DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 3/3/98 e-mail from ERT Carbone: No contaminated material was removed. Enzo Canazzaro of DEP spill, but directed the crew to backfill over it. 3/22/98 e-mail from Con Ed ERT Lukshides: As per direction of DEP Rep Enzo Canazarro the excavation was backfilled without excavating the contaminated soil. The contamination was caused when a car fire in the locale of a gas ops excavation leaked gasoline (which was mixed with water) into the excavation. This was a third party spill. "
Remarks:	"CALLER STATES THAT A CON ED EXCAVATION SITE WAS CONTAMINATED WITH ABOVE. SPPILL CAME FROM A PASSENGER VEHICLE THAT CAUGHT FIRE. CAR'S TAGS PA - E52372. NYFD PUT FIRE OUT AND GAS/WATER MIX WENT INTO SITE."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Tank Converted to Non-Regulated Use
Pipe Model: Not reported
Install Date: 07/01/1937
Capacity Gallons: 3000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 07/11/2003
Register: True
Modified By: TRANSLAT
Last Modified: 04/14/2017
Material Name: #2 fuel oil (on-site consumption)

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region:	2
DER Facility ID:	412945
DEC Memo:	"Sangesland - Problem was identified when residents complained of smell. Chris at ABC Tank tested and failed the tank system AND isolated and failed the tank alone and the vent line. Sidewalk vault tank was emptied and temp tanks installed in rear yard. Smell problem appears to be associated with leak from tank to soil getting into the basement storage room. Mike Hughes from DOH got involved from a complaint from a resident. Turns out the resident is also the FORMER building super. Basement area needs to be inspected. Chris from ABC Tank got sidewalk permits from DOT and was ready to open up the sidewalk vault when James (FORMER Property Mgr) said they wanted to shop around the price for the work. Property Mgr is now Edward Abrams or Woody at 212-764-0700. 2/6/12-Vought-Site visit by Vought on 2/1/12. Vought met with super who was also doorman (Raymond Ph:917-670-6541). Sited had 5000-gallon #6 fuel oil UST that was located in sidewalk adjacent to boiler room and storage room for Gallery and Apt 1A. Raymond noted that former building super was terminated from employment three weeks ago. Vought inspected boiler room and lines to AST in sidwalk were removed and ran above ground from boiler room wall to boiler. No evidence of significant petroleum seepage (eg staining or odors) and no product or sheen on groundwater in boiler room sump. Raymond noted that there have been no recent complaints of petroleum odors. Note that former tank had #6 fuel oil that is characterized by low VOCs. Vought also observed bedrock outcropping in one storage room near foundation of wall. Vought received call from and spoke to former super (Wally Ph:917-470-9401 Cell:347-556-4406). Wally confirmed his recent termination and noted that in October 2011 there were bad petroleum odors that he and the residents noted and that they were no longer present. Wally noted that his doctor had confirmed that his petroleum exposure had been detectable and he was concerned about health effects. Vought noted that he would call NYSDOH and return call to Wally or have NYSDOH return call to Wally. Vought also noted to Wally that Vought would send out letter requiring investigation of the tank that failed and that Wally could access file via submission of a FOIL request. Vought

