Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CON EDISON MANHOLE 65980 (Continued) **1010327366**

Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: U240
Waste name: ACETIC ACID, (2,4-DICHLOROPHENOXY)-, SALTS & ESTERS

Violation Status: No violations found

FINDS:

Registry ID: 110004541657

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

NYCHA - UNITY PLAZA (Continued) **1001224053**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	01/20/06: This spill transferred from J.Kolleeny to S.Kraszewski. One 7.5K tank removed in 1995. Only one soil samples taken for the assessment, analyzed for TPH. Unsure where the samples came from since the assessment report didn't provide a site map. No contamination encoutered during excavation. Needs a site assessment to characterize and determine the impacts to the soil and GW. - SK09/01/06: DEC Lead for this spill changed from "unassigned" to S. Kraszewski. - J. Kolleeny02/09/07 - J.Kann - Spill reassigned from S.Kraszewski to J.Kann.07/06/09: J.Kann - spill consolidated with 9102328. Based on PBS information for 2-474215, three addresses are useable for this site - 333/340 Georgia Street and 611 Blake Ave.

615 **SPRING CREEK (EMERALD ST.)** **NY SHWS** **S105973021**
BETWEEN RUBY & EMERALD ON LORING AVENUE **N/A**
BROOKLYN, NY

SHWS:

Program:	HW
Site Code:	57635
Classification:	C
Region:	2
Acres:	2.000
HW Code:	224014
Record Add:	11/18/1999
Record Upd:	03/23/2007
Updated By:	dcwalsh

Site Description: The Spring Creek parcel comprises a three city block area situated approximately midway between Belt Parkway and Conduit Boulevard and is one block south of Linden Boulevard. The entire three block site previously consisted of scattered piles of construction debris partially exposed at the surface.Debris included concrete rubble, assorted refuse, scrap metals, plastics, junk cars and rusted surficial drums. Two of the three blocks were cleared and low income housing has been erected. These units were occupied in 1989. Test pit excavations at the third section revealed buried drums and dark ash like materials. Approximately 20-25 drums or rusted empty drum remnants were observed within area 3. Two samples exhibited hazardous characteristics. Area 3 is presently the listed area. All the buried drums and contaminated soils have been removed from block 3. The property has been developed (1990) for multiple low income housing buildings. Buildings are fully occupied.No further action is required

SPRING CREEK (EMERALD ST.) (Continued) **S105973021**

	from the Department.
Env Problem:	All hazardous waste drums have been removed. Post remedial monitoring for groundwater has been completed.
Health Problem:	Post remedial groundwater monitoring has revealed that the low concentrations of VOCs originally detected on-site have decreased to non-detectable levels. The concentration of one VOC, specifically 1,2-dichloroethene, has remained slightly above the drinking water standard for this contaminant in all three sampling rounds. However, groundwater is not used for drinking water purposes in the area. Exposure to contaminated surficial soils is not expected to occur since the parcel has been capped. Potential exposure to contaminated sub-surface soils is not expected to occur unless subsequent on-site excavation is conducted.

Updated By:	JAMORAS

Site Description: Location:The Former Majestic Garment Cleaners site is approximately 0.47 acres in size and is located at 740 Pine Street (a.k.a. 1151 Loring Avenue) in Brooklyn, at the northeast corner of the intersection of Loring Avenue and Pine Street in the East New York section of Brooklyn. Site Features:The property is surrounded by a chain link fence and previously contained a one-story brick building which was demolished sometime in 2008. The property is currently vacant except for construction and demolition debris and parked vehicles.Current Zoning and Land Use:The property is a vacant lot in a residential zone. It is zoned R4 (Residential) with a C1-2 (Commercial) overlay. The surrounding parcels are currently used for a mix of commercial and residential uses.Past Use of Site:The site was formerly used as an industrial laundry and dry cleaning facility from 1926 to 2007, and operated out of a large one-story brick

