washed will be performed and washed water will be collected. A complete clean up report will be submitted to the Department for the closure of the spill case. 12/4/15: Mahat DEC Mahat received an email update from RiteWay: Email: Hi Tosh, Oil spilled from the truck itself. We ve remediated 3 drums of contaminated absorbent granules placed there by the FDNY. We scrubbed and washed the street and also pumped out the affected drain in the area. We generated 500 gallons of liquids from the remediation. Area clean and well. Waiting for manifests now. Let me know if you need anything else! Btw, did you get my manifests for 600 west end? Thanks! David Chan Riteway Tank Maintenance Corp. 700 Hicks Street. Brookllyn, NY 11231 tel - 718-855-7272 fax - 718-855-7244 Based on site visit and email update, the Department does not warrant any further investigation on case. Spill case is closed on NYSDEC Spill Database pending generated disposal manifest. "

FIRST SERVICE RESIDENTIAL (Continued) **1017407342**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #144345: On 8/3/02 at 08:50 V. Schembari # 15976 of maintanance services called to report a leak of unknown oil. He found 1/2 gallons of an unknown oil mixed with 100 gallons of water in manhole-7808 that is located at N/S E.40 St. 20' E/O 3 Ave. He had

MANHOLE #7808 (Continued) **S106006274**

found this at 08:40 while making an inspection & working on account # -12014. He states that no sewers or waterways were affected. There is a sewer connection as per conduit plate-25-J-4 however there is no movement on the liquid. He hung a tag # 28841 and took 2 samles 1- for pcb & 1 for ID. Chain of custody # AA-23131 No smoke or fire was involved. No injuries were related to the spill. Nop private property was affected. The cause & souce of the oil is unknown. Weather conditions do not contribute to the hazard of the spill. He was unable to see any substantial cracks. The cleanup will be pending crews perhaps at 23:00 tonight. At this time there are feeder outages. 8/3/02 15:08 Received lab results, lab sequence # 02-07242-001 The sample submitted is too degraded to determine the source. UPDATE 8/5/2002 @ 1427 HRS V Zappone # 85207 of UG-S reported to me that on 8/5 @ 1345 HRS this cleanup was completed. One barrell of solid waste consisting of debris & PPE's was removed. 600 gallons of water and oil mixture was removed. The structure was double-washed with SLIX solution. The Environmental tag # 28841 was removed."

Remarks: "WORKERS FOUND APPROX 1/2 GAL OF UNKNOWN OIL FLOATING ON TOP OF APPROX 100 GALLONS OF WATER IN THE ABOVE MANHOLE / AT THIS TIME CONED DOES NOT HAVE ENOUGH STAFF TO CLEAN THE SPILL / CONED SPILL #144345"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

DEC Memo:	"11/25/2015 - Feng - Emis# 243655 Duty Desk. Talked to Chris Muggeo of ERT. It is a third party spill reported by Con Ed crew to ERT. He doesn't know how it happened, but the fuel truck spilled 100 gallons oil out. 50 gallons went to the roadway, 10 gallons to the Con Ed manhole, 10 gallons went to catch basin and the remaining 30 gallons is missing. Con Ed responded to the spill. Sanitation is there and using sand and speedyDry to contain the oil. Fire Department and DEC are there. Confirmed it is the same location as spill 15-08791 and 15-08793. Spill is consolidated with 15-03791. Truck driver/owner: Frank 917-337-4150 JAG Express 2/11/16 - Austin - Con Ed contained and cleaned up the spill in their vault - See documents files for further information - Spill closed previously, and consolidated with the 3rd party RP's spill, as above - end"
Remarks:	"50 gals to street/10 gals to man hole # 10/10 gals to catch basin/NYc Sanitaion has cleaned up approx. 40 gals at this time/clean up balance depending on crew/nrc# 1134308"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

