DEC Memo:	"07/30/09 Spoke with Tom Domke. This is a construction site and they discovered three 550's. Two of them had some water in it,third one was empty. Water sample was taken that showed dissolved contamination. No soil contamination observed. Report will be sent to DEC after removal of the tank.(sr) 10/27/11 - Austin - Spill Transferred from Ahmed to Vought - end"
Remarks:	"Tom Domke contacted dispatch and advised that his company was called to the above site when 3 tanks were located at the construction site. The third tank that was uncovered had a ruptured seam. Mr. Domke would like the spill responder to contact him direct before any further action is taken at the above location. These tanks have been decommissioned for approx 20 years."

Contact Name:	JOHN COMER
Contact Phone:	(401) 886-4484
DEC Memo:	"NOTE: Spill #9914694, Budget Rent-A-Car, 225 East 43rd Street is adjacent to this site. 2008: EBI performed an ASTM Phase II Limited Subsurface Investigation (LSI) at the site including Ground Penetration Radar (GPR). March 13, 2008: J. Durnin/John Comer of Magna Teleconference. John Comer provided an initial status of the site and proposed development. The property is located at 231 East 43rd Street in the area of Murray Hill, borough of Manhattan, New York City, New York County. This spill is based on a water sample with 88 ppb of Toluene apparently from a sump in the basement. July 24, 2008: J. Durnin/Paul Stallato of IPI Environmental Teleconference. He will be doing work at the site in the near future including razing the existing building. Bedrock is 2-4 feet below the basement floor. December 18, 2008: Site visit was made by the DEC Project Manager, J. Durnin. August 20, 2009: Removal and disposal of three 500 gallon fuel oil USTs, J. Durnin. September 30, 2009: Site visit was made by the DEC Project Manager, J. Durnin. The building was razed and significant soil excavation has occurred throughout the site. The sump in the basement was removed when the building was razed. Photos were taken. December 21, 2009: J. Durnin/John Comer of Magna Teleconference. John Comer provided a status update of the site development. April 21, 2010: J. Durnin/John Comer of Magna Teleconference. Discussed the site. He indicated nothing is happening at the site due to the lack of finances and no interested developer. Site Status as of May 2010: The property is vacant land and is currently undergoing development activities. There are no permanent buildings or structures and the site has been excavated to approximately the basement depth just above bedrock, J. Durnin. May 13, 2010, J. Durnin/Bob Indeglia of Magna Teleconference. Discussed site and post-excavation soil sample results. The UST Removal Report will be submitted. May 14, 2010: The Underground Storage Tank Removal Report, by EBI Consulting, dated September 21, 2009 was submitted for review. Field assessment activities included visual and olfactory observations of the excavated soil, field screening (PID), and the collection and laboratory analysis of post-excavation soil samples. Analytical results indicated no concentrations of analyzed parameters were detected above the NYSDEC Soil Cleanup Objectives in the soil samples collected from the excavation, with the exception of total xylenes in soil sample S-2 North (total xylenes, 1500 ppb). GRO was

PARKING GARAGE (Continued) **S109060523**

detected in three of the five post-excavation soil samples (S-1 Bottom at 4,900 ppb, S-2 North at 83,000 ppb, and S-4 East at 51,000 ppb); however, NYSDEC has not determined a soil cleanup objective for GRO. Based on the urban location of the site and lack of drinking water sources in the vicinity, these concentrations are not expected to be of significant concern, J. Durnin. May 27, 2010: J. Durnin/John Comer of Magna Teleconference. Notified Comer that will close spill based on the UST Removal Report. June 1, 2010: J. Durnin emails Bob Indeglia indicating the spill will be closed. J. Durnin, June 2, 2010: Based on the UST Report and the work performed at the site, this spill is closed on June 2, 2010. An Inactivation Letter was sent to Magna Hospitality group on June 2, 2010. J. Durnin. June 3, 2010: All NYSDEC file information was placed in edocs."

Remarks: "HISTORICAL TO GROUNDWATER; POSSIBLY FROM AN UNDERGROUND STORAGE TANK BUT NO VERIFIED; NO CLEAN UP AT THIS TIME;"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

CON EDISON MANHOLE 10142 (Continued) **1016042806**

corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

228 EAST 45TH STREET BUILDING (Continued) **1000116125**

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

EPA Region: 02
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

DEC Memo:	"On 10/25 @ 13:17 J Rodriguez rorted to me that while working in V-8901 located @ 511-5 Fifth Av doing phase checks on Feeder 4M61 he discovered approx 6 gallons of an unknown oil in the structure. No sewer/waterway affected, no fire/smoke involved, no injuries, weather did not contribute, No private property was affected. The source and the cause of the spill is unknown at this time. The spill was on the concrete structure floor. There is no standing water. Upon inspection by the finder no piping was seen Environmental tag # 34588 was hung. Chain of Custody # CC 16683 will be used for the samples for PCB and ID. The courier has been called for pick-up. I@A will respond to location to make a determination as to whether the Transformer is the source . Logger R Pagano # 4870 10/25 @ 13:45 Spoke to T Marcinek # 87549 of CIG @ 13:43 Logger R Pagano # 48703 10/25 @ 14:40 After inspection by I&A it has been determined that there is a bottom leak from the Transformer. On conduit plate # 26-H-4 there is no designation for V-8901. The partial cleanup will be scheduled as soon as possible. The vault will be contained by plugging up the weep-hole in the Vault and absorbent pads and granules will be placed to soak up existing leakage and prevent further leakage. The Unit cannot be

VAULT 8901 (Continued) **S106126118**

drained until the Feeder is taken out of service and then the partial cleanup will be completed and crews will be available. Looger R Pagano # 48703 NOTE:::: Spoke to Marcinek of CIG @ 16:20 and informed him of change of incident status. Logger R Pagano # 48703 UPDATE 10/25/03 19:20 R Hardin # 18320 reported to N Muldoon #18723 that a partial cleanup was completed at 19:05 hrs absorbent and pads were placed along with the weep holes were plug up and there was no release to any other structure. Final cleanup is pending removal of unit. Cleanup persons can be found in the Event Involved Screen. Lab Sequence Number: 03-08748-001 TOTAL PCB 15 ppm UPDATE 10/25/03 Lab Sequence Number: 03-08750-001 Analysis indicates the presence of a substance similar to a dielectric fluid. 10/25 @ 14:25 Gilson # 17065 of I&A reported to me that the partiala cleanup hass been completed . The solid waste has benn appropriately bagged and disposed of. The Tanker removed 450 gallons of mixed liquid. The E nvironemtnal tag has been left in place. NOTE::: Transformer drained and disconnected Final cleanup pending Transfromer removal: 02/15/05 04:15 G.Byrne#81264, Cable supervisor, notified the control center on 02/15/05 at 03:30hrs. to report the clean up in V8901 was completed. This was final cleanup. There were no solids removed and no drums or barrels were used. G.Byrne#81264 states the only liquids removed were from the flush truck. The method used to clean was double washed with slix. A yellow envirnomental tag #34588, was removed from V8901. The clean up crew was G.Byrne#81264, as the cleanup supervisor and G.Rosario#11464 and W.Holder#85940 as the cleanup crew. The old transformer was removed and a new unit was installed in V8901. The clean up was on 02/15/05 atn 03:15hrs."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
TSCA SUBMITTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"e2mis no 155879 On 10/19 @ 11:46 Tamez # 88368 reported that she noticed approx 1 qt of an unknown oil atop 35 gallons of water. No sewer/waterway affected. Three is a sump pump in the hole and it was not running upon arrival. The pump was immediately unplugged. There is an :oil minder attached. She pressure tested the Transformer and it held pressure. At this time it seems that the spill is not our equipment. The spill is in the concrete structure. Diapers will be put down to try and soak up this spill. The spill could not be completely soaked up. Environmental tag # 33581 was hung.. Three samples will be taken for PCB and ID and Flash point. Cleanup will commence when test results are evaluated by the Chem Lab and returned to the Environmental desk. Update 10-19-04 @ 18:00 L Roman #27270 reports that a partial cleanup is complete at this time. A final cleanup will have to wait for lab results due to excessive mud in the structure. 150 gallons of water removed by tanker(L Roman states there was no visible oil). Cleanup crew and supervisor are listed in the event involved person screen. Oct 20, 2004 21:02 Lab Sequence Number: 04-08538-001 Analysis indicates the presence of a transformer oil. TOTAL PCB 13 ppm Flash Point, PMCC > 140 deg F UPDATE:LIVE END CAPPED,DRAINED & DISCONNECTED. STATUS CODE CHANGED TO PTRAN FVROMANO MEHS 98384 Nov 3, 2004 A partial clean-up was done of 11-2-2004. 100 gal. of water/oil mixed was removed w/tanker. Unit was double washed w/slix. Unit is condemn. Source of spill is the transformer. Clean-up will be completed at a later date. See clean-up crew on person screen. E2MIS 30-AUG-2005 11:51:31 Page 3 of 6 -----Original Message----- From: Martin, Garrett T. Sent: Monday, February 14, 2005 7:48 AM To: Pellegrino, Robert Environmental Detailed Incident Report Cc: Davis, Horace; Pettenato, Robert; Byrne, Gregory F; Martin, Garrett T. Subject: 1 East 45 Street Bob, The cleanup in vault 3822, feeder 25m44 at 1 East 45 Street is complete. This cleanup was completed on the midnight shift, 2/2/05. The Supervisor was Greg Byrne and the mechanics were Robert Stiles # 3740 and Brian Curtin #

