RUDOLPH STEINER SCHOOL (Continued) **S102619273**

Spill Record Last Update:	1998-01-06
Spiller Name:	CHARLOTTE O'BRIEN
Spiller Company:	RUDOLPH STEINER SCHOOL
Spiller Address:	15 EAST 79TH STREET
Spiller County:	001
Spiller Contact:	JOE DEBELLIS
Spiller Phone:	(718) 647-4200
Spiller Extention:	Not reported
DEC Region:	2
DER Facility ID:	231588
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN TYREE CALLED IN TO BID ON CLEANUP OF OIL & SOIL IN TANK ROOM. TYREE DID JOB AND FOUND SOLID CONCRETE FLOOR UNDER THE 1500 AST. NO CRACKS AND IN GOOD CONDITION. ACCORDING TO CONCTRACTOR, 2 LOOSE FITTING ON TANK CAUSED SPILL. 11/18/96:MM INSPECTED STEINER SCHOOL. TWO NEW 275 ASTS INSTALLED AND OLD TANK EMPTIED. INPSECTION OF THE OLD TANK REVEALED IT WAS HEAVILY PITTED AND WOULD NEED LINING. ACCORDING TO MR. MORGAN, THE OLD TANK IS GOING TO BE REMOVED AND THE ROOM CONVERTED TO STORAGE SPACE. INSPECTED THE SUMP AND FOUND GOOD AMOUNT OF OIL. ACCORDING TO MORGAN, OIL FROM TANK CLEANING PEOPLE. TOLD HIM TO GET CONTRACTOR TO CLEAN OUT SUMP."
Remarks:	"caller was notifed by notifier about a spill in vault room at school - it is unknown when it occurred or what caused it - it appears to be historical"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DER Facility ID:	268046
DEC Memo:	"Tipple responded to spill//PTC cleaning spill, emptying tank, and setting up temp tank. Failed tank is square tank, will be rebuilt/ replaced by PTC and the documentation will be sent to DEC once a full system test is passed and disposal documentation is assembled. Boiler room floor appeared to be in good condition//freshly painted prior to the spill. 3/29/04 Tipple spoke with bld. super... he will send pictures of cleaned area//// 05/05/05 digital photo//floor appears to be cleaned//nfa///"
Remarks:	"7500 gallon tank leaking from bottom. this is a tank test failure. caller was not the tank tester and was unsure of the method,pbs number"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #146602: 01/07/03 17:05 hrs .V.Mannino # 56899 operating supervisor of manhattan I&A reported to N.Muldoon # 187723 that T.Fitzgibbon # 12737 also of the I&A @ 16:35 hrs while doing an inspection in Vault 4399 f/o 241 e 75 St found 10 gallons of transformer oil and 40 gallons of water on the concrete floor. The cause of the spill is a leak. The source of the spill is the transformer. At this time there is no release to sewer or waterways as per V.Mannino. Spill tag # 17796 was installed. This transformer

VAULT #4399 (Continued) **S106010528**

is on feeder 24M84 and account # w 3499 is being used. At this time pads were placed and the environmental desk will notify transportation to have a over 50 tanker sent to the location. N.Muldoon spoke to ERT D.Duke at 16:55 hrs in regards to this incident Two samples were taken one for P.C.B and one for oil I.D chain of custody form # AAA22333 was used. UPDATE: 01/0703 17:55 hrs. Spoke to V.Mannino and he said that no cleanup could be done until the feeder is denergized and the unit is drained. Also spoke to ERT D.Duke and he said a crew must stay on location. At this time no tanker was ordered until feeder is denergized as there is one out in the network. E2MIS 23-SEP-2003 11:12:53 Page 2 of 5 1/7/2003 @ 22:30 @ 22:52 LSN # 03-00155-001 @ 21:52 Date Approved, received and sampled - 1/7/2003 PCB Analysis by EPA 608/8082 MATRIX: OIL GRAB LOCATION: 241 E.75 ST STRUCTURE: VAULT 4399 FEEDER ID: 24M84 QC ID: 06-200301070127 TEST DESCRIPTION RESULT UNIT METHOD Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 19.8 ppm EPA 608/8082 TOTAL PCB 20 ppm 1/7 @ 22:45 Partial cleanup and Drain Unit set up for 07:00 HRS on 1/8/2003 Ordered from Transportation an Undr 50 tanker and faxed documentaion I&A faxed documentation for cleanup start UPDATE 1/8/03 19:10 hrs. R.Biliski operating supervisor I&A reported to N.Muldoon #18723 that the drain and disconnect in V 4399 was completed at 19:00 hrs. 385 gallons of oil was removed from the unit. 22:05 on 1/8/2003 J felder # 05658 of I&A reports to me that the Unit has been drained and the partial cleanup has been completed as of 21:55 HRS.. The Vactor truck was used to wash down and remove the liquids. The floopr was washed with orange solution and Balonies were placed around the unit to contain anythim=ng else. Cleanup crew - Bowens - # 87537 Complete cleanup will take place when the transformer is removed. Update: 03-MAR- 2003 @ 16:30 Clean up complete as per C.Pearson # 50613 OS cable Dept. Washed twice with slix and power washed and flushed truck. No solids removed , just soil. amd "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Jan 20th, 2006 Sent CSL To. Mr. Carl Boehmig Brown, Harris & Stevens Inc. 770 Lexington Ave New York, NY 10012 05/16/06 Sharif Rahman- Left a messege for Carl Boehmig,(212)508-7295 regarding the spill clean up documents. 05/25/06 Sharif Rahman- Carl Boehmig returned my call and indicated that ALC, contact: Mr.John Kurth @ (212)675-5544 did the clean up. ALC will send DEC the closure report. 07/18/06 Rahman- I sent e-mail messege to John Kurth to forward the closure report to DEC. 08/30/06 Rahman- A short report from ALC Environmental says about the removal of contaminated soil.Disposal manifest is not provided.Two soil samples were taken beneath the excavation, analyzed for SVOCs. Levels of SVOCs are Naphthalene is (69,000)ug/kg,Indeno Pyrene-110,000 ug/kg, Chrysene- 39000 ug/kg.VOCs were analyzed and within acceptable limit(#6 oil).Need site plan, manifest and clean end point sample after more excavation. 06/11/07 Rec'd final report from ALC.The leaking piping was removed before excavation took place.Sidewalk was demolished and removed, due to the hazard the open sidewalk poses to the pedestrian. the sidewalk was filled with sand and replace after taking the soil sample.The entire property and block is encapsulated with concrete.Considering depth to groundwater,analytical results,lack of an exposure pathway at the subject property, spill can be closed.(SR)"
Remarks:	"While replacing the oil line they discovered a historical spill under the line. ALC Environmental will be doing the clean up."

(917) 434-4922 01/12/15-Hiralkumar Patel. 8:57 AM:- spoke with Ray at PTC. they finished cleanup on 01/10/15. Ray mentioned that some oil got into sump pit which was also cleaned up immediately. crew will visit site today to confirm no other issues. Ray confirmed no leak from two (2) 275 gal tanks at the site. he will call back with update. he will send pics taken during cleanup. 9:15 AM:- received email from Ray including pics from initial response. pics show impact to concrete surface. DEC Vought will inspect site. 1/12/15-Vought-Site visit by Vought as this site proximal to another spill site of Vought's. Vought met and spoke with Una from Center for Veterinary Care and inspected basement and noted 2(275-gallon) manifolded ASTs on an elevated concrete platform (concrete had no visible cracks). Vought noted speedy dry (both impacted and clean) under the ASTs and clean speedy dry around a sump pit which was approximately 15' away from ASTs. Vought noted no product in sump but did note olfactory evidence of petroleum vapors. Vought also noted some possibly impacted soil at base of old coal chute that was adjacent to vent pipe that overflowed. PTC arrived on site during site visit by Vought and Vought met with both Una, PTC and another veterinarian from Center (white male middle aged) and other vet noted there were repeated spills and asked that deodorizer NOT be used as it was during last events. Vought noted same requirement to PTC and provided both veterinarians number of Spill hotline and business card for Vought. No endpoint samples to be collected due to minimal amount of impacted soil. These spill notes provided to DEC Patel. 04/09/15-Hiralkumar Patel. after discussing with DEC Vought, case closed based on information provided by PTC and observations during site visit by DEC Vought."

Remarks: "Clean up is pending over fill of tank"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	21227
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

	A00 - Tank Internal Protection - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	I04 - Overfill - Product Level Gauge (A/G)
	J02 - Dispenser - Suction Dispenser
	G03 - Tank Secondary Containment - Vault (w/o access)
	H00 - Tank Leak Detection - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	B00 - Tank External Protection - None
	C00 - Pipe Location - No Piping
	F00 - Pipe External Protection - None
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed

225 EAST 74TH STREET (Continued) **S103517607**

Pipe Model:	Not reported

TTF - CONDOS (Continued) **S121464531**

DEC Region: 2
DER Facility ID: 517310
DEC Memo: "DEC Piper- Spoke with Protest. repairs and retest pending. Assigned to DEC Lakhani ttf letter sent to : First Service Residential 622 Third Ave 15th Floor New York, NY 10017 Attn: Compliance 11/07/17 - Lakhani The 5000 gallon UST on the property failed the tightness test due to a dry leak associated with the vent line. Protest will be contacted once Controlled Combustion Co. Inc. (Thomas Viti: 718-367-9800) makes the appropriate repairs to the vent line. The superintendent of the building is Mike (212-794-4523). Controlled Combustion Thomas called to inform that they are not performing the repairs. The owner will have the tank repaired by a contractor other than Protest. Once the repairs are completed, Controlled Combustion will be notified so a tightness test can be performed. 11/30/17 - Lakhani Controlled Combustion Tom called informing that the tightness test is scheduled for 12/01/17. If the tank passes, formal closure will be requested by 12/05/17. Tom sent the initial failing tightness test which reveals a dry leak on the vent inside the building. The vent has been repaired by the building. 12/05/17 - Lakhani Controlled Combustion Thomas Viti sent a closure request letter and passing tightness test results. Closure Request Letter (Controlled Combustion: Jerry Williams, 12/05/17) - On October 31st, 2017 a tank tightness test was performed. The tank failed the test with a dry leak caused by an improperly positioned union inside the vent pipe. There was no fuel oil release. The building took corrective action to fix the improperly positioned union and stop the dry leak. A second tank tightness test was performed on December 1st, 2017. The fuel oil storage tank was found to be tight. Passing tightness test was submitted for the 5000 gallon UST indicating a tight tank and system. Spill is closed."
Remarks: "5000 gal ust"

Tank Info:

Tank Number:	001
Tank Id:	16229
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

J02 - Dispenser - Suction Dispenser
C03 - Pipe Location - Aboveground/Underground Combination
I05 - Overfill - Vent Whistle
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
A00 - Tank Internal Protection - None
L09 - Piping Leak Detection - Exempt Suction Piping
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	03/01/1977
Capacity Gallons:	5000
Tightness Test Method:	21

Contact Name:	JOE LOMBARDI
DEC Memo:	"4/19/10 - Raphael Ketani. Notes from later associated spill #1000721: A 10 gal. #4 oil spill was called in by Joe Carny of NYCFD Hazmat 1 (347) 203-6886. He said that it was a spill out of the vent pipe. A little of the oil went onto the sidewalk, but the bulk of the oil landed in the street. He said that, as far as he can tell, no sewers were affected. Mr. Carny added that Anchor Tank Lines already had a crew on the scene cleaning up the oil before the FD arrived. He said that the cleanup crew put down Speedi Dri and it's almost completely cleaned up right now. As the spill was small and as the crew fron Anchor Tank Lines is continuing to clean up the oil, I have determined that the spill does not pose a threat to people or the environment. Therefore, I am closing the spill case. "
Remarks:	"spill to outside paved area/clean up underway"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"03/25/10 Spoke with Neil Tomaseti.Eastmond replacing a 5,000 gallon AST.Minor contamination found below the bottom of the tank, which is being removed by Eastmond today. Report will be sent to DEC Raphael

APT BLDG (Continued) **S110243638**

Ketani.(sr) 3/26/10 - Raphael Ketani. I made an unannounced site visit. I met the super., Tom Dowd. He showed me the tank room (see E-docs). There was a very slight odor and the PID meter registered 10 to 18 ppb of vapors. I saw a dark area in the soil where the tank used to rest. This was near the doorway to the tank room. Other than this, I did not see any problems. Pieces of the new tank were standing up in the adjacent boiler room. I thanked Mr. Dowd for showing me the tank room and then left the site. 4/13/10 - Raphael Ketani. Today I received the Spill Closure Report from Eastmond & Sons. I began my review. 4/14/10 - Raphael Ketani. I reviewed the Closure Report and found that the soil contamination was well below TAGM, except for a couple of elevated hits for chrysene. Based upon the analytical results in the Spill Closure Report and that the oil contamination didn't travel far and could be removed, I have determined that the residual contamination (essentially some chrysene) is not a threat to the environment or to the public. Therefore, I am closing the spill case. "

Remarks: "REMOVAL OF A 5000 GALLON UST CONTAMINATED SOIL FOUND CLEAN UP PENDING. SOIL SAMPLES TAKEN RESULTS PENDING."

CON EDISON SERVICE BOX: 14270 (Continued) **1016677202**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"TTF letter sent to: 222 East 80 Corp c/o Andrews Building Corp Attn: Christopher Howe 666 Broadway - 12th Flr New York, NY 10012 10/6/08 Received message from Steve Braun of Approved Oil regarding this site. Called him today and left message. bf 10/7/08 Received message ot 4:22 Pm on 10/6 from Steve Braun. Cell:718-238-1050. Called him back today. Closing tank in place. Exposed suction line and no contamination found. Will send letter for closure. bf 10/17/08 Received letter from Steve Braun of Approved Oil, dated 10/7/08, on 10/15/08. Tank is located under a raised planting area in front of the apartment building (photo attached to letter). Tank pipelines were exposed. They found several abandoned lines that were disconnected and plugged. Tank was retested and failed. The owners want to close this tank. New AST. No contaminated soil found during work. Excavation has been backfilled to restore orderly appearance to property. Tank is empty, but not gas freed. Some bottoms remain. He wantsd to know how to proceed. Called Steve B. and left message that they need to determine the cause of failure and find contamination , if any, or sample; submit application and properly close the UST and register AST (if AST is over 1100 gallons). Requested that he call me back. bf 12/17/08 Received message from Steve Braun yesterday at 4:27 PM. (718)238-1050. He wanted to know why he never received a response. I called him back and left voicemail message that spill can not be closed because I do not have enough information regarding possible contamination, tank was not closed in PBS records, and new AST not registered (if over 1100 gallons). bf 2/9/09 Received message from S. Braun. Wants to know what needs to be done to close spill. 2/11/09 Returned call to S. Braun. Left voicemail that sampling needs to be done and requested that he call me. bf 5/20/09 Received letter requesting closure with site plan and sample results. bf 7/7/09 Returned e-mail to S. Braun requesting site plan showing the tank and

222 EAST 80 CORP (Continued) **U003178443**

distances of sample locations, and registration of AST. bf 7/23/09 Received e-mail from S. braun. Copy of application for new tank and site sketch showing locations of sampling. Sent him e-mail with tank closure notification form. He expects to close tank in approximately 2 weeks. it is to be filled with concrete slurry. bf 3/31/15 bf: On 3/25/15, received two calls regaring the closure letter for this site: 1. Tarcy Bascom (516)374-6080 2. Jeff Horowitz (212)986-8400 (914)548-9236 Prepared the letter and sent it by e-mail to jshchinc@aol.com. Tried to send it to tracy@barmnyc.com, but received the fiollowing e-mail message: Delivery has failed to these recipients or groups: tracy@barmnyc.com (tracy@barmnyc.com) The domain name in the email address is incorrect. Check the address. The letter was mailed to the site owner address in the PBS file: 222 East 80 corp. 222 East 80th Street New York, NY 10017"

Remarks: "PBS No: 2-082546 hole in suction line, will uncover repair and test"

DEC Memo:	"12/19/06-Vought-Off hours responder. Vought spoke to DEP Wang and she was going to leave site and confirmed that spill was on concrete with no impact to subsurface and was being cleaned up by contractor. Vought received message that spill was cleaned by Petroleum Tank Cleaners. Vought to call PTC (718-624-4842 to confirm cleanup). 01/03/07-Vought-Received anonymous odor complaint from resident who lived in upper floor of building that odors were very heavy in lobby area. Vought called Kathy Morrow ph:212-563-6252 fax:212-967-7056 of Kaufman Properties and informed her of immediate DEC site visit and requested to have representative onsite. Vought performed site visit and as per super (Peter) no delivery occurred at time of spill and no spill observed out of vent pipe. Cause of spill was leaking of 7500-gallon #6 fuel oil UST. Petroleum Tank Cleaners was hired to clean spill and Abilene Inc. (John Thiemer ph 718-372-4210 fax:718-372-0255) was hired to do tank installation and remove tank. Tank will be thouroughly washed prior to removal and ventilation system will be installed to ensure no vapor impacts. Tank demolition and ventilation installation scheduled for tomorrow. Vought inspected all floors of building and windows were being kept open by super (Peter) to ensure adequate ventilation. No olfactory vapors detected in upper floors of building. No cracks in concrete adjacent to UST and absorbent pads placed under UST. Fuel oil also noted in sump pit and DEC required removal. As per Peter sump pit was not turned on since spill began as a result no NYCDEP notification made. DEC requires: 1)installation of ventilation system 2)removal of product from sump and integrity statement of sump 2)integrity statement of concrete competency under UST 4)PBS registration Vought sent out CSL with above requirements with cc to abilene and one month due date. Vought called Morrow for and left message to return call fax number and to confirm installation of ventilation system. 1/5/07-Vought-Received call from Morrow with fax number. Morrow confirmed that the ventilation system was running, the sump was emptied and PBS registration will be sent in. 1/12/07-Vought-Received call from Kathy Morrow and concrete in tank room was broken and some exxcavation was performed. Site visit scheduled tomrrow at 10am. 1/17/07-Vought-Site visit performed with Morrow, Theimer, super, PTC Ray Lara and PTC Bob Lamirata. Odors still noticeable in lobby way of building. UST was removed and fans currently operational. Groundwater present at one foot below fomer UST location and no impact to groundwater. Soil below UST location shows no impact via field inspection. Product still noted in sump and DEC required cleanup of sump to see if product reoccurs (groundwater contamination). If product reoccurs indicating groundwater contamination is present a subsurface investigation and/or excavation will be required. If groundwater contamination does not reoccur spill will be closed pending epoxy painting of tank room to remove any further odor sources (some impacted concrete still present from surface spill from former UST). PBS registration was also submitted by Morrow. 03/01/07-Vought-Received call from PTC Salamack and product seeping

APT BLDG (Continued) **S108299130**

out of foundation. 06/18/07-Vought-Received call from PTC Bob Lamirata and biweekly water recovery visits have been occurring for past three months. PTC has been flushing hole with water and oil is coming through lower basement. Odors noticeable in lobby and odors coming up through air conditioning unit. Site visit scheduled for Wednesday at 11:00am. 06/20/07-Vought-Site visit by Vought and onsite were super(Joe), Kathy Morrow and PTC Anthony Lara. Slight odors noticeable but as per Morrow and Joe no odor complaints were received since original spill report. PTC cleaned free product from sump and drilled approximately six holes in sub-basement boiler room wall that was underlying tank room location. Upon drilling holes, free #4 fuel oil product came out of holes and at time of DEC site visit oil was observed seeping from holes and absorbent pads were placed to absorb oil. Tank had not been replaced to date and exposed soil with some petroleum odor exposed. Moist soil may indicated former flushing as stated by PTC previously and ordered immediately by DEC to stop. DEC requires as per 1/17/07 meeting: 1)collection of soil samples from under former UST location 2)delineation of soil and groundwater contamination 3)submission of PBS registration. Vought sent letter with requirements and one month due date. 06/21/07-Vought-Letter from PTC Bob Lamirata. During the month of January 2007 Petroleum Tank Cleaners, LTD personnel had pumped out and cleaned the pit in question on the 3rd, 4th, 5th and 8th of that month. At times this service was being conducted it was observed that the pit is constructed soley of cement and in good structural condition. Enclosed are DEC invoices. Letter from Abilene Group (Huber) stating that PBS registration was submitted with fees to PBS unit. Vought called Bob Lamirata and left message that DEC wants to be contacted for site visit when boring is performed. 07/03/07-Vought-Site visit by Vought. Onsite was PTC Ray Lara and two workers, Kathy Morrow and super (Peter). Borings performed to depth of three feet in tank room adjacent to seepage location in boiler room showed groundwater at depth of two feet and no petroleum impact. Due to multiple refusals approximately eight test pits were excavated and no evidence was found of #6 petroleum contamination (soil was light brown with no indications of #6). One composite soil sample collected for 8260/8270 analysis. During further discussion with Kathy and Peter with regards to possible sources of oil they indicated that there were two separate spill incidents. The first incidenct was that Peter noticed approximately 5’ square spill of #6 oil from the bottom of the tank. Tank was removed and concrete was found to be in good condition. The second spill occurred during a fill by Stuyvesant Oil causing #2 temporary 275-AST to rupture and spill over entire tank room. Vought observed pictures of at least 3 of #2 fuel oil in tank room at time of spill. Spill cleaned by PTC. As per Morrow and Peter, oil was not noticed in sump pit of boiler room until second spill. Eight test pits in tank room with no impact of #6, no spill in boiler room till second spill event suggest that spill in boiler room is from second spill event and no soil excavation is warranted in tank room. Spill may have travelled down foundation footing walls (area of impacted soil is under weight bearing portion of building. DEC requires: 1)submission of soil analyticals 2)site photographs of spill event 3)recovery and observation log of basement sump pit. PTC will monitor sump and replace pads twice per week and then stagger as oil diminishes. No odor complaints received to date. Permission will be granted to replace AST due to lack of recoverable soil impact from below former AST location upon reception and review of soil

APT BLDG (Continued) **S108299130**

analyticals. 07/25/07-Vought-Received call from PTC Lamirata who will be preparing report with above requirements and submitting to DEC. 9/7/07-Vought-Received call from and spoke to Morrow who was inquiring if DEC received report. Morrow will follow up with PTC for submission of soil sample analyticals, photos and will begin log of sump observations. 09/26/07-Vought-Received call from Morrow and also received submission of soil analyticals via 8260/8270 from Kaufman Properties and analysis performed by South Mall. No TAGM 4046 Soil Objective Exceedences which may be expected as spill was from temporary tanks adjacent to wall where pooling of oil was noted and concrete in former tank room in fairly good condition. Letter requested DEC permission to install tank. Vought sent letter approving of tank installation pending continuation of weekly monitoring and submission of log and photos from time of spill and also submission of quarterly reports. Morrow noted in conversation that oil is continuing to seep into the basement but is decreasing in amount and also indicated that log still being actively kept. 10/09/07-Vought-Received call and spoke to Michael Tone (Nixon Peabody fax:866-947-2126 516-832-7541) who is attorney for property. Tone looking for when case will be closed. Vought explained case will be closed when free product no longer seeping through boiler room wall and faxed Tone copy of spill notes. 11/06/07-Vought-Received call fron PTC Lamirata and site visit performed and no products observed for past two weeks. Lamirata requested spill closure and DEC closure will be considered in 30 days upon submission of observation logs. 11/29/07-Vought-Received call from and spoke to Mike Tone. Tone inquired as to closure of spill as Board of Directors who are considering additional borings. Initial discussion with PTC about further borings. PW Grosser may be consultant and will be advising building owner. 1/11/08-Vought-Received letter from Kaufman (Morrow) to PTC Lamirata dated 1/8/08 seepage of small amounts of oil into the subbasement has recurred at the same location in the sub-basement and in the same manner as before . Given the recurrence of the petroleum seepage, the decision to install test borings will be postponed . Vought called Kathy Morrow and she suggested talking to Michael Tone. Temp tank installed by PTC and tank burst and as such PTC has been covering cleanup. PW Grosser was hired by building Morrow. Vought called (Mike Tone-Nixon Peabody-516-832-7541 who is an environmental attorney and will be contacting PW Grosser). Vought called Tone and left message to return call to discuss borings at source location (where temp tank burst) and letter from Morrow stating they will be postponed. vought spoke to Tone and seepage is very small. Pad is accumulating seepage at 1/4 pad per week. As per Tone he will continue to monitor seepage. 2/26/08-Vought-Received call from and spoke to Mike Tone and he is looking to install new permanent tank and PW Grosser will perform site visit to ensure that new tank placement will affect further investigation and place tank closer to outer wall. Vought advised that borings should take place before tank installation however DEC will accept long term proposal of monitoring seepage. Mike will send in plan for tank installation and summary of recovery efforts to date and notify PBS of tank installation. 02/24/09-Vought-Up to date file review: Letter from PW Grosser (Paul Grosser)- On September 3rd, 2008 a large portion of the concrerte slab in the basement of 229 E.79th Street was removed for the installation of a new fuel oil tank with containment. After removal of the slab there was no evidence of petroleum contamination in the soils beneath the slab. The soils were clean and dry in this area .

APT BLDG (Continued) **S108299130**

Request for No Further Action. Letter from Nixon Peabody LLP(Tone)-1/29/09. Enclosed is copy of observation log of seepage. Log began in 7/10/07 and ended in 1/28/09. No seepage observed from 11/30/08 to 1/28/09. Spill closed by Vought and closure letter sent to above address with cc to PTC and Tone. "

Remarks: "CALLER REPORTS AN OLD 7500 GALLON TANK FAILED IN A CONCRETE BASEMENT. SPILL IS CONTAINED. FDNY ON SCENE. STUYVESANT FUEL OIL HAS BEEN CONTACTED. ABILENE COMPANY HAS BEEN CONTACTED FOR CLEANUP. 12/19 00:39 NYC DEP VERA LAW WOULD LIKE A CALL REF TO THIS SPILL AT 917.682.3267. REP PAGED."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"02/27/06 Sharif Rahman- Inspected the site on 02/24. About 10-15 gallons spilled in the boiler room due to leak on the oil filter. Castle crew doing the clean up. 03/14/06 Sharif rahman-Rec'd email messege from the property manager Angie Helms as described below: Attached are the three photos I took of the boiler room after cleanup. The oil leak was on the 24th of February. If you have additional questions, please feel free to call me at 212-293-8826. Thanks, Angie Helms Property Manager The photographs looked the boiler room clean. Spill closed."
Remarks:	"spill came from a leak in the pressure gauge in the burner, spilled in basement and went into sewer in the basement."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 1:30 CALL WESTON;CGUDER: CRACKS IN BOILER ROOM PIT WALL - NOT A LOT OF OIL - NO POBBING ON BOILER ROOM FLOOR. - THIS HAS BEEN A PROBLEM FOR A LONG TIME(ACCORDING TO THE CUSTODIANS) 2 - USTS - ABANDONED(SCHOOL USES STEAM) 15 YEARS AGO THEY WERE CLEANED AND FILLED WITH SAND VAULT IS CLEAN - CAN'T SEE BOTTOM OF TANK VAULT IS ONLY TO ACCESS MANWAYS - 2-10,000 GALLON BOTTOM OF TANK ABOUT THE SAME ELEVATION OF BOILER ROOM WALL PUTTING TOGETHER A WORKPLAN 5/18/04 - AUSTIN - TRANSFERRED FROM TOMASELLO FOR REASSIGNMENT - END 6/18/04 New spill #04-02962 called in addressing this same incident, transferred to Tipple 6/21/04 SCA has old phase2, Brad Mullner--Lewis Berger Group 212-612-7957 will fax for review. 7/15/04 wants to remove tank early August....will hand deliver PBS form soon 8/04 site visit ///will backfill in time for school to begin////wells are required to address contaminants under building which are slowly oozing into excavation 04/12/06 - Hough - Next Step: Site visit and follow-up with Weston on Closure Report for tank removal, and to determine if subsurface investigation was conducted. 02/01/07: Reassigned to Chanda. 4/12/07: Kartik Chanda of DEC reviewed documents regarding this spill case. This spill number was assigned to this location due to the #2 fuel oil found in the boiler room at the site. The Department requires that the following information be submitted to DEC for review. 1. A tank closure assessment report. 2. Locations of tank and/or line test failure. 3. A subsurface investigation report, including current and historical soil and groundwater analysis. 4.Surrounding property sketch: A surrounding property sketch including property layout and usage must be submitted to NYSDEC. North arrow and scale must also be included on the site

SCHOOL PS 6 (Continued) **S103238854**

plan. 4/13/07: On 4/13/07, Chanda sent a letter to Ms. Lee Guterman, Manager, IEH Division, School Construction Authority, requiring that a subsurface investigation and a Tank Closure report be submitted to DEC for review by May 28, 2007. 7/2/07: Chanda received a UST post Closure Groundwater Monitoring Report from NYCSCA on July 2, 2007, prepared by Louis Berger & Assoc., P.C. dated May 18, 2007. 7/19/07: Chanda reviewed the Underground Storage Tanks Closure Report and has the followings comments. 1.The USTs Closure Report indicated that the two (2) 10,000-gallon #6 fuel oil USTs and residual petroleum-impacted soil were excavated and removed from the site between July 29 and August 18, 2004. 2. The 14 post exavation soil samples and one GW sample were collected from the side walls and bottom of the excavation. The endpoint soil samples analytical result showed that all STARS VOCs and SVOCs were less than the NYSDEC TAGM RSCOs. 11/5/07: Chanda reviewed the UST Post Closure Groundwater Monitoring Report prepared by Louis Berger & Assoc., P.C dated May 18, 2007 and has the following comments: 1.On December 27, 2006 the two on-site recovery well were inspected and developed to allow the natural hydraulic properties of the screened formation to return, thus allowing water flow more freely to the well. 2. The GW samples were collected on January 15, 2007. The analytical results of the GW samples collected from wells RW1 and RW2 indicated that no STARS VOCs or SVOCs were detected at concentration exceeding the NYSDEC TOGS. 11/9/07: Kartik Chanda discussed with Joe Sun (NYSDEC) and based on the information presented to the Department, DEC closed this spill, dated 11/9/07. 11/13/07: Chanda sent a NFA letter to James Merlo, Manager, Fuel Division, NYC Department of Education and Ms. Lee Guterman, Manager, IEH Division, NYCSCA by regular mail. "

Remarks: "OIL IS SEEPING THRU THE WALL IN THE BOILER ROOM PIT,APPARENTLY FROM 2 ABANDONDED UST'S LOCATED OUTSIDE THE BOILER ROOM."

Tank Info:

Tank Number: 001
Tank Id: 14103
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G02 - Tank Secondary Containment - Vault (w/access)
J02 - Dispenser - Suction Dispenser
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
E02 - Piping Secondary Containment - Vault (with Access)
F00 - Pipe External Protection - None
H00 - Tank Leak Detection - None

CON EDISON (Continued) **U003388492**

K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1960
Capacity Gallons: 15000
Tightness Test Method: -
Date Test: Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Address:	4 IRVING PLACE
Spiller Company:	001
Contact Name:	MARK SCHLAGEL
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL CON ED E2 MIS REPORT 3/17/00 At 0200 Mike Moysten OS Steam Construction found water leak in a CON ED Steam Manhole at E79 St and 5th Ave. DEP arrived at 0430 and found no leak. They shut down the water main. At 0815hrs, the DEP HAZMAT team arrived and took sample s of the manhole and in the stret at this location. At 1115hrs DEP reported back to CON ED STEAM that the samples came back positive for Asbestos. This wasreported to the CON ED GAS Control Center at Van Nest to Lyle E. Seagriff O.G. S. at 12:55 by William Fitton Steam Operations. DEC INSPECTOR NOTES Call from Masood Akbar: NYC DEP took samples of water and sand- positive for asbestos. Steam line did not break. 1-3% possibly crysotile"
Remarks:	"DEP HAD A WATER MAIN BREAK AT ABOVE LOCATION WHICH EFFECTED CON EDISON STEAM MANHOLE. WATER WAS PUMP OUT OF HOLE. TEST SHOW THAT WATER CONTAINED ABOVE MATERIAL. NO CON ED # AVAILABLE. NO CALL BACK REQUESTED."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	JJ HALBERT
DEC Memo:	"7/24/17-Zhune spoke to JJ Halbert from Unirted Metro. Mr. Halbert said oil came from the top of the truck. Approximately 7 to 10 gallons of oil #2 went to the street. The Fire Department responded. Riteway was on the way to clean the spill. No drain impacted. Con Ed manhole was impacted. Con-Ed will send their own people to clean the spill. 8/1/17-JJ Halbert from Unirted Metro sent the following email. On 7/22/2017 United Metro was alerted by a driver that he had a spill. Driver stated that he was emptying one compartment when the back compartment had back pressure cause valve to fail and send oil from top of the truck and onto the ground into street. DEC was notified,and Riteway was called to clean affected area. Riteway cleaned area and removed all debris and materials used to clean area. No drains or soil were impacted. Spill caused by equipment failure. Spill closed. "
Remarks:	"sewer impacted, clean up is enrt"

DEC Memo:	"11/25/11-Vought-No prior review due to heavy workload. Vought called Peter Miravile (Riteway Tank Ph:718-855-7272) for more information. PBS #2=337277 shows one 10000-gallon #6 fuel oil (above ground in subterranean vault). Address of owner is: Mr. Charles Demaggio 19 East 72nd Street Corporation 19 East 72nd Street New York, NY Ph: (212)288-5690 mailing address as per PBS is: Brown Harris Stevens 770 Lexington Avenue 5th Floor New York, NY 10065 Attn: Marie Martinaj Ph: (212)508-7200 Vought called Riteway and left messsage to return call to DEC so that CSL could be sent out. 5/9/13-Vought-Received report from Petroleum Tank Cleaners (Mark Salamack Ph:718-624-4842 Fax:718-624-2668)and work included conversion of 10,000-gallon which failed a tightness test during conversion from #6 to #2 fuel oil. Lines were individually tested and it was found that the vent line was not holding pressure. A dresser coupling on the fill line was found to be the source of the leak. The dresser coupling was eliminated and the tank system was subjected to a tightness test on 20, March 2013, and passed. During the course of work no contamination was found and attached to report were tightness test

TANK TEST FAILURE AND SOIL CONTAMINATION (Continued) **S111319218**

results and request for spill closure. Spill closed by Vought as result of spill was vent line (does not contain oil ususually as well as documentation fron consultant that no contamination was found during coupling replacement. Spill Closure letter with cc to PTC Salamack added to E-docs and sent to: Brown Harris Stevens 770 Lexington Avenue 5th Floor New York, NY 10065 Attn: Marie Martinaj Ph: (212)508-7200 "

Remarks: "tank test failure from #6 to #2. believed to be no spillage"

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CON EDISON SERVICE BOX: 13069 (Continued) **1016677832**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"6/23/21- The tank was being converted from #4 to #2 fuel oil. They performed a system test it fail. They then performed an isolation test and confirmed the leak to be on the vent line. They are planning to have the vent line replaced. PBS#2-147559 Facility contact: Mike Rosa 212-570-1246 Owner information: 129 E 82nd St Associates 212-340-9300 7/14/21 - Kim - I received an email from Ms. Fulya Toylular with G.C. Environmental. The tank was retested after having the vent disconnected and plugged at the top; the tank-only tightness test passed. The vent will be repaired and another test will be performed. I discussed the tank tightness testing results and agreed that soil samples will not be required if no evidence of a spill is found when the vent line is repaired. 1/20/22 - Kim - I received a

COMMERCIAL (Continued) **S127585744**

Letter requesting Spill Closure from Ms. Fulya Toylular with G.C. Environmental on 1/11/22. Following the tank test failure on 6/21/21, the vent line was disconnected and replaced with a new vent pipe by Marlande Heating Corp. No contamination or release was discovered during the vent line replacement. Considering that this tank was converted from No. 4 fuel to No.2 fuel, the tank test failure being due to corrosion of the vent line, which has since been replaced, no evidence of a release found during the vent line repair, and the tank system passed the tightness test after repairs were completed, the spill case is closed - end"

Remarks: "There was a dry test for the tank and it failed. The caller said that there is a conversion from #4 to #2 fuel oil. during the transition they tested the tank, and the tank failed."

DEC Memo:	"DEC Piper spoke with Millie Lpez. Broken fill. Oil spillied into basemnt. Piper called George and georgew put me on the phone w. Dave Yutelson of Sieve PAgenent and Rosenthal. He was involved with the building before and stopped . By. Trade winds Env. Will be responding and they will be in contact with DEPT. 2/8/08- DEC Piper inspected excavation. There was no visible signs of free product. There was some stainage on the buildign where it entered. As oer Deve Y., there was a bentonite layer underneath the fill which directed all spillage to building. Piper approved backfilling. A new fill will be installed and the system tested. Based on ifo to date. This spill closed. 4/7/08- Piper- I reiceved manifests and passing tightness test results. See e-docs if warranted."
Remarks:	"BROKEN FILL LINE IN BASEMENT: SPILL CREW ON SITE AND CLEAN UP COMPANY WILL BE CALLED IN AND IS ALL CONTAINED"

DEC Memo:	"Sangesland left a voice mail message for Smita Day at Langan Engineering asking for the owners name/address etc to send a CSL letter. Rec'd call from Smita Day. Property Owner's address: Eastside 77 Associate,LLC C/O Alchemy Properties 200 Madison Avenue New York, NY 10016 Attn: Michael Filler Ph:(347)231-2071 (sr) 05/29/08 CSL was sent on 05/29/08.(sr) 06/11/08 I spoke with Tarek Khouri of Langan Engineering yesterday afternoon.Tarek told me that the site is a construction site, no tank found on the property, no VOC exceedances encountered, only some PAHs above the TAGM. All contaminated soils were removed from the site,end point samples were taken, report will be sent to DEC.(sr) 07/11/08 The spill was discovered on May 20,2008 during construction excavation activities in the western portion of the norther boundary of the site,along the foundation of an adjacent off site property.Approx. 3 cubic yards of fuel oil impacted soil has been excavated from the western portion of the northern boundary of the Site and disposed off site.As per Phase I, a <1,100 gallon AST was found at 1480 2nd Avenue and discarded as a scrap metal.Fill ports/vent pipes were not observed on the sidewalk or around. Langan collected five grab and three composite samples for waste

CONSTRUCTIO PROJ (Continued) **S109063069**

characterization.Vocs were not detected above TAGM RSCOs in the end point soil samples.One SVOC was detected slightly above TAGM in soil samples. Temporary ground water observation wells were installed in B1 and B2.VOCs were not detected in ground water above NYS ground water Quality Standard.The new foundation at the site will include a 44 to 84 in thick mud and concrete slab, which will limit the potential vapor intrusion from impacted soil into the building. Langan also indicated that a water/vapor proofing membrane has been installed to mitigate potential vapor generation from the limited impacted soil left in place.The full height of the north and east foundation walls will be covered with a Preprufe 160R vapor/waterproofing barrier, according to LANGAN. LANGAN concluded that historical use of the Site was not identified as an environmental concern and the residual soil did not exhibit odors or organic vapor concentrations.NFA required.(sr)"

DEC Memo:	"6/8/05 - Project transferred to TLGibbons in Central Office, Albany 9/21/05 - Sent certified letter to Trevor Davis, property owner, asking for information on spill and how it was, or will be, addressed. No response. 10/19/05 - Several attempts to get information on spill from Environmental Management Solutions, Inc, spill caller, was unproductive because company was in the process of moving and could not access files. 11/9/05 - Found spill closure report for this spill from Environmental Management Solutions, Inc. (EMS), dated April 14, 2000. EMS removed approximately 160 cubic yards of contaminated soil. Five end-point samples were either non-detect or below DEC action levels. The report further states that Mr. Anthony Sigona reviewed the data and on April 5, 2000 stated that the remediation had been sufficiently completed . Close site."
Remarks:	"found during construction and excavation on a vacant lot. cleanup in progress"

DEC Memo: "162108. On 12/2/05 at 12:01 E. Cox # 18594 of the Underground called to report that at 11:30 he discovered a spill of unknown oil. He states that while working on open mains he found 1 gallon of an unknown oil on top of 20 gallons of water in servicebox-12394. This is located in front of 114 E. 71 St. He was using acct # 42224 . He tried to diaper it up but stated it to be to much. He hung a tag # 00799 and took 2 samples 1 for ID and 1 for pcb with a chain of custody # EE-08739. There was no fire or smoke involved. No sewers or waterways were affected. No private property was affected. No injuries were related to the spill. R. Bruns # 21106 Lab Results 12/02/05 @ 19:55 hrs. Lab Sequence Number: 05-12770-001 Analysis indicates the presence of a substance similar to a lubricating oil. Lab Results 12/03/05 @ 00:15. Lab Sequence Number: 05-12769-001 < 1.0 ppm Update : 12/03/5 @ 02:10 hrs. Due tp parking parking access this clean up can only be done on Tues or Fri 11:00 am - 12:30 pm. For this reason the incident type has been changed to Spill-Lubricating oil. This desk is setting up a clean up for 12/06/05 @ 11:00 am hrs. Logger F.Curtis 38078 Closed 2-22-06. see eDocs. GB"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 10/7/2002 - Sangesland made calls, DeMeo on response duty Spoke with Buddy Weedman of Cardinal Tank concerning possible spill. Mr. Weedman confirms that there is evidence of a spill from a buried 40,000 gallon tank (27 years old - all new piping 3 years ago) Tank was drained today & is being cleaned out by Petroleum Tank Cleaners. A 4,000 gallon Temp Tank is being set up today. In the basement there is evidence of new oil staining coming through the cement walls from the area of the buried tank. Mr. Weedman is not sure what work will be done by the owner. Sangesland pointed out that this is now an active spill number and the owner will need to address the problem ASAP. 4/14/2003-Vought-Sharima Ryan (845-348-6355) sent in report and is requesting review. 4/17/03 TJD Proposed Remediation Plan reviewed. Missing information. Letter sent to RP detailing deficiencies. Must resubmit. 5/2/03 TJD Demeo spoke Sharima Ryan (RND Services) regarding proposed work plan. RND has been directed to collect soil samples from beneath temporarily closed 42,000 gal UST prior to permanent closure. Demeo will meet RND at site to discuss well locations on June 26, 2003. 12/9/03 TJD Work Plan verbally approved. Need additional information regarding fate & transport of proposed surfactant and proposed application rates. 6/8/05 - Site temporarily assigned to TLGibbons in Central office, Albany 8/3/05 - Closed spill 9212451 and consolidate with this spill as they are same spill/address. 8/4/05 - Based on review of the 5/31/05 remedial action report prepared by RND Services (Shamira Ryan, RND, 845-348-6355) remediation and product recovery will be ongoing at this site and expected to be a longterm remediation. Recommend sending back to regional office. 7/24/2006 Sangesland received a groundwater sampling report from RND Environmental. Case was reassigned to Koon Tang and copy of the RND report was transferred to Koon's In Box 10/31/06 - reviewed report by RND, dated 7/17/06. No VOCs or SVOCs impact to groundwater. Only < 1 of oil showing in MW1. Continue recovery by absorbent material is fine. Manage as a P3 spill case. - KST 6/4/09- DEC Piper recieved message from tennant of biuilding stating there are heavy petroleum vapors in sub- basement where he parks his car. He asked if we can look into this. He did not leave a name or number. 04/23/2013 - V. Brevdo REMEDIATION ACCOMPLISHED NO VOCS OR SVOCS IMPACTS TO GW. FEASIBLE FREE PRODUCT REMOVAL COMPLETED. NO FURTHER ODOR COMPLAINTS. SPILL CASE CLOSED EFFECTIVE 04/23/2013. V. Brevdo"

DEC Memo:	"09/15/11-Hiralkumar Patel. 5:05 PM:- Spoke with Jesse, MTA's contractor working on 2nd ave subway project. during tunnel excavation, groundwater enters into tunnel which is pumped out to mini water treatment plant. water from settlement tank goes to city sewer system. sediments from settlement tank is removed to off-site via vacuum truck. All-state Vac's truck was pumping sediments and it was fill to the top. so when hose was disconnected, oily sludge came out of the hose as truck had some oily material inside (probably some left from previous job). oily material spilled onto asphalt only and was contained. no soil or sewer impacted. All-state will come back with another truck for cleanup. Jesse mentied that only some sheen observed on spilled material. 09/16/11-Hiralkumar Patel. 9:59 AM:- spoke with Jesse. cleanup completed last night. case closed."
Remarks:	"Caller advised the vac company were removing sediment from treatment plant and overfilled the vehicle and spilled the mud and some oil from the vac company vehicle onto the pavement. Clean up is pending."

Superintendent is located at 167 E 82nd Street. Shhell Mngt, 212-843-3755, Miss Gonzalas. Spill transferred to Greco in June, 2005 as part of Spill Closure Initiative. A message was left for the original complaintent, Ms. Deems. Ms. Deems returned the call and explained that the building in question was actually 220 E 82nd St, (not 229 E 82nd St, as was originally entered into the system). Ms. Deems explained that she believed the spill had been due to an overfill of the tank and that it was cleaned up shortly after the initial call (there is no longer any odor). She also told me that: the Coop Board President at the time of the spill was Mr. Munno, of 218 E. 82nd St.; the current coop president in Ms. Beatta Kowyski (spelling?) of 220 E 82nd St., Apt 2RW; and the current property management firm is Matthew Arnold Property Management, 127 E 59th

220 EAST 82ND ST (Continued) **S102663749**

St., 3rd Floor, 212-699-8900 (Michelle Castro is the manager from that firm). JDG 7/28/05 Ms. Castro was reached on 10/28/05, however, she was completely unaware of any release and has no records relating to it. Based upon the age of the release and the fact that the original complaintant was satisfied with the situation, the spill was closed. JDG 10/28/05"

DEC Memo:	"3/29/05 - Austin - Previously unassigned spill; reassigned to Austin for transfer up to Central Offcie for review/closure 6/8/05 - Project transferred to TLGibbons in Central Office , Albany 7/6/05 - Spoke with Mark Salamick, the spill caller from Petroleum Tank Cleaners, 917-559-5519. He said they sent the owner, AKAM Associates, 212-986-0001, a proposal for work but did not get job. His AKAM contact was Tom Teeple. Said A.L. Eastmond also bid job. Said spill was @ SE corner of 74th and 2nd Avenue. Spoke with Teeple. Said A.L. Eastmond was hired to do work. Fuel oil leak (#6) related to fill line leak. Impacted beneath sidewalk, driveway and fuel tank. Tank test ok. Spoke with Kurt Corrigan, super @ building, 212-628-7919. He said he would have Renee Lewis, A.L. Eastmond call me. 7/6/05 - Spoke with Mr. Lewis, 917-299-7257 (cell) or 718-378-7000 (Ext. 15). They have cleaned what they can access of the #6 spill without risking structural problems. Arrange to meet @ site. 7/12/05 - Meet Rene and Kurt @ site. Went into basement tank vault area. Tank in cement vault. Clean except for minor spill along wall and within vault area. Partial removal of wall to access spill area from broken fill line. Cleaned up what they could, replaced fill line. He will send me final report. 10/25/05 - Tried unsuccessfully to get final report from AKAM and A.L. Eastmond. Close site based on visual inspection."