FORMER MAJESTIC CLEANERS SITE (Continued) **S110248343**

building which was constructed in 1926. The building was later expanded with a smaller attached one-story cinder block building on its north side. In early 1999, the U. S. Environmental Protection Agency (EPA) conducted two separate inspections of the Majestic Garment Cleaners facility, one on January 25, 1999, and the other on March 29, 1999. During those inspections EPA personnel observed employees disposing of tetrachloroethene (PCE) contaminated water from steam presses onto the ground behind the facility on the western side of the property. They also noticed that the areas around the dry- cleaning equipment were visibly contaminated with PCE-contaminated lint and a dark liquid residue. EPA subsequently learned that Majestic employees regularly vacuumed PCE-contaminated lint and disposed of it in a dumpster behind the building. In the Fall of 2001, the Department conducted an investigation which showed that the groundwater underlying the site was contaminated with PCE and its breakdown products. A Phase II investigation was conducted in June 2009. Soil samples were collected and the results showed exceedances above unrestricted soil cleanup objectives (SCOs) for volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs). Site Geology and Hydrogeology:Much of the surface soil at the site consists of urban fill composed of mixed sand with varying amounts of gravel, brick, and concrete debris. The urban fill (i.e., debris, brick, etc.) at the site extends down to approximately 8 feet below ground surface (bgs); the fill is underlain by organic rich clay and sand. The depth to groundwater has been observed to be approximately 10 feet bgs. The groundwater flow direction in the vicinity of the site is to the southwest. It appears that a local hydraulic low, which was historically observed near piezometer PZ-2, may have been due to efforts to dewater the basement of the former on-site building when the building was present and in use.

Env Problem: Nature and Extent of Contamination:Based on the Remedial Investigation, the primary contaminants of concern (COCs) at the site include tetrachloroethylene (PCE), trichloroethylene (TCE), 1,2-dichloroethylene (1,2-DCE), vinyl chloride, and benzo(a)pyrene. Elevated levels of these constituents were found primarily in the western portion of the site.Groundwater - PCE (detected up to 260 ppb) and associated daughter products, cis-1,2-DCE (detected up to 410 ppb), TCE (detected up to 72 ppb) and vinyl chloride (detected up to 150 ppb) were identified at levels exceeding their respective groundwater standards. The groundwater standard for PCE, 1,2-DCE, and TCE is 5 ppb. The groundwater standard for vinyl chloride is 2 ppb. Soils - Soils exceeding residential soil cleanup objective (SCOs) are present only in the western portion of the site. Benzo(a)pyrene was detected in subsurface soil (in a sample collected from the 10-foot to 11-foot depth interval) at a level of 2.6 ppm which exceeded the residential use soil cleanup objective (SCO) of 1 ppm. PCE was detected in subsurface soil at 8.1 ppm in a soil boring sample collected from the 11-foot to 12-foot depth interval in the western portion of the site in the vicinity of the former loading dock area. PCE was also detected in another soil boring sample from the 10-foot to 11-foot depth interval at a concentration of 6.8 ppm. This sample was also collected in the western portion of the site. Both of these concentration levels exceeded the protection of groundwater SCO of 1.3 ppm.Soil Vapor - Elevated soil vapor concentration levels were detected in the western portion of the site in the same general area of the highest groundwater and soil contamination. The most significant results were: PCE at 640,000 g/m3; vinyl chloride at

FORMER MAJESTIC CLEANERS SITE (Continued) **S110248343**

330,000 g/m3; cis-1,2-DCE at 440,000 g/m3; trans-1,2-DCE at 4,800 g/m3; TCE at 25,000 g/m3; and 1,1-DCE at 2,000 g/m3. Based on the elevated soil vapor concentrations in the western portion of the site, additional off-site soil vapor sampling was conducted. Elevated soil vapor concentrations were observed in most of the off-site samples located west of the site including samples collected near the laundromat. The most significant results were: PCE at 310,000 g/m3; cis-1,2-DCE at 1,300 g/m3; and TCE at 7,000 g/m3. Elevated levels of gasoline-related compounds were also observed in some of the samples, but these compounds are not considered to be site-related. Environmental sampling indicates soil vapor intrusion may be a concern for on-site and off-site structures.

Health Problem:	People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. The site is fenced, which limits public access. However, part of the lot is being used for parking and storage of building materials and persons who enter the site could contact contaminants in the soil by walking on the site, digging or otherwise disturbing the soil. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The on-site building has been demolished, however the potential exists for people to inhale site contaminants in indoor air due to soil vapor intrusion in any future on-site building development and occupancy. Elevated concentrations of site-related contaminants were detected in soil vapor off-site. The potential for exposures in off-site buildings needs to be monitored and/or evaluated to determine if mitigation measures should be implemented.

