Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no. 146-468: 12-23-02 @ 14:25 discovered 30 gallons of transformer oil had leaked onto the concrete floor and into the drain in the floor of the structure (possibly a storm sewer). It is unknown at this time how much oil has actually entered the drain. There is a

VAULT 1027 (Continued) **S106010249**

drip rate of 3 drops per minute coming from the transformer. Transformer is on feeder 26m44. 2 liquid and soil samples taken from the spill. 1 for id and 1 for pcb. Oil absorbent pads were applied to the spill. Cleanup to start when transformer is removed from service. 12/23/2002 @ 1955 Pads put on the floor and there seems to be a plug in the drain though no conclusions could be made at this time. A vacuum was put on the Unit to prevent any more leakage. Partial cleanup is complete @ 19:50 HRS. 12/24/2002 @ 01:15 LSN # 02-11972-001 @ 01:04 on 12/24 Date Approved - 12/24/2002 TOTAL PCB 57 ppm Update 12-24-02 @ 14:35 Lab Sequence Number: 02-11973-001 Date Approved: 12/24/2002 Analysis indicates the presence of a substance similar to a dielectric fluid. Update: 1/14/03 Crew noticed that the transformer was below minimum (oil level). Mr. Brenseke stated that by past experience a unit of this type that was below min had approx. 30 gallons of oil less than full capacity. They saw that there was only oil soaked dirt on the floor of the vault and no free standing oil. They surmised that approx. 30 gallons of oil went into the drain and reported the release at 14:15 hrs., five minutes after they discovered the spill. Mr. Brenseke stated that absorbent pads and granules were placed down and the drain was blocked. The feeder had to be de-energized to do any further cleanup. 02/06/03 21:45 hrs UPDATE L.Roman #27270 operating supervisor manhattan I&A reported to N.Muldoon #18723 that at 21:00 hrs the cleanup was complete. Mr Roman stated that 2 barrels of solid and PPE was removed along with 100 gallons of wash water was removed by the tanker The hole was double washed with BIO-GEN.and spill tag # 17494 was removed. This manhole was cleaned as 50 to 499 ppm PCB's. UPDATE: 7/23/03 This manhole was cleaned as 50 to 499 ppm PCB's. The signed over 50 cleanup checklist was received from Operating Supervisor, Lou Roman. This incident can be closed. R. Pellegrino #38620 UPDATE 12/2/04 TRANSFORMER REMOVED,FINAL CLEANUP CONDUCTED AND REPLACED 6/30/04 FVROMANO MEHS"

Remarks: "spill contained in storm drain. pads in place. feeder needs to be de-energized."

DEC Memo:	"Sangesland spoke to Mark at PTC. He said they cleaned the tank and were in the process of refilling the oil. Someone noticed that the fill line was leaking. Line was an old 3 diameter line in the old coal chute. Leak was onto the coal chute liner and into the basement floor. The area was cleaned and the fill line repaired/replaced. cleanup is complete as of 3/25."
Remarks:	"A fill pipe failure caused oil to spill into the tank room. Cleanup crew is enroute."

Contact Name:	PAUL SIRIGNANO
Contact Phone:	(914) 684-6800
DEC Memo:	"Sangesland made several calls to Paul SIRIGNANO (914-684-6800) I believe he is the property manager for this building. Unknown what specifically is going on with the Hydraulic oil in this elevator shaft. 10/29/07-Hiralkumar Patel. received message from Mr. Sirignano. left message for Mr. Sirignano. 10/30/07-Hiralkumar Patel. received message from Mr. Sirignano. he asked to contact Mr. Carroll at Fleming Lee Shue. spoke with Matthew Carroll at Fleming Lee Shue. as per him, during renovation they found oil in elevator bore hole. elevator bottom, where bore hole starts, is about 10 ft below surface grade and bore hole runs about 55 ft below elevator bottom (~ 65 ft below basement surface). bore hole is of 18 inch diameter with 9 inch diameter piston running in it. Matthew believes that whatever hydraulic oil spilled from system may have hit ground through annular space around piston. they recovered approx. 500 gal hydraulic oil/water from this bore hole. 200 gal aboveground hydraulic oil tank has been removed from site. Matthew Carroll Fleming Lee Shue Ph. (212) 675-3225 (O) (201) 344-8510 (C) Fax (212) 675-3224 email: matthew@flemingleeshue.com visited site. met Matthew and Gino Scarpelli, site supervisor. elevator is located in middle of building

RESIDANCE (Continued) **S108956042**

and it is six story building (including basement). found some stains on floor where hydraulic oil tank was located. asked Matthew to open area where tank located for any contamination. found oil and water inside bore hole. asked Matthew to pump oil/water from bore hole everyday until finds no oil/minimal oil on water. thenafter it will be weekly monitoring/recovery of oil/water and monthly sampling. Matthew will run fingerprint analysis on oil from bore hole. he will send details about amount of oil removed, till date. asked Gino not to install piston in bore hole until gets recovery system installed, as bore hole will be used as recovery well. as per Gino, site had heating oil tank but was removed in 1975 and since then building is using gas heating system. Catholic Foreign Mission Society of America, Inc. **property owner** Fr. Richard B. Callahan, CFO c/o Paul Sirignano Collier, Halpern, Newberg, Nolletti & Bock, LLP One North Lexington Avenue White Plains, NY 10601 Ph. (914) 684-6800 fax (914) 684-6986 11/02/07-Hiralkumar Patel. received email from Matthew including work plan letter summarizing what was discussed during site visit. 12/03/07-Hiralkumar Patel. received letter from Fleming-Lee Shue. till date they collected 590 gallon of oil. most of oil was removed in first two visits. in last three visits, they collected about 3 gal of oil. they are proposing collection of groundwater sample and based on sample analyticals, will either install elevator or do further remediation. sent email to Matthew to collect groundwater sample. 12/13/07-Hiralkumar Patel. received groundwater sample analytical data from Matthew. no contamination found in groundwater sample. based on submitted analytical data and work plan for continous monitoring after installing piston, approved their request to install piston in existing bore hole. asked Matthew to submit complete report at the end of work. 03/19/08-Hiralkumar Patel. left message for Matthew. 03/25/08-Hiralkumar Patel. left message for Matthew. 07/08/08-Hiralkumar Patel. left message for Matthew. 07/14/08-Hiralkumar Patel. left message for Matthew. 07/17/08-Hiralkumar Patel. received message from Matthew. spoke with Matthew. they took soil samples from pump room and found minor contamination. he also mentioned that after installing an elevator, contractor welded cap on bore hole. he is currently in process of removing welded cap from borehole and will monitor groundwater in borehole. if any product found, will remove it and if no product found then will collect groundwater sample. asked Matthew to submit soil sample analyticals and site plan with sampling locations. also asked to inform when the cap on borehole will be removed. 08/22/08-Hiralkumar Patel. received email from Matthew with letter. Matthew mentioned that coverplate on piston bore hole hasn't removed yet and he is expecting it will be removed within a month. he also submitted analyticals for soil samples taken inside hydraulic pump and reservior room. no contamination found in soil sample that was taken right below room floor. 01/15/09-Hiralkumar Patel. received email from Matthew. elevator company removed borehole cap on 01/13/09. no product measured in borehole after cap removed. will collect groundwater sample on 01/19/09 and will do three consecutive rounds of groundwater gauging. if no product detected after three gauging, will collect second groundwater sample and will submit report. 03/11/09-Hiralkumar Patel. received report from Matthew. abstract: - on 01/26/09, gauged the liquid in the borehole and found 4.05 ft of product (approx. 45 gal) - as per building management and elevator crew, limited amount of petroleum was discharged while putting the elevator jack into service - approx. 90 gal of oil and