DEC Memo:	"4/3/06-Vought-Daytime responder. Vought responded to site and spill was appoximately 20-30 gallons of #6 fuel oil in secondary containment (no cracks) of UST. AL Eastmond(718-378-3000) and are removing oil from secondary containment, pumping UST dry and installing temporary tank on 73rd Street. Oil was first noted in secondary containment this morning. No effect to sump pit in adjacent boiler room. Tank is 15000-gallon partially buried UST with seconday containment on three sides of tank. Fourth side is buried in concrete. Site contact is Angel Pena and super is Kirk Corrigan (212-628-7919) and managing company is ACamp. Vought called Brown (212-508-7200) and they are not operating the building. Vought called emergency contact Bill Manion on PBS (212-628-7919) and Bill Manon no longer works at management company. Vought required: 1)tank tightness test 2)updated PBS registration. Letter should be sent to: Tom Teeple c/o 374 Street 8 West 38th Street NY NY 10018 7th FLoor Phone 212-986-0001x160 fax 212-986-0002 Further contact should be with Teeple. Vought sent out tank tightness test letter with additional requirements of: 1)submission of test results 2)updated PBS information. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin. 6/16/06 - Raphael Ketani. I tried to reach Mr. Teeple (212) 986-0001, ext. 160, but could only leave a message. 6/19/06 - Raphael Ketani. Mr. Teeple called me and said that the tank was tested twice and a small leak was detected. He added that they expect to start work wednesday after they meet with the co-op board and get approval. 7/18/06 - Raphael Ketani. I spoke to Mr. Teeple. He said that he will send me the tightness test results, the PBS application, and a cover letter describing what is taking place and what they plan to do. He said that, right now, Controlled Combustion has been contracted to replace the tank and do test borings. I will send a PBS form to: Tom Teeple Director of Management Services AKAM Associates 8 W. 38 Street NY, NY 10018 8/4/06 - Raphael Ketani. Linda

APARTMENT (Continued) **S104501309**

Andersen of AKAM (212) 986-0001, ext. 143 (7th Floor) called yesterday and requested the blank PBS Applications. I will send them to her today. 8/7/06 - Raphael Ketani. I received a package of documents containing both tank test results and the agreement for work between the contractor and the owners of the building. 8/23/06 - Raphael Ketani. I left messages for Mr. Teeple and Ms. Andersen. Mr. Teeple called me back and said that they have received the permits to remove the old tank. 11/7/06 - Raphael Ketani. I tried to reach Mr. Teeple and Ms. Andersen, but could only leave voice mails. The PBS case #2-113360 lists the 15000 gal. tank as still active. Mr. Teeple called me back and said that they have taken soil samples, and installed the new tank and are waiting for some parts. I told him someone has to do the revised PBS form. He asked who. I told him it could be anyone, but I needed the original signature of the owners on the form. He said that even though I sent the form, he couldn't find it now and asked that I send another one. I sent the form to his attention today. On 7/18/06, I sent the PBS form to Mr. Teeple. On 8/4/06, I sent another PBS form to Ms. Andersen. 3/22/07 - Raphael Ketani. Mr. Teeple called back. He said that the tank removal, room and soil cleanup, and tank reconstruction finished in January 2007. He said that he is sure Controlled Combustion has the soil results and he will have them send the results to me. He added that the PBS form is probably ready to go, but he has to contact his assistant, who is supposed to be working on it. 3/27/07 - Raphael Ketani. Ms. Linda Anderson (212) 986-0001, ext 143 called me back to confirm what documentation DEC needed to close the case. I told her that we must receive the revised PBS form with the original signature, the soil analytical results, manifests for the removed soil, and a cover letter describing what happened and what was done to clean up the spill. She said she will have this done. 4/11/07 - Raphael Ketani. Linda of AKAM called and requested a 1 week extension to get DEC all of the paperwork. I granted the extension. 5/23/07 - Raphael Ketani. I checked the PBS registration. It shows that the 15000 gal. tank was closed and removed and the 13000 gal. tank was put in service in 1/2007. I also received a FAXed package of documents from Linda Andersen of AKAM. The package contained analytical results, waste manifests, and bills from Allstate ORC. The analytical results showed that the VOCs from each of the 3 samples were either non-detect or very far below the RSCO. The results also showed that the SVOCs were from non-detect to nor more than several times the RSCO limit for benzo series analytes. Based upon the analytical results for 10/25/06, the waste manifests and the paid bills, I am closing the spill case. "

There has been no recovery for many months and a petition for closure will be submitted. 9/22/2005 Sangesland received a new spill #0507489 for this on going problem. Spoke to building super Louis 914-419-7753. He

ORSID REALTY (Continued) **S104782189**

said this is a cronic on going problem and he has F&N come to the site every 2 weeks. 07/11/06 Rahman- Certified letter was sent on June 9,2006 to ORSID Realty,1740 Broadway 2nd Floor, NY 10019 asking status report of monitoring wells i.e. soil and ground water samples. I spoke with F&N who indicated that F&N left the site without finishing remediation work due to non payment.After several trials over last few weeks, I was able to speak with Mr. Dennis Nagel who said they rec'd departments letter and will do follow up on it shortly. 08/23/06 Rahman- After several trials over last few weeks, I was able to get in touch with Jo Ann Graham. She told me no document is available regarding the soil/groundwater contamination status. They will have Eastmond to do the soil/ground water sampling from the wells. 08/25/06-Vought. Responded to spill report of oil entering adjacent basement of 151E83rd Street. Vought performed site visit and confirmed that 135E83rd Street is source. See closed spill #0605979 at 151E83rd Street. 08/29/06-Vought-Notes from Spill #0605979: 08/25/06-Vought-Peformed site visit and met with Suz Landi(David Frankel Realty 212-772-7600). #6 or #4 fuel oil is seeping into corner of basement storage area immediately adjacent to monitoring well location at 135E83rd Street. Size of impacted area is approximately 1'x2'. Vought called owner of 135E83rd Street (Dennis Nagel 212-484-3774 fax 212-586-4524) and left message informing him of spill and requiring him to return call immediately. Vought called Fenley & Nicol (consultant on record for 135E83rd Street) and spoke with Anthony Sigona. Anthony will contact Nagel with proposal. Vought received call from Nagel that he is hiring AL Eastmond for cleanup. Vought received call from Al Eastmond Lewis that he was on way to site. Vought called Suz Landi (917-848-4773)and informed her of Eastmond cleanup and sent her copy of FOIL application. Landi will notify super to have him provide access to Eastmond. Vought received call and Eastmond onsite and will not do work until Monday 8/25 which is when parking is available. Vought spoke to super (Emiliano 646-423-6838) and he confirmed that parking around site is difficult and will be easier on Monday 8/25. Vought closed this spill and referred spill to Spill #0006377 which is open spill at135E83rd Street managed by DEC Rahman. Vought received call from Landi that Eastmond never completed cleanup. Vought called Joanne Graham (212-247-2603x741) and required she send someone immediately to recover oil from 151W83rd Street and left message that if DEC does not receive call back by tomorrow then officers will be sent out. Vought received call back from Orsid and Nagel was contacted and agreed to have Eastmond out to site by Thursday due to parking restrictions (parking only available on Mondays and Thursdays). 08/30/06-Vought-Called Renee Lewis (AL Eastmond) and he received signed proposal from Nagel this morning. Scope of work included VEFR of four monitoring wells and cleaning and sealing wall of 151E83rd Street. Vought called Landi and confirmed work for tomorrow. Wells will be VEFR every monday in future. 08/31/06 Rahman- Temporarily assigned case manager for this site is Jeff Vought. 09/05/06-Vought-Letter sent by DEC Rahman on 6/9/06 requires submission of 1)status of all four monitoring wells 2)soil and groundwater results. Vought sent out letter with requirements of immediate submission of outstanding requirements from this letter with the additional requirements of one month for submission of: 1)biweekly VEFR on all wells with free product 2)Biweekly monitoring of 151W83rd Street 3)weekly monitoring of wells 4)cleaning and sealing of 151East83rd Street. Vought sent letter to: Mr Dennis Nagel

ORSID REALTY (Continued) **S104782189**

ORSID Realty Corporation 1740 Broadway, 2nd Floor New York, NY 10019 09/07/06-Vought-Received call from Brenda (212-772-7600x16) (David Frankel Realty) that oil was observed entering the basement again. Vought received fax from Orsid Realty (Jo Ann Graham). Attached please find a copy of the agreement we signed with Eastmond and Sons Boiler Repair, in regard to closing out the spill report... One proposal for 1)weekly VEFR on Mondays from 9:30-10:30 2)well monitoring. Second proposal for 1)cleaning oil from wall and floor of 151E83rd Street with degreaser 2)seal wall with silicone and epoxy. Vought faxed copy of proposal to Brenda and called Brenda and left message informing her of proposal. Vought received call from Landi that oil continuing to infiltrate despite expoxying of wall. Landi also expressed concern about future remediaton of site and Vought explained that once monitoring data is received, decision about remedial action can be made. Vought called Jo Anne Graham to confirm necessity of submission of data and to have Eastmond clean out the basement of 151E83rd Street. 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Rahman) for review and closure - end 09/11/06-Vought-Received call from and spoke to Joanne Grahm (Orsid). Eastmond was dispatched to site on Friday 9/8 to clean the basement and will be onsite today to VEFR the wells. 09/13/06-Vought-Spoke to Renee Lewis and required submission of groundwater data and VEFR data and as per Renee site visit was scheduled for 9/14/06. 9/14/06-Vought-Received call from Landi that Eastmond was not onsite. Vought called Eastmond (Lewis 917-299-7257) and spoke to Lewis and crew will be onsite around 12:30pm. Vought called Landi and left her message with time and requirement by Vought of groundwater data and VEFR. 09/15/06-Vought-Received call from Suz Landi that Eastmonds response consisted of placement of pads down at 151E83rd Street with no sealing of wall. Vought called Joanne Graham (212-247-2603x741) and told her to call back ASAP with respect to cleaning and sealing wall. 09/21/06-Vought-Received call from Nagle (212-484-3774) that they were doing everything they can and are awaiting the paperwork from Eastmond. Vought returned call and left message to return call and that wall must be sealed from outside of wall. Vought called Renee Lewis and left message for status of monitoring data and proposal. Vought called Landi and left message to inform her that DEC was pursuing data submission. 09/22/06-Vought-Received cc from Eastmond to Nagle including monitoring data from Eastmond and four wells present on site and after 4 VEFR events free product is no longer found in wells. Also included was proposal to test fill line and recommendation to excavate around impacted building so that sealing could be done from outside. Vought faxed Landi copy of proposal. 02/27/07 Rahman-Fenley & Nicol's proposal was approved by the co-op board.The proposal includes: *Preparation of 2ftx16ft trench by removing 4-inch thick concrete floor adjacent to foundation wall in southwest corner of 135 East 83rd Street, soft dig and dispose of fuel oil contaminated soil. *Installation of monitoring well depending on subsurface condition/backfill excavation with pea gravel. * Ground water sampling from existing wells,as well as proposed wells, if any. * Perform Enhanced Fluid Recovery(EFR)events on three existing wells. * Ground water monitoring report will be sent to DEC Fenley and Nicol anticipates the permit to be secured by 02/28/07.Work will commence the week after. 04/22/08 E-mail(04/09/08) from Fenley & Nicol says there has been a little product in the street wells. Basement wall has been cleaned, epoxy painted and there is no signs of oil stain there now.I asked for pictures of the

ORSID REALTY (Continued) **S104782189**

basement wall showing current condition, and detailed log on all wells recovery.(sr) 07/28/08 Rec'd closure report from Fenley & Nicol Environmental Inc. Ground water was sampled from four existing wells. All vocs/svocs (except Toluene @ 7ug/L) were below NYSDEC guidance values. Basement wall of 151 East 83rd Street was epoxy painted, photographs in edocs.As per Fenley & Nicol,there was no staining on the interior walls in the basement.On Feb.19'08 and March 14'08 there was no product found in the wells.Details report in edocs.(sr) "

Remarks: "CALLER RESPONDED TO 151 EAST 83RD ST FOR A STAIN ON WALL. AFTER INVESTIGATION IT WAS DISCOVERED THAT MATERIAL WAS COMMING FROM RESIDENCE AT ABOVE ADDRESS. TANK TO BE REMOVED AND CLEANUP TO FOLLOW."

DEC Memo:	"4 21 2020 - Obligado - Desk Duty. There was 5 gallons of unknown oil in a Coned Vault. There seams to be a sump pump which was in service draining the water to the sewer system. Pump was turned off. Clean up pending oil testing and resources. 11/6/20 - Kim - EMIS 277323. On 4/21/20 Con Ed noted the presence of 50 gallons of unknown oil in Con Ed Vault 8660, 5 gallons of unknown oil in the adjacent Vault 6808, and that the sump pump was in service. Con Ed crews turned it off and NRC, DEC and DEP were notified. On 5/6/20, Con Ed noted that lab analysis results and Oil ID indicated the presence of transformer oil containing 2 ppm PCB (oil). An Allstate Clean Venture crew responded to perform the environmental cleanup. Vault 8660 was drained, disconnected and removed by the I&A. The Allstate crew double washed Vault 8660 with SafeWash and double washed and rinsed Vault 6808. An Allstate Vactor was used to remove 2000 lbs. of wash water and debris. The structures were inspected after with no sign of oil. On 5/6/20 Con Ed reported that the source of the oil was the leaking transformer in V8660 which was removed and replaced with a new unit. See document files for further information Spill closed end"

T&S declined cleanup as cause of spill was reported to be equip related. Bldg. contacted, Super- Paul 212 639 9087, states there was only a minor release at fill pipe, no cleanup necessary. Further investigation revealed T&S was delivering for Castle Oil. Rob Hill from Castle was contacted, and informed of problem. Castle then sent a cleanup crew to location. Site visit @8PM revealed approximately 5 gallons was spilled into air shaft. Castle crew recovered product and cleaned up impacted debris at base of shaft. No further action required. Spill closed. Building is unregulated (1080 tank). Super directed to have piping tested and repaired. Castle directed not to make any further deliveries until repairs have been made."
Remarks:	"ABOUT 20 GALLONS OF #2 OIL WAS SPILLED AT AN APARTMENT BUILDING. NONE OF IT HAS BEEN CLEANED UP YET "

315 EAST 78 TH ST (Continued) **S105140367**

to Q.Abidi. Called Ms. Kathryn Caroll (212)628-1846 Mr. Robert answered she will call me back. 06/27/2008: This spill case was transferred to A. Doronova. - AD 10/2008: To send TTF letter. AD 12/2008: Looked in ACRIC database. 315 Realty Company, LLC is listed as a owner of the property. Internet research did not give any results for their current contact information. Called to old phone number for 315 Realty Company, LLC. No one is answering the phone. AD 05/2009: Tried again to contact 315 Realty LLC with no success. AD 09/2011: Searched the Internet for information regarding this site. Found info for the property management company: Rialto Management, contact number is (212)744-9644. AD 12/29/2011: Called to the Rialto Management. Spoke with receptionist to verify that Rialto manages the 315 East 78th Street property. It was verified. Asked information for the property owner. I was given name of a building manager - Scott Lerman (phone: 212-744-9644). They asked me to send them a DEC Spill report via fax. Later spoke with Mr. Lerman. Explained him situation with the spill case. Requested to submit all documents they have regarding the spill cleanup. AD 01/20/1012: Received a letter from 315 Realty Company LLC. DL the letter to eDocs. In this letter they state that they do not have a record of this violation in their files. During 2001, the boiler at the premises was converted from oil to gas. Subsequently, the oil tank was removed from the site. Currently the site uses ConEd gas for fuel. Mr. Lerman in this letter asks for an advice how to close the spill. Called to Mr. Lerman to diccuss the letter. Left him a message. Later received a call from Mr. Lerman. AD 01/26/2012: Received a call from Mark of Petroleum Tank Cleaners. He asked what type of documents he can provide to close the spill. Explained him what kind of information he should submit to us in order to close the spill. AD 01/30/2012: Received a correspondence from Mark Salamak of Petroleum Tank Cleaners. It states that Mr. Salamak examined the boiler room of the building and based on the size of the room calculated that the tank in question was most likely 1080-gallon or 1500-gallom AST. He took photos of the former AST area and stated that the boiler room's floor and adjacent rooms' floors are solid concrete and free of any cracks. No oil stainings or odors were noted during his inspection. Mr. Salamak recommends spill closure. DL letter and photos to eDocs. AD 03/2012: Spoke with Mr. Salamak and Mr. Leramn for more information. According to Mr. lerman no data can be found in their files due to the age of the spill. He informed me that his sister - Stacy Lerman was a building manager at that time. Her name mentioned in DEC's remarks by DEC PM. Discussed the spill with J. Kolleeny of DEC. Called and spoke with Mr. Lerman. Asked for a letter from Stacy Lerman confirming that the spill was cleaned up. AD 04/02/2012: Received a letter from Stacy Lerman of 315 Realty Company LLC. She confirmes in this letter that she was a building manager at the time of the spill, and that she believes that the spill was properly cleaned by the boiler installer conmany. The boiler room had cemented floors at the time of the spill, which prevented oil vertical migration. Since the AST removal the building uses gas for heating. Based on the info provided, the decision was to approve spill closure request. AD 04/05/2012: Issued and sent NFA letter to Mr. Lerman of 315 Realty Company LLC. DL pdf copy of the letter to eDocs. Case closed. AD "

Remarks: "spill while removing boiler from building."

DEC Memo:	"08/24/06-Vought-Off hours responder. Vought performed site visit to 151 E83rd STreet and found no spill in basement or boiler room. No Bernanrd residence on site as per elevator man. Vought performed site vistit to 151W83rd Street and no building was found. In proximity of where 151W83rd Street should be was a parking garage. Vought called Brendalyn Bernard. Oil is coming through wall into storage room. Site visit will be performed 12pm today. 08/25/06-Vought-Peformed site visit and met with Suz Landi(David Frankel Realty 212-772-7600). #6 or #4 fuel oil is seeping into corner of basement storage area immediately adjacent to monitoring well location at 135E83rd Street. Size of impacted area is approximately 1'x2'. Vought called owner of 135E83rd Street (Dennis Nagel 212-484-3774) and left message informing him of spill and requiring him to return call immediately. Vought called Fenley & Nicol (consultant on record for 135E83rd Street) and spoke with Anthony Sigona. Anthony will contact Nagel with proposal. Vought received call from Nagel that he is hiring AL Eastmond for cleanup. Vought received call from Al Eastmond Lewis that he was on way to site. Vought called Suz Landi (917-848-4773)and informed her of Eastmond cleanup and sent her copy of FOIL application. Landi will notify super to have him provide access to Eastmond. Vought received call and Eastmond onsite and will not do work until Monday 8/25 which is when parking is available. Vought spoke to super (Emiliano 646-423-6838) and he confirmed that parking around site is difficult and will be easier on Monday 8/25. Vought closed this spill and referred spill to Spill #0006377 which is open spill at135E83rd Street managed by DEC Rahman. This spill closed by Vought."

Spiller Address:	319 E 75TH ST APT 5C
Spiller Company:	999
Contact Name:	JAMIE CAPITO
DEC Memo:	"non petroleum related. Spill closed."
Remarks:	"The following information was received through the DEC website "Report an Environmental Violation Online" or sent directly by the complainant to an OPP dispatch mailbox: Who Did It: Building owner of 319 E 75th Street, New York, NY 10021 - hazardous debris not being disposed of properly and being released into the air, coming either from common area laundry room in ground floor of building or from Jin Laundry (retail on ground floor of building). What Occurred: We have a window unit air conditioner (AC) that's less than 6 years old in our apartment living room (319 E 75th St Apt 5C) that stopped working over the past year due to debris that was collected from improper disposal of laundry lint. We hired an AC repair man (Alexander from Fuse HVAC & Appliance Repair) to take a look at the AC unit and he concluded that the debris clogged up the entire insides of the AC unit and said that we were better off replacing it and buying a new one since it was so badly damaged. We suspect this debris is coming either from the ground floor retail, Jin Laundry or from the shared common laundry room on the ground floor of the building. The debris looks, feels and smells list lint from laundry

MIXED USE BUILDING (Continued) **S126401289**

that is not being properly disposed of, and instead is being disposed freely into the air polluting the air and causing clogs in the AC unit. When Did It Occur: 7/21/2020 @2pm - Alexander, an AC repair man from Fuse HVAC & Appliance Repair looked at our AC unit, took it apart, and determined that it was badly damaged and no longer in good condition to use based on what he saw on the inside of the AC unit as well as what debris was left on the outside of the unit as well as where the unit was resting on County: New York Municipality: New York Location Or Address: 319 E 75th St Apt 5C, New York, NY 10021 How Did It Occur: Improper disposal of laundry debris from laundry facility and is being disposed into the air freely, therefore clogging up AC window units in good condition and potentially entering into our apartments for us to breathe in. Additional Details: We contacted building management on 7/21/2020 but they have not responded to our concerns. We asked for them to investigate this issue further and to be partially responsible for the cost of buying a new AC unit. Since we have not heard back, we purchased a new AC unit on our own but fear that since they have not addressed this problem, the debris is going to clog up our AC unit within a few years again. Also, our neighbor, Elaine who is directly below us in apartment 4C had complained about this issue 1-2 years ago after being sent to the hospital due to breathing problems from this debris. Complainants Name: Jamie Capito Complainants Phone: 510-861-4433 Complainants Email: jamie.rojo@gmail.com Date of Submittal: 07/28/2020"

DEC Memo:	"4/24/15 TJD Recall - met onsite with representatives of environmental contractor (All Boro). 3K AST was leaking from a visible hole in tank shell causing a slow discharge into tank vault. Tank vault not liquid tight allowing product to migrate into adjacent mechanical room in basement of church/school. At time of inspection, contractor had emptied the tank, washed the floor and was actively cleaning the pooled product from within the tank vault. Ventilation equipment was in operation and no petroleum odors were detected outside of the basement area. Contractor is negotiating with the property owner regarding repairs to the tank. Contractor will be installing a temporary 275 AST for hot water until tank condition is resolved. 4/27/15 TJD Received email from contractor, temp tank has been installed and surface cleanup is complete. 2/22/16 TJD File review. All Boro Tank Testing has submitted closure report. Contractor cleaned the estimated 100 gallon #2 FO discharge from basement floor utilizing a vacuum truck and granular absorbents. After the tank was properly cleaned and inspected, the leak was found to be coming from pitted areas on the bottom of the tank at several locations. All Boro repaired the tank by welding a new bottom in place followed by the performance of a full system test with passing results. The concrete floor appeared in good condition with now obvious cracks or holes. No subsurface investigation was performed. All required documentation has been received and uploaded to DECDOCS. No further action is required. Spill closed."

DEC Memo:	"01/12/10 - LZ Mark Salamack of Petroleum Tank Cleaners, Ltd., faxed a tightness test report and information on the cause of tightness failure (eDocs). The tank failed the test in 2009 and subsequent investigation revealed that it was caused by a missing plug on the top of the tank located in the basement and encased in concrete. The opening was plugged and the tank passed the test. No contamination was found. The spill case is closed, and an SCL issued. 11/24/2009 -

SOIL AND GROUND WATER (Continued) **S124517586**

DEC Memo: "6/4 - Sekhon As part of the ABC Skylight Infrastructure Project at the Metropolitan Museum of Art, the Wing C Elevator was being removed, including the ground floor piston shaft. It was originally believed that the shaft was uniform in construction and self-contained. During deconstruction activities the piston was noted to contain hydraulic oil. Upon removal of the oil it was noted that there was groundwater recharge into the shaft. The shaft is approximately 49 feet in depth and 39 inches in diameter. There is currently approximately 42 feet of groundwater and 3 feet of hydraulic oil. 90 55 gallon drums of oil/water were originally removed on 5/31 by PAL Environmental Safety Corp. Upon removal of the oil/water on 5/31, it was later learned that groundwater recharge was occurring. Project manager (Facility contact)Michael Dominick --212 - 396- 5187 ; 646 - 895- 0644 (cell) Michael.Dominick@metmuseum.org Michael Borello --- Environmental Building Solutions, LLC (917) -217- 7334 ; mborello@ebsllcnyc.com As per Michael Dominick - Shaft is about 49 feet deep and about 3 feet of hydraulic oil is floating on top of 42 feet of presumed ground water. Case discussed with DEC Kumar and assigned to him for follow up. 06/04/19-Hiralkumar Patel. 12:40 PM:- visited site and met Mr. Dominick. Mr. Dominick mentioned that the site had an old out-of-service hydraulic elevator which was recently removed. the elevator was taken out of service about 8 years ago. the aboveground hydraulic oil tank was removed last year and no signs of oil spill were noted during tank removal. the elevator shaft and piston were removed recently when crew noted oil in shaft borehole. initially, contractor tried to gauge product thickness using probe but due to possible oil coat on the sensor, contractor read oil in entire 49 ft deep borehole. later, product thickness was confirmed to be 3 ft using camera. PAL Env. responded on 05/30/19 to remove liquid from the borehole. Mr. Dominick confirmed that the cleanup crew lowered vacuum hose to approx. 4 ft depth and pumped out approx. 80 drums of liquid. based on product thickness (approx. 3 ft), it appears that PAL Env. removed mostly water on 05/30/19. the liquid level dropped with pump out, but borehole was recharged to initial liquid level. currently, there is no change in liquid level in the borehole. based on site observations, the piston borehole starts at approx. 20 ft bg, and the bottom of the borehole is at approx. 70 ft bg. Mr. Dominick stated that product sample has been analyzed which confirmed presence of hydraulic oil in the borehole. asked Mr. Dominick to pumped out oil from the borehole (no need to pump water) and monitor borehole for any product recharge. no petroleum odors were noted in the building. 06/07/19-Hiralkumar Patel. 3:13 PM:- received email from Mr. Dominick including pics. he mentioned that they extracted the remaining 3 ft of hydraulic oil yesterday and then took a water sample and let it settle for 24 hours (pic attached). pic shows accumulation of approx. 5 mm of product in 50 mm diameter measuring cylinder. they took another sample today and will let it settle over the weekend. 06/10/19-Hiralkumar Patel. 2:48 PM:- sent email to Mr. Dominick and asked him to continue monitoring borehole daily. also asked him to have borehole interior cleaned to remove remaining oil on walls. email copied to Michael Borello (mborello@ebsllcnyc.com) and Tom Perry (Thomas.Perry@skanska.com). 2:49 PM:- received email from Mr. Dominick including a pic of measuring cylinder which contained water sample from borehole collected on 06/07/19. pic shows minimal product on top of water in the cylinder. 06/12/19-Hiralkumar Patel. received email from Mr. Dominick (at 4:30 PM on 06/11/19) including pics. he mentioned that

SOIL AND GROUND WATER (Continued) **S124517586**

PAL Env. has washed side of borehole above fluid level on 06/06/19. a pic shows minimal accumulation of product in measuring cylinder containing water sample from the borehole. 10:51 AM:- sent email to Mr. Dominick and asked him to have their environmental consultant submit a short summary of the incident including some pics, cause of release (if known), summary of cleanup activities and disposal manifests. email copied to Michael Borello and Tom Perry. 07/01/19-Hiralkumar Patel. 9:34 AM:- received email from John Mascioli from Environmental Building Solutions including spill cleanup/closure report. case closed based on field observations and review of all available information. 10:31 AM:- sent email to Mr. Dominick and informed him about spill closure. email copied to Michael Borello and Tom Perry."

Remarks: "elevator piston failure clean up is pending"

Paul Hastings Attorneys (202-551-1700) represents them. Corresponded with Roberta (Bobbie) Barkman. She submitted to me an 8/3/92 summary report which included data from soil borings and a monitoring well installed in the vicinity of the two 550 gal USTs which were the source of this 1990 spill (holes observed in tops of tanks). The report concluded that the soil and groundwater were not impacted and recommended that the tanks be closed in place. The submittal included a notarized affidavit certifying that the tanks were closed in place on 9/3/92. A 12/19/97 letter submitted to the DEC requests that, based on the above, that the spill be closed. Spill was closed on 8/3/05. "

DEC Memo:	"03/13/14-Hiralkumar Patel. alternate address: none no PBS record found. other spill # 0408046 was reported on 10/20/2004 by ConEd due to 2 quarts of #2 oil spill on street, by third party. case closed. 3:54 PM:- left message for Gale Drukier. 4:08 PM:- received call from Ms. Drukier, property owner. she mentioned that the site has two (2) 275 gal #2 oil ASTs. she noticed some oil on basement floor and reported it to her oil company. she confirmed that PTC pumped out and cleaned both tanks yesterday and will do system test on 03/17/14. currently, Ms. Drukier is the only resident in the building and there

PRIVATE RESIDENCE (Continued) **S116553450**

is no petroleum odors in the building. East 70th Realty Corp. **property owner** c/o Gale Drukier 114 East 70th Street New York, NY 10021 PH. (917) 509-5180 email: galeaileen@yahoo.com 03/31/14-Hiralkumar Patel. 2:29 PM:- spoke with Ray at PTC. they pumped out both tanks, which were covered in vault. Ray mentioned that the tanks are located in corner, adjacent to common foundation wall between buildings 112 and 114. he also mentioned that both properties are owned by Ms. Drukier. as oil was found out of tank vault, they removed tank vault and found one of the tank partially under the wall towards building 112. PTC removed half of the tank which is partially under the wall, and left other half in-place. they will remove the second tank as owner is planning to use gas heating system. 2:40 PM:- left message for Ms. Drukier. 2:58 PM:- spoke with Ms. Drukier. she does not know where the remaining half of tank goes. she mentioned that there is no tank in building 112. 3:40 PM:- visited site. met Ms. Drukier at building 112. she opened door for building 114 and allowed me to inspect tank system by myself. nobody lives in building 114. site has two (2) 275 gal ASTs on legs. as per pictures from PTC, these tank were wrapped in cinder blocks. the tanks and boiler are located in southeast corner of the basement. the two tanks are interconnected at the top and are located in row along southern foundation wall, in east-west direction. found minor odors in tank/boiler room. observed oil soaked absorbent pads underneath the western tank. portion of western tank is in adjacent laundry room in building 114, and it does not go to building 112 as PTC claimed before. all lines are aboveground, except part of fill line that runs under the sidewalk. fill and vent lines runs along basement ceiling. observed an active fill port at the curb. recommended Ms. Drukier to seal the fill port to prevent any misdelivery into leaking tank system. she mentioned that tanks will be removed and a new gas heating system will be installed. informed Ms. Drukier that the Department requires submission of spill cleanup report. 04/01/14-Hiralkumar Patel. 12:40 PM:- sent letter to Ms. Drukier requiring submission of spill cleanup report, by the end of 05/16/14. letter emailed to Ms. Drukier. 04/02/14-Hiralkumar Patel. 10:04 AM:- received email from Ms. Drukier stating that PTC has been hired for repairs. 04/22/14-Hiralkumar Patel. 3:45 PM:- received message from Ray Lara from PTC. 4:04 PM:- spoke with Ray. they removed tank and started soil excavation. there is more contamination under the boiler and hot water heater. property owner will remove the boiler and hot water heater and then PTC will resume soil cleanup. asked Ray to call for an inspection, prior to backfilling. 06/23/14-Hiralkumar Patel. received email from Ray (at 9:55 AM on 06/20/14) including results of five soil samples. no contamination noted in samples. as per lab report, samples were only analyzed for 8260 and 8270 analysis was cancelled. no site map attached. 10:44 AM:- left messgae for Ray. 11:14 AM:- received call from Ray. asked him about SVOC analysis of endpoint samples. he mentioned that one soil sample was submitted separately for SVOC analysis. he will submit result. asked him to submit site map with sample locations and excavation dimension, prior to backfilling. 11:56 AM:- received email from PTC including SVOC result of one soil sample. as per chain-of-custody for five soil samples collected on 05/20/14, PTC was going to submit a composite sample for SVOC analysis. one soil sample was collected on 05/28/14 for SVOC analysis. no SVOC contamination noted in sample. 06/25/14-Hiralkumar Patel. 8:47 AM:- received email from Ray including site sketch. as per the sketch, excavation was 6 ft wide by

PRIVATE RESIDENCE (Continued) **S116553450**

8 ft long and 4 ft deep. based on site observations and submitted sample results, no further remediation needed. 12:05 PM:- spoke with Ray. informed him that no further remediation needed and asked him to submit final closure report. 09/02/14-Hiralkumar Patel. 3:26 PM:- spoke with Ray and inquired him about closure report. he will submit report soon. 10/01/14-Hiralkumar Patel. 11:21 AM:- spoke with Ms. Drukier and asked her to submit closure report. she will talk to PTC. 10/10/14-Hiralkumar Patel. received report from PTC. 10/14/14-Hiralkumar Patel. based on available information, case closed. 8:54 AM:- sent spill closure letter to Ms. Drukier. letter emailed to Ms. Drukier."

Remarks: "Last delivery just over 1 week ago, tank is a 550G. oil was flowing out of tank. Apx 3 gallons is on floor at this time, possibly more elsewhere. Owner is hiring remediation company."

DEC Memo:	"10/04/16-Hiralkumar Patel. 6:34 PM:- spoke with John, property owner's representative. he mentioned that an oil spill occurred during delivery. minor oil spilled at the vent outside the building and approx. 5 gal of oil spilled from disconnected vent line section in the tank room. as per John, site has one (1) 7,500 gal AST on saddles, inside secondary containment with access. they have hired Riteway for cleanup. John confirmed no more odors in the building. 10/05/16-Hiralkumar Patel. alternate address: 50 East 70th Street PBS #: 2-160067. as per PBS record, the site has one (1) 7,500 gal #2 oil AST in contact with soil, in-service, installed in Jun. 1978. no other spills found. 7:55 AM:- left message for Alex Montoya at Spargue. 8:06 AM:- spoke with Pete at Riteway. he mentioned that cleanup crew was on-site yesterday. they are going back today to fix faulty vent line. 10:15 AM:- received call form Alex from Sprague. he mentioned that customer ordered 3,000 gal oil to a 7,500 gal tank. as per record, there was 3,236 gal oil in tank before delivery. delivery occurred on 10/03/16, but Sprague received spill complaint on 10/04/16. technician from Sprague inspected the site and noted minor spill at vent pipe which is located on back side of the building. technician also noted discharge (approx. 10 gal) in tank room that came out from a disconnected compression fitting on vent pipe by the vent alarm. Alex will send some pics. 10:36 AM:- received email from Alex including site pics. 1:51 PM:- spoke with Rob at Riteway. he mentioned that cleanup crew still at site and he will send cleanup updates with pics, once received from the crew. 710 Park Avenue Corp. **property owner** c/o Halstead Management Company, LLC. 770 Lexington Avenue, 7th Floor New York, NY 10065 Attn.: Lea Pi **property manager** PH. (212) 508-7272 email: lpi@halstead.com 2:03 PM:- left message for Ms. Pi. 2:38 PM:- sent letter to Ms. Pi requiring submission of spill cleanup report by the end of 11/04/16. letter emailed to Ms. Pi and Rob. case assigned to DEC Zhune. 11/4/17-Lea Pi from Halstead Management emailed the spill closure letter including scope of work (Riteway) and manifest. The letter stated the following: As per your letter dated October 5, 2016, we are submitting the documentation requested including: 1. Copy of your letter, dated 10/5/16 2. Emails and internal incident report to the building s Board of Directors 3. Scope of Work/ Proposal approved- Riteway Tank Maintenance 4. Riteway Spill Response Authorization form, approved 5. Copy of internal check request and authorization for deposit payment to Riteway 6. Disposal manifests from Riteway 7.

APT COMPLEX (Continued) **S118952264**

Service tickets from Riteway and Work Order The entire spill was cleaned, the waste was removed from the site, all repairs completed to the fuel tank including: 1. Replace and relocate Petrometer Gauge and tank assembly 2. Install 2 vent alarm 3. Install 1 Tell Tale Line from tank to outside in front of building 4. Install electronic Hi Level Alarm from tank to Boiler room to Front of Building All the required work and the cleanup is completed according to regulations 11/7/16-David Chan from Riteway sent the following emailRite Way Tank Maintenance Corp. was contracted by Halstead Management to remediate a spill at the above referenced property. Upon arrival, contaminated debris along with some product was encountered on the tank room floor as well as some product on the concrete tiles in the back yard area by the vent line. The cause of the contamination appeared to be from an over fill. Product discharged from a compression vent alarm at the tank top and from the vent line in the back yard area. Rite Way proceeded to remediate the contamination. The affected area by the vent line in the back yard was contained with absorbent granules then scrubbed and washed with bio-degradable degreaser (see post clean up photo attached). The contaminated debris and loose product was remediated from the tank room. A total of 3 drums of material was drummed up and disposed of in a legal manner. The room was cleaned and broom swept. The concrete floor underneath was sound and free from cracks (photo attached). A tell tale line and new vent alarm (at tank top) was installed. Site is clean. Spill Closed"

Remarks: "vent alarm failed - cleanup pending - on sand - in basement - possibly a concrete floor"

DEC Memo:	"6/10/14-Zhune called the management company. They said they have no idea of oil spill. They will find out and call back. 6/10/14- Manager of the building called at 5:17pm. He said They think the UST have rupture. Riteway is pumping out the tank now. 6/10/14-Anthony Lara from Riteway called and said they are pumping out the oil from the tank. They will install the temporary tanks. There are oil in the sump pump located in the boiler room. Oil is seeping to the basement of the next door building through the wall and is being collected in a trench located in the basement that end up in a sump pump. Both sump are being pumped out. 6/11/14-Zhune visited the site. Met Joe from Riteway. There was litte oil in the sump pump at 152 E 84th Street and no complaint of odor in the buliding. The oil from the sump at 160 E 84th Street is being removed every 2.5 hours manually. They remove about 2 gallons every 2.5 hours. Strong odor in the basement but no complaint from others floors. I asked Joe to install a ventilation sytem at the basement located at 160 E 84 Street. As per Joe the tank lost 700 gallons of fuel oil #4. They already recovered 200 gallons. Joe is going to send the work plan. 6/12/14-Zhune spoke to Lek the superintendent at 152 E 84th Street and as per Lek odor are much less at 160 E 84th street. He also said they continue removing the oil from both sump. George Superintendent 160 East 85th street 212-535-6998 Lek Superintendent 152 East 85th Street 212-744-7854 Mickey Napolitano Management Company 152 East 85th Street 212-624-4300 11/7/14-Zhune inspected the site met the superintendent from both sites, Mr. Peter Letmon (tenant)from 160 E. 84th Street and Pete from Riteway. During my inspection I observed big drops of oil in the drain and sump at 152 E 84th street and in the sump at 160 E 84th Street. There is still less oil seeping through the walll of the basement at 160 E 84tht Street. There is no odor in the basement at 160 E. 84th Street. I requested Riteway to send the work plan. Pete said he will send it next week. 11/7/14-DEC sent a letter with the following requerments: 1.-Investigation of Soils and Groundwater at the Former UST and Piping 2.-Removal of

COMMERCIAL / RES.PROPERTY (Continued) **S117267486**

Contaminated Soil (if present) from Impacted sump adjacent to the wall of the basement at 160 E. 84th street and the impacted sump located in the boiler room of 152 E. 84th Street. 3.-Removal of Product from Drains at 152 East 84th street and determination of discharge point and sampling of all drains. 4.-Application of Petroleum Compatible sealer to the impacted basement wall and the floor of 160 E 84th street. 11/7/14- Riteway notified DEP the oil in the sumps at 152 E. 84th street and 160 E 84th Streeet. The DEP reference # were sent via email. Please find the NYCDEP complaint numbers: 152 E. 84th St, NYC - #C1-1-1032147981 160 E. 84th St, NYC - #C1-1-1032138501 5/20/15- 3.Riteway sent the work plan including the site plan. The following are the objectives for the work plan. 1. Call and request the mark out of utilities providing services to the surrounding buildings. 2. Using a moving Geo Probe, drill approximatelly 6 borings around the tank and approximately 8 borings in the driveway and sidewalk. Boring will be to groundwater and/or refusal, in order to determine directional flow. 3. Using PID, photo ionization detector, continuosly field screen samples retrieved (incluiding groundwater samples if available). 4. Two samples will be retrieved from each respective boring. The depest dry soil and the sample with the highest PID reading will be sent for analysis. 5. Samples will be placed into approved jars on site and sent to a certified lab, 6. Re-cement holes from borings. If contamination extends to the water table, then the installation of a monitoring well will be necessary 7. Using a mobile Sonic Rig, drill and install 4 monitoring wells. Monitoring wells will be placed on East 84th Street. 8. Install flush mount manhaloes. Manholes will secure and cover the monitoring wells as well as peovide access for monitoring and servicing. 9. Submit boring log to the NYSDEC. Boring logs must include soil types and descriptions, field instrument measurements such as PID, depth to groundwater (if encountered), presence of odors or vapors, presence of soil discoloration and presence of any free product. 10. pump and clean sump pits. two located at 152 East 84th St. and one at 160 East 84th St. 11. Scrub and wash pits with biodegradable degreaser. 12. Periodically pump out tank at 152 East 84th St. for product recovery when necessary . 13. Inspect sump pits determine if they are composed concrete o dirt. If it’s dirt/soil, remediate all contaminated material and rums up 55 gallon drums for legal disposal. 14. After the remediation is completed (If necessary, an enpoint sample will be taken from the affected sump/pit. sample will be placed in approved jars and sent to a certified lab, via chain of custody, for analysi(samples are submitted based on a 10 business day turn around). 4/12/17- Michael Rafoni from Reliance Environmental, Inc emailed the # 4 Fuel Oil Release Assessment and Remediation report. The report stated Riteway Tank Maintenance conducted the following activites. -An undetermined amount of oil was lost over the course of one evening. -Oil was observed seeping through the basement wall at the east-neighboring property(160 East 84th Street. -Oil was also observed in the subject and neighboring property basement water drainage and utility sumps. -The existing 3,000 gallon fuel oil UST was taken out of service and two temporary 275-gallon aboveground storage tanks were installed to service the building. -Liquids within the UST were removed and the containment sumps were emptied and cleaned. -Around the clock monitoring and oil recovery from the containment sumps resulted in the removal of approximately 2,900 gallons of oily water by August 19, 2014. -After August 15, 2014, oil-only absorbent pads were utilized to recover oil

COMMERCIAL / RES.PROPERTY (Continued) **S117267486**

in the sumps. -On August 4, 2014, the UST was cleaned of all residual liquids. -The tank interior was inspected on August 8, 2014 and no liquids were present in the tank. On August 13, 201, soil borings SB1 through SB4 were installed by REI to assess soil quality surrounding the UST system. The analytical results reported all DEC stars fuel oil target compounds at concentrations less than the DEC Unrestricted Use SCOs. On November 1, 2016, the 3,000 gallon #2 fuel oil UST was permanently closed-in-place. Upon completion of cleaning activities. The tank interior was reported to be in good condition; with minor corrosion pitting, but no holes being observed. As the base and sidewalks of the tank excavation consisted of bedrock, collection of confirmatory soil samples from beneath the tank was not feasible. As no evidence of a hole was found within the tank. REI believes that the source of the release was product piping between the tank and the boiler room. The tank was filled with sand. the product supply/return lines had been previously disconnected and capped in the building boiler room. The tank fill pipes and vent pipe were rendered useless, being filled with concrete. The excavation was then backfilled, and side walk was repaired. Beginning in June 2014, minor amounts of separate phase liquid (SPL)was observed within 152 and 160 East 84th Street at four locations. Beginning in November 2014, each location where SPL had been Observed was inspected on a weekly basis and logged by BLDG personnel. If observed, SPL was recovered using oil-only absorbent pads. Once the SPL had been recovered, absorbent pads were removed and properly disposed. On October 9, 2015, REI conducted an inspection of each location. On October 9 and November 10, 2015 REI collected water samples from containment sumps at 152 and 160 East 84th Street. The analytical result reported Xylenes (6.8 ug/lt)and p-isopropyltoluene (31 ug/lt) at concentrations above the DEC Groundwater Water Quality Standard and Guidance (GWQSGV) On November 1, 2016, REI conducted a final inspection of each SPL location and reported the following: -Neither SPL nor a PHC sheen was observed at any of the locations -PID readings of 0.0 ppm were reported at all locations and in the basement atmospheres. -PHC odor were not present in either building. Broadwall Management Corporation owners 160 East 84th Street, have provided a document certifying that fuel oil is no longer observed entering the building. In regards to the sampling of the line Reliance sent the following email. -It’s our opinion that the release occurred due to a failure of the supply or return line between the UST and the boiler in the basement. -These line could not be effectively isolated, however they have been purged and capped/sealed. -The supply/return line spanned approximately 5 feet from the tank to the foundation wall in the basement boiler room. -We install a soil boring in the immediate area of these lines -provided in report (SB2;Figure 3 and appendix A.Picture #3). Shallow bedrock limited Geoprobe penetration. -There was simply no room to install additional borings and no point, due to the short 5 foot distance of piping noted above and the presence of shallow bedrock. Additionally, the release oil found and efficient conduit to the sumps (152 and 160) and bedrock wall (160)allowing the oil to be collected and flushed through the affected area. -The tank has been cleaned, inspected (interior)and closed in place. -The facility is now on natural gas -No oil has been observed in any of the water or utility sumps in either building (152 or 160)in sometime and no oil remains emanating from the bedrock wall of 160- as confimed by the owner of the neighboring 160 building in the letter including in the report. -It’s our opinion that what oil was released to the shallow

COMMERCIAL / RES.PROPERTY (Continued) **S117267486**

bedrock has since been flushed through the surface , has vacated and is no longer a threat. Spill Closed."

DEC Memo:	"10/23/06 - See e-docs for Con Ed report detailing cleanup and closure. e2mis no. 156462: On 12/4 @ 20:55 FOD reported that while working on Feeder 2m17 on an ABF situation in V-5586 he discovered approx 10 gal of an unknown oil atop 300 gallons of water. No sewer/water affected. The source and cause is unknown at this time. The spill was in the concrete structure. No substantial cracks observed. No movement on the standing water. The sump pump was found unplugged on arrival. No evidence of any rrelease to the environment. Environmental tag # 44782 was hung. Two samples for PCB and ID will be taken. The chain of custody # is pending Pads were put down to verify the substance as an oil. The Feeder is out odfservice at this time and cleanup will be scheduled. UPDATE: NYP 004 127 445 Chain of Custody # CC 19994 Account # F 3237 UPDATE: The correct Feeder is 3M54 not 2M17 as perviosly stated. As reported by me before, the Feeder is not out of service. It is alive on backfeed and the Shift Manager said he wants to go ahead with the draining of the vault regardless. 12/5 @ 02:35 Figuereo # 84445 of FOD reported to me that the Astoria tanker removed 450 gallons of mixed liquids and the Vactor truck assisted ans washe ddown the structure. FOD was able to do its job. The rest of the cleanup will proceed at a later date when i&a crews are available. 12/05/04 09:40 Lab Sequence Number: 04-10066-001 MATRIX: WATER GRAB PCBs <1.0 ppm 1/19/05 15:00 On 12/8/04 at 05:43 J. Liguori # 156462 I&A/Cleanup Supervisor called to report that the final cleanup was completed at 05:00. The flush truck removed all liquid. The structure was double washed with slix. The spill tag # 44782 was removed. The crew was: Morgan # 14490, and Burrows # 84539. There was no indications of where the oil had come from. Update: 1/19/05 @ 15:24 hrs. R. Biliski #04919, Operating Supervisor, reported at 14:15 hrs. on 1/19/05 that he inspected this vault and found that the transformer was replaced and no oil was found and there was no spill tag. He stated that the transformer is not leaking and is ok!"
Remarks:	"approx 10 gal of unkn oil in vault on 300 gal of water. 2 samples taken, clean-up pending results. No to 5 questions. Con Ref 156462"

DEC Memo:	"5/17/07 bf: sent ttf to: Herbert Pollak La Maruja Realty 345 East 78th Street New York, NY 10021 6/8/07 Received ttf letter returned marked UNCLAIMED. bf 6/14/07 Called Herbert Pollock (212)535-6166. Told me his sister (Pilar) owns the building. Her phone: (615)826-4211. Building management: (212)744-9644. Called Pilar and left message. Called management. Told me that Scott Lerman is not in and will be back in about an hour and he will call me back today. Sent ttf letter to: Scott Lerman Rialto Management Corp. 872 Madison Avenue, Suite 2A New York, NY 10021 Received return call from Mr. Lerner. Petroleum Tank Cleaners will be making repairs and retest. He will have owner sign work order and make appointment for PTC to do the repairs. I confirmed Rialto mgt. address with him and told him letter is on the way. bf 10/10/07 Received passing tank tightness test report on 10/9/07. I called Scott Lerman and left message that in order to close spill, DEC needs response to ttf prepared by PTC. bf 10/11/07 Received message from S. Lerman. He will forward ttf letter to PTC and have them prepare response. bf 10/17/07 Received fax from M. Salamack. The tank is a 2K tank located aboveground,

APARTMENT (Continued) **S108639616**

wrapped in concrete, with weep holes. Some concrete wrap was stripped and part of the tank was previously cut for cleaning the tank. Also, while the lines were pressure tested separately, the vent line was found to leak. This area was not properly sealed. The tank was welded closed and the vent line was replaced. A passing tightness test was included. The letter did not contain any conclusion regarding any contaminated soil found during the replacement of the vent pipe. Called M. Salamack and left message to provide a letter or email regarding this. bf 10/23/07 Received fax dated 10/17/07 from M. Salamack. No contamination was found. NFA. bf"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE Called MIke-Super @12:14 pm. 4-17-03. Castle oil will clean the spill, they are on their way. Spill is on the curb. He blamed the spill on a faulty gauge giving a false reading. Spill is approx. 10 gallons. No oil in the basement. Area blocked. Contained with sand bags. ARS MIKE CALLED @ 3:06 PM AND HE STATED THAT CASTLE OIL FINISHED THE CLEANUP. PETROLEUM TANK CLEANERS WILL FINISH THE JOB TOMORROW BY STEAM CLEANING THE SIDEWALLS. ARS 4/17/2003 10/25/05 - Raphael Ketani. I am closing the case given the very minor nature of the spill and given that 2 years have gone by with rain. So the pavement must be cleaned of this spill by now."