ROYAL REALTY CORP (Continued) **1001119667**

corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL O'Connell on scene at 1415 hrs. Rich Zoeller of Manhattan Electrical EH&S gave me update. Rectifier flashed over. Contains 9 askarel capacitors with 1 pint capacity each. Main body of rectifier is intact (oil is in main body). Three capacitors are located inside the main body and the remaining 6 are located in the outside housing. Records for oil in main body of rectifier is about 700 ppm PCB. The unit was retrofilled in 1988 and was retested at 22 ppm PCB. Was tested again in April 2000 at 100 ppm PCB. The crew began pumping water from vault into the street. Pumped approximately 4 feet of water (pumped from bottom, not from top) when they noticed a discoloration in the water. They stopped pumping and took a sample. They were going to take wipe samples from the street but a concrete truck washed its load out on top of the water. Water and concrete went into sewer at northeast corner of 2nd Ave. and 42nd St. NYCDEP was not on scene. I called Moustafa Fawzy directly to let him know of the situation. There is no evidence of smoke or soot on the unit or in the vault. There is no visible oil in the vault, in the street or in the sewer. Based on PCB results, street will be washed as well as vault. E2MIS NOTES: 11/16/00, 1150 hours - possible oil with askarel spill in rectifier vault RVS 6019. Approx 1 gallon of dielectric fluid with possible askarel (from capacitors in rectifier) on top of 200 gallons of water. There was active fire and smoke involved. The rectifier failed causing fire & smoke. Fire Department responded to location but fire was already out. FD did not spray water to put fire out. The fire was already out and there was water already in the vault. Rectifier housing door rupturedcausing possible capacitor leaks. Water was being pumped out of the structure but was stopped when the oil spill was discovered. There is a concrete sump and sump pump. Will take samples for PCB & ID. Previous PCB historical data for this rectifier unit is 694 ppm. Checked conduit plate 26-K-2 and verified that there is a sewer connection. Called Chem Lab to request wipe samples from street. Wipe samples were cancelled by Rich Zoeller at approx. 1300 hrs. 1340 hours - Over 50 tanker is on location. Initial report was received from NYFD as a transformer fire. Upon arrival, Emergency Ops identified no evidence of a fire involved in this event. The manager of the store adjacent to the vault indicated that a vibration was felt and a thud type sound. He reported no smoke or fire involved in the event. Vault was found containing approxiamtely 5 feet of water covering most of the equipment, the sump pump was inoperative. The initial responders saw no evidence of oil or foreign substance in the water and started to de-water the installation by pumping into the street along the curb. Approximately 4 feet of water was pumped when a discoloration of the water appeared. Immediately the pump was shut down. A preliminary inspection of the equipment found the body of the rectifier intact and no evidence of any damage. The body, or tank of the rectifier contains the dielectric fluid. No leak from the body was found. The housing which is mounted on the end of the body contains the electrical components of the rectifier. The access door to this housing as well as its hinges were buckled and extended creating a gap of 1/2 inch between the door and the housing. Since it is known that the housing contains askarel capacitors, precautions were taken to treat the discoloration of the water as PCB greater than 500 ppm.

RVS 6019 (Continued) **S104880513**

At this time, it is not known if there is any leakage from these capacitors. Samples were taken of the water, and all liquid waste and dielectric fluid removed from the body was treated as >500 ppm PCB. 1345 hrs - Jane O'Connell of NYSDEC arrived on location and reviewed the incident with Zoeller. She requested to be informed of lab analysis as soon as possible. 1420 hrs - Rich Zoeller received call from Deirdre Daly requesting a review of the incident. She has requested to be informed of the lab analysis and confirmation that the NYFD was informed of the PCB content of the rectifier. 1530 hrs - Stanley Baldwin of NYCDEP arrived on location and met with Lou First. He was briefed and requested to be informed of the lab analysis. 1635 hrs - Fred Simms reports that he has notified NYFD Battalion 8 Chief Eichele that the unit was classified as containing 694 ppm PCBs and also contains askarel capacitors that are identified as having much higher PCB concentration. Chief Eichele notified Simms that there were flames during the incident. Unit is scheduled to be removed at 0100 hrs on 11/17/00. CIG notified OEM and Israeli Embassy thet the area will be dug and the security planters moved. Lab analysis SA00-10929-001 indicates a substance similar to petrolatum with a PCN content of <1 ppm. Rectifier was drained of 375 gallons, labeled, removed and transported to the Astoria PCB holding area. Area is secured and pending final clean up. Contacted Astoria Shops to ensure that the rectifier is placed on hold for examination. 11/30/00, 1520 hrs - V6019 was flushed and cleaned following the removal of the rectifier. Since all liquid was previously pumped to the >50 tanker, including the material identified as petrolatum, no visible material remained in the structure. Clean up is complete and vault is now ready for new unit pending determination by Manhattan Engineering."

Remarks: "FIRE IN MANHOLE - RECTIFIER FAILED - IF CAPACITORS RUPTURED, IT WILL BE OIL WITH ASKAREL - UNK FOR NOW - SAMPLE SHOWED 694PPM FROM RECTIFIER (HISTORICAL DATA) - 200GAL OF WATER - CASE #134399"

DEC Memo:	"Employee reports that in V3261 he found that unit was leaking from sample valve, and that the soil under valve is soaked with approx. one gallon of transformer oil on top of concrete, he also reports that the drip rate must be slow. He goes on to report that he has not seen a drop coming from valve, but the oil is under valve. No private property affected. no sewer or waterway affected. There is oil filled equipment in the structure- transformer. There is no standing water. There is no concrete sump and no sump pump. but has a drain. Two samples taken from soil. Update 10-29-04 @ 19:40 S Brenseke # 05729 reports that a partial cleanup is complete at this time. 1 bag of ppe. Drain was clogged and the sample valve was wiped off and repaired. Final cleanup is pending lab results due to amount of dirt in structure. Lab Sequence Number: 04-08955-001 - Analysis indicates the presence of a transformer oil Lab Sequence Number: 04-08954-001 - TOTAL PCB 8 ppm Update: Oct 31,2004 P.Diaz 09784 reports that clean up is complete @ 11:50 hrs . It was started @ 07:00 hrs No solids removed, flush truck removed approx. 5 gallons of mud and water. Yellow tag 35938 removed and no cleaning agent used at this location."