RESIDANCE (Continued) **S108956042**

water removed on 02/02/09 and put absorbent booms in borehole - removed booms on 02/09/09 and found less than 0.01 ft of product - collected product sample from borehole and also from five gallon bucket labeled AW32 Hydraulic Oil, for fingerprint analysis - borehole gauged on 02/17/09 and found no product; collected groundwater sample - no product observed on 02/25/09, 03/03/09 and 03/09/09 - both product samples (from borehole and from bucket) matches - no contamination found in groundwater sample - will continue weekly gauging and monthly sampling of groundwater 03/13/09-Hiralkumar Patel. left message for Matthew. 03/16/09-Hiralkumar Patel. received email from Matthew. will go to the site tomorrow to collect water sample. 03/18/09-Hiralkumar Patel. sent email to Matthew requiring submission of sample analyticals, once available. 04/29/09-Hiralkumar Patel. received closure request from Matthew. collected groundwater sample from borehole. no contamination found in groundwater. no product measured after 02/09/09. 05/04/09-Hiralkumar Patel. spoke with Matthew. asked him about 4 ft product thickness on 01/26/09, but he mentioned in email on 01/15/09 that no product measured on 01/13/09. Matthew mentioned that on 01/13/09, they tried to measure product on 01/13/09 and found no product as probe was broken. they went back on 01/26/09 and found product in borehole. as product recovered from borehole and no contamination found in groundwater samples, case closed. 06/16/09-Hiralkumar Patel. 8:57 AM:- received email from Matt with disposal manifest."

Remarks: "unknown amount spilled; leaked from a elevator pit; the spill has not yet been cleaned up; would like you to contact Paul for futher questions"

CON EDISON SERVICE BOX: 41627 (Continued) **1016406888**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

V0212 (Continued) **1007253464**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"4/9 - MF on site. Obvious oil in sump. Originally noticed problem on Monday and saw oil in sump on Tuesday. Possible source is neighbors tank. MF checked neighbor and there is a stain on the floor. Neighbors house was once the church rectory and there may have been some sewer connections between the two buildings. Homeowner advised that he noticed leak appx 2 weeks ago. Tank was filled appx 2 months ago and has around 1/8 or less now. Rens Co DOH on site. Sewer Dept on site. Confirmed that sump discharges to sanitary sewer. DOH contacted county sewer who advised them that we could run sump and discharge as long as we were removing free oil. Engineer for home found building plans. There is some sewer connections between the two buildings that make a connection. Plans for hte weekend include installing a ventilation system and padding oil out of sump. 4/10/10 - MF on site. Qty of oil in sump. Optech en route to change pads. Met with neighbor, George Smith. He ran furnace. There was an obvious leak from the union near the furnace. Oil was leaking onto my finger as the furnace ran. Advised George to get line replaced. Optech placed pads around union to stop any additional problems. Plans for Optech - come back later and change pads in Center basement. Aslo return on Sunday and do the same. 4/12 - MF on site with City Codes, Rich RCDOH, Facility manager. PID resdings 2nd floor ~ 88 ppb, first floor flucuating between 88-220. No odors 2nd floor, heavy cleaning fluid odor (no fuel oil) 1st floor. Checked jug of cleaning fluid - meter rose into the 100's ppm; appears to be source. DOH and city agreed that building could be re-cooupied and people will be allowed into building tomorrow. Optech is installing o/w sep. One optech person on site, another showed up around 3:40 when work installation was nearly complete. Plans are to run system and change pads as necessary. Neg air machine will continue to run. 5/13 - MF on site. Checked Smith home. It does not appear that the line was ever fixed. The pads we taped around the line are wet, indicating that the leak was still occuring. MF checked the tank and it appears empty now.

ST PAULS CENTER FOR WOMEN & CHILDREN 3RD ST (Continued) **S110307906**

Checked sump in basement of St Pauls Home. Very little oil in sump. Pads near sump do have some oil in them. Pads have been being changed on a regular basis by Optech. the oil had been diminishing then had a small spike recently. I would suspect that the spike in oil recovery is associated with cold weather and the running of Smiths furnace, and additional leakage. Letter sent to Smith Travelers Ins 800-223-4820 Claim # HBN2516 5/20 - MF telecon w Bret Grinrod, Travelers. They have offered coverage. Gave them Optechs #. 1-860-277-0728 5/28/10 - Update. MF recent e-amil with Optech. I have not been getting updates. Advised them that if I do not get updates, I will not pay for the services they are alleging. Otherwise, Optech indicates that oil is slowing. Advised them to only make 1 trip to the facility per week. 7/2/10 - Note from Optech. Site was checked and there was no oil in the pads or sump. 7/16 - Note from Optech - Matt: We checked on the site this morning. No odor of petroleum when walk into basement. No oil on the pads, in the sump, or in the separator. Reply - Thanks - move the visits back to once a month. Update - Early October - MF on site. Checked sump and 55 drum seperator during heavy rains. No oil in either one and no oil entering from wall. No odors in basement. Checked Smith Residence, no one home. Spoke to Chris Kirgan on 10/28. Site was inspected, no oil noted in sump or coming in wall so the system was removed. 10/28 - MF left message for insurance rep regarding system repairs to Smith's line. He returned call and he has not made contact w/ Smith. Based on the information that we have regarding this site, this spill will be closed. 2/3/15 - Final ISR to Jim Quinn, Keith Goertz, Pat Holloway"

Remarks: "Oil in Sump Pump Pit at Location - No Sheen/ Straight Oil - unsure of where coming from - On Monday - started to notice an odor and now have this - Building Evacuted since Monday"

