EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 6 RCRA-LQG sites within approximately 0.125 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 RCRA-SQG sites within approximately 0.125 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-VSQG site within approximately 0.125 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 01/06/2022 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 01/31/2022 has revealed that there are 116 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 5 NY UST sites within approximately 0.125 miles of the target property.

Lists of state and tribal brownfield sites

NY BROWNFIELDS: Brownfields Site List

A review of the NY BROWNFIELDS list, as provided by EDR, and dated 01/06/2022 has revealed that there is 1 NY BROWNFIELDS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
FORMER NU-BRITE CLEA	***1299 FIRST AVENUE***	***SSE 1/4 - 1/2 (0.484 mi.)***	***ER1209***	***2767***
Site Code: 480335				

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 01/31/2022 has revealed that there are

EXECUTIVE SUMMARY

556 NY Spills sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 102 RCRA NonGen / NLR sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CON EDISON - YORK AV	YORK AVE. BETWEEN 61	S 1/2 - 1 (0.865 mi.)	1236	2825
CON EDISON - WEST 58	11TH AVE. BETWEEN W.	SW 1/2 - 1 (0.939 mi.)	1237	2825

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 21 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D011
Waste Description: SILVER

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL

LENOX HILL HOSPITAL (Continued) **1000344178**

BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: NONE
Waste Description: Not Defined

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

Waste Code: U035
Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

Waste Code: U089
Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Waste Code: U112
Waste Description: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

Waste Code: U118
Waste Description: 2-PROPENOIC ACID, 2-METHYL-, ETHYL ESTER (OR) ETHYL METHACRYLATE

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U154

LENOX HILL HOSPITAL (Continued) **1000344178**

Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U188
Waste Description: PHENOL

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Tank Info:

Tank Number:	001
Tank Id:	61513
Material Code:	0008
Common Name of Substance:	Diesel

Equipment Records:

	H05 - Tank Leak Detection - In-Tank System (ATG)
	H99 - Tank Leak Detection - Other
	F00 - Pipe External Protection - None
	L00 - Piping Leak Detection - None
	J02 - Dispenser - Suction Dispenser
	C03 - Pipe Location - Aboveground/Underground Combination
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	A00 - Tank Internal Protection - None
	I02 - Overfill - High Level Alarm
	K01 - Spill Prevention - Catch Basin
	E00 - Piping Secondary Containment - None
	G02 - Tank Secondary Containment - Vault (w/access)
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/07/1972
Capacity Gallons:	20000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	DAFRANCI
Last Modified:	08/16/2019
Material Name:	diesel

Tank Number:	001
Tank Id:	188337
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

FINDS:
Registry ID: 110046241027

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 7/11/13 - Raphael Ketani. I made a site visit to the 77th Street Station today. I didn't see any signs of oil seepage. I sent an e-mail to the NYCT requesting any information they had regarding the former spill and whether oil was still being collected by their pump out system. 7/18/13 - Raphael Ketani. A monthly progress meeting was held today regarding oil spills at a number of NYCT sites. Attending the meeting was Toni Watts of the NYCT Office of System Safety (646) 252-5939. I asked her whether she could find any information or documentation regarding this spill. She said that she would look into the matter. 7/19/13 - Raphael Ketani. I made a site visit to the intersection of East 74th Street and Lexington Avenue where the NYCT sump was located. There was one building with a fill port and a vent pipe at this intersection. This building was 145 East 74th Street. There had been a 10 gal. overfill of #6 oil at this building during 1995 (#9512273). However, there are no notes in the case file. I walked up and down Lexington Avenue in the vicinity of the intersection and I also walked east and west along East 74th Street. I did not see any other fill ports or vents. It appeared that everyone else had gas service. 7/25/13 - Raphael Ketani. Ms. Watts called me today. She said that staff at the NYCT looked into their records, but did not find any information or documentation regarding the spill. 8/20/13 - Raphael Ketani. The Final ISR was written and signed by myself, Randall Austin - Chief of the Spills Unit, and Louis Oliva - Regional Attorney. The Final ISR was then sent to Dennis Farrar in the Albany, NY office of the Division of Remediation. "
Remarks:	"SPILL SEEPING INTO SYSTEM UNDERGRND SUBWAY SYSTEM PLANT RM 3206 WHERE THEY PUMP OUT GROUND WATER FROM THE TRACK. CALLER WILL CALL REG 2 FOR FOLLOW UP.(SUMP ROOM IS AT 74TH ST) "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"8/20/12 TJD DO received an odor complaint from citizen - DeMeo dispatched from R2 office to investigate. Site inspection - met with construction manager (Michael Timpson 917 267 5307). Attached brownstone undergoing major renovation - workers are excavating for an elevator shaft and encountered petroleum contaminated soils. Shallow groundwater reported to have been encountered in open excavation is described as tidal - as needed workers are dewatering excavation into plastic portable totes for onsite storage and eventual disposal @Clean Water of NY in Staten Island). Workers are hand excavating petroleum contaminated soils into 5 gallon buckets and disposing of material in a rolloff container staged in roadway. Job superintendant states a total of 15 yds of solids have been removed from the site thus far. Ventilation fans operating in subbasement are not vented outdoors. DEC required appropriate ventilation equipment be installed/operated to prevent fugitive petroleum odors from impacting adjoining owners/tenants. DEC was provided a copy of ESA (Environmental Strategies & Applications, Inc.) letter detailing sampling event and lab results. A total of (3) soil samples were collected for laboratory analysis from below sub-basement slab and analyzed for VOC's and TPH. No detections of VOC's were reported. TPH ranged from 760 to 8,220 ppm. DEC informed construction manager and the environmental sub-contractor performing work (Active Remediation Services) that TPH is not a recognized laboratory method in NY and all future sampling must include 8260/8270 parameters. No groundwater data was provided at time of inspection. DEC advised all parties that a DEC spill number was required and directed job superintendant to contact DEC Spill Hotline

122 EAST 78TH ST NY LLC (Continued) **S112226021**

to report spill. DEC informed all involved parties that following completion of excavation activities endpoint samples must be collected with results forwarded to DEC project manager. Backfill not approved until endpoint data is received/reviewed and approval is granted. DEC sent an e-mail to project superintendant detailing requirements and requesting all data from previous environmental sampling at site. 3/18/13 TJD File review. All required closure documentation has been received. A total of 124.79 tons of petroleum contaminated soils and 10,275 gallons of oily water was recovered, transported and properly disposed of during the remedial process. Laboratory results from endpoint samples are within acceptable limits. No further action is required."