VAULT #3261 (Continued) **S106720199**

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"1/7/11 - Raphael Ketani. The spill was reported today and was originally described as covering the entire boiler room floor by the caller. However, when I visited the site, I did not find any oil on

APARTMENT BUILDING (Continued) **S106124780**

the boiler room floor. Instead, there was a small amount of oil on top of some debris in the tank room. I met Roberto Cortez, the plumber from A.L. Eastmond. The crew was on the scene and dealing with the spill. Mr. Cortez told me that the spill was only about 10 gals. of #6 oil. He said that the cause of the spill was a corroded fill pipe. The fill pipe had corroded where it was in contact with the building's concrete foundation wall. He showed me a ditch where Eastmond had removed the old pipe. Mr. Cortez showed me that the spill was a little bit of oil right where the pipe met the concrete. He stated that the contaminated soil had been removed. I could see that a deep hole had been dug where the sidewalk used to be (see E-docs). I didn't sense any odors. We went inside and looked into the tank room. There were only light odors in the tank room and almost no odors in the boiler room. I could see material covering the floor of the tank room. It looked like some paper and garbage. I could see a large dark stain on the street side wall of the tank room. This was just below where the fill pipe had passed through the wall. One worker was inside cleaning up the oil and debris. Mr. Cortez said that 40 bags of material had already been removed from the tank room yesterday. Later, I met the super. He told me that the management company is David Frankel Realty, Inc., 160 East 65th Street, Manhattan, NY, 10065, (212) 772-7600. 3/15/11 - Raphael Ketani. I contacted Adreana Menendez (212) 772-7600, the property manager. I asked her whether the spill had been cleaned up. She said that it had. I asked her whether she was going to send a report to the DEC describing the cleanup. She said that the report had to come from the building personnel. She said that she will contact them and get them to send the report. Lizette Hernandez of A.L. Eastmond (718) 378-7000 called to say that she will send the cleanup report to the DEC very soon. She is just waiting for the soil analyticals. She asked for a few more days. I told her that would be fine. 6/10/11 - Raphael Ketani. I tried to contact Ms. Hernandez regarding sending the cleanup report, but I could only leave a message. 6/15/11 - Raphael Ketani. I sent an e-mail to Ms. Hernandez requesting the clean up report. I contacted Ms. Menendez (212) 772-7600 regarding the clean up report. She said that Allied Mechanical was the contractor for the job. I told her that I had been trying to get the report from Eastmond. She said that Allied had subcontracted to Eastmond for the work. I told her that the DEC had been trying to get the report since March 2011 with no success. Ms. Menendez said that she will call Allied and try to get this matter straightened out. 6/20/11 - Raphael Ketani. I sent an e-mail to Ms. Hernandez requesting the clean up report for the site. She responded back that the DEC will have the report by the end of the week (about 6/24/11). 8/4/11 - Raphael Ketani. I spoke to Ms. Hernandez regarding the report. She said that she has everything now and will send the complete and written report to the DEC by 8/12/11. I told her that will be fine. 8/12/11 - Raphael Ketani. I spoke to Neal Tomasetti of Eastmond (718) 378-3000. He said that he found some of Ms. Hernandez' files and he will put the report together. I told him that Ms. Hernandez had remarked that she had all of the necessary documents to put the report together. Mr. Tomasetti said that he intended to get the closure report to the DEC by next week. 9/13/11 - Raphael Ketani. I tried to contact Mr. Tomasetti (718) 378-3000 regarding the closure report, but I could only leave a message. Mr. Tomasetti called me back. He said that he hadn't forgotten about the spill case. However, the previous Eastmond case manager had left the information for the site investigation in