WATERSIDE GENERATING STA. (Continued) **S106721301**

19713.The PCB count was 13 PPM and the Spill sign was removed. Based on the above information this incident can be closed. -----Original Message----- From: Martin, Garrett T. Sent: Monday, April 25, 2005 8:30 AM To: Pellegrino, Robert; Drummings, Anthony Cc: Sniffen, Matthew; Davis, Horace; Martin, Garrett T. Subject: FW: 1 East 45 Street -- Incident 155879 Bob, There were no solids or liquids removed,this was a flush truck cleanup. The floor was double washed with citrus cleaner after the transformer was removed. The supervisor was Greg Byrne, the crew was Robert Stiles # 3740 and Brian Curtin # 19713, the cleanup was completed and the Spill sign removed . "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 10/10/95: This is additional information about material spilled from the translation of the old spill file: CAUSTIC SPILL. 07/16/04: Con Ed submitted copy of letter to Chris Engelhardt containing following information: 40 gallons of sodium hydroxide spilled from the chemical feed pump system. The spill occurred in the Waterside 2 Chemical Feed System Room which is an enclosed room. The affected area was the concrete room floor. Spilled caustic also entered the Station's concrete floor trench system. Absorbent pigs were placed in the trench both inside the chemical room and east of the chemical room. Liquid further downgradient in the trench was tested with litmus paper to ensure the caustic had been contained. The environment was not impacted. A contractor Advance Environmental performed cleanup. Spilled caustic was removed. The floor and trench was then rinsed. Successful cleanup was confined using litmus paper. All materials were drummed for disposal as hazardous waste. The cause of this event was the chemical feed pump lost its prime and stopped pumping, causing dilute caustic to back up into the constant head pot and overflow onto the floor. All operators who are responsible for pumping chemicals were instructed as to how the chemical feed system operates and knowing the status of their equipment. This system was designed as a totally manual system. The station is working with System Engineering to determine if it should be automated. Close out. (JHO)"
Remarks:	"SPILL CONTAINED BUT NOT CLEANED - UNKNOWN CAUSTIC AGENT."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 2/2/04. J.Krimgold @ site. Observed about 2- 3 gallons of oil in the tank room spread over debris and concrete floor. Probably leak is in the overhead fill line. Ordered to clean up and fix the line. 2/25/04. J. Krimgold spoke to Rene (Eastmond). He confirmed that they picked up one 55 gal drum with contaminated debris and the leak caused by a pin hole in a fill line. The line was replaced all the way to the sidewalk. No contamination was found during pipe excavation. NFA. "
Remarks:	"they were told that the tank had a leak. when there guys got there they discovered that there was about an inch of oil on the ground.none of it has been cleaned up yet. they are still trying to get a hold of the owner"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID: 110004508872

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ABOVE GROUND TANK (Continued) **S117395165**

DEC Region: 2
DER Facility ID: 458269
DEC Memo: "1/6/15-Zhune called A-1 Crown Corp, spoke to the secretary. She said Philp is in the field. She will ask him to call back. A-1 Crown Corp. 516-939-2959 1/6/15-Philp called and said. He tested the tank and the tank failed the test. Tank is 17000-AST. PBS #2-112056 The tank is sitting on the floor. Tank is rusted. He did not see any oil on the ground. Riteway is going to replace the tank. 1/6/15-David from Riteway sent the following email We did not do it directly for the owners, we did it for: Marlande Heating Corp 700 East 133rd St Bronx, NY 10454 718-993-4350 You can ask for Frank. He should be able to get information you are requesting. 1/6/15-Zhune spoke to Frank. He said they cleaned the tank. They tested the tank and the tank failed. They send the proposal to the board President (Frank) to replace or abondon the tank. 1/6/15-TTF letter sent to: Mr. Frank Sciame Ritz Tower 465 Park Ave. NewYork, NY 10022 04/10/15-Hiralkumar Patel. alternate address: 101 E 57th Street, 103-113 E 57th Street no other spills found. PBS #: 2-117056. as per PBS record, the site has one (1) 17,000 gal #6 oil AST in subterranean vault, in-service. the PBS registration expired on 02/25/2008. ---------- 2:28 PM:- left message at Ritz Tower. 2:35 PM:- received call from David Conlon, chief engineer at Ritz Tower. inquired him about leaking tank system. he mentioned that the tank system has been removed and they are working on gas conversion. asked him to submit required report by the end of 04/17/15 and immediately renew the PBS registration. C.R.P. Associates **property owner as per NYC property tax record** The Ritz Tower Hotel Inc. 465 Park Avenue New York, NY 10022-1919 Attn.: David Conlon Chief Engineer Ph. (212) 909-4441 (212) 755-5000 Fax (212) 909-4598 email: dconlon@ritztower.com Richard Veffer Managing Director The Ritz Tower Hotel Inc. email: rveffer@ritztower.com 2:52 PM:- sent email to Mr. Conlon including copy of letter dated 01/06/15 and PBS application. asked him to submit 1) PBS renewal application immediately and 2) tank test failure report by the end of 04/17/15. email copied to Mr. Veffer. 04/13/15-Hiralkumar Patel. 1:23 PM:- spoke with Rob at Riteway. they have removed the tank and found contaminated dirt underneath. contaminated dirt from 1/3rd of the tank room has been removed and a concrete floor is found underneath the dirt. currently, a temp tank is located in the clean out portion of the tank room. Riteway is waiting for approval to remove remaining contamination. Rob mentioned that the tank room was partially filled with dirt prior to installing the square tank on wood saddles. 04/30/15-Hiralkumar Patel. 3:48 PM:- sent email to Mr. Conlon and asked him to submit required documents immediately. email copied to Mr. Veffer and Rob. 05/05/15-Hiralkumar Patel. 11:49 AM:- received email from Rob. he mentioned that another environmental company is performing rest of the cleanup. Riteway will obtain soil samples and gather all necessary documentation from the contractor and forward the closure report. 08/14/15-Hiralkumar Patel. received email from Mr. Michael. he mentioned that debris in tank vault has been removed and disposed off in accordance with regulations. Charles G. Michel Charles G. Michel Engineering, PC Ph. (914) 949-5112 Fax (914) 949-5116 email: cmichel@cgmengineering.com PBS registration has been renewed. 11:54 AM:- sent email to Mr. Michel including copy of email dated 04/10/15. informed him that the department requires immediate submission of investigation/cleanup report. email copied to Mr. Veffer and Mr. Conlon. 08/17/15-Hiralkumar Patel. received email from Mr. Michel (at 4:59 PM on 08/14/15) including letter report.