I would suspect that the spike in oil recovery is associated with cold weather and the running of Smiths furnace, and additional leakage. Letter sent to Smith Travelers Ins 800-223-4820 Claim # HBN2516 5/20 - MF telecon w Bret Grinrod, Travelers. They have offered coverage. Gave them Optechs #. 1-860-277-0728 5/28/10 - Update. MF recent e-amil with Optech. I have not been getting updates. Advised them that if I do not get updates, I will not pay for the services they are alleging. Otherwise, Optech indicates that oil is slowing. Advised them to only make 1 trip to the facility per week. 7/2/10 - Note from Optech. Site was checked and there was no oil in the pads or sump. 7/16 - Note from Optech - Matt: We checked on the site this morning. No odor of petroleum when walk into basement. No oil on the pads, in the sump, or in the separator. Reply - Thanks - move the visits back to once a month. Update - Early October - MF on site. Checked sump and 55 drum seperator during heavy rains. No oil in either one and no oil entering from wall. No odors in basement. Checked Smith Residence, no one home. Spoke to Chris Kirgan on 10/28. Site was inspected, no oil noted in sump or coming in wall so the system was removed. 10/28 - MF left message for insurance rep regarding system repairs to Smith's line. He returned call and he has not made contact w/ Smith. Based on the information that we have regarding this site, this spill will be closed. 2/3/15 - Final ISR to Jim Quinn, Keith Goertz, Pat Holloway"

Remarks: "Oil in Sump Pump Pit at Location - No Sheen/ Straight Oil - unsure of where coming from - On Monday - started to notice an odor and now have this - Building Evacuted since Monday"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL DEC Investigator Notes: Saccacio responded off hours. Volume spilled updated as 350 gallons, not 2 gallons. e2MIS Notes: Approximately 2 gallons transformer oil sprayed on the side of the Daily News Building located at 225-47 East 41st St between 2nd and 3rd Ave. The oil covered approx a 2ft. by 5ft. area of the building wall above the transformer grating and was caused by an internal fault of the unit which sprayes the oil on the wall. At this time there is no access to the transformer vaults since the grating is welded shut. The transformer that failed is in vault V3536 associated

TRANSFORMER 3536 (Continued) **S104789516**

with feeder 4M70. There is oil in vault V3536 and the adjacent vault. A concrete sump, sewer connection and standing water cannot be verified since there is no access to the vaults due to welded grating. Feeder is still energized. Update 9/13/00 at 1920hrs: Want Clean Harbors to clean the side of the building. Environmental Desk contacted Clean Harbors for the cleanup. Clean Harbors rep, Paul Finney, called at 1935hrs and reported that his crews are working 3 jobs for Con Ed and he doesn't have any available crews. Update 9/13/00 at 2000hrs: Reported at 2000hrs that approx 350 gallons of transformer oil leaked into vault V3536 located at 225 East 41st St due to ruptured transformer tank. Oil migrated into adjacent vault V2611 due to weep holes in vault V3536. There is a sewer connection in the adjacent vault V2611 but the drain was clogged. Sample taken. Previous PCB data indicates 10ppm. Spill being treated as 50-499ppm for cleanup. Cleanup started at 1945hrs. Vendor Allstate PowerVac to perform cleanup of building wall. Allstate crew will only clean the affected building wall. Update 2050hrs: Allstate PowerVac on site and commenced cleaning building wall and galss from 2050-2245, complete. Update 2245hrs: Spill to be treated 50-499ppm PCB, pending lab analysis. Drained vault 3536 and vault 2611 floor of approximately 330gallons of transformer oil and 20 gallons of wash water from side of building with Astoria tanker truck. Spread oil absorb on floor in both vaults. DEP, Waiman Wong, on site and requested we fax him the historical and current oil sample analysis. Partial cleanup complete, final cleanup pending removal of transformers. Update 9/14/00 0205hrs: 11ppm PCB Update 9/29/00 0530hrs: Reports final cleanup completed with flush truck. Removed 1 drum of solid waste and transported to W28th St under CEP instructions for <50ppm PCB. Washed floor with Slix degreaser and removed liquids with flush truck. Time of cleanup 0200-0530hrs. Note: Old transformer was removed on 9/28/00 and the new transformer installed 9/29/00. The final cleanup was completed by 0530hrs on 9/29/00. New transformer was installed after the final cleanup."

Remarks: "CON ED 133384. CLEAN UP CREW HEADING OVER. UNK IF PCB OIL."

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of

METHINKS CLEANERS (Continued) **1000302180**

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"8/14/14- Ahmed - Spoke to Rob Hill at Rightway. As per him, around 200 gal #6 oil sill in the basement due to return line leak, mostly contained in tank roon and hallway on concrete, no sump pump affected. DEC Tim Demeo responded to the site. Called 311 to report posible city sewer affect. 311 ref#C1-1-1001966091. 11/9/15 TJD File review. Requested update from Riteway Tank regarding spill status. Received the following reply the same day. 2 west 46 st, spill #1405234. We were stopped on August 20, 2014, I am not sure who the customer had come in and complete the clean up. I think they had their insurance company involved. In October 2015 they asked us for a price for the removal and installation of a new tank which we sent to Fred Sador 212-398-1214.) "
Remarks:	"Leaking return line. Reported to caller as 200 gallons lost, unconfirmed at this time."

DEC Memo:	"e2mis no 160575 J O’Hara 03994 was sent to the above location to relive NYPD On a complaint that transformer oil was misting to nearby phone booth as well as sidewalk. He also reports that a pedestrian was at this phone booth but refused medical assistance. See B ticket ME05014875. Mr. O’Hara was able to clean up the concrete sidewalk and