Contact Name:	PETER MIRABILE
DEC Memo:	"8/27/2015 - Feng - Duty Desk. Talked to Peter Mirabile of Riteway Tank (718-855-7272, info@PetroleumTek.com). They received a call from Marlane Plumbing (Rob, 718-993-4350) saying the super of the building suspected there is problem with the line. Riteway went to the site and tested the line. The line failed the test. Riteway was able to identified the leak area. They cut the line, capped it, tested it and determined the part beneath the sidewalk is fine. The leak area is located above ground underneath the grading. There is less than 5 gallons of oil (#6 oil) spilled underneath the grading. There is a temporary fill line today . The plan is to replace it by tomorrow. 12/3/2015 - Reviewed Request for Closure, dated 11/17/2015. The source of the leaking was a faulty fitting located inside the shaft. Riteway proceeded to test the underground section of the fill line from the shaft interior to the curb which passed. Riteway then removed and replaced the remaining protion of the fill with all new above ground fill line. Endpoint sample was collected subsequent to the removal of the contaminated material and debris from the shaft. 6 drums of waste were generated. talked to Robert Hill of Riteway. The date difference of contaminated materials removal and the endpoint

UNKNOWN (Continued) **S118260924**

sample collection was because they forgot to take the sample and when they prepared the closure report they realized the endpoint sample was missing, the sample was collected back then. 12/15/2015 - The faulty fitting of the line had been replaced. Spill has been cleaned up. Spill is closed. "

Remarks: "loss from break line, unk amount, unknown location. C/u and repair pending"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT e2mis 121451 If this is a Con Edison manhole it contains electrical cable and splices. Many manholes have a sealed sump in the floor which is used to allow runoff when pumping the structure. A hose is place in this sump and water on the floor will flow into the sump allowing the floor to be cleaned. If cleaned prior to analysis of the fluid, the structure will be cleaned as >50 PPM and all liquid and waste will be manifested accordingly. The structure will be

MANHOLE 50433 (Continued) **S103574641**

double washed with a degreaser, i.e. Slix. All cleaning material and PPE will also be treated as >50. If any sludge is found within a manhole it is treated as lead contaminated and manifested accordingly. The spill identification tag will remain secured to the structure until the analysis is completed and if <500 PPM the signage will be removed. If the analysis is >499 PPM, a grid will be prepared for wipe testing the area. Until the analysis of the wipes are proven to be <10ugs/100cme2 all additional waste produced from the structure will be treated as the original analysis. If this spill occurred in a transformer vault containing a sump pump and there was a possible release, the drainpipe trap will be dismantled to determine if oil was released. Sludge found in a vault, through historical analysis, has been determined not to contain lead. 11/23/98 03:30 FLUGMACHER #99855 (FOD) REPORTS: WORKING ON TROUBLE FDR-24M96 IN M-50433 S/W/C E.70 ST. & MADISON AVE. FOUND APPROX. 1 GAL OF AN UNKNOWN FLUID THAT RESEMBLES OIL ON APPROX. 25 GALS OF WATER. FLUID IS CONTAINED TO THE MANHOLE DIDN'T ENTER ANY WATER WAYS OR SEWER SYSTEMS. THERE ARE NO CRACKS IN THE MANHOLE BUT THE STRUCTURE DOES HAVE A SUMP AND WAS UNABLE TO DETERMINE IF A SEWER CONNECTION EXISTS. TOOK A SAMPLE AND HUNG SIGN # 18132. 11/23/98 03:53 C.I.G. ROMERO # 09880 NOTIFIED.....
11/23/98 1135 HRS RESULTS OF LAB ANALYSIS 98-12935: P.C.B: <1 PPM; AROCLOR: NONE 11/24/98 On 11/23/98 @ 13/00 UG cleaned structure with Bio-Gen 760 prior to lab results. 425 gallons of water treated as >50 PPM removed by Astoria tanker, 3 solid waste drums picked up by Astoria for disposal. EPA # NYP004029146. After removal of debris from sump pit it was determined the structure had a sewer connection which was clogged. Spill tag removed # 18132 job complete. "

Remarks: "1 gallon unk oil found in manhole - clean up pending lab results con ed ref # 121451"

DEC Memo:	"160921. 09/07/05 15:00. S.Asfour #49908, I&A Supervisor, notified the control center on 09/07/05 at 14:15hrs. to report he found approx. 3 gallons of dielectric fluid mixed with dirt that leaked from the bottom of the transformer in V6380, which is located on the north side of E. 70 st 23' west of Madison ave. S.Asfour#49908 was at this location doing inspections when he found the spill. The account number is #14002, V6380 is on Feeder 24M96. There was no fire or smoke involved and no sewers or waterways were affected. There were no injuries related to this spill and the weather conditions did not contribute to the hazards of this spill. There was no private property affected. The source was the transformer and the cause was a bottom leak. A yellow environmental tag numbered #42052 was hung in V6380. There is no water in V6380. There is a sump, but the sump pump was not running and unplugged. There is no oil in the trap. There were 3 samples taken from V6380; one for PCB'S and one for oil ID from the concrete floor of V6380 and one for PCB's from the transformer. The samples were marked priorityn e . The chain of custody form number is #DD12501. S.Asfour #49908 placed oil absorbent pads in V6380. The cleanup is pending Feeder deenergezation, test results and transformer removal. Logger : M.Casalta#12684. "

DEC Memo:	"09/02/15-Hiralkumar Patel. DEC Austin assigned this case on 06/24/15. alternate address: 334-338 E 79th Street no other spills found. PBS #: 2-608676. as per PBS record, the site has one (1) 3,000 gal #2 oil UST, in-service, installed in Oct. 1977. PBS database include a tank system test result dated 04/19/13. Phil Fazin of A1 Crown conducted system test on 04/19/13. tank system passed the test. 3:03 PM:- left message for Phil Fazin at A-1 Crown. 3:04 PM:- spoke with Philip Mamos (718-661-4008), previous property owner who sold property to the current owner in July 2013. Mr. Mamos mentioned that the leak was found in fill line. a new fill line was installed with new fill port on building wall and the old fill line under the sidewalk was closed-in-place. he asked to contact current owner for documents. 3:06 PM:- called Roxann Management, who is listed on PBS record. Roxann does not manage this property anymore. 3:09 PM:- left message for Sierra Real Estate, current property management company. Castlerock HGI East 79th Associates, LLC. **property owner** c/o Sierra Real Estate 600 Madison Ave, 3rd Floor New York, NY 10022-1689 Attn.: Ph. (212) 776-1201 09/24/15-Hiralkumar Patel. received message

PREMIER PROPERTIES TTF (Continued) **S112231296**

from Dan Walsh (at 3:21 PM on 09/23/15). 8:18 AM:- spoke with Mr. Walsh. he mentioned that 334 E 79th Street, LLC. has purchased this property on 09/04/15. he asked to send correspondence to his attention. 334 E 79th Street LLC. **property owner** c/o Hawkins Way Properties, LLC. 100 Wilshire Blvd, Suite 1750 Santa Monica, CA 90401 Attn.: Daniel Walsh Ph. (203) 213-6224 email: dan.walsh@hawkinsway.com 9:33 AM:- sent letter, including PBS application, to Mr. Walsh. asked him to submit PBS application immediately to update property owner's information. also asked him to submit report for tank test failure investigation by the end of 11/20/15. letter emailed to Mr. Walsh. 09/30/15-Hiralkumar Patel. 9:04 AM:- received call from Steve Gustems from IVI. informed him about tank test failure and leak in old fill line. he will conduct required investigation. Steve Gustems IVI Environmental Ph. (914) 309-3960 10/20/15-Hiralkumar Patel. received email from Paul Stellato (at 10:11 AM on 10/16/15) including investigation work plan. abstract: - site is served by a 3,000 gal #2 oil UST located beneath the rear courtyard - steel tank was installed in 1977, at the time of building construction - the on-site UST system was refurbished in Apr. 2013 - during refurbishment of the tank system, they cut and sealed the original fill and vent lines in the front of the subject building and added new vent and fill in front of the building - proposed to install two soil borings in the vicinity of the old fill line located in the sidewalk adjacent to E 79th Street - soil borings will be advanced to a max. depth of 10 ft bg or to refusal - will collect two soil samples from boring, if petroleum impact noted: one at the deepest dry and another from the interval that exhibits the greatest evidence of impact - if no elevated PID readings noted, one soil sample will be collected from the boring from the most probably depth at which a release would have occurred (e.g. beneath based of the fill line) the submitted work plan needs to be revised for following reasons: - the site map shows two proposed borings along the building wall, but as per previous owner, the old fill line was under the sidewalk - work plan proposes borings to maximum depth of 10 ft 10:33 AM:- left message for Paul inquiring about location of old fill port: building wall or at curb. 10:39 AM:- received call from Paul. he doesn't know where the old fill port was. informed him that the department requires investigation along the underground portion of the old fill line and complete delineation of contamination which may require boring deeper than 10 ft depth. asked him to confirm location of the old fill port and re-submit the work plan with proposed boring locations along the old fill line. 10/22/15-Hiralkumar Patel. 1:20 PM:- received email from Paul including revised work plan. site map included in the work plan shows that the old fill line runs 16 ft underground prior to entering into building basement. 8 ft of the old fill line runs under the sidewalk and remaining 8 ft portion runs under a planter area and a ramp along the side of the building. Paul proposed two soil borings: one in area of remote fill port at the curb and another by the planter area. site map shows a water main between the old fill line location and proposed boring locations. there is no boring proposed for 8 ft portion of the old fill line that runs under the planter and ramp area. 1:55 PM:- spoke with Paul. inquired him about proposed boring location on other side of water main. he mentioned that code requires 3 ft clearance from the water main. he mentioned that the old fill line runs close to western property line of the site. so to avoid drilling on sidewalk in front of the adjacent building, he proposed

PREMIER PROPERTIES TTF (Continued) **S112231296**

borings on east of the water main, which is away from the old fill line location. informed Paul that the department requires investigation along the old fill line. asked him to add one more boring in planter area to investigate remaining portion of the line. also suggested him to remove the old fill line and any associated contamination, instead of soil boring work at this point. he will discuss with the client. 10/23/15-Hiralkumar Patel. received email from Paul (at 4:20 PM on 10/22/15) including revised boring location plan. an additional boring will be installed by hand in the planter area. work will be scheduled once sidewalk permit is received. 10/26/15-Hiralkumar Patel. 1:10 PM:- sent email to Paul and asked to submit re-revised work plan with details about third proposed boring. 1:22 PM:- received email from Paul including a revised work plan but the site map shows borings on east side of the water main, which looks away from the former fill line location. 2:08 PM:- spoke with Paul. informed him that the department requires investigation along the former remote fill line and installing borings far from the fill line on east side (due to water main on east side of the fill line and clearance needed between the water main and boring locations) may not represent correct subsurface condition. suggest him to install borings on west side of the former fill line. he was concerned about getting access to install borings on sidewalk in front of neighboring property. asked him to discuss with the client and neighbor and to submit a revised map. 2:18 PM:- sent email to Paul and asked to submit revised site map including proposed boring in close proximity to the former fill line. 11/17/15-Hiralkumar Patel. received email from Paul (at 3:07 PM on 11/10/15) including revised investigation work plan. he proposes to expose the line, remove the line as far as access allows, collect soil samples at 2 locations along the line, and at 2 different depth intervals at each location, plus a hand boring within the planter area collecting 2 more samples, for a total of 6 soil samples collected from 3 locations along the line. samples will be analyzed for 8260/8270. 11/23/15-Hiralkumar Patel. 2:32 PM:- sent email to Paul inquiring about work schedule. 12/02/15-Hiralkumar Patel. 9:01 AM:- received email from Paul. he mentioned that work will be completed by 01/06/16 and report should be ready by 01/15/16. 01/11/16-Hiralkumar Patel. 10:52 AM:- received email from Paul. he mentioned that work was completed last week. they opened the sidewalk, removed the formerly abandoned fill line to the flower box and collected four soil samples from two locations. first set of samples were collected below the elbow at the fill port (S-1 & S-1-2 ft) and second set of samples (S-2 & S-2-3 ft) were collected at the next two elbows where the line continued down to travel under the flower box. concrete refusal was encountered at a depths of approx. 3 ft bg within the flower box. it was concluded that the fill line ran below this concrete structure/flower box. no odors, stained soil or PID readings above 0 were identified during the assessment. Paul mentioned that report should be submitted next week. 01/28/16-Hiralkumar Patel. 10:20 AM:- received email from Paul including investigation report. four soil samples were analyzed. no contamination found in soil samples. case closed based on available information. 2:55 PM:- sent spill closure letter to Mr. Walsh. spill closure letter and letter dated 09/24/15 were emailed to Mr. Walsh. informed Mr. Walsh that the PBS record has not been corrected yet and asked him to submit required forms immediately to avoid case referral. email copied to Paul."

Remarks: "test failure. Repair & tetest planned."

DEC Memo:	"Sangesland spoke with Michael from Coastal Oil. He said during an annual boiler inspection they found a leaking fuel line The pit where the boiler sits was stained. Paul Farrell 212-734-5490- Owner of ground floor resturant. Schildwachter Oil 212-828-2500 has been called to inspect/repair the oil lines. 4/25/2006 Sangesland left a message for Paul Farrell asking for an update on what repairs/cleanup was done at the site. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin. 6/20/06 - Raphael Ketani. I tried contacting Michael Lacertosa (516) 352-5156 of Coastal Combustion, Paul Farrell of the restaurant, and Andrew Schildwachter of Schildwachter Oil, but could only leave messages. 6/21/06 - Raphael Ketani. I spoke to Mr. Lacertosa. He said he was only involved in calling in the spill. He said the owner is John A. Ziegler at (772) 283-8488, 71 South River Road, Steuart, FL, 34996. He said Mr. Farrell is the caretaker and lives there. I got ahold of Mr. Farrell and told him that I needed a letter report regarding the incident and the cleanup. He said he will send it to me. 6/22/06 - Raphael Ketani. I received a FAX from Andrew Schildwachter regarding the incident and the cleanup and repair. The documents indicated that

BUILDING (Continued) **S107657057**

they replaced the copper fuel line and spread absorbent material to soak up the oil that leaked. I asked Mr. Schildwachter how much oil leak and he said that it was nothing significant, just a little staining. He added that the testing of the line was just watching it as the oil was sucked to the boiler. He said that his workers never saw a leak after the repair. With this information, I am closing the case."

Remarks: "Leaking oil line."

DEC Memo:	"7/8/15: Mahat Response: On 7/8/15, Spill staff responded to #4 fuel oil spill on a residential building located at 119 East 84th Street, Manhattan. Spill was initially reported as 5 gallon, but it was discovered to be around 30 gallon impacting side walk and street. Spill is initially cleaned by carrier with the application of speedy dry. A professional contractor has been retained by the Management to power wash the sidewalk and street. Bio-degrease will be applied to soak oil stain and as per DEC directive wash water will be collected. Spill was solely from the vent line and there was no spill inside the mechanical/ tank room. No other resources were impacted by the spill. Management has been directed to correct few PBS issues: 1- Color code Fill line 2- #6 -#4 conversion in PBS registration 3- Registration on Site Spill case will be closed momentarily closed up clean up report and PBS correction. PBS : 2-310026 [crossed referenced] Management : Ms. Edith Schickedaz 212.371.2525 Super : Grardo Bustmandte 917.697.3496 212.288.1724 ESF: Carrier Paul Padocano 718.366.6662 7/16/17: Mahat Spill case is closed as above PBS issue has been corrected and sidewalk was power washed. Based on the site visit and phone calls, no further investigation is warranted. Spill case is closed in DEC Spill Database. "

DEC Memo:	"1/15/08 bf: Called Pro Test and left message with receptionist for John Leddy to call me back. Sent ttf letter to: Linda Andersen Akam Associates 8 West 38th Street, 7th Floor New York, NY 10018 Spoke with J. Leddy. Contaminated soil found. Temporary patch held system tight during 2nd test. Will make repairs for permanat patch. I told him they will need to do sampling because of the contaminated soil. Called L. Andersen, of Akam, left message on machine. Received fax from J. Leddy. Tank is #6 fuel oil and contaminated soil was found in a concrete walled manway where the hole in the tank was found. He believes it was probably a past overfill that contaminated soil in manway. If there is any other contamination, they do not know. bf 1/31/08 On 1/29/08, Received fax from J. Leddy. Failing results from 1/14/08 and passing results from 1/14/08. Sent soil contamination letter to L. Andersen at above address. bf 2/11/08 Received letter from Jerry Williams of Controlled Combustion. Authorization has been given to install temporary tank and to pump out, clean and perform an ultrasonic inspection. Will install 12K UST Work to begin week of 2/11/08. bf 4/10/08 received closure report and letter. Samples taken

APRT (Continued) **S108983067**

from top of tank not from sides and/or bottom. Tank retested and passed. bf 6/18/08 Received email from Nicholas Marrone of Miller Environmental Group requesting update. Called him at (516)876-7940 x-318. Left message on voicemail for him to call me. bf 10/8/08 Received fax from Neil Tomassetti of Eastmond. They installed a steel lining for the tank. A 4' X 8' area where the tank patch (failure) revealed no contamination. Also, suction, return, vent, and fill lines werer replaced. All areas excavated were visibly clean with no odor or discoloration associated with oil. NFA. bf "

Remarks: "TANK FAILED DUE TO HOLE IN TOP OF TANK: TEMP PATCH WAS PLACED, AND THEN TANK PASSED, REMOVING TWO DRUMS OF CONTAMINATED SOIL:"

Sewer connection could not be verified, Concrete sump could not be verified, There was no visual water movement, No sump pump running, And there were no substantial cracks.There was oil filled equipment in the structure & there is a

VAULT #5525 (Continued) **S105058447**

dielectric filled feeder in the structure.this is on feeder run of 24M91. A yellow tag #20736 was issued. (2) samples were were taken (1) for ID & (1) for PCB. A chain of custody #BB05278 was issued & no pre-cleanup or action has been taken. ERT is on location @ this time & is reporting that @ this time from what he can see @ this time the oil in the structure is stagnant. when the I&A dept arrives on location they will further investigate & give updates during the cleanup process. Spoke with CIG @ 04:29 hrs. Spoke with M.Schlagel #18276.There is an historical record for PCB of (7) PPM last dated 16-July-1997 Bob Biliski, I&A Supervisor reported at 11:40 hrs. that oil and water was pumped from the floor of the vault. The transformer is presently being drained. He verified that there was no entry into the sewer or waterway due to the operation of the oil minder that was installed by the pump. Oil was sensed by the probe and the pump was shut down. Partial cleanup of the vault is presently in progress. EPA # NYP 004 085 494 was issued by the ERT. 01/15/02 11:48 J. Bencivenga #39929 Cable (cleanup) forman Reports that at 11:45 this structure was cleaned 100%. There was 250 gallons of water /oil mixture that was removed by a tanker. The structure was double washed with slix & rinsed down with a flush truck. The spill tag # 20736 was removed."

Remarks: "Clean up pending test results - on 75 gallons of water. ***Update - historical 7 ppm from July 1997 *****"

Spiller Address:	1 EAST 70TH ST
Spiller Company:	999
Contact Name:	MARK JEPSEN
DEC Memo:	"7/20/21 - Sekhon While doing construction project, contractor found approx. 3 gallons of an oil/water mixture above residual soil in the pit. AKRF screened the area with a photoionization detector (PID) and observed maximum readings of 0.8 parts per million (ppm). A sheen was observed on the water, but no odors were observed. According to site personnel, an electric generator and a former elevator were present in the area of the spill prior to demolition. AKRF pumped and containerized the oil/water mixture into 5-gallon containers. Following pumping, some soil exhibited staining was observed in the area of the spill. Stained soil in the vicinity of the spill was hand-excavated and placed in a 55-gallon drum staged on-site. Excavation of soil continued approximately 10 inches below the spill and terminated at competent bedrock. The excavation continued to the south and east of the spill area until reaching existing concrete foundation elements which bounded the spill area. Soil endpoint samples were collected from west and north side walls of the spill excavation. No bottom endpoint sample was collected due to presence of bedrock. The endpoint samples were submitted to a laboratory for analysis of CP-51 VOCs and SVOCs and PCBs. 8/4/21 - Sekhon Report received. DECDOCS. 8/12/21 - Sekhon Report reviewed & the results indicated that the soil endpoints did not detect oil at the extent of the spill excavation. Based upon submitted report case closed."
Remarks:	"loss discovered during construction"

DEC Memo:	"07/26/19-Hiralkumar Patel. 2:27 PM:- spoke with Eric. he mentioned that AKRF is part of a project at the museum. recently, museum owner has mentioned about hydraulic oil spilled into an elevator pit. AKRF has not received report from the elevator company and hasn't seen the site so does not know how much spilled and what is affected. as the faulty elevator is not needed, owner has decided to decommission it. AKRF will submit work plan for spill investigation/remediation. 2:36 PM:- sent email to Eric (epark@akrf.com) and asked him to submit more details about spill and property owner's contact info to DEC Lin. 1/10/20-Installed 4 temp wells. One well in the elevator pit with sheen and the other 3 wells had minor level of free product. Will be taking water samples from those wells. 11/25/20-Lin-MW-2 did not have any product in the well and a groundwater sample was taken. The sample came back clean so MW-2 was decommissioned upon consultant' request. VEFR and socks were used on the remaining 3 wells to draw down the products until no free product remains. Confirmation groundwater samples were taken from the remaining three wells and came back clean. Case closed. spill assigned to DEC Lin."
Remarks:	"Elevator spilled onto concrete and through cracks into soil below.

DEC Memo:	"5,000 gallon tank buried inside the building. Drilling to the underneath of the tank found product. It looked in stable condition by now. Residuals inside the tank will be pumped out next Tuesday. Tank will be cut for further investigation. 3/30/2005 JZ: About 18 of product contained inside the tank vault 8' by 15'. two wells were installed for recovering. Tank has been closed in place. Building manager Tom Roger? [Tom Rajic] has hired Kings Solution Tom Derhiney (516) 897-2880 or (516) 857-9822 (cell) for remediation monitoring. AL Eastman [A.L. Eastmond]is conducting the recovery. 3/30/2005 JZ: Zhao called Neil, AL Eastman [A.L. Eastmond], to arrange a site visit. 11/04/2005: Call to Building Manager, Jerry Ross, at 212-737-0910 to determine latest status of spill. He will call Tom Rajic, former manager, to get information. M.Brand NYSDEC DER Albany. 11/09/2005: Tom Rajic, former building manager, called with current status of site. Spill was noticed during repair of a fill line break, noticed product under tank. Approximately 800 gallons of product was removed from the tank vault. Tank was filled with a cement slurry (closed-in-place) and a new tank was installed on top of the old tank (11/2004). Two wells were installed, one was clean, the other contained product. Periodic product removal is still being performed in the one well. Rajic noted that once the product is pumped down, the company will then treat the soil with an in-situ biological technology. The spill will be referred back to Region 2 for monitoring. M.Brand NYSDEC DER Albany. 08/17/2006: Site transferred back to Region 2 for monitoring of remediation. M.Brand NYSDEC DER Albany. 10/11/06 - Austin - Reassigned from Central Office staff to Patel, for follow up and closure - end 11/14/06-Hiralkumar Patel. left message for Jerry Ross (212-737-0910). 11/15/06-Hiralkumar Patel. visited site on 11/14/06. met Mr. Ross, super at site. he doesn't have much information, but asked to contact Thomas Doheny at Clean Solution, company doing product recovery. spoke with Mr. Doheny. as per him, old tank was in 6 inch thick concrete vault. they have installed two recovery wells. one of them is dry all the time. second well keep receiving oil in it. they have pumped out about 6-7 gal two months ago and will be going next week. as per Mr. Doheny, there is no water in recovery well and these wells opens into concrete vault. asked Mr. Doheny to send letter with discription about site and cleanup activities and to send copy of product recovery ticket. Thomas Doheny Clean Solutions Technologies, Inc. Ph. (516) 897-2880 FAX (516) 897-2408 email: tdainc@optonline.net John Aiello (property manager) Gumley Haft Kleier INc. 415 Madison Avenue, 5th Floor New York, NY 10017 PH. (212) 371-2525 Ext. 264 email: jaiello@gumleyhaft.com PBS #: 2-147583. as per PBS record, site had 5000 gal tank in old vault and new tank is also 5000 gal and using #4 oil. 11/20/06-Hiralkumar Patel. left message for Thomas. 11/22/06-Hiralkumar Patel. received message from Thomas. he will send documents soon. 12/11/06-Hiralkumar Patel. spoke with Thomas. he was

4 E 70 ST (Continued) **U000413810**

on vacation and will send documents by end of this week. 12/27/06-Hiralkumar Patel. left message for Tom at Clean Solutions. left message for John, property manager. 12/28/06-Hiralkumar Patel. received letter from Tom from Clean Solutions in fax. abstract: - monitoring wells installed by Eastmond & Sons in early 2005 - both wells are 4 inch diameter PVC with five feet of slotted pipe at the bottom - bottom of each well is open to enable removal of oil from bottom of tank vault - east well is 16 ft and west well is 19 ft below surface grade - remaining oil seeps into the west well periodically - due to thickness of #4 oil the seeping process takes time this letter doesn't have any information about how much they recovered during each visit. left message for Tom to send following information: - scaled site plan including surrounding area - amount of product recovery during each site visit - description of initial cleanup after spill left message for Mr. Aiello requesting same above information. 12/29/06-Hiralkumar Patel. received message from Mr. Aiello. left message for Mr. Aiello. 01/02/07-Hiralkumar Patel. received call from Mr. Doheny. asked him to send scaled site plan, product recoverty data and initial cleanup work details. explained him that to confirm that spill is contained, the department need soil/groundwater samples around tank vault and to decide sampling locations, scaled site plan is needed. 03/22/07-Hiralkumar Patel. received message from Mr. Doheny (516-857-9822) from clean solutions. spoke with Mr. Doheny. they opened existing well little wider and found free product in tank vault with camera. Mr. Doheny proposed of pumping out this oil into tank with small pump that they can get into vault. vault top has 9 ft thick concrete so it is hard to remove more concrete to get vacuum hose down to remove all oil in one shot. this time they found about 15 inch product in well. asked Mr. Doheny to send video tape of what they found and other documents which were request earlier (detailed site plan with surrounding area, product recovery data and initial cleanup detail). Mr. Doheny also mentioned that he can observe two sidewalls (only) of tank vault, from outside, as there are pits along these walls and he found no cracks in these. 06/04/07-Hiralkumar Patel. spoke with John, property manager. they have installed pump as they proposed earlier. asked John to submit documents on initial oil cleanup, product recovery data and detailed site map with surrounding area. 07/25/07-Hiralkumar Patel. left meessage for John. received call from John. they are pumping product currently. he will contact Mr. Doheny for reports.
08/17/07-Hiralkumar Patel. received message from John mentioning that Mr. Doheny has sent email with some documents. left message for John informing that i haven't received any documents/email from Mr. Doheny. spoke with John and Mr. Doheny. Mr. Doheny tried to send documents twice before, but at wrong fax number. he will do it again at correct number. received fax from Mr. Doheny containing product recovery data and map. product recovery data is in no. of inches collected in tank during pumping event, but no volume data. also map that has included in fax is not clear. left message for Mr. Doheny to send product recovery data in terms of volume and clear site map. 09/04/07-Hiralkumar Patel. received another site map from John, but with insufficient informations. 10/31/07-Hiralkumar Patel. spoke with John. he mentioned that since last week they are not receiving any oil from well. 11/01/07-Hiralkumar Patel. visited site. met John. new tank is located right under sidewalk (with same width as sidewalk) and old tank vault is under new tank, but running perpendicular from sidewalk curb to about 50 ft inside building. one well that installed

4 E 70 ST (Continued) **U000413810**

in old tank vault, comes out in basement and at there they cut well and put pump in it. so well is not accessible through sidewalk. second well goes through new tank vault and as per John that well never had product in it. as per Jerry, site super, no oil coming out from well for about two weeks. they emptied out 275 gal tank twice before, filled mostly with oil. they are planning to stop pump for about three weeks as very minute amount coming out every day. then they will run pump to collect oil from well into tank. old tank vault is right adjacent to foundation wall. asked John to check possibility for soil borings on remaining three sides of old vault (two sides in basement and one out along street). John will contact Mr. Doheny and will call back. 11/26/07-Hiralkumar Patel. left message for John. 01/24/08-Hiralkumar Patel. received message from John. spoke with John. he will talk to Mr. Doheny to submit report. 02/11/08-Hiralkumar Patel. received letters from Mr. Doheny. as per letter dated Oct. 18, 2007, Mr. Doheny tried to inspect sub basement floor with camera but didn't get success. they took pics of sub basement floor, outside of old tank vault, through floor drain and manway and found dry floor. from oil recovery record, they recovered only 2.5 inches of product inside 275 gal holding tank in two months. Mr. Doheny proposed to stop pump for couple of weeks, to allow accumulation of remaining oil. found PBS expired. sent letter to John Aiello requiring groundwater sample (with well in proximity to west well and outside of old tank vault), implementation of interim remedial measures and tank registration. letter emailed to John and Mr. Doheny. 03/03/08-Hiralkumar Patel. received call from Mr. Aiello asking for drawing showing where the department needs well. 03/06/08-Hiralkumar Patel. sent site map to Mr. Aiello and Mr. Doheny, with map including approxi. location of new well needed. 03/14/08-Hiralkumar Patel. received message from Mr. Aiello regarding location of new well. left message for Mr. Aiello. 03/17/08-Hiralkumar Patel. received message from Mr. Doheny. spoke with Mr. Doheny. he mentioned that old and new tank vaults runs East-West under sidewalk and both existing wells are on sidewalk. there is 4 ft * 4 ft pit on west side, next to, old tank vault area. and they are proposing to install well through this pit, which is located on sidewalk also. as oil always found in west well inside old vault area, approved Mr. Doheny's plan to install well in pit located on west of old vault area. left message for Mr. Aiello regarding new well location. asked him to submit work schedule. 04/18/08-Hiralkumar Patel. received message from Mr. Aiello. he mentioned that due to scaffolding on sidewalk in area of previous tank vault, required well installation is not possible. he suggest to move well. left message for Mr. Aiello that the department requires well in same location. so the department will wait and well could be installed once scaffolding removed. asked Mr. Aiello to call back with scheduling for scaffolding removal. 04/29/08-Hiralkumar Patel. received message from Mr. Aiello. he mentioned that scaffolding will be removed in about three weeks (probably by end of May 2008) and then they can install well. spoke with Mr. Aiello. as scaffolding will be removed by end of May, 2008, approved his request to wait till then for well installation. Mr. Aiello will call once ready for well installation. 07/10/08-Hiralkumar Patel. left message for Mr. Aiello. 07/11/08-Hiralkumar Patel. received call from Mr. Aiello. they have removed sidewalk scaffolding and will have mark out next week and then will install well. asked Mr. Aiello to submit work schedule. 08/14/08-Hiralkumar Patel. received call from Mr. Aiello. they got

4 E 70 ST (Continued) **U000413810**

permit and will install well tomorrow. will submit report within month. 08/20/08-Hiralkumar Patel. received call from Chris Pickett (347-236-2640) from Independent Testing. they started drilling well as required. they found soil to depth of 0 to 21 ft bg and no PID values found. after 21 ft depth, they found decomposed rocks to depth of 42 ft, but no groundwater found. as no groundwater found to depth of 42 ft bg and as old tank vault bottom is about 15-20 ft bg, asked Chris to stop boring further. asked him to collect two deepest soil samples for analysis. 08/21/08-Hiralkumar Patel. spoke with Chris at Independent testing. they will send two deepest soil samples for analysis. they have backfilled borehole and sealed it at surface. 09/19/08-Hiralkumar Patel. left message for Mr. Aiello to submit report. 11/04/08-Hiralkumar Patel. received email from Mr. Aiello with soil sample analyticals. two soil samples were taken from 17-19 ft and 19-21 ft depth. no contamination found in any sample. 11/18/08-Hiralkumar Patel. sent email to Mr. Aiello requiring submission of product recovery data from existing wells inside old vault and report regarding recent well installation and soil investigation (including scaled site plan with old tank vault, new tank vault, wells inside vault, recent boring location etc.). 11/25/08-Hiralkumar Patel. received message from Mr. Aiello. left message for Mr. Aiello. 12/15/08-Hiralkumar Patel. left message for Mr. Aiello. 12/16/08-Hiralkumar Patel. received message from Mr. Aiello. spoke with Mr. Aiello. he has spoke with contractor and will submit report by end of 12/30/08. 02/04/09-Hiralkumar Patel. received message from Mr. Aiello. spoke with Mr. Aiello. asked him to submit following: - product recovery data from existing wells inside old vault - report regarding recent well installation and soil investigation (including scaled site plan with old tank vault, new tank vault, wells inside vault, recent boring location etc.). 03/16/09-Hiralkumar Patel. received message from Clifford (718-961-8530) from Independent testing. 03/17/09-Hiralkumar Patel. left message for Clifford. received call from Mr. Clifford. he mentioned that they did PID screening of soil and found no readings. no soil boring log was generated. asked Clifford to send letter confirming no PIDs found during recent boring for well installation. received email from Clifford: ...purpose of drilling for this project was solely environmental and therefore no geotechnical information was obtained such as references to blow counts and soil classification. being this was an environmental job site, standard protocol was followed including all necessary hygienic measures such as the use of Alconox during the sampling procedure, Teflon sealed air tight jars for transport of potentially contaminated material and the use of a photo-ionization device (PID) to measure volatile organic compounds (VOC's). no VOC's were detected while monitoring the bore hole with a PID during the entire drilling process. 03/18/09-Hiralkumar Patel. received message from Mr. Aiello. spoke with Mr. Aiello. he will submit product recovery record by end of 03/27/09. 09/25/09-Hiralkumar Patel. 10:25 AM:- left message for Dan Wollman (email: dwollman@gumleyhalf.com), new property manager. 3:23 PM:- received call from Mr. Wollman. asked him to send product recovery report. 12/01/09-Hiralkumar Patel. 1:00 PM:- left message for Mr. Wollman. 12/17/09-Hiralkumar Patel. 10:38 AM:- left message for Mr. Wollman and asked him to return call by end of 12/31/09 or else case may be referred to legal. 01/26/10-Hiralkumar Patel. 12:48 PM:- received call from Kevin from Action remediation. Action remediation was working for Clean Solutions and installed pump in

4 E 70 ST (Continued) **U000413810**

well and now they are working for management company. asked Kevin to submit product recovery data. he has pump out data from Oct. 2006 and will submit for review. Kevin O'Connor Action Remediaton Ph. (516) 781-3000 Ext. 2421 email: hazmat3010@aol.com 02/05/10-Hiralkumar Patel. 1:28 PM:- received product recovery data from Mr. O'Connor from 10/12/06 to till date. according to manifests - 260 gal of oil recovered within 73 days (from 10/12/06 to 12/21/06) - 195 gal of oil recovered within 273 days (from 12/21/06 to 09/19/07) - 180 gal of oil recovered within 870 days (from 09/19/07 to 02/04/10) 02/22/10-Hiralkumar Patel. discussed with DEC Austin. as oil spilled in tank vault, no indication of oil release outside of tank vault and based on oil recovery data, Austin asked to close the case. case closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE SEE ALSO 9609782.//// TRANSFERRED TO TIPPLE FROM TIBBE 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 10/24/05-Vought-Contract Payment Package (National)-Monthly well monitoring and system check (6/1/05-7/31/05) 12/20/05-Vought-Contract Payment Package (Miller)-System check, clean pump sections and remove debris from sump pits (12/6/04-2/10/05). Payment authorized by DEC Karweil due to no duplicate invoices in file and no check cut as per FMIS. 12/20/05-Vought-Contractor Payment Application (Miller)-Work performed from 06/18/03 to 07/17/03 included well monitoring. Payment approved as per DEC Karwiel due to paid invoice not in file and check not cut as per FMIS. 03/08/06-Thomas- Contract Payment Package-

APARTMENT BUILDING (Continued) **S102239189**

(National Env. Mgmt)- system check and monitoring , emergency response to leaking tanks, removal of tank, installation of tank (08/01/05-09/30/05). 06/02/2006-Vought-Received call and email from National (Menegio). Email from Menegio: The pump at 233 East 70th Street should be replaced. The estimated cost is $1000 for labor and materials. In the past year, we replaced portions of the system at 225 East 70th Street, which is the adjoining property. Since we've had the project, both properties (managed under the same PIN and Spill #) are visited on a monthly basis. No product has been noticed at 233 for approximately one year. The adjoining property (225) has an OWS and the system is functioning effectively. The system at 233 includes a pump that discharges directly to the sewer system and it is questionable whether the pump should be replaced for remedial purposes or only for water control purposes. The need for the pump for remedial purposes is difficult to evaluate since it recently stopped function, although no product was noted when we visited to try and service the pump. 06/27/06-Vought-Received email from Menegio that groundwater analyticals from sump showed non-detect with respect to VOCs and SVOcs. Menegio will send in analytical report to DEC. 09/26/06-Vought-Contract Payment Package (National)-well monitoring and system checks (04/01/06-06/30/06). 11/29/06-Vought-Contract Payment Package (National)-Monthly system check and recording (08/01/06-09/30/06). 1/11/07-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin due to recent inquiry by building owner to have DEC recovery system removed from site. 1/25/07 - Raphael Ketani. Signed Contract Payment Voucher for National Environmental Management Associates Corp. for the work done during the period 10/1/06 to 11/30/06, invoice #003-420; system check and recording. 2/14/07 - Raphael Ketani. I have begun my review of the case. The PBS case is #2-284785. There is one 6,000 gal. tank. The PBS record lists #6 oil as the material contained, but the record and letters describing what was analyzed refer to #2 oil - though it had the properties of #4 or #6 oil. I reviewed the case file and found a groundwater analyticals dated 6/22/06 package for a sample taken from the sump at 233 E. 70 Street. All of the results were non-detect for the VOCs and the SVOCs. I found an e-mail correspondence from Greg Menegio to Mr. Vought stating that the pump at 233 E. 70 St. should be replaced. However, Mr. Vought did not respond back stating that the replacement should be done. Instead, Mr. Vought asked for more analytical results. I sent an e-mail to Mr. Menegio (gmenegio@envirohealth.org) at Enviroscience Consultants, Inc. (631) 580-3191 requesting additional and more recent analytical results so that we may discuss whether it is worth it to continue to maintain the oil-water separator system and the pump in the sump. I spoke to Mr. Vought about the case. He said that I should speak to Bruce at National Environmental as Greg of Enviroscience is the subcontractor. I received the following e-mail from Mr. Menegio at 4:13PM: Although there was some discussion between Jeff and I about replacing the pump prior to the June 06 sampling, the lab results referenced in your email are supportive of there not being a need to replace the pump since there are no detections of petroleum constituents. A couple of years ago (prior to our involvement), all of the groundwater monitoring wells were abandoned. This is no more recent data other than the checking of the sumps for the presence of free=phase product. If you would like, we will have a sample collected from the sump again, however, there hasn't been product in the 233 E70th street sump since before we were assigned to the project. As per your

APARTMENT BUILDING (Continued) **S102239189**

recommendation, perhaps this site should be discussed for possible closure.-Greg Best regards, Greg Menegio Department Manager Enviroscience Consultants, Inc. 2150 Smithtown Avenue, Suite 3 Ronkonkoma, NY 11779 Voice (631) 580-3191 Fax (631) 580-3195 2/15/07 - Raphael Ketani. I had a conference call with Mr. Menegio and his assistant Lorie Mead (who does the field work). Lorie said that there hasn't been oil at 233 E. 70 St. for years. She said that the oil water separator system at this location isn't working, but the one at 225 E. 70 St. is. She said that the owners of 225 want the system removed. Ms. Mead said that there are 2 sumps at 225 and one sump at 233. I told both of them to have water samples taken at all 3 locations. I told them to have the samples tested via methods 8260 and 8270 and that we should discuss the results once we get them. Ms. Mead and Mr. Menegio agreed to this plan. 2/27/07 - Raphael Ketani. I received the following e-mail message from Mr. Menegio today: As per your request, the subject site was visited last week with the intent to collect aqueous samples from the three sumps associated with the project. An aqueous sample was not collected from the sump at 233 E 70th Street due to the presence of product. The samples were collected from 225 E 70th Street location. As we previously discussed, there has been no evidence of product in the sump at 233 for nearly two years. Ms. Lori Mead from my office will be sending you summary tables for the monitoring events at the site. Subsequent to your review, please contact us if you would like to discuss. Best regards, Greg Menegio Department Manager Enviroscience Consultants, Inc. Mr. Menegio called me back to say that his e-mail was incorrect. That there wasn't any product in the sump at 233 E. 70 St. and that a water sample was taken. He said it was the sump at 225 E. 70St. that had the oil. I received the tables by FAX listing the monthly monitoring for the 3 sumps for the presence of product. 3/8/07 - Raphael Ketani. The scheduled site visit took place. Lori Mead showed me the 2 locations. The 233 E. 70 St. site had a permanent sump in a room just outside the boiler room. There were also 2 tanks for an oil/water separator system that were disconnected from the sump and not in use. Ms. Mead told me that the sump hasn't had oil in it for many months. The water in the sump looked clear. Next, we went to 225 E. 70 St. just up the street. She showed me the sump in one corner of the bottom of the elevator shaft and said that there has not been any oil in it for a long time. Lastly, we went to the sump in the back corner of the boiler room. The walls of the sump were black from the oil that had suddenly appeared about a month ago. There was some residual oil floating on the water in the sump. I told Ms. Mead that the walls of the sump needed to be cleaned out so that we can see whether there really is oil coming into the sump. She said she would have this done. I told her that the disconnected tanks at 233 E. 70 St. could be removed. 3/9/07 - Raphael Ketani. I sent Mr. Menegio a letter stating that Enviroscience didn't have to monitor the part of the site at 233 E. 70 St. and could dismantle the 2 white tanks in the sump room. I also stated that they should continue to monitor the sump in the boiler room and collect the oil as necessary on a monthly basis. 3/21/07 - Raphael Ketani. Today I received the analytical results for groundwater samples for the sump in the compactor room at 233 E. 70 Street and the sump in the elevator shaft at 225 E. 70 Street. There were no hits for VOCs and only one very low hit each for SVOCs. I spoke to Ms. Mead about the analyticals. She said that the groundwater sample that was taken from the sump at 233 E. 70 Street was completely non-detect the previous round. In that case, I

APARTMENT BUILDING (Continued) **S102239189**

told her, sampling didn't need to take place ever again. I told her that the sumps at 225 E. 70 Street would need to be sampled in May. She said this will be done. 5/2/07 - Raphael Ketani. I received the Contractor Pay Packages for work on site that was done by National Environmental Management Associates Corp. The work period is from 2/1/07 to 3/31/07. Invoice number is #324. The work consisted of collect water samples from sumps, review project status in preparation for visit with DEC staff at site, collect data from files, travel to site and meet DEC staff, supplies of gloves and hexane. The packages were found to be acceptable and were sent to Procurement. 5/3/07 - Raphael Ketani. I received the Contractor Pay Packages for work on site that was done by SEVERN TRENT Laboratories. The work period is from 2/26/07 to 3/19/07. Invoice number is #22021815. The work consisted of processing groundwater samples from the compactor sump and the elevator sump. The packages were found to be acceptable and were sent to Procurement. 8/29/07 - Raphael Ketani. I received the Contractor Pay Packages for work on site that was done by MILRO Associates, Inc. The work period is from 8/14/07 to 8/15/07. Invoice number is #28429. The work consisted of cleaning the back sump in the boiler room by collecting fluids and powerwashing. The packages were found to be acceptable and were sent to Procurement. 9/28/07 - Raphael Ketani. I received the returned Contractor Pay Packages for invoice #28429 for MILRO Associates. They were sent to me by Diana DeFreest of Management & Budget in Albany because no one from MILRO signed them. I sent the packages to MILRO to be signed. 10/3/07 - Raphael Ketani. The signed Contractor Pay Packages for invoice #28429 were returned. I sent them to Procurement. 10/24/07 - Raphael Ketani. I spoke to Mr. Menegio (631) 580-3191. We discussed the one sump in the boiler room at 225 E. 70 Street which had oil in it. I told him about my discussion with Ms. Mead back on 3/21/07 where I asked for sampling of the sump in May. He said that this sump was not sampled in May, but it was more recently sampled. He said he should receive the analytical results soon. I asked him to send them to me quickly. I also asked him whether more oil was showing up in the sump and how much oil is removed per month. He said he will get back to me regarding these items. 10/31/07 - Raphael Ketani. Greg Menegio e-mailed me today and wrote that his assistant, Lori Mead, visited the site on 10/12/07 and took a groundwater sample. She told to him that she didn't see any oil in the sump. 11/6/07 - Raphael Ketani. I tried to reach Mr. Menegio, but could only leave a message. 11/7/07 - Raphael Ketani. I spoke to Mr. Menegio today. He said that Enviroscience still does not have the groundwater analytical results. 11/8/07 - Raphael Ketani. Mr. Menegio e-mailed me the 10/12/07 groundwater analytical results of the sample that was taken from the sump in the boiler room. With the exception of one VOC, all of the VOCs were well below TAGM. Among the SVOCs, there was only a group of low exceedences for some of the benzo series analytes. I reviewed the 1998 and 2002 Site Status Monitoring Reports produced by Miller Environmental Group, Inc. Both reports indicate that wells were installed up gradient and down gradient of an abandoned tank at the curb of 225 E. 70 Street. The reports also state that the super. told staff at Miller that there was an inventory loss. The two wells were MW-1 and MW-2. Odors were detected in MW-1 during drilling, but not at MW-2. There is no further information regarding either well. Neither report depicts where the old tank was, nor where the wells were installed. I called up Supreme Company, 150 E. 58 St., 28 Floor, NY, 10155 (212) 355-4900 and spoke to Sidney Freire (freer). She said