ABOVE GROUND TANK (Continued) **S117395165**

abstract: - removed the 17,000 gal tank - following the removal of tank, soil samples were taken from below the tank and above the concrete floor slab in the oil tank vault, which found contaminated - all soil removed from tank vault - soil borings installed through tank room concrete floor and collected soil samples - found SVOC contamination in samples - building owner is retaining a structural engineer to study potential impact to building structure during further remediation the report is missing condition and locations of piping attached to the tank. it is also missing scaled site map with sampling locations. 10:45 AM:- left message for Mr. Michel. 3:33 PM:- sent email to Mr. Michel and asked to submit scaled site map with sampling locations. also asked him about condition and locations of piping attached to the tank. email copied to Mr. Veffer and Mr. Conlon. 4:42 PM:- received email from Mr. Michel including site maps and copy of tank removal affidavit (previously submitted). the site map shows boring location, but no notation. also, tank removal affidavit does not provide information whether lines were cut and removed or capped in place. 08/18/15-Hiralkumar Patel. 11:44 AM:- spoke with Mr. Michel and asked him about location and status of tank piping. he mentioned that the fill and vent line to the 17,000 gal tank were running in an old shaft that was used as coal chute in past. the supply and return lines of the 17,000 gal tank were aboveground in basement. he mentioned that all the lines were removed. currently, they have a temporary tank on-site with separate set of piping. also asked Mr. Michel to submit a site map with sample notations. asked him to submit a detailed boring logs including total boring depth, sampling depth, soil type, observations and PID values (if screened). he will contact Riteway, who has conducted subsurface investigation through tank room floor. Mr. Michel mentioned that property owner is planning to start excavation of contaminated soil underneath the tank room floor. strongly suggested Mr. Michel to completely delineate soil contamination (horizontally and vertically) prior to beginning excavation. he will discuss with property owner. 08/19/15-Hiralkumar Patel. 3:40 PM:- received email from Mr. Michel including site map with sampling locations. as per the map, all samples were grab samples collected from 3 ft depth. he will submit clarification on the piping removal. 09/02/15-Hiralkumar Patel. 3:23 PM:- sent email to Mr. Michel and informed him that the department has not received required documents yet. email copied to Mr. Conlon and Mr. Veffer. 3:30 PM:- received email from Mr. Michel. he inquired what specific documents are missing. 09/11/15-Hiralkumar Patel. 2:45 PM:- sent email to Mr. Michel. informed him that the department is still waiting on clarification of piping location and status; and detailed boring logs. email copied to Mr. Conlon and Mr. Veffer. 09/21/15-Hiralkumar Patel. 2:37 PM:- spoke with Rob at Riteway. he mentioned that after cleaning the tank room, they drilled boreholes through the concrete floor and collected soil samples from 3 ft depth beneath the tank room floor. they have not screened any soil. he confirmed that all the piping for the 17,000 gal tank were running aboveground in basement. the fill port was right adjacent to the building wall. he also confirmed that no release was noted from any of the piping. 2:51 PM:- spoke with Mr. Michel to clarify two sets of sampling results. he mentioned that the sample results from Chemtech are for soil samples (topsoil, 2depth, 4depth, 7depth, 10depth) that were collected from dirt above the tank room floor and sampling depths were in inches. the sample results from Pace Analyticals are for soil samples collected from 3 ft depth beneath the tank room

ABOVE GROUND TANK (Continued) **S117395165**

floor. reviewed both set of sample results. some SVOC contamination was noted in dirt samples from above the floor, but higher SVOC contamination noted in soil samples from beneath the tank room floor. soil analyticals (3 ft depth): ----------Sample 1----Sample 2---Sample 3---Sample 4---Sample 5---Sample 6 Acenaphthene----------4,400-----150,000------2,800-----18, 000----------35,000 Acenaphthylene----------1,100-----140,000 Anthracene----------11,000-----280,000----------22, 000-----16,000-----39,000 Benze(a)anthracene-----15,000-----350,000-----10,000-----32, 000-----29,000-----55,000 Benzo(a)pyrene---------12,000-----270,000------8,000-----25, 000-----21,000-----45,000 Benzo(b)fluoranthene---16,000-----360,000-----12,000-----31, 000-----30,000-----58,000 Benzo(g,h,i)perlene-----4,000-----180,000------2, 700----------15,000-----35,000 Benzo(k)fluoranthene----5,300-----160,000------4, 900----------35,000 Chrysene----------15,000-----350,000------9,400-----29, 000-----26,000-----53,000 Fluoranthene----------45,000---1,100,000-----32,000-----94, 000-----83,000----170,000 Naphthalene----------16,000-----550,000-----15,000-----32, 000-----20,000-----67,000 Phenanthrene----------50,000---1,200,000-----33,000-----94, 000-----79,000----170,000 Pyrene----------29,000-----730,000-----21,000-----63, 000-----55,000----110,000 3:28 PM:- spoke with Mr. Michel. he mentioned that contractor has dug test pits (3 ft by 3 ft and approx. 2-3 ft deep) in the tank room for structural integrity investigation, prior to starting remediation of SVOC contamination noted in samples collected by Riteway. after digging test pits, they noted approx. 2 inch thick tar-like membrane underneath the tank room floor. the membrane has petroleum like odors. they found clean soil underneath the membrane. soil samples have been collected on 09/18/15. asked Mr. Michel to include soil classification data in next report. based on available information, SVOC contamination noted in previous testing may be due to tar-like membrane underneath the tank room floor. 10/07/15-Hiralkumar Patel. 2:53 PM:- received email from Mr. Michael including sample results. four soil samples were analyzed. lab reports include two different results for the same sample. as per email from lab, samples were received by the lab with 22 degree celcius temperature as there was no ice in the cooler. also some of the jars were broken. 10/08/15-Hiralkumar Patel. 3:21 PM:- sent email to Mr. Michel and asked him to submit site map with sampling locations and to explain different results of the samples and improper transfer of the samples to the lab. 3:42 PM:- received email from Mr. Michel. he mentioned that new samples will be taken in next several days and documents will be submitted after receiving results of new samples. 10/09/15-Hiralkumar Patel. received email from Kosta Kamberis (at 4:01 PM on 10/08/15) from Environmental Services NYC. he mentioned that two of the small jars were broken during shipment. these four samples were collected from two locations in order to see the impact of the asphalt layer to soil sample compound concentrations. they plan to collect six additional samples. he also mentioned that the same sample appear to have difference results