VAULT# (Continued) **S107408311**

phone booth at this time. Also the cause of this spill was the water berry fitting. There was no sewer or waterway was affected. The source of the spill is the cable joint and the cause is a leak. There is oil filled equipment in the structure - primary cables. There is no standing water and no substantial cracks. Update: 08/18/05 @ 15:24 hrs Mr Ohara has called back with yellow tag #10118,and also he has taken samples from phone booth for chem lab Chain of Custody AA21297."
Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"158209. On 4/21 @ 12:45 Chong # 12128 of I&A reported to me that at 12:40 in V-2472 at 14 W 57 St. he noticed approx 5 gallons of an unknown oil mixed with dirt in the structure. He was doing inspections . Feeder 1 M 41 is connected with this Vault. No sewer/waterway was affected, no private property was affected, no injuries and weather did not contribute. The source and cause is unknown at this time. The spill was in the concrete structure and no substantial cracks were observed. There is no evidence of a release at this time. Environmental tag # 38647 was hung. Two samples for PCB and ID will be taken and the courier will be called by the Finder. Chain of Custody # DD 00064 will be used for this incident. No initial cleanup action was taken at this time. The feeder will be needed to be taken out of service before cleanup commences. Account # F 3275. Courier Order Release # was given to Finder. Logger R Pagano # 48703 4/21 @ 13:18. Notified CIG, spoke to Didonato # 01669 at 13:16. Logger R Pagano # 48703 4/21 @ 13:36 I&A Splicer Chong checked the drain in structure. Drain is dry. 4/21 @ 16:50 As per B-ticket ME05008243 V-2472 on Feeder 11 M 41 is being condemned as the result of a Bottom leak condition Requesting OOE / 2 to take out of service Update: Lab Results 04/21/05 @ 21:25 hrs Lab Sequence Number: 05-03706-001 Analysis indicates the presence of a transformer oil. Update: Lab Results 04/21/05 @ 21:58 hrs Lab Sequence Number: 05-03705-002 TOTAL PCB 5 ppm Update: 04/22/05 @ 01:29 hrs Lab Results Lab Sequence Number: 05-03705-001 TOTAL PCB 1 ppm 29 @ 0405 Pearson # 50613 reported that the Final cleanup was completed 4/29 @ 02:00. No solid waste was removed. All liquid waste was removed by the Vactor truck. The Environmental tag # 38647 was removed. The structure was double-washed with SLIX . The remediation of the spill was to install a new Transformer Unit."
Remarks:	"CLEAN UP IS PENING DEGENERIZATION OF THE FEEDER. CONCRETE AND DIRT ON THE STRUCTURE. 158209."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"12/19/09-Vought-Secondary off-hours responder. Performed site visit and site is three story building with commercial spaces on first floor and residential on upper floors. Address of spill is 32 East 58th Street thru 40 East 58th Street. Spill caused during delivery by Approved Oil (aka Empire Fuel Oil Company (Ben from Approved onsite cell 347-231-0392 off 718-238-1050) and oil was observed streaming down basement boiler room wall from fill pipe location suggesting that spill came from leaking fill pipe. Ben indicated that due to slow leak is driving was still able to hear the vent alarm. Spill esimated from 30-100 gallons of #2 fuel oil. Spill ran down wall and onto painted concrete floor and then into two sump pits. Milro (516-379-1500) onsite with vac truck, four men and and a running ventilation system. Milro recovered product from sump pits and was going to powerwash floor and sump pits and determine whether bottoms of sumps were concrete or soil. Vought inspected tank and tank in concrete coffin with one weep hole possibly located 3 above concrete floor. Vought conferred with DEC Krimgold and tank either must be registered as UST or concrete grave must be removed (while adhering to FDNY regulations for firewall) so that bottom may be inspected. Approved will make no further deliverys until fill line is repaired. Super for building is Richard (cell:646-765-4177). Owner as per placard in lobby is: Buchbinder and Warren, LLC. 1 Union Square West #402 New York, NY 10003 Attn: Eva Matos Ph:(646)637-9019 Fax: (212)645-0985 Additional placard noted that owner of building is Zurich Holdings, LLC 12/21/09-Vought-Called Milro for sump description and both sumps were concrete and as such no endpoint samples were required. Vought called contact on PBS (Buchbinder and Warren 212-243-6722) and spoke to Eva. She has called in Petroleum Tank Cleaners to repair the fill line. Fill line goes to tank room directly and Vought described below requirements to her and faxed and sent her letter with below requirements to above address. 1/25/10-Vought-Received copy of invoice from PTC dated 1/14/10 showing test of tank system and system good . Vought called Matos and she is on vacation. Vought spoke to Giselle Vasquez also of

ZURICH HOLDINGS LLC (Continued) **S110139042**

Buchbinder and left message that spill will not be closed until confirmation of PBS registration change to UST is submitted. 2/2/10-Vought-Received call from and spoke to Eva Matos and she will submit registration. 02/8/10-Vought-Received copy of PBS registration from DEC Lombardo with reregistration of tank as a UST. Spill closure letter sent to above address and spill closed by Vought. "

Remarks: "Driver is on scene at this time. Clean up is pending."

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

PAN AM EQUITIES INC (Continued) **1016055688**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Status:	Closed - In Place
Material Name:	Closed - In Place
Capacity Gallons:	15000
Install Date:	Not reported
Date Tank Closed:	04/18/2006
Registered:	True
Tank Location:	Underground
Tank Type:	Steel/carbon steel
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Pipe Model:	Not reported
Modified By:	NRLOMBAR
Last Modified:	08/25/2006

Equipment Records:

J02 - Dispenser - Suction Dispenser
K00 - Spill Prevention - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G03 - Tank Secondary Containment - Vault (w/o access)
F00 - Pipe External Protection - None
B00 - Tank External Protection - None
L09 - Piping Leak Detection - Exempt Suction Piping
H00 - Tank Leak Detection - None
C00 - Pipe Location - No Piping

FALCON TOWER (Continued) **U003297782**

I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

AIR MINOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

CONCORD PAINTING (Continued) **1016000358**

has the capability to track other activities occurring in the Region
that support Compliance and Enforcement programs. These include;
Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"e2mis no 157833 3-29-05 @ 13:15 L Roman # 27270 discovered 5 gallons of transformer oil ontop of 100 gallons of water on the floor of the structure. There was no fire involved. The transformer is smoking. No sewer or waterway affected. No measuring device was used to determine the amount of the spill. Source of spill is the transformer and the cause is a bushing leak. Environmental yellow tag 44755 was applied. Water is standing, no visual water movement. No substantial cracks. 1 liquid sample was taken from the spill by L Roman # 27270 for pcb. An over 50 tanker was requested and enroute at this time to assist in performing a partial cleanup. Update 3-29-05 @ 14:30 L Roman # 27270 reports that the wrong information was originally reported regarding the vault # & feeder #. The correct vault # is v0090 and the coreect feeder # 19m23. 3/29/05 19:30 R. Hardin # 18320 of the I&A called to report that a partial cleanup was completed.There was 400 gallons of water/oil removed from the vault. The transformer was not drained at this time because the unit is on line. Absorbant Granuals were put down. The spill tag was kept in place. The drain is clogged so there will be no chance of oil going into the drain. The final cleanup will be done after unit is off line & drained. 3/29 @ 20:35 Lab Sequence Number: 05-02867-001 TOTAL PCB 11 ppm Lab Sequence Number: 05-02868-001 Analysis indicates the presence of a transformer oil. 05/02/05 17:35 L.Roman#27270, I&A Supervisor, notified the control center on 05/02/05 at 17:25hrs. to report V90 was resampled. There were two samples taken from V90, one for PCB's and one for oil ID. The chain of custody form number is #DD15345. The cleanup is pending Lab results. Lab Sequence Number: 05-04063-001 TOTAL PCB <1 ppm Lab Sequence Number: 05-04064-001 Analysis indicates the presence of a transformer oil. 5/5/05 09:33 H. Anderson # 14143 of cable called to report that at 05:00 the cleanup was completed. All debris and liquid was removed by the vactor. The structure was double washed with degreaser. The spill tag # 44755 was removed. The old transformer was removed and a new one was installed."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis 137038 On 5/11 @ 22:14 R. Pettenato # 85198 Supv. notified me that P. Lennon # 14727 of I & A South discovered that V2109 had a bottom leak while installing NWP switch. The substance was transformer oil of about 9 gallons and water of about 10 gallons.No sewer / Waterway or private property was affected. The source of the spill was transformer oil and the cause was a bottom leak. The spill was on the concrete floor of the vault. The drain was checked and it was clooged. There is a sewer connection, but the drain is clogged. There is no concrete or earthen sump and there are

VAULT 2109 (Continued) **S105057342**

no substantial cracks seen. There was a sample taken for PCB only. There also is an historic sample of 58 PPM. Cleanup action taken was to place absorbent pigs and use speedy-dry Granuales for a partial cleanup to possibly start on midnight shift. @ 21:10 hrs 05/1/0 V.Valallo # i&a supr. reported a partial cleanup, 100 gal of water/oil mix from vault #2109 and drain unit. 350 gal of oil,in tanker. Transformer installed 6/9/0. Pending cleanup documentation."