Remarks: "readings confirm contamination, unk source, dec Tim Demeo"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE SEE ALSO 96-02572. transfered from Hale to Tibbe on 3/18/03. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 1/26/2012 - spill re-assigned to JFeng. NO paper file could be located. From caller remark, it states that #6 oil is leaking into the vault room . And from the PIN 94654 UIS website, it has only the OSC cost of $9,842.57. No cleanup information or any other information is available. Raphael Ketani, Engineering Geologist II, and I spoke with Mark Tibbe, the previous project manager. He said that's an old case he inherited from Kevin Hale. Oil coming into the vault room and a PIN was opened. The consultant did a small cleanup. Then when he reached NYCT to see if there was any more oil coming in a couple years later, NYCT could not find the place. There is no responsible party has been identified. There should be a small file (but couldn't be located). Mark recommended close it out since it has no RP, NYCT was not able to locate the place again, fall out of status of limitation and no other information is available. Spoke with Kevin Hale, the pre-previous project manager and he replied with email. He could not find much further on this either. He also recommended

NYC TRANSIT AUTHORITY -NYCT (Continued) **S102240177**

closing out an old case like this if nothing has been heard back since he left in 1998. Called NYCTA Dennis Varley (718)694-1488 to see if they have any information on this. They will get back to me. 2/2/12 - Raphael Ketani. I contacted the NYCTA and spoke to an engineer in their office. He said that the case didn't ring a bell and that he has been with the NYCTA for only 7 years. He said that Mr. Varley had been with the NYCTA longer, but he joined the organization a few years after the incident and he no longer worked for the NYCTA. I contacted the state contractor who may have been involved in cleaning up the spill, Fenley & Nicol (631) 586-4900. I was passed to the phone of Robert Ferguson. However, he wasn't in. So I could only leave a message. 2/6/12 - Raphael Ketani. Mr. Ferguson still hasn't returned my phone call. I did receive a call from Toni Watts of the NYCT. She told me that they did not have any records regarding this spill, except it was one of many that occurred that year. As there is no further information regarding the location of the spill, or its status, and as no one who could be contacted who remembered much information that could be helpful, and as there is no paper file and no e-docs, and as the Office of the Attorney General doesn't have a case, I wrote the Final ISR and submitted it to Randall Austin, Chief of the Spills Unit, for his signature. Mr. Austin signed the ISR. Then I walked the ISR to Mr. Oliva. He signed it. Next, I sent the ISR with the original signatures to Dennis Farrar in Albany DER. As there is no indication in the case records, the database or from talking to the formerly involved people that an environmental or safety impact exists, I am closing the spill case. "

DEC Memo:	"spill by ferrantino fuel oil. Milro responding. DEC Patel to respond. 05/06/14-Hiralkumar Patel. alternate address: 1061 to 1065 Lexington Ave PBS #: 2-479896. as per PBS record, the site has/had following tanks: - one (1) 5,000 gal #6 oil AST on saddles, removed in Sep. 2007 - one (1) 5,000 gal #6 oil AST on saddles, installed in Oct. 2007 other spills: 0706201, 0706387, 0710615, 1401210 spill # 0706201 was reported on 09/01/07 due to 200 gal #6 oil spill inside tank room. the 5,000 gal tank started leaking. the leaking tank was replaced and a subsurface investigation was conducted in boiler room. case closed based on available report. spill # 0706387 was reported on 09/07/07, which is duplicate of spill # 0706201. case closed. spill # 0710615 was reported on 01/08/08 as 20 gal oil spilled due to overfill. oil spilled onto sidewalk. case closed. spill # 1401210 is reported earlier today and is duplicate of the subject spill case. case closed. 9:10 AM:- visited site. site has one 5,000 gal #4 oil

SIDE WALK (Continued) **S116555122**

AST on saddles. the tank is located in secondary containment in sub-basement. the tank room is located in southwest corner of the building. the boiler room is located to the north of the tank room, in northwest corner of the building. the tank and boiler rooms are at the lowest elevation in the building. found cinder block covered opening in partition wall between tank and boiler room. all lines to/from the tank are aboveground, except part of fill line that runs under the sidewalk. fill line runs in old coal chute. found signs of historical spill on wall, under the coal chute. met Michael Taylor from Ferrantino Fuel Corp. Mike mentioned that #4 oil was delivered around 6 AM today. Mike mentioned that the existing tank was installed about five years ago, when the previous tank was found leaking. during delivery earlier today, the tank was overfilled and oil spilled from the vent pipe and tank itself. oil from the vent pipe spilled onto concrete sidewalk, which then ran south on Lexington Ave and then east on E 75th Street. found a manhole cover (possibly ConEd structure) in spill impacted area in front of 157 E 75th Street. oil also spilled from manhole and pipe joints on the tank. tank room floor was found in good condition. Mike mentioned that the tank room floor was recemented and sealed prior to installing the existing tank. some of the spilled oil in tank room seeped into adjacent boiler room, through cinder blocks in partition wall between the tank and boiler rooms. oil seeped into the boiler room ran into sump pit located in southeast corner of the boiler room. Mike mentioned that sump pump was disconnected immediately and they will pump out oil/water from the sump pit. Ferrantino crew has applied absorbent sand on impacted surface. Milro arrived with vaccum truck. Mike mentioned that they will powerwash the impacted sidewalk, street and tank room floor. asked Mike to seal the fill port to prevent any oil delivery, until the tank system is tested tight. also asked him to clean impacted cinder block area. spoke with Neil Skow at ConEd. informed him about possible impact to coned structure, located along curb in front of 157 E 75th Street. Michael Taylor Ferrantino Fuel Corp. Ph. (718) 832-6700 (O) (646) 739-9677 (C) Fax (718) 832-6277 email: ferrantinofuel@ffcenergy.com 1:12 PM:- spoke with Tony Robustelli, property manager. informed him that the department requires tightness testing of the tank system prior to anymore oil deliveries. 1065 Lexington Avenue Corp. **property owner** c/o The Adler Group Inc. 654 Madison Avenue, Suite # 2000 New York, NY 10065 Attn.: Tony Robustelli **property manager** Ph. (212) 355-0600 email: trobustelli@theadlergroup.net 05/14/14-Hiralkumar Patel. 11:22 AM:- received call from Dot from Milro inquiring about requirements to close the spill. informed her that spill cleanup documents and tank system tightness test result must be submitted for review. she requested an email with requirements. 12:34 PM:- sent email to Dot with requirements. 3:46 PM:- received email from Paul from Milro. Milro crew returned to site on 05/12/14 to continue cleanup work, but street and sidewalk were blocked off with emergency vehicles for an emergency sewer repair. area is expected to be closed for 2 weeks. 06/13/14-Hiralkumar Patel. 12:35 PM:- sent email to Paul and asked to submit cleanup documents. email copied to Mr. Robustelli, Mr. Taylor and Rob Dowling (rdowling@energi.com). 08/19/14-Hiralkumar Patel. received email from Joe (at 4:46 PM on 08/12/14) from Milro including certification for the tank test. Advanced Tank Services certified that tank system was tested tight. 09/02/14-Hiralkumar Patel. 12:05 PM:- left message for Joe. 12:09 PM:- sent email to Joe and asked to submit tank system test result