Updated By: MOBARRIE
Site Description: The Former Majestic Garment Cleaners is located at the northeast corner of the intersection of Loring Avenue and Pine Street in the East New York section of Brooklyn. The property contains a 1-story brick building and a parking lot which is surrounded by a chain link fence. The site is currently occupied by a dry cleaning operation (World Cleaners). In early 1999, EPA conducted two separate inspections of the Majestic Garment Cleaners facility. During those inspections, EPA personnel observed employees disposing of tetrachloroethene (PCE) contaminated water from steam presses onto the ground behind the facility. They also noticed that the areas around the dry cleaning equipment were visibly contaminated with PCE-contaminated lint and a dark liquid residue. EPA subsequently learned that Majestic employees regularly vacuumed PCE-contaminated lint and disposed of it in a dumpster behind the building. Completed investigations include an Immediate Investigation Work Assignment (2001). In January 2004, a Voluntary Cleanup Agreement was signed, and in July 2005, the Volunteer performed fieldwork associated with the Remedial Investigation (RI). However, the Volunteer never submitted a formal RI Report documenting the results of the investigation, and in June 2006, the State terminated the agreement with the owner of the site due to their failure to respond appropriately. The site investigation and cleanup will be done under the Inactive Hazardous Waste Disposal Site remedial program-see site #224035 for more information.
Env Problem: The primary contaminants of concern at the site known at this time include tetrachloroethylene (PCE), trichloroethylene (TCE), 1,2-dichloroethylene (1,2-DCE)and vinyl chloride. The initial investigation indicates groundwater beneath the site has been impacted. Exceedances of standards, criteria and guidance include PCE, TCE, 1,2-DCE and vinyl chloride in groundwater.

DEC Region:	2
DER Facility ID:	214155
DEC Memo:	11/28/05: This spill transferred from J.Kolleeny to S.Kraszewski.12/07/05: Reviewed Phase II Site Assessment by Emteque for post-excavation of 30K tank in October 2003. Seven end point samples were taken from the pit and analyzed fro VOCs and SVOCs. No PID readings detected no volatiles and also no olfactory or visual signs of contamination were present during or following the excavation. Laboratory analysis confirmed concentrations of several SVOC compounds above RSCOs in two of the samples. Due to the isolated areas of the contamination and immobile nature of the compounds, cause for concern is minimal.One discrepancy was noted in the report. The end point samples were limited, according to Emteque, by the concrete foundation beneath the tank. However, a faxed update of the tank excavation noted that no tank pad was found as they had anticipated. I called John N. Raguso from Emteque to double check this problem, but he was not available so I left a message. Also, Jon Kolleeny, who visited the excavation site checked his log book and recorded that a concrete pad slab was present.The Emteque report lacked site plans that would indicate the locations of the samplings in proximity with the tank and fill port assembly. I will ask John about this also. - SK02/02/06: This spill transferred from S.Kraszewski to Q.Abidi.04/03/06: This spill transferred from Q. Abidi to Koon Tang.07/06/09: J.Kann - spill transferred to J.Kann. Spill 0403571 closed to consolidate with this spill. 12/30/09: Site is a square block (Georgia street, Blank and Williams) were all tanks have been removed, yet spills remain open. Consolidated with 9102328

Site Description: Location:The site is located at 491 Wortman Ave in the Spring Creek section of Brooklyn, a mixed industrial and manufacturing area.Site Features:The site is occupied by a one story commercial building that occupies the entire lot and is comprised of three warehouse sections referred to as Building 1, Building 2 and Building 3. The building is approximately 19,000 square feet and the site is 0.44 acres in size. Current Zoning:Manufacturing and industrial buildings surround the site to the north, south, east and west. The closest residential units are 0.08 miles to the west-southwest.Historical Uses:The site was formerly utilized as a metal etching company, a steel tube manufacturing company, and a plumbing faucet/fixture company.Since