Remarks: "CLEANING UP PENDING RESULTS. 9 GALS ON 10 GALS OF WATER. UNKNOWN PCB. "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"e2mis no 154485 Severin found 1 gallon of dielectric fluid mixed with 100 gallons of water in manhole 347. He says the fluid is coming frong a leaky valve. This is associated wih feeder 38M04. He hung a tag # 656 & took a sample for pcb. The cleanup will be pending lab results. Lab Sequence Number: 04-05784-001: PCBs < 1 ppm Trans Ops employee S. Grefig, 18815 directed the cleanup. All State Power Vac powerwashed the manhole. The cleanup was completed on 7/23/04 at 23:00 hrs. The source of the leak was reported to have been a leaking valve. The valve was tightened and the leak was stopped. Mr. Grefig inspected the manhole and reported that there were no visible leaks observed."

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the

WEST COURT (DORAL COURT/HOTEL) (Continued) **1016055515**

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL ~~~~~~~~~~~~~~~~~~~~~ e2mis no 119597: 09/09/1998 1005 HRS, KETSCHKE 84049 O.S. I&A So. REPORTS: FOUND APPROX. 50 GALS OF TRANSFORMER DIELECTRIC FLUID MIXED WITH APPROX. 50 GALS OF WATER IN V3314, 2 E 38 ST. THIS SPILL WAS NOT CONTAINED TO THE STRUCTURE AS APPROX. 5 GALLONS OF OIL AND WATER ENTERED BASEMENT OF 2 E 38 ST THROUGH THE POROUS CRACK IN WALL OF VAULT. THE SUMP WAS NOT RUNNING AT THE TIME OF DISCOVERY, SO IT IS BELEIVED THAT THE SPILL DID NOT ENTER SEWER OR WATERWAY FROM THE STRUCTURE, BUT AS PREVIOUSLY STATED IT DID ENTER THE BUILDING AND THE I&A REPORTS THAT THERE WERE NO STORM SEWERS NEARBY. PHOTOGRAPHER WAS ORDERED. PCB COUNT 53 PPM. ABATEMENT ACTIONS TAKEN BY I&A WERE TO PLACE SIGN #01448 AND PLACE PADS AND COMMENCE CLEANUP IN BASEMENT OF 2 E 38 ST. CLEANUP WILL BE COMPLETED PENDING DE-ENERGIZATION OF EQUIPMENT. 9/9/98 18:00 Ketschke I&A 84049 reports partial cleanup completed in V3314. Oil removed via corportate tanker to Astoria. Structure double washed with Bio Gen Cleaner. 1 Drum solid waste cleanup debris removed to E-16 St. Transformer drained. 9/9/98 18:30 Ketschke reports cleanup of customer property completed. All oil stained areas in basement double washed with Bio Gen Cleaner. Area will be rewashed after final cleanup completed in V3314. 9/11/98 Ketschke reports met with Joe Floryshak Remediation group IH&S on location. Mr. Floryshak requests wipe samples be taken to establish how far the spill migrated. 9/14/98 Ketschke reports transformer scheduled for removal on 9/26/98. Transformer drained and disconected. Building informed they will have to remove awning. 9/15/98 V3314 & cutomers basement inspected by P. Kane I&A. Spill found contained and condition is same as 9/13/98. Cleanup pending transformer removal and instruction from EH&S. 9/25/98 Sample taken by I&A for third party PCB analysis. 9/25/98 Lab analysis SA98-10040 indicates Aroclor of 1260 with 29 PPM PCB. *** All material and disposal should be treated as historical 53 PPM .... Wipe samples from basement of 2 E 38 St indicate one area #12 failed at 12 ugs/100cme2. 9/27/98 P. Renzulli I&A OS reports transformer removed from V3314 on 9/26/98. Structure was double washed with Bio Gen Cleaner and power washer. Cleanup crew Arroyo, Brocco, Franzese, and McGlynn all I&A. 5 drums solid waste 1 drum liquid waste removed. Found oily dirt in adjacent vault V3319, see E2MIS #120065, sample taken. Double wash of V3314 completed on 9/26/98 at 22:30. Envio tag #01448 removed from V3314. Final resolution of incident pending second double wash inside building basement and new wipe samples. (see wipe sample results above). 9/28/98 Basement of building at 2 E 38 st was re double washed by Roche I&A. Final resolutiuon pending re wipe sample. 9/29/98 wipe sample for basement ordered for 9/30/98 at 1300. 9/29/98 Sections of floor in V3314 were removed to install new water proofing. Oil was found in the voids in the floor behind the loose concrete. Double wash of all oil contaminated area performed by Lusardi I&A. 1 drum of solid debris removed from the vault. 9/30/98 Ketschke I&A reports new wipe samples taken at 13:00 by Chem lab, grid layed out by J. Florshak EH&S. Analysis Received for Sub-basement/Sump in Floor SA98-10358 = <1.0 PPT 10/14/98 Ketschke I&A reports as per J. Florshak EH&S Remediation cleanup is complete. All areas passed second wipe sample. All baricades removed. 12/3/03: Transf. installed 11/13/98. L. First"

Remarks: "TRANSFORMER HAS A LEAK. IN THE PROCESS OF DOING CLEAN UP NOW"