SIDE WALK (Continued) **S116555122**

and summary of cleanup activities. 2:18 PM:- spoke with Joe. he doesn't have actual tank system test result. regarding street clenaup, they powerwashed impacted surface inside and outsite the building and also the street. no cracks were observed on boiler room floor. based on observations during site visit and available information, case closed. 09/04/14-Hiralkumar Patel. 3:28 PM:- received email from Joe including closure report."

DEC Memo:	"09/04/07-Vought-Off hours responder. Vought called and spoke to PTC Lara and sewer affected and NYCDEP notified by Lara. Spill on concrete and cleaned by PTC. Spill caused by leaking 5000-gallon #6 fuel oil AST. Cleanup included removal of oil from tank, steam cleaning of secondary containment and floor. Spill cleaned via vacuum truck and speedi dry. Vought spoke to Joe and some oil still under tank. Temporary tanks set up and further cleanup by PTC tommorrow. Sump and sewer was cleaned and powerwashed. 09/05/07-Vought-Received call from Anthony Lara (PTC) that oil was present in sump that was not directly affected by spill and as such soil contamination may be present. Lara asked for DEC site visit. Vought spoke to big anthony and tank was sitting directly on floor. Crack in secondary containment caused spill to room with sump pit. PTC onsite today in tank room due to oil coming out of floor and PTC removing soil. Vought called little anthony (646-772-7180) to set up site visit. Vought spoke to little anthony and five drums of soil were removed and another fifteen more drums of soil were removed. Junior will be foreman on site. Site visit set up for 1pm. Site contact is Tony (Adler Group-732-683-9760 and fax:732-683-976 cell 917-757-7856). 09/07/07-Vought-Site visit by Vought with PTC Little Anthony Lara and: Managing Agent: Anthony Robustelli The Adler Group Cell: 917-757-7856 Fax: 212-239-0504 Fifteen drums of soil removed to date. Tank is 5000-gallon AST that sits directly on dirt floor of tank room with seconday containment. Spill was discovered by oil leaching out of seconday containment. Excavation was begun in tank room and free product on groundwater and large schist boulders in excavation (bedrock may be shallow). Product also reappearing in sump despite it being cleaned out and no overland flow to sump indicating extensive subsurface contamination. DEP not responded to spill to sump to date. Drums of soil will be picked up daily due to high traffic on Lexington Avenue and visibility of site. Two (275-gallon) #2 fuel oil AST set up to provide hot water. No spill out of vent pipe despite recent delivery by Farrantino Fuel Oil. Significant Odors in Iris Nail Salon directly above tank room (contact for salon is SooJin Nam cell:917-747-2883 Fax: 212-940-0807). Site is adjacent to Lexington Avenue IRT line. Vought called DEP and provided second report of spill to sewer. DEC requires: 1)immediate installation of ventilation system in basement and also in Iris Nail Salon 2)immediate PBS registration 3)cc to SooJin Nam, A Lara (PTC) 4)immediate recovery of product from sump. The following by 10/15/07: 4)soil excavation and collection of endpoint samples 5)summary of work performed and sealing of basement floor 6)installation of vapor barrier. Vought sent letter with above requirements. Vought called SooJin and she stopped by site yesterday and odors were better. Fans in place in store and store is reopened as odors are diminished. 9/28/10 - Raphael Ketani. I tried to contact Anthony Robustelli of the Adler Group (212) 355-0600/cell (917) 757-7856 regarding the spill and the documentation showing that the spill had been cleaned up. However, I could only leave messages. Mr. Robustelli called me back. He said that everything was cleaned up. PTC dug out the contaminated soil,