491 WORTMAN AVENUE (Continued) **S109374287**

approximately 1985, the site has been owned and operated by Watermark Designs Ltd. to manufacture, store, package, and ship decorative fixtures, bathroom accessories, and hardware. Manufacturing processes on the property included cleaning, painting, plating, etching, polishing, and specific machining of metals and metal products. Cleaning agents such as TCE and PCE were "routinely used" by Watermark Designs to fine clean and polish metals and metal products. The site is currently leased to a religious group that gathers at the site several times per week. Watermark Designs Ltd. relocated to a new location, 350 Dewitt Avenue, Brooklyn in or around 2007. In 2008, the site was put on the "open market" for sale.Site Geology and Hydrogeology:Subsurface geology is comprised of historic fill materials overlying native sands. Groundwater is approximately 15 ft below ground surface. The direction of groundwater flow can not be determined after one round of groundwater measurements.Other:One TCE degreasing tank was removed from the site however details including the tank size and dates of removal have not been determined. There are no PBS or CBS registrations for the site. One fuel oil AST of unknown size encased in concrete blocks is also located in the basement of the site. Also, floor drains were observed in the building.The following reports have been submitted to date: Supplemental Subsurface Investigation Report dated December 2008; Limited Subsurface Investigation Report dated February 2009; a Phase II Environmental Site Assessment dated January 2009 and a Environmental Services Report Proposed Corrective Action and Remedial Investigation Work Plan dated July 2009. A final Site Characterization work plan was approved in February of 2011. Draft Site characterization reports have been reviewed.The Department and site owner executed a "P site" investigation Order on Consent and Adminstrative Settlement. For more information, see Site # C2-24-139

Env Problem: A site characterization (SC) was performed in 2011. Results detailed in the draft SC Report indicate soil, groundwater and soil vapor are impacted by chlorinated volatile organic compounds (CVOCs) and, to a much lesser extent, petroleum-related compounds.Concentrations of CVOCs in soil samples collected in 2011 are below commercial soil cleanup objectives (SCOs) but exceed the protection of groundwater SCOs.Concentrations of CVOCs in groundwater samples collected in 2011 significantly exceed groundwater standards with magnitudes greater than 1 ppm in half of the monitoring locations and a maximum concentration of 3.5 ppm for PCE and 2.3 ppm for TCE. Based on concentrations of CVOCs at the site boundaries, contamination likely is migrating off-site.Concentrations of CVOCs (primarily TCE) in multiple subslab soil vapor samples exceed 100,000 ug/m^3. TCE appears to be migrating into the on-site building as results from indoor air samples show detections between 140 and 250 ug/m^3.The magnitude of CVOC concentrations in the groundwater indicate the potential for DNAPL at the site.Previous phase II investigations indicated magnitudes of contamination in soil and groundwater to be an order of magnitude or two higher.

DEC Memo:	08/15/09-HRAHMED- As per PropertyShark records:Street address: 491 Wortman Ave Primary address: 1009 Linwood St Zip 11208 Borough Brooklyn Block & lot 04384-0036 First 3 alt addresses 481-491 Wortman Ave, 1009-1019 Linwood St 1/26/10-Vought-File review by Vought:Supplemental Subsurface Investigation Report (PW Grosser-John Eichler-Ph;631-589-6353)-12/9/08. Sent to:Mr. Jack AbelWatermark Designs350 Dewitt AvenueBrooklyn, NY 11207Site has one commercial building that covers entire area of property. Site formerly used as a metal etching company, steel tube manufacturing company and a plumbing faucet/fixture company. Possible plating pit in northwest corner of building. Phase II shows elevated TCE in "soil collected from northwest portion of building". Attempts made to dye flush test floor drain in bathroom but drain was blocked but "drain appeared to lead to a sewer connection pit which discharges to the municipal sewer". Fuel oil AST encased in concrete block in the basement and soil samples below AST shows that "soils were not impacted". Plating pit later discovered to be a loading/bay truck scale. "Based on conversations with the current owner of the property, the sources of TCE appears to have been a TCE degreasing tank with was formerly located directly to the south of the former loading bay/truck scale." Report recommends additional soil and groundwater investigation via soil borings. Proposal of soil boring investigation to delineate contamination via Geoprobe collection of soil and groundwater samples. Delineation will also include vertical profile of groundwater contamination to a depth of 50’bg (i.e collection of vertical groundwater samples at 10 foot intervals from 10-50’bg to study DNAPL). Cost estimate included in proposal.EnviroTrac Limited Subsurface Investigation Report (EnviroTrac-David Lorthior-631-924-3001)-2/1/09. Seven soil boring and one well were installed including collection of five groundwater samples. Borings installed via Geoprobe. Fill from 6-8’bg and sand below. Soil analyticals show: 2400ppb TCE (B2 8-10’bg), 20000ppb TCE (B3(0-5’bg), 8800ppb TCE(B4 6’bg), 140000ppb TCE(B7 2-5’bg), 5000ppb PCE(B7 2-5’bg), 4400ppb TCE(B8 3-5’bg), 3300ppb TCE(B8 7-7.5’bg). PCE not used at site and "suggests that a possible source associated with the prior usage of he building could be repsonsible for the impacted soil in this area." Depth to groundwater is 12’bg. Groundwater analyticals show:54ppb TCE(B2 15’bg), 91ppb PCE(B2 15’bg), 5700ppb TCE(B5 15’bg), 510ppb PCE(B5 15’bg), 36ppb TCE(B5 25’bg), 97ppb PCE(B5 25’bg), 14ppb TCE(B5 35’bg), 26ppb PCE(B5 35’bg), 18ppb TCE(B5 45’bg), 38ppb PCE(B5 45’bg). Report recommends submission of a Remedial Investigation Work Plan. No petroleum contamination found at site.Phase II Environmental Site Assessment (PW Grosser John Eichler Ph:631-589-6353)-1/13/09. Seven soil borings were installed at site in Nov 2008 via Geoprobe. Groundwater at 10’bg and two samples collected for analysis. Groundwater flow estimated to south. Fuel and vent noted leading to AST in basement. One boring installed adjacent to UST with no petroleum staining observed. Floor drain dye test resulted in