ABOVE GROUND TANK (Continued) **S117395165**

because the lab run analysis for the original sample and another analysis diluting the sample. 12/07/15-Hiralkumar Patel. 2:12 PM:- received email from Mr. Michel including sampling report. abstract: - six (6) soil samples were collected from 3 ft below slab - no VOCs noted in soil samples - SVOCs noted in all soil samples 2:50 PM:- spoke with Mr. Michel. he confirmed that soil observed underneath the tar membrane was a backfill material. after reviewing available information, case closed based on following: - case reported due to tightness test failure of 17,000 gal aboveground tank - tank was removed - no contamination noted in soil/dirt samples from area between the tank and tank room floor - noted SVOC compounds in soil samples from soil below the tank room floor which could be result of previous use of the area (as coal vault) and tar like membrane noted underneath the tank room floor 3:06 PM:- sent spill closure letter to Mr. Veffer. letter emailed to Mr. Veffer and Mr. Michel."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 142-435: OPERATING SUPV LUIS ROMAN # 27270 I & A SOUTH reports that at the location of F/O # 8 E 41 St in V-6183 on feeder 4M60 that Mr. J.Jones #48534 splicer, also of I&A Dept. was walking by above said vault and discovered on odor of oil coming from v-6183. Upon investigation Mr. Roman has determined that it is a bottom leak and is requesting 4M60 OOE/1, and as of 14:41 it is out. Mr. Roman goes on to report that it is approx. 15 gallons of transformer oil and at this time he is not able to tell the amount of water. He is also requesting an over 50 tanker, and has a crew standing by on location for clean up. Two samples have been taken PCB & ID. Tag #35907 Placed. No sewers or waterways affected by this spill. Update 4-21-02 @ 19:24 hrs Lab Sequence Number: 02-03386-001 Date Approved: 4/21/2002 Aroclor 1260 150.6 ppm EPA 608/8082 Update 4-22-02 @ 06:15 hrs J Lguori #14084 reports that a partial cleanup is complete as of 05:00 hrs. 40 gallons of oil and water mix were removed from the floor and 270 gallons of oil from the tank. Speedy dry was applied to absorb remaining liquid. Final cleanup is pending removal of the transformer UPDATE: 4/22/02 EPA # NYP 004 097 846 was issued by the ERT for the partial Over 50 ppm cleanup. 5/17/02 02:15 R. Zablinis # 44404 Cable (cleanup) supervisor called to report that the cleaup was completed at 02:10. He stated that there was no tanker & that the flush truck did it all that the pcb count was 10 ppm. The structure was double wased with riptide cleaner rinsed down with flush truck. When I went to put in this information I saw a report of PCB's being 151 ppm. I immediatly called him back to find out the date on the lab report & found out his was from 1984. I told him that he had old results, that in fact the pcb's are 151 ppm. The flush truck was still on location & the driver A Tangen was notified of the situation. to seal up all the connections on the truck & bring it into 28 st yd & barricade it off as well as to put pigs around the truck. The forman reported that all of the cleanup people were wearing ppe & that none of them were exposed to the substance. He also stated that he will double bag the ppe & bring into the yard and dispose of as over 50 waste. He will rehang the tag on this location. I reported this to ERT. B. Pierre # 85932 at 03:10. & I also told R.

VAULT # V6183 (Continued) **S106002906**

Zablinis to call the ERT. 5/17/02 03:34 Chem lab S. Uzzo # 35527 was called & asked him to send someone to sample truck # 60562 at the W. 28 st yd. He said he will arange it. 5/17/02 04:00 The flush truck was in the yard & barricaded at this time. Lab Sequence Number: 02-04429-001 Date Approved: 5/17/2002 Aroclor 1260 120.0 ppm EPA 608/8082 "

Remarks: "con ed # 142435 transformer is leaking unk cause spill confined in man hole no smoke or fire no sewers or waterways"

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

GATEWAY VENTURES, LLC (Continued) **1011849759**

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"07/08/2010 See eDocs for Con Ed report detailing cleanup and closure DMP Comments from CON Ed EMIS Report: Timestamp: Description: Entered By: 07/23/2009 10:23 W.Lindsay # 19864 reports that he that he took samples for PCB & Oil ID on Chain of Custody # FF32565 & Env. Tag # 63085 was hung in MH33794. All work to be charged to account #U3459. Jordan, Peter 07/24/2009 12:24 At 12:19 M.Dunsworth O/S reports that the tanker on location has removed 4000 gallons of oil & water mixed. Astoria will send out an under 50 tanker being that results were 18 PPM. Jordan, Peter 07/24/2009 19:39 Greg Greco #04736 reported at 17:34 hrs. that he found the source of the spill to be improperly capped cable ends on 2/0 paper cable. He stated that it looks like the cable end was pulled and capped ends were moved. He reshorted, capped and sealed the cable ends and now there is no oil visible in the manhole. He also stated that the second tanker filled up with water and he needs another tanker to complete the job since the hole is filling up again. Pellegrino, Robert 07/24/2009 19:47 Environmental Desk contacted Corporate Transportation to find out if another tanker was available. Pellegrino, Robert 07/24/2009 19:48

217677; W 40 ST AND 5 AVE (Continued) **S110307272**

Corporate Transportation reported that no additional tanker driver was availble. This incident will be re-classified to the Quarterly Report since the cleanup will not be completed in 72 hrs. Pellegrino, Robert 07/24/2009 19:50 Environmental Desk contacted Transportation to find out how much liquids were removed by the 2nd tanker. Mr. Newby stated that the 2nd tanker removed 4,000 gallons of liquid from the manhole. Pellegrino, Robert 07/24/2009 19:56 This incident is being re-classified to Quarterly Reporting since the manhole makes water and there is no available tanker to complete the job. Pellegrino, Robert 07/24/2009 19:59 CIG Sean Fernandez and ERT Steve Martis notified at 19:59 hrs. that this incident is being re-classified to Spill - Oil Deminimus Underground Quarterly Report since the manhole makes water and there is no available tanker to complete the job in 72 hrs. Pellegrino, Robert 09/02/2009 5:32 Operating Supervisor Steven Colon has called @ 0510 hrs to report that in process of pumping down manhole with jagger pump, a fitting began to leak approx. 1 gallon of water to asphalt. The pump was turned off and water was cleaned up. No water or liquids went to waterways or drains, and he adds that the hose was on the pads that the tanker used. Curtis, Frank 08/23/2009 17:11 Corrective Action: There is a fresh water leak in this structure, DEP has been contacted. See B-Ticket ME09018128 for more details. Nelson, Kelvin""

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS NOTES 142529 oN 4/26 @ APPROX 15:57 HRS, J Catalano # 60894 of Brk/Qns FOD reported to me that he found what he called a sheen of approx 1 quart of unknown oil on top of 200 gallons of water. He was on a Trouble Feeder . To his knowledge no sewer/waterway was affected. The source and the cause of the spill are unknown. The spill was on the water. There was no movement on the standing water, no evidence of a concrete sump or a sump pump running. There were no substantial cracks observed in the structure. Two samples (one for PCB and one for ID) will be taken. The courier will be called by the finder. Environmental tag # 30432 was hung and Chain of Custody # BB 00046 will be used. The initial cleanup action action was to Diaper up the spill, but it was undiaperable. I made this incident an unknown oil as opposed to a 24- HR because of the unavailability of crews due to the work conditions at this time. 4/26 @ 18:05 HRS Notified Transportation for the need of an over 50 to remove liquid from structure and the Undeground can suit up for over 50 PCB conditions and repair Feeder 29 m 43 as needed. 04/26/02 @10:14 hrs. Lab-results 02-03601-001 Aroclor 1242 < 1.0 ppm Lab-results 02-03602-001 Analysis indicates the presence of substance similar to a dielectric fluid. UPDATE 4/27 @ 12:48 HRS Spoke to M Garick #12188 and he informed me that approx 440 gallons of water was removed and one(1) drum of solid waste and PPE's were removed. The Envvironmental tag # 30432 was removed. The structure was Double-washed with SLIX solution. This cleanup is complete as of 11:30."

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region

SILVERSTEIN PROPERTIES INC (Continued) **1004762556**

that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"6/9/14: Mahat Site Visit: DEC Mahat responded to the reported spill in Manhattan during the fuel oil conversion. The building has a 7,500 (PBS - 2-365815) gallon tank and recently converted from #6 to #2 fuel oil. Retained contractor cleaned the tank and filled it with 3,200 gallon of #2 fuel oil. The tank or pile line or both could be failed at this time. Tank has been emptied by sub-contractor (Rite Way). Tank has no product and petrometer read zero product. Post spill pictures are uploaded on D2 for reference. A system test is schedule today and to determine the leaking area. Meantime, two 275 gallon talk will be supplied to the site as a temporary solution. DEC is awaiting for the tank test. No vapor and odor issue. Point of Contact : Anthony Milanese ** Contractor: East Cost Petro 718.402.5107 Max ** Super: 646.963.3746 7/3/14: Mahat T/C : DEC Mahat contacted Mr. Greg inquiring about the status of the repair on the tank. He mentioned that the building is still running on temporary tanks. He has proposed the management to abandon the tank in place and install a new tank right next to it. He will forward the spill closure letter in near future. Gregory Quattlander *** Retained Contractor GregQ@NYPlumbing.com 87-71 Lefferts Boulevard Richmond Hill, NY 11418. 917-681-0933 Cell 718-441-6800 Office 718-849-2905 Fax 8/19/14: Mahat An email is sent out to Greg inquring about the progress in the spill case. Greg is sending a closure report to the Department for a review. 12/14/15: Mahat DEC Mahat contacted Greg and request him to provide the paper work associated with the tank system. "
Remarks:	"Basement tank leak noticed during a conversion project. Cleanup will follow pumpout which is going on now."