APARTMENT BUILDING (Continued) **S108764196**

put in a gravel bed, and put in a new tank in place of the old one. Mr. Robustelli said that he will get DEC the paperwork. I told him that the old tank needs to be listed as removed with the date of removal and the new tank needs to be listed as installed, with its date of installation. He said that New York Engineering is working on the tank registrations right now with the City. I added that, according to the database notes, the groundwater was impacted. I said that a groundwater investigation must take place. The DEC will not close its case until the investigation takes place and the groundwater is remediated, if necessary. Mr. Robustelli's e-mail is: trobustelli@theadlergroup.net. 9/29/10 - Raphael Ketani. Mr. Robustelli sent me an e-mail with 5 documents (see E-docs). These documents were the old tank PBS registration #2-479896, the new registration #2-254975, the Mercury Tank & Pump Certificate of Affidavit, the 1/29/08 NYC DOB tank replacement permit, and the 10/5/07 PTC invoices. He also stated that the PBS registration will be worked on by Bob Lamirata of PTC and should be signed off in the next 2 or 3 weeks. I reminded Mr. Robustelli that a groundwater investigation still needs to take place. 12/2/10 - Raphael Ketani. I tried to contact Mr. Robustelli (212) 355-0600/cell (917) 757-7856, but was told that he was on vacation. His assistant (his daughter Victoria) said that he would be back on monday, 12/6/10. I told his assistant that the DEC needed the soil disposal manifests, a work plan for the groundwater investigation, and a PBS registration showing the old tank as removed and the new tank as installed (the new registration is not in the database). 12/6/10 - Raphael Ketani. I spoke to Mr. Robustelli cell (917) 757-7856 about the site. He said that Bob Lamirata of PTC will meet Mark Salamack of PTC at the site and they will see what can be done regarding the groundwater investigation. I reminded Mr. Robustelli that there still was the matter of the PBS violation with the old tank still listed as active and the new tank not listed. He said that he has people working on updating the paperwork and submitting it to the DEC. I told him to hurry on this as I could not hold off submitting a PBS violation to our legal office indefinitely. He said that he will move on the paperwork. 2/28/11 - Raphael Ketani. I spoke to Mr. Robustelli (212) 355-0600/cell (917) 757-7856 in regards to work at the site and the proper registration for the old and new tanks. I told him that the DEC has not been told that any investigative work is going on and the new PBS registration does not appear in the database. Mr. Robustelli apologized for the lack of progress on the case. He said that PTC recommended HydroTech for the soil investigation. He thought that they had sent the DEC paperwork for doing several borings in the boiler room area, the lowest part of the building. I told him that the DEC hasn't received anything. He apologized and he said that he will get on them right away to see what happened. I sent Mr. Robustelli a standard letter demanding a report by March 28, 2011 and a PBS registration for the new tank, or else 1065 Lexington Avenue Corp. will be subject to fines. 3/1/11 - Raphael Ketani. Mr. Robustelli sent me an e-mail containing the PTC 9/25/07 itemized costs list for the tank replacement work and a 2/8/11 FAX containing the invoice for the tank replacement work. Later, Mark Robbins of HydroTech (631) 462-5866 called. He said that HydroTech had put a proposal together for Mr. Robustelli some time ago, but they never heard from him. Mr. Robbins said that he will put together another proposal and it will include soil borings through the basement and sump area floor. I told him that sounded fine. 3/2/11 - Raphael

APARTMENT BUILDING (Continued) **S108764196**

Ketani. Mr. Robustelli sent me a copy of the 2/21/11 Hydro Tech work proposal by e-mail with his approval signature at the end of the document. I reviewed the proposal and found it to be acceptable. Also, Andrew Garcia of the Adler Group sent Mr. Robbins a form to fill out for insurance purposes. Later, Leszek Zielinski, EE II and acting head of the PBS Unit, came over to me and told me that the owners are in violation of the PBS laws. They will be given an Order on Consent. 3/15/11 - Raphael Ketani. Today Timothy Lo of Hydro Tech Environmental (718) 636-0800 sent me the 3/11/11 Subsurface Investigation Work Plan by e-mail. I reviewed the work plan. Hydro Tech proposed to install four soil borings and to take four soil samples. Each boring would be turned into a well and groundwater samples would also be taken. A figure showing where the borings will be installed was included with the work plan. The plan did not call for installing borings in the tank room. I contacted Mark Robbins, Mr. Lo's supervisor, (631) 462-5866 regarding why there will be no borings in the tank room. He said that, earlier, he was told by DEC that the borings should be in the sump-tank room area. Also, the tank room floor has been sealed with epoxy. He said that if the borings suggest that there is oil under the tank room, then borings will be performed there, also. I told Mr. Robbins that, given the information that he has just given me, the plan is acceptable. I sent Mr. Lo a reply to his e-mail and told him to start as soon as possible. 4/8/11 - Raphael Ketani. Mr. Lo sent me an e-mail that the boring will take place from 4/12 to 4/13. He also stated that due to space limitations, a smaller geoprobe will be used that installs 1 inch borings, instead of 2 inch borings. I wrote that it is up to him what size borings he wants to use, but 1 inch borings sometimes have many technical problems due to the small diameter. 4/29/11 - Raphael Ketani. The Site Investigation Report was due today, but has not been received. 6/2/11 - Raphael Ketani. I tried to contact Mr. Robbins, Mr. Lo's supervisor, (631) 462-5866, but I could only leave a message that the SIR was one month overdue and that the DEC was concerned that no progress had been made at the site. 6/10/11 - Raphael Ketani. I spoke to Mr. Robbins. He said that the investigation report was completed. The soil and groundwater analytical results were almost entirely non-detect. The DEC will receive it very soon. However, HydroTech could not get the manifests from Mr. Robustelli. I told Mr. Robbins to send the report anyway and the DEC will decide whether additional work is needed. I ended the conversation by telling Mr. Robbins that the building had PBS violations as the old tank was still listed as active and the new tank wasn't listed. Mr. Robbins said that he will talk to Mr. Robustelli about this. 6/13/11 - Raphael Ketani. Mr. Robustelli sent Nick Lombardo (DEC PBS Technician) a revised form for the registration of the new tank. 6/17/11 - Raphael Ketani. Ms. Ataman from Hydro Tech sent me the 5/5/11 Site Investigation Report. I reviewed the report. Groundwater was found at an elevation of about 22.5 feet and was flowing towards Lexington Avenue. The only soil sample to have exceedences was from location SP-2. These were benzo(a)anthracene, chrysene, and benzo(a)pyene. Their exceedences were just over the 1,000 ppb for soil that is listed in CP-51. The only groundwater sample to have an exceedence was from location MW-1. This was 11 ppb of 1,2,3-trichlorobenzene. The sample from MW-4 had a number of VOC hits, but they were either below the CP-51 limit or just above it. As there was very little residual contamination from the spill, I determined that there was no threat to the public or the environment.