491 WORTMAN AVENUE (Continued) **S109374287**

determination drain was clogged. "Boring B-02 was located in the reported vicinity of a former TCE degreasing tank. Based on this, the degreasing tank appears to be the source of TCE in the soil". Soil analyticals show: 201ppb MTBE (GP2 8-10'bg), 18900ppb TCE(GP-02 0-2'bg), 63100ppb TCE(GP-02 8-10'bg). Groundwater analyticals show: 24000ppb TCE(GP1), 544ppb PCE(GP1) 7ppb DCE(GP1), 78ppb PCE(GP4), 24ppb TCE(GP4). Report recommends further investigation to delineate contaminaton and that indoor air quality be evaluated and that AST be properly closed.Environmental Services Report Proposed Corrective Action and Remedial Investigation Work Plan(Impact Environmental-Tony Kloss-Ph:908-534-8820)-7/10/09. Prepared for Watermark Designs. Onsite building has three sections and properly is currently vacant and unoccupied. Building owned by Watermark Designs for past 25 years to manufacture, store, package and ship hardware, bathroom fixtures. Onsite processes included painting, plating, etching, polishing, and machining. "Cleaning agents, such as trichloroethylene(TCE) and tetrachlorethylene(PCE) were routinely used by Watermark Designs, Ltd. at the subject property to fine clean and polish metals and metal products. Watermark purchased new property at 350 Dewitt Avenue and moved and looking to sell this site. Proposal to isolate each building section and excavated contaminated soil. "It is estimated that a total of approximately 400 tons of chlorinated VOC contaminated soil will be excavated from two designated work areas in Building 1...". "Work activities will include the evacuation of as much chlorinated VOC contaminated groundwater as is safe and practical" with estimates of removal of 18,000 gallons of contaminated groundwater. Proposal to collect endpoint soil and bottom groundwater samples and submit results report.Email from Abel to DEC Ahmed-12/3/09. "I'm following-up on our most recent conversation about the NYSDEC Spill Case No. 0809879 assigned to 491 Wortman Avenue, Brooklyn, NY. Were you able to identify and/or obtain a copy of the NYSDEC correspondence issued to Mr. Jack Abel from Watermark Designs Ltd. for the subject property? Watermark Designs Ltd. received some type of NYSDEC correspondence about the subject property but misplaced the letter. The NYSDEC correspondence would have been dated late October 2009 or early November 2009. Our firm advised Watermark Designs Ltd. that the subject property is the first site assigned to a new program within the NYSDEC system for hazardous TCE and DNAPL type contaminant investigation and corrective action. As a responsible party and environmental steward, Watermark Designs Ltd. is prepared to move forward with the scope of work presented in the Proposed Corrective Action and Remedial Investigation Work Plan prepared by our firm and dated 10 July 2009. Watermark Designs Ltd. would like to start the project as soon as possible. Please provide our firm and/or Mr. Jack Abel at Watermark Designs Ltd. withan update concerning the project at your earliest convenience. I included Jack Abel's contact information below. Thank you for your time and attention to the matter." Mr. Jack AbelWatermark Designs Ltd.(p) 718.257.2800, Ext. 20(f) 718.257.2144(e) jabel@watermark-designs.com Email from Impact (Kloss) to DEC Ahmed-1/5/10. "We spoke approximately four (4) weeks ago concerning thecorrective action project for Watermark Designs Ltd. at 491 Wortman Avenue,Brooklyn, NY. Did you have an opportunity to issue an update letter or e-mail to Mr. Jack Abel from Watermark Designs Ltd concerning the project? Also, what is the status of the consent order for the project? When last we spoke in early December 2009, you indicated that the consent order would be issued to Mr. Jack Abel within three (3) to four (4)