VAPOR COMPLAINT AND TANK TEST FAILURE (Continued) **S111458590**

however noted that no immediate response regarding indoor vapors would be performed as Vought observed no odors on 2/1 and Wallys confirmation of no current vapor issue. See also PBS #2-160970 for site and as per PBS owner is: Siba Management 580 5th Avenue 33rd Floor New York, NY 10036 Attn: Edward Abram Ph: (212)764-0700 email:info@sibacorp.com 2/7/11-Vought-Sent letter to Siba Management requiring investigation of possible soil and groundwater contamination via installation of soil borings to at least 5 feet below tank invert or through tank bottom with one month deadline. Vought also sent email to NYSDOH Hughes and Andrea and cc to DEC Austin with spill notes, copy of requirement letter and inquiry for possible contact on Wallys possible health impacts from possible former vapor impact. Vought called and spoke to Edward Abram and explained reqiurement letter and asked that Abram notify Vought immediately if any future vapor issues. Vought called Chris Quintana (ABC Tank Cell:347-397-8298 Fax:718-272-3147) and informed him of letter. 2/13/12-Vought-Spoke with Quintana and he noted that UST in sidewalk was lined inside with concrete. Vought spoke with DEC PBS Unit Falvey who noted that EZ3 test (which was performed on UST) was not applicable to tanks lined with concrete and that contractor either must submit info supporting its use as a method. If info cannot be provided then passing test cannot be accepted and tank will have to be investigated. Vought called and spoke to Quintana and he sent out crew today to drill through the tank and collect samples. Fill line was isolated and was retested and passed as well as supply/return lines. Vought received second call from Quintana that three soil samples were collected from the bottom of the UST and two out of three showed heavy contamination. Quintana will send in the most contaminated sample for analysis and begin plans for excavation of contaminated soils. Quintana also noted that he will excavate to seepage location in adjacent storage room. DEC requires: 1)TTF Letter and submission of failing TTF results 2)cc to ABC Tank (Chris Quintana) 4/2/2012 Sangesland got a call from Chris Quintana at ABC Tank. He said the owner has signed a contract to excavate and remove the 5,000 gal #6 tank from the sidewalk. Removal of the tank and then clean and replace the tank. Chris expects the work to be started as soon as he gets sidewalk permits. 4/30/12-Vought-Received call from former super (Wally) and he is no longer living at site and inquired about receiving copy of file. Vought referred him to DEC Website and FOIL application. Wally made no additional inquires regarding past possible petroleum exposure and as he was no longer living at site, and DEC observed no odors during last site visit, no inquiry to be made to NYSDOH or NYCDOH. 6/15/12-Vought-Received email from Donna with site plan and analyticals and called and left message to have them resent via fax as formatting difficult to correct in email for E-docs. 6/19/12-Vought-Received fax from Donna (ABC Tank) including site plan and analyticals of endpoint soil samples from UST excavation. Sample analytical date 6/7/12. Three endpoint soil samples collected from UST excavation (left, right and middle). Soil analytical show no CP-51 Soil Cleanup Objective exceedences. Vought added report to E-docs and sent Spill Closure Letter to Siba Management and faxed copy to Donna at ABC Tank. Spill closed by Vought."

Remarks: "Vent line leak. Tank has been emptied."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Name:	FDNY
Spiller Company:	ROCKAWAY FUEL
Spiller Address:	1332 3RD AVE
Spiller Company:	999
Contact Name:	FDNY
DEC Memo:	"11/17/10-Hiralkumar Patel. received spill around 8 PM on 11/16/10. FDNY reported spill. FDNY was called last night due to odors in entire building. spoke with LT. Jones. Rockway Fuel delivered oil on monday morning. Lt. Jones spoke with tenants who mentioned that odors were inside building during delivery and some spill was noticed after delivery, so oil company put some odor killing powder in basement and first floor and then left. Lt. Jones confirmed no free product in basement, but wet stain on foundation wall where fill line enters into building. spoke with Joe from Rockway Fuel (718-585-8300). Joe mentioned that leak is from fill line under the sidewalk. spoke with Su Lin Yang, property owner. asked him to seal the fill port immediately and set up ventilation system in basement as well as ground floor. oil company hired Riteway Tank. spoke with Anthony Lara at Riteaway and asked to set up ventilation system. 9:30 AM:- visited site. met Mr. Yang and Anthony. inspected building basement. found strong odors in main lobby on ground floor and even stronger odors in basement even with multiple fans running in basement. as per Anthony, contaminated air was ventilated in back of the building last night. but the back door was found closed during inspection. found wet foundation wall where fill line enters into the building. fill line enters into a small passage that could be an old hatch area. fill port is located about 1 ft away from curb line, right in front of the main entrance to the building. about 6-8 ft of fill line is underground, below the sidewalk. all other lines are aboveground. vent pipe is next to the foundation wall. foundation wall area below the fill line entrance is all wet and found couple of spots where oil was seeping through wall. asked Anthony to epoxy seal the foundation wall to prevent any more oil/odors coming into basement. asked Anthony to set up another ventilation system in basement with exhaust running above a scaffolding on sidewalk (scaffolding installed by next door building which is under renovation). asked Anthony to seal the fill port to prevent any more deliveries through leaking fill line. site has five story building with basement. inspected lobbies in all five floors. found strong odors in ground floor only and no odors detected in floors above. a kids' cloth store, Gymboree, is located at ground floor. met Rachel Bofill, Gymboree store manager. Ms. Bofill mentioned that there was very strong odors in their store during delivery and also after delivery. she also mentioned that two of her employees (who are pregnent) and customers (who comes with