APARTMENT BUILDING (Continued) **S106124780**

many places. So he is still trying to put it all together. He has ordered copies of the disposal manifests from the contaminated soil acceptance facility. Once he has the manifests, then he can put the report together and send it to the DEC. 10/20/11 - Raphael Ketani. I spoke to Mr. Tomasetti. He said that he hadn't forgotten about sending the DEC the investigation and cleanup reports. However, he said, he is the only one who knows what to do, and he is getting more spill cases all of the time and he is also trying to run his company and make money. He said that he will try to send the reports sometime next week. 3/8/12 - Raphael Ketani. I tried to contact Mr. Tomasetti regarding the soil analytical data, but he wasn't in. I was passed to his assistant, David Vega at (718) 378-3000. I explained to Mr. Vega that all I needed was the soil analytical data in order to see whether the spill had been remediated. He said that he will look for the data and send it to me if he finds it. 2/6/2013 - Raphael Ketani. As no contact has been made by Mr. Tomasetti or the owner of the property in some time regarding the status of the remediation, I sent a CSL (Contaminated Soil Letter) to The 230 East 48 Street Company requesting that they clean up the spill and submit a remediation report by March 8, 2013. 2/13/13 - Raphael Ketani. Brendalyn Bernard of David Frankel Realty (management agent) called to inquire regarding what the CSL was all about. I told her that it referred to the original oil spill that took place on 1/7/11 due to a corroded fill pipe and that the DEC had never received a cleanup report. Ms. Bernard said that she will bring the letter to the attention of her boss in order to address the matter. 2/17/13 - Raphael Ketani. The green return card for the CSL was received with the signature of Mr. Smith and dated 2/13/13. 3/6/13 - Raphael Ketani. Mr. Tomasetti (718) 378-3000 called to say that he had the soil sampling data and that he will send it to me via e-mail. He said that the samples were taken through the sidewalk on 2/26/11. I told him that I also needed a little map showing where the soil samples had been taken and pictures. He said that he will include them. 3/13/13 - Raphael Ketani. I tried to contact Mr. Tomasetti (718) 378-3000 regarding receiving the report and data for the site, but I could only leave a message. 3/14/13 - Raphael Ketani. I received the soil analytical data for the two end point samples that were taken in the trench where the old fill pipe used to run under the sidewalk. The samples were taken on 2/26/13 and the report was generated on 3/6/13. There were no VOC results. The SVOC results were almost entirely non-detect with just several low hits for each sample. However, the picture that had accompanied the report was unintelligible. I will wait to receive the hard copy. 3/15/13 - Raphael Ketani. I received the clear picture as a reproduction on standard paper. The picture depicted the refurbished sidewalk after the soil had been removed and replaced. 4/4/13 - Raphael Ketani. After review of the case record by staff from the Region 2 Division of Environmental Remediation, it was decided that the spill case can be closed effective today. "

Remarks: "tank room floor has product on it. Concrete floor, unk sump pumps.unk amt at this time. on scene, clean up underway"

DEC Memo:	"11/18/14: Mahat T/c: DEC Mahat contacted Mr. Clifford (Castle Oil @ 917.202.5119) inquiring about the spill on the catch basin. He mentioned that estimated 50 gallons of the oil was spilled out from the vent pipe due to overfill. Surface spill has been cleaned by Rite Way. Mr. Clifford also notified the Department that estimated gallons of the spill made its way to catch basin. DEC advised Mr. Clifford to notify DEP Industrial Waste Management. 11/19/14: Mahat Received an email from Mr. Clifford, Email is listed below: Good morning. Rite-way will be back on location this morning, 11/19/14 after 9 AM. Our plan is as follows: 1. Check street clean-up from 11/18/14. Do additional cleaning as required. 2.I have arranged to have the man-hole above the catch basin at the SW corner of 28 St & 2nd Avenue removed. If we are successful, Rite-Way will clean that catch basin. 3.Remediation in tank room will commence. Tank will be cleaned where necessary. Consistency of tan room floor will be checked and potential for sub-surface contamination will be evaluated. 4.Gasket on man-hole cover will be replaced before this week is out. I will keep you posted as to what are findings are. Thanks Contact Information : David Frankel Realty 160 East 65 New York, NY 10065 212.772.7600 - phone 212.772.8163 - fax ATT : Adriana Malindas ******* Management Brenda Bernard John ******* Super 646.423.6844 a site re-visit is schedule on 11/19/14. DEC remark will be updated after the site visit. 11/20/14: Mahat An email was sent out to the management team: Ms. Menendez, During the recent site visit performed by the Department: Following housekeeping issue were noticed. 1.Petroleum residue under the old elevator shaft. 2.Hole in South-West corner of the tank room 3.Wreckages/debris in Tank room. 4.PBS Registration on site (Violation) 5.PBS Registration updated with new product (Violation) 6.Fill port Color code: Green Hexagon with #4 on it. (Violation) 7.Gasket on Man-Way cover (Rite Way is schedule to repair on 11/21/14) 8.New and calibrated Petro Meter. (Violation) 9.Power Wash Sum Pit Walls. 10.Old #6 Fuel oil seeping out of the sub-wall from the tank room. 11.Epoxy paint on the mechanical room (Not required but recommended) My goal is to be resolve this issue without writing any NOV. If you supply a report (with narrative cleanup process / pictures) then I will promptly close the case. All the petroleum contaminated debris has to be dispose of properly. Our record also indicates there were previous spills on the property. One on 2011 and other one was on 2004. # 6 fuel oil seeping out from the wall may be because previous spill was prematurely closed. Please give me a call once you received this email so we can touch bases. I want to be the part of the solution. Looking forward to hear from you. 12/09/14: Mahat DEC Mahat contacted Ms. Bernard to follow up for the clean up and report progress. She

RESIDENCE DAVID FRANKEL REALTY (Continued) **S117393093**

mentioned the process is moving in a great speed. Riteway has been retained to perfrom the work and a report will be submitted shortly after. 2/3/14: Mahat DEC Mahat received a clean up report from the Riteway including all the corrective actions performed. Spill closure report will be uploaded on D2. Based on the report, all spill repventive measure has been conducted and no further remediation action is required in the site. Hence, the spill case will be clsoed in the database. "