491 WORTMAN AVENUE (Continued) **S109374287**

weeks."DEC possibly requires: 1)P-Site letter2)Check PBS for AST registration3)delineation of chlorinated solvent soil and groundwater contamination4)possible approval of proposal to evaluate indoor air (property vacant as per 7/09 report).1/26/10-Vought-Meeting with DEC Krimgold and Austin. Spill reassigned from Ahmed to Vought. 1/28/10-Vought-Received email from Abel that "Good morning. I'm following up on our conversation yesterday morning and the internal NYSDEC meeting you had for the contaminated soil and groundeater project at 491 Wortman Avenue, Brooklyn, NY. When you have a moment today (Thursday, 28 January 2010), please provide a brief update for the proposed project at the subject property. The update can be forwarded to me and/or Mr. Jack Abel of Watermark Designs Ltd. Contact information for Mr. Jack Abel is below."02/2/10-Vought-Received message from Kloss (908-534-8820) and returned call and left message.02/5/10-Vought-Received message from Impact (Kloss) and returned call and left message to return call.02/10/10-Vought-DEC O'Connnell preparing Class II package. Site code received from DEC Spath as:Site Remediation Code:224139T&A Code:653352/11/10-Vought-Received message from Impact (Kloss cell:908-623-0310) and returned call and spoke to Kloss and informed him of reclassification of site as Class II site. Vought also provided him contact info for DEC Oliva for further information regarding Class II CO and possibly beginning of soil excavation. Kloss noted that he had suspected the site would be listed as Class II and has already prepared Watermark Designs for such possibilities. Vought to complete Remediation Database so that DEC O'Connell can designate new Section A project manager. Received email from Impact (Kloss) that "again, thank you for the phone call concerning the latest administrative information for 491 Wortman Avenue, Brooklyn, NY. The initial information is very much appreciated and will be a great help to our client (WatermarkDesigns Ltd.). Our firm will be reviewing the information with the client tomorrow morning." 2/12/09-Vought-Obtained Lat and Long from Google Earth as:40deg39min40secN and 73deg52min32sec W. Note Google earth based on same datum as DEC GIS system used by DEC 0'Connell. Area of lot is .44 acres as per Report and .218 acres when using dimensions from 491 Wortman deed only. Vought to use acreage as per Report as site may encompass other addresses in addition to 491 Wortman. Vought spoke to DEC Barrie and provided acreage of .44 acres and she also will transfer E-docs into UIS database.02/15/10-Vought-Recevied email from Kloss to DEC Oliva that "Late last week I spoke with Mr. Jeffery Vought (NYSDEC Liaison at this point) concerning the NYSDEC Remediation Case Site Code 224139 assigned to the hazardous waste site project at 491 Wortman Avenue, Brooklyn, NY. Mr. Vought provided a much anticipated update and NYSDEC agency contact information. During the conversation Mr. Vought requested that the owner/operator of the subject property (Mr. Jack Abel - Watermark Designs Ltd.) contact you to discuss a Stipulation Agreement/Consent Order for the project. I was informed that Mr. Abel is out of his office this week and will return on Monday, 22 February 2010. I'm certain Mr. Abel will contactyou shortly after his return to the office." 3/11/10-Vought-DEC Oliva sent draft CO to Kloss and Abel.3/15/10-Vought-Meeting with DEC O'Connell and DEC Austin and spill manager transferred to DEC O'Connell for further action.