APARTMENT BLDG (Continued) **S110612137**

their infants and toodlers) complained about petroleum odors in store and headache. inspected cloth store. found no odors in front part of building (that could be due to fresh air circulation through main door) but some odors detected in back of the building. asked Anthony to set up ventilation system in back of the cloth store. due to petroleum odors in store, suggested Ms. Bofill to close the store for at least today until ventilation system is installed. Ms. Bofill choose volunterily to close the door, but also requested help from city health department. spoke with Mike Hughes at NYS DOH and informed him about current situation. requested help from NYC DOH. inspected tank room. site has one 2,000 gal tank wrapped in concrete. as per the PBS recrod (PBS #: 2-400033), the tank is aboveground in contact with soil. during inspection, found weep holes on tank vault, but hese weep holes are about 2 ft above the basement floor and not at the bottom of the vault. asked Mr. Yang to correct this as no oil will come out of weep holes, if tank is leaking, until vault filled up to 2 ft. also asked Mr. Yang to color code the fill port. Michi York Corporation **property owner** c/o Su Lin Yang 43-62 157th Street Flushing, NY 11355 PH. (718) 353-5105 (O) (917) 650-5701 (C) email: michiyork@hotmail.com Rachel Bofill **store manager at Gymboree** Ph. (616) 415-3330 (C) Rachel Perren **district manager at Gymboree** Ph. (914) 837-2262 Antohny Lara Riteway Tank Ph. (718) 855-7272 (O) (917) 709-3317 (C) Anthony left the site and will be back by 2 PM with required material. suggested Mr. Yang to leave front hatch open, if safe. Mr. Yang left hatch open and his friend will watch the area. 11:24 AM:- received copy of email from Mike Huges that he sent to city health department. Mike requested copy of spill report. 1:38 PM:- sent email to Mike including copy of spill report and pics taken during the site visit. email copied to Gary McDonald (NYS DOH) and city health department (CDANDREA@health.nyc.gov; PSTALLBO@health.nyc.gov). 11/18/10-Hiralkumar Patel. 9:30 AM:- visited site. met Anthony. a ventilation has been set up in basement with exhaust pipe through front hatch to the top of scaffolding. one fan was set up on back door in store and one fan was set up on door in back of the building. no odors detected in basement, ground floor or store area. Riteway crew will start cleaning up contaminated material from basement and will epoxy seal the foundation wall. fill port has been sealed. Anthony has applied for sidewalk permit and expect to start soil excavation on 11/22/10. asked Anthony to call the department for inspection prior to backfilling the excavation. 11/19/10-Hiralkumar Patel. 11:56 AM:- received call from Anthony. they are still cleaning up floor and wall. once loose debris removed from area, they will powerwash the wall and floor and then apply epoxy paint by tomorrow. 1:40 PM:- sent letter to Mr. Yang requiring endpoint samples. letter emailed to Mr. Yang and Anthony. 11/22/10-Hiralkumar Patel. 11:36 AM:- received call from Anthony. they are washing floor/wall today. they got permit and will start excavation either tomorrow or wednesday. 11/23/10-Hiralkumar Patel. 11:33 AM:- received email from Chris D'Andrea from NYC DOH. DOH inspector visited site on 11/18/10. no odors were detected throughout the clothing store. public hallways and an elevator had noticeable odors and strong odors noted in basement spill area as work was ongoing. 11/29/10-Hiralkumar Patel. 2:29 PM:- spoke with Anthony. he mentioned that they started soil removal on 11/26/10 and removed about 10 drums of soil. NYC DOT inspected site on 11/26/10 and stopped the work as permit was for sidewalk repair only and not for soil excavation. asked Anthony to

APARTMENT BLDG (Continued) **S110612137**

correct work description in the permit. 12/07/10-Hiralkumar Patel. 2:10 PM:- visited site. met with Ms. Bofill. no odors detected in store. as per Ms. Bofill, an inspector NYC DOH visited site yesterday and found no problem. 2:13 PM:- spoke with Anthony. he mentioned that they finished excavation, collected endpoint samples and backfill the excavation. they dug to 3.5 ft bg. asked Anthony to re-open the area as need to inspect the excavation bottom (informed earlier). Anthony will be on-site at 8 AM on 12/10/10 to re-open excavation area for inspection. 12/10/10-Hiralkumar Patel. 9:20 AM:- visited site. met Riteway crew. they had exposed previous excavation area. no oil stains found in bottom soil. found clay layer at the bottom of the excavation. inspected basement. no odors in basement. foundation wall, where fill line enters into the building, is made of stones with space in between. 9:36 AM:- spoke with Anthony. based on observations during the site visit, asked Anthony to backfill the excavation and remove all ventilation systems. asked him to submit cleanup report once endpoint sample analyticals are available. also asked him to seal foundation wall inside building.
01/05/11-Hiralkumar Patel. 11:11 AM:- spoke with Anthony about the report. he will submit report by 01/07/11. 01/18/11-Hiralkumar Patel. 11:21 AM:- spoke with Anthony. he is waiting for final manifest. asked him to submit report today and manifest when it is available. 01/24/11-Hiralkumar Patel. received spill cleanup report from Anthony. based on available information and submitted report, case closed."

Remarks: "Fuel company delivered 2 days ago and fuel spilled in cellar onto concrete. No report called into SPILLS at that time. FDNY on scene due to odor call currently and has called for fule company clean up response. FD standing by."