DEC Memo:	" 04/25/95: CALLED HOWARD GREENBERG ON 04/25/95 TO FIND OUT IF ANY ACTION HAS BEEN TAKEN. HE WAS NOT AVAILABLE WILL CALL BACK. 10/10/95: This is additional information about material spilled from the translation of the old spill file: TANK TAKING ON WATER. ON JULY 8, 1996, Spoke to Carl Westerman, Properties & Facilities - Budget Rent-A -Car (708)955-7203 There are two 4,000 gallon UST gasoline in service at the facility. Tanks were steel installed in 1985. Tanks were laid into a bedrock foundation and had apoured concrete incasement. The problem involved one of the tanks. One tank began taking on water (12) over a rainy envent. Upon cleaning and

225 EAST 43RD ST (Continued) **S104275704**

inspecting the tank they found a hole in the bottom of the tank the size of a quarter. The tank was repaired with a steel plate and was fiberglass coated. The piping systems were repalced with fiberglass due to potential corrosion problems. The tanks were then cathodically protected by upgrading, and a leak detection system was added. According to Mr. Westerman, there was no loss of product from the system, and the only source of problems was water entering the tank. There have apparenetly been no other indications of further leakage, or seepage into adjoining buildings. Mr. Westerman has photographs of the tank installation and documentaion on the cleanup which indicated that no product migrated back into the tank when it was emptied. See also Spill #9408906. On May 22, 2002, DEC Sigona received a call from Eric Meyn, Project Manager, American Environmental Assesment Corp, 188 LOng Island Avenue, Wyandanch, N.Y. 11798 (631)586-2000 called to request the abandon the tanks in-place. They have not filed an application to abandon the tanks in-place. Eric Meyn was not aware that there is a spill history or additional spill reports which have been reported. DEC Sigona requested a complete site investigation plan along with documentation on previous remedial actions to be forwarded to DEC Sigona for review. DEC Sigona will consult with DEC Tipple regarding See Spill Nos. 9914694 and 9408906. Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 3/28/05 - spill closed, refer to spill # 9914694 for additional info. - KST "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 3/28/00 +- 25 GAL. GAS FOUND IN OVERFILL. GAS PUMPED INTO DRUM FOR OFFSITE DISPOSAL. GAS ODOR ENTERED THE SCHOOL THROUGH THE ELEVATOR SHAFT THAT EXTENDS INTO THE GARAGE BELOW THE SCHOOL. A COMPLETE SYSTEM TEST IS SCHEDULED ON 3/29/2000 , THE SCHOOL WILL BE CLOSED FOR THE DAY. See Spill Nos. 9403751 and 9408906. 12/10/03 mt/// Transferred from Tipple to Rommel 10/19/05. J.Krimgold got a call from TRC (Dave Glass). He stated that his co. was hired to do the tank closure. They check GW wells at the site and found elevated VOC and MTBE (27,000 ppb) in GW. Want to talk to DEC's PM regarding further action. The site owner Budget Rent A Car (contact Michael Feeley @ 973-496-3467). Case reassigned to BURB (Lauren MacDonald @ (518)402 - 9768.) DURNIN, 5/1/2006: October 2005:TRC was hired by Budget Rent-A-Car to address Spill No. 9914694. November 16, 2005:TRC Tank Closure Plan Submitted to NYSDEC. December 1, 2005:NYSDEC Approval of Tank Closure Plan. December 6, 2005:Tanks closed in-place, piping removed. January 20, 2006:TRC ordering well socks for remediation of groundwater. January 25, 2006:TRC schedules ORC socks to be installed in a few weeks. March 20, 2006:The ORC socks were installed in the monitoring wells around the abandoned tanks. As per approved Work Plan, the ORC socks will be checked September 2006. August 23, 2006:TRC was emailed a request to schedule the 6 month replacement of ORC socks and the groundwater sampling event. September 5, 2006:The NYSDEC Project Manager visited the site and witnessed the removal and condition of the ORC socks from the 5 monitoring wells. MW-3 sock was the only discolored ORC sock. September 19, 2006:Groundwater samples were collected. October 19, 2006:TRC submitted a Letter Report on the results of the ORC application for the past 6 months. November 10, 2006: TRC proposed to conduct another round of ORC applications. November 13, 2006:NYSDEC approved the Letter Report and the next round of ORC applications. November 14, 2006:The ORC socks were installed by TRC. The socks are to be in until May 2007. May 23, 2007:The Project Manager visited the site. The socks were removed and inspected. May 30, 2007:Groundwater samples were collected. July 16, 2007:TRC submitted the Letter Report