Remarks: CALLER STATES THAT THEY RECIEVED SOIL BORING SAMPLES BACK TODAY INDICATING CONTAMINATED SOIL AND GROUND WATER. CLEAN UP IS PENDING.

Site Code:	464693
Acres:	.440
HW Code:	C224139
SWIS:	2401
Town:	New York City
Update By:	MJKOMORO
Site Description:	Site Location:The Brownfield Cleanup Program (BCP) site is located at 491 Wortman Avenue in Brooklyn, Kings County and is approximately .44 acres. It is bounded to the south by Wortman Avenue, to the east by Essex Street, to the west by Linwood Street, and to the north by a commercial and industrial property.Site Features:There is a one story industrial brick and steel building which occupies the entire area of the property. No exposed soil or vegetation is present on the subject property.Current Zoning/Use:The area surrounding the site is for industrial and commercial uses. Since 2007, a portion of the site building has been used by a group for religious activities.Historical Use(s):US Tube & Foundry Company, Inc. operated at the site between 1945 and 1973. The National Hanger Company, Inc. operated at the site in 1976. J & H Holding Company, LLC has owned the property since 1983 and manufacturing activities continued until 2007. The site was previously used to manufacture, store, package, and ship decorative fixtures and hardware for bathrooms and kitchens. Processes involved cleaning, painting, plating, etching, polishing, and specific machining of metals and metal products. A cleaning and degreasing area was located along the west side of the building. The source of contamination is within the on-site building.Site Geology and Hydrogeology: The site is located over the Long Island aquifer system, which underlies all of Nassau, Suffolk, Kings(Brooklyn), and Queens Counties. The unconsolidated aquifer formations form a southward-dipping wedge that attains a maximum thickness in Kings County about 800 feet in the southeast area of Brooklyn. Overlying bedrock is the Lloyd, Magothy, Jameco, and Upper Glacial aquifer systems. The lithologic description of sediments from soil borings identifies the material as fill to approximately five feet below grade, underlain by layers of fine to medium silty sands and silt. Groundwater at the site is encountered atapproximately 11 feet below

491 WORTMAN AVENUE (Continued) **S109374287**

grade. Groundwater beneath the property is class GA denoting potential use as potable water. The property lies within New York City, which utilizes reservoirs from upstate New York as sources of potable water.

Env Problem: Nature and Extent of Contamination:On-Site Areas -Based upon investigations conducted to date, the primary contaminants of concern for OU 1 include the chlorinated volatile organic compounds (CVOCs) TCE and PCE in soil, groundwater and soil vapor.Soil - In 2009, analytical results for onsite soil samples showed elevated concentrations of TCE in shallow soils collected from the western portion of the building. In general, concentrations decreased with depth. TCE in shallow soils ranged from 0.610 ppm to 140 ppm. Highest concentration of PCE was 5 ppm. TCE exceeded the Part 375 restricted restidental and protection of groundwater SCOs (21 ppm and 0.47 ppm, respectively). Soil samples collected from the perimeter of the building did not show any exceedances of the SCOs for PCE and TCE. In 2011, samples collected showed a maximum TCE concentration of 54 mg/kg and a PCE concentration of 0.48 mg/kg. In 2013, mercury (1.6 mg/kg), lead (1,000 mg/kg) and chromium (220 mg/kg) exceeded the restricted residential SCOs.Groundwater - In 2008, TCE was detected in groundwater at 24,000 ug/l and PCE at 544 ug/l. PCE and TCE concentrations in samples collected at 25, 35, and 45 ft bgs were significantly lower than in the groundwater interface samples. In 2011, elevated concentrations of TCE and PCE were identified in shallow groundwater, primarily in the northwest corner of the building and the west side of the building. TCE concentrations in shallow groundwater ranged from 77 ug/l to 2,300 ug/l. TCE in deep groundwater was 120 ug/l. PCE concentrations in shallow groundwater ranged from 260 ug/l to 3,500 ug/l. PCE in deep groundwater was 310 ug/l. For samples collected from the building permiter, TCE concentrations ranged from 400 ug/l to 880 ug/l. PCE concentrations from the perimeter locations ranged from 700 ug/l to 1,500 ug/l. In 2013, the highest TCE concentration (8,700 ug/l) was at an on-site shallow well located just south of the truck scale pit. The highest PCE concentration (1,900 ug/l) was at a shallow well located on the sidewalk by the northwest corner of the building. One off-site well located west of the building exceeded the groundwater standard for chromium (168 ug/l).Soil Vapor - In 2011 a soil vapor investigation was completed at the site, consisting of soil vapor, sub-slab, and indoor air sampling. Results were compared to NYSDOH Guidance for Evaluating Soil Vapor Intrusion (2006). TCE concentrations in indoor air ranged from 140 to 250 ug/m3; PCE in indoor air ranged from 4.3 to 8.5 ug/m3. In sub-slab samples, TCE ranged from 190 ug/m3 to 2,300,000 ug/m3; PCE ranged from ND to 9,200 ug/m3. In soil vapor samples collected from the perimeter of the buidling, TCE ranged from 130 ug/m3 to 72,000 ug/m3; PCE ranged from ND to 32,000 ug/m3. In 2013, additional soil vapor, sub-slab and indoor air samples were collected. Indoor air in area of truck scale pit was 2 ug/m3 for TCE and 13 mg/m3 for PCE. Sub-slab concentrations is this same area were 26,500 ug/m3 for TCE and 568 ug/m3 for PCE. Off-site soil vapor concentrations ranged from 57.5 ug/m3 to 170 ug/m3 for TCE; PCE at the same off-site locations ranged from 1,160 ug/m3 to 1,380 ug/m3. The off-site locations were located southwest of the site. Also in 2013, indoor air samples were collected twice in the office and congregation areas after installation of temporary filtration systems. In the congregation areas, TCE ranged from 64.5 ug/m3 to 214 ug/m3; PCE ranged from 3.8 ug/m3 to 8.88 ug/m3. In the office area,