APARTMENT BUILDING (Continued) **S108764196**

Therefore, I closed the spill case. "
Remarks: "inside tank of 5000 gals leaked approx 200 gals of 6 oil inside but possible some into a sump sewer-cleanup crew enroute now-not stopped the leak at present pending arrival of crew"

SIDEWALK (Continued) **S108764348**

Spiller Company:	001
Contact Name:	JOE
DEC Memo:	"1/8/08 - Raphael Ketani. I spoke to Shawn Donoghue of NYC DEP Hazmant (718) 595-5000. He said that he spoke to Joe Ostrowski of PTC (718) 624-4842. Joe told him that it was maybe 15 to 20 gals. of oil spilled. Joe also told him that Farentino Fuel was making the delivery at that time. I spoke to Mr. Ostrowski. He said that his crew was working at the site at the time that the driver from Farentino wanted to make a delivery. One of his guys told him that all of the work had been completed. So the driver began pumping the oil. However, the cap for the vent pipe hadn't been installed yet. So about 10 gals. of oil flowed out the vent pipe and onto the sidewalk and 2 gals. flowed down a coal chute and into the basement. Mr. Ostrowski said that most of the oil that entered the basement was caught in a bucket placed there by the super. The floor had just been done by PTC and so there were no cracks - no drains were affected, either. Mr. Ostrowski stated that Drisol was being put down on the sidewalk as we were speaking. A power washer was on site and will be used when the Drisol is picked up. He said that no sewers were affected. Based upon the small size of the spill, PTC's quick response to the spill and my conversation with Mr. Ostrowski, I am closing the spill case. "

CON EDISON SERVICE BOX: 13902 (Continued) **1016677641**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Sangesland spoke to Joe Ostrowski. He said there is a 10,000 gal tank in a tank room in the basement of this building. The tank is corroded and leaking. Tank has been drained & new Temp Tank set up. The tank will be cleaned out and cut up. Once the tank room is cleaned of debries the floor will be checked for cracks. 09/02/10-Hiralkumar Patel. 12:03 PM:- spoke with Joe. he mentioned that cardinal tank hired them to pump out tank only. he found oil on floor in tank room and suspect leak at the tank bottom. 12:15 PM:- spoke with Buddy (718-625-4350) at Cardinal. he mentioned that site has co-op building and they are looking for contractor to replace tank. no delineation has done yet. 12:19 PM:- spoke with Ms. McKenna, building manager. she mentioned that tank is sitting on cradles. they found some oil on floor and decided to replce tank. Tom Smajlaj **building super** Ph. (212) 288-9111 (212) 570-6078 alternate addresses: 883-885 Park Ave, 101-109 E 78th Street no other spills found at the site. PBS #: 2-113638. as per PBS record, site has one 10,000 gal #6 oil AST installed in Jan. 1972. 885 Park Avenue Corp. **property owner** c/o Brown Harris Stevens, LLC. **management company** 770 Lexington Avenue, 5th Floor New York, NY 10065 Attn.: Noreen McKenna **property manager** Ph. (212) 508-7297 Fax (212) 508-7623 email: nmckenna@bhsusa.com 1:00 PM:- visited site. inspected tank room. found tank sitting on elevated concrete platform. found minor oil seepage at the base of the platform. site is currently using #2 oil temp tank installed at the curb. 2:18 PM:- sent CSL to Ms. McKenna requiring endpoint samples. 2:28 PM:- received email from Ms. McKenna confirming receipt of letter in email. 10/19/10-Hiralkumar Patel. 9:22 AM:- received letter from Jamal Taha from Lawless and Mangione, engineer hired by property owner. they have submitted plans for tank removal to NYC DOB and currently under review. waiting for DOB permit. Jamal Taha Lawless & Mangione Ph. (914) 423-8844 Fax (914) 423-8981 10/29/10-Hiralkumar Patel. 11:21 AM:- received call from Wael Taha from Lawless and Mangione. he mentioned that contractor has started demolition inside tank room. asked Mr. Taha to call once tank and concrete pad underneath the tank is removed. 12/07/10-Hiralkumar Patel. 9:07 AM:- received call from Mr. Taha and scheduled a site visit at 10:30 AM on 12/10/10. 12/10/10-Hiralkumar Patel. 10:15 AM:- visited site. met Mr. Taha. tank was removed. found solid concrete floor underneath the tank location except one area which was broken. contractor removed all contamination. found old coal in the excavation. area was being used to store coal. fill line for the tank was in the old coal chute. found some oil stains in the far end (towards the curb) of the coal chute. found concrete ring in entire coal chute. new lines will be installed with the new tank. some oil found on foundation wall near the fill line area. contractor removed piece of wall and no oil found

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"12/30/05 - A letter was sent to the property owner requesting all available information regarding steps taken to address the spill case (J. Moras). Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 1/5/04-Vought-Spill transferred from Vought to Austin. 1/27/04 - Sawyer - Spill tranferred from Austin to Sawyer. 3/10/04 - Sawyer - Sent Old Tank Test Failure letter to Trudie Pomper of 131 Flower Hill Road, Halesite NY 11743. Austin - 9/30/09 - Spill project assignment transferred from Albany staff(JAMORAS) to Vought, for further review and action. - end 6/11/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin and Vought transfer to Section A. 7/16/10 - Raphael Ketani. The spill originally took place on 1/28/02. It was a tank failure with #2 oil. PTC was on site for the cleanup (718) 624-4842. The location is 61 East 75th Street, Manhattan (block and lot 1390 and 133). The property was sold by the estate of Trudi Pomper. According to ACRIS, on 12/18/07, the property was sold to MR62, LLC, 227 Ibis Court, Manhasset, NY, 11030. Mr. Massud Rahbar was the former owner and has the same address. There is a 12/30/05 letter in the E-docs addressed to Mr. Rahbar requesting documentation regarding the cleanup of the spill. There is no paper file. I sent a letter to Mr. Rahbar of MR62, LLC requesting documentation regarding the 2002 spill. I set a deadline of August 20, 2010. 7/27/10 - Raphael Ketani. Mr. Rahbar called me today. He said that he received DEC's letter, but that there is no oil at the site. He said that he bought the property in January 2002 and switched to gas. He said that he saw the old oil tank get cut up and removed. I told Mr. Rahbar that the DEC didn't have any information showing that the oil was cleaned up, nor any documentation showing that the oil didn't reach the soil under the site. Mr. Rahbar said that he will try and contact the previous owner and see whether he has any documentation regarding the cleanup of the spill. I told him that if the previous owner doesn't have any documentation, then a new spill investigation of the soil will have to take place. He said that he understood. 11/22/10 - Raphael Ketani. There has been no further response from Mr. Rahbar. So I sent a standard strongly worded letter. 11/29/10 - Raphael Ketani. I spoke to Mr. Rahbar (516) 484-5932/cell (516) 457-9773. He said that he has been having trouble getting his plumber to finish his conversion to gas and that's why the soil investigation hasn't taken place. He added that there used to be a 1,000 gal. AST on the site, but now there are two 275 gal. tanks. He wanted the tanks to be removed before having the work done. I explained to him that the soil investigation should have taken place a long time ago and that the DEC needs confirmation that there is no oil under the concrete slab. Mr. Rahbar explained that the concrete is thick and so the oil could not have penetrated to the soil. I told him that the #2 oil is thin as water and so it may have reached the soil. I added that the DEC wants three soil borings performed in order to determine whether the soil has been contaminated. He said that he will have the plumber do the work. I told him to find an environmental company to do the borings as they