Reports that a garbage truck was by the above location and leaked approx. one qt of hydraulic fluid to M7232. It is unknown as to who was the operator of this vehicle, it was not on location reports Mr. Morgan. He goes onto report that the only reason he found out this much was because an undisclosed person came from one of the buildings and told reported that much information. This will be a 3rd party spill. There was or is no smoke or fire involved. No sewer or waterway affected. No injuries and weather had no affect. Account #f7160 is being used for this incident. Source and cause are 3rd party spill. No private property affected. Unable to see oil filled equipment in the structure. Environmental yellow tag # 10038 was applied. Water is standing, no visual water movement. No substantial cracks. Not able to see if dielectric filled feeders in the structure. Same, 1 for id and 1 for pcb took 2 soil samples from the spill. Sample priority E . Chain of custody # cc16381. Cleanup is pending results. Logger F.Curtis 38078. CIG Called spoke to R.Elliott 81653 @ 10:40 hrs. Logger F.Curtis 38078"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT E2MIS 120065 SEPT. 26, 1998 13:15 HRS. P. RENZULLI #94786 O.S. I&A SOUTH REPORTS WHILE CLEANING ADJACENT V-3114 @ 6 E.38 ST HE CHECKED V-3119 AND FOUND APPROX. 1 GALLON OF TRANSFORMER OIL THAT MIGRATED FROM V-3314. THE SPILL IS CONTAINED AND NO IMPACT TO WATERWAYS OR SEWERS. THERE IS NO SUMP PUMP IN THIS VAULT. A SAMPLE WAS TAKEN & TAG# 01417 WAS INSTALLED. THE TEST RESULTS FOR V-3314 SHOWS 53 PPM P.C.B.'S. THE REPORT WAS TAKEN BY J. MEJIAS #44729 @ MCC #9 DESK AND INPUTTED BY T. RUSSO #45348. SEPT. 26, 1998 14:31 HRS J. DEVOTI C.I.G. NOTIFIED BY T. RUSSO #45348. SEPT. 26, 1998 14:40 HRS. THIS SPILL WILL BE CLEANED UP WHEN THE CLEANUP IS COMPLETED IN V-3314 AT THE SAME LOCATION.... T.RUSSO #45348. If this is a Con Edison manhole it contains electrical cable and splices. Many manholes have a sealed sump in the floor which is used to allow runoff when pumping the structure. A hose is place in this sump and water on the floor will flow into the sump allowing the floor to be cleaned. If cleaned prior to analysis of the fluid, the structure will be cleaned as >50 PPM and all liquid and waste will be manifested accordingly. The structure will be double washed with a degreaser, i.e. Slix. All cleaning material and PPE will also be treated as >50. If any sludge is found within a manhole it is treated as lead contaminated and manifested accordingly. The spill identification tag will remain secured to the structure until the analysis is completed and if <500 PPM the signage will be removed. If the analysis is >499 PPM, a grid will be prepared for wipe testing the area. Until the analysis of the wipes are proven to be <10ugs/100cme2 all additional waste produced from the structure will be treated as the original analysis. If this spill occurred in a transformer vault containing a sump pump and there was a possible release, the drainpipe trap will be dismantled to determine if oil was released. Sludge found in a vault, through historical analysis, has been determined not to contain lead. 9/27/98 P. Renzulli reports cleanup completed in V3119 at 22:30 on 9/26/98. Cleanup conducted as >50 PPM PCB. Area double washed with Bio Gen Cleaner. Debris removed and manifiested as >50 PPM PCB. Envio tag in place pending sample results. MK 9/27/97 M Ketschke reports sample taken of oilly dirt in V3319 by R. Bracco on 9/26/98. Sample taken for third party analysis for PCB. MK 10/7/98 Note When 9/27/98 update was logged information was incorectly entered to indiate the material removed from the vault was handled as <50 PPM PCB. The report should have indiated that the spill was cleaned following proceedures for a 50-499 PPM PCB spill and that all material was handled as 50-499 PPM PCB. The Envio tag was left in place pending the results of the 9/26/98 sample taken by Bracco. 10/17/98, LAB SEQUENCE #98-11014, 10/16/98,1:50, AROCLOR#1260 ,2 PPM SAMPLE# E2MIS # DESCRIPTON AROCLOR RESULTS UNITS ? 001 SAMPLE TYPE: SOLID 1260 2. DEC Memo:	"Minor spill contained in tank room.Rite Way sent proposal. ** Non PBS ? ** PBS: 2-192147 Rob Hill to send closure report to DEC.(sr) 9/23/13-Mahat-Spill transferred from DEC Rahman to DEC Mahat as per Vought. 3:21pm Request for closure was received from the Mr. David Chan from RITEWAY TANK MANAGEMENT. Source of the spill was boiler equipment. It was due to technical failure of the boiler and its arrangement. The contamination from the floor was cleaned and scrubbed with bio-degradable degreaser. He also sent the record of the manifest those were disposed as required by the DEC.(total of 7 drums). All contaminated debris was localized in the boiler area. and The area is clean and free from contamination. Above statements are quoted as per closure letter from Mr. Chan. Discussed spill with DEC Vought who approved Spill Closure and Mahat prepared and sent Spill Closure Letter to owner. Mail Correpodent Information: Maxwell-Kates,Inc. 9 East 38th Street New York, NY 10016 ATT: Neil Wishnia 212-684-8282 9/23/13- Mahat Sent out spill closure letter woner and also c/c it to the Riteway. The electronic version is in e-docs."

Environmental Interest/Information System

LORD & TAYLOR (Continued) **1016054191**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WATERWAY,AND DID NOT ENTER SEWER. THERE IS A SEWER CONNECTION AND NO CRACKS IN THE VAULT.TOOK A SAMPLE AND HUNG A SIGN#18120...HE FOUND THIS WHOILE REMOVING A FEILD GROUND ON FDR 26M48..OIL FIELED TRANSFORMER IN STRUCTURE If this is a Con Edison manhole it contains electrical cable and splices. Many manholes have a sealed sump in the floor which is used to allow runoff when pumping the structure. A hose is place in this sump and water on the floor will flow into the sump allowing the floor to be cleaned. If cleaned prior to analysis of the fluid, the structure will be cleaned as >50 PPM and all liquid and waste will be manifested accordingly. The structure will be double washed with a degreaser, i.e. Slix. All cleaning material and PPE will also be treated as >50. If any sludge is found within a manhole it is treated as lead contaminated and manifested accordingly. The spill identification tag will remain secured to the structure until the analysis is completed and if <500 PPM the signage will be removed. If the analysis is >499 PPM, a grid will be prepared for wipe testing the area. Until the analysis of the wipes are proven to b"

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"4/25/07 bf: ttf letter sent to: President Brevard Owners, Inc. 245 East 54th Street New York, NY 10022 5/10/07 on 5/7/07, received fax cc from Brevard Owners for Petroleum Tanks to make repairs to remove vent lines, install new vent and fill lines, and retest sytem. Also to drum and dispose of contaminated debris. bf 6/21/07 Called Brevard Owners. (212)371-8383. Spoke to secretary. She told me I need to speak with either Louis Perilla (super) or Evelyn Garavito (account executive) neither one was in today. I left my name and number to have one of them call me back. bf 6/22/07 Called Evelyn Garavito. She recived tank results from PTC. She said that PTC told her it was her responsibility to prepare letter in rtesponse to 4/25/07 letter. I told her it is her responsibility to make sure DEC receives it, but it must be prepared by a third party. She will call PTC today to get the letter prepared. bf 7/9/07 Spoke with Ms. Garavito and told her DEC needs a report from PTC explaining what was done to repair the tank, contamination, etc. bf 1/20/09 Inspected site on 1/16/09. Issued NOV for NL 176, tank/gauge not labeled, and failure to inspect monthly. Settlement conference scheduled for 2/3/09. bf 4/14/09 PBS Settlement Conference held today. Attended by Evelyn Garavito, Louise Munster, and Brian Falvey. Gave Ms. Garavito instructions to contact

EVELYN GARAVITO (Continued) **S110242787**

Petroleum Tank Cleaners to prepare a response to letter. She submitted a passing tightness test dated 5/23/07. bf 5/18/09 Recieved letter from Petroleum Tank Cleaners on 5/13/09. Tank failure was due to the vent and fill lines. Both lines were replaced. A small amount of oil spilled on floor from a branch of the fill line. Product was cleaned and taken away by Rapid Waste Disposal. NFA. Tank passed tightness test on 5/23/07. bf"