APARTMENT BUILDING (Continued) **S102239189**

that Supreme is still the management company. She said she didn't know anything about the type of oil the building uses or the number of tanks and gave me the super's number. I spoke to Jose Roman (917) 696-0756, the super., and asked him about the fuel management system. He said there are two tanks. One under the sidewalk and one in the basement. He said that the one under the sidewalk was cleaned out and filled with sand years ago. He added that the one in the basement uses #6 oil. I called up Bonnie Ridgey at the Attorney General's office. She said that she didn't have a PIN case. I checked the paper file and there wasn't an ISR. 11/13/07 - Raphael Ketani. I received the groundwater analytical results for the sump in the boiler room and the sump in the elevator shaft floor at 225 E. 70 Street. The boiler room sump sample had many hits which were well below TAGM, except for 1,2,4-trimethylbenzene at 12 ppb (limit is 5 ppb). The elevator shaft floor sump sample had many hits which were well below TAGM, except for 1,2,4-trimethylbenzene at 19 ppb and naphthalene at 6.2 ppb. 11/15/07 - Raphael Ketani. The reports produced by Miller in 1998 and 2002 didn't show the tank for 225 E. 70 St. that is under the sidewalk, nor the wells that were installed to monitor the tank. I called up Jim Davie of Miller Environmental (631) 369-4900 and asked him to look for any documents depicting the tank and the associated wells. He said that they keep their documents for only 5 years, but he will look for the old files. 11/16/07 - Raphael Ketani. A letter was sent to Mr. Menegio of Enviroscience requesting that additional investigative work take place regarding the old fuel management system and groundwater flow. The work requested is an inspection of the old tank under the sidewalk and the associated pipes, tank tightness testing, properness of abandonment, upgradient and downgradient well installation, groundwater flow direction, and soil and groundwater sampling. 11/19/07 - Raphael Ketani. Mr. Davie called me back. He didn't find any documentation regarding where the old tank is or where the monitoring wells were put in next to it. 11/28/07 - Raphael Ketani. Lori Mead called to state that she and Mr. Menegio will go out to the site next teusday to take a look at the wells and possibly figure out the situation with the old tank under the sidewalk. I gave my O.K. for this to take place. 12/3/07 - Raphael Ketani. Mr. Menegio called and said that Ms. Mead and him are at the site and they see 3 fill ports in the sidewalk. He said one definitely goes to the active 6,000 gal. AST, but he's not sure where the others lead to. He said Jose, the super., doesn't know where they lead to, either. He asked permission to go to the DEP records department and search their files for any information on the 2 other fill ports. He said he needed to do this before proceeding with the investigation. I told him this would be fine. 12/11/07 - Raphael Ketani. I received the Contractor Pay Packages for work on site that was done by SEVERN TRENT Laboratories. The work period is from 10/15/07 to 11/02/07. Invoice number is #22023894. The work consisted of processing groundwater samples from the boiler room sump and the elevator sump. The packages were found to be acceptable and were sent to Procurement. 1/2/08 - Raphael Ketani. Ms. Mead called to ask whether DEC wanted to continue the periodic sampling of the sumps. I told her to stop the sampling and just concentrate on the old tank investigation. She said that sounded fine. 1/10/08 - Raphael Ketani. I received the Contractor Pay Packages for work on site that was done by National Environmental Management Associates Corp. The work period is from 6/1/07 to 9/31/07. The invoice number is #537. The work consisted of dismantling the oil/water separator system at 233 E. 70

APARTMENT BUILDING (Continued) **S102239189**

Street and disposing of the tanks and associated materials. The packages were found to be acceptable and were sent to Procurement. 1/10/08 - Raphael Ketani. I received the Contractor Pay Packages for work on site that was done by National Environmental Management Associates Corp. The work period is from 10/1/07 to 10/30/07. Invoice number is #576. The work consisted of checking the system, monitoring the site and collecting groundwater samples. The packages were found to be acceptable and were sent to Procurement. 1/29/08 - Raphael Ketani. I received the Contractor Pay Packages for work that was done by National Environmental Management Associates Corp. The work period is from 11/1/07 to 12/31/07. Invoice number is #598. The work consisted of internal file review, NYC DOB file review, fluid level monitoring, conferences with NYS DEC staff and National Environmental staff, interview with building superintendent, and visual inspection of former tank system. The packages were found to be acceptable and were sent to Procurement. 2/13/08 - Raphael Ketani. I spoke to Mr. Menegio (631) 580-3191, ext 22 about progress on the site. He said that his staff went to the Department of Buildings to look for documentation regarding the UST below the sidewalk. He said there was no significant information. He added that they have not put in the groundwater monitoring wells and they still have to check out the tank to see that it was abandoned properly. I told him to please get on with this project and continue the work. He said he will. 4/21/08 - Raphael Ketani. I spoke to Mr. Menegio and asked him what progress was being made. He said that they were still looking for records regarding the two wells that were installed next to the old tank under the sidewalk. He said that they plan to clean them out and reuse them, if possible. He said that they will drill just one more well if the two old ones are usable. I asked him whether there still was oil in the sump in the boiler room at 225 E. 70 Street. He said he was there last month and saw a little oil, but he wasn't sure how thick it was. He will send someone there soon to guage the well. I received the Contractor Pay Packages for work on site that was done by National Environmental Management Associates Corp. The work period is from 2/1/08 to 3/31/08. The invoice number is #663. The work consisted of project review and discussions between NEMA staff and a site inspection on 3/28/08. The packages were found to be acceptable and were sent to the Contracts and Payments Section DER. 7/9/08 - Raphael Ketani. I tried calling Mr. Menegio (631) 580-3191, ext 22 to ask him about progress at the site. However, he was not in. So I left a message. 7/23/08 - Raphael Ketani. I finally talked to Mr. Menegio regarding progress at the site. He said that he passed DEC's 11/15/07 letter to National Environmental Management Associates, but he doesn't know whether the work was performed. He said that they are the prime contractor. He said I should talk to Bruce Beck (631) 843-9020, ext 300 to find out if the tank under the sidewalk was investigated, cleaned out, tested, and wells were put in upgradient and downgradient. I tried to call Mr. Beck, but could only leave a message. 7/30/08 - Raphael Ketani. I have been having a hard time trying to contact Mr. Beck. So I sent him an e-mail: Dear Bruce: I have been trying to contact you regarding the Matilda and East 70th Street sites. The phone messages I had left last week and this week are not being returned. I have not received a report that the oil water separator system at Matilda had been moved to well MW-3. This is even though you sent me a bill. The bill shouldn't have been sent until DEC received a report stating the work had been done. The purpose of the move was to collect only the oil underground, not a

APARTMENT BUILDING (Continued) **S102239189**

lot of water. MW-3 is the only well with significant and collectable oil. As regards the East 70th Street site, DEC had requested that the tank under the sidewalk be investigated, cleaned out, and tightness tested. We also requested that groundwater wells be installed upgradient and downgradient of the tank and that soil samples be taken. However, we have heard nothing about this work taking place. We can not close this PIN case until the facts relating to the release are established. Please let me know what is going on via e-mail or phone. I am usually at my desk from 8:30AM to 4:30PM. Sincerely, Raphael Mr. Beck sent me a response e-mail. He said that there are two tanks below the sidewalk. He said that he has to get sidewalk closing permits from the City to break up the sidewalk and set up a detour for pedestrian traffic. He said that he needs to submit plans to the City. I responded back and told him to proceed and to keep DEC informed as regards his progress. 9/15/08 - Raphael Ketani. As National Environmental Management has made no progress in conducting the additional work at the site that was requested, I sent an e-mail today to Mr. Beck stating that his company's services are no longer required. I then spoke to Mr. Menegio (631) 580-3191, ext 22, and told him that DEC would like to work directly with Enviroscience to get the necessary work done. He said that he thought Enviroscience Consultant's contract ended in September 2008. He said that he will call Albany DEC and find out whether an extension has been put in place. Mr. Menegio will get back to me. 10/27/08 - Raphael Ketani. I tried to contact Dave Lorthioir (lor-thee-or) of EnviroTrac, Ltd. (631) 924-3001 regarding progress on the case, but could only leave a message. 10/29/08 - Raphael Ketani. Jeff Bohlen of EnviroTrac, Ltd. (631) 924-3001 called me regarding the site. He said that his crew inspected it and they saw 3 fill ports. Two of them were old and one was much more recent. The pump in the elevator shaft is not working right now. 11/21/08 - Raphael Ketani. I tried to contact Mr. Bohlen, but could only leave a message. 11/24/08 - Raphael Ketani. I spoke to Dave Lorthioir today. He said that they did a GPR survey of the site. They found only one tank. They opened up the lid to the tank and found that it had been concreted up to the top. They will do a boring right through the bottom of the tank to see what's underneath. They also located some piping under the sidewalk. A well was found behind the building on East 71st Street. They want to do a number of borings in the area to see if they can determine how groundwater flows. The wells would be installed in the parking garage under the building, uphill on East 70th Street, and elsewhere. 12/18/08 - Raphael Ketani. I sent Mr. Bohlen of EnviroTrac an e-mail stating that Randy Austin, Chief of the Spills Unit, doesn't want them to bore through the tank. He wants them to just put wells upgradient of and downgradient of the tank, aside from the other wells they will install. I also sent Mr. Bohlen the signed Standby Contractor Authorization Form. Yesterday, I received the Contractor Pay Packages for work on site that was done by EnviroTrac. The work period is from 11/3/08 to 11/30/08. The invoice number is #01.DC2017.00-1. The work consisted of meeting with DEC, administrative work to set up the case, travel to the site, purchase of Sanborn maps, X-ray and GPR surveying, and use of low value equipment. The packages were found to be acceptable and were sent to the Contracts and Payments Section DER. 12/23/08 - Raphael Ketani. Mr. Bohlen e-mailed me that EnviroTrac needed a letter approving the well installation in the sidewalk. This letter was necessary in order to obtain City permits for doing work in the sidewalk. I sent the

APARTMENT BUILDING (Continued) **S102239189**

letter to him today. Mr. Bohlen also wrote that they have not done the abandoned tank boring. 1/29/09 - Raphael Ketani. I received the Contractor Pay Packages for work on site that was done by EnviroTrac. The work period is from 12/1/08 to 12/28/08. The invoice number is #01.DC2017.00-2. The work consisted of project management and data evaluation, and a geophysical investigation. The packages were found to be acceptable and were sent to the Contracts and Payments Section DER. 2/10/09 - Raphael Ketani. Mr. Bohlen of EnviroTrac called me today. He said that the 12/23/08 letter that DEC had sent EnviroTrac now had too old a date in order to get permits from the NYC DOB to do the well installations in the sidewalk. He asked that I send him a currently dated letter. I sent the letter today. 3/10/09 - Raphael Ketani. Mr. Bohlen called today. He said that EnviroTrac has received the permit from DOT to do the well installations for the project. 3/11/09 - Raphael Ketani. I sent Mr. Bohlen and Mr. Lorthioir e-mails indicating that the DEC didn't have any diagrams depicting where the tank and the associated wells were, nor did we have any information regarding the geology. Mr. Bohlen sent me the following e-mail regarding the proposed investigation of the spill. The well location plan, picture of the hatch for tank access and yellow mark outs for the geophysical survey are in the E-docs: Attached is the sketch that we sent to the DOT for our sidewalk permit. It shows a total of 6 wells. We may or may not need this # of wells, but for permit purposes I wanted to make sure that we can drill where needed if we find something. Additionally, attached is a picture illustrating the findings of the geophysical investigation - yellow paint is the product lines. Our plan would be to start with the 2 well locations to the west (up-gradient) and east (down-gradient) of the UST. Based on field observations (i.e., petroleum impact), we would go further to the east along E. 70th street. In order to determine gw flow direction we will need at least 1 well along 2nd Avenue. We checked the sump at least twice already, but have not recently. On both occasions it appeared oil-free; however, we will check again. 3/24/09 - Raphael Ketani. I spoke to Mr. Bohlen today. He said that the new well installation program will start next wednesday, 4/1/09. 3/25/09 - Raphael Ketani. On 1/24/09, I received the Contractor Pay Packages for analytical work performed by EnviroTrac Ltd. The work period is from 1/1/09 to 3/1/09. The invoice number is #01.DC2017.00-3. The work consisted of permit procurement and expediting, data evaluation, report writing, project management. The packages were found to be acceptable and were sent to the Contracts and Payments Section of DER. 4/1/09 - Raphael Ketani. Mr. Bohlen called to say that they were drilling at the site, but were not finding any contamination, nor any groundwater. He said that they had drilled a boring at each end of the tank with a geoprobe and the soil samples were clean. There were no odors. He added that they did borings next to the Post Office, but again didn't encounter any signs that an oil spill had taken place. He said that bedrock is at 10 feet below grade and there is about a foot of weathered rock above it. I asked him to find the groundwater because the oil is probably floating on top of it. Mr. Bohlen said that the geoprobe can't dig into the solid bedrock. He said that an air rig can go deeper, but it would be a mess as the sidewalk pedestrian traffic is heavy. He suggested doing geoprobe borings inside the building as that would put them deeper down to start and we know that the sumps always have groundwater. So they will be able to delineate the exten of the groundwater and any oil floating on top. I told them to go ahead and do interior borings if the property

APARTMENT BUILDING (Continued) **S102239189**

manager and the super give them permission. Mr. Bohlen said that he will try. Mr. Bohlen called again. He said that he opened up the downgradient abandoned well and discovered that it was 4 inches in diameter. They drilled through 2 feet of cement and then the rest of the well was a filling of filter pack sand. They encountered wet sand at the bottom of this well with a total depth of 22 feet from grade. The wet sand eventually yielded a standing water column of 2 feet. They installed a 2 inch well in this older one. They will sample the water after they develop the well. They went into the elevator pit and viewed the sump there. There was no oil in the sump. They examined the sump in the boiler room and didn't see any oil. The super told them that when it rains, an oily odor appears, but no oil. 4/6/09 - Raphael Ketani. The 4/01/09 to 3/31/10 Standby Contractor Authorization Form was signed by Randall Austin, Chief of the Spills Unit, and sent to EnviroTrac. 4/17/09 - Raphael Ketani. On 4/16/09, I received the Contractor Pay Packages for work on site that was done by EnviroTrac. The work period is from 3/2/09 to 3/31/09. The invoice number is #01.DC2017.00-4.The work consisted of project management and data evaluation, develop the drilling work plan, and gathering suplies and materials for the subsurface investigation. The packages were found to be acceptable and were sent to the Contracts and Payments Section DER. 4/22/09 - Raphael Ketani. Mr. Bohlen called me. He said that they received the soil sample analytical results. He said that the samples had some low hits, but essentially they were clean. They could not get into the old upgradient well to the tank. However, they installed a 2 inch diameter well in the old downgradient well and took a sample. He added that they looked at the sumps in the elevator shaft and the boiler room. The pump in the elevator shaft sump isn't working. There is a little oil coating the inside of the sump stickup in the boiler room. However, they have not seen free oil. The oil water separator holding tank has oil and muck in it and needs cleaning out. There is an SVE system in the elevator shaft. When the super senses some odors, he turns it on. I asked Mr. Bohlen whether any oil has been seen. He said that none has appeared in a long time. I told Mr. Bohlen to send DEC a report regarding all of the work that EnviroTrac performed with the soil and groundwater analytical results, their findings, and their recommendations regarding what to do now. Mr. Bohlen said that he will do this. He suggested keeping the oil water separator system and the SVE system intact until they are sure no oil will appear. Today, I received the 4/17/09 Test America analytical report. I reviewed the report. It contained soil sample analyses for SB-1 and SB-2, and groundwater analyses from MW-1. All of the analytical results were almost entirely non-detect. There were two hits, but they were well below TAGM for soil and groundwater. 5/21/09 - Raphael Ketani. On 5/20/09, I received the Contractor Pay Packages for work on site that was done by EnviroTrac. The work period is from 4/1/09 to 5/3/09. The invoice number is #01.DC2017.01-5.The work consisted of project management, report writing, communication with staff at DEC, prepare for subsurface investigation, subcontract geoprobe with support equipment and vehicle, data evaluation and management, conduct soil borings, collect soil and groundwater samples, use sonic interface probe, PID meter, low value equipment, and low value vehicle. The packages were found to be acceptable and were sent to the Contracts and Payments Section DER. 5/26/09 - Raphael Ketani. I had a conference call with Mr. Bohlen and Mr. Atamian of EnviroTrac regarding a request for an additional $10,000 to perform work at the site. They said that the

APARTMENT BUILDING (Continued) **S102239189**

work would be for dismantling the oil water separator at the site, cleaning the insides of the two sump stickups inside the building, plugging the wells they opened up, and refurbishing the sidewalk. They said that they do not believe that there is anything more to investigate at the site and that there is no oil showing up. I told them that I would bring this to the attention of Randall Austin, Chief of the Spills Unit. I talked to Mr. Austin about the request for the additional money and what they needed it for. Mr. Austin told me to make up another Standby Contractor Authorization Form (expenditure approval form) for the required work. I did so and forwarded the form to him. Mr. Austin signed the form and the original was sent to EnviroTrac. 6/2/09 - Raphael Ketani. Mr. Atamian had requested that a letter be sent to the management company for the building, Supreme Company, LLC, in order to facilitate removing the equipment that was installed as a result of the oil spill, and the closing of the monitoring wells. I wrote the letter, and had Mr. Austin review it. He approved the letter and it was sent out today. 6/30/09 - Raphael Ketani. I received the Contractor Pay Packages for work on site that was done by EnviroTrac. The work period is from 4/1/09 to 5/3/09. The invoice number is #01.DC2017.01-5. The invoice date is 6/26/09. This invoice was originally processed and sent out on 5/21/09. However, EnviroTrac hadn't included the proper form for page two in the pay package, as required by the contract. So, the pay package had been returned, but is now being resubmitted by EnviroTrac. The work consisted of project management, report writing, communication with staff at DEC, prepare for subsurface investigation, subcontract geoprobe with support equipment and vehicle, data evaluation and management, conduct soil borings, collect soil and groundwater samples, use sonic interface probe, PID meter, low value equipment, and low value vehicle. The packages were found to be acceptable and were sent to the Contracts and Payments Section DER. 7/1/09 - Raphael Ketani. I sent out a letter today asking City agencies for their assistance regarding the refurbishment of the sidewalks in front of the site. The letter had one addition, the current Envirotrac DEC contract number. This letter had been previously approved by Randall Austin. 7/2/09 - Raphael Ketani. Today, I received the Contractor's Application for Payment for work performed by EnviroTrac Ltd. The work period is from 5/4/09 to 5/31/09. The invoice number was 01.DC2017.01-6. The invoice date is 6/30/09. The work consisted of generation of the subsurface investigation report, project management and budgeting, data review and evaluation, and coordinate site closure activities. The packages were found to be acceptable and were sent to the Contracts and Payments Section of DER. 7/16/09 - Raphael Ketani. Today, I received the Contractor's Application for Payment for work performed by EnviroTrac Ltd. The work period is from 6/1/09 to 6/28/09. The invoice number was 01.DC2017.01-7. The invoice date is 7/13/09. The work consisted of permit procurement, CADD figure drawing, empty oil water separator, power wash tank, pwoer wash sump, travel to site, and use of low value equipment. The packages were found to be acceptable and were sent to the Contracts and Payments Section of DER. 7/31/09 - Raphael Ketani. I tried to contact Mr. Lorthioir regarding progress on refurbishing the sidewalks and the submission of a closure report, but could only leave a message. Later, Mr. Atamian of EnviroTrac (631) 924-3001, ext 147 called me and said that they are still working on the sidewalk refurbishment. Once they finish this, then they will put together a large report for closure

APARTMENT BUILDING (Continued) **S102239189**

of the site. 8/31/09 - Raphael Ketani. Mr. Atamian called me regarding the DEC equipment that was installed in the garage for the site. He said that there was a holding tank, which EnviroTrac had previously cleaned out, some pumps, piping and wiring. I told him that if the pumps have plugs that simply plug into sockets, then he can just unplug the pumps and take them. The wiring and sockets can stay. However, the piping and everything else must go. Mr. Atamian said that the equipment removal work and the rest of the sidewalk work will start on 9/2/09. 9/9/09 - Raphael Ketani. Today, I received the Contractor's Application for Payment for work performed by EnviroTrac Ltd. The work period is from 6/29/09 to 8/2/09. The invoice number was 01.DC2017.01-8. The invoice date is 8/28/09. The work consisted of project management and evaluation, revision of permit applications, data evaluation, and the scheduling of site closure activities. The package was found to be acceptable and were sent to the Contracts and Payments Section of DER. 9/21/09 - Raphael Ketani. Mr. Lorthioir sent me an e-mail. He stated that wells had been abandoned, and the treatment system was removed from the site. EnviroTrac just needs to remove one drum of storage tank sludge and have the pump in the boiler room re-energized and declared safe. After this, the case can be closed. 11/2/09 - Raphael Ketani. Mr. Bohlen and Mr. Atamian (631) 924-3001 called me in conference call today. Mr. Atamian told me that he is working on the closure report for the site. He said that it will include all of the equipment removal work, the sidewalk slab refurbishment work, and the well abandonment. 11/3/09 - Raphael Ketani. Today, I received the Contractor's Application for Payment for work performed by EnviroTrac Ltd. The work period is from 8/31/09 to 9/27/09. The invoice number was 01.DC2017.01-9. The invoice date is 10/19/09. The work consisted of project coordination, revision of permit applications, data evaluation, the scheduling of site closure activities, sidewalk permit refurbishment application, services of permit expeditor, meet with superintendent of site building, phone calls to super, electrician, and refurbishment crew, travel to and from the site, well abandonment, treatment system, oil water separator and blower dismantling, sidewalk slab replacement, AARCO Environmental Services provided vacuume services, and use of light duty vehicle, heavy duty vehicle, jack hammer, compressor, gas powered concrete cutter, and low value equipment. The package was found to be acceptable and were sent to the Contracts and Payments Section of DER. 12/10/09 - Raphael Ketani. I talked to Mr. Atamian regarding the work at the site. He said that it's all done. I told him that back in May 2009 the DEC authorized an additional $10,000 in the budget for closure work. I asked him what type of work had taken place earlier after this amount was allowed. He said that a subcontractor came and cleaned out the oil water separator system at 225 E. 70th Street. Then the subcontractor came back later and dismantled the system and took it away. As a last step, a private electrician was hired to rewire the sump in the elevator shaft so that the pump will continue to drain the water from the bottom of the shaft. I asked him whether anything else had taken place. He said that the well abandonment and flag replacement took place afterwards. Today, I received the Contractor's Application for Payment for work performed by EnviroTrac Ltd. The work period is from 9/28/09 to 11/1/09. The invoice number was 01.DC2017.01-10. The invoice date is 11/23/09. The work consisted of project coordination and review, data evaluation, travel to and from the site, use of light duty vehicle, removal of old sump system

APARTMENT BUILDING (Continued) **S102239189**

wiring and replacement with new wiring, clean, cut and remove 500 gal. oil-water separator storage tank, removal and disposal of sludge, purchase of cement, sand and pavement seal, and other supplies. The package was found to be acceptable and an e-mail was sent to Lisa Lagasse of the Contracts and Payments Section of DER. 12/14/09 - Raphael Ketani. I had a phone conversation with Mr. Bohlen of EnviroTrac (631) 924-3001 regarding the costs for performing site closure work (including sidewalk flag replacement) and other work for PIN sites. He was told that all future work must be submitted as an estimate to Spills and that it can not take place unless the estimate is approved. Mr. Bohlen said that he understood. The budget increase for work performed at the site was approved by Randall Austin, Chief of the Spills Unit. The Standby Contractor Authorization Form was sent to EnviroTrac. 1/8/10 - Raphael Ketani. I spoke to Mr. Atamian (631) 924-3001 regarding progress on the closure report. He said that it has been completed and is presently under review by staff at EnviroTrac. DEC should get the report sometime next week. 1/29/10 - Raphael Ketani. Today I received the Request for Spill Closure Report dated 1/29/10 from EnviroTrac. I reviewed the report and approved it. 2/3/10 - Raphael Ketani. The Final ISR was written and signed by myself and Randall Austin, Chief of the Spills Unit on 1/29/10. Lou Oliva, Regional Attorney, signed the FISR on 2/2/10. The original FISR was sent to Dennis Farrar. As little to no product could be found in the subsurface, it was determined that there was no more than a slight threat (if any) to the public and the environment. Therefore, the spill case was closed. 2/25/10 - Raphael Ketani. Today I received a copy of the cleanup complete letter from Albany DER. 3/8/10 - Raphael Ketani. I received the Contractor's Application for Payment for work performed by EnviroTrac Ltd. The work period is from 1/4/10 to 1/31/10. The invoice number was 01.DC2017.01-11. The invoice date is 11/23/09. The work consisted of updating the figures and the file, project review and coordination, and finalizing the closure report. The package was found to be acceptable and an e-mail was sent to Lisa Lagasse of the Contracts and Payments Section of DER. 3/17/17 - Raphael Ketani. Alex Sing of CBRE (914) 740-1926 called to inquiry about the spill. He asked whether I remembered the spill case and could give him more information about what I had seen at the site. I explained that I didn't remember the spill since it had taken place long ago and the case had been closed and inactive for many years. I suggested to him that he find the spill case on the Public Spills Database and try to read the case notes for himself. I added that, according to the notes, the case was closed because there was little or no product in the subsurface and so there was only a slight threat, if any, to the public and the environment. With that, Mr. Sing thanked me and the conversation ended. "

Remarks: "DEP RECEIVED A CALL FROM A PERSON WHO LIVES IN THE BUILDING AND REFUSED TO LEAVE A NAME. CALLER STATED THAT A OIL TANK IS LEAKING IN BASEMENT AND MAYBE LEAKING INTO SEWER SYSTEM. LANDLORD REFUSE TO FIX TANK. DEP WILL INVEST. COMPLAINT."

DEC Memo:	"1/25/14: Mahat Mr. Anthony Lara from Riteway inforemd DEC about the spill. There was leak on the feeder pipe that was supplying oil from tank to the boiler. The feeder line was running through concrete trenches. Since there was leak on the feeder line the trench was working as a secondary contenment. Riteway was retained for the clean up. Mr. Lara also informed DEC that there is no soil and GW contamiantion sice the spill is contained in the concrete vault. Spill Case will be closed in DEC Spill Database as there in impact on other resources. As per Mr. Lara description : No further investigation is warranted by the Department. "

DEC Memo:	"6/1/21 - Sekhon Dry leak, no petroleum spill. Notifier removing two 20K gallons tanks from site. Called back to get more info, but not able to talk to notifier. VM left to call back. Alexa@easco.com Will get more info from notifier and then case will be transferred to DEC Zhune (day time runner). 6/2/21 - Sekhon Mark Hamilton = managing agent 212-535-2218 (CH Greenthal Management Corp.) Manny Gonzalez = superintendent 212-535-2218 PBS - 2319325 imperialhouse171@gmail.com TTF letter send to RP & notifier. Case assigned to DEC Zhune for follow up. 7/9/21- Zhune- Frank 212-535 2218 Ext 4 7/9/21-Zhune-Frank Durant sent the following email dated July 9, 2021 Attached you will find copies the tank tightness test reports and photo of holes in the top of one of the tanks. The tanks were tested and both found to be leaking in the dry Portion of the tanks (above the level of the oil),there are holes in the top of the tanks and there is no indication of any oil leaks from the tanks. We have one quote and are awaiting two others before we sign to get this done, hopefully I will have resolved by the end of this week and will advise you of when it has approved. Again I do apologize for the length of time it is taking to resolved this issue. Also Manny Gonzalez just forwarded me your email regarding the PBS application and I am glad that was processed and changed on record. 9/20/21-Zhune-Jerry Williams from CC Control Combustion sent the following email. I am writing to keep you informed about this project. We had a site meeting on Thursday 9/16 to formulate a plan to remove both UST's and the surrounding soil. The building's engineer was onsite and will be examining the structural integrity of the vault for the safe removal of the tanks. Once we have his requirements a work plan will be developed and sent to you for approval. 10/27/21-Zhune-Jerry Williams from CC Control Combustion sent the following email Thank you for reaching out about this project. Our Customer is reviewing our quote, to remove the two (2)oil tanks and contaminated soil with their insurance company. Upon approval of our quote we will inform you and keep you appraised about

APARTMENT BUILDING (Continued) **S116156315**

our findings. According to the buildings plans the tanks are in a cement vault under the floor and we believe all the contamination should be contained within the vault 1/12/22-Zhune - Jerry Williams sent the following email We having given authorization to remove the two (2) 20,000 gallon UST's and surrounding soil in cement vault. The work is about to begin on or January 24th."

Remarks: "Dry leak of two tank removal. Capacity for each tank was 20,000 gallons no contents spilled. Tanks failed a dry test."

MCT 1/7/04-Vought-Spill transferred from Vought to Austin. 01/27/04 - Sawyer - Spill transferred from Austin to Tipple. 05/18/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Talked to Liz at phone # (718)605-0425 left message for him. He will call me tomorrow. -QA 06/21/06: Called to Liz regarding information of spill she told that first she will talk to Tony Accardo then she will call me back. -QA 06/23/06: Called Liz and reminded her to send documents regarding spill. -QA 07/20/06: Called Tony Accordo at (718)605-0425 and talked to Ms. Liz she said she will talk to Mr. Accordo regarding spill and call me back. -QA 09/11/06: Called Ms. Kathlyn Fontana (212)486-4488 and left message to call me back regarding information of spill. Called Jerry William (Petrol Combustion Company) at (718)367-9800 Extn. 204. Mr. Jerry William he said they are using oil water seperator to clean the spill. It happened due to leakage of under ground oil storage tank. Cleaning of spill is under process as soon as it will be done Mr. Jerry William will send me the report. -QA 09/18/06: Called Mr. Jerry William they are recovering product at the site. Jerry said it will take a month to clean the spill. -QA 10/13/06: Mr. Steven Seplow called me and said Petrol Combustion is using oil water seperator at the site to clean the spill. -QA 10/19/06: Called Mr. Steven Seplow and left message to call me back regarding status of the spill. -QA 02/16/07: Called Jerry William (Petrol Combustion) at (718)367-9800 extn. 204. He said that they hired Miller Environmental to work at this site. Miller Environmental is working on monthly basis. Groundwater is contaminated. There is product in water. He is using oil seperator to clean the oil. As soon as it will be done Miller Environmental will prepare a report and they will send it to me. -QA 04/05/07: Called Mr. Jerry William and reminded him for Site Status Remediation Report. He said he will talk to Mr. Nick Marrone and he will call me back. -QA 05/31/07: Received summary report from Miller Environmental Group INC. MEG has placed the system on a monthly schedule for system checks in order to ensure proper operation of the recovery system. Currently product level have not been detected in the perforated 15,000 UST and sump pit (basement). The alley recovery well has trace levels of product present. Due to the high viscosity of the fuel oil, product levels continue to slowly recharge in to the recovery areas. Remediation system operation, maintenance, and product monitoring have been conducted on a monthly basis. Once the site is free from product for six months, MEG will submit a closure report for closing the spill. -QA 09/12/07: Called Mr. Jerry William and discussed regarding present status of the spill. He said that they are still doing Remediation at the site because product is still coming. When product will be removed. He will take the groundwater sample and he will send

345 E.73RD ST (Continued) **S105998311**

me the report. -QA 09/14/07: Mr. Jerry William called and said that the status of the spill is same. Product is still coming in water. whenever he will make a report he will send it to me. -QA 10/02/07: Called Mr. Jerry William and discussed regarding present status of the spill. He said that product is still coming in the groundwater. He is waiting to get clean water, He will send another report. -QA 06/26/2008: This spill case was transferred to A. Doronova. - AD 08/11/2008: Called and left a message to J. Williams. AD 08/15/2008: Spoke with J. Williams. His company is subcontructor, who hired Miller Env. to recover a free product at the site. Asked him to submit site status update report. AD Responsible party: Goodstein Management Address: 211 East 46th Street, New York, NY 10017 Contact: Mitch Lasman Pnone: 212-376-8600, ext: 359 11/03/2008: Did not received the report. Called and spoke with Mitch Lasman. Requested to submit all outstanding reports with PDF copies. AD 11/07/2008: Received a phone call from Nicholas Marrone of Miller Env. - project manager (phone: 516-876-7940). Asked him to submit site status update report and old reports. Gave him my email for PDF copies. He promised to submit 2007 report shortly, and asked to issue an official request for the site status update report in order to receive owner's approval for conducting one. Will send an email. Later received an email from N. Marrone of Miller Env. saying: :Hello Ainura, As per our conversation today, please find the summary report for the subject site attached. Thank you, Nicholas M. Marrone Project Manager/Geologist (845)569-1200 DL the report to eDocs. Will review. AD 01/2009: Reviewed the report. It states that on March 6, 2003 No. 6 oil was observed in a sump pit in the basement of the apartment building and the NYSDEC was contacted, and a NYSDEC spill number (02-12023) was assigned. The oil was believed to originate from the underground storage tank (UST) located under the sidewalk near the entrance the building. Once contacted by Controlled Combustion, MEG recommended retrieving end-point samples from the UST. MEG made entry into the UST in order to perform a visual inspection along with sample collection. Samples were collected from each sidewall as well as the base of the tank. Samples were extracted and analyzed utilizing US EPA methods 8021 and 8270. During the sampling procedure, MEG observed a resurgence of product and water back into the UST through the sampling sites. Product and water levels returned to static groundwater levels in the tank (approximately 1ft above tank bottom). MEG observed product thickness of approximately one (1) inch in the tank within the following days. MEG recommended utilizing the perforated tank as a collection point for product recovery. An active remedial system was installed in the UST consisting of a product only belt skimmer specifically designed to collect liquids with high viscosity comparable to the product found in the UST (refer to Figure 3 UST Skimmer Schematic). MEG installed an additional belt skimmer in the sump pit where the original oil, which prompted the recovery efforts. Both belt skimmers collect product and empty into a contained recovery vessel. The recovery vessels are equipped with hazardous location high-level shut-off switches to eliminate overfills. The recovery systems have been in operation since September 2003. The product recovery system was expanded in early December 2003. The construction entailed a constructed sump pit in conjunction with sump pumps and an oil/water separator discharging into the NYCDEP sanitary sewer. Prior to discharge the effluent water was treated through activated carbon. Sump pits and submersible pump locations were chosen to create hydraulic control near the Czech

345 E.73RD ST (Continued) **S105998311**

Embassy (refer to Figure 2 System Layout). Establishing hydraulic control created a boundary in which contamination can not cross to the Czech Embassy property. MEG has placed the systems on a monthly schedule for system checks in order to ensure proper operation of the recovery system. Approximately 8,000 gallons of product/water emulsified mixture has been recovered through Vacuum Enhanced Fluid Recovery efforts at the Czech Embassy excavation (8/03-11/03) and system recovery to date. Currently product levels have not been detected in the perforated 15,000 UST and sump pit (basement). The alley recovery well has trace levels of product present. Due to the high viscosity of the fuel oil, product levels continue to slowly recharge into the recovery areas. Remediation system operation, maintenance, and product monitoring have been conducted on a monthly basis. Once the site is free from product for six (6) months, MEG will submit a closure report to establish the site as a candidate for spill closure. AD 04/30/2010: Received an e-mail from MEG saying: Ms. Doronova: Attached please find an updated summary report for the above referenced spill number and location. Please feel free to contact me if you have any questions or require additional information. Sincerely, Deb Engelhardt Hydrogeologist Geothermal IGSHPA Accredited Installer ID#: 18385-1108 Miller Environmental Group, Inc. (731) 369-4900, ext. 209 DL the report to eDocs. Will review. AD Nicholas Marrone - phone number: (845)569-1200 ext. 104. AD 05/26/2010: Reviewed the Summary Report dated April 30, 2010, submitted by Miller Environmental Group, Inc. (MEG) on behalf of Controlled Combustion, Corp. The report presents a historical summary of free product recovery efforts at the site from September 2003 to the present time, and states that the monitoring data indicate the absence of free product in the out-of-service UST over a period of one year, although LNAPL has continuously been detected in an alleyway sump. MEG recommends closure-in-place of the UST in question. Called and spoke with Mr. Marrone of MEG. There are no any permanent monitoring wells at the site. Groundwater flow direction is unknown. In MEG's 2007 report it states that soil samples were collected from each sidewall of the UST as well as the base of the tank. Five samples were extracted and analyzed utilizing US EPA methods 8021 and 8270. Analytical data for this sampling was not submitted. Requested Mr. Marrone to submit all missing info to DEC. Told him that site investigation is needed to delineate free product plume, and that a work plan for such investigation should be submitted to DEC. AD 06/02/2010: Discussed this site with J. Kolleeny of DEC. It was desided that a letter rejecting UST closure recommendation will be sent to RP with a request to submit an investigation work plan. AD 06/10/2010: Issued a letter to Controlled Combustion, Corp. which states that DEC requires an investigation in the area of the UST and the alleyway sump to characterize and delineate the extent of the free product plume and that a work plan for such an investigation should be prepared and submitted for DEC's review and approval by July 9, 2010. DL the letter to eDocs. AD 06/28/2010: Received an e-mail with an attached work plan. DL the work plan to eDocs. Will review. Reviewed the work plan. It proposes to advance nine (9) soil borings with collection of nine soil sample, and if a GW encountered to collect groundwater samples as well. Installation of permanent monitoring wells is not proposed as it was required in DEC letter. Discussed the work plan with J. Kolleeny of DEC. Revised WP should be submitted. Called and left a message to Mr. Marrone of MEG. AD 06/29/2010: Spoke with Mr. Marrone of MEG

345 E.73RD ST (Continued) **S105998311**

regarding revision of the proposed work plan. It was agreed that MEG will revise location for soil borings and will install monitoring wells as a second stage of the investigation, after they receive analytical results for soil samples. AD 07/01/2010: Received the revised work plan from MEG. Soil boring locations were changed as it was requested by DEC. GW permanent wells installation proposed as a follow up stage of investigation. AD 07/06/2010: Issued an SIWP approval letter to Mr. Williams with a comment regarding soil sampling interval. Dl the pdf copy to eDocs. Changed site priority to P1. AD 07/28/2010: Received the Investigation Summary Report dated July 26, 2010 pertaining to the above-referenced site, submitted by Miller Environmental Group, Inc. (MEG) on behalf of Controlled Combustion, Corp. Will review. AD 07/30/2010: Received a pdf copy of the report. DL to eDocs. AD 08/04/2010: Reviewed the report. It presents a summary of soil and groundwater sampling results and states that the analytical data do not indicate the elevated levels of residual contamination in the area of investigation. Based on this, MEG recommends abandoning out-of-service no. 6 fuel oil UST, and continuing free product recovery on a monthly basis. Discussed the site with J. Kolleeny of DEC. AD 08/09/2010: Issued and sent a letter where the Department approves these recommendations, with the following comment: " Free product monitoring reports should be submitted to DEC on a quarterly basis. DL the letter to eDocs. Changed site priority to P2. AD 12/28/2011: Sent an e-mail to Mr. Marrone of MEG with a request to submit all outstanding monitoring reports to DEC. AD 01/17/2012: Received a letter from MEG with attached report for December 2010 and a CD with five reports: 1) December 2010 QMR; 2) March 2011 QMR; 3) July 2011 QMR; 4) September 2011 QMR; 5) December 2011 QMR. DL all reports to eDocs. Will review. AD 02/09/2012: Reviewed the December 2010 QMR. The report states that MEG made site visits on August 30, September 23, October 27, and November 16, 2010. On the August 30, 2010 visit -product was removed from the alley recovery system and the oil water separator by a vacuum truck. Seventy-five gallons of emulsified No.6 oil was brought to a certified TSDF for proper disposal. Since May 22, 2007, approximately two hundred forty-six (246) gallons of emulsified No. 6 oil has been recovered by the expanded product recovery system. Absorbent pads were changed during the visits in the boiler room sump, but only trace amounts of No. 6 was observed. Currently, the alley recovery well has no product present. Due to the high viscosity of the No. 6 fuel oil, it continues to slowly recharge into the recovery areas. Trace amounts of No. 6 oil is slowly recharging to the boiler room sump. This is being addressed through the placement of absorbent pads during regularly scheduled monthly system operation and maintenance visits. Remediation system operation, maintenance, and product monitoring have been conducted on a monthly basis. MEG recommends continuation of routine monthly visits, product recovery, and quarterly reporting. AD 02/27/2012: Reviewed the March 2011 QMR. The report states that MEG conducted maintenance and operation testing of the remediation system on January 10, February 22, and March 10, 2011. The last time product was removed from the alley recovery system and the oil water separator by a vacuum truck was the August 30, 2010 visit. Seventy-five (75) gallons of emulsified No. 6 oil was brought to a certified TSDF for proper disposal. Since May 22, 2007, approximately two hundred forty-six (246) gallons of emulsified No. 6 oil has been recovered by the expanded product recovery system. On January 10, 2011, no product was present in the

345 E.73RD ST (Continued) **S105998311**

alley recovery well, and absorbent pads were changed during the visits in the boiler room sump because a trace amount of No. 6 was observed. On February 22, 2011, no product was present in the alley recovery well, but the skimmer was not operational. The skimmer belt was removed and the weight was reset, and the recovery pump was shut down. No product was present in the boiler room sump pit during this visit. On March 10, 2011, no product was present in the alley recovery well, and absorbent pads were changed during the visits in the boiler room sump because a trace amount of No. 6 was observed. During this quarter, the alley recovery well had no product present consistently. No. 6 oil continues to slowly recharge into the recovery areas. Trace amounts of No. 6 oil is slowly recharging to the boiler room sump. MEG will continue routine monthly visits, product recovery, and quarterly reporting to DEC. AD 03/21/2012: Reviewed the July 2011 QMR. The report states that MEG visited the site on May 9, and July 13, 2011. On May 9, 2011, no product was present in the alley recovery well, and absorbent pads were changed during the visits in the boiler room sump because a trace amount of No. 6 was observed. On this date, the product drum was approximately 1/3 full. On July 13, 2011, trace amount of No. 6 oil was present in the alley recovery well, and the skimmer was operational. On this date, the product drum was approximately 1/3 full. Absorbent pads were changed during the visit in the boiler room sump because a trace amount of No. 6 was observed. During this quarter, the alley recovery well had no product present, except for a trace amount observed on July 13, 2011. Due to the high viscosity, No.6 oil continues to slowly recharge into the recovery areas. Trace amounts of No. 6 oil is slowly recharging to the boiler room sump. This is being addressed through the placement of absorbent pads during scheduled system operation and maintenance visits. MEG will continue remediation system operation, maintenance, and product monitoring on a monthly basis. AD 04/11/2012: Reviewed the September 2011 QMR. The report states that MEG visited the site on August 11, 2011 and September 12, 2011. On August 11, 2011, no product was present in the alley recovery well, and absorbent pads were changed during the visit in the boiler room sump because a trace amount of No. 6 was observed. On this date, the product drum was approximately 1/3 full. On September 12, 2011, no No. 6 oil was present in the alley recovery well, and the skimmer was operational. On this date, the product drum was approximately 1/2 full. Absorbent pads were changed during the visit in the boiler room sump because a trace amount of No. 6 was observed. During this quarter, the alley recovery well had no product present. MEG recommends to continue routine monthly visits and product recovery, and quarterly reporting to DEC. AD 04/23/2012: Reviewed the December 2011 QMR. The report states that MEG made remediation maintenance visits on October 14, 2011 and December 20, 2011. Since May 22, 2007, approximately two hundred forty-six (246) gallons of No. 6 oil has been recovered by the expanded product recovery system. On October 14, 2011, trace amount No. 6 oil was present in the alley recovery well, and absorbent pads were changed during the visit in the boiler room sump because a trace amount of No. 6 was observed. On December 20, 2011, trace amount of No. 6 oil was present in the alley recovery well, and the skimmer was operational. Absorbent pads were changed during the visit in the boiler room sump because thick No. 6 was observed. During this site visit, oil has accumulated in the sump that is located in the boiler room. Oil has also appeared in the elevator shaft pit. MEG will continue to monitor the site monthly to

345 E.73RD ST (Continued) **S105998311**

see if oil continues to seep into the sump and elevator pits. If the oil seepage continues, then an alternative remedial strategy will be proposed and implemented. Continuation of routine visits, product recovery, and quarterly reporting is recommended. AD 07/11/2012: Called and left a message to N. Marrone of MEG regarding reports submission. AD 07/16/2012: Received 1st quarter 2012 monitoring report. DL to eDocs. Will review. AD 08/23/2012: Reviewed the report. It states that MEG visited the site on February 29, 2012 and March 28, 2012. The last time product was removed from the alley recovery system and the oil water separator by a vacuum truck was the August 30, 2010 visit. Seventy-five (75) gallons of emulsified No. 6 oil was brought to a certified TSDF for proper disposal. Since May 22, 2007, approximately two hundred forty-six (246) gallons of emulsified No. 6 oil has been recovered by the expanded product recovery system. On February 29, 2012, MEG provided a crew to clean the boiler room sump and elevator shaft pit. Approximately 2 yards of oily absorbents/debris were taken offsite for disposal. On March 28, 2012, #6 oil was absent in the alley recovery well and the boiler room sump. On this date, the product drum was approximately 2/3 full. During this quarter, the alley recovery well was absent of No. 6 oil. Because oil had accumulated in the sump that is located in the boiler room and oil had also appeared in the elevator shaft pit, MEG sent a crew on February 29, 2012 to remove accumulated oil. Oil soaked absorbent pads were collected along with other spent absorbents that were on-site were properly disposed. MEG will continue to monitor the site monthly to observe if oil to continues to seep into the recovery points. Continuation of routine visits, product recovery, and quarterly reporting is recommended. AD 09/27/2012: Received 2nd and 3rd quarter 2012 monitoring reports. DL to eDocs. Will review. AD 10/09/2012: Reviewed the 2nd quarter 2012 report. It states that MEG completed remediation maintenance visits on May 25 and June 21, 2012. The last time product was removed from the alley recovery system and the oil water separator by a vacuum truck was the August 30, 2010 visit. Seventy-five (75) gallons of emulsified No. 6 oil was brought to a certified TSDF for proper disposal. Since May 22, 2007, approximately two hundred forty-six (246) gallons of emulsified No. 6 oil has been recovered by the expanded product recovery system. On May 25, 2012 MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality and reset to 15 minutes per day. The product drum was empty. On June 21, 2012 MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality, the skimmer belt was cleaned. The absorbent pads within the boiler pit were changed. During this quarter, the alley recovery well was absent of No. 6 oil. MEG will continue to monitor the site monthly to observe if oil continues to seep into the recovery points. AD 10/22/2012: Reviewed the 3rd quarter 2012 report. It states that MEG completed remediation maintenance visits on August 1, August 16 and September 17, 2012. On August 1, 2012: MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality and reset to 15 minutes per day. The product drum was 2/3 full. The absorbents were changed within the boiler pit. On August 21, 2012: MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality. The product drum was 2/3 full. The absorbent pads within the boiler pit were changed. September 17, 2012: MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality. The