FORMER TRUDI POMPER HOME (Continued) **S105995024**

know everything that is involved with performing the work. He said he will. Mr. Rahbar also asked for an extension of the deadline for performing the work. He said that the holidays were interfering with getting other work done, too. I gave him until the last business day in January 2011 to have the borings performed. 12/20/10 - Raphael Ketani. I spoke to Mr. Rahbar (516) 484-5932/cell (516) 457-9773 about the environmental investigation work. He said that he had just come back from California and hasn't heard from his plumber. He said that the spill is on his mind and he wants to get rid of it. I told him that he needed to hire an environmental company to do the investigation. He said that he will call up some contractors and get on this today. 1/5/11 - Raphael Ketani. Donna from ABC Tank (718) 272-2800 called requesting information about the spill. I gave her a quick synopsis regarding what the DEC knew about the spill. She said that she will go over to the site and do three soil borings. 1/31/11 - Raphael Ketani. I spoke to Donna. She said that they did soil borings on 1/18/11 and they just got the results back. She said that the results are all good. However, Mr. Rahbar owes ABC payment. So they are not releasing the data to the DEC. I contacted Mr. Rahbar and told him that ABC will not release the paperwork to the DEC until they receive payment. I told him that the DEC will not close the spill case until we receive the data. He said that he had just sent the check and they will get it soon. I told him that the DEC will wait to receive the data. 2/2/11 - Raphael Ketani. I received a FAX from Donna of ABC with the soil analytical results. 2/3/11 - Raphael Ketani. I reviewed the soil analytical results. All three sets of data were below the TAGM 4046 VOC standards for soil. Some of the benzo series results were above the TAGM limit. However, these SVOC results were more indicative of slight historical fill contamination. As the soil analytical results indicated that there was no oil contamination below the site, I have determined that there is no threat to the environment or the public. Therefore, I am closing the spill case. "

Remarks: "TANK FAILURE AT ABOVE LOCATION. TANK HAS BEEN DRAINED AND PROPERTY OWNER ADVISED."

TANK TEST FAIL (Continued) **S107783397**

The tank is a 2500-gallons AST vaulted in the boiler room. They performed the test and failed with a dry leak. They are in the process to do the isolation test. 7/29/14-Zhune spoke to Petroleum Tank Cleaners. She said they scheduled for Monday 8/4/14 to go back and perform the isolation test and the lines. 4/10/15- Mark Salamack from Petroleum Tank Cleaners sent an email, incluiding the spill closure letter, waste manifest, site plan ant the passed system test. The letter stated that on 15, July 2014 the 2,500 gallon fuel tank at the subject location was subjected to a precision tihgtness test and failed. Subsequently, on 20, August 2014 Petroleum Tabk Cleaners emptied the tank and pressur tested all the oil lines, to discover that there was an union on the vent line that was leaking. The union was simply tightened and the system retested and did pass. There was no contamination involved. Spill Closed."

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	61698
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	C03 - Pipe Location - Aboveground/Underground Combination
	G00 - Tank Secondary Containment - None
	J02 - Dispenser - Suction Dispenser
	F00 - Pipe External Protection - None
	H00 - Tank Leak Detection - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	A00 - Tank Internal Protection - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	K00 - Spill Prevention - None
	I04 - Overfill - Product Level Gauge (A/G)
	B05 - Tank External Protection - Jacketed
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	10/19/2001
Capacity Gallons:	1850
Tightness Test Method:	NN

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN Spill referred to R. Austin for follow up by Spills. (JHO) ~~~~~~~~~~~~~~~~~~~~~ e2mis no. 154199: Gas ERF crew performing a gas leak investigation at 164 East 78th Street, discovered oil contaminated soil in an excavation in the vicinity of the oil fill line for the building. The excavation is still open and, as a courtesy, will be left open until I hear back from the DEC. A resident at the location was informed of the problem with their oil fill line. 3/14/06- Jacob Tambe- Sending file back to region 2 for investigation. No body is asnwering the phone at the reported site. Con ed information is limited to do an investigation from central office. 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Patel) for review and closure - end 11/15/06-Hiralkumar Patel. visited site. met Ray Plotnik, owner of building. Ms. Plotnik doesn't know about tank installation date, size or oil comany. asked Ms. Plotnik to send this information to the Department. found tank totally buried in dirt. only top of tank is visible. not sure about tank size. found oil at fill port and along street side walk. looks like oil spilled at fill port during delivery. Ferrantino is oil delivery company. spoke with operator at Ferrantino (718-832-6700). they delivered 1102.5 gal oil on 11/10/06. left message for Dennis, delivery manager at Ferrantino. Ray Plotnik 164 East 74th Street Apt. # 6A Manhattan, NY 10021 PH. (212) 744-6360 no PBS record. received call from Mike from Ferrantino. as per Mike, property has 1500 gal tank. Mike will send someone today to clean out oil at fill port. Mike believes that oil spilled at fill port would not be during oil delivery on 11/10 but somebody else may have plugged at wrong address after they delivered oil before weekend. discussed about non-registered tank with DEC Krimgold. as per Mr. Krimgold, if owner