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"e2mis 149289 7/14/03 Mike Reiter #27277, I&A South, reportedthat he found approx. 150 gallons of transformer oil in vault V0538 located at 38 West 43 Street between 5th and 6th Ave. The source of the spill is the transformer and the cause is a possible bottom leak due to very heavy rust. The oil was found in a concrete vault. Mr. Reiter stated that it appears to be all oil and no water. He is working under account no. 80484. The feeder associated with this vault is

VAULT #0538 (Continued) **S106016078**

Feeder 5M80. There is no evidence at this time of any release to sewer or waterway. Once the vault is drained the drain connection will be checked. Samples will be taken for PCB and Oil ID. No initial cleanup action was taken due to the amount of oil in the vault. Cleanup is pending an Over 50 Tanker and crews. Update: Lab Reasults,Mon 7/14/2003 20:27 hrs Lab Sequence Number: 03-05802-001 TOTAL PCB 17 ppm Update: 7/14/03 @ 21: 20 hrs. Joe Cumberbatch, I&A South Operating Supervisor, reported at 21:00 hrs. that 620 gallons of oil was removed from the transformer. The transformer is an Allis Charmers with a total capacity of 780 gallons. Therefore, 160 gallons of oil leaked into the vault. The floor drain was checked and found clogged. He reported no release to sewer. A second sample was taken from the transformer. The vault floor was double washed with Slix and rinsed with the Vactor truck. Oil absorbent granules were placed around the transformer. The drain was plugged with absorbent pigs. These pigs were also placed around the drain. The partial cleanup was completed at 21:00 hrs. Final cleanup is pending transformer removal. 7/15/03 @ 07:23 hrs. Lab Sequence Number: 03-05807-001 TOTAL PCB 20 ppm Lab Sequence Number: 03-05803-001 Analysis indicates the presence of a substance similar to a dielectric fluid. UPDATE 07/25/03 05:10 hrs V Mirance # 58484 Operating Supervisor Manhattan Cable reported to N Muldoon #18723 that the cleanup was completed 100% @ 04:00 hrs. The structure was double washed with slix and 55 gallons of wash water and all debri was removed by the flush truck. UPDATE: A new transformer was installed 8/1/2003."

Remarks: "Above material discovered at above location. Samples have been taken and cleanup is pending crew response. Con Ed# 149289."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL Con ed e2mis notes: Approx 10 gals dielectric oil mixed w/65 gals water in V-2445, sump pump not working, pcb sample taken, as per cinde dielectric oil is 45ppm. Cleanup started, found spill leaking from waterbury fitting. Repairs were made. No other oil filled equipment in structure. Crews broke piping in trap and found no indication of oil. Drained water and oil mix in vault into 55 gallon drums. Double washed floors and walls with slix and water. Soaked up free standing oil with oil absorb and removed to solid waste drum. Transported 3 liquid and one solid waste drum to West 28th. PCB storage area as per CEP >50 ppm instructions. Lab Seq #99-08768 AROCLOR #1260 PCB count 19 ppm Flushed and cleaned vault 2445 with Flush truck, removed oil tag, reclassified drums to 19ppm. Final cleanup complete. "
Remarks:	"TRANSFORMER LEAKING FLUID ONTO 65 GALS OF WATER - CLEAN UP IN PROGRESS - CON ED 127-343"

DEC Memo:	"Obligado (Desk Duty Officer)- I spoke with David Duke of Conedison. 3 gallons of dialectric oil found in a transformer vault. This is a bottom leaker , in that the transformer failed will be taken out of service. Additionally, a 3rd party at adjacent building at 1 West 42nd Street complained of oil seeping through the basement wall into the basement. According to David Duke, there was approximately 1 pt of water/oil mixture. They sent a sample to a lab for a fuel ID for the oil in the basement. Lab analysis takes 6 hrs. He will call me back with results. 10/8/13 - Obligado - I followed up with ERT. They said the oil in the basement was trasnformer oil and was less then 1 ppm PCB. They steam cleaned the basement."
Remarks:	"oil in vault/oil is leaking into private home basement/investigation underway"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Con Ed e2mis #149136: 07/08/03 05:10 hrs M Anderson # 18962 of Manhattan F.O.D reported to N Muldoon # 18723 that @ 04:35 hrs while trouble shooting on Feeder 25 M 44 in manhole 33831 located at the N/E/C E 45 St & 5 Ave discovered approx 1 pint of cable oil had leaked from a lead joint onto dirt on the concrete floor. Spill is contained. The source of the spill is a lead joint. The cause is a leak. There is oil filled equipment in the structure - primary cable and lead joints. There is no water in the structure just a lot of dirt and debris. A sewer connection, concrete sump and any substantial cracks could not be verified due to the amount of dirt. No sump pump running. Spill tag # 33529 was installed. Two wipe samples were taking one for PCB and one for OIL ID on a priority E basis. Chain of Custody # CC19979 was used. Initial cleanup action taken by placing absorbent pads and taking samples and hanging tag.

MANHOLE 33831 (Continued) **S106015838**

#9 was notified about the leaking joint and is on its way to the location. Account 40134 is being used. Cleanup pending evaluation of feeder from # 9. UPDATE 07/08/03 06:20 hrs Shift Manager J Mejias request this incident be changed to a new spill because of the amount of work to be done on the feeders and would not be done with in 24hr timeframe. Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 265.1 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082 TOTAL PCB 265 ppm Notified CIG, spoke to Murphy # 87549 @ 13:27 about the PCB count above. According to the Shift Manager Peterson, we do not have Crews to go on this cleanup right now due to the Heat contingency - will schedule the cleanup as soon as the conditions permit 7/8 @ 14:04
NOTE::
Contact F Romano when this Cleanup is scheduled 7/8 at 15:44 Cleanup scheduled for 7/9 @ 07:00 UG notified and faxed documentation for over 50 DRY cleanup EPA # NYP 004 112 785 Logger R Pagano # 48703 7/8 @ 17:54 Lab Sequence Number: 03-05633-001 Date Approved: 7/08/2003 E2 Incident Number: 149136 Date Received: 7/08/2003 Chain of Custody ID: CC19979 Date Sampled: 7/08/2003 Oil Identification Analysis by NYSDOH 310-13 (Hydrocarbon Scan) MATRIX: OIL GRAB LOCATION: NEC 45 ST & 5 AVE STRUCTURE: MANHOLE 33831 FEEDER ID: Analysis indicates the presence of a substance similar to a lubricating oil. 7/9 @ 12:53 At 11:46, Crissey UGS reported to me that the cleanup has been completed at 12:45 on 7/9/2003. On barrel of solids with PPE's was picked up. The strusture was double-washed with SLIX . The Environmental tag # 33529 was removed. Crew...Woods # 21014.....Bazan # 90224.....Parios # 87544 Update: 8/14/2003. Underground North Planner S. Cioffi reported that field verification showed there is no oil in the strucutre. The leaking cables have apparently been repaired. "

Remarks: "CON ED 149136. CLEAN UP WILL NOT BE DONE WITHIN 24 HRS DUE TO WORK NEEDED TO BE DONE IN MANHOLE. 1 PINT SPILL."