225 EAST 43RD ST (Continued) **S104275704**

on the results of the ORC application for the past 6 months and proposed to conduct another round of ORC applications. July 20, 2007:NYSDEC approved the Letter Report and the next round of ORC applications. September 5, 2007:The next round of socks were installed. The socks will be removed after 6 months (March 2008) and the groundwater will be sampled. March 2008:The socks were removed. April 11, 2008:TRC submitted a Letter Report on the results of the ORC application for the past 6 months. TRC proposes to conduct two more 6-month rounds of ORC applications. May 9, 2008: NYSDEC approved the Letter Report and two 6-month rounds of ORC applications. June 16, 2008:TRC installed ORC socks in monitoring wells MW-2, MW-3 and MW-5. December 18, 2008:The ORC socks were removed. The DEC Project Manager was on-site for the removal event. February 24, 2009:The Letter Report was received and reviewed. March 5, 2009:NYSDEC approved the proposed plan to continue using ORC socks for the next 12 months. March 2009:The next round of ORC socks installed in wells MW-2, MW-3 and MW-5. August 31, 2009:TRC FOILs NYSDEC September 30, 2009:The ORC socks were removed. December 2009:TRC provides the results of the latest groundwater sampling. January 2010:TRC will submit an Exposure Assessment based on a DEC approved outline with the recommendation to close the spill. February 16, 2010:TRC submits the Final Report and the Exposure Assessment Report requesting to close the Spill. April 2010:NYSDEC reviews the Report. February 16, 2010:TRC submits the Final Report and the Exposure Assessment Report requesting to close the Spill. March 2010:NYSDEC reviewed The Letter Report. April 20, 2010:NYSDEC approved the Letter Report (no further action). A well commissioning work Plan is required. April 21, 2010:The Spill files are prepared for edoc filing June 23, 2010, J. Durnin: PM is waiting for TRC to submit a well decommssioning plan. July 14, 2010, J. Durnin: TRC submitted the Groundwater Monitoring Well Decommissioning Plan on July 13, 2010. The Plan was reviewed and approved on July 14, 2010. Well decommissioning is scheduled for the week of August 9, 2010. A Well Decommissioning Report will be submitted following the field work. August 24, 2010, J. Durnin: Well decommissioning took place on August 17, 2010. A Well Decommissioning Report will be submitted. September 24, 2010, J. Durnin: The Well Decommissioning Report was submitted by TRC on September 24, 2010 and is under review. An Inactivation Letter is being drafted in anticipation of closing this spill. October 5, 2010, J. Durnin: The Well Decommissioning Report was reviewed and comments (1) emailed to TRC on October 5, 2010. An Inactivation Letter will be sent to Budget once the comment is addressed. October 22, 2010, J. Durnin: The Well Decommissioning Report dated September 13, 2010 (revised), was approved in an Inactivation Letter sent to Budget Rent-A-Car on October 8, 2010. This Spill No. 9914694 is closed as of October 8, 2010."

Remarks: "CALLER STATES THERE IS A GASOLINE SPILL UNK CAUSE - NO CLEAN UP CALLER STATES NEARBY SCHOOL IS EVACUATED AND SEVERAL PEOPLE HAVE BEEN TREATED"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"8/30/11-Vought-Primary off-hours responder. Spill assigned to DEC Feroze as part of routine minor spill Con Edison portfolio review and possible closure. Initial EMIS #227184 downloaded from e-docs, entered into Cross Reference field and deleted from proxy. EMIS noted that 50 gallons of dielectric fluid was discovered while responding to a transformer fire and one sample collected for PBB analysis and one pint of oil spilled to sidewalk. 6/14/12 - Austin - 50 gals. of dielectric fluid released during transformer-vault fire (1pint on sidewalk, 2 gals in adjoining vault) PCB test came back as 10 ppm - Con Ed contained and cleaned up the spill, and removed the transformer - See eDocs files for further details - Spill closed - end"
Remarks:	"1644 THE CALLER ADVISED DISPATCH THE SPILL WAS DUE TO A MAN HOLE WHICH CAUGHT FIRE. UNKNOWN CAUSE. THE CLEAN UP IS PENDING AT THIS TIME."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: "08/29/07- I spoke with Jamie Barr, Langan Engineering.He told me that while doing geo-technical investigation, petroleum contamination was discovered at the site. Jamie will send DEC a report with investigation findings and remedial work plan.(SR) ** A meeting took place at DEC office on 01/17/08 with presence of reps from both DEC and United Nations. Information from geotechnical investigation and future Environmental Investigation works were discussed.UN rep showed keen interest to follow local laws and regulations while developing the site. Langan is supposed to prepare Investigation Plan for DEC approval**. 04/21/08 Rec'd Investigation Work Plan.While drilling test boring B-5 on east of North Building, black petroleum-like material was observed within drill wash and within soil samples.Subsequently, the spill was called in. As per the