491 WORTMAN AVENUE (Continued) **S109374287**

TCE ranged from 83 ug/m3 to 138 ug/m3; PCE ranged from 6.98 ug/m3 to 10.3 ug/m3.In April 2014, an IRM Work Plan was submitted to address on-site soil, groundwater and soil vapor contamination. Also, a Supplemental Investigation Work Plan was submitted to address off-site soil vapor and groundwater contamination.

Health Problem: Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Soil vapor intrusion sampling in the on-site structure determined that exposure to site related contaminants at levels above NYS DOH guidelines is likely occurring since a portion of the structure is currently occupied.

Count: 2086 records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/16/2014
Date Data Arrived at EDR: 01/08/2015
Date Made Active in Reports: 02/09/2015
Number of Days to Update: 32

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014

Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Next Scheduled EDR Contact: 11/28/2011
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013

Last EDR Contact: 01/09/2015
Next Scheduled EDR Contact: 03/09/2015
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013

Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014
Date Data Arrived at EDR: 03/18/2014

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2014

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014
Date Data Arrived at EDR: 12/29/2014
Date Made Active in Reports: 01/29/2015

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/09/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014
Date Data Arrived at EDR: 12/29/2014

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

STATE AND LOCAL RECORDS

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 11/18/2014
Date Data Arrived at EDR: 11/20/2014
Date Made Active in Reports: 01/12/2015
Number of Days to Update: 53

Source: Department of Environmental Conservation
Telephone: 518-402-9622
Last EDR Contact: 02/18/2015
Next Scheduled EDR Contact: 06/01/2015
Data Release Frequency: Annually

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers
Source: Department of Health
Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Certified Sanborn® Map Report

2/26/15

Site Name:
East New York and Ocean Hill
2864 Atlantic Avenue
Brooklyn, NY 11207

Client Name:
Fleming-Lee Shue, Inc.
158 West 29th St
New York, NY 10001

EDR Inquiry # 4217611.3

Contact: Sasha Rothenberg

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Fleming-Lee Shue, Inc. were identified for the years listed below (selected maps only*). The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Site Name: East New York and Ocean Hill Rezoning

Certification # 8779-4804-BBA7

* Environmental Data Resources, Inc. has been instructed by Fleming-Lee Shue, Inc. to print ONLY the Sanborn Maps for the years listed below:

2007 (37) 1951 (27)
1994 (34) 1928 (30)
1993 (3)
1987 (37)
1979 (37)
1968 (20)

Total Maps: 225

Sanborn® Library search results
Certification # 8779-4804-BBA7

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Fleming-Lee Shue, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.