RESIDENTIAL (Continued) **S106470829**

baught this property before 1986, then she has pay fee for years from 1986. spoke with Ms. Plotnik. she baught this building before 1986. sent out CSL to Ms. Plotnik requiring tank registration, tank test, soil boring at fill port and endpoint samples after excavation if any contaminaion found at fill port. letter sent with certified mail. 11/28/06-Hiralkumar Patel. received certified mail receipt. 12/13/06-Hiralkumar Patel. spoke with Ms. Plotnik. she asked to call her son Martin Plotnik (Ph.: 212-222-1269, Fax: 212-222-1637). call for Martin and spoke with William Bastien at Martin's office. he knows about the department's site visit and letter from department. he gave Martin's cell number (646-734-3593). spoke with Martin Plotnik. he will hire contractor for required work and will contact with contractor's info. 12/18/06-Hiralkumar Patel. received message from Mr. Plotnik. he spoke with Isaac at Eastmond and will call once he finalize with Isaac about work. 12/27/06-Hiralkumar Patel. received letter from Mr. Plotnik stating that he has hired Eastmond for required work. 01/11/07-Hiralkumar Patel. spoke with Mr. Plotnik. he will meeting Eastmond at site next week for inspection and will do required work. 02/15/07-Hiralkumar Patel. received letter from Mr. Plotnik stating that Isaac has surveyed site and will contact the Department. 02/27/07-Hiralkumar Patel. received message from Isaac. left message for Issac. 06/04/07-Hiralkumar Patel. spoke with Mr. Plotnik. he has hired Brooklyn Heating to put new tank in. as per him, Isaac inspected site and found no problem. Anthony Vaccaro Brooklyn Heating & Mechanical Ph. (718) 444-7771 left message for Anthony. 07/25/07-Hiralkumar Patel. spoke with Mr. Plotnik. he will call Anthony and ask him to call the department. 08/27/07-Hiralkumar Patel. spoke with Mr. Plotnik. he will ask his contractors to call me. 08/28/07-Hiralkumar Patel. received call from Mr. Plotnik. he spoke with Mr. Vaccaro and he will send report soon. 10/09/07-Hiralkumar Patel. spoke with Mr. Plotnik. he mentioned that there was a crack in fill line. he will call contractor to submit a report. 10/10/07-Hiralkumar Patel. received message from Mr. Vaccaro from Brooklyn heating. left message for Mr. Vaccaro. 10/22/07-Hiralkumar Patel. received letter from Mr. Plotnik with letter from Brian S. Crockwell, INc. as per letter from Brian Crockwell, he opened sidewalk to replace fill line and didn't found any contamination. based on submitted documents, case closed. as per owner's son, they have installed new tank. no PBS record found. old tank was unregistered. referred unregistered tanks to DEC Falvey and Jacob."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Fill line from sidewalk to basement travels through former coal chute. Line leaked in this coal chute and oil spilled to the basement floor. PTC was hired to clean up basement and repair line. 9/17/2008 Joe Ostrowski says repairs were completed and basement floor is cleaned. PTC will do a power wash of the coal chute in 1 or 2 days. OK to close out."
Remarks:	"caller states that there was a leak in the fill line. spill was contained to the tank room. all product was cleaned up."