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include;

BMT COMMODITY CORPORATION (Continued) **1010032695**

Incident Tracking, Compliance Assistance, and Compliance Monitoring.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No

CON EDISON - SALMON TOWER (Continued) **1000111679**

Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Registry ID: 110004417729

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the

CHUGAI BOYEKI AMERICA CORP (Continued) **1004569677**

Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

MERRILL LYNCH BUILDING (Continued) **1016073952**

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"New elevator equipment being installed in a renovated building. Equipment failure caused leak into elevator pit. Elevator pit is built directly over a sub-basement. Oil leaked into this sub basement room.... Cleanup is complete. Contractor will send photos and cleanup report. e-mail from Mr. Napolitano: I attached the waste manifest and some pictures you requested for Spill # 08-10822. Alexander Wall recently completed the required oil spill remediation work at this site. Hydraulic oil was observed leaking from the elevator pit in the sub cellar. The oil spread out into a 400 square foot section of the basement and a mechanical closet. Some pictures of the area are attached. Our remediation plan included the following: We contacted the New York State Department of Environmental Conservation to notify them of the spill and to obtain a spill number. We installed a charcoal filtered 2000 c.f.m. air filtration unit in the area to prevent additional oil odors from spreading throughout other areas of the building. We cleaned and moved all contents from the work area. We then triple cleaned the concrete basement floor with a non solvent based detergent. All contaminated debris was drummed, manifested and transported to a N.Y.S.D.E.C. approved disposal site in our Part 364

ARMANI (Continued) **S109413948**

permitted vehicle. The waste manifests are attached. Uncontaminated contents were returned to the area after the clean up was complete. Please call or email me with any questions you might have. Paul"

Remarks: "Caller states an elevator failure caused oil to spill into the pit and into a room below. Spill was contained and cleaned."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY E2MIS 135367 2/02/01 11:25 hrs. Joe Ford #49821, Maintenance Services, reported at 10:54 hrs. that he found at 10:30 hrs. a scum on top of dirty water in manhole M58875 located south of the southwest corner of 5th Ave and East 52nd Street. He placed absorbent pads down on top of the water to absorb the scum. He saw the water and started pumping. As soon as the fluid came out of the hose he noticed that the fluid turned black or dark and smelled like oil. He immediately stopped pumping. He reports that approx. 5 gallons of this dark fluid went into the sewer. The time that the release was verified was 10:40 hrs. CIG Mark Schlagel #18276 notified at 11:05 hrs. Environmental Desk called Maintenance Services Supervisor and requested that Mr. Ford call back with additional information in order to complete the report. Joe Ford #49821 reported at 11:20 hrs. that approx. less than 1 gallon of the unknown fluid was on the street surface. He reports now that there was no oil on top of the water. He believes that he pumped some of the sludge mixed with water from the bottom of the manhole onto the street and into the sewer. He reports that there is approx. 100 gallons of dirty water and no oil in the manhole. No private property affected. Mr. Ford was performing a manhole inspection when this incident was reported. The source of the dark fluid is possibly the sludge in the manhole and the cause is the de-watering of the manhole. There was no active fire or smoke involved. There was standing water but no visual movement. No visible substantial cracks. A sewer connection and concrete sump within the manhole cannot be verified. There was no sump pump running. Spill tag #28406 was installed. Two samples for PCB & ID were taklen by Joe Ford #49821. His helper is W. Shannon #87269. I requested an 8 hr. sample priority. Samples will be brought back to Mr. Ford's office for pickup by the courier. Intial cleanup action taken by placing pads on street and cleaning street. Mr. Ford was directed to place the soiled pads back in the manhole. Cleanup of manhole pending lab analysis results. Note: ERT Bill Capune #85485 called at 11:45 hrs. I updated him with the status of this incident and requested that he go to the site to investigate this incident and to verify the no oil report. Parking Access Info. : Manhole is in bus lane. No parking anytime. Update: 02/02/2001 received at 20:60 Lab results for Sequence # 01-01112 Date reported, received and sampled 02/02/2001 Aroclor -- 1260. PCB < 1.00 PPM UPDATE: 2/02/01 @ 22:33 hrs. ERT Bill Capune could not get to this location to verify possible oil in manhole due to another higher priority incident. He stated that he would go with the report of no oil in manhole as reported by Joe Ford of Maint. Services. Samples were taken and this should be sufficient verification. 2-3-01 @ 11:56 As per lab sequence # 01-01114-001 analysis indicates sample is similar to lubricating fluid.....J Moran #01182 From: Selesky, Joseph Sent: Sunday, February 11, 2001 8:20 PM Subject: Spill Cleanup Update m h 58875 Categories: Email Update 01:date: 2-9-01 02.Time: 07;00 03.Incident No: 135367 04.Structure: 58875 04.Structure Type: MH 05.Location: s/w/c 52 5th ave 06.Supervisor: j selesky 07.Cleanup

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY 3/13/03 1100hrs Dan Pontecorvo ERT- approx 10 customers affected. Media on scene. No asbestos release confirmed. ERT on site. Will update when they have more info. Trying to valve off main at this time. (KMF) 3/13/03 1150hrs Dan Pontecorvo ERT- Watermain break has possibly affected steam main. Are treating as asbestos contaminated (level B) due to coal tar wrapping. DEP on location. EH&S Randy Price and ERT Mark Maser on site. (KMF) 3/13/03 1430hrs Dan Pontecorvo ERT voicemail- Watermain break at hydrant(truck backed into hydrant). Took samples for asbestos which returned negative. Contractor (ATC) decontamiated a couple of fire trucks and one Con Ed vehicle. Cleaning streets at this time. Have not yet confirmed that steam main has been affected.(KMF) 3/13/03 1615hrs Confirmed through DEP Hazmat that asbestos analysis returned positive. (KMF) Con Ed e2mis #147513: At 09:45 the Steam Ops. Dispatchers desk recieved call from FDNY Oper.# 280 reporting heavy vapor from hole in street. Water running out of MVMH onto street at 52 st. e/o 5 ave. At that same instant M.Mangan emp. # 20062 dispatched crews. Crews arrived on loc. isolated steam main, notified consumers prior to loss of service. Con Ed Steam took three samples, all came back negative. DEP took six samples, three came back with traces of Asbestos. Ten customers were involved, nine were affected, one is a dual service. No fire, smoke, injuries,no impact to private property, sewer or waterways. Cleanup is proceeding as ACM. "
Remarks:	"possible steam main rupture - isolation in progress "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

HSBC TOWER (Continued) **1016118067**

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no 159591 R.Jenkins #56029 discovered approx. 2 pints of an unknown oil in V1100. No sewers or waterways were affected. The source and cause of this spill is unknown at this time. There is oil filled equipment in V1100. There is no water in V1100. R.Jenkins#56029 does not see a sump or a sump pump. There are no substantial cracks in V1100. A yellow environmental tag numbered #38681 was hung in V1100. There were two samples taken from V1100, one for PCB's and one for oil ID. There was no initial cleanup action taken. The cleanup is pending test results and possible transformer removal. 7/6/05 16:02 Received lab results, Lab Sequence Number: 05-06511-001 < 1.0 ppm 07/07/05 07:35 hrs. Lab Sequence Number: 05-06540-001 No oil extracted from sample. Sample is not an oil base material. Update: 7/21/05 @ 00:25 hrs. On 7/20/05, Melissa Tamez # 88368, I&A operating supervisor reports that upon follow-up inspection of the vault there was no oil observed in the vault as initially described. Sample (see above) supports no oil based material in vault. We found that the unit had pressure in it and there was no oil observed in the structure. We found a thick, gooey substance that looks like restaurant garbage. This vault is on a 26M feeder, which is a district 2 job. A. Drummings # 84163. Closed. 9-13-05. GB. "
Remarks:	"2 pints of unknown oil in vault - no water Cleanup pending lab results "