DEC Memo:	"DEC Piper performed site viist. #6 oil is under slab and coming up through sewer pipes and cracks. Recovery pit warranted. as well as investigation. Brevard Apartments 1035 2 Ave ny, ny 10022 2-145769 4/24/13- DEC Piper mailed 2nd csl to Douglas elliman. 9/3/13- DECPiper was contacted via email by Rite Way, David Chan. He said There were pits in the garage that had slight contamination in it and they proceeded to pump and monitor the pits on a regular basis. The pit was relatively clean by August 2010 after about 10-12 visits and they were asked to stop the pump outs. they didn't hear anything for a while and the building never instructed us to perform a closure. In December of 2011 they performed a cleaning of the vent line. Recently in May of 2013, Douglas Elliman contacted Riteway to perform delineation in the boiler room. Sample results only detected one VOC above standards and SVOC contamination. However, refusal was met in all locations at three feet. 9/3/13- DECPiper received poropsal to install recovery pit. I disapproved and recommeded digout. 9/22/2013- DEC Piper recieved email from E. Gail Suchman, Esq. of Stroock & Stroock & Lavan LLP . 10/7/15- DEC piper received notification that building epoxied boiler room floor. Low level VOC and SVOC residual 6 oil contamination exist. Based on work to date, this spill is closed. "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

VAULT # 2520,2445,4719 (Continued) **S106005148**

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 143-688: UPDATE:07/01/02 10:00 HRS 10:30 hrs.S.Crissey #88097 ugs reported to W.Lee #33243 mcc founded 5 gal of dielectric fluid in adjoining 3 vaults #V2520, V2445, V4719. And approx 5 gal of water. NOTE: Clarification to the above -the amount of dielectric fluid found is 5 gallons per Vault listed. Correction to above entry: Incident #140068 refers to vault V2691. This vault is one of four vaults (transformers) at this location. The other vaults are V2520, V2445 and V4719. An inspection was performed today by Underground Supervisor Scott Crissey. He reported finding 5 gallons of transformer oil in each ofthese vaults which supposed migrated through weep holes from vault V2691 (site of original spill and transformer problem. An inspection was performed of vaults V2520, V2445 and V4719 by the I&A crews with the following results: Vault 2520 - No oil found, just dirt Vault 2445 - No oil found, just water Vault 4719 - No oil found, vault is dry. Also, no weep holes were found. According to the Chain of Custody, two samples were taken, one for PCB and one for oil ID from vault V2445. Since there is a discrepancy between the original report and this inspection, a supervisor will be dispatched to this location to verify the findings of the I&A crew. Frank Garafola #15481, Operating Supervisor, reported at 18:41 hrs. that he inspected the subject three vaults and found the following: Vault 2520 - Found dry dirt with no evidence of any oil. Pads were placed on the dirt and no oil residue came up. Vault 2445 - Found just free standing water. Absorbent pads were placed and no residue of oil was seen or discovered. This vault needs a flush cleaning. Vault V4719 - Found just dry dirt and debris. No evidence of any oil. Vault V2691 - Transformer still in place pending removal. Lab Sequence #02-06070-001 The lab results confirm the I&A findings of no oil in the vaults; the vaults were flush cleaned with a Vactor truck and completed at 22:10 hrs. on 7/1/02."

Remarks: "unk cause of spill at this time. clean pending lab results ref # 143688."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003

KINLEZ (Continued) **1015746481**

. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F004
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"05/03/07 - See e-docs for Con Ed report detailing cleanup and closure. 159389. On 6/24/05 at 03:18 G. Williams # 78618 field operator called to report that at 03:10 he discovered a spill of cable oil. He states that in manhole-38756 that is located at south east corner E. 57 St & Lexington ave, there is 3 pts of cable oil (dielectric fluid) coming from leaking cable ends. At this time it is not known the feeder that the ends are on so they will need to be identified & taken out of service to do a cleanup and recap them. He was there to identify dead cable when he found this & working on acct # 42224. There was no sewers or waterways affected. No smoke or fire was involved. No private property was affected. No injuries were related to the spill. A tag was hung # 41245 & a smple taken for pcb with a chain of custody # DD-20507. 6/24/05 04:08 CIG P. Mcguire # 61959 was notified R. Bruns # 21106 "
Remarks:	"1 quart and a half leaking from a cable in a manhole. Spill is contained. 159389."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ 820 @ 03:46 On 8/20 @ 03:17 Quintana # 51302 of FOD reported to me that while working in V-0774 on Fdr 4M91 he discovered approx 2 gallons of Dielectric fluid on the floor of the structure. No fire/smoke was involved, sewer/waterway not affected, no injuries and weather did not contribute and no private property was affected. There is no standing water and no cracks were observed in the structure. The source of the spill is the transformer and the cause is unknown. There was oil found in the concrete sump and the sump pump was found off. At this time there is no reason to suspect that the oil entered the Environment. The I&A is on their way to take the sump apart to verifiy if the oil left the structure. Environmental tag # 34596 was hung. Two samples for PCB and ID will be taken and the Finder will call the courier. No cleanup action is being taken at this time Account # F 3243. Spoke to Mcardle # 16516 of CIG at 03:33 8/20 @ 04:03 There is a sewer connection as per Conduit plate # 25-j-4. 8/20 @ 04:45 Spoke to Lyons # 88777 of I&A and he took apart the trap and oil back flowed into the sump. The time of the find was 04:35. There was a release and I notified ERT @ 04:44 (CIG phone line did not answer promptly). Shift Manager Barry informed me that this Unit is a 2000 KVA with a capacity of 536 gallons. The Unit was founf below minimum. 25 gallons of oil was found in the sump. 8/20 @ 06:10 Cleanup scheduled for 8/20 @ 07:00 Notified Transportation for Over 50 tanker and faxed documentation Notified I&A and faxed information Flush Dept. notified and faxed documentation 8/20 @ 06:18 Spoke to Lyons of I&A and he stated there is no Oil minder at this location Update 8-20-03 @ 08:53 L First #04738 reports that the tanker , I&A cleanup crew and dep are on location Update: Aug 20,2003 @ 11:10 hrs O.S for I & A M.Lyons #88777 reports that a partial clean up Has been done in V 774 Tag 34596 remains in place, final clean up is pending removal Of transformer. Removed one barrel of soil & cement. Tanker removed 475 gallons of water & oil Was washed twice with slix Clean up crew al so listed in Event Involved Person Site 8/21 @ 04:55 Lab Sequence Number: 03-06836-001 TOTAL PCB 15 ppm Update: 04/04/04 @ 13:00 hrs Mr V.Mirance # 58484 reports clean up complete at this time. Mud and stones removed with approx. 150 gallons to flush truck,and also power washed twice with same. slix was used, and transformer was removed and new one installed. Clean up persons posted in Event Involved Person site"
Remarks:	"Spill is mixed with dirt and clean up is pending crew."