DEC Memo: "Left a messege for Issac Mungra to get back to DEC with additional information. 03/31/08 Spoke with Issac Mungra. 15,000 gallon #6 oil UST under sidewalk, leaked. Eastmond pumped out the tank, installed temporary tanks,in a process of sending proposal to managing agent. Letter was sent to Gumley Haft 415 Madison Avenue New York, NY 10017 Attn: Alan Warshavsky (sr) 06/04/08 Rec'd letter from RAND Engineering & Architecture,requesting extension of the deadline.RAND will be installing new above ground tank, soil borings around the old tank will be performed, as per the letter dated April 24,2008 from RAND Egineering & Architecture,PC.(sr) 10/02/08 Site meeting with Miller Environmental,Controll combustion and Rand Engineering was today at 09:00 AM. The boiler room floor level is below the level of the tank bottom. No sign of stain or oil leakage observed on the wall.Tank installation will commence soon.Existing tank will be abandoned in place.Miller Environmental drilled through the bottom of the tank, found oil below the tank.Miller to propose a investigation and remedial work plan.(sr) 10/16/08 Three borings to define the contamination zone, proposed by Miller environmental Group.Two on the side walk, one inside the building.(sr) 12/17/08 Rec'd investigation summary report from Miller Environmental.Borings installed through the tank bottom in september showed small amount of oil entering the tank with perched groundwater.Three other borings installed on both sides of the tank and in the boiler room at lowest point. No oil staining was present in soil borings B-1,B-2, and B-3. Ground water was encountered at 15 feet below grade.Based on fields observation and lab data, MEG believes that a minimum amount of product has accumulated just beneath the UST, and it has not spread from that area.MEG would conduct Vacuum Fluid Recovery(VFR)on the UST once per month to recover any free phase product accumulate in the UST.(sr) 04/16/09 Rec'd status report. VFR was conducted in 01/09 and 210 gallons of liquid was removed from the UST.From measurement, half of the liquid recovered was oil.In 02/09. VFR was done again and 35 gallons of emulsified oil ,sludge and water was recovered. It was little or no liquid accumulation after VFR. In 03/09, VFR was conducted and 25 gallons of emulsified oil and water was recovered.From field observation by MEG, little or no liquid recharge was occurring in the UST.MEG concluded that the infiltration of oil and water is slow and minimal. Therefore, monitoring and VFR should be conducted for few more months.(sr) 07/29/09 Rec'd closure report from MEG dated July 23,2009.On May 5, 2009 MEG removed 117 gallons of water and again on July 10, 2009 MEG removed 185 gallons of water from the UST,no oil entered the UST, as per MEG.No vocs or svocs were detected in any of the soil borings that were advanced in the vicinity of the UST.No oil seepage has been identified through the basement wall or in the boiler room sump.Report in edocs. Case closed.(sr)"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "8/14/06 - Raphael Ketani. I visited the site at about 1:00PM today. The management company is: Brown Harris Stevens, 770 Lexington Avenue, NY, 10022; (212) 508-7288, Mr. John Sicree. The PBS case is #2-363987; 10,000 gals., #6 oil. I met Mr. Sicree on site, Mr. Joe Ostrowski of PTC (718) 624-4842, and Eric Suthpin, senior techincian, of HESS (732) 750-6000. The PTC cleanup crew wasn't on site, but Mr. Ostrowski said they were on their way. There was about a few gallons of oil on the boiler room floor just outside the tank room wall -it looked as if the oil had seeped through the wall. In the tank room, there were 2 plastic 30 gal. garbage cans filled with oil and about 5 gals. of oil on the floor at one end of the tank. The spill was confined to a small corner of the room. Mr. Ostrowski said the seam broke on the tank. No drains or sumps were affected, but one sump was nearby. I told Mr. Ostrowski to have someone put down absorbent and to make sure no oil makes it to the sump. He said he would do this. The total spill was about 70 gals. Mr. Sicree said that the tank room floor had been recently recemented. I could not see any cracks in the floor. The floors in both rooms were epoxy painted. The vapors were 3400 ppb in the breathing zone of the boiler room, 127 ppb in the lobby, 50 ppb in the back lobby area, and 86 ppb on the first floor. I told Mr. Ostrowski and Mr. Sicree to have fans ventilate the basement. They said they would. 8/15/06 - Raphael Ketani. Mr. Sicree called me to give me more information regarding the spill. He said that an engineer inspected the site today and the engineer told him that the end of the tank was resting on the concrete and it had corroded to the point of rusting through. Mr. Sicree added that the tank had been emptied and much of the oil that was on the floors had been cleaned up. He said that, at this point, no one is sure whether the tank will be repaired or replaced. Mr. Sicree added that on 8/11 there were about 2400 gals. of oil and HESS made a delivery that day of 6219 gals. 8/21/06 - Raphael Ketani. Jamal Taha of Lawless & Mangione (914) 423-8844 called. He said that his company will be involved in either removing or fixing the tank. He said that if the tank is removed or replaced, then his company will do the revised PBS. 10/16/06 - Raphael Ketani. I tried to call Mr. Sicree and Mr. Taha, but could only leave a voice mails. 10/17/06 - Raphael Ketani. Mr. Taha called back. He said that the tank was being replaced at this time and that PTC was cleaning up the spill. I told Mr. Taha that I needed the revised PBS registration showing the tank removal and replacement, a copy of the bill and manifest for cleaning and shipping the spilled oil, and a document showing that a tank had been purchased. He said he will do this. 11/6/06 - Raphael Ketani. I tried to reach Mr. Taha, but could only leave a voice mail regarding the cleanup, tank replacement, and revision of the PBS registration. 11/8/06 - Raphael Ketani. Mr. Taha returned my call and left a voice mail. He said that he was still getting all of the documentation together and will send me the package next week. 3/7/07 - Raphael Ketani. I spoke to Mr. Taha. He said that the old tank had been removed and the new one had been installed. I told him that this doesn't show up in the PBS record and so the record needs to be changed to reflect the removal and replacement. He said he would do this. 3/12/07 - Raphael Ketani. Mark Salamack of PTC called me in response to my call to Mr. Ostrowski. He said that he will look into the case and try to get me the documentation I need. 3/14/07 -

APRTMENT BUILDING (Continued) **S108131238**

Raphael Ketani. Mr. Salamack (718) 624-4842 sent me a FAX of the manifest for the removal of the oil contaminated absorbent. 7/25/07 - Raphael Ketani. I contacted Mr. Sicree and told him that I could not close the case. He asked what I needed. I told him the PBS registration needed to be revised (I sent him the form). He said he will get on this right away. 10/17/07 - Raphael Ketani. I checked the PBS registration. It has been updated. 10/22/07 - Raphael Ketani. I spoke to Mr. Sicree and he said that, to the best of his knowledge, soil samples weren't taken because the spill was small and was cleaned up quickly. However, he does have the manifests for the soil contaminated material (drywall, spent Speedi-Dri) that were shipped out. I told him to send me the manifests. Mr. Sicree sent me a manifest for all of the contaminated material that was removed. Mr. Salamack called me back and said that, aside from the initial response, PTC didn't do anything more at the site. So there is no paperwork to submit. He said another company was brought in to take care of the tank. Based upon my conversations with Mr. Sicree and Mr. Salamack, and the records in the case file, I am closing the spill case. "

Remarks: "SPILL IS ABOUT 100 GALLONS OF OIL, SOME OF WHICH HAS BEEN CLEANED UP: REMAINDER OF CLEANUP STILL IN PROGRESS:"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Sangesland spoke to Mark at PTC. He says there is a severe problem with this site. They found a void under the sidewalk filled with petroleum. PTC submitted a proposal to the management company. Property Manager: Eileen Cannon at Douglas Elliman Property Mgt 675 3rd Ave, New York, NY 10017 Fax 212-209-5917 CSL letter sent to Ms. Cannon at Douglas Elliman 08/04/08 Performed site visit today.About 2' of the fill line runs under sidewalk and it had a hole where it exits below the side walk to the tank room.Oil travelled down to the tank room, underneath the tank.The tank is on saddles.There are some contaminated debris underneath the tank that needs to be removed.Floor looks fine, no cracks.Nevertheless, core drilling will be done to investigate the oil seepage under the concrete floor.Miller Environmnetal will perform the work.During my visit miller rep Danny was present with Building super Claudio Dallafiora.(sr) 11/03/08 Spoke with Danny(Miller Environmental)this morning, he believes the clean up was completed after we discussed the matter on 08/04/08 and will get back to me ASAP.(sr) 12/11/08 Rec'd letter from Controlled Combustion.The area by the tank was recleaned and one drum of contaminated debris was removed from that area. A total of 20 drums of contaminated debris were removed from the tank room. A chip sample was taken from under the concrete in the former coal storage room.Analytes are below TAGM limit.Disposal manifest were provided.Case closed.(sr)"
Remarks:	"inside line leak , broken fill"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