MANHOLE 33871 (Continued) **S103572911**

2-PTS OF UNKNOWN SUBSTANCE MIXED IN 100 GAL'S OF WATER IN MH-33871 S/E/C E.52 ST 5 AVE IT'S CONTAINED,DID NOT ENTER ANY WATERWAY OR SEWER.DOES NOT SEE ANY CRACKS OR SUMP IN THE MANHOLE.FOREMAN ON THE WAY TO TAKE SAMPLE AND HANG SIGN.....BYALICK#40075 10/13/98 18:36 FONTANEZ REPORTS SAMPLE TAKEN AND TAG HUNG#17898 If this is a Con Edison manhole it contains electrical cable and splices. Many manholes have a sealed sump in the floor which is used to allow runoff when pumping the structure. A hose is place in this sump and water on the floor will flow into the sump allowing the floor to be cleaned. If cleaned prior to analysis of the fluid, the structure will be cleaned as >50 PPM and all liquid and waste will be manifested accordingly. The structure will be double washed with a degreaser, i.e. Slix. All cleaning material and PPE will also be treated as >50. If any sludge is found within a manhole it is treated as lead contaminated and manifested accordingly. The spill identification tag will remain secured to the structure until the analysis is completed and if <500 PPM the signage will be removed. If the analysis is >499 PPM, a grid will be prepared for wipe testing the area. Until the analysis of the wipes are proven to be <10ugs/100cme2 all additional waste produced from the structure will be treated as the original analysis. If this spill occurred in a transformer vault containing a sump pump and there was a possible release, the drainpipe trap will be dismantled to determine if oil was released. Sludge found in a vault, through historical analysis, has been determined not to contain lead. 10/13/98 18:44 CLEAN UP PENDING RESULTS.. 10/13/98 18:44 C.I.G MASSERIA #76972 NOTIFIED 10/14/98 21:21 Received Lab Report, Lab sequence # 98-11003 AROCLOR - 1254, PCB - <1.0 PPM R.Bruns # 21106 10/16/98 O.S (UG) P. Setaro # 01481 reports clean up complete in MH 33871 SEC E. 52 St. & 5 Ave on 10/15/98 @ 20:00 hrs. Treated Wastestream as >50 ppm PCB Removed 790 gals. Oil/Water to >50 tanker Generated 2 drums solid debris - Taken to Chemwaste via Corporate Transporation. DEC Memo:	"08/25/09 - See eDocs for Con Ed report detailing cleanup and closure. Sangesland spoke to Steve Martis from Con Ed (917-416-5423) He said building is a city library under renovation. Vandals broke the grate over a transformer vault and part of the grate broke off and broke a bushing on the transformer. Dielectric fluid went down a drain. After investigations they found the drain was actually contained into a sealed adjacent vault where the sump pump had been turned off. All the fluid was accounted for and properly cleaned. No release to the environment."
Remarks:	"Vault 7006; unknown amount of the pint spilled went into drain which may lead into storm drain. Cleanup pending."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Obligado - Spoke to Rob Hill. There was a spill from the boiler to the boiler room. The room is 15 x 15 so he estimated approximately 3-400 gallons on the boiler room floor. They do not yet no the cause. A vac truck is on route within. 6/3/14: Mahat Site Visit: DEC Mahat responded to a reported 400 gallon # 6 fuel oil on the basement of a residential/commercial building in Manhattan. Spill was contained within the secondary containment on the boiler room. No drain and soil were impacted on the vicinity of the spill. Sump pump was turned off immediately after the noticeable amount of oil was observed. The cause of the spill was due to malfunction of a 3-way valve on feeder line from tank to the boiler. Minor vapor/odor issue on the first floor was reported to the super of the building. The management company retained a contractor to pump out the oil and power washed the containment with bio-degrease. Initial cleanup was performed while DEC staff was on the site. PBS: 2-606127: It is an above ground tank encapsulated with concrete frame. Super : James Hawkins cell : 646.533.4894 email : jhawkins@absre.com 7/3/14: Mahat An update Email was received from Mr. Chan: I just wanted to give you an update on 2 West 47th. We went and cleaned up the absorbent granules, but we still need to service the pit. We are currently servicing the pit once a week. There’s trace amounts of oil coming back into the pit. We will continue to service and document the progress and will keep you posted. Best regards, David Chan Riteway Tank Maintenance Corp. 700 Hicks Street Brooklyn, NY 11231 718.855.7272 phone 718.855.7244 fax DEC is waiting on a complete report from Rite Way. 8/27/14: Mahat DEC Mahat received an email from Dave about the clean up. We were last there on August 12 to inspect and change the white pads. At that time, there was no longer any oil to be recovered. The pits have water in them but no oil. We’ve taken some pictures too, but they do not do justice, it looks worse that what is there. All staining and dark areas are from years of buildup in dirt and soot. Please let me know if you like me to put together a final letter and report or if you need us to do something else. Thank you in advance! David Chan 11/5/14: Mahat e/c : DEC Mahat received a closure letter including manifest, pics and narrative cleanup actions. The report has been uploaded on D2 for reference. No resource (Soil and GW) were impacted due to spill. The spill area has been clean up properly (see pics) and no further action is required by the Department. Hence the spill case will be closed in the DEC database. "
Remarks:	"loss from boiler to interior room, c/u pending"

DEC Memo: "e2mis no. 155884: On 10/19 @ 16:45, Reiter # 27277 of I&A reported to me that @ 16:30 at location 9 W 57 St in V-7473 he discovered approx 5 gal of Transformer oil mixed with dirt. No sewer/waterway affected, though there is a sewer connection according to the Finder. He checked the trap and there is no release to the environment. The source of the spill is the transformer. The cause is a porous unit and has a leaky bushing. The sump pump was found disabled on arrival. The spill is on the concrete structure floor. Two samples for PCB and ID will be taken. No inital cleanup action taken at this time. Cleanup is pending equipment taken out of service. 10-19-04 @ 18:55 a partial clean-up was completed. 2 bags of debris was removed. No liquids. Oil booms, were placed around the sump pump pit and pads. I've received a call from Chem Lab.The lab results will take 25 hours to return, because it was a soil sample. See clean-up crew on peoples screen. Nov 1, 2004 13:35 Lab Sequence Number: 04-08552-001 MATRIX: SOIL GRAB TOTAL PCB 2 ppm 02-02-05 10:47 Lab Sequence Number: 05-00886-001 MATRIX: OIL GRAB DESCRIPTION: OIL FROM V 7473 TOTAL PCB 5 ppm 2/4 @ 05:50 G Byrne # 81264 reported to me taht the Final cleanup completed at :05:45 HRS. All solid and liqiud waste was removed by the Vactor truck. The structure was double-washed with Citrus degreaser. The Environmental tag # 38856 was removed. Crew...Stiles # 03740....Fillisetti # 07376....Curtin # 19713. Thr transformer was removed and a new transformer will be installed for the remediation of the spill. Logger R Pagano # 48703 "