UNITED NATIONS (Continued) **S108764094**

Investigation Plan, a geophysical investigation will be conducted to mark out detectable subsurface utilities. A total of 16 soil borings with contingency for an additional three soil borings, to the depth of approx 30 ft below ground surface will be performed.Four soil borings will be installed in the basement level of North Building using a limited access drill.Seven existing ground water MWs, installed during the geotechnical drilling program,will be sampled as part of the investigation.Up to seven borings will be converted to GW MWs to sample GW. A Investigation Summary Report will be submitted to DEC.(sr) 05/08/08 I spoke with Jamae Bar today,free product found on top of ground water level in few of the wells.From March '08 through May 08, seventeen soil samples were collected. Langan Engineering proposed performing additional borings/wells to fully delineate the plume.A memorandum will be sent to DEC detailing the finding of investigation so far by next week.(sr) 09/26/08 Spoke with jamie Barr at Langan Engineering. Plume tracking investigation by well installation and sampling was completed.Nature of the free product is weathered fuel oil#2/diesel.No activity at the site is going on now due to the GA summit.Dual phase remedial system(product recovery and soil vapor extraction) is proposed at the site. Report in the form of memo will follow soon.(sr) 10/21/08 Rec'd investigation summary report by Langan Engineering.Between June and July 2008, eight soil borings were installed at the site using mud rotary drilling techniques.During this second round of investigation, elevated levels of methane vapor above OSHA action levels were identified at three ground water monitoring well locations below the floor slab of the UN print shop(North Lawn).A temporary sub-slab ventilation system was installed at boring/well locations MW-6, MW-7 and MW-8 to remove the vapors.VOCs were not detected in soil samples at concentrations exceeding the TAGM RSCOs.Eleven groundwater monitoring wells were installed in boring locations where evidence of LNAPL was observed.As per the report, LNAPL is present in four of the site monitoring wells(MW2,MW3, MW-4 and MW-5) thickness ranging from 4 -36 covering 40X50 ft. area. This area is tidally influenced by upto 18 inches.Product recovery at monitoring well MW-5 averaged 2 gallons per day.Bail-down tests show that LNAPL recovers within 24 hours in MW-5 and within 4 days in MW-2 and MW-3.Langan proposed a dual phase extraction(DPE) systems capable of extracting soil vapors and LNAPL from the subsurface.System includes:retrofitting three existing MWs(MW-2,MW-3 and MW-5) into vapor recovery/product recovery wells, and three other existing wells(MW-1B,MW-4 and MW-18) into vapor recovery wells.Product will be collected via pneumatic skimmer pumps in each of the three wells to a treatment trailer located outside of the building footprint.Design of the DPE system is underway. Case transferred to Remediation section for further management.(sr) 12/02/08 Site meeting took place at UN premises with presence of UN rep, Langan(Jamie Barr),DEC(RSE-Randy Austin,Project Manager-Sharif Rahman)on 11/19/08 morning.Langan agreed to monitor the all well monthly for presence of product and will notify DEC if any product is observed. Currently MW2,MW3 and MW5 showed product and pneumatic recovery system in place to recover the free phase product.(sr) 12/11/08 Conference call with Langan Engineering in RSE's office at 11:00 am. Langan indicated that UN proposes to postpone remediation work for five years until the temporary building is knocked down.RSE did not agree with that proposal,instead strongly recommended to perform interim recovery from the wells by VEFRing until the site condition compells to stop the remediation work and keep monitoring

UNITED NATIONS (Continued) **S108764094**

the wells to check migration of oil beyond the current location.In response to question about vapor recovery from the print shop, Langan indicated that the print shop maintains positive pressure by dint of heavy duty HVAC system. RSE also told them to provide DEC with the specifications of HVAC system and contingency plan in case the plume starts migrating to other wells.Langan Engineering will relay this messege to UN and we are waiting their reply.(sr) 05/06/09 Letter was sent to Langan Engineering regarding the modified RAP.Left a messege for Jamie Barr to follow up the start date of the product recovery.(sr) 09/09/09 Temporary free phase product recovery system using LNAPL skimmers pumps was installed and has been running continuously since June 15th.Aprox. 25 gallons of free product has been recovered so far.A summary report will be prepared that will document the remediation activities.(sr) 04/09/10 Rec'd closure request. Request not acceptable. Free phase product exist in the wells MW-2, MW-5 and MW-3 at the site.Spoke with Langan Engineering regarding the DEC's requirements of free phase product recovery. Letter was sent out on 04/09/10 to UN asking for a RAP to implement at the site in order to recover the free phase product from the wells.(sr) 05/06/10 Meeting held in DEC office today with UN and Langan.It was decided that the three wells that showed free product before, will be checked again by reactivating the skimmer pump unit. If free product is discovered in the wells,DEC will require appropriate remedial actions to address that.(sr) 11/23/10 Meeting held with UN rep on 11/09/10 at DEC building.It was concluded that yearly monitoring of all wells will be conducted and report will be sent to DEC.The case will be transferred to DEC Remediation for future management.UN has agreed to sign a Stipulation Agreement with DEC to carry out the remediation.(sr) 1/7/14: Mahat DEC spoke with Miss. Carol (Assistant to Mr. Michael Adlerstein, FAIA, UN) and left a message to call back regarding the spill. "