DER Facility ID:	7094
DEC Memo:	"11/01/2005 - Changed DEC lead from Sigona to Zalewski. (Zalewski) 3/20/2006 - No file shipped to Albany. Searched the spills data system. Appears to be related to Spill Nos. 9605869 and 9605857, which were closed. Searched the PBS data system. PBS No. 2-204412 has an expired registration. Shows a 6,000 gallon vaulted fuel oil UST closed-removed in June 1999 and a 5,000 gallon fuel oil AST installed in June 1999. (Zalewski) 3/20/2006 - Placed a phone call to 130 East 57th St. (formerly the Habitat Hotel). It is now operated as Hotel 57. Spoke with Joshua Samuel (Director of Operations). He is not familiar with the 1996 spill report. In 1997-1998, new management was brought in and no one from 1996 still works there. He has been there the longest and has been there since 1999. I asked about their oil storage and he said that they heat with steam and have not heated with oil since he has been there. He said a tank is still there. (Zalewski) 3/20/2006 - Placed a phone call to the property management company [Zeal Feldman (57th St. Operating, LLC)]. Left a voice mail message requesting a call back. (Zalewski) 4/3/2006 - Site being

130 EAST 57TH ST (Continued) **S102400994**

transferred back to Region 2. Facility has an expired PBS registration for a tank that is still present and no longer in service. It is unknown at this time if the tank is properly closed in place. Recommended next steps include searching files for Spill No. 9605869 and 9605857 to see if cleanup/PBS documentation previously submitted, sending a letter to the property owner/management company requesting additional information, or scheduling a PBS/spill site inspection. (Zalewski) 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Rahman) for review and closure - end 05/03/07 Inspected the spill location on 05/02/07 morning.That tank was removed and a new tank was installed in 1999.This tank is not in use now, as the building is gas heated now.The tank is sitting in a vault and fill/vent line in place(unplugged).PBS expired in 2004.No drain on the old tank floor,but there are small cracks on the floor.Letter was sent to(asking report on clean up) Hotel 57 130 East 57th Street New York, NY 10022 Attn: Mark J. Nasom 05/04/07 I received a call from Frank Kaiman(212-610-2855), in house counsel for 130 E 57th Street.He wanted to know what needs to be done.I faxed him the letter I already sent for the hotel.(SR) 06/06/07 Rec'd clean up report from Greenberg Traurig, LLP- Attorneys at Law for Hotel 57.Hotel 57 is the net lessee of the property with the property being owned by the Estate of Sol Goldman and various trysts relating to Sol Goldman.Invoice and waste disposal manifest for clean up was provided.As per the report,based upon research conducted by LandAmerica, the spill apparently was caused by a break in a nearby water main.Water entered the tank via a breach in the vent line for an aboveground storage tank(AST)located in the basement of the building.Phoenix removed oily water and oil soaked debris from the tank area for disposal.Tank was removed and replaced with a new AST in 1999 that is now inactive.Land America noted minor staining beneath the current AST but concluded that there was no residual evidence of the 1996 spill, and the concrete floor of the tank area was intact, with no cracks or other damage that would have allowed oil from the spill to seep into soil or groundwater.Documents in edocs.As per the spill clean up documents, the spill case can be closed."

Remarks: "ROTTED VENT PIPE ON TANK - WATER ENTERED THE TANK AND DISPLACED THE OIL - SPILLED INTO BASEMENT AND SEWER - BASEMENT CONCRETE FLOOR - CALL CLEAN UP COMPANY PHOENIX ENVIORMENTAL (516) 864-4200"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No

GREEN & WHITE CLEANERS CORP (Continued) **1004756914**

Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2006
Site name: GREEN & WHITE CLEANERS CORP
Classification: Conditionally Exempt Small Quantity Generator

Date form received by agency: 07/12/1993
Site name: GREEN & WHITE CLEANERS CORP
Classification: Conditionally Exempt Small Quantity Generator

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"11/29/05-Vought-Site is Lesotho consulate and cell # for site contact (Lefu Manyokole 347-224-1221). {Petro is delivery company. NYCDEP on-site (Celeste Okole 347-672-6059) onsite and said spill outside of secondary containment was minor. Vought called Lefu to arrange for site visit. Lefu stated that people will be onsite to provide access all day. Site visit by DEC Vought and DEC Piper. No spill out vent or fill pipe and no odors in building. Spill originated where fill pipe entered secondary containment. Hole in secondary containment showed that no product present however some of the product ran onto the floor and entered small sump in tank room. 55-gallon drum set up as temporary UST with connection of new supply and return lines. No visible leaks from former supply and return line. Consulate hired Evertight Tank Company (Joe Robertelli 718-981-1818 fax 718-273-1833). DEC requires: 1)repair/retest of UST system and 2)cleaning of impacted tankroom sump. Vought called and spoke to Robertelli and he does not perform tank tightness testing but he can perform pipe repair. Robertelli may contact Petroleum Tank Cleaners to remove impacted soil from sump. Vought sent letter with above requirements to consulate: Ambassador c/o Lefu Manyokole

LESOTHO CONSULATE (Continued) **S107488732**

Permanent Mission of the Kingdom of Lesotho the United Nations 204 East 39th Street New York, NY 10016 Fax: 212-682-4388. 12/12/05-Vought-See closed spill (0510527) for tank tightness test failure of UST at site. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Piper as per DEC Austin. 5/22/06- DEC Piper reviewed closure request. TTF was a dry portion leak that was repaired within 1 week. PTC cleaned oil on floor and sent in documentation of cleanup. Closed."

Waste Code:	Not reported
Waste Code:	Not reported
Waste Code:	Not reported
Waste Code:	Not reported
Waste Code:	Not reported
Quantity:	48960
Units:	P - Pounds
Number of Containers:	001
Container Type:	DT - Dump trucks
Handling Method:	T Chemical, physical, or biological treatment.
Specific Gravity:	01.00

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CON EDISON MANHOLE: 8756 (Continued) **1016143118**

EPA Region: 02
Classification: Conditionally Exempt Small Quantity Generator
Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	001
Tank Id:	38401
Material Code:	0008
Common Name of Substance:	Diesel

Equipment Records:

L00 - Piping Leak Detection - None
E01 - Piping Secondary Containment - Diking (AG only)
A00 - Tank Internal Protection - None
C03 - Pipe Location - Aboveground/Underground Combination
B01 - Tank External Protection - Painted/Asphalt Coating
F06 - Pipe External Protection - Wrapped
G01 - Tank Secondary Containment - Diking (Aboveground)
H00 - Tank Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)
D01 - Pipe Type - Steel/Carbon Steel/Iron
F07 - Pipe External Protection - Retrofitted Sacrificial Anode
J02 - Dispenser - Suction Dispenser
K00 - Spill Prevention - None

Tank Location:	1
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	11/01/1979
Capacity Gallons:	20000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