345 E.73RD ST (Continued) **S105998311**

product drum was 2/3 full. The absorbent pads within the boiler pit were changed. The belt skimmer and tray were cleaned. During this quarter, No. 6 oil was absent in the alley recovery well. MEG will continue to monitor the site monthly to observe if oil to continues to seep into the recovery points. Continuation of routine visits, product recovery, and quarterly reporting is recommended. AD 01/28/2013: Received 4th QMR for 2012. DL the report to eDocs. Will review. AD 02/25/2013: Reviewed the report. It states that on October 26, 2012: MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality and reset to 15 minutes per day. The product drum was 2/3 full. The absorbents were changed within the boiler pit. November 2012: MEG states that due to the resources required (personnel and equipment) in support of the NYSDEC s emergency response activities related to Super Storm Sandy; MEG was unable to conduct any field activities at the site during the month of November. December 28, 2012: MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality. The product drum was 2/3 full. The absorbent pads within the boiler pit were changed. The belt skimmer and tray were cleaned. CONCLUSIONS/RECOMMENDATIONS During this quarter, the alley recovery well was absent of No. 6 oil. Due to the high viscosity of the No. 6 fuel oil, No. 6 oil continues to slowly recharge into the recovery areas. MEG will continue to monitor the site monthly to observe if oil to continues to seep into the recovery points. Continuation of routine visits, product recovery, and quarterly reporting is recommended by MEG. AD 04/17/2013: Received the following e-mail from R. Ferguson: Ainura, Attached is the 1st QTR 2013 report for 345 East 73rd St., NY, NY If you have any questions please give me a call at your convenience. Rob Sincerely, Robert J. Ferguson Project Manager / Sr. Hydrogeologist DL the report to eDocs. Will review. AD 06/03/2013: Reviewed the report. It states that MEG visited the site 3 times during the reporting period. 1. On January 22, 2013: MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality and reset to 15 minutes per day. The product drum was 2/3 full. The absorbents were changed within the boiler pit. 2. On February 27, 2013: MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality and reset to 15 minutes per day. The product drum was 2/3 full. No additional product within the separator. The absorbents were changed within the boiler pit. 3. March 18, 2013: MEG conducted monthly maintenance; no product was within the skimmer pit. The skimmer was tested for functionality and reset to 15 minutes per day. The product drum was 2/3 full. No additional product within the separator. The absorbents were changed within the boiler pit. CONCLUSIONS/RECOMMENDATIONS: During this quarter, the alley recovery well was absent of No. 6 oil. Due to the high viscosity of the No. 6 fuel oil, No. 6 oil continues to slowly recharge into the recovery areas. MEG will continue to monitor the site monthly to observe if oil to continues to seep into the recovery points. Continuation of routine visits, product recovery, and quarterly reporting is recommended. AD 07/03/2013: Received the following e-mail from R. Ferguson of MEG: Ainura, Attached is the 2nd Quarter 2013 report for Spill No. 0212023 345 East 73rd St., NY, NY. If you have any questions please contact me at your convenience. Rob Sincerely, Robert J. Ferguson Project Manager / Sr. Hydrogeologist Miller Environmental Group, Inc. DL the report to eDocs. Will review. AD 08/14/2013: Reviewed the report. It states that MEG visited the

345 E.73RD ST (Continued) **S105998311**

site 3 times during the 2nd quarter 2013 reporting period. 1. On April 24, 2013: MEG conducted monthly maintenance; the belt was off the roller and had gotten entangled. MEG removed, cleaned and reset the product belt. No product was within the skimmer pit. The product drum was 3/4 full. The absorbents were changed within the boiler pit. 2. On May 21, 2013: MEG conducted monthly maintenance; no product was within the skimmer pit. The product drum was 3/4 full. No additional product within the separator. The absorbents were changed within the boiler pit. 3. On June 20, 2013: MEG conducted monthly maintenance; no product was within the skimmer pit. The product drum was 3/4 full. No additional product within the separator. The absorbents were changed within the boiler pit. Some product was within the alley pit. CONCLUSIONS: During this quarter, the alley recovery well showed No. 6 oil during the June 2013 site visit. Due to the high viscosity of the No. 6 fuel oil, No. 6 oil continues to slowly recharge into the recovery areas. MEG will continue to monitor the site monthly to observe if oil to continues to seep into the recovery points. Continuation of routine visits, product recovery, and quarterly reporting is recommended. AD 02/21/2014: Received the following e-mail from Mr. ferguson: Ainura, 4th QTR 2013 status report attached. Robert Sincerely, Robert J. Ferguson Project Manager / Sr. Hydrogeologist Miller Environmental Group, Inc. 1300 Shames Dr. Westbury, NY 11590 Office: 516-876-7940 ext. 311 Fax: 516-876-7946 Cell: 631-603-6683 e-Mail: rferguson@millerenv.com DL the report to eDocs. Will review. AD 03/24/2014: Reviewed the report. It states that MEG conducted maintenance and operation testing of the remediation system and monitoring at the Site from August to December 2013. MEG completed remediation maintenance visits on August 1, August 16 and September 17, 2012. The last time product was removed from the alley recovery system and the oil water separator by a vacuum truck was the August 30, 2010 visit. Seventy-five (75) gallons of emulsified No. 6 oil was removed off-site for proper disposal. Since May 22, 2007, approximately two hundred forty-six (246) gallons of emulsified No. 6 oil has been recovered by the expanded product recovery system. On October 4, 2013: MEG conducted monthly maintenance. No product was detected within the skimmer pit. The product drum had 7 of product. The absorbents were changed within the boiler pit. On November 1, 2013: MEG conducted monthly maintenance; no product was noted within the skimmer pit. The product drum was less than 1/8 full. No additional product within the separator. The absorbents were changed within the boiler pit. Car had backed into and dented the product drum near the separator. On December 2, 2013: MEG conducted monthly maintenance; belt skimmer came off roller, removed, cleaned and reset. No product was within the skimmer pit. The product drum was approximately 1/8 full. No additional product within the separator. The absorbents were changed within the boiler pit. Conclusions: During this quarter, the alley recovery well showed no No. 6 oil. Due to the high viscosity of the No. 6 fuel oil, No. 6 oil continues to slowly recharge into the recovery areas. There has been a steady increase in the amount of product within the boiler room sump. MEG recommends that the belt skimmer be relocated to the boiler room sump to capture the product. MEG will continue to monitor the site monthly to observe if oil to continues to seep into the recovery points. Continuation of routine visits, product recovery, and quarterly reporting is recommended. AD 07/23/2015: Received the following e-mail from Mr. Ferguson: Morning Ainura, Attached is the 2nd QTR QMR for 345 East 73rd St., NY, NY no product at site, if we

345 E.73RD ST (Continued) **S105998311**

continue to get no product over the next quarter I will request closure in October. Thanks and as always let me know if you have any questions or comments. Robert Sincerely, Robert J. Ferguson, CPG Project Manager / Sr. Hydrogeologist Miller Environmental Group, Inc. 1300 Shames Dr. Westbury, NY 11590 Will review. AD 08/20/2015: Reviewed the report. It states that MEG conducts maintenance and operation testing of the remediation system and monitoring at the Site. MEG completed remediation maintenance visits on May 2 and June 3, 2015. No monitoring event was conducted in April 2015. On May 2, 2015 MEG conducted monthly maintenance. No product was within the Alley Pit or within the skimmer pit. The belt skimmer drum was approximately 1/2 full. The belt skimmer and tray were cleaned and reset. The absorbents were changed within the boiler pit. The separator system was dismantled. On June 3, 2015: MEG conducted monthly maintenance. No product was within the Alley Pit or within the skimmer pit. The belt skimmer drum was approximately 1/2 full (no additional product). Conclusions: During this quarter, the alley recovery well showed no No. 6 oil. MEG will continue to monitor the site monthly to observe if oil to continues to seep into the recovery points. If no product is encountered over the next few months, MEG will make a recommendation to close the spill. AD 10/12/2015: Received the following e-mail from Mr. Ferguson: Ainura, Attached is the quarterly monitoring report for 345 East 73rd St., NY, NY. There hasn t been any product at the site in over a year, so I am requesting closure in the QMR. Let me know if you have any questions or comments. Thanks a bunch, Robert Sincerely, Robert J. Ferguson, CPG Project Manager / Sr. Hydrogeologist Miller Environmental Group, Inc. 1300 Shames Dr. Westbury, NY 11590 Will review. AD 11/02/2015: Reviewed the report. It states that the site is located at the east side of the borough of Manhattan. The surrounding properties include residential apartments/co-ops and local commercial retail. The East River is approximately 1,675 east of the Site. There no septic leach fields or private/public drinking well within 2,000 of the Site. Residents of the borough of Manhattan have their sewage connected to the New York City NYCDEP municipal sewer system. Drinking water is also provided by NYCDEP from several upstate reservoirs. There is one (1) school in the area, Eleanor Roosevelt High School located at 411 East 76th Street, New York, NY. It is approximately 850 northeast of the Site. The following properties border the 345 East 73rd Street: North-340 East 74 Street (residential apartments/co-ops); East: 1361 and 1363 1st Avenue (residential apartments/co-ops); South: 326-328, 330, 332, and 336 East 73rd Street (residential apartments/co-ops); and West: 325 East 73rd Street (Czech Republic Embassy). There is a shallow bedrock underneath the site, and GW was encountered in only one soil boring out of nine, during the site investigation. Analysis of the GW sample from that boring indicated no elevated levels of VOCs. MEG believes that no sensitive receptor will be affected by this spill. Product monitoring and recovery: MEG conducts maintenance and operation testing of the remediation system and monitoring at the Site. MEG completed remediation maintenance visits on July 23, August 21 and October 1, 2015. On July 27, 2015 MEG conducted monthly maintenance. No product was found within the Alley Pit or within the skimmer pit. The belt skimmer drum was approximately 1/2 full (no additional product). On August 21, 2015: MEG conducted monthly maintenance. No product was detected within the Alley Pit or within the skimmer pit. The belt skimmer drum was approximately 1/2 full (no additional product). October 1, 2015: MEG conducted monthly

345 E.73RD ST (Continued) **S105998311**

maintenance. No product was detected within the Alley Pit or within the skimmer pit. The belt skimmer drum was approximately 1/2 full (no additional product). Due to capital improvements at the subject property, MEG has temporarily removed the belt skimmer. Conclusions: During this quarter, the alley recovery well showed no No.6 fuel oil. No significant product has been noticed or recovered at the site over the period of past year. Based on this data, MEG requests that the assigned spill be closed and that a No Further Action letter be issued for the site. Will discuss the request for spill closure with J. Kolleeny of DEC. AD 11/05/2015: Discussed the closure request with J. Kolleeny. Based on the historical data, which indicates successful removal of free product, and taking into consideration site specific conditions, such as: shallow bedrock and depth to regional GW, and ND results for perched GW, it was decided to approve the spill closure request. AD"

Remarks: "eastman contacted to clean up spill - it is in the boiler pit"

DEC Memo:	"PBS# 2-310530 (Two (2) 4,500 gallon #4 fuel AST removed. One (1) 15,000 #6 fuel UST closed in place). UST was closed on 08/27/2010. Old closed spill #9510345 indicated that groundwater was contaminated with petroleum leaking through the walls. Received call from management. Spill found in two sumps. Looks like #6 fuel oil. Will devise work plan this week for investigation into the cause. The apartment is currently running on gas. PVE is the engineering consultants. 10/9/19- DEC Piper emailed Erik of PVE for update. Report in DEC Docs. 11/14/19- DEC Piper - Spill project transferred to MD Hoque as per Vadim Brevdo. 12/12/2019-M.Hoque: A subsurface investigation report and a supplemental subsurface investigation report received from the previous DEC PM Ryan Piper.(MDH) 6/12/2020-M.Hoque: An email sent to Erik of PVE and requested to submit a site update report.(MDH) 7/10/2020-M.Hoque: The below email received from Erik of PVE. From: Erik Draijer Fri 7/10/2020 4:00 PM To: Hoque, MD S (DEC) cc: Brevdo, Vadim (DEC) Hi MD S, Yes we were retained for this remedial work. We attempted to install a handful of monitoring wells and recovery wells which we achieved, however no free product was identified during our investigative efforts, yet free product was still appearing in the ejector pit and sump pit on occasion. We decided the best method for extraction were the only places we could locate the product, and that was ejector and sump pits. We designed a schedule to inspect the property every 2 weeks, as well as the superintendent reporting to us if any product was encountered. We conducted the vacuum extraction events until the free product was minimalized, in which we relied on the superintendent to administer sorbent pads to retrieve any small amount (less than quart of oil, approximately). This might be easier to walkthrough over the phone in more detail let me know if you d like to have a call next week. My apologies it took so long to return the email. COVID and an office move has broken the stride for the past few weeks. Best regards, Erik J. Draijer, QEP Assistant Project Manager, Environmental Division WE VE MOVED PLEASE NOTE NEW ADDRESS New York City: 25 W. 39th Street, 12th Floor , New York, NY 10018 Hudson Valley: 48 Springside Avenue, Poughkeepsie, NY 12603 Mobile: 973.975.7135 NYC Phone: 646.602.4999 HV Phone: 845.454.2544 www.pve-llc.com 7/17/2020-M.Hoque: Spoke to Erik and discussed the status of project. He told that the Remedial work has done and no product found in the site wells. He will send a remedial action report with closure request soon. (MDH) 8/12/2020-M.Hoque: A RAR received and is being reviewed.(MDH) 9/2/2020-M.Hoque: September 2, 2020 Re: Rationale for closure of the spill case no. 1710258 Residential Building at 345 East 73rd Street, Manhattan (Spill No.

PUMP (Continued) **S121983061**

1710258) This spill resulted from a release of No. 6 oil from the on-site decommissioned and abandoned 15,000-gallon UST, located beneath the sidewalk of the residential building. An unknown quantity of oil and water mixture were identified in the boiler room sump pit. Oil stained concrete surfaces in the ejector pit connected to the laundry system and chiller, located in the machine room adjacent to the boiler room. In February and June 2018, a subsurface investigation and a supplemental subsurface investigation were conducted at the property. Soil borings and monitoring wells were installed and sampled. VOCs and SVOCs were detected in soil and groundwater samples below standards. No free product was encountered in any of the monitoring wells during the investigations. The remediation included three (3) clean-out events of the sump pit and ejector pit in 2018, removing of 1,374 gallons of oily water with a vacuum truck. From June 28, 2018 through June 29, 2020, site inspections were conducted which included visual observations of the ejector pit and a sump, as well as gauging of monitoring/recovery wells. Site inspection did not reveal any additional product or oily water in the sump or ejector pit. Absorbent pads were removed from the pit, placed in 55-gallon drums on site, and subsequently disposed at a regulated disposal facility. On June 12, 2020, DEC contacted the RP s consultant, PVE engineering, and requested submission of the site update report. On August 12, 2020, PVE Engineering submitted a remedial action report (RAR) summarizing the investigations and remedial action activities. From February through June 2020, no product was observed in the sump and ejector pit. Based on the lack of free product observed in on-site monitoring wells, sump pit, and ejector pit, PVE requested for closure of the spill case. The site poses no known threat to human health and the environment. The Department reviewed the remedial action report including spill closure report, spill history, site history and evaluated merits of PVE recommendation for closing the spill case and concurred that the closure of this spill case is appropriate at this time. Spill Case is closed effective September 2, 2020. (MDH "

Remarks: "unknown equipment failure unknown amount clean up is pending"

DEC Memo:	"1/18/11-Vought-Primary off-hours responder. Called Michelle Ebeso (Ph:(646) 467-2289) and left message to return call. Vought spoke to Ebeso and she contacted building management company (Meliss Greenberg) and Greenberg was suggested to call oil company. No response by Approved and as such onsite contractor cleaned spill. Traffic cone placed over fill port and cap to fill port appears to be

APT COMPLEX & BUSINESS (Continued) **S110751655**

placed onsite. No onsite witnesses of Approved delivery. Area affected including concrete and wood storage and no impact to soil. Spill ran about a five foot plume from the fill port. Southwest corner of 83rd and 2nd Avenue. Ebeso noted that imapacted snow still remains onsite and further cleanup is needed. Vought called Approved Oil ((718) 238-1050) and spoke to Bob and informed him of spill and possible violations for non-notification of spill. Bob noted that delivery was made on sunday 1/16 and that he would send crew immediately to site and return call to Vought. Vought also provided contact info for Ebeso. Vought called Ebeso and informed her that Bob would be contacting her. 1/19/11-Vought-Received message from Ebeso who noted that Approved did arrive and site and complete cleanup via removal of impacted snow and absorbent pads. Ebeso okayed spill closure and had no further concerns. Spill closed by Vought."

Remarks: "overfill from building fill port leaked into construction site- building owner trying to contact oil company for cleanup - no cleanup noted - construction company trying to contain"

DEC Memo:	"Off Hours - no response visit was made by Ahmed, therefore case assigned to Patel. 11/20/09-Hiralkumar Patel. 1:54 PM:- left message for Karen. 1:56 PM:- left message for Robert Chou. 11/23/09-Hiralkumar Patel. 10:17 AM:- spoke with Robert Chou. he mentioned that he doesn't know anything about his property or spill. he asked to contact Petro. 10:21 AM:- left message for Michael Natali at Petro. 11/24/09-Hiralkumar Patle. 9:38 AM:- spoke with Mike at Petro. Mike mentioned that they installed new line. Mike asked to contact Rainer Over, supervisor at Petro who handle this site. its 550 gal tank at the site. 9:41 AM:- left message for Rainer. Rainer Ober Supervisor Petro Ph. (718) 333-8855 email: rober@petroheat.com as per ACRIS, property owner is: Katherine Chou c/o Hiyee Realty Corp. 408 8th Avenue, Suite 206 New York, NY 10001 PH. (212) 629-5890 9:52 AM:- tried to contact Katherine, but operator connected to Robert. Robert mentioned that Katherine is out of country. as per Robert, building is vacant (total 20 units) and old line was running aboveground. site visit scheduled at 9 AM on 11/30/09. 11:51 AM:- received call from Rainer. Petro received service call regarding no heat in building on 11/04/09 and during inspection found that tanks were empty. found stains on surface nearby boiler. site has two 275 gal ASTs. according to Petro's delivery record, last oil delivery was 113 gal on 10/24/09. as per Rainer, they filled up tanks (means tanks had at least 500 gal oil in it). and tanks found empty after 10 days. Rainer also received complaint of no hot water on 06/26/09 and tanks were empty that time also. record: date 05/06/09----delivered 307 gal 06/26/09----no hot water complaint 06/26/09----delivered 500 gal 10/01/09----delivered 371 gal 10/24/09----delivered 113 gal 11/04/09----no heat complaint asked Rainer to send copy of delivery record and service call for the perior of Oct. 2008 to Nov. 2009. 12:56 PM:- received copy of delivery and service call record. 12/01/09-Hiralkumar Patel. site visit was cancelled. 10:05 AM:- left message for Mr. Chou to re-schedule a site visit. 10:52 AM:- received call from Ming (Cell: 516-353-1658). he will meet at 10 AM tomorrow.

PRIVATE DWELLING (Continued) **S110044801**

12/02/09-Hiralkumar Patel. 10:00 AM:- visited site. met Ming. inspected boiler/tank room. new supply line runs above basement floor and wrapped in concrete. Ming mentioned that old supply line (which was found leaking recently) was running in same location as new line. found old pipe nearby boiler. Ming mentioned that it was old supply line before they baught building about 20 years ago. based on observations during the site visit, case closed."

Remarks: "oil line in basement leaked oil line is underground, unk amount leaked, leaked has been stopped, customer responsible for contacting contractor."

DEC Memo: "TTF Letter sent to: Mr. Ken Bonal Winoker Realty 462 7th Ave Suite 12A NY NY 10018 207 E 84th St.(a/k/a 1491 Third Ave), Manhattan, NY 05/29/08-Vought-Received fax from Winoker Realty (Francine West Ph:212-519-2026) with attached report from Petroleum Tank Cleaners (718-624-4842). Although the report indicates a Ulllage (Dry) portion leak , no petroleum release is evidenced . Vought called PTC and tank was cut open and cleaned. Vought spoke to Mark and tank was opened and epoxy closed and retested and tank failed test. Fill and vent run overhead. Fill line has slight leak and vent line in poor condition. Tank is wrapped 1080-gallon. Proposal for replace vent and fill and retest system. Vought called Francine West and left message that spill will not be closed until passing system test is received and repairs are made. 6/11/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin and Vought transfer to Section A. 7/2/10 - Raphael Ketani. I reviewed the 9/12/08 letter report from Ms. West of Winoker Realty (212) 764-7666. The report contained a passing fuel system test report and invoices for the repair work. As the required repairs were made to the fuel system, and as the system passed the tightness test, the present risk of another fuel leak is very low or non-existent. Therefore, there is little or no threat to the public or the environment. Therefore, I am closing the spill case."
Remarks: "DRY PORTION LEAK"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 02/20/2002 A TANK FAILURE OCCURED AT 210 EAST 84TH STREET SPILL #0110703. VAPORS APPARENTLY MIGRATED THROUGH THE SEWER AND ENTERED 207 EAST 84TH STREET THROUGH AN IMPROPERLY SEATED CHECK VALVE IN THE 207 BUILDING'S SEWER VENT. THE SOURCE OF THE FUEL OIL SMELL WAS IDENTIFIED WHEN THE SEWER MANHOLE COVER IN THE STREET IN FRONT OF 207 WAS LIFTED REVEALING HEAVY PETROLEUM ODORS. THE MOST LIKELY SOURCE OF THIS FUEL OIL SMELL WAS 210'S TANK FAILURE AND SUBSEQUENT RELEASE OF OIL INTO THE SEWER. PETROLEUM TANK CLEANERS INC. WAS CALLED, AND THE #2 FUEL OIL TANK IN 270 E 84TH STREET WAS TESTED. THERE WAS NO APPARENT LEAKAGE AT THE TIME OF TESTING, THUS FURTHER INDICATING THE 210 BUILDING'S TANK FAILURE AS THE MOST LIKELY ODOR SOURCE. "

DEC Memo:	"2/23/15: Mahat DEC Mahat contacted Mr. Quintanna (All Boro @ 347.397.8298) inquiring more information about the spill case. He mentioned that the building went under conversion to # 4 ecently. The boiler inside the boiler room was overfilled by the oil and bleed it out once it was not able to hold more. As per All Boro, estimated 30 gallomn of oil spilled on the floor. He confirmed that the spill was on the concrete with epoxy paint. DEC is waiting for a clean up report. 8/3/15: Mahat DEC Mahat contacted Mr. Quintana and confirmed that the spill has been cleaned. No vapor/odor in the site. No other resources were impacted as the floor was epoxy painted. The Department does not warrant any further investigation on the site. Spill case will be closed in DEC Spill database based on the available information. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE SHAW FEELS THE FILL LINE NEEDS TO BE REPLACED. Albany assignment: adebong 7/21/05 placed a call to this facility but could not get intouch with the owner. 11/10/05 sent out a letter to facility address. 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Ketani) for review and closure - end 10/19/06 - Raphael Ketani. A spill of 1 pint hit the floor, though 1 gal. is listed as the amount spilled. Petro Oil (718)628-3314 and S&B Realty (718) 879-3328 (non-working number) were involved in the spill. The line needs to be replaced. I tried calling Petro, but no one picks up. The owner is Betty Weg, according to the NYC Property Tax records and Property Shark. Notices go to: 1433 1 Ave., NY, 10021-3328. Bills go to: 9732 63 Drive, Flushing, 11374-2242. 10/20/06 - Raphael Ketani. I tried calling Petro again, but at a different 628 number. I could only leave a voice mail. Kenny Beck of Petro called me back. He said that Petro didn't have records going back to the time of the spill. He said he had no information to give me. As the spill was very small and 8 1/2 years have elapsed since the date of the spill, I am closing the spill case administratively."
Remarks:	"caller states 1 pint spill to concrete - spill cleaned on top but may require additional cleaning"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 152032: Luis A Jusino # 40133, Trouble Shooter Hv, Emergency Dept Was sent to 400 E 77St in V-5358, on a smoking complaint. Upon arival, he found approx 5 gallons of oil on top of approx. 50 gallons of water He also states that the reason vault was smoking was due to knees under water. Sump pump found UN plugged. Lab Sequence Number: 04-01013-001 TOTAL PCB 39 ppm Lab Sequence Number: 04-01014-001 Analysis indicates the presence of a substance similar to a dielectric fluid. J. Ligouri # 140 I&A supervisor reported that the structure was drained of 600 gallons of water/oil mixture. He then could tell that the oil was coming from the transformer. He condemned the transformer due to a bottom leak. Update as of 5:30 hrs 04/15/04 Clean up complete reports O.S C.Pearson 50613 flush truk removed stone, mud, and water. Structure was washed twice with slix, and power washed."
Remarks:	"Approx 5 gals of transformer oil on 50 gal of water contained in the transformer vault. smoke was present, no fire,no injury, no private property. "

DEC Memo:	"5/19/05. J.Krimgold spoke to Mark (PTC). They cleaned nth tank 2 days ago, but the owner did not want to test it. Delivery (2500 gal of #6 oil)was made yesterday and the gage was checked before and after delivery. The gage showed 33 and today only 27.5 meaning that ~500 gal was not accounted for. Tank will be pumped out and tested. CSL letter has been sent. 5/23/05. According to Mark (PTC) the tank was pumped out on 5/19/05. No oil was coming back from outside the tank. Owner want to replace/repair the tank, but refused to test the tank. YK. Info: Neil Wichnia - Building Manager @ Maxwell-Kates, Inc. 9 East 38th Street, 6th Floor NY, NY 140016 10/17/05. J.Krimgold reviewed the letter report submitted by Eastmond & Sons dated 9/14/05. Based on the investigation results presented in the letter and previous investigation, no contamination was found around the UST. Moreever, it appears that spill was reported due to and erroneous reading to the tank gage. NFA letter. "

According to PBS#2-147591, there is a 5,000 gallon #6 fuel oil underground tank. There are also 3 additional spill reports for this location. Spill #9912122 received 01/20/2000 was closed after defective gauge which caused spill was repaired. Spill #0502031 received on 05/19/2005 was closed after no contamination was found and investigation appeared to indicate

TANK TTF (Continued) **S107489072**

erroneous reading to the tank gage . Spill #0509514 received on 11/08/2005 was closed after analytic report indicated there was no soil contamination. 8/06/2015: Rashad No documents found in D2. Owner information according to PBS report: 311/71 Owners Corporation 311 East 71 Street New York, NY 10021 212-684-8282 ACRIS: 31171 Owners Corp C/O Maxwell-Kates INC 9 East 38th Street New York NY 10016 8/11/2015: Rashad Sent email to ptciam@aol.com: After reviewing the failed tank test for 311 East 71st Street spill#1203017 dated 6/26/2012, I would like to request the following information: Copy of failed tank test report. Test results for supply/return and vent/fill lines. Current property owner and contact information. Marisol sent email stating scanner is not working, she will be faxing the information. 8/24/2015: Rashad Mark sent email: Omar...we were a sub on this job for Marlande Heating (718) 993-4351 I do not know who the building owner is, but after we tested that tank we never did go back...if I remember correctly the top of the tank was in really bad shape, the manhole attachment rotted off and not a candidate for repair...I don't know what they did after our involvement. http://www.marlandeheating.com/contact.htm 8/31/2015: Rashad Email sent to Frank from Marlande Heating: After reviewing the spill report for 311 East 71st Street, New York NY spill#1203017 dated 6/26/2012, I would like to request the following information: Failed tank test report. Test results for supply/return and vent/fill lines. Property owner information. 9/1/2015: Rashad - Frank emailed back on 8/31/2015: Pursuant to your email below, Marlande Heating is the service provider for 311 East 71st Street. In checking our records, on or about that time period Petroleum Tank Cleaners was our subcontractor who cleaned the oil tank. Any report of a spill would have been made by them and a remediation would have been there responsibility as Petroleum Tank Cleaners were contracted directly by the building. I am not certain if Petroleum completed the work at that time or if the building selected another contractor. Unfortunately I do not have any further information for you. 9/4/2015: Rashad Sending TTF letter to both addresses listed above. Documents uploaded to D2. 9/16/2015: Rashad Emailed Neil Wishnia: nwishnia@maxwellkates.com: I am currently reviewing an old spill case for 311 East 71st Street, New York NY 10021 dated 6/26/2012 spill#1203017 where a tank test failure was reported. I am trying to locate any information in regards to this tank test failure including reports or any repairs made. Any information would be appreciated. Neil responded Thank you for reaching out to me. I am in the process of following up with a representative of the oil tank company that worked on the case back in 2012 and expect that he or I will be back in touch with you very shortly to resolve this issue. This matter is definitely being prioritized. Responded back to Neil: I appreciate the update, please keep me informed as new information is available. Due to the age of the case I understand it will take some time to recover information. 9/28/2015: Rashad Received email from Neil Rashad, please see attached Final Report from the Oil Tank Company, A.L. Eastmond and Sons (2 pgs.) Kindly confirm receipt at your earliest convenience. The email contained a passing tank test dated July 30th 2012, the test also indicated a #2 fuel oil as product type. File has been uploaded to D2. 9/30/2015: Rashad Sent email to Neil: Do you have information on why the initial tank test failed or what repairs were made to produce a passing test? Also was any soil contamination found?. Neil responded: Rashad, I will follow-up with the contractor to try and obtain that information as quickly as

TANK TTF (Continued) **S107489072**

possible. Received email from Neil Tomasetti of Eastmond & Sons: The tank test failure was due to a bad vent line. The fuel oil tank is buried below an elevated shrubbery box in the front of the building. The super waters the plants regularly. When the vent pipe was replaced all pipes in the area were replaced sleeved in water tight 4 flex pipe for protection. There was no contamination or product leakage 10/1/2015: Rashad Spoke to Tim, due to passing tank test as well as repair of vent line and no soil contamination as specified by Eastmond & Sons the case will be closed. Sent email to Neil to verify address: I will be sending out a spill closure letter for 311 East 71st Street. The address I have on file is 9 East 38th Street NY, NY 10016, is this correct or would you like me to send it to an alternate address? Neil confirmed address and spill closure letter uploaded to D2 and sent to owner."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 1/09/2002-VOUGHT-1250 gallon UST discovered during excavation work at boathouse. Source of spill was feed and return lines. George Parker (Max-Tec Construction) was environmental consultant 516-628-0000. Owner of concession stand at boathouse is Dean Poll (responsbile party). 1000 gallons of oily sludge removed from tank by Milro Associates. Tank excavated and 92.32 tons of soil removed. Sidewalls initially sampled with a PID. Three samples sent in for analyses. Highest concentrations still present were under sewer line to the west eventhough these were still below TAGM. No bottom sample taken due to concrete cradle. Site visit initially by Sangesland and Vought. Secondary visit by Vought and Michael Franks (DEC-Albany) confirmed removal of contaminated material. Lab analyticals, disposal manifests and load lists and COC provided and approved. Spill closed 1/09/2002."
Remarks:	"caller is manager for company. tank was discovered during digging tank is underground - soil has already been removed"

VACANT LOT (Continued) **S108130519**

Spiller Address: 39 E. 30 STREET, STE 3
Spiller Company: 999
Contact Name: DEANNA BROWN
DEC Memo: "07/13/09-Vought-Primary off hours responder.Vought called and spoke to DEP Deanna Brown and as per Brown spill info came in from 311 hotline and site was boarded up at time of DEP inspection and site visit. As per Brown, called stated adjacent properties have oil infiltration into basement everytime it rains and soil is still contaminated onsite. Vought inspected spills database and no other opens spills found at site (note one spill closed from 2006 spill due to problem with sidewalk fill box). Spill assigned to DEC Ketani due to possible adjacent closed PIN site (225 E70th St) as site visit needed to confirm presence/absence of contamination and impact to adjacent basements. 07/13/09 - Raphael Ketani. A previous spill occurred at the site on 9/1/06. The case was #0606324. It involved oil coming out of the fill box. The truck driver was told by his company to blow the fill line. This resulted in oil coming out of the vent pipe and onto the sidewalk. The oil also spilled in the basement. The concrete was cleaned and the contamnated soil was dug up. The case was closed on 9/6/06. There is no PBS case. A spill also occurred across the street from the site at 225 East 70 Street back in 1996. The oil showed up in the sumps at 225 East 70th Street and in the sumps at 233 East 70th Street. These sites no longer contains free product in the groundwater. However, it was not known where else the oil went. The oil may be trapped in the bedrock fractures and may rise and become mobil when precipitation fills the cracks. I made a site visit today. The site is a vacant lot with rubble (see E-docs). The address is 234 East 70th Street. There was no construction activity taking place. The gate was locked. The lot DOES NOT extend to East 69th Street. The lot is bordered to the east by a modern 17 story building that parallels Third Avenue. The official address of this neighboring building is 233 East 69th Street. There is a document in the glass case that is nailed to the plywood boards which close off the lot. The document lists a contact person, Michael Russell (347) 244-8825. The block and lot are 1424 and 128. The construction company is Happy HK Construction, 39 E. 30th Street, NY 10016, (212) 213-0977. I met the super of 233 E. 69th Street, Danny Juers (jew-ers) (212) 737-0810. He told me that he has been the super of 233 E. 69th Street for 20 years. He said that the small apartment building that used to be next door was owned by a guy who didn't keep up the place. He said that sometimes, when the neighbor would get an oil fill, a little oil would leak through the common wall and into the basement of 233 E.69th Street. Mr. Juers stated that the boiler of this small building was against the common wall. He went on to say that the new owner, Yosi Cohen (Realty Within Reach, Inc., 39 E. 30th Street, Ste 3, New York, NY, 10016, (212) 213-0977), has been no better. Mr. Cohen demolished the building without any permits. Now, when it rains, the water pours into the basement. Along with the water is a little oil. I could see the oil/water stain on the floor of his basement. There was also a little oil that seemed to have emanated from a crack at the foot of the wall. Mr. Juers stated that he thought Mr. Cohen had buried the boiler and the tank when he knocked down the building. I asked him how he knew this. He said because he never saw either piece of equipment being taken out. I told Mr. Juers that the case will be investigated and that Mr. Cohen will be contacted. I drafted a CSL and submitted it to Randall Austin, Chief of the Spills Unit, for his approval. 7/14/09 - Raphael

VACANT LOT (Continued) **S108130519**

Ketani. The CSL was approved by Mr. Austin and went out today. 7/16/09 - Raphael Ketani. Yosi Cohen (917) 939-6112/FAX (212) 213-0979 called me today. He said that he received DEC's letter, but that there is no oil under his property. Mr. Cohen said that this is all just jealousy from his neighbors because he is going to build a building. He said that he has had a lot of complaints in the past months. I explained that I made an inspection of his neighbor's basement, 233 E. 69th Street, and that I saw a small seep of oil. He said that the oil is from his neighbor. I told him that the neighbor is on City steam. I told him that the neighbor said there used to be a boiler on the other side of the common wall (east side of 234 E. 70th Street). Mr. Cohen said that the boiler was on the west side of his property. Mr. Cohen asked how I knew the oil was from his property. I told him that I saw the oil seeping in through the common wall. I told him that he needed to hire an environmental company to do some soil borings to find out what is going on below. Mr. Cohen asked what would happen if his contractor doesn't find any oil. Then, I said, I will ask his neighbor to do some soil borings. I added that the DEC can't close the case until we find the source of the oil. Mr. Cohen said that he will hire Big Apple Drilling. He said that he has them do all of his boring work. I told him that he can hire anyone he wants to. 7/30/09 - Raphael Ketani. Today I received 3 photos from Mr. Juers showing the oil and water that seeped into his basement on 7/27/09 after a heavy rain storm the day before. The pictures are in the E-docs. 8/4/09 - Raphael Ketani. I spoke to Mr. Cohen. He said that a boring was done last thursday, 7/30/09, next to the wall of the building at 233 E. 69th Street. He said that the soil sample is at the laboratory and he is waiting for the results. I asked him how far down the boring went. He said that he thought it went down 12 or 15 feet. I told him that depth should be right for the basement of the building next door. Mr. Cohen said that some years ago there were test pits done. He added that the bedrock is as shallow as eight feet below the surface. I told him that DEC would like a copy of this report. He said that he will send it. Mr. Cohen also added that there were two borings drilled to depth on his property that were a little away from the wall. I told him that DEC would like a copy of this report, too. He said that DEC will get everything as one package once the analytical results are received. 8/21/09 - Raphael Ketani. I received the one boring soil investigation report from Mr. Cohen dated 8/20/09. The boring is B-1 and appears to have been performed less than 8 feet from the neighbor's wall (according to the fold out surveyed map - see yellow dot) and in a reasonably close location to the site where the former boiler supposedly was, according to Mr. Juers. The boring went to 25 feet, but material from 0 feet to 11 feet was put together to make a composite sample. There was a very low naphthalene hit and a low 1,2,4-trimethylbenzene hit, amongst the VOCs. The SVOCs were the usual suite of benzo series analytes and their associated combustion product analytes. The benzo series and combustion products had low hits, but there were also low hits in the several thousands range for fluoranthene, phenanthrene, and pyrene. This seemed like a mixed result - not clearly just combustion products and not clearly hinting at oil contamination. I contacted Mr. Cohen (917) 939-6112 and explained my review of the analytical results. I asked him whether the person doing the soil sampling had found any soil contamination. Mr. Cohen explained that he was on site during the drilling and this person told him that there was no indication of contamination. I asked whether this person had a PID

VACANT LOT (Continued) **S108130519**

meter. He said that he did and that he didn't detect anything. I told Mr. Cohen that when sampling is being performed for oil contamination, it usually isn't appropriate to take composite samples. I told Mr. Cohen that the most contaminated sample should be have been taken. Mr. Cohen said that he will talk to the person who took the sample and see whether there are any discrete samples left. I also reminded Mr. Cohen to notify me when they start digging at this location. He said that he will. 8/28/09 - Raphael Ketani. Mr. Cohen sent me a one page FAX stating that he is trying to get the test from the person who performed it. He will talk to the person who did the test as soon as he comes back on monday. 9/9/09 - Raphael Ketani. Mr. Juers (212) 737-0810, the super of 234 E. 70th Street, called to complain that the oil and water entering his building is worse than ever. He said that when it rained heavily several weeks ago, a lot of oil and water entered through the usual gap at the base of the wall and contaminated the lockers in the basement and the belongings in the lockers. I told Mr. Juers to get someone to clean up the mess. He said that he has only one porter for the building (it's a large condo building) and the guy can't spend his time cleaning the oil. Otherwise, he will get nothing else done. I told Mr. Juers to then hire someone from the outside to clean everything. He had no response. Mr. Juers then commented that he saw drilling activity on Mr. Cohen's property, but he said it didn't look like the crew could be counted on to do the work properly. He said that they didn't use water to drill and so they would not have been able to penetrate the concrete floor of the former boiler room to get to any contaminated soil below. I told him that DEC received a report back on 8/21/09 which showed that they had drilled down to 25 feet, took a composite soil sample, sent it off to the lab and the results were low. Mr. Juers said that he was there and he saw only two five foot augers being used. He said that this wasn't long enough to reach the level of the contamination 10 feet below grade. I told Mr Juers that the DEC could only go by the results of the report. However, I added, Mr. Cohen is supposed to notify the DEC when he starts excavating so that we can see what is down at the level of the basement. Mr. Juers said that he still felt that Mr. Cohen was fooling the DEC and that he really didn't do the boring work that he was supposed to. I told Mr. Juers that there is fractured bedrock below Mr. Cohen's site and 234 East 70th Street. So the oil could enter the fractures from somewhere else upgradient and be carried up on top of the water table everytime it rains - thereby allowing the oil to enter the gap. Mr. Juers went on to request a site visit by the DEC. We arranged for a visit tomorrow at 10:30AM. Mr. Juers said that Jean Savinsky, president of the condo board will also meet me there. Some time later, I received a call from Bill McCarten (212) 682-2288, the lawyer for 233 East 69th Street. He said that he was going to take action against the owners of 234 East 70th Street. I told him that the boring results didn't suggest that the source of the oil was the neighboring property. He asked who may be the source. I told him that the oil seems to appear after heavy rains. So, the oil may reside in fractures in the bedrock. If it is in the bedrock, then it could have come from any source that is nearby, including, but not limited to the neighboring empty lot. 9/10/09 - Raphael Ketani. I spoke to Mr. Cohen (917) 939-6112 and asked him where the additional information was for the drilling that was performed. He said that he didn't know what more DEC wanted in the way of information regarding the drilling. So he didn't send anything. I told him that the DEC wanted

VACANT LOT (Continued) **S108130519**

the detailed boring logs showing the PID meter readings and the soil descriptions. He said that he will send these to me. I made the scheduled appointment and met Mr. Juers. However, Ms. Savinsky was not present. We discussed the source of the oil. I told him that the DEC was not convinced that the oil was from Mr. Cohen's property. I added that it could have come from an old spill that happened across the street in 1996 at 225 East 70 Street. I also mentioned that the oil could be from an even older spill that may have occurred when old, small apartment buildings used to occupy the present site of 233 East 69th Street. Mr. Juers said that he didn't think the oil was from the small apartment buildings. He said that back several years ago, groundwater was coming up through the basement floor at the front of the building. The floor was broken up and the groundwater was sampled. There was no oil on the groundwater. The sample came back uncontaminated, he said. The groundwater may vary as much as 6 inches in elevation. Sometimes, it is just under the floor. Mr. Juers added that there is an underground river under Second Avenue (the intersecting street). He believes that this is where the groundwater comes from. We went into the basement. From the stairs nearby the spill location, I estimated that we were about 12 feet below the sidewalks. I mentioned to Mr. Juers that the 8/20/09 report from Mr. Cohen indicated that bedrock was at about 12 feet below grade. Mr. Juers said that he thought the oil was coming from the rubble and the soil. I told him it was likely that the oil was in the bedrock, given the seepage location and the depth below grade where we were standing. I dipped a tissue into some recently seeped oil. It didn't smell quite like #6 oil or #2 oil. I told him that it may be #4 oil or weathered #2 oil. The color of the oil was black. Mr. Juers said that the oil just keeps happening whenever there is a heavy rain. He showed me the storage locker area and he opened one locker. I could see stains inside the locker from the water and oil mixture (see photos in E-docs). Mr. Juers said that the oil seeps in from the back of the lockers, as it does all along the bottom of the wall in the basement. I told Mr. Juers that the best temporary situation may be to clean the the area where the wall meets the floor and then seal the gap where the oil is gettin through. He said that he will consider this remedy. He said that this oil seepage problem didn't really become an issue until the building next door was torn down and the amount of rain entering the rubble ground greatly increased. I told Mr. Juers that I understood his frustration, but that, right now, we are waiting for Mr. Cohen to dig out the site. I told him that the DEC is still keeping the spill case open. Mr. Juers mentioned that a sample of the oil had been taken and sent to a lab for analysis. I asked him whether the analysis was for a fingerprint. He said Yes. I told him to send me a copy of this fingerprint analysis and to send a copy to Mr. McCarten. Mr. Juers said he will. I told Mr. Juers to put down a lot of absorbent material in the basement to catch the oil as heavy rain is expected tomorrow. With this, the conversation ended. Mr. Cohen called me while I was out at the site. He left a message that the engineer was going to send him the boring log. 9/15/09 - Raphael Ketani. Mr. Cohen sent me a copy of the boring log for the B-1 boring in the 8/21/09 report. Though the report indicated that the boring went down 25 feet, the log I received today indicated that there were hammer blows only down to 11.5 feet below grade. I spoke to Mr. Cohen (917) 939-6112 about this discrepancy. However, he insisted that the boring went down 25 feet. I asked him when the excavation work at the site will take place. He

VACANT LOT (Continued) **S108130519**

said that he had submitted his building plan to the NYC DOB some time ago and he had made a presentation to the local community board. He said that he was hoping to start digging in one month. He said that he will let me know when the excavating will start. 9/17/09 - Raphael Ketani. I received a letter from Mr. McCartin of Sankel, Skurman & McCartin, 750 Third Avenue, NY, 10017. He gave a summary of some of the points of previous discussions we had over the past several weeks. He mentioned that we had considered that the oil could have come from 234 E. 70th Street and/or 225 E. 70th Street. He also mentioned that DEC will try to be on site when Mr. Cohen starts excavating. In the letter, he asked that DEC not close the spill case for 225 E. 70th Street until it is determined where the oil is coming from that is entering 233 E. 69th Street. 9/18/09 - Raphael Ketani. Mr. McCartin (212) 682-2288 called me today for an update. I informed him that Mr. Cohen is waiting for a permit from the NYCDOB allowing him to start work. I added that Mr. Cohen had to make another presentation to the local community board regarding his project. I told Mr. McCartin that, probably, work wont start for another month. I also stated that, hopefully, Mr. Cohen can reach the bedrock and we can see what the situation is with the oil. Maybe he can dig out the bedrock a little, reach the oil, and collect it. He asked how DEC will know when the excavating will start. I told him that I had asked Mr. Cohen to inform DEC when the work will start. I told Mr. McCartin that Mr. Cohen sounded sincere in wanting to cooperate with DEC. Mr. McCartin wanted to know who the management company of 225 E. 70th Street was. I asked him why. He said that he may send a letter to them requesting information about the spill that occurred there. 10/5/09 - Raphael Ketani. Mr. McCartin sent me a letter dated 10/2/09. In the letter, he requested further information regarding Mr. Cohen's plans for beginning construction and development of the subject property and the source of the oil. 10/6/09 - Raphael Ketani. I tried to contact Mr. Cohen (917) 939-6112 in order to find out whether excavation work has started, but I could only leave a message. I called up Mr. McCartin (212) 682-2288 and reached his voice mail. I left a message stating that there was no new information regarding the site, and that I hadn't heard from Mr. Cohen since we last spoke on 9/18/09. Later, Mr. Cohen called me back. He said that he has a meeting with the community board on October 14 to get the construction permit. Once he gets this, then he can go to the DOB planning bureau and get a permit to do the construction. 10/16/09 - Raphael Ketani. I spoke to Mr. Cohen today. He said that the meeting with the community board took place as scheduled. However, he didn't attend the meeting, only his attorney. He will let me know what transpired. Mr. Cohen said that the community board meeting was only for the certification. He added that he has an appointment on October 23 with the DOB. He will let me know how things turn out. 11/5/09 - Raphael Ketani. I tried to contact Mr. Cohen, but received a message that he will be away until 11/8/09. I will call him after that date. 11/12/09 - Raphael Ketani. I spoke to Mr. Cohen (917) 939-6112. He said that his plans were approved by the Community Board and the City Planner last week. Then the plans went to the NYC DOB for them to put it in their computer system. He is waiting for the approvals to get into the DOB system. Once they are in the system, then he can get the building permit and get started. He will let me know when the digging is scheduled to start. 12/9/09 - Raphael Ketani. Mr. McCartin (212) 682-2288 left me a message on 12/4/09 that Mr. Cohen seemed to be close to getting started with