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

NISSO AMERICA INC (Continued) **1004570540**

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"1/15/11-Vought-Primary off-hours responder. Called Petro Mike Natoli at (718) 333-8867 and left message to return call. 1/18/11-Vought-Called Natoli for update and left message to return call to DEC. Vought noted as per PBS #2-096032 that site has a 3000-gallon #2 fuel oil AST and owner of AST is: Huguel Corp. 222 East 56th Street New York, NY 10022 Dan Dermer Ph: 212-683-6655 Vought received call from and spoke to Natoli who will return call to Vought with more information. 1/20/11-Vought-Received callback from Petro (Rainer Ober Ph:718-333-8855) who left message. Vought called Ober and leak on check valve on fill line and valve is scheduled for replacement. Tank in concrete vault with dirt on floor. Approximate spill amount as per Ober was 2-gallons of #6. Spill cleaned via speedy dry and excavation. Contaminated soil will be returned to Petro. No sewers or drains affected. No endpoints samples due to high viscosity and spill closed by Vought."
Remarks:	"Caller advised oil spilled onto soil. Clean up is pending."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no 159003 J.Henrique reported a leak of 1 gallon of hydraluic fluid from Vehical#60565 into the sewer catch basin in front of 65 E.57 ST. J.Henrique#19120 and the cleanup crew placed absorbent pads and pigs from a Con Edison Spill kit around the sewer to prevent any further hydraluic fluid from entering the sewer. 7/05 11:25 E.Fermanit, Environmental Supervisor, notified the control center on 06/07/05 at 11:17hrs. to report that he now thinks that there could be a possible release into the sewer, so it is now being treated as a release into the sewer. The cleanup is pending at this time. 06/07/05 12:38. Update: A.Drummings, of EH&S, notified the control center on 06/07/05 at 12:35hrs. to report that Transportation is on location, and is waiting for a drip pan to be delivered to them so repairs on the hydraulic hose can be repaired. The drip pan is on its way. Clean Ventures, has been notified and is enroute to the location to clean the catch basin, the sewer and to complete the cleanup in V2420. A.Drummings, also at this time states that there could have been a spill of some of the hydraulic fluid and water in to a telephone manhole. The telephone manhole is located approx. 30' east of V2420, which was about 5 feet behind were vactor truck #60565 is located. The manhole cover has not been pulled at this time, what spilled if any is unknown at this time. Logger : M.Casalta#12684 06/07/05 13:24. A.Drummings, of EH&S, notified the control center on 06/07/05 at 13:25 hrs. to report that he flagged down a Verizone Crew that was working a block away, who verified that the telephone manhole was a Verizone manhole. The crew went on to say that this type of manhole has a catch pan under the cover, so anything that may have leaked into it would be caught in the pan and not enter the structure. The manhole cover was not pulled, the Verizone crew stated that the next time there is work that needs to be done in that location the crew would diaper up anything in the pan. A.Drummings also stated that the cleanup is now going to be done by Allstate, not Clean Venture, due to the fact that Allstate will be there quicker. Logger : M.Casalta#12684 Update: 6/24/05 @ 11:19 hrs. Cleanup on the street and clean out of the catch basin completed by Allstate on 6/7/05. Allstate vactor truck used to cleanout catch basin, adsorbent pads

VAULT # V3078 (Continued) **S106968501**

DEC Memo:	"1/31/07 - Raphael Ketani. I spoke to Augustin Desintonio, the Laundry/Valet Manager of the Four Seasons Hotel. He said that only 1 or 2 drops of perc leaked from the machine. He sent me a FAXed letter

FOUR SEASONS HOTEL (Continued) **S108465705**

with a bill from Metropolitan Laundry who repaired the machine. The letter bill stated that the machine was safe to use. Mr. Desintonio said that the union was demanding a letter from DEC stating that it was safe to work in the laundry room again. I sent him a letter stating that the few drops of perc would not pose a health risk to people or the environment. Based upon the small size of the spill, I am closing the case."

Remarks: "ABOUT 1 OR 2 DROPS SPILLED OUT OF DRY CLEANER AND IS ALL CLEANED UP: MACHINE ALL REPAIRED"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FOUR SEASONS HOTEL (Continued) **1016060203**

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Classification: Conditionally Exempt Small Quantity Generator
Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Registry ID: 110055428522

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL DEC INSPECTOR'S NOTES E2MIS says no oil filled equipment' then says dielectric filled cable in structure called Ed Radtke 4-25-01 @4:30pm. He will gte clarification and update the report. CON ED E2MIS REPORT 4-24-01 Unknown substance in MH59816, there is approx. 2pts. of an unknown oil on top of 100gals. of water in the structure. No oil filled equipment in structure. There is a dielectric- filled feeder in structure. 2 samples were taken on efor ID adn on for PCB. Env. tag hung. The incident is being declassified a sa 24hr. clenaup since the cleanup cannot be completed within 24hrs. due to traffic conditions. 0704hrs 4-25-01 Clenaup completed @04:30hrs. Crew pumped out 315gals from MH, filled 2 barrels of solid and PPE waste, removed sludge and double washed MH with slix. 4-25-01 Clarfication. The initial data entry indictes that there is no oil filled equipment in the structure and then it states that there is a dielectric-filled feeder in the structure'. The logger was referring to a transformer(equipmetn) when he stated that there was no oil filled equipment in structure. According to the handwrittem e2mis incident log, the splicer entered the structure to work on the open end primary cable. This is what the logger was referring to when he stated that there is dielectric-filled feeder in the structure . The logger will be instructed regarding the definition of oil filled equipmetn in structure ."
Remarks: "1 qt unk oil - samples taken - cleanup pending results con ed 136630 - on 100 gals water"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