DEC Memo:	"05/03/07 - See e-docs for Con Ed report detailing cleanup and closure. 161693. 10/28 & 11:45. Asfour # 49908 of I&A reported to me at 11:30 that at 40 w 57 St in V-8868 he discovered approx 10 gal of Dielectric and 30 gal of water. The spill migrated to v-5168 with 20 gal of dielectric. He was doing 460 Inspection on Feeder 9M21. No xewer/waterway affected, no private property affected, no fire/smoke involved, no injuries and weather did not contribute. The source is the Transformer and the cause is a Bottom Leak. The spill is in the concrete structure. There is no piping in the V-8868, but in V-5168 the Trap is being taken apart to check for impact. Ther is no movement on the standing water and no substantial cracks observed. Environmental tag(s) 41867 in V-8868 and 41868 in V-5168. (1)sample for PCB will be taken from each Vault and (12) PCB sample will be taken from the Transformer Unit. Chain of custody # EE 16840 for V-8868 and # EE 16850 for V-16850. Feeder will need to be De-energized before cleanup action can commence. Logger R Pagano # 48703 10/28 @ 12:06. Asfour called the Environmental desk and told us that the Trap is clean. NO Environmental impact. Account # W 3257 "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE 6/1/06 - 3:50 PM - Spoke with representative from Petroleum Tank Cleaners concerning spill. A leaking fill line was reported in which Petroleum Tank Cleaners visited the residence to clean the site on the day of the spill. The spill was cleaned in its entirety and the tank was cleaned and repaired not long afterward. The representative reported the situation was not a big deal and there have been no further reports of problems since. Referred to Abramson Brothers, Inc. if additional information was required. Called Abramson Brothers in which there was no one in the office at the time that could give additional information. Awaiting return call concerning the case. - 6/1/06 Johnathan Antonizio, NYSDEC - HQ 7/1/06 - 1:30 PM - Called Abramson Brothers, Inc. concerning spill site and spoke with a general representative. Based on the information that was gathered previously from Petroleum Tank, they had no additional information based on the particular case, but haven't had reports of further problems at the residence. Based on the spill case's age, they did not have any hard copy records on file. However, based on the information provided by Petroleum Tank, no further action is necessary at this time. - 7/5/06 Johnathan Antonizio, NYSDEC - HQ."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no. 129501: Formel 47752 splicer of I&A while on routine inspection of switch in V7019, F/O 125-137 E 57 St, found a spill of approx. 5 gallons of transformer oil on floor of vault which had leaked from the bottom of the unit. Said spill was contained from migration to common sump (Group of 4 transformers) by placing pigs/pads, and the sump was plugged. No entry to sewer or waterway, no cracks, no water in vaults, a PCB sample was taken and tag #17793 was placed. Cleanup pending lab results. (The spill actually originated from the bushing and not the bottom.) Lab analysis SA00-00139 received on 1/5/00 at 18:05 hrs = 2 PPM PCB. At 1530 hrs. on 01/05/00 J. Arcoleo (ERT), J. McNeil (I&A), and D. Comenale (DEC) met at V7019. D. Comenale reviewed the spill condition in V7019 and found that spill condition was described accurately in the spill report sent to DEC. ON 01/07/00 SHIFT #1 UNDER THE SUPERVISION OF J.LIGUORI #14084, D.PACE #13149 AND J.MORGAN #14490 DOUBLE WASHED AND CLEANED THE FLOOR AND SIDE OF THE TRANSFORMER IN VAULT 7019. THE DEBRIS WAS REMOVED BY A FLUSH.TRUCK. YELLOW SIGN #17793 WAS REMOVED. AFTER THE CLEAN UP WAS COMPLETED THE TRANSFORMER WAS REINSPECTED AND IT WAS DECIDED THAT THE UNIT COULD BE SAVED. MR. PACE THEN REMOVED 100 GALLONS OF TRANSFORMER OIL. THIS WAS DONE TO BRING THE LEVEL OF OIL IN THE TRANSFORMER BELOW THE SECONDARY BUSHINGS, SO A REPAIR COULD BE MADE. ON SHIFT #2 THE BUSHINGS WERE REPAIRED. MR. GILSON #17650 AND MR. MONTES#15927 REFILLED THE TRANSFORMER AND RECONNECTER THE SECONDARY CABLES. CLEAN-UP AND REPAIRS WERE COMPLETE AS OF 01/01/2000 22:00 HOURS."
Remarks:	"CLEAN UP PENDING - CASE #129501"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE 09/01/05: Unknown material discovered in a boring being performed as part of the 2nd Avenue Subway Project. Corresponding soil showed only minor hits of 2 VOC constituents. "
Remarks:	"address is 230 was 44th st on the southern sidewalk. Drilling up to 32 feet saw some unknown material mixed with water. putting the material into 55 gallon drums and shipping off site. Did the head space reading of the product mixed with the water and checked the pid 13.6ppm, collected a sample of the material mixed with water and sudmiited the sample to the lab for fingure print analysis. Working for NYC transit on the 2nd ave subway project. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 10/21/95 (Mulqueen notes): Dan Weisse, NYCDEP - there was explosion, everything under control. Transformer was on fire. According to Con Ed (Hanson 212-338-4014, Gas General Foreman 338-3352) was small explosion - nothing released to atmosphere or street. Does not know PCB count. Jim Slattery, Con Ed - transformer failure network. No release to outside, oil released inside vault. Smoke, no fire - not sure if water in vault. 34 ppm PCB. 10/21/95, 11:30 - call back from Tony Zic, COn Ed - Vault is dry. No water, no oil in or near sump. Easy clean up and will be done by 7:00 AM. Secret service putting pressure to end contruction ASAP. 10/23/95 (Engelhardt notes): Joe Devenny, Con Ed CIG - spots of oil on vault wall - 34 pppm PCB as per records. Enzo Catanzaro, NYCDEP - was a spill - sprayed onto wall of vault inside vault so DEP did not sample. 5/12/08: Spill submitted for closure by Con Ed with following information: The transformer that leaked on 10/21/95 was removed and replaced on or about 12/19/95. The vault cleanup was likely completed at the time of the replacement. Since the installation of the new unit, the vault has been inspected several times for various maintenance reasons. The last inspection was on 2/7/08 with no report of oil discovered in the vault. Close. (JHO)"
Remarks:	"CON ED TRANSFORMER ON FIRE IN A MANHOLE - NO CONFIRMATION THAT THERE HAS BEEN ANY SPILL - CHEMIST ON SCENE REQUESTED DEC NUMBER DUE TO PCBS IN TRANSFORMER"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all

ICC INDUSTRIES INC (Continued) **1004569626**

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"01/23/2009-HRAHMED-Spoke to Robert Valentin (212 949 9095). As per him a truck spilled some oil from a drum. Somebody put some sand on the spill. He don't know any further detail. Considering the magnitude of the spill, this spill is closed. "
Remarks:	"Caller states that the notifier did not have much information other than the fact that a 55 gallon drum was dropped off the back of a truck. Sand was sprinkled on top of oil. Please call contact person for information, as much information was not given. 1608 Dispatch received a call from Adrian Walsh requesting to speak with the Region 2 spills rep. regarding this spill. Her contact number is 212-570-4218. Dispatch advised the region 2 rep."

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 237331
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

J02 - Dispenser - Suction Dispenser
K01 - Spill Prevention - Catch Basin
I02 - Overfill - High Level Alarm
L99 - Piping Leak Detection - Other
A00 - Tank Internal Protection - None
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
B01 - Tank External Protection - Painted/Asphalt Coating
E02 - Piping Secondary Containment - Vault (with Access)
C01 - Pipe Location - Aboveground
D02 - Pipe Type - Galvanized Steel
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location: 3
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 11/16/2003
Capacity Gallons: 10000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

EPA Region: 02
Land type: Private
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2007

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

VERIZON - 56TH ST (Continued) **1016303930**

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number: 01
Tank Id: 60946
Material Code: 0002
Common Name of Substance: #4 Fuel Oil (On-Site Consumption)

Equipment Records:

B01 - Tank External Protection - Painted/Asphalt Coating
I04 - Overfill - Product Level Gauge (A/G)
L02 - Piping Leak Detection - Interstitial - Manual Monitoring
H02 - Tank Leak Detection - Interstitial - Manual Monitoring
C01 - Pipe Location - Aboveground
J02 - Dispenser - Suction Dispenser
K00 - Spill Prevention - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
F01 - Pipe External Protection - Painted/Asphalt Coating
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
I05 - Overfill - Vent Whistle
G02 - Tank Secondary Containment - Vault (w/access)
L09 - Piping Leak Detection - Exempt Suction Piping
A00 - Tank Internal Protection - None

Tank Location: 2
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