VACANT LOT (Continued) **S108130519**

excavating the site. I called up Mr. McCartin and he said that Mr. Cohen had told him that he had obtained the first approval from the DOB. Mr. Cohen had also told him that all he needed was the second higher level approval from the DOB to get started. I contacted Mr. Cohen, but he asked that I call him tomorrow because he was in a meeting with his architect. 12/10/09 - Raphael Ketani. I spoke to Mr. Cohen today. He said that the DOB is presently doing the second drawing review for his project. He was told that the review will take 10 days and that he has an expeditor handling the case. I told Mr. Cohen to give them more time than that. I asked him to contact me when the excavation starts. I also asked him to do a small test pit at the front left corner of his property to see whether there is oil there. He said that, typically, the digging starts at the back of the property because, otherwise, you can't get the backhoe out. I told him that the DEC wants just a small test pit to see whether anyting is in that corner. He said that he will dig there. He will let me know when the excavation is supposed to start. 1/13/10 - Raphael Ketani. I contacted Mr. Cohen (917) 939-6112. He said that he still doesn't have a permit to start the construction and excavation work. He said that he is allowed to match the neighboring building height for his project. So he hired a surveyor and the surveyor produced a drawing showing that the neighboring building is 79 feet high. Mr. Cohen said that he himself took a laser device and measured the neighbors building and it came to 79 feet. The drawing was submitted to the NYC DOB examiner for his project. When the examiner took out the plans for the neighboring building, they showed the neighboring building to be only 74 feet. Because of this, the examiner refused to stamp the plans as approved. This resulted in the plans being submitted to the Chief Examiner in the DOB. Now, Mr. Cohen is waiting for the Chief Examiner to give his approval to the plan. Once this happens, then Mr. Cohen can start the excavation work. Mr. Cohen said that he will keep me informed. 2/10/10 - Raphael Ketani. I contacted Mr. Cohen (917) 939-6112. He said that nothing is happening at the site because he still hasn't received his permit to start the work. He said that he is still waiting for the Commissioner of DOB to rule on the building height indicated in the plans. He said that he will let me know what is going to happen as soon as he knows. 3/18/10 - Raphael Ketani. I spoke to Mr. Juers (212) 737-0810 regarding how his building held up with all of the rain that fell due to the storm last week, and whether Mr. Cohen is actually moving forward with the construction of this building. He said that Mr. Cohen hasn't had any work performed on his property. However, Mr. Juers said, his building did get flooded with oily water. Lots of water entered the basement and the adjacent storage area. It became so bad that he finally decided to have the wall sealed at the co-ops expense. He hired CGI (718) 937-2800 and they did a silicon caulk injection into the wall. They filled up virtually every crack and gap in the basement wall. The basement is now almost absolutely dry. However, the work cost the co-op $30,000. Mr. Juers highly recommends using this company in order to prevent water seeping. 4/7/10 - Raphael Ketani. I spoke to Mr. Cohen. He said that the Chief Examiner passed his plans - the height issue is resolved - and gave his workers the go ahead to review the plans. Mr. Cohen said that he has an appointment for 4/14/10 for the assigned worker to do the review. He expects the employee to approve and stamp the plans. Mr. Cohen added that he will be out of the country after that and wont return until about 4/25/10. So he suggested that I try to contact him sometime at the end of

VACANT LOT (Continued) **S108130519**

April or the beginning of May. Then, he said, he will be mobilizing the excavator. 4/27/10 - Raphael Ketani. I contacted Mr. Cohen (917) 939-6112. He said that his plans were approved yesterday. Tomorrow they will be stamped. Once they are stamped, he can apply for construction permits. Mr. Cohen estimated that he will break ground in 2 or 3 weeks. He will let me know the exact date several days in advance. I told him that sounded fine. 5/24/10 - Raphael Ketani. I tried to contact Mr. Cohen (917) 939-6112 regarding whether the excavating had started, but could only leave a message. Later, Mr. Cohen left a message that he is still waiting for the NYC DOB to sign the building plans. Without this, he can't get a permit to start excavating. He will let me know when the excavating will start. 5/27/10 - Raphael Ketani. I made an unannounced site visit. I looked at the empty lot and didn't see any signs that work had taken place since the last time I had seen the site on 7/13/09. 7/15/10 - Raphael Ketani. I contacted Mr. Cohen (917) 939-6112. He said that his plans were approved. Now he needs to get the permits to do shoring and underpinning (if necessary). He is hoping to break ground in the back of the property on about July 23rd. He will start digging in the back and work his way to the front. He is not sure what he will find - whether it will be dirt or rock. He will let me know when the digging has started. 8/25/10 - Raphael Ketani. I spoke to Mr. Cohen. He said that the Building Department made a few small changes to his plans. This has resulted in further delays in the project. However, he thinks there is a good chance that he will get his permit to start construction work in the next two weeks. 10/5/10 - Raphael Ketani. I spoke to Mr. Cohen (917) 939-6112. He said that he hasn't called me because he has to wait for the shoring and underpinning plan to be approved by the DOB. He said that their shoring and underpinning unit is coming to the site today to inspect the property and to let him know if any modifications are necessary. As soon as he has the plan approved, he will let me know when work will start. 12/6/10 - Raphael Ketani. I tried to contact Mr. Cohen, but I could only leave a message. 12/8/10 - Raphael Ketani. Corrin, an assistant to Mr. Cohen, called me. She said that Mr. Cohen is out of the country. I asked her whether the work had started. She said that it hadn't. She added that Mr. Cohen will call me when the work starts. 3/10/11 - Raphael Ketani. Mr. Cohen (718) 221-5302/(917) 939-6112 called me. He said that the digging had started. He said that the digging will progress from the back to the front. He will let me know when they are about to dig in the corner near the sidewalk and the adjacent building. 5/24/11 - Raphael Ketani. I made an unannounced site visit. There was a posted bill board with: 234 East 70 Street Realty, LLC, 552 Lefferts Avenue, Brooklyn, 11225, (212) 213-0977. I noticed an oil odor coming from the work site. I met one of the construction workers and he let me into the excavation area. I saw that the length of the lot had already been excavated. The area of contamination had not been dug out yet. The worker who let me into the site told me that a boiler had been crushed when the original building had been demolished and that's why the soil is contaminated in the northeast corner of the site. I asked the worker when this contaminated soil will be dug out. He said that he didn't know and that I should contact Mr. Cohen. I tried to contact Mr. Cohen (718) 221-5302/(917) 939-6112, but I could only leave a message on his voice mail regarding the contaminated soil removal and end point sampling. I tried the (212) number and I again reached Corrin. She said that both numbers reach the same office. She said that Mr. Cohen will be back

VACANT LOT (Continued) **S108130519**

in a couple of days. 5/26/11 - Raphael Ketani. Mr. Cohen left me a phone message that the northeast corner will be dug out in a week or two. I contacted him. We discussed the site and the northeast corner. I told him that I had sensed oil when I was standing next to the corner. Mr. Cohen said that he had never sensed oil odors coming from this area. He tried to assure me that the soil was clean. He said that the soil boring at that location showed that there was minimal contamination, if any. I told him that I had reviewed the 8/20/09 report and that there were no significant hits, but that didn't mean that the soil wasn't contaminated. I added that he needed to let the DEC know where the soil will go to and that the DEC needed a copy of the letter accepting the soil. Mr. Cohen said that he will send it to me once he has such a letter. I added that we would also need the manifests. I told Mr. Cohen to let me know when the digging starts in this area. He said that he will. 8/3/11 - Raphael Ketani. I tried to contact Mr. Cohen (718) 221-5302/(917) 939-6112 regarding the northeast corner. However, I could only leave voice messages. 8/4/11 - Raphael Ketani. I spoke to Mr. Cohen today. He said that he had just arrived in New York and that he had been on vacation for 3 weeks. He said that he is doing what the DEC asked for at the northeast corner with the possibly oil contaminated soil. He said that he has manifests. I asked him whether work is taking place there. He said that it was. I told him that I will make a site visit, possibly tomorrow. I called up Mr. McCartin (212) 682-2288, the lawyer for the affected neighboring property. I told him that work was taking place at the northeast corner. He thanked me and said that he will inform Mr. Juers about this and have him take a look. 8/5/11 - Raphael Ketani. I made an unannounced site visit. I could not get into the site, but I could look through two holes in the plywood paneling. It appeared that the contractors had removed all of the oil contaminated soil and were now cutting away bedrock. The oil odors that I had previously sensed were not present. I called up Mr. Juers (jew-ers) (212) 737-0810. He said that he and his engineer were going to gain access to the site and will take pictures. He said that he did get into the site last week and saw that the soil was gone and that there was only bedrock. I asked him to send me copies of any pictures that he takes. Mr. Juers said that he will. 8/31/11 - Raphael Ketani. Mr. Juers never sent me pictures of the site work. So I made an unannounced visit. I could not get into the site as no one was present. However, I could look through the small holes in the plywood paneling. I could see that the construction workers had finished cutting away the rock at the northeast corner. It was now a shear face on two sides, the side parallel with East 70th Street and the side under the neighboring building to the east. Again, there were no oil odors and the rock faces looked clean. As the rock faces and site looked clean, and as there were no odors of oil, and as Mr. Juers had sealed the sub-basement so that no oil could seep in, and as he has not voiced any complaints of oil seepage to the DEC nor sent messages to that effect, I have determined that the oil spill has been cleaned up. Therefore, I am closing the spill case effective today. 10/20/11 - Raphael Ketani. Mr. Cohen left a message that the DEC will be receive the receipts for the transported contaminated next week. 11/14/11 - Raphael Ketani. Today I received the manifests and invoices for the contaminated soil that was removed."

Remarks: "1819 The caller advised dispatch the spill was due to construction work. The amount is unknown. No water ways affected. The clean up is pending."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND/ZHAO 4/23/2002 - Jie Zhao and Steve Sangesland responded

MARYMOUNT SCHOOL (Continued) **S105995690**

off hours to Marymount School on 5th Ave & E 84th St. Oil was coming through the back wall of the building basement into the sump pit. Today was the first time someone found it. Fire dept was on the scene and pumped out 3 - 25 gallon drums of oil/water from the pit. The tank at this site is under the front sidewalk in a vault and all associated piping is fully visible between the tank and the boiler. There was no clear source for the problem. 4/24/2002 - Mr. Anthony Wartel, Director of Facilities (212-744-4486) called Sangesland to say they found an abandoned tank in the courtyard. This would line up exactly with where the problem is. Milro Associates has been hired to remove the 3 drums and investigate the problem. Short term: (1-5 days) 1) Install an oil/water separator, so the sump pump can be turned back on. 2) Open up and clean out the abandoned tank. Long term: (3-4 months) 1) Either excavate or abandon the tank (due to the courtyard problems, the tank will probably need to be abandoned in place.) 2) Come up with a plan that addresses the contaminated soil in the courtyard. 4/26/2002 - Sangesland spoke with Anthony Wartel from the school. They have hired Milro to set up an oil water separator for the basement drain problem. The school is planning on building an extension over the courtyard area in summer 2003. They would like to postpone digging out the tank until spring 2003. Sangesland requested a written request for this extension along with basic engineering drawings showing how much soil they expect to dig out along with a commitment on the excavation date. 5/24/2002 - Sangesland received a letter from Mercedes Armillas of Buttrick White & Burtis Architects (212-967-3333) The letter reiterates the information written above. They plan on excavating out the area as part of an extension project. This work is expected to be done in June 2003. There was no information on the estimated quantity of soil to be removed. The letter did however state that Milro would maintain an oil water separator at the ejector pit of the new boiler room. 11/27/2002 Sangesland spoke with Paul of Milro Associates. He confirmed that Milro is still working this case and makes pickups from the site as needed by the school. The major construction project may be postponed, which means the tank pull may go ahead on it’s own. 4/23/2004 Sangesland asked Paul at Milro for a status update. He said all work at the school has been completed and he’s working on a final report to submit to the DEC for closure. 3/17/2005 Sangesland spoke with Paul at Milro again. He thought he mailed the report, but he’ll pull the file and check. 1/29/2007 Sangesland spoke with Paul at Miro. He said he has the file on his desk and he’ll send a copy of the closure report out ASAP. 10/25/07-Vought-Performed site visit as per DEC Sangesland and met with Anthony Wortell. DEC Sangesland instructed Vought to sample monitorin\\g well and inspect basement. Monitoring well was formerly located in center courtyard. As per Wortell entire courtyard including monitoring well was excavated by Milro. Wortell provided Vought with Milro cost estimate dated 11/19/02 showing 8260 and 8270 analysis and 20 days of soil excavation and tank removal. No analyticals, disposal manifests or site plans included in paperwork. As per Wortell he may have additional paperwork and will look for it to submit to DEC. Courtyard of former well location now entirely covered by rubber toddler mats with playhouses and toys which is being currently used. Wortell also indicated that additional soil excavation was performed in basement at former seepage location and under current new boiler location. Signs of historical oil seepage in basement however oil does not look fresh. As per Wortell fresh oil has not seeped into basement for at

MARYMOUNT SCHOOL (Continued) **S105995690**

least past five years. No vapors or petroleum odors in boiler room and sump pit adjacent to fomerly impacted wall filled with groundwater with no sheen and no odor. Wortell also showed Vought sidewalk tank fill port and manway and as per Wortell tank was abandoned with concrete with DEC Saneslands prior approval. Spill notes provided to DEC Sangesland to require endpoint samples analyticals and disposal manifests and/or spill closure due to lack of observable impact to courtyard and adjacent sump and age of spill. 10/26/2007 Milro submitted a closure report to DEC for review by Sangesland. Report says Milro cut and removed the tank on June 27, 2003. Excavation continued to 5 feet below grade. Perched water was encountered in the excavation at 5 ft. Contaminated soil was properly disposed of (manifests attached).... June 23, 2003 one endpoint soil sample was collected .... results VOC and SVOC were NOT detected.... Lab report attached. Spill Case closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 4/15/98 - Transfered to Sigona from Saccacio 7/23/2004 Spill transfered from Sigona to Krimgold - TTF letter sent out 7/23/2004 7/27/2004- Sangesland spoke to Elisa Cinamin from the American Jewish Congress administrative office (212-969-3417). She said she contacted Protest and is trying to get the back up info needed to close out the case. If she can't get this backup, then she will call back to try to find out what she can do. 8/16/2004 Sangesland spoke with Elisa Cinamin. The building super and Ms. Cinamin will call back the week of Labor Day to resolve what needs to be done. 9/7/2004 Sangesland spoke with Elisa Cinamin. She called with the building super to discuss the tank. The super had been with the building for 28 years and does not remember a leak or a problem in 1998. They have a passing tank test from 1999. The assumption is that there was an air leak of some type that was repaired. No sign of leak exists. 9/23/2004 Sangesland received a package of info from Aliza Cinamon. Shows 2 passing tank tests from June 1999 and May 2004. Also included were letters from two long time employees who say they have never seen anything which would indicate there was ever a spill or a problem with the tank. Spill Case Closed"
Remarks:	"TANK FAILED TEST W/ NO OBVIOUS LEAK - STEVEN SACCACIO ADVISED"

(212) 933-4161 Rockaway Fuel **oil company for 302 E 83rd street** Dominick Ph. (718) 585-8300 03/23/10-Hiralkumar Patel. 9:19 AM:- sent letter to Mr. Taube requiring soil investigation along underground portion of fill line and end point samples, if needed. letter emailed to Mr. Taube (at Ms. Holman's email address), Mr. Tauber (304 E 83rd street), Mr. Singh (MTA) and Mr. Couto (J. D'Annunzio). 03/24/10-Hiralkumar Patel. 11:51 AM:- received call from John from LBG, contractor hired by Chubb Insurance. Chubb is home owner's insurance company. John inquired about required work and responsibility issue. informed John that the department requires investigation along underground portion of fill line due to fill line test failure and currently home owner is responsible for that. John Benvegna LBG PH. (914) 694-5711 (O) (914) 729-4588 (C) email:

APT BUILDING (Continued) **S110243387**

benvegna@lbgny.com 04/01/10-Hiralkumar Patel. letter sent to Taube management came back undelivered. 8:21 AM:- left message for Ms. Waller at Chubb. Alison Waller Chubb Insurance Ph. (908) 903-5675 email: awallerpignatello@chubb.com claim #: 3731-2102 8:25 AM:- left message for Mr. Taube. 11:23 AM:- spoke with Ms. Holman at Mr. Taube's office about returned mail. Ms. Holman confirmed that Mr. Taube received letter that was sent via email. and she gave correct mailing address (as the address where letter was sent was old address). 04/05/10-Hiralkumar Patel. 3:29 PM:- received call from Ms. Waller from Chubb. they are going to cover necessary work at the site. Ms. Waller mentioned that they will start work once gets permit. 3:45 PM:- sent email to Ms. Waller with contact info of Michelle Escobedo at Parsons Brinckerhoff Americas, Inc. 04/12/10-Hiralkumar Patel. 9:59 AM:- received message from John from LBG. 11:44 AM:- spoke with John. they are in planning phase and preparing for permit. John mentioned that he is not getting cooperation from building 304 and inquired what needs to be done if contamination from fill line for building 302 is extending towards building 304. informed John to start with fill line at building 302 and asked to inform the department if contamination extends towards building 304 or towards street excavations by MTA. also asked to contact the department before collecting endpoint samples or backfilling the excavation. 04/20/10-Hiralkumar Patel. 9:06 AM:- received message from John from LBG. 4:46 PM:- spoke with John. he met with MTA yesterday. as per John, MTA will be working in area to mid June and then will move to other side of street. at that point, LBG can open sidewalk to investigate fill line area. as no other option available, approved John's request to wait until MTA finish their work. 02/28/11-Hiralkumar Patel. received message from John (at 11:15 AM on 02/25/11) from LBG. John mentioned that they have started removal of any contamination soil. John mentioned that they will clean upto the property line only as there is another source at next door. 12:41 PM:- left message for John. 12:55 PM:- received call from John. he mentioned that contaminated soil found underneath the sidewalk. he will meet at the site tomorrow at 3 PM. 03/01/11-Hiralkumar Patel. 3:10 PM:- visited site. met John and crew from Riteway. crew dug in area between former fill ports for building 302 and 304. this excavation was along the sidewalk curbline. John mentioned that concrete flag was running between the two fill ports thats why they have to dug close to fill port for building 304. excavation was about 6 ft bg (1-2 ft below the gas main installed by MTA recently). asked John to continue excavation vertically, if possible, to remove any additional contaminated material. John mentioned that once they backfill the excavation under the curbline, they will open remaining sidewalk towards the building. they will also excavation west of the former fill port for building 302. informed John that the department wants to inspect the entire length of fomer fill line under the sidewalk, so if safe, asked him to leave excavation open. asked John to cover excavation with metal plate so pedestrians can use the curbline area while they are working towards the building. asked John and Riteway crew to have pics of excavation and fill line and specially leaking portion of the fill line. also asked them to carefully inspect the soil between the leaking part of the former line (for building 302) and heavily contaminated area under the curbline (closer to fill line for building 304). 03/11/11-Hiralkumar Patel. 10:05 AM:- spoke with Joe. they are still excavating soil towards the building. they dug down to 8 ft bg. asked

APT BUILDING (Continued) **S110243387**

Joe to secure old fill line. 03/18/11-Hiralkumar Patel. 10:15 AM:- visited site. met John (LBG) and Anthony (Riteway). crew dug down about 2 ft below the newly installed gas main (by MTA) and no bedrock found. some more contamination in the bottom. Anthony mentioned that they can not dig much without shoring. also MTA is using part of the street on south side (along the building) so Anthony can not close street for pedestrian path which is needed for excavation along the building foundation wall. Anthony was told by MTA that MTA has finished work and they will be off-site by end of 03/25/11. based on these information, asked Anthony to wait for MTA to remove their barriers and then close part of street and start excavating under the sidewalk along the building foundation wall. also asked him to collect endpoint samples prior to backfilling the excavation along the curb line. informed John that based on results of endpoint samples, the Department may requires additional soil/groundwater investigation. 05/11/11-Hiralkumar Patel. 2:07 PM:- received call from John. he mentioned that MTA is still working on street and so they can not excavate area towards the building. John mentioned that four endpoint samples were collected from excavation along the curbline: three sidewalls and one bottom. no endpoint soil sample was collected from north sidewall as that was a backfill by MTA during earlier work on street. John proposed to backfill the excavation along the curbline so they can move the sidewalk and open area along the building foundation wall to remove any remaining contamination. asked John to submit sample results and site map for review. informed him that if the endpoint samples are clean then they can backfill the excavation and continue work along the foundation wall. John will send email with sample results. 2:21 PM:- received email from John including soil sample results. soil samples were collected on 03/22/11. no contamination found in endpoint soil samples. 05/13/11-Hiralkumar Patel. 2:07 PM:- sent email to John and asked him to send final dimension of the excavation. 05/17/11-Hiralkumar Patel. 10:08 AM:- received email from John. excavation dimensions are 12 ft (east-west) by 5 ft (north-south) by 6 ft deep. 05/26/11-Hiralkumar Patel. 8:46 AM:- received message from John. 06/06/11-Hiralkumar Patel. 3:54 PM:- spoke with John. based on available endpoint sample results, approved his request to backfill excavation by the curbline. after backfilling excavation along curbline, they will excavate area along the building foundation wall. 06/20/11-Hiralkumar Patel. 4:08 PM:- received email from John including some pics. he mentioned that last week contractor began excavating again at the site towards the building along the oil line and encountered lot of rock (bedrock). there is contamination around the rock and in the soil. they found two small holes in the line about 6-7 feet out from the building (pics on e-docs). 06/30/11-Hiralkumar Patel. 4:25 PM:- received email from John including some pics. he inspected site today and believes that excavation is completed. excavation was extended to building foundation wall and was 8 ft deep. soil from the bottom still has an odor but he expect that it will meet the standards. contractor will collect confirmation samples tomorrow. no staining found on the foundation wall. also, there were no holes in the pipe at the point it enters the building or for about 4 feet out towards the sidewalk. the only holes observed were in a section of the pipe that was from about the middle of the sidewalk (pictures of which emailed on 6/20/11). the pipe has been cut and removed but is still onsite. 07/12/11-Hiralkumar Patel. 11:05 AM:- sent email to John inquiring about results of confirmation samples. 08/23/11-Hiralkumar Patel.

APT BUILDING (Continued) **S110243387**

1:26 PM:- received email from Riteway including lab results of soil samples collected after excavation along building foundation wall. no contamination found in endpoint samples. 4:01 PM:- sent email to John. based on submitted endpoint sample results and available information, approved backfilling of the excavation. asked him to submit final spill closure report by 08/31/11. email copied to Pete at Riteway and Ms. Holman in Mr. Taube's office. 11/16/11-Hiralkumar Patel. 11:29 AM:- sent email to John and asked him to submit detailed report by the end of 11/21/11. email copied to David at Riteway and Mr. Holman. 11/22/11-Hiralkumar Patel. 3:52 PM:- received report from David from Riteway. based on available information, case closed. 4:21 PM:- sent spill closure letter to Mr. Taube. letter emailed to Ms. Holman, David and John. **also refer spill #: 0913241 for more info.**"

Contact Name:	RICHARD GROVES
DEC Memo:	"03/17/10-Hiralkumar Patel. 1:22 PM:- spoke with Richard. he mentioned that part of 2nd ave subway project, they are doing some side excavations to relocate utilities in that area. and as such, they excavated along south sidewalk of E 83rd street. excavation was done two weeks ago and then covered by metal plates. today they open metal plates for ConEd people so they can relocate gas lines and found oil on water in two excavation. one excavation is in front of 302 E 83rd street and second excavation is in front of 304/306 E 83rd Street. surrounding properties: *-* -*-*-*-* 1) 302 E 83rd Street. no alternate address. no spills history. no PBS record. property owner (as per ACRIS): 302 Realty Equities, LLC. 204 East 83rd Street New York, NY 10028 2) 304/306 E 83rd Street. no alternate address. no spills history. PBS #: 2-200883 as per PBS record, site has one 4,000 gal #2 oil AST in contact with soil. tank was installed in Aug. 1980. no record of tank test. property owner (as per ACRIS): 304-306 E 83 Realty, LLC. 26 West 85th Street, Suite 2 New York, NY 10024 3) 300 E 83rd Street. alternate address: 1598 2nd Avenue no spills history. no PBS record. property owner (as per ACRIS): ELK 300 E 83 LLC. c/o ELK Investors 489 5th Avenue New York, NY 10017 4) 305-307 E 83rd Street no alternate address. no spills history. PBS #: 2-601253. as per PBS record, site has one 3,000 gal #2 oil AST in contact with soil and tank was installed in Sep. 1996. property owner (as per ACRIS): 305 East 83rd Street Realty Corp. c/o Pride Property Management 11 New Street Englewood Cliffs, NJ 07632 5) 303 E 83rd Street alternate addresses: 301-303 E 83rd Street, 1602-1612 2nd Ave other spill #s: 9711202, 0550049, 0704572, 0800774 and 0802475 PBS #: 2-250902. as per PBS record, site had one 25,000 gal #6 oil UST which was closed in Feb. 2005 and currently has one 18,200 gal #6 oil AST on legs. existing tank was installed in Feb. 2005. property owner (as per ACRIS): Romford Realty Corp. 450 Park Ave New York, NY 10022 spill # 9711202 was reported on 12/16/1997 as tank test failure. case closed on 03/23/1999 with passing test result. found leak in gauge. spill # 0550049 was reported on 04/08/2005 as about 5 ft of #6 oil found in sump in garage. during further investigation, found hole in return line to 25,000 gal #6 oil UST. excavation done along return line. case closed on 05/08/2006. spill # 0704572 was reported on 07/23/2007 as mercury spilled. case closed on 07/24/2007. spill #0800774 was reported on 04/18/2008 as total of 15 gal #6 oil spilled inside tank vault and at the vent pipe. oil spilled on concrete floor in tank vault. spill closed on 04/28/2008. spill # 0802475 was reported on 06/03/2008 as 3,000 gal #6 oil spilled inside tank vault. case closed on 07/17/2009. *-*

STREET EXCAVATION (Continued) **S110243316**

-*-*-*-* 3:00 PM:- visited site. found product on water in two excavations: one in front of 302 E 83rd street and second in front of 304-306 E 83rd street. met Richard Groves, contractor working for MTA, and Michelle Escobedo, construction supervisor from Parsons Brinckerhoff. Richard mentioned that as part of MTA 2nd AVe subway project, they excavated areas in front of houses along south side of E 83rd street to relocate utility lines. excavation was done on 02/19/10 and during soil excavation, they did not noticed any contaminated soil or any petroleum odors from excavation or any sheen/product in excavation in front of 302 or 304 E 83rd street. they excavated to about 5 ft bg and installed new gas line and then backfilled that excavation 2 ft and left remaining excavation open so ConEd can connect buildings to new gas line. spoke with Michelle. Michelle mentioned that ConEd crew was on-site on 03/10/10 working in excavations on street and on that day, there was no oil in any excavations. met Charlie, super of 302 E 83rd Street. building has one 1,080 gal AST wrapped in concrete. there are 20 units in the building. spoke with Dominick at Rockaway Fuel, fuel delivery company for 302 E 83rd street, about delivery record for last three months. Dominick mentioned that they have been hired to replace the fill line. delivery record at 302 E 83rd street: - 660 gal on 02/22/10 - 564 gal on 02/02/10 - 650 gal on 01/13/10 spoke with Milton Taube, property owner of 302 E 83rd Street. asked Mr. Taube to do line test before replacing old fill line. Mr. Taube hired Riteway Tank maintenance for line test. spoke with Anthony Lara at Riteway Tank. he will go to site tomorrow morning to do line test at 302 E 83rd street. also met technician from New Utrecht, an oil company for 304 E 83rd Street. inspected tank at 304 E 83rd Street. site has 4,000 gal AST wrapped in concrete and has weep holes at bottom. fill line for this tank runs aboveground inside buiding. approx. 3550 gal oil was in tank at the time of site visit. no sign of leak observed inside building. vent pipe at the site is behind black boxes (possibly garbage cans) along property line and is not visible from fill port area. may need to raise vent pipe to make visible. no sign of oil leak observed at the vent pipe. spoke with Mike Tauber, property owner of 304 E 83rd Street and asked him to do fill line test by end of tomorrow. 304-306 E 83 Realty, LLC. **property owner of 304-306 E 83rd Street** c/o Tauber Properties **managing company** 26 West 85th Street, Suite 2 New York, NY 10024 Attn.: Mike Tauber **properyt owner and manager** Ph. & Sons, Inc. **contractor doing excavation work for PB Americas** 341 East 79th Street New York, NY 10075 Attn.: Sergio Couto Ph. (212) 249-7350 Fax (212) 249-7365 email: scouto@dannunziocorp.com Richard Groves J. D'Annunzio & Sons, Inc. Ph. (973) 725-6049 (C) email: rgroves@dannunziocorp.com 03/18/10-Hiralkumar Patel. 10:27 AM:- spoke with Frank at New Utrecht regarding delivery history. Frank mentioned that 2670 gal oil was delivered on 03/11/10 and 3660 gal oil was delivered on 02/06/10. as per Frank, there was no problem noticed in excavation by driver before he started delivery on 03/11/10. 10:50 AM:- left message for Mike about update on tank test. 11:40 AM:- spoke with Mike. he will talk to oil company about line test. informed Mike about line test being conducted at building 302. Mike will contact Anthony regarding line test. 11:55 AM:- received call from Anthony. he has been hired to do line test at building 304 also. 12:38 PM:- received call from Anthony. he tested fill line at building 302 and line failed. Anthony mentioned that leak could be large as no pressure developed during test. he tried to connect equipment to fill port at building 304 and he found that fill line was loose and was moved from its original position. Anthony mentioned that no need for line test as suspecting leak from displaced line. asked Anthony to show loose pipe to property onwer and MTA contractor. asked Anthony to report fill line test failure and loose fill line to DEC Hotline. Anthony mentioned that Rockaway fuel is going to install new fill line tomorrow at building 302. 1:25 PM:- spoke with Dominick at Rockaway fuel. Dominick mentioned that owner for building 302 wants to put new fill port at the foundation wall. informed Dominick that based on line test failure, the department requires investigation along entire lengh of underground fill line. 1:48 PM:- spoke with Mr. Taube regarding investigation along underground fill line at building 302. he will talk to Dominick about required investigation work. 2:50 PM:- received message from Kevin Heaphy from MTA. 2:55 PM:- spoke with Mr. Heaphy. Mr. Heaphy is environmental manager at PB Americas. discussed available information with Mr. Heaphy and requested to expose fill lines from fill port to existing excavation boundaries to inspect fill lines to see any recent damage to it due to work on street. informed Mr. Heaphy that the department doesn't require this work, but it could help understanding the spill. also informed that no need to excavate entire length of underground fill line. Mr. Heaphy will talk to MTA for approval. Kevin Heaphy Environmental Manager PB Americas, Inc. Ph. (212) 465-5092 (O) (347) 237-2980 (C) email: heaphy@pbworld.com 03:53 PM:- received call from Mr. Groves. they got approval to expose part of fill lines around fill port areas. will excavate by hand tomorrow morning. 03/19/10-Hiralkumar Patel. 10:00 AM:- visited site. met Mr. Groves, Mr. Heaphy, Michelle, Philip Rice (resident engineer at Parsons Brickerhoff) and Bruce Moran (from MTA). Mr. Tauber was not available for site visit. exposed part of fill line at building 304 in already open excavation (by hand only and no machine used). once the area around the fill line was exposed, part of the fill line separated from the coupling in the line. there were no broken pieces of pipe observed inside the coupling and no borken threads observed on the remaining portion of the fill line, suggesting an improper fitting. MTA, PB and J. D'Annunzio reps took pics of pipe and area around it. did PID survey in area around fill port and under connection in fill line. found more than 350 ppm on PID in soil right under failed connection point and minor PID readings in other areas. Armando, super of building 304, secured broken piece of fill line in

STREET EXCAVATION (Continued) **S110243316**

basement. found oil in excavation in front of building 304. this oil looks little dark and thick (could be #6 oil). no oil found in excavation in front of building 302, but some sheen only. fill line for building 302 was exposed on one side for entire length of excavation done on sidewalk by J. D'Annunzio. found fill line for building 302 dry and no petroleum odors noticed in soil surrounding fill line for building 302. which indicates that leak in fill line (based on failed line test done 03/18/10) may be in remaining portion of underground fill line for building 302. met crew from Rockaway fuel. they were installing temporary fill line at building 302. asked them not to disturb underground portion of fill line at building 302 as MTA requested so. J. D'Annunzio hired Miller Environmental. Miller will respond this afternoon. Miller will collect product sample from excavation in front of building 304, water sample from both excavations and soil sample in area right under failed connection point in fill line for building 304. as oil in excavation in front of building 304 looks more like #6 oil, spoke with Harry Cridland, general manager of building at 303 E 83rd Street. informed Mr. Cridland that if product in excavation in front of building 304 comes back as #6 oil, then they may have to do investigation on their proprety as history of major spills in past. Philip M. Rice Vice President Parsons Brinckerhoff Ph. (212) 465-5773 (O) (646) 334-7470 (C) (732) 433-5333 (C) email: ricep@pbworld.com Bruce Moran MTA Ph. (646) 648-5831 Archstone 303 East 83rd Street **owner of #6 oil tank across the street.** New York, NY 10028 Attn.: Harry Cridland General Manager Ph. (212) 600-4901 (212) 600-4549 Fax (212) 600-1389 email: hcridland@archstonemail.com 03/22/10-Hiralkumar Patel. 1:09 PM:- received call from Michelle and Lew Wunderlich. discussed project with Mr. Wunderlich. Lewis Wunderlich MTA Capitol Construction Environmental Manager Ph. (646) 252-3152 (O) (347) 237-6249 (C) email: lwunderlich@mtacc.info 3:34 PM:- sent letter to Mr. Tauber, Mr. Sigh and Mr. Couto requiring soil delineation along underground fill line and endpoint samples. letter emailed to Mr. Tauber, Mr. Sigh, Mr. Couto, Ms. Escobedo, Mr. Groves, Mr. Heaphy, Mr. Rice, Mr. Wunderlich. 03/24/10-Hiralkumar Patel. 2:15 PM:- visited site with DEC Austin. met Mr. Wunderlich, Mr. Groves, Mr. Couto and Ms. Escobedo. inspected basement at building 304. found minor stain under fill line elbow in basement, but no odors. but found strong petroleum odors and dark petroleum stain at foundation under basement window area which is away from fill line location, but in line from excavation outside of building where product was found. new fill port installed at building 304 at the foundation wall. found that owner used brass y-cleanout connector of old fill line in new fill line. no vent pipe noticed outside of building near fill port for building 302. inspected excavations along sidewalk. Mr. Groves mentioned that bedrock is about 1-2 ft below existing excavation bottom. based on observations, Austin asked MTA to remove remaining 1-2 ft soil from excavation bottom to bedrock. if no bedrock within 1 ft depth, then asked to collect endpoint bottom soil sample. also asked to collect endpoint sidewall samples from north and south sidewalls and PID survey only in east and west sidewalls in both excavation. sidewall samples must be taken at the bottom of excavation and at least 6 inches into face of excavation wall. Austin mentioned that after remaining soil in excavation bottom is removed, MTA can backfill and finish their project. but asked to leave fill line excavation (at building 304) open as owner need access for investigation/cleanup. 03/25/10-Hiralkumar Patel. 11:16 AM:- spoke with Larry at Tauber

STREET EXCAVATION (Continued) **S110243316**

Properties. informed Larry about disucussion with MTA during yesterday's site visit and dark stain (with strong petroleum odors) along foundation wall inside basement. Larry mentioned that they are looking for contractor. 03/31/10-Hiralkumar Patel. 1:45 PM:- received call from Ms. Escobedo. she mentioned that contractor will dig soil from bottom of excavation tomorrow and Miller will collect samples. asked Ms. Escobedo to leave excavations open until get sample results back from lab. 04/01/10-Hiralkumar Patel. 1:30 PM:- received call from Michelle. they are excavating excavation bottoms as discussed during site visit. found bedrock at approx. 4.5 ft deep. asked Michelle to collect north and south sidewall samples at about 3.5 ft depth (a depth of excavation bottom where new gas line installed and where oil and water was observed initially). 2:23 PM:- received call from Mike Tauber. he is at the site and saw MTA working in area. he inquired about what work MTA is doing. informed Mr. Tauber about discussion between the Department and MTA during the site visit on 03/24/10. asked Mr. Tauber about status on hiring contractor for investigation along fill line, but he refused to do any investigation and mentioned that his attorney will contact me. 04/07/10-Hiralkumar Patel. 12:41 PM:- received email from Michelle with results of soil samples from excavation. they collected total of twelve water (six from each excavations) and six soil (north, south and bottom sample from each excavations) samples from excavations in front of both buildings. soil samples from north and south sidewalls were collected at about 3-3.5 ft depth and did PID survey in soil in east and west sidewalls. bottom soil samples were collected about 1-1.5 ft below new gas main. PID readings : sample location---PID (in ppm) 302-S ---------- 29.2 ppm 302-N ---------- 0.0 ppm 302-B ---------- 25.3 ppm 302-East ---------311.0 ppm 302-West --------- 20.6 ppm 304-S ----------311.0 ppm 304-N ---------- 1.6 ppm 304-B ----------355.9 ppm 304-East ---------661.8 ppm 304-West --------1620.0 ppm (at one location) 304-West ---------500-900 ppm (in other locations along the west wall) water analyticals:

04/09/10-Hiralkumar Patel. 10:30 AM:- visited site. found MTA crew excavating area around manhole located in front of buildings 302 and

STREET EXCAVATION (Continued) **S110243316**

304. this excavation is north of previous excavations where oil was found. no soil contamination or oil/sheen observed on water pooled inside excavation. spoke with Mr. Groves. he mentioned that shoring will be installed to remove old manhole. Mr. Groves mentioned that after finished gas line connection, they backfilled entire excavation along sidewalk curb where spill was noticed. asked Mr. Groves to send copy of video recording inside buidlings 302 and 304, that was done before excavations on street. 04/23/10-Hiralkumar Patel. 11:21 AM:- received call from Mr. Zapin, insurance broker for building 304. he mentioned that there are multiple insurance companies involved in this case and currently, they are discussing responsibility. Mr. Zapin requested to hold any legal referral and promised to get more info by 05/03/10 (with insurance company who will going to do work and what work they will do under policy conditions). apporved Mr. Zapin's request and asked to submit update by 05/03/10. Ira Zapin **insurance broker for building 304** Whitmore Group Ph. (516) 267-6137 email: izapin@whitmoregroup.com 04/26/10-Hiralkumar Patel. 3:28 PM:- received copy of letter from Tower Group Companies, one of the insurance company for building 304. letter was dated 04/23/10 and was addressed to Tauber Properties. Tower Group denied spill cleanup coverage. 04/27/10-Hiralkumar Patel. 9:10 AM:- received email from Mr. Singh's office with report on soil/water sampling work done by MTA. results of soil/water samples listed above (previously sent by Michelle). 05/04/10-Hiralkumar Patel. 9:22 AM:- received call from Mr. Zapin. he mentioned that insurance companies are still discussing and haven't come to conclusion about who will cover cleanup. asked Mr. Zapin to provide final decision by tomorrow morning. 06/02/10-Hiralkumar Patel. 4:17 PM:- received message from Jeff Klarsfeld, attorney representing 304 E 83rd Realty. Jeffrey Klarsfeld, Esq. Platte, Klarsfeld, Levine & Lachtman, LLP PH. (212) 726-4423 Fax (212) 402-1788 email: jklarsfeld@plattelaw.com 06/08/10-Hiralkumar Patel. 3:50 PM:- spoke with Mr. Klarsfeld and explained him the case. asked him to call DEC Urda on legal matter. 06/15/10-Hiralkumar Patel. received email from DEC legal with copy of email sent by MTA including video showing basement of 304 E 83rd Street. video was captured in Oct. 2009. video shows stain in corner under fill line elbow, but no petroleum odors noticed at this stain during site visit on 03/24/10. area under window, where dark stain and petroleum odors noticed during site visit on 03/24/10, was blocked by boxes and could not confirm whether any stains were there before spill happened. also received copy of soil sampling done at the site, before work started, for disposal purposes. referred to solid waste unit for review. 06/23/10-Hiralkumar Patel. 11:26 AM:- sent letter to Mr. Singh and Mr. Couto acknowledging work done by MTA as discussed during site visit on 03/24/10. letter emailed to Mr. Singh, Mr. Couto, Mr. Wunderlich, Ms. Escobedo and Mr. Klarsfeld. letter copied to DEC Austin and DEC Urda. 07/10/13-Hiralkumar Patel. 2:45 PM:- visited site. inspected basement. no sign of any oil seepage noted in area under the fill line entrance to basement. no petroleum odors noted in basement. observed MTA's construction structure on north side of E 83rd street, closed to 2nd Ave, which may prevent any DOT permit for sidewalk work in front of building 304. 11/17/14-Hiralkumar Patel. discussed with DEC DeMeo and DEC Austin. after reviewing available informaiton, case closed based on following: - available soil and water sample results - absence of petroleum product in excavation during subsequent site visits - absence of petroleum odors in basement of building 304 during site

STREET EXCAVATION (Continued) **S110243316**

visit on 07/10/13 - installation of new aboveground fill port at building 304 **also refer spill #s 0913324 & 0913326.**"

Remarks: "road plates were placed for excavation, upon removal a sheen had come up from the soil. Unknown clean up pending."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 10/9/2002-Vought-Oil spill of approximately 5 gallons occurred on 10/7/2002 during repair of burner line by super (LLC Duell Management-Asher 212-888-9848). 10/10/2002-Vought-Site visit by Vought. Concrete in good condition except for cracks under hot water heater. Duell was directed by NYSDEC to excavate floor and hire conctractor for endpoint sampling of both water and soil. 10/15/2002-Vought-Deull management hired PTC (718-624-4842) who will perform excavation and endpoint sampling under water tank. 11/7/02-Vought-Received endpoint analyticals from PTC which pass TAGM 4046 Required Soil Cleanup Objectives and Groundwater Standards. Also received copy of PTC invoice sent to Duell Management. 11/12/2002-Vought-Called Meara McIntyre to confirm that odors were gone. McIntyre informed that EPA was on-site along with FDNY due to a carbon monoxide exceedance. An immediate site visit was performed by NYSDEC. On-site were Inspector Crilly (212-442-1886) from DEP Enforcement and FDNY. Visual inspection of excavation yielded no remaining odors or petroleum impacted soil. 12/30/2002-Vought-Spoke with Meara McIntyre and no carbon monoxide readings since 11/12/2002. Spill closed by Vought due to reception of passing analyticals and work invoice. All future carbon monoxide complaints will be referred to FDNY. 1/15/2003-Vought-Recevied call from McIntyre of continuing Carbon monoxide problems. Vought returned call and referred McIntyre to NYCDOH (Ray Nieves 212-442-3376)."
Remarks:	"someone was there working on the water & oil burn over the weekend - sand was put down but not clean ed up - fumes are still in the bldg - epa did respond to scene & told them to call dec"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO e2mis 148320 5/12/03 820 Madison Ave, Manhattan - At 1520 mechanic D. Thom reported to the ERC that he was on location to investigate an inside leak and he found a contractor excavating outside and an odor of fuel oil coming from the soil. 12/17/09-Hiralkumar Patel. no alternate address. no PBS record. other spill #s: 9408929, 0207104 and 0301530 spill # 9408929 was reported on 10/09/1994 as found 5 gal #2 oil spilled from faulty gauge. case closed. spill # 0207104 was reported on 10/09/2002 as found 5 gal #2

RETAIL STORES (Continued) **S102148817**

oil spilled while repairing burner. case closed after investigation.
spill # 0301530 was reported on 05/12/2003. duplicate spill.
12/18/09-Hiralkumar Patel. went to site for inspection. no access.
11:52 AM:- left message for Mr. Gecaj. 820 LLC. **property owner**
Duell LLC. **management office** 5 E 57TH St, Floor 10 New York NY
10022-2549 Attn.: Tony Gecaj **property manager** Ph. (212) 888-9848
(347) 672-8592 (C) Fax (212) 888-3505 email:
tony@duellmgmtsystems.com 12/21/09-Hiralkumar Patel. 9:18 AM:- spoke
with Mr. Gecaj. he doesn't know anything about this spill. he
mentioned that his management company was managing this property in
2003. 11:00 AM:- sent email to Mr. Gecaj with copy of spill report
and asked to respond with more info by end of 01/15/10. also informed
him that if no documents available then requires soil and/or gw
investigation at the site. 03/05/10-Hiralkumar Patel. 3:03 PM:- sent
letter to Mr. Gecaj requiring to submit cleanup report. letter
emailed to Mr. Gecaj. 03/09/10-Hiralkumar Patel. 1:26 PM:- received
call from Josephine Mantellino, Vice President of Duell LLC..
Josephine is working for past 12 years and as per her, there was no
excavation work done at the site in 2003. last spill was in 2002
(spill #: 0207104). Josephine mentioned that they did convert to gas
heating system. asked Josephine to find out time when heating system
was changed. 03/16/10-Hiralkumar Patel. 1:00 PM:- received call from
Josephine. she mentioned that tank system was removed in Nov. 2003
and new gas heating system was installed. no work done around May
2003. Josephine has copy of work contract. asked her to submit
contract copy. 1:20 PM:- received copy of contract which was signed
on 07/30/03. 1:30 PM:- spoke with Frank at Commercial Combustion who
signed contract for work in 2003. he doesn't have any record older
than 2005. 04/12/10-Hiralkumar Patel. discussed with DEC Austin about
case closure. based on available information, case closed. spill
closure letter sent to Josephine."

Remarks: "CON ED HAS PERSON ON SITE INVESTIGATING GAS SMELL - UPON HIS ARRIVAL THERE WAS A CONTRACTOR DIGGING AND A PETROLEUM ODOR WAS DETECTED IN EXCAVATION HOLE"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN 3/11/03 - SAMUEL- File available in active unassigned spill files. 8/25/2004 Sangesland spoke with Rick Casten of Styvesant Fuel (718-304-1206) He has some old records on the site and wanted to know what he needed to send in to close the case. He says the tank was abandoned in place around 1990, there was a problem with a leak and Fenley & Nicol was called in for work. 8/30/2004 Sangesland reviewed a package of information submitted by Rick Casten. Summary of events: 6/29/1990 - Date of tank test failure 10/29/1990 - Best Tank Cleaning emptied tank and filled cement Apparently DEC Tomasello requested some investigation work to be dond around this tank (borings) 1/3/1991 - Letter from DEC Tomasello saying the site meets DEC requirements and no additional investigation is necessary. Spill Closed"
Remarks:	"20K TANK SYSTEM FAILED PETRO TITE WITH A GROSS LEAK, NOTHING VISIBLE, ACTION TO BE DETERMINED. "

DEC Memo:	"2/16/17 - Obligado - Desk Duty - I left a message with NYCDOH to call back the DEC. @ 1530 hours I called NYCDOH again and left another message to call back the NYSDEC. @ 1633 hours I called NYCDOH again and got no response. 2/17/17 - Obligado - Desk Duty follow up. I tried NYCDOH again. I was provided with INspector Lei's contact info 646-341-3658. I called Inspector Lei. Due a chemical odor complaint at 1611, NYSDOH inspected the basement of 1611 2nd Ave. THe inspector noticed petroleum type odors. VOCs were 20 ppm under the stairs. No sources of oil observed at 1611. They proceeded to the 1613 basement and observed petroleum odors and PID readings up to 5 ppm. Odors were not as strong as in 1611. They found an active oil tank system, however they did not observe any staining around the active tank. They did find an older empty tank in the back of the basement which had staining on the floor around the tank. According to NYCDOH, there were no complaint in the common areas or residential portions of the building. The building is mixed use commercial 1st floor, residential above. Odors are limited to the basement. At 1611 the odors started about 6 weeks ago. NYCDOH Commissioners Order was issued to correct odor issue. Diana Moy is the lead Inspector and we should contact her for more information. There was a prior spill #1000282 from 1613 2nd AVe managed and closed by Kumar Patel due to

SERVICE BOX 54712 (Continued) **S104507259**

issues with the fill line. This spill is assigned to Kumar Patel. 02/17/17-Hiralkumar Patel. 11:45 AM:- left message for Peter at Lee & Associates for building 1611. 11:49 AM:- left message for DOH Lai. 11:52 AM:- left message for DOH Diana Moy. 12:42 PM:- spoke with Dominick at Rockaway Fuel who delivers oil at building 1613. he doesn't know anything about odor complaint. Dominick provided phone number for property management office (Sierra Real Estate, 212-776-1201). 12:47 PM:- left message at property management. 12:55 PM:- received call from Andrew (646-359-5758), person handling cleaning operation for both buildings 1611 and 1613. informed him about chemical/petroleum odors in building 1611. he will ask property manager to call back. 12:58 PM:- received call from DOH Lai. he mentioned that DOH received a complaint on 02/13/17 about presence of odors similar to paint thinner/kerosene. as per caller, they started noticing odors about 6 weeks ago and MTA representative has inspected the site. DOH inspected the site on 02/14/17 and noted strong odors in basement of building 1611 with 20 ppm on PID. he also inspected building 1613 and noted some stains between an out-of-service tank and building wall. he recorded 5 ppm on PID with no significant odors in building 1613. Mr. Lai stated that he could not confirm if odors in building 1611 were due to any paint jobs or petroleum; or stain in building 1613 was a petroleum stain. while reviewing NYC DOB and NYC ACRIS records, it was noted that both buildings 1611 and 1613 owned by same entity. 84th St. And 2nd Avenue LLC. **owner of building 1611, 1613 and 1615.** c/o Lee & Associates 600 Madison Avenue, 3rd Floor New York, NY 10022 Attn.: Peter Braus Ph. (212) 776-1200 Fax (212) 490-0978 email: pbraus@lee-associates.com 1:25 PM:- left message for Mr. Braus. 1:43 PM:- spoke with Mark (212-772-1611) at Abaleh, diner at building 1611. he mentioned that they started noticing odors (gasoline/turpentine) in the building about six weeks ago. they are noticing odors everyday, but at different intensity at different time of the day. odors are noted in northeast corner of the basement. FDNY responded to the site and confirmed no natural gas leak in the building. due to ongoing 2nd Ave subway line work near the building, landlord called MTA. MTA representative inspected the site with a meter. as per Mark, MTA rep recorded over 100 on the meter. Mark stated that one of his worker has quit job and another one is complaining about health issues due to odors in building. Mark stated that odors are present in the building at this time. 2:30 PM:- visited site with DEC Lakhani. met Mark at building 1611. inspected basement in building 1611. Mark showed area under the stairs from 1st floor, where they noted odors. this area is along the building's northern foundation wall (which is common wall with building 1613), almost in middle of basement. no signs of any liquid seepage noted in the area under the stairs. sewer lines are located in area, with sump on west side of area of concern. no signs of petroleum/chemical noted in the sump. there is no ventilation fans in basement. no petroleum/chemical odors were noted during the site inspection. asked Mark to keep record of time when odors are noted. inspected southern half of basement in building 1613. two (2) 275 gal ASTs are located along the building's southern foundation wall (which is common wall with building 1611) in southeast section of the basement. no signs of spill noted from the tanks. all oil piping are aboveground and no signs of spill from piping either. during inspection, noted an old steel circular structure (which DOH referred as former tank) in middle of basement, approx. 3 ft from the building's southern foundation wall. noted dry stained area between this steel structure

SERVICE BOX 54712 (Continued) **S104507259**

and foundation wall. this stained area is closer to the area under the stairs where Mark claimed odors coming from. found trash within the out-of-service steel structure. no signs of chemical in an out-of-service sump next to the steel structure. spoke with Peter Dreyfuss, property manager. informed him about detection of odors in basement of building 1611. based on field observations, asked Mr. Dreyfuss to investigate stained area along southern foundation wall in basement of building 1613 and set up a ventilation system in basement of building 1611, if odors noted again. Peter Dreyfuss Ph. (917) 754-1245 email: pdreyfuss@sierranyc.com 02/23/17-Hiralkumar Patel. 12:33 PM:- sent email to Mr. Dreyfuss requiring investigation of subsurface soil underneath the stained area in basement of building 1613. also asked him to install a ventilation system in building 1611, if odor noted again. asked Mr. Dreyfuss to submit results of investigation by the end od 03/03/17. 03/01/17-Hiralkumar Patel. 2:09 PM:- received email from Mr. Dreyfuss including copy of letter from Riteway, job ticket from Riteway and a pic of venting fan installed at the site. as per letter from Riteway, two soil samples were collected from 1 ft below concrete floor in front of dyke wall which is installed in front of oil tanks in the building. 2:44 PM:- sent email to Mr. Dreyfuss and informed him that the department has asked to investigate stained area between the building foundation wall and an out-of-service circular steel structure in basement. asked him to submit a site sketch showing sample locations. email copied to Rob. 03/02/17-Hiralkumar Patel. 11:27 AM:- received message from Rob. 11:59 AM:- spoke with Rob. he mentioned that Riteway is sub-contractor working for Ace Atlas. Ace Atlas did not provide clear indication where subsurface investigation is needed so Riteway technician collected samples from a stain area in front of existing tanks in basement. informed Rob that the area, where neighbor is reporting unknown chemical odors, is closer to a stained area between the foundation wall and the out-of-service circular steel structure in middle of basement in building 1613, approx. 10 ft west of tank location. informed him that the department requires subsurface investigation in this stained area. 03/13/17-Hiralkumar Patel. 10:54 AM:- received email from Mr. Dreyfuss including copy of letter from Riteway. Rob mentioned that a sample was taken 1 ft bglow the concrete floor between the foundation wall and steel column. as per the letter, sample was taken on 02/28/17 and submitted to lab on 03/03/17. 03/27/17-Hiralkumar Patel. 12:46 PM:- sent email to Mr. Dreyfuss inquiring about report. email copied to Rob. 04/04/17-Hiralkumar Patel. 10:23 AM:- left message at Riteway. 04/05/17-Hiralkumar Patel. 2:35 PM:- received email from Mr. Dreyfuss including sample result. no contamination found in soil sample. 04/06/17-Hiralkumar Patel. case closed based on available information. 11:45 AM:- sent email to Mr. Dreyfuss and informed him about case closure. email copied to Rob."

Remarks: "caller states that there are stains around the base of the tanks in the basement"

DEC Memo:	"DEC Piper spoke with caller. He was informed by 1611 that oil is in his basement in vicinity of sump. Front of building 1613 had system inspected and fill line was found to be not tight. (by test). Caller stated subway contractor is improperly connecting fill box at new curb line. DEC PAtel has other cases in area. 04/07/10-Hiralkumar Patel. 2:30 PM:- spoke with Dominick at Rockaway fuel. he delivers oil at building 1613 2nd ave, where two 275 gal ASTs are located. Dominick mentioned that MTA changed fill line for building 1613 as part of 2nd ave subway project and recently there was oil found on water in basement of building 1611. so Rockway responded and tested fill line for building 1613 and it failed. Rockaway crew sealed the

APT BUILDING (Continued) **S110307818**

fill port and will install temp. fill port. they also replaced supply line at building 1613 for safety reasons. asked Dominick to test old supply line to confirm no leak from old line. 04/08/10-Hiralkumar Patel. 11:30 AM:- visited site. met Michelle, Mr. Wunderlich and Mr. Groves. as part of 2nd ave subway project, MTA cut sidewalk short along west side of 2nd ave. and under that, with owner's approval, MTA cut fill line for building 1613 and made it short and installed new fill port, in Oct./Nov. 2009. Mr. Groves mentioned that when they cut fill line, they found stain on pipe, but no soil contamination. Mr. Groves also mentioned that fill line was not tested after changes. as no line test done after alteration, asked MTA to investigate area around new fill port to confirm no leak. MTA will expose part of the sidewalk around new fill port tomorrow. inspected sewer trap in basement at building 1611. found water in sewer pit, but no petroleum product or odor noticed. spoke with Chris Meskouris, owner of building 1611. Chris mentioned that his basement was flooded with water on 04/05/10 and when they clean out it, they smelled petroleum from sewer trap. but no oil was observed on water. Chris reported petroleum smell to owner of building 1613. Chris Meskouris **owner of building 1611** Ph. (917) 807-1380 (718) 813-5172 inspected basement at building 1613. site has two 275 gal ASTs. no sign of oil spill found from tanks. fill line runs aboveground inside building and only about 4 ft of fill line is underground under a sidewalk. old and new supply line runs inside conrete warp on concrete floor. no stained area noticed along supply line. 2:48 PM:- left message for Raymond requiring testing of old supply line and investigation along underground portion of fill line at building 1613. Mautner and Glick Corp. **management company for building 1613** 1345 3rd Avenue New York, NY 10021 Attn.: Raymond Muscat **property manager for building 1613** Ph. (973) 725-6049 (C) email: rgroves@dannunziocorp.com received delivery record from Rockaway fuel for building 1613. 04/09/10-Hiralkumar Patel. 10:00 AM:- visited site. found new asphalt patch around fill port. spoke with Michelle, who mentioned that they already exposed fill port area and screened soil with PID. found 1,056 ppm on PID at 2 ft depth (from sidewalk surface) under fill port area. Michelle mentioned that soil underneath the fill port was backfill material after fill line was changed (means this was clean soil when put in ground around fill port) and soil was wet and had strong petroleum odors when exposed today. asked Michelle to re-open the area to expose fill line to see type of joint they did on fill line. contractor re-opened area around fill port. petroleum odors

APT BUILDING (Continued) **S110307818**

from soil around fill port. during site visit, noticed fill port in front of 1605 2nd Ave. spoke with Michelle who confirmed that they changed fill line at building 1605 also. spoke with Tom (718-939-7433), property manager for building 1605 and suggested him to do fill line test to confirm no leak after alteration. asked Mr. Groves to send description of method how they install new fill ports and list of properties along 2nd ave, where they changed fill line. also suggest Michelle to inspect/test fill line before and after their work to avoid any problem. Michelle mentioned that MTA is looking in that. 1:02 PM:- left message for Mr. Wunderlich informing MTA's responsibility based on visual and olfactory observation around fill port that was installed by MTA. 1:33 PM:- spoke with Dominick at Rockaway. they will test supply line on 04/12/10. 2:18 PM:- received call from Raymond. informed him about discussion with Dominick about supply line test and responsibility of MTA for current situation. also informed him that property owner will be responsible for any contamination caused by a leak before MTA altered the fill line. 04/12/10-Hiralkumar Patel. 9:02 AM:- sent CSL to Mr. Singh and Mr. Couto requiring soil delineation along fill line and endpoint samples. letter emailed to Mr. Singh, Mr. Couto, Mr. Wunderlich, Mr. Groves, Michelle and Mr. Muscat. 1:28 PM:- received call from Dominick. they tested old supply line and it passed. asked Dominick to submit test result for record. 04/13/10-Hiralkumar Patel. 11:12 AM:- received letter from Rockaway about old supply line test result. 04/23/10-Hiralkumar Patel. 9:47 AM:- received message from Mr. Couto. 3:43 PM:- left message for Mr. Couto. 04/26/10-Hiralkumar Patel. received email from Mr. Couto (at 6:51 PM on 04/23/10) including letter. as there was no oil spill found in the basement of 1611 during site visit and as there was oil stain found on fill line for building 1613 during sidewalk cut, Mr. Couto believes that they are not responsible for spill incident. 3:24 PM:- spoke with Mr. Couto. informed him that as per Richard from his company, no soil contamination found around stained pipe and it was only a stain on pipe. and as fill line was not tested after it was altered, J. D'Annunzio & Sons is also responsible in this matter. 3:28 PM:- received copy of letter from MTA to DEC Lou requesting meeting to discuss MTA's responsibility as MTA claims that there was no petroleum release or contamination. 05/06/110-Hiralkumar Patel. 3:06 PM:- received email from Mr. Wunderlich with list of properties where they cutback fill lines. they are still preparing list of sites where fill lines were cutback in 2006/2007. sites where MTA cutback fill line recently (contract 2 and 3): 1. 1594 2nd Ave: line altered: Mar. 2010. no alternate address - no spills reported 2. 1605 2nd Ave: line altered: Oct. 2009. no alternate address - no spills reported 3. 250 E 87th St: line altered: Oct. 2009. alternate addresses: 246-250 E 87th street, 249-257 E 86th street, 1659-1679 2nd ave - no spills reported 4. 1849 2nd Ave: line altered: Apr. 2010. alternate addresses: 1849-1861 2nd ave, 215 E 95th Street, 225-235 E 95th Street, 232 E 96th street - no spills reported 5. 1869 2nd Ave: line altered: Aug. 2009. no alternate address - no spills reported 6. 1873 2nd Ave: line altered: Aug. 2009. no alternate address - no spills reported 05/07/10-Hiralkumar Patel. received email from DEC Lou. he has set up meeting with MTA, at 11 AM on 05/13/10, to discuss spill and other issues. 05/12/10-Hiralkumar Patel. meeting rescheduled for 10 AM on 06/03/10. 06/03/10-Hiralkumar Patel. met with MTA representative in meeting with regional director. received list of sites where MTA cut back fill lines (contract 1) in 2007. Mr.

APT BUILDING (Continued) **S110307818**

Wunderlich mentioned that fill line cut back under contract 1 was done prior to July 2008 when NYC DOB code, requiring to install threaded pipes instead of compression-type fitting, was came in effect. now, based on DOB code requirement, MTA has asked its contractors to correct all cut back fill lines and confirm no release from these pipes. asked Mr. Wunderlich to copy me and DEC Austin on future correspondence regarding this fill line cut back work on all the sites (regardless whether there is any open spill number or not). MTA contractor will submit work plan how they will correct existing pipes and how they will do future pipe cut back. suggested Mr. Wunderlich to do fill line test before any kind of work near the line. sites where MTA cutback fill line under contract 1: 1. 1754 2nd Ave: no alternate address - another spill: 9412884 (3 gal spilled in basement) - no PBS record 2. 1774 2nd Ave: alternate addresses: 1774-1780 2nd ave, 300-302 E 93rd Street - no spills reported and PBS record 3. 1804 2nd Ave: alternate address: 1804-1806 2nd ave - no spills reported or PBS record 4. 1808 2nd Ave: no alternate address - no spills reported or PBS record 5. 1821 2nd Ave: no alternate address - no spills reported or PBS record 6. 1829 2nd Ave: no alternate address - no spills reported or PBS record 7. 1834 2nd Ave: alternate address: 1834-1836 2nd Avenue - no spills reported - PBS #: 2-470546. as per PBS record, site has 3,000 gal #2 oil AST on legs which is administratively closed. 07/07/10-Hiralkumar Patel. 1:59 PM:- spoke with Mr. Wunderlich regarding work plan for replacement of 'slip-joints' and work schedule for soil sampling at 1613 2nd ave. Mr. Wunderlich has not received any response from contractor. 2:22 PM:- sent email to Mr. Wunderlich requiring to submit an investigation report (as per the letter dated 04/12/10) for the subject site and a work plan for replacment of cut back fill lines along 2nd ave subway project, by the end of 07/23/10. email copied to Mr. Cuoto, Mr. Singh, Ms. Escobedo and Mr. Muscat. 07/21/10-Hiralkumar Patel. 2:42 PM:- received email from Mr. Wunderlich. he mentioned that their contractors responded with details of work done for fill line cut back, but refused to do further investigation/repair work. MTA has requested submission of work plan for fill line replacement work again. work plan response is due on 08/06/10. Mr. Wunderlich mentioned that MTA will submit response to DEC by August 19th, after they review the information provided by their contractors. email forwarded to DEC Austin. Austin will talk to DEC legal as no documents submitted to DEC yet. 4:47 PM:- received email from Mr. Wunderlich. he mentioned that the MTA s plan is to provide DEC by August 19th with Contract 2A and 5A work plans for: 1. Sampling under the fuel lines and, 2. Replacement of slip-on couplings with Building Code compliant welded or threaded fittings. Mr. Wunderlich also mentioned that the work performed for Contract 1 met the existing Building Code and MTA specification in 2007 when the cutbacks were completed and sampling and coupling replacement will require a Change Order which could take upwards of three months before issuing the contractor a Notice to Proceed. 5:13 PM:- received email from DEC Austin. he will reply back bo Mr. Wunderlich about deadline extension request. 08/18/10-Hiralkumar Patel. 2:27 PM:- received email from Mr. Wunderlich including work plans for soil sampling and replacement of fuel lines for contract C-26005 (95th to 101st Streets) and C-26013 (82dn to 88th Streets). as per letter from EE Cruz (contract C-26005), they replaced total of five fill ports: one at 1869 2nd ave, one at 1873 2nd ave, one at 236 E 95th street and two at 1849 2nd ave. fill ports at 1869 and 1873

APT BUILDING (Continued) **S110307818**

were replaced with threaded connections and fill port at 236 was replaced with welded joint. but two fill ports at building 1849 were replaced with insulated couplings, which are not in compliance as per 2008 NYC DOB code. EE Cruz proposes to uncover two fill lines at building 1849, sample soils under lines and replace lines with proper connections. as per letter from D'Annunzio (contract C-26013), they replaced total of four fill ports: one at 1592 2nd ave, one at 1605 2nd ave, one at 250 E 87th street and one at 1613 2nd ave. D'Annunzio proposes to remove improper coupling and will replace fill line to next available fitting and collection of soil samples from under the lines. Mr. Wunderlich also sent a copy of the MTA s Scope of Work that will be the basis of an Additional Work Order (AWO) for Contract C-26002 (91St to 95th Streets). they will send required documents to S3 Tunnel Constructors by week s end for work proposal. estimating, proposal review and negotiations will follow. subsequent to this process, MTA approval of the AWO could take an additional six weeks. the proposed work plan for contract C-26005 and C-26013 includes replacement of improper fittings and collection of soil samples, but doesn't include tightness testing of all lines altered by MTA as part of 2nd ave subway project. 08/30/10-Hiralkumar Patel. 4:24 PM:- sent email to Mr. Wunderlich requiring to submit revised work plan including line test (regardless of their joint types) for all lines altered by MTA as part of 2nd ave subway project. email copied to DEC Austin. 09/08/10-Hiralkumar Patel. 2:25 PM:- received call from Mr. Wunderlich. he is working on including line tests on proposed work. he will send letter to their contractors and once get verbal agreement, he will send email confirming line test work (and no revised work plan will be submitted). asked Mr. Wunderlich to submit line test work confirmation by end of 09/30/10. 09/29/10-Hiralkumar Patel. 2:22 PM:- received call from Kevin Heaphy. they have exposed fill lines and will replace. Kevin requested a site visit to explain work done. John (347-276-2698) from his office will be on-site during work. 09/30/10-Hiralkumar Patel. 12:13 PM:- received email from Mr. Wunderlich. he confirmed that all contractors will do line test after alteration. 10/06/10-Hiralkumar Patel. 9:00 AM:- went to the intersection of 95th Street and 2nd Ave, as MTA requested a site visit to explain work done under contract 1. met with Kevin and Mr. Wunderlich. Kevin showed one location where fill line was completely exposed as part of new sidewalk entrance to basement. fill port was abandoned with concrete. Mr. Wunderlich mentioned that lines changed under contract 1 not need to be tested as those tanks are not PBS regulgated. asked Mr. Wunderlich to test lines to confirm no leaks after alteration. after further discussion, Mr. Wunderlich agreed to expose entire fill line (from fill port to the building foundation wall) for visual inspection. if there is no visual indication of leak (no soil contamination or staining on pipe), no line test is needed. asked Mr. Wunderlich to take color pics of exposed pipe and area around it. 10/19/10-Hiralkumar Patel. 4:44 PM:- received email from Mr. Wunderlich. he mentioned that fill line investigation work has started for Contract 2A (94th to 101st streets). Mr. Wunderlich also included copy of email from Greg Cellamare from PB America. Greg mentioned that three fill lines at one of the building were exposed. no sign of leak found. collected one five-point composite soil sample from excavation bottom. Greg also included site map and some pics. 11/10/10-Hiralkumar Patel. received email from Mr. Wunderlich (at 4:24 PM on 11/09/10). he mentioned that plumber tried to get permit to work on altered fill lines, but it could take 4 months to get

APT BUILDING (Continued) **S110307818**

permit from NYC DOB. Mr. Wunderlich requested a permit request letter. 11/12/10-Hiralkumar Patel. 3:59 PM:- sent email to Mr. Wunderlich and asked him to send list of addresses where they need permit. 01/11/11-Hiralkumar Patel. 1:59 PM:- received email form Mr. Wunderlich. he mentioned that contractor for Contract 2 (95th to 101st Street) is waiting to finish pressure testing. for Contract 1 (91st to 95th Street), contractor found threaded joints on all 7 locations and no leaks were present. Mr. Wunderlich has short letter report which he will send in few days. for Contract 5 (82nd to 88th Street), MTA is working with 2 vendors for required work. Mr. Wunderlich will send updates soon. 01/18/11-Hiralkumar Patel. 1:28 PM:- received email from Mr. Wunderlich including report from fill line cut back for contract 1 (91st to 95th Street). total of 7 fill lines were cut back. all 7 lines were threaded joints. no visible contamination observed. Mr. Wunderlich mentioned that work at building 1821 2nd ave was not done by their contractor (report doesn't include other contractor's info). fill lines under contract 1 were cut back in 2007. as no spill noticed after three years, DEC Austin mentioned that pressure testing is not needed for contract 1. 01/21/11-Hiralkumar Patel. 2:22 PM:- left message for Mr. Wunderlich. 01/26/11-Hiralkumar Patel. 3:02 PM:- received email from Mr. Wunderlich. Contract 2A (96th 101St Street): Yesterday, Cruz-Tully met with Normandie Court Building Manager, Robert Ammiano, regarding fuel-line cut back testing. It was verified that the fuel-lines to be tested can be isolated from the tanks and pressure tested. Cruz-Tully is meeting with Olympic Plumbing on Thursday and will discuss the test feasibility. In addition, there are two other locations that will need pressure testing. Cruz-Tully is working on coordinating this with the appropriate building owners. In addition, they are working on getting MTA insurance approval to conduct the work (assuming that Olympic agrees that the pressure testing is feasible). Contract 5A (88th St to 82nd): JDSI is evaluating a proposal from Fenley & Nicol Environmental to perform all tasks as outlined in their Work Plan (previously submitted to DEC). Will advise as we get additional information from JDSI. 02/01/11-Hiralkumar Patel. 2:57 PM:- received email from Mr. Wunderlich. he mentioned that the fill line at 1821 2nd AVe was not changed as not impacting the construction. 04/25/11-Hiralkumar Patel. 10:51 AM:- sent email to Mr. Wunderlich inquiring updates. 2:31 PM:- received email from Mr. Wunderlich. he mentioned that Fenley and Nicol has been hired for contract 5A, but no schedule available yet. for contract 2A, they have hired First Choice Mechanical who is processing insurance paperwork. 04/29/11-Hiralkumar Patel. 3:58 PM:- received email from Mr. Wunderlich. he mentioned that Fenley and Nicol has filed application to NYC DOB for permit and once obtain the permit, work will be scheduled for contract 5A. for contract 2A, contractor has finished insurance paperwork with MTA and will schedule work soon. 05/17/11-Hiralkumar Patel. 12:09 PM:- received email from Mr. Wunderlich. he mentioned that fill line at 1849 96th street will be replaced by building management. 06/14/11-Hiralkumar Patel. 9:20 AM:- received email from Mr. Wunderlich. he mentioned that their permit application to change fill line joint for building 1605 2nd ave was denied as there is an existing boiler installation violation. DOB refused to issue any new permit until the boiler violation is corrected. Mr. Wunderlich requested a permit request letter for buildings 250 E 87th Street and 1592 2nd Avenue. he mentioned that DEC intervention is not required at building 1609 2nd ave as a new

APT BUILDING (Continued) **S110307818**

fuel line has already been installed by property owner. MTA will sample the soil to ensure that there were not leaks from the coupling installed by MTA contractor. discussed with DEC Austin regarding 1605 2nd Ave. Austin mentioned that as there is an existing violation, the department can not do anything. he mentioned that if the line can not be fixed then it should be closed to prevent any more deliveries. 06/17/11-Hiralkumar Patel. 3:33 PM:- spoke with Mr. Wunderlich. informed him that the department can not do anything about existing violation at 1605 2nd ave. if the line can not be fixed then it should be closed to prevent any more deliveries. during conversation, he mentioned that owner of 250 E 87th Street is planning to convert to gas heating system this summer. so he requested to cancel the line replacement. informed him that the line must be either fixed or a temporary line should be installed as the oil heating system will be in use until the conversion is completed. and soil must be tested to confirm no release from improper joint. he will send more information and schedule. 08/16/11-Hiralkumar Patel. received message from Mr. Wunderlich. 08/19/11-Hiralkumar Patel. 12:31 PM:- spoke with Mr. Wunderlich. he mentioned that tank system will be removed from building 250 E 87th street and a new gas heating system will be installed. he mentioned that as per property manager, there will be no more oil deliveries to the tank system. Mr. Wunderlich mentioned that fill line will be cut back and capped. they will test the soil underneath the fitting that they installed. 12:40 PM:- sent email to Mr. Wunderlich. informed him that if the fill line will not be used again, then the department approves the proposed line removal work. 02/10/12-Hiralkumar Patel. 3:42 PM:- received email from Mr. Wunderlich including report for fill line sampling at 1592, 1605 and 1613 2nd ave and 250 E 87th street. fill lines at these locations were excavated, inspected for contamination, sampled and replaced with threaded couplings. Mr. Wunderlich mentioned that fuel oil was not released at any of these locations. for building 1613, as per report from Fenley & Nicol, they cut back and remove an existing two-inch fill line. following soil sampling from the excavation, the remaining pipe within the street entrance was capped and the excavation was backfilled. one bottom soil sample was collected from beneath the fill line. 38.7 ppm was recorded on PID in soil sample. no VOC compounds were found in sample, but found minor SVOC contamination. the submitted report is missing final excavation dimensions and scaled site map (it includes an aerial map). 04/11/12-Hiralkumar Patel. 11:54 AM:- left message for (and sent email to) Mr. Wunderlich. informed him that the submitted report for building 1613 is not acceptable as missing information and the department requires further investigation. asked him to call back. 2:25 PM:- received call from Mr. Wunderlich. asked him to submit excavation dimensions, endpoint sample depth and scaled site map with endpoint sample location and fill port/fill line joint location. 2:34 PM:- sent email to Mr. Wunderlich and asked him to submit missing information. informed him that the department may require additional investigation after reviewing missing information. 05/30/12-Hiralkumar Patel. 11:25 AM:- received message from Mike Zobel from Fenley & Nicol. 11:32 AM:- received meial from Mike from F&N. he requested call back to discuss about required information. Mike Zobel Fenley & Nicol Ph. (631) 586-4900 Ext. 187 (631) 561-1340 (C) email: mzobel@fenleynicol.com 06/11/12-Hiralkumar Patel. 1:22 PM:- received call from Mike. he mentioned that the person worked on this project is no longer with the company and they don't have any

APT BUILDING (Continued) **S110307818**

information about excavation dimensions. Mike mentioned that based on available docments, F&N only replaced the joint on the line and collected a composite sample. 07/17/12-Hiralkumar Patel. 10:57 AM:- received call from Mike. he checked files again and found no additional information. 11/27/12-Hiralkumar Patel. received call from Mr. Wunderlich inquiring about case status. 12/11/12-Hiralkumar Patel. after discussing with DEC Austin, case closed based on available information/report and no odor complaints from nearby buildings/residents. 2:41 PM:- sent spill closure letter to Mr. Singh and Mr. Couto. letter emailed to Mr. Singh, Mr. Couto, Mr. Wunderlich and Mr. Muscat."

Remarks: "fill line test failed at building 1613 second ave. caller reports oil smell in basement of 1611 second ave."

DEC Memo:	"10/30/17-Zhune responded to this spill. The tank is a 7500gallons tank. As per the meter there was 2900 gallons of fuel oil #2 inside the tank. Metro(Oil Company) was suppose to delivery 3400 gallons but at 3300 gallons oil started coming out by the vent pipe. Approximately 100 gallons of fuel oil #2 spilled onto the service entrance and it went to the stairs that take to the boiler and tank room and impacted two drains. There was also oil in the floor of the tank room. The sewer drains on the street were visual checked they found no oil. The spill in the drains inside the building was cleaned. They also cleaned the spill on the service entrance, the stairs and the utility room. 11/28/17- Christ email-Hello, As follow

OUTSIDE OF BUILIDING (Continued) **S121461713**

up on your request to close out the open spill at the aforementioned location, I have the following. We have completed the remediation of the site due to the overfill of Number 2 fuel oil at this building. All cleanup activities have been documented and a summary report has been prepared. My office has billed out for the services and we anticipate Payment from management very shortly. Please give the building till weeks end to clear up the balance and the spill closure report will be emailed to you. Thanks for you cooperation. 2/1/18-Christ brought the report to the Department on January 30, 2018 The report stated that apparently, while making a scheduled oil delivery at this property, an overfill occurred releasing oil onto the surface of the rear building. Responding noted #2 fuel oil covering the surface of the concrete surrounding the vent line, which flowed down the staircase at the side entrance of the building. The concrete impacted was found to be in solid condition with no cracks or areas containing dirt and could be classified as impervious subsurface impact. The reported quantity, released during this incident was 10 gallons. Environmental technicians proceeded to clean all surface oil released using both a team genie and pressure washer along with detergent to lift the oil. All Boro tank utilized a vacuum tanker in conjunction with the steam cleaner to vacuum up all residual oil/water during the remediation process. In total 500 gallons of wash water/oil was recovered during the clean up activities. I Have attached a copy of the waste manifest, for your records, in appendix A and Daily job tickets and work invoices in appendix B at the end of this report. Photo of various stages of the clean-up process are also included at the end of this report. In conclusion, this oil spill has been properly cleaned and the surface was restored to original condition with no additional work necessary. Spill Closed. "

Remarks: "contained and clean up is enrt"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 6/14/2001 - Sangesland received a 2 page writeup from CA Rich (Stephen Mallnowski-516-576-8844) which outlines plans to test the subject 7500 gal buried tank, geoprobe the area and define the contamination. This work plan sounds fine, CA Rich will submit a report with the results of this investigation. 6/26/2001 - Stephen Mallnowski called: He said lines and tank could not be separated. System test failed. A new fill line was installed from the curb into the courtyard. The building will be installing a temporary tank in the rear service yard. The building runs it's airconditioning off of oil so it needs oil storage. When the temp tank is installed, the buried tank will be opened, cleaned and geoprobed around. 7/25/2001 - Sangesland met on site with Mike Yager of CA Rich to see oil spill into basement (thru wall) and the area of the buried tank. Mr. Yager showed a Draft copy of the boring test results. A preliminary diagram of where the spill plume is. We had some discussion on the pros and cons of removing the tank vs rebuilding the tank in place. Also discussed options on cleaning up the site. SITE CONDITIONS: It seems that the area is clean from surface to about 8 feet. There is a

SPILL NUMBER 0102639 (Continued) **S105055903**

contaminated area from 8 to 12 ft deep and then a solid bedrock layer at 12 ft deep. If this is true, there may be a pocket of contamination in the soil around the footing of the building, but perhaps the basement floor is built directly on the bedrock and therefore no oil contamination went under the floor. CA Rich will prepare a report showing the present conditions, results of the soil boring work and proposals of how to solve the problem. 8/7/2001 - Steve Molinowski called to say the cost of removing the tank is over $750,000. He would like to propose abandoning the tank in place, installing a smaller above ground tank in the courtyard and developing a treatment system to address the #6 oil contamination in the 8' to 12' depth level. Sangesland spoke with Mr. Molinowski to discuss the options. Apparently the entire area is bedrock at about 12' (per several geoprobes) If this is true, we might assume that the area of the tank and the building basement were blasted out, perhaps leaving a bowl like formation in the ground. Mr. Molinowski will investigate this possibility. If true, some form of water with surfactant (BioSolve) injected around the tank and then a couple of recovery wells around the tank and near the basement may draw the #6 oil down and out of the site. Mr. Molinowski will develop a proposal and submit it to the DEC for review. Spring 2002 - Sangesland was on site when excavation work was done on the site by A.L.Eastmond. Heavy contamination was excavated along the north and west wall of the building (boiler room corner). Excavation went as deep as possible without impacting the structure of the building. DEC guess that 90% of the contamination was removed. 11/27/2002 - Sangesland left a voice message with property manager Mr. George Skintej at tel #212-508-7299. DEC knows the work was done at the site, but no final report has ever been submitted. 3/31/2004 Sangesland never received a closure report from either the building management nor their consultants. Since the excavation work was witnessed by the DEC in spring 2002, the case is now being closed out."

(646) 467-2289 (C) email: escobedom@pbworld.com michelle.escobedo@2avesubway.com 3:00 PM:- visited site. met Michelle, Phil Rice, Rich Groves, Nitin Patel (MTA, 201-954-0718) and Jim Moran. inspected area. found stained soil and some free product in southwest corner of the trench and this area is right next to the fill port. Rich mentioned that they are digging 6 ft by 8 ft by 6 ft hole to install a drainage box for transformer vault which is west of the drainage box (other side of the fill port). transformer vault box area was dug last year. Rich mentioned that they will dug two trenches: one east-west connecting transformer vault and drainage box and one north-south connecting drainage box and sewer manhole. connecting trenches will be about 5 ft deep. a potion of the fill line will be exposed during excavating east-west trench. Jim mentioned that fill line was installed about 8 years ago and he suspects a damage to fill line during excavation for transformer vault. based on available information, asked both MTA and property owner to investigate/remediate contaminated area. asked Jim to test fill line prior to anymore oil deliveries. suggested Jim and Phil to continue excavation as area is open and part of fill line will be exposed during trench excavation. Sant Singh Construction Manager 2nd Ave Subway Project MTA Captial Construction 20 Exchange Place, 14th Floor New York, NY 10005 PH. Jim mentioned that fill line was installed that way and it is not displaced during transformer vault excavation last year. fill line runs through PVC pipe under the sidewalk and once enter into building, it runs aboveground. inspected area where fill line enters into building. no oil found in PVC pipe at the foundation wall. Jim mentioned that they will work with MTA to continue soil removal. he has hired Blackstone environmental. he mentioned that J. D'Annunzio will continue soil excavation and Blackstone will oversee the cleanup. 11/16/10-Hiralkumar Patel. 8:10 AM:- received call from Michelle. she mentioned that excavation for pipe installation has finished, but there is more contamination. Michelle doesn't know who will continue excavation. 9:17 AM:- spoke with Jim. Jim mentioned that their contractor was on-site yesterday and they are working with MTA to remove remaining contamination. 11/17/10-Hiralkumar Patel. 11:15 AM:- visited site. met PTC crew on-site. MTA finished excavation for their pipe work and then PTC removed remaining

APT BLDG (Continued) **S102959966**

contamination. found clean soil in all sidewalls and bottom of excavation. excavation was very close to fill line location as oil was not gone too far. after discussing with DEC Austin, based on observations during the site visits, case closed. 2:24 PM:- sent email to Mr. Moran informing that case has been closed. email copied to Michelle, Mr. Rice, Rich and Mr. Cridland."

Remarks: "contamination found during excavation"

DEC Memo:	"4/08/05. Report came from ECO duty officer Steven Lakeman. He dispatched an ECO to check this site. YK. 4/08/05. 15:35. J.Krimgold

APT BLDG (Continued) **S102959966**

received a call from ECO duty officer Steven Lakeman asking for assistance at the site to ECOs Freeman and Bartosezewsky. Cris Sawyer responded to the site. YK. 04/12/05 - Sawyer - Met ECO's Freeman and Bartosezewsky as well as building manager Gerry Harnett at the site. There was about 5 feet of #6 oil in the sump in the garage. A 25,000 #6 oil UST is located in building under the second level of the garage and is the suspected source. The building manager was order to pump out sump/tank and hire environmental contractor to pressure test tank and system as well as do subsuface investigation. A tank test/contaminated soil letter was sent to reinforce the order. 6/15/05 - Austin - Project reassigned from Sawyer to Krimgold - end 11/01/2005 The spill was assigned to AZ by Jon Kolleeny on 11/01/2005. AZ 12/13/2005 Conversation with Margie Torres (Building Manager)212-624-4371. She will get back to me with a cleanup information. AZ 1/23/2006 I contacted Susan Dee (Building Manager) and requested site assessment report. AZ 1/24/2006 I contacted Tom Leddy (Protest) off.#631-321-4670, c.# 631-943-5917. He stated that they isolated the tank from the inside except for the vent and the tank passed. The return line and remote fill were pressure tested and they failed. The return line was excavated and a large hole was found. Oil was found in two sump pits in the garage. The excavated around the retun line and removed about 24 drums of contaminated soil. They advanced 7 borings. He will send me a report with their findings. AZ 1/31/2005 John Leddy (Protest) 631-321-4670. They tested the tank on April 27, 2005. The tank is #6 fuel oil 25,000 gal located in a sub basement. They trenched the area around the return line. They took out 24 drums of contaminated soil. The tank was cleaned and emptied in place. Also, they observed water in a sump pit with oil floating on the top of it. Geoprobe sampling was done after contaminated soil was taken out. Contaminated water was there as of June of 2005. They did this work for Abilene Inc. 718-372-4210 (Mark Huber). Absorbent socks were applied in the sump pit. I instructed John Leddy (Protest) to pump out contaminated water and excavate contaminated soil from the basement. According to John Leddy contamination is located around the sump pit. AZ 2/2/2006 Received and reviewed a report from Pro Test dated June 1, 2005 and received on Jan. 27, 2006 by DEC. The report states that a large hole in the return line was found during the excavation. Groundwater and floating product were found in the excavation and in the two sump pits. Absorbent socks were used to remove oil from the sumps. 7 borings were advanced to 2 1/2 - 4 feet where refusal was experienced. Soil samples showed some soil contamination. AZ 3/17/2006 Contacted John Leddy (Protest). They did 7 geoprobe borings in May 2005 and they came out clean. They submitted soil sampling results from the trench. They came out clean. They will submit to DEC a complete remedial report including info on removed soil and pumped water. AZ 3/28/2006 Conversation with Jeff Solomon (718-372-4210 Abilene Inc.) representing the owner. I gave instructions to submit a full closure/remeddiation report including info regarding reoved soil, plan to scale, info on groundwater free phase petroleum in sump pits. So far only lab analysis and hand drawn sketch were submitted on March 8, 2006. AZ 4/24/2006 Received and reviewed report from Pro Test (John Leddy). Called John Leddy and requested information regarding water with oil pumped out from the sump. He will get back to me. AZ 4/26/2006 Conversation with Jeff Solomon. There was some sheen in the pit and they placed socks in the sump pit. They steam cleaned the pit on March 8, 2006. AZ 5/7/2006 According to the report

APT BLDG (Continued) **S102959966**

submitted by Pro Test on April 6, 2006, 24, 55 gallon drums of contaminated soil and absorbent socks were removed in 2005. Seven borings were advanced around the leaking return line. All seven borings encountered refusal at 2 1/2 to 4 feet. The STARS 8021 and 8270 analysis of soil samples showed no contamination. Absorbent socks were used until the water in sump was clean. It was last checked om March 3, 2006. Based on this information spill case is closed. AZ"

APT BLDG (Continued) **S102959966**

DEC Memo: "04/18/08-Hiralkumar Patel. spoke with Rene. they found spill from tank and also at vent pipe, due to overfill. site has 18,000 gal #6 oil square tank. as per Rene, tank is located aboveground on about 4 inche I-beams. no dripping found at bottom. tank is located in sub-subbasement and due to length of vent pipe, oil came out from top of tank, before it came out from vent. minor spill at vent pipe, but most of oil spilled inside tank vault, on concrete floor. Rene pumped out oil and was doing power wash. will be back on-site on 04/21/08 for cleanup of any remaining oil. as per Rene, Cardinal boiler installed tank in 2005 and will inspect tank for any other problems. as per Rene, spill was totally contained inside solid concrete vault. no subsurface impacts. left message for Buddy Weid (Ph.: 718-625-4350, fax: 718-852-4592) at Cardinal. PBS #: 2-250902. 04/28/08-Hiralkumar Patel. spoke with Buddy. they got approval for required repair. need to re-weld 5 ft * 5 ft piece on top. fill port has been sealed. no immediate threat. will install tempoary tank this week and will empty out current tank for repair. property manager: Arch Stone Properties 303 East 83rd Street New York, NY 10028 Attn.: Harry Cridland Ph. (212) 600-4901 email: hcridland@archstonemail.com as spill was contained, no subsurface impacts and Cardinal will do repair, case closed."

DEC Region:	2
DER Facility ID:	455395
DEC Memo:	"10/1/14 TJD TTF letter prepared and owner contacted to obtain accurate contact information as the PBS registration (2-113646) does not accurately reflect current site status. Specifically, the following items need correction: 1) Registration is expired (02/03/2008) 2) Mail correspondent and owner contact information is incorrect - DeMeo spoke with Camile at listed phone number (212.674.6123) and she provides a mailing address of 210 E23rd Street, New York, NY 10010 for all correspondence. Demeo informed Camile (receptionist) to notify her supervisor the information on the PBS registration is incorrect and needs to be changed. New address provided is as follows: New Bedford Management Corp. 210 East 23rd Street New York, NY 10010 3)There is no authorized representative listed on the expired PBS Registration - based upon discussion with owner's representative (Camile) the property manager is Greg Bazhdari. To ensure delivery of DEC letter to owner the mail is being sent to address listed above and also e-mailed to greg@nbmgmt.com 4) The operator listed was also contacted to obtain accurate mailing address - the individual listed on the registration (John Fitzpatrick) is no longer employed by the facility. When asked for a contact name of the operator the response was the building super. The discrepancies identified in the registration have been forwarded to PBS unit for follow-up. Letter has been uploaded to DECDOCS and both e-mailed and mailed to above individual. 10/01/14-Hiralkumar Patel. alternate address: 8-14 East 85th Street no other spills found. PBS #: 2-113646. as per PBS record, the site has one 3,000 gal #6 oil AST on saddles. PBS registration expired on 02/03/08. ---------- 10 East 85th Street, Inc. **property owner** c/o New Bedford Management Corp. 210 East 23rd Street, 5th Floor New York, NY 10010 Attn.: Gregory Bazhdari **property manager** PH. (212) 674-6123 (646) 453-5409 Fax (212) 532-0248 email: greg@nbmgmt.com 11/12/14-Hiralkumar Patel. 12:59 PM:- left message for Mr. Bazhdari. 2:18 PM:- received message from Mr. Bazhdari. 11/13/14-Hiralkumar Patel. 8:21 AM:- left message for Mr. Bazhdari. 8:27 AM:- received call from Mr. Bazhdari. he mentioned that the leak was found in one of the line. leak has been fixed and system passed the retest. asked Mr. Bazhdari to submit report. 12/01/14-Hiralkumar Patel. received copy of consent order, sent to Mr. Bazhdari. as per the consent

APT COMPLEX (Continued) **S117364511**

order, PBS renewal and required report (as per letter dated 10/01/14) are due within 15 days of the effective date of the order. signed consent order is due on 12/15/14. 03/03/15-Hiralkumar Patel. 12:49 PM:- received copy of fully executed consent order, signed on 02/25/15. as per the signed order, report is due within 15 days of the effective date of the order. 04/13/15-Hiralkumar Patel. 1:5 PM:- spoke with Ray at PTC inquiring about the case. he asked to contact Frank at Marlande Heating. 1:55 PM:- spoke with Frank at Marlande Heating. his company went to the site in May 2014 but they have not received any response after that. Frank Marlande Heating Corp. Ph. (718) 993-4350 08/25/15-Hiralkumar Patel. 8:56 AM:- spoke with PTC. they did isolation test in Oct. 2014 and found leak in fill and vent lines. the tank, supply and return lines were tight. asked to submit copy of result of initial system test and subsequent isolation test. 08/28/15-Hiralkumar Patel. received fax from PTC including tank test results and copy of work invoice. the tank only passed tightness test on 10/02/14. as per work invoice, fill and vent lines were not good. 02/24/16-Hiralkumar Patel. received copy of Commissioner's Order. 09/14/16-Hiralkumar Patel. 10:35 AM:- received message from Pete from Riteway. 3:23 PM:- spoke with Pete. Riteway is retained to replace leaking fill and vent lines. Pete mentioned that they were provided an invoice from previous contractor which indicates tight tank, but failed fill and vent lines during an isolation test (possibly an invoice from PTC dated 10/02/14). Riteway is installing new fill lines in the same location. they have installed new lines within the building, but could not install section under the sidewalk due to ongoing ConEd work. informed Pete that the case has been referred to legal and suggested him to contact DEC legal. 09/15/16-Hiralkumar Patel. 2:50 PM:- received email from Pete including a letter stating that Rite Way will install a new fill and vent lines once ConEd completes their job. 11/16/16-Hiralkumar Patel. 12:39 PM:- received email from David including closure report. Riteway excavated soil to install new fill and vent lines. no contamination was found. new lines were tested tight. the report is missing information about location of old piping and new piping; and also depth. 12:58 PM:- left message for Pete. 1:04 PM:- received call from Pete. he mentioned that old piping were about 2 ft bg and new pipes are installed in same location. he will submit revised report confirming installation of new lines in same location of old lines and site pics. also asked him to submit result of tank system tightness test. 12/08/16-Hiralkumar Patel. 9:19 AM:- received email from David including copy of previously submitted report dated 11/16/16 and copy of tank system test result dated 12/07/16. the existing tank system was tested tight. the report still missing information about location, depth and status of previously failed fill/vent lines. as per the report, Riteway removed fill material placed by ConEd after installation of new gas line, but it does not confirm that Riteway excavated soil in former fill/vent line location. 9:35 AM:- sent email to David and asked him to submit revised report including details about location, depth and status of former fill/vent piping. asked him to submit a 'scaled' site map including location of tank system (with piping), former fill/vent piping, and new gas line. email copied to Mr. Bazdari and DEC Urda. 9:36 AM:- received email message from Microsoft outlook stating that email to Mr. Bazdari could not be delivered. 12/09/16-Hiralkumar Patel. 6:54 AM:- received email from David including revised report with scaled site map and site pics. as per the site map, new gas line is installed within 5 ft

APT COMPLEX (Continued) **S117364511**

distance from both fill and vent lines. new gas line was installed at 5 ft bg. old fill line was located inside a coal chute and the new fill line was installed in same location. the old fill line was found in good condition. a new vent line was installed in the same location, near the building foundation wall. based on review of available information and due to no report of findings of soil contamination by ConEd during installation of the new gas line, no further work needed at the site. waiting for update on legal actions prior to closing the spill case. 01/20/17-Hiralkumar Patel. received confirmation from DEC legal about case settlement and no pending actions. case closed based on available information. Anastasia Novikova **property manager** New Bedford Management Corp. Ph. (212) 674-6123 (O) (646) 453-5273 Fax (212) 532-0248 email: anastasia@nbmgmt.com 3:37 PM:- sent spill closure letter to Ms. Novikova. letter emailed to Ms. Novikova, DEC Urda and David."

Remarks: "retest pending"

Contact Name:	FDNY SHIELD #13335
DEC Memo:	"5/13/2021 - Feng - Desk Duty in office. I spoke to Officer Henry of FDNY HAZMAT 1. There was a water main broke and they received the report at 10:04am. The water is turned off right now. The water affected the boiler and the fuel oil tank. The tank might be compromised and unknown amount of oil was still inside any tanks. The water might went into the tank and wash out the product. When FDNY arrived, there was 500 gallons of water and oil mixture inside the basement. FDNY is not helping to vac out the water oil mixture because they think it is not flammable or hazardous. The building management will need to hire a contractor to vac out the mixture. FDNY, Con Ed and the plumbers are still on scene. I informed him that DEC will be responding. I checked the PBS registration. There are 2 registrations: PBS 2-276375, 7,500-gallon #4 oil AST PBS 2-511757, 7,500-gallon #6 oil converted to non-regulated use AST Building Superintendent: (no phone number was provided) Al Kolenovic Eric Kim is on duty to a Staten Island site. Harmandeep Sekhon will be responding to this spill. 5/14/21 - Sekhon ON 5/13/21 - site inspected. Met Super (Al Kolenovic- 9176836233) on site. As a result of a water main break immediately to the east of 1035 Park Avenue on East 86th Street, starting at approximately 7:30 am, clean NYC water entered the cellar mechanical room of 1035 Park Avenue for approximately 7 hours. Water entry and accumulation was monitored by FDNY until the source of the water was stopped. There was no oil spill at the site. There was a small amount of oil on the fuel burning equipment and floor of the mechanical room (estimated at less than 1-2 gallons of oil). This oil residue floated on the top of the water from the flood and was skimmed off and collected for proper disposal. The remaining water was pumped out of the room via the cellar level sump.John Lonergan from Signal restoration was on site to assist. Case closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 8/10/2002. J. KRIMGOLD @ SITE. TALKED TO SUPERINTENDENT-KAZIMIERS POLTORAK(212-628-9684). MANAGER- DENNIS BRADY (212-421-1300). THE SPILL WAS DISCOVERED BY A HANDYMAN AT ABOUT 8:00 AM. BUILDING MANAGEMENT CALLED EASTMAN AT ABOUT 9-10 AM. 20000 GAL #6 OIL TANK IN SUB-BASEMENT, IN TANK ROOM DEVELOPED A LEAK AFTER BUTTOM SLUGE WAS REMOVED 3 DAYS AGO. EXACT LOCATION OF A HALL IS UNKNOWN AT THIS TIME. ENTRY INTO THE TANK ROOM IS RESTRICTED BY HIGH TEMPERATURE OF THE TANK AND INSIDE THE ROOM. EASTMAN OIL WAS CALLED TO PERFORM THE CLEANUP. OIL TANK WAS PUMPED OUT AND ABOUT 1000 GAL FROM THE TANK ROOM FLOOR WAS REMOVED. NO NOTIFICATION WAS MADE BY THE BUILDING

APARTMENT COMPLEX (Continued) **S105996494**

MANAGEMENT TO DEC REGARDING SPILL INCIDENT. THE SPILL WAS REPORTED 12 HOURS LATER BY A CLEANUP CO. (EASTMAN OIL). 08/12/02. RENEE LOUIS(EASTMAN)/J. KRIMGOLD/PHONE. EASTMAN CONTINUE CLEANUP INSIDE THE TANK ROOM. WHEN ASKED WHY THE NOTIFICATION TO THE SPILL HOTLINE WAS MADE 12 HOURS AFTER DISCOVERY OF THE SPILL, HE STATED THAT HE THOUGHT THAT BUILDING MANAGEMENT NOTIFIED DEC ALREADY. 8/23/02. J. KRIMGOLD/RENEE LOUIS/PHONE. CLEANUP COMPLETED. CONCRETE FLOOR IN THE TANK ROOM IN A GOOD SHAPE. NO CRACKS WAS OBSERVED. DEC AGREED FOR NO FURTHER ACTION AT THIS TIME. TANK REPAIR IS SCHEDULED FOR THE NEXT WEEK. "

Remarks: "CONTAINED INSIDE TANK ROOM. NO CALL BACK NEEDED."

DEC Memo:	"4/17/08 Called Michaele McCarthy of Charles H. Greenthal Management (212)340-9300. Temp tanks to be installed and tank to be cleaned out, inspected and repaired. Work to be done by controlled combustion. Sent ttf letter to: Michaele McCarthy Charles H. Greenthal Management 4 Park Avenue New York, NY 10016 Faxed ttf letter to Michaele McCarthy (646)383-9153. bf 5/7/08 Yesterday, I received a letter from Jerry Williams of Controlled Combustion staing the following: a. temp tanks were installed. b. 7500 gal. tank was pumped out and cleaned. It has a cement liner. c. they will be providing proposals to the building to do subsurface investigation around the tank and install a new AST. bf 7/9/08 Received letter from Nicholas Marrone of Miller Environmental on 7/7/08 requesting an update. I sent contaminated soil letter to Michaele Mc Carthy at address above. I faxed letter to N. Marrone at (516)876-7946. bf 10/6/08 On 10/1/08, received letter

APRT (Continued) **S109064219**

from Jerry Williams. They will install 5 borings around the tank to delineate spill. Report to be sent at conclusion of findings. bf 10/23/08 Received report dated 10/20/08 and prepared by Miller Environmental. Borings advanced around the tank. Manhattan schist encountered at each boring at 3.5 feet to 5 feet below ground. All parameters were below TAGM 4046 requirements. Minimal oil; seeped into the tank between May 2008 and October 2008. 2/11/10 Tank 001 is still open according to PBS records and tightness testing is overdue since 2008. Called Barbara Jarrett, Compliance Manager, Charles H. Greenthal Management (212)340-9300. She was not sure of tank's status. I explained that the tank is overdue for testing and that the spill can not be closed until PBS issues are resolved. She was warned that DEC General Counsel in Albany has been enforcing overdue tank tightness tests. I e-mailed her the PBS Notification Form and the PBS Closure Application: bjarrett@greenthal.com. She said the Controlled Combustion is handling the closure. She gave me the contact: Jerry Williams (718)367-9800. I called Mr. Williams and left a voicemail message to call me regarding the tank closure. bf 4/16/10 Spoke to Nick Marrone of Miller Environemtnal (845)569-1200 x-104. He said no measurable amount of oil is entering the tank. Sump next to tank had no oil. He will send closure letter. I told him after receing satisfactory letter/report and PBS closure application, spill can be closed. bf 8/27/10 Yesterday received closure report from Miller Environmental by e-mail. PBS application for Tank 001 closure not yet in DEC file. After application to close Tank 001 is processed, the spill can be closed. bf 9/16/10 Received e-aiol from nick marrone notifying me that the PBS database was updated and after review of the PBS file found that it was. NFA. bf"

DEC Memo:	"Sangesland spoke with Joe Ostrowski at PTC. He says PTC cleaned this 10,000 gal tank yesterday and left 1800 gal of #6 in the tank when they were done. Earlier today Castle delivered another 3800 gal for a total of 5600 gal. The tank is vaulted and this afternoon the super noticed oil dripping from the bottom of the tank. PTC has sent a crew to the site. The tank is being vacuumed out and will be cleaned & repaired. The spill in the vault will also be cleaned. There may be a portion of one corner of the tank which is in contact with the ground. Details on this area will be investigated. Spill case apprears to be under control . PTC is working on the cleanup. 06/19/07 Clean up required letter was sent to(as per PBS) DOUGLAS ELLIMAN PROPERTY 675 THIRD AVENUE NEW YORK, NY 10017 ATTN: ANNE GILLETTE ** Miller Environmental Group(MEG)inspected the fuel oil spill on June 14,2007.Tank is located underneath sidewalk, south of 69th Street.As per MEG, the site had a remediation system in place from a previous spill.There were multiple observation wells already installed down gradient of the gw flow in the cellar.The remediation system was out of service and would need repair.VEFR was utilized as an active remediation techniques to recover any floating product from the on site wells and sump. Due to the high viscosity of the fuel oil,product level continue to slowly recharge into recovery wells.Recovery data in the report.** 09/19/08 Spoke with Nick Morrane, MEG. A status report will be sent to DEC after permission from the property owner.(sr) 07/16/09 Rec'd a call yesterday from Tony Santos, Building Manager for 870 5th Avenue. He told me that oil seeping into his building basement from the adjacent building, 875 5th Avenue. I called Miller Environmental PM Nich Marrone and asked him to inspect the basement. Nick returned my call and told me that his crews inspected the basement of 870 and identified minor oil seepage through the wall where it meets the floor.He indicated that oil travels through the cracks in bedrock that's hard to capture. The remediation system at 875 is in place.(sr) 02/08/10 Spoke with Nich Marrone.He changed his office location.New number is (845)569-1200. Status report will be sent to DEC.(sr) 03/02/10 Rec'd status report

APARTMENT (Continued) **S108639804**

from Miller Environmental Group. The 10,000 gallon AST was taken out of service.Product continued to recharge in the monitoring wells and the existing remediation system was re evaluated.The system was repaired and modified to meet the current clean up criteria.The Multi-Phase Extractor(MPX) was periodically tested to determine the effectiveness in order to remediate the heavy #6 oil.The water effluent from the oil water separator was decanted into a 55 gallon drums and temporarily stored onsite until there was enough to remove by vacuum truck.Waste water discharge permits were approved by NYCDEP. During the reporting period January 19,2010 four hundred ninety two(492) gallons of oil was removed from the products drums.Free phase floating product has been consistently observed in extraction points B-1, B-2, B-5 B-7 and monitoring well MW-1.(sr) 08/07/12 Rec'd closure report dated March 17 2012 from Miller Environmental Group. Ground water from extraction points B-1, B-2, B-5, B-6, B-7 and monitoring well M-2 was sampled on November 3, 2011 and again on February 28,2012.Free phase petroleum product was absent and VOCs/SVOCs were not above DEC TOGS 1.1.1 standards.Ground water sampling results have revealed minimal concentration of dissolve phase VOCs and SVOCs.NFA required.Case closed.(sr)"

DEC Memo:	"9/19/2005 - According to Mr. Kenny Rosenblatt of Champion Parking Garage, the building has a pored concrete basement over the area where the abandoned 550-gallon USTs were located. Also, there are no odors of petroleum noted and no contact with subslab soils. Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 3/4/03 - Administratively closed. Closed Due To The Nature / Extent Of The Spill Report. 6/23/04 Reviewed 1994 Tyree report in file. Total BTEX in soil greater than 18000 ppb. Spill Reopened. Rommel. 3/15/16: J.Kann - received a call from Becky Tanil (908-458-9609) of Vertex in NJ. They did some work on a site at 234 East 85th Street, former spill 9001494. Based on the UIS, this spill has been closed since 2005. Based on the information provided to me on the phone, it is believed that back in 2005 the work was done to the extent feasible, however there was some contamination that remained. Last year as part of a change in use of the building, the building was gutted and the basement floor lowered. As a result the consultant was able to remove the three tanks that were previously closed in place, as well as a fourth tank that was located. The report will be email

234 EAST 85TH STREET (Continued) **S104275576**

to me. The owners are seeking refinancing. As per Jeff, spill reassigned to Santosh Mahat (runner for today) and reopened. Becky indicated that she had spoken with Janet (Brown?), who said that the spill was still open. Janet Brown confirmed Ralph Keating was retired and I let her know that Region 2 will take the spill. 3/16/16: Mahat A closure report was uploaded on D2 by DEC Kann on 3/15/16. Report is under DEC review. 3/31/16: Mahat Report Review: Based on the closure report uploaded on D2, the Department does not warrant any further investigation and remedial work on the site. Please refer to the report. Spill case is closed on NYSDEC Spill Database. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO ROMMEL 2/10/03 9:26 Demeo on site. Delivery to wrong 20,000 gallon tank (east tank, not west tank). Catch basins impacted. Oil spread along 1/2 a city block. Some subsurface structures impacted. Eastmond just arrived on site. Oil is seeping from broken petrometer in basement. Manholes on top of USTs removed, no obvious oil on top of tank. Oil is being transferred to west tank to reduce pressure on petrometer. 11:29 Demeo on site. DLE notified for assistance with NYPD to close street. 68th Street closed between 2nd and 3rd. Oil transferred from east to west tank. Oil stopped seeping from petrometer. 6/30/06 - Haggerty - received fax from Larry Jaret of Rudin Management Company (212-407-2537). The spill actually occurred on East 69th Street, not East 68th Street. The tanks are on opposite sides of the building - possibly cause of delivery error. The fax also included invoices from Al Eastmond who pressure washed and disposed of the oil contaminated water. 7/11/06 - Haggerty - received fax from Raymond Sojka of Amerada Hess Corp. The fax confirms the invoices from Al Eastmond represent the only work done concerning the spill. Spill transferred from CO (MJHAGGER) 3/6/07 - Austin -

RUDIN MANAGEMENT CO (Continued) **S104650692**

Assigned to Rahman - end 06/29/07 - RAHMAN - Spoke with Anthony Lavarco, property manager (212-407-2400),who is looking for info/docs. He put me contact with their envirmental manager, Larry Jaret (212-407-2537),who is also looking for info/docs. He states their management comapany paid for repairs from Al Eastmond,but still trying to get Amerada Hess to pay. He gave me contact info for Steve King @ Hess (732-750-6707)- 06/29/07 11/05/07 Reviewed clean up documents. Eastmond provided equipment and service to clean up the spill.Documents in edocs. Spill can be closed.(SR) "

Remarks: "caller reporting superintendant of the building told the company driver to deliver 6,000 gallons to the east tank and it was supposed to be the west tank - the wrong tank was delivered to, and there was a spill - f.d. is on scene now."

DEC Memo: "5/4/00: Referred from O'Connell to Arakhan for follow up. Sam scheduled to make site visit with Vic Basso (Gas Ops) tomorrow. (JHO) 2/10/03: e-mail from O'Connell to Arakhan requesting info for closure: Sam: Back in the Spring/Summer of 2000 I referred a number of gas condensate spills to you for follow up. I want to close them out, so I need some info from you. 2. 215 E. 68th St. - you were scheduled to make a site visit with Vic Basso on 5/5/00. That's all I have in our files. What was the outcome? Arakhan's response: Jane: My memory and notes recall the following: 2. 5 E. 68th St. - I met Vic Basso @ 10:15 on 5/5 at the site. Investigation revealed that a boiler booster had ruptured its seal and released lubricating oil into the gas main. Cleanup and repairs were completed. No follow up needed. e2mis no. 131-210: Unknown liquid spilled on basement floor and on two non-company electricians. Unknown liquid came from gas flange spill contained on absorbant pads, also installed plastic around flange on gas pipe,chemist on location at 14:10 to take samples of liquid. Basso reports that at 13:43 he interviewed Accard electrician Joe Desimone and that 2-weeks ago there was a leak on a gas booster that he had worked on.On 5-3-00 electricains worked on the booster changing wires and conduits to the booster and thats when they found oil in the electric panel box, when they removed box they spilled app. 2-3 ozs. onto floor. Edward Algarin dismantled the booster and cleaned same, the rags that was used to clean this booster have been collected, but the clothes that he was wearing he had gotten some oil on them and he threw them out into dumpster. 5-04-00 Ed and Joe cleaned booster again and the rags are on site. 14:00 chem-lab Tony Rivera on location the oil that was collected was to be sampled for P.C.B., oil I.D. flashpoint total TCLP less herb. and pest. There was not enough sample oil to do all that was requested so they are going to do P.C.B. and oil I.D. 15:15 Sam Arakhan from the N.Y.S/D.E.C. paged Basso who called him back and gave him an update. Sam will be out to the site on 5-5-00 at app. 10:30. CHEM LAB SAMPLED PCB AND OIL. REMOVED TEMP PROBE DOWNSTREAM-NO OIL FOUND.HEAD OF SERVICE DRY. BOOSTER OUTLET HAS OIL FILM. REMOVED FLANGES FROM CHECK VALVES DOWNSTREAM, 2OZ OIL IN BASE OF VALVES. 5/5/00-0515AM-ID ANALYSIS SHOWS LESS THAN 1 PPM PCB'S -INDICATES AN OIL SIMILAR TO THAT OF GAS CONDENSATE. UPDATE - May 12, 2000 GDS mechanic tapped 1/2 hole in drip leg between head of service valve and meter valve. Drip was dry. No evidence of liquid. GDS mechanic removed temperature control fitting. Inside of pipe was moist, but no liquids present. GDS mechanic checked plug at bottom of meter. Plug was moist but no liquids present. GDS mechanic took off blank flange at booster inlet. Oil present in pipe. Oil was soaked up with pads. Pipe was wiped clean from booster inlet back to tee section of check valve manifold. UPDATE 05-24-00 On May 18th, Gary Windman, Environmental Coordinator met with representative (Joe Desimone) of Accardi Electric on location. Accardi Electric was in the process of repairing the electrical housing on the gas booster (location of gas leak forcing shutdown). Informed them that the oil which was found in pipe tested for lubricating oil and dielectric fluid #6. Advised to take precautions when cleaning piping and booster by wearing proper PPE. Also advised Accardi to open both check valves and wipe them dry. Lab Sequence Number: 00-04690-001 Date Reported: 05/16/00 Sun#6

RUDIN MANAGEMENT CO (Continued) **S104650692**

Cable Oil 100 % Lubricating Oils 100 % Petroleum Products/Dielectric Fluid - Sample contains lubricating oil and dielectric fluid. Therefore, there are similarities. Both lubricating oil (SAE#0) and dielectric fluid #6 are being reported. 5/24/00: Gary Windman received e-mail from Paul Mulqueen, Account Executive. Paul was informed by Rudin Management that repair and cleanup work has been completed at location. They are ready for gas."

Remarks: "3 OUNCES OF UNK LIQUID CAME OUT OF A NATURAL GAS PIPE LANDING ON 2 PEOPLE AND THE FLOOR - CLEAN UP PENDING - CASE #131210 - PCB SAMPLE TAKEN, ID & TCLP WASTE CHARACTERIZATION"

SUBWAY STATION (Continued) **S121982745**

complainant to an OPP dispatch mailbox: Who Did It: The floor cleaners servicing the Staples (and/or possibly the Best Buy next door) by 86th and Lexington. They load their floor cleaner/polisher into an old minivan. Its a man and a woman, both middle aged. What Occurred: Every morning on my walk to the subway station at 86th St., around 8:20am, I notice that the floor cleaners are emptying the contents of their cleaning machine right into the gutter, flowing right into the storm drain. The solution looks soapy with a blue tint. When Did It Occur: This happens very routinely, either every morning or every other morning. County: New York Municipality: New York Location Or Address: 86th St and Lexington Avenue. How Did It Occur: Additional Details: I believe you should be able to catch them in the act just by surveiling the area between 8:00am and 9:00am on most mornings. DEC Memo:	"7/8/15: Mahat DEC Mahat responded to Reported # 2 fuel oil seepage inside the storage area of a restaurant located at 1626 Second Ave, Manhattan. Building is five stories walkups with a commercial on the first floor and residential above. The building has 2-275 #2 fuel oil tanks interconnected. Tanks are capsulated with concrete cinder blocks with no access. A professional contractor has been retained to exposed the tanks and pump it out if necessary. A temporary tanks has been arranged for meantime. Seepage was inside the storage room and it was contained within. No other resources were impacted. No odor/vapor inside the kitchen and food prep area. A complete investigation report is due from the retained contractor. Milro - Contractor Jimmy United Metro - Carrier Joe Zummo 347.539.1477 Teams Management - Tank Owner Frank Pecora 212.861.0303 La Pulperia- Tenant Carlos Barroz 212.933.0757 7/16/15: Mahat DEC Mahat received an email from the Joe Paul Basso with updated on the site: The containment walls around the tanks has been partially removed to allow cleaning of the spill area. The tank area has been cleaned as well as the adjacent cold storage room. The tanks are old and showing signs of rust but they are not leaking. A crack was observed in the cold

RESIDENCE AND RESTARAUNT (Continued) **S117975289**

storage room and investigated by PID. An area of exposed soil adjacent to the tanks was also investigated by PID. No odors were evident in the soil and PID readings were less than 10 parts per million. Oil has not impacted the soil at the site. The drain observed in the cold storage room was holding oil and cleaned out as well. The drain appears to connect to the sewer system. Milro recommends encapsulating the concrete slab with an epoxy paint as a final vapor barrier to complete the cleanup at the site. Attached is a site sketch of the spill area and photos. Paul Basso Milro Associates, Inc. 49 Hanse Ave Freeport, NY 11520 516 379 1500 Based on the picture and the information on the email: The Department does not warrant any further investigation on the site. Hence, the spill case will be closed in DEC Spill Database. Following update was received from the Paul Basso. The remaining work to be done is the encapsulation of the concrete slab and rebuilding of the tank walls. After accessing the tank area during the cleanup the oil tanks were visible. The condition of the oil tanks were observed to be rusty. Although the tanks are not leaking it is recommended the oil tanks be replaced prior to encapsulating the floor and rebuilding the walls due to the age and condition of the tanks. Should the tanks leak in the future the walls will have to be removed again for access. We were waiting to hear back regarding this decision before scheduling the encapsulation and wall restoration. Santosh Mahot of the DEC has approved the encapsulation work and will close the spill file based upon what was done in response to this release. Mr. Mahot is aware we are waiting for the decision on the oil tanks. Paul Basso Milro Associates, Inc. 49 Hanse Ave Freeport, NY 11520 516 379 1500 "

DEC Memo:	"11/14/2013: Mahat A phone conversation was conducted with Mr. Rob Hill (Rite way Tank). Mr. Hill was hired to replace the fill line. During the process, Mr. Hill discovered the contaminated soil along the fill line pathway. The excavation of the contaminated soil (#2 fuel oil) is under way and so far two drums of the soil has been collected. As per Mr. Hill, conformation samples will be taken from the effected are for analytical result. After the completion of the excavation and fill line replacement a TT result will be submitted to DEC. Mr. Piper DEC was briefed about the spill. Further investigation and action will executed by DEC upon arrival of the report. DEC Piper received and reviewed closure report. Basedo n work to date ,this spill is closed. See dec docs for report if warranted."

DEC Memo:	"Several calls have been made looking for the property owner... still no answer. 1/30/06 - Raphael Ketani. I looked in the Property Shark and the NYC Tax Rolls and found this: Duell LLC, 5 East 86 Street, NY, NY, 10022 and 50 LLC, 50 East 86 Street, NY, NY, 10028. Benjamin Duell's name also appears to be associated with the above addresses. I will send a contaminated soil letter. Eston Clare, general manager of T&S Trucking (718) 499-2900 called to find out what the DEC wanted. He said that the spill had been cleaned up. I told him that I needed an official letter from T&S stating why the spill happened, what was done to clean it up inside and out, and whether any drains or sewers were impacted. He said he would send it. 2/7/06 - Raphael Ketani. I received a call from a case manager from Duell, LLC. He said the spill had been cleaned up weeks ago by Castle Oil. He asked what I needed in order to close the case. I told him that Castle Oil had to send me a report describing the spill in detail, any impacts to drains, or sewers, any cracks in the floor, any environmental impacts, how much was spilled and recovered, and so forth. He said he would get it for me. 2/23/06 - Raphael Ketani. I spoke to Rob Hill of Castle Oil ((718) 579-3410) regarding the spill and what I wanted in

APRTMENT (Continued) **S107522053**

a closure report. He said he would send the report to me by March 1. 2/27/06 - Raphael Ketani. I received a FAXed letter from Castle Oil describing the spill and the cleanup. Mr. Hill told me by phone that there were no impacts to drains, sewers, or sumps, there were no cracks in the floor of the tank room for oil to seep through. He said that less than a gallon sprayed out the stick port. Based upon the FAXed letter and my phone conversation with Mr. Hill, I am closing the case."

DEC Memo:	"3/21/12-Vought-Daytime runner.Vought noted PBS#2-045489 for site and sie has one 10,00-gallon #6 fuel oil AST and management company is: Michelle Schmidt Bldg. Management. Co. Inc. 417 Fifth Avenue 4th Floor New York, NY 10016 Attn: Michelle Schmidt Mikey Napoleatano Ph: (212)557-6700 Emergency : John Duma (212)879-0191 Cell:917-681-5386 Vought called Castle Oil (Rich Clifford Cell:(917)202-5119 Ph:(718)579-3410)) and spill out vent (15-20 gallons) no soil affected and no drains affected. Spill came from top of AST from vent and fill lines oil leaked onto floor to boiler room sump. Petroleum Tank Cleaners en-route and he will have super turn off sump as well as call 311 for NYCDEP notification. Concrete is in good condition and is painted with no cracks. No vapor complaints received to date and FDNY on-scene. Vought called and spoke to Petroleum Tank Cleaners and confirmed that they were enroute to site. Vought called Michelle Schmidt and spoke to Building Manager (Minas Styponias) and he will immediately contact Castle, send someone to the site and return call to Vought. Vought noted that site visit may be performed by DEC to confirm cleanup. DEC Zhune performing site visit as she will be proximal to site for separate spill site visit. 12/18/17 - Austin - Project reassigned from Vought to DeMeo - end 6/13/18 TJD File review. Based upon above remarks the reported spill was due to an overfill. No drains or soils to be affected by an estimated 15-20 gallon spill. No notes from Zhune inspection. Spill is administratively closed."
Remarks:	"spill to out side paved area/inside, spill to tank room, boiler room, and sump area. Clean up underway"

Spiller Company:	001
Contact Name:	OFFICER IN CHARGE
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 11/5/03. J. Krimgold @ site. FDNY Haz-Mat pumped about 30 gal of oil from a concrete basement floor and put a speedy-dri. According to FDNY oil was coming through a front basement wall. Observed: oil is still coming to the basement from the wall at a very low rate. Oil delivery was made today at about 18:00 hours. First floor store owner stated that petrometer reading before delivery was 340 gal. in 1080 gal tank. Current reading is also 340 gal. Called Supper. and management - no answer, left massages. 11/6/03. J. Krimgold at site. No more seepage of oil from the basement wall. Talked to a delivery co. (Mystic) representative Sam. He stated that Mystic's driver delivered 402 gal of #2 oil on 11/5/03 to this address. Driver checked the gage before delivery, but not after. Due to a heavy rain during delivery, driver probably did not pay

APARTMENT HOUSE (Continued) **S106126308**

attention to the vent whistle. Mystic's service crew confirmed, by direct sticking of the tank, that it currently contained about 15-16 of oil (~300 gal.) Since no oil went to the tank, it was assumed, that a fill line which runs from the sidewalk curb to the basement let go and about 400 gal of oil was pumped into the ground under the sidewalk in front of the building. RP, building owner (Sendar Equities), hired A.L. Eastmond to cleanup basement. 11/6/03. Rene (Eastmond) reported that he has completed a cleanup of the basement. 11/6/03. J. Krimgold spoke to Suzan Ramsen (build. MGNT) and requested to perform envir. investigation and remediation of this site. They are going to hire envir. consult. to perform this task. J. Krimgold scheduled a follow up visit on 11/12/03. 11/10/03. Contaminated soil letter has been sent to: SUZAN RAMSEN SENDAR EQUITIES LLC 29 BARSTOW RD. GREAT NECK, NY 11021 Additional info: Super - Steve Pooran (516)286-2093 Manager - Michael Alejandro - (516)353-3322, office (212)875-8293 x 2. MGNT office contact - Suzan Ransen - (516)466-6680 x 102 Owner - Adam Katz. 12/11/03. J. Krimgold spoke to Kerry Sheridas (Miller). They are planing to do borings on 12/17/03. 12/17/03. J.Krimgold @ site. Miller Env. performing soil borings. Significant contamination was found along outer building wall. Excavation of the sidewalk tentatively scheduled for 01/05/04. 01/05/04. J.Krimgold @ site. Miller Env. excavating at the sidewalk along building wall. Strong petrol. odor. Encountered bedrock at 5-6' close to the wall and 2' under sidewalk. Agreed that all contaminated soil above the bedrock will be removed. 02/09/04. A letter-report dated February 3, 2004 submitted to the Department by Environmental Consulting & Management Services,Inc. (ECMS) has been reviewed. Based on the information provided, the oil spill which was on the site has been satisfactorily remediated. NFA letter has been sent to Jadam Equites and cc to ECMS."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 10/25/93, 10:05 AM: Spoke with John Hegerty (Con Ed). Leak is 50 to 100 gph, 2000 gallons so far. Did visual over weekend, did not find leak. No leak on bridge. Checked main manholes, now shecking side manholes. First freeze will be 1st Ave & 59th St Bridge. 10/25/93, 12:30 PM: Met with Petty Officers Dooley and Spendsen (USCG) - they said Con Ed examined the cable along the bridge and found no leaks. Con Ed crew was on site at 1st Ave & 59th St excavating to perform freeze on line to find leak. Left scene at 1:30 PM. (CAE) 10/25/93, 8:00 PM: Oil started coming up in road on 1st Ave between 70th and 71st St. When I arrived, Con Ed crew already excavating for freeze test. Con Ed had thrown sand on road to absorb oil. By 8:30 found leak, wedged wooden spike in it. By 9:15 had clamp on hole. Oil started seeping back into trench from surrounding soil. While spill was still ongoing, checked manholes - found oil/water flowing in manhole at intersection of 71st St/1st Ave - sewer, high flow, 15 - 20 feet deep. Original excavation trench was about 4' x 8'. Con Ed planned to excavte another 2' on the south side of the trench and 18 on the east side. Left scene at 9:40 PM. (CAE) 10/26/93, 11:00 AM: Con Ed crew is welding barrel onto pipe. Bob DePass (Con Ed) showed me copies of the incident report for spill. The reason there was a delay in reporting was becuase the substation waited 19 hrs to report the loss of fluid to CIG. There is still free product leaching into the excavation. DePass is taking samples but they are saturated with oil. Mr. Silva is supervising the repair - they are going to put steel sheeting over pit and not backfill right away. Says they are going to excavate soils and allow seepage to

FEEDER 38M03 (Continued) **S102147194**

continue and pump out. Told DePass we may ask them to do borings in the area to determine extent of contamination. 10/28/93: spoke with John Hegerty and Bob DePass - total leak amount 8375 gallons. 11/9/93: spoke with Pete Fehn of AAA - he said only 200 gallons of liquid oil was removed from scene, along with 20 yards of contaminated soil. The majority of the 8375 - 200 = 8175 gallons still in the ground. Using porosity data for contaminated soils (assuming 50% saturation), calculated that approx. 6200 gallons still in ground. (CAE) 3/13/03: TRANSFERRED FROM ENGELHARDT TO O'CONNELL. APPENDIX B SITE NO. 7. Update 12/8/05 This spill is being closed based on site 7b investigation report in eDocs link for Spill # 0111140. "

Remarks: "LEAK IN FEEDER CABLE - NOTIFIED NRC & NYC DEP - CALLED BACK THEY ARE TRYING TO LOCATE THE LEAK; @6:00 TIL 11:00PM LEAK NOT LOCATED. USCG CALLED @ ~10:00PM, WILL SEND TEAM TO CHECK WATER WAYS."

Spiller Name:	RENEE LEWIS
Spiller Company:	APRT
Spiller Address:	64 EAST 86TH STREET
Spiller Company:	001
Contact Name:	RENEE LEWIS
DEC Memo:	"Renee says there is a 5,000 gal tank in a tank room on saddles. Tank center is in contact with the ground. There appears to be a leak in the tank into the ground. Approx 20 feet from the tank, there is a crack in the floor with oil coming up through the ground. Eastmond will come to pump out the tank, the tank will be removed and the floor opened up to see what is there. 03/06/08-Hiralkumar Patel. received call from Rene. they are currently cleaning tank. once they clean the tank, will remove it. asked Rene to call once tank get removed. Rene mentioned that building runs on gas heating system and only use oil ocassionally. Mr. Ljbuomil **building super** Ph. (212) 517-3548 Ms. Rosen **building manager** Orsid Management Ph. (212)

APRT (Continued) **S109060255**

484-3776 03/11/08-Hiralkumar Patel. visited site. met Rene, Jimmy from Leardon Boiler and Ljbuomil, building super. tank has been removed. found tank room floor in good condition except one hole on floor, on right side of tank room entrance. tank room floor is about 3.5 ft higher than boiler room floor. there is main gas room between tank and boiler room. hole found in tank is close to main gas room. oil found in boiler room along side of main gas room, about 20 ft away from tank room. found dark stains on all walls and corners inside tank room. site always used #2 oil. asked Rene to open area around hole (instead of boring) to remove any contaminated soil. if contaminated soil extends towards boiler room then will excavate upto feasible limit. also asked to excavate area in boiler room where oil found. asked to do soil borings outside of tank room wall, in small area between tank and boiler room, near exhaust stack. once all contaminated soil removed and endpoint found clean in tank room, they will install new 5000 gal totally aboveground tank. found strong odors inside tank room, but no odors found in boiler room or upstair in lobby. no product found in sump in boiler room. Jimmy Mazzo Leardon Boiler Works, Inc. Ph. (917) 617-5510 (C) email: jimmy@leardonboilerworks.com PBS #: 2-276340 03/17/08-Hiralkumar Patel. received call from Rene and Jimmy. he dug area in tank room (by hole found in floor), in gas meter room and also in boiler room. they found bedrock at about 2 ft depth in each location. found contaminated soil between floor and bedrock. asked them to remove all contaminated soil and if needed, asked to dig more horizontally. Rosen Randazzo **building manager** 64 East 86th Street Owners Inc. c/o Orsid Realty Corp. 1740 Broadway, 2nd Floor New York, NY 10019-4315 PH. (212) 484-3776 Fax (212) 586-4524 email: rrandazzo@orsidr.com sent letter to Ms. Randazzo requiring endpoint samples. letter emailed to Ms. Randazzo and Jimmy at boiler company. 04/08/08-Hiralkumar Patel. received call from Rene. they dug about 8 ft by 15-20 ft area inside tank room and excavation is about 1.5 to 2.5 ft deep. no excavation done in boiler room yet. will finish tank room and install new tank and then will do cleanup in boiler room 04/09/08-Hiralkumar Patel. visited site. met Rene. found bedrock in entire excavation in tank room. found water in excavation. some oil droplets in water. some area in bedrock soaked with oil. asked Rene to collect soil (mostly bedrock chips) samples from sidewalls of excavation and water sample (grab sample) from excavation inside tank room. Rene also excavate area in boiler room, close to wall sepearting gas meter room and boiler room and where oil was found initially. asked Rene to collect one soil sidewall sample from excavation inside boiler room also. there will be total of three soil and one groundwater sample from tank room and one soil sample from boiler room. based on sample analyticals, may require remediation. 04/16/08-Hiralkumar Patel. received call from Jimmy requesting deadline extension for final report submission. sent email to Jimmy approving his request and asked to submit report by May 30, 2008. 05/02/08-Hiralkumar Patel. received soil analyticals from Rene. he took five soil samples. found some contamination in sample # 2/Left of Entrance , but below limit. no information about any groundwater sample (as asked during earlier site visit). left message for Rene. 05/08/08-Hiralkumar Patel. received fax from Rene with groundwater sample analytical. he analyzed sample for TPH only and found 203 ppm values. 05/13/08-Hiralkumar Patel. received call from Rene. asked him to analyze groundwater sample with method 8260 only. Rene will collect sample again. 05/27/08-Hiralkumar Patel. received fax from

APRT (Continued) **S109060255**

Rene. he collected another water sample. no contamination found in water sample. received call from Rene. based on sample analyticals, approved his request to install new tank inside tank room. once they finish tank installation, then they will do further investigation inside gas meter room and in boiler room where initially oil was found. sent email to Rene with tank installation approval. 08/15/08-Hiralkumar Patel. spoke with Rene. they will finish all work by 08/22/08 and will submit report by 08/29/08. 12/01/08-Hiralkumar Patel. left message for Ms. Randazzo to submit report by 12/05/08. received call from Rene. he will submit report. 12/04/08-Hiralkumar Patel. received fax from Rene with spill closure report. removed contamianted soil from gas room and boiler room to depth of 2 ft where bedrock found. removed total of 9.5 durms (55 gal) of contamianted material from tank room, boiler room and gas room. collected soil samples from boiler room, gas room and area in rear of tank room (near exhause stack). no contamination found in any samples. spoke with Mr. Ljbuomil, building super. he mentioned that no more oil coming into boiler room. he confirmed that excavation was performed to bedrock which is at 2 ft depth. based on submitted documents, case closed."

Contact Name:	NANCY HEFF
DEC Memo:	"2/28/18-Zhune spoke to Nancy Heff 917-640-6045. Nancy said that she resides in the basement that the oil line that goes from the tank to the boiler is an underground line and it was leaking. They replaced the line with an aboveground line. She complained strong odors in the building. She also said she was not in the building 2/27/18 TJD Spills staff responded to a complaint of heavy fuel oil odors in the basement of the above address. NYSDOH staff had notified regional spills staff of an odor complaint the previous day, however, the address provided was incorrect and the affected tenant did not immediately report the condition to the Spills Hotline as directed by DOH. Upon arrival to the location a petroleum odor was confirmed exterior to the basement entrance but Spills staff were unable to gain access to the building. Following some interviews with area residents the superintendent was located in an adjacent building, and access to inspect was granted. The building is serviced by a two tank manifolded system with a capacity of 550 gallons. Upon inspection, the tank and associated piping were ruled out as the source of the odors. A steel plate was observed in the common hallway of the basement access with heavy petroleum odors noted, the steel plate was removed and separate phase fuel oil was observed in the bottom of an earthen sump. The management agent was contacted and notified of the inspection findings and required remedial actions. Staff has confirmed a qualified environmental contractor responded to recover fuel and install ventilation equipment. Further investigation of sub-surface soils is ongoing. 5/9/18 :Sekhon As directed by Demeo, called David Chan (718 855 7272) of Riteway Tank maintenance Corp to schedule inspection at 420 E 78st . 5/11/18 : Sekhon Got email from David to confirm inspection date (5/16/18) 5/17/18 : Sekhon Visited site with DEC T.DeMeo on 5/16, met Mr. Paul Collins & Mr. Frank (Riteway Tanks). Petroleum odors observed in hallway leading to the boiler room . A ventilation equipment was in place to minimize the odors during time of inspection. Leaking waterline observed in the excavated hallway. Further contractor remedial action is pending receipt of laboratory analysis. 9/4/18 - Austin - Received call from

BASEMENT - RW (Continued) **S121983463**

Mike Hughes at NYSDOH - Doreen (tenant in 420 E. 78 St) expressed concern to him that further work being considered for remediation (subsurface SSDS install under her particular apartment) would seriously damage/disrupt her apartment. She was assured that this option was not being pushed by either the NYSDOH or by DEC. - end. 9/7/18-Lin-Received call on duty desk from Nancy Heff. She said oil is coming back. 10/4/18 - Austin - Spill is being reassigned from Tim DeMeo, who is out on extended leave, to Ryan Piper. I forwarded the 6/27/18 remediation plan submitted by Riteway Tank, as well as info from DeMeo outlining the background and current status of this matter. Ryan will need to review the case and then re-group with the RP and their contractor to complete this remediation. - end 4/23/19-DEC piper received and reviewed closure report. While there is an issue with the disposal, the spill has been addressed and the spill can be closed. See report in DEC dos if warranted. "

DEC Memo:	"#157206. On 2/12/05 at 15:30 S. Pesuto # 14921 of #9 called to report that at 15:20 he discovered a 5 gallon spill of transformer oil in vault-4060. This structure is located at 415-429 E. 79 St. There is 15 gallons of water mixed with the oil. He was there responding to a B ticket # ME05002643 that was reported by the fire dept. for a smoking structure. When he arrived the fire dept was not on location & the structure was not smoking and was barricaided.. He was working on acct # f3445. He states that the oil is coming from the bottom of the unit. He hung a tag # 268 & took 2 samples with a chain of custody # EE-00921. The history of the unit is 5 ppm sampled on 12/12/2000 with a lab sequence # 0011617002. There was smoke but not now. No fire was involved. No sewers or waterways were affected. No private property was involved. No injuries were related to the spill. No movement on the liquid. A tanker will be ordered for 23:00 today to start the cleanup. 2/12/05 16:19 CIG C. Shikardes # 84546 was notified. ********** R. Bruns # 21106 2/13/05 11:47 Received lab results, Lab Sequence Number: 05-01227-001 The sample does not match any current Con Ed standard. Unable to determine it's origin. 2/14/2005 @ 13:33 Colagrande # 81267 of I&A reported to me that the Partial cleanup completed at 13:25 HRS. No solid waste was removed. 300 gallons of oil was removed from the Unit and 58 gallons of oil was removed from the floor. and 1000 gallons of water was removed by the Astoria tanker. The structure was double-washed with Degreaser solution. Filan cleanup rending Transformer removal. Update 3-18-05 @ 21:28 Lab Sequence Number: 05-01226-001 TOTAL PCB 10 ppm 03/21/05 15:20 J.Bencivenga#39929, Cable Supervisor, notified the control center on 3/21/05 at 15:05hrs. to report that the clean up in V4060 was completed, this was a final cleanup. There were no solids removed and no drums or barrels were used in the cleanup in V4060. There was 500 gallons of oil and water mixed removed via Tanker from V4060. The method used to clean was Double washed with Slix. A yellow envirnomental tag #268 was removed from V4060. The cleanup personnel were; R.Manigo#13148, G.Sciara#00977, R.Veloce#15739 and S.Pavlicko#54302. The leaking transformer was removed and a new unit was installed in V4060. The cleanup was completed on 03.21.05 at

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 10/8/97, 0935 hrs: DEP, Coast Guard arived on scene. Con Ed was trying to clean duct between two manholes using a flush truck rod. They hit an obstruction, forced some oil out - approximately 1 gallon got into french drain on bottom of manhole, and probably went to treatment plant. The manhole was cleaned yesterday, but the obstruction remains. 10/8/97, 0955 hrs: Called Ed Radkey, Con Ed Manhattan Environmental Field Manager (212) 338-4485. He will check on what group is doing the investigation and call back. 10/8/97, 1445 hrs: E. Radkey called back. Analysis of oil 66 ppm PCB - consistent with dielectric fluid, but no electric lines run through the manhole. Cable is paper/lead - could have some oil in it. Clean up completed."
Remarks:	"UNK WHERE OIL CAME FROM-DID GO INTO SEWER"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 2/7/2012 - changed Lead DEC from Joe O'Connell to JFeng. 7/23/2012 - received inquiry from Gail Davis of Targus Associates, 972-247-7229. Their company is working for the potential buyer of the building and wants to know what needs to be done in order to close the spill. 7/24/2012 - searched spill database and PBS record. No hardcopy of the file is available. Based on our spill record, the spill was called in due to the discovery of holes in a 7,500 gallon Above Ground Tank (AST) on September 2, 1997, and the tank was being pumped out according to the caller. Based on our PBS record, a 7,500 gallon AST was closed-removed on February 1, 2006. However, there is no tank closure report has been submitted to the Department and no documented investigation has been conducted to investigate the spill. Letter to 103 East Realty LLC requiring tank closure report and investigation work plan. Response by 8/2012. Reply to Gail Davis stating investigation and remediation shall be required in order to close the spill. 8/24/2012 - Reviewed Spill Investigation Work Plan, dated 8/21/2012, by GC Environmental. GCE proposed 2 soil borings to be installed. Talked with Raphael Ketani and he requested that at least 6 soil borings due to the size of the tank. Soil and groudnwater samples shall be taken. 8/28/2012 - email reply to Greg Collins of GCE. 9/6/2012 - Talked to Jim Bush and Greg Collins. They explained that the tank is sorrounded by four concrete walls and a concrete bottom as the 110% containment of the existing tank. There is limited options in investigation tool, i.e. hand auger. They may not be able to drill more than five feet with the hand auger. They have no problem to do the 6 soil borings, but they will have problem drilling down to the water table. They request DEC to remove the requirement

SUITE W (Continued) **S107522741**

for groundwater sampling in this initial investigaiton which they think it is an excessive requirement. Discussed with Raphael Ketani, given the condition of the site, i.e. aboveground tank, #6 oil and the containment system of the tank, it is fine to go to five feet for the 6 soil borings and will determine the next step based on the investigation findings. Email to GCE with approval. 9/12/2012 - Reviewed the Phase II Environmental Site Assessment (Soil Borings), dated 9/12/2012, by GCE. They advanced 6 soil borings around the tank and hit refusal at depth of 1 to 3.7 feet. NO odor and stain were observed. PID readings are zero. Soil samples were collected and sent for lab analysis of VOCs and SVOCs. 9/19/2012 - Reviewed the Phase II Environmental Site Assessment (Soil Borings), dated 9/18/2012, by GCE. They provided the soil sampling result with the report this time. No exceedances has been detected in the soil samples. 10/1/2012 - email response from Greg Collins Based on our inspection, drill work, and discussions with our client the concrete bottom has not been replaced since the spill was opened. We are currently waiting for a written statement from the current owner confirming same. Should have to you tomorrow. 10/2/2012 - After the Section C committee spill closure discussion. We agreed to close the spill based on: 1) The old 7,500-gallon Aboveground Storage Tank (AST) was removed in February 2006 and replaced with a new 7,500-gallon AST. 2) It is #6 oil that the AST being used for. With low mobility of #6 oil, if it is there, it is there; if it is not there, it is not there. 3) The 110% containment of the current tank, which consists of 4 walls and concrete bottom, makes the drilling difficult because only hand tools could be used. 4) No stain, odor, PID reading during the drilling. The soil sampling results are all ND/low in VOCs and SVOCs. Only chrysene 1.9 ppm in one sample slightly exceeds the CP-51 Soil Cleanup Objectives of 1 ppm. It is difficult for the cleanup to be taken within the AST containment room. Any wells/borings/openings that needed to be installed and stayed for a somehow long period of time would not be practical and would create a conduit to subsurface contamination if the tank shall leak. 5) As per the conversation with and email from the consultant, the concrete bottom has not been replaced since the spill was opened, so the investigation that has been done shall reflect the condition of the site since the spill was opened. see spill closure justification memo in eDoc. Spill Closure letter to 103 East Realty and cc to Greg Collins and Jim Bush. "

DEC Memo:	"2/7/06 - Raphael Ketani. I did a site inspection based upon the odor complaint. I met the super, Rodolfo (212) 722-8885, and one of his handymen. He said that A.J. Clark Management ((212) 541-4477) is the managing company (Steve Denaldo or Cathy Frangipani) for the building and that they are aware of the odors due to cutting of the tank. We went downstairs to the boiler room and the tank room. The boiler area was free of stains or any signs of oil spillage. A crew from ABC Tank was in the vault room. One welder was cutting up the tank with a torch. The tank was about two thirds removed. The worker who was not welding (Rob) told me that it will be 2 more days of cutting to remove the tank. The inside of the tank looked clean with no sludge on the bottom, just a little water. The tank room, as far as I could see, looked free of stains or signs of oil spillage. There were no oil odors, but the boiler room and the tank vault room were lightly to moderately filled with the smoke from cutting the tank. The super and his worker had set up fans to push the vapors out of the two rooms and towards a grated manhole below the sidewalk which also serves as a draftway for the boiler room. I went back to the lobby and the area of the doctors' offices and could just barely detect any odors. The air in these areas did not have any haze from the cutting. In light of my findings, I am closing the case. Later in the afternoon, Dr. Jayson Gold ((212) 828-7355) left a message that there was black smoke in his office and the hallway before I arrived and after I left. He said that he would like to speak with me. I left my desk phone number on his voice mail."

DEC Memo:	"Sangesland left a voice mail with the building super asking if the cleanup was complete 2/23/06 - Raphael Ketani. I left a message for the super at (212) 737-7820 asking whether the spill had been cleaned up. John Emms at HESS (201) 489-5100 is the contact person there. I called up Mr. Emms and he said he didn't have the cleanup information at hand, but would get back to me. Mr. Emms called me back. He said the spill came out the vent pipe and nothing was released inside the building. He said that, according to customer service, everything was cleaned up. With this information, I am closing the case. 2/23/06 Sangesland spoke to building super who confirmed the cleanup was done."