Tank Info:

Tank Number:	001
Tank Id:	20999
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

C03 - Pipe Location - Aboveground/Underground Combination
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
I04 - Overfill - Product Level Gauge (A/G)

Tank Location:	Aboveground in subterranean vault with access for inspections..... Tank in subterranean vault but accessible for inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1960
Capacity Gallons:	5000
Tightness Test Method:	NN
Date Test:	Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

CON EDISON SERVICE BOX: 13899 (Continued) **1016677633**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	5234
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
G00 - Tank Secondary Containment - None
H00 - Tank Leak Detection - None
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
J00 - Dispenser - None

Tank Location: Partially buried tank (tank with 10% or more below ground).... Tank is

170 TENANTS CORP (Continued) **U003385201**

	less than 90% above grade, partially buried.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	04/01/1986
Capacity Gallons:	5000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

DEC Memo:	"02/06/14-Hiralkumar Patel. 10:10 AM:- left message for Tony Watts at NYC Transit. Tony Watts Ph. (646) 252-5939 02/07/14-Hiralkumar Patel. 8:41 AM:- received message from Ms. Watts. she mentioned that MTA subway unit is going to inspect the impacted area at 10 AM today. they will meet at 74th st and Lexington ave. spoke with DEC Piper and informed him about site inspection at 10 AM. Piper will visit site.

SUBWAY TRACK - NYCT 6 LINE (Continued) **S125358785**

8:48 AM:- left message for Ms. Watts. informed her that DEC Piper will meet at the site at 10 AM. case assigned to DEC Piper. DEC piper met with MTS Maibauer, and Envirotrac Bowlen. Site walk to outline area in sub basements where seep is visible. Envirotrac to perform database search of area to determine possible sites. Building on NE corner has fairly new tank and system. Fill and tank are on eastern side of lot. Bldg on NW corner failed a tightness test on the fill line. It was dugout and no visible cont existed. Unknown source. MTA to continue to monitor and clean seep into drain vault. It may not be feasible to geoprobe in area due to clearance, etc. 10-16-15 - Obligado - This spill is assigned to Obligado as per Randall Austin. I called Francine to get an update on this spill to see if there was any additional seepage since the initial event. She said there was additional seepage, and when electrical division does work in that area they have observed oil on additional inspections and NYCT has done some additional cleanup. She said she will contact the person with more knowledge about the site issues to get more information and she will send me pictures. I called Jeff Bohlen at Envirotec to request EDR reports, Sandborn Maps, and Laboratory analyses and any other documents on file. I left a message to call back the NYSDEC. 4-17-17 - Obligado - I sent an email to NYCT Michael Mandac requesting an update about whether there is any additional oil seepage at this site. 10/18/19 - Obligado - I received a called from Rocco Delgiudici who is a Hydraulics Superintendent. He said the had a relatively large accumulation of oil in the sump (25-50 gal) and pumped out approx. 800 gallons of oil/water mixture was pumped out. Site inspection scheduled for 10/21/19. See spill #1907245 (closed and consolidated with 1310579. 10/21/19 - Obligado - I inspected the pump room with DEC Eric Kim, NYCT System Safety Lea Benes, NYCT Hydraulics Anthony Giordano. Upon inspection, the water in the pump sump was clear with no oil sheen, film, or floating product. There was oil staining on the sides of the sump wall and on the pump equipment. It was not possible to determine if the oil staining was due to a new condition or historical oil seepage. I requested NYCT notify the DEC if oil is encountered during the next inspection. I also inspected the building at 145 East 74th St. The tank room appeared clean with no evidence of spillage. There was no evidence of spillage in the vicinity of the remote fill. "

Remarks: "collected to sub pump contained - clean up pending"

Spiller Address:	163 EAST 74TH ST.
Spiller Company:	999
Contact Name:	SANDRA GREER MGNT
DEC Memo:	"Sandra Greer (212-472-1878) is the property manager for the building at 163 East 74th St. Apparently on Feb 25th, Dr. Lemchen complained to the owner about the smell of oil coming through the wall. Sandra Greer sent Rockaway Fuel to the site and discovered that was a broken valve or nipple on the bottom of the oil tank at 163 East 74th. Rockaway repaired the tank. A spill report was NOT called in by the owner, management or Rockaway. On March 7th Dr. Lemchen again complained that there was a smell of oil in his basement. Rockaway sent a crew to Dr. Lemchen's home where they spread Sweet Air . DEC needs to make a site visit to both basements to determine the degree of a problem. Contact for access: 165 East 74th St (Dr. Lemchen's home) call Deborah Lemchen at 212-288-6391 163 East 74th St. Contact Sandra Greer Mgnt. 212-472-1878. 3/11/05. J. Krimgold visit both sites. Light oil odor in the basement of 165 E 74 St. masked by deodorizer. However, no odor in the basement of 163 were tank is located. Oil stain in the area of product line valve around cracks in the concrete. Unknown at this time how long the valve been leaking. Ordered to remove concrete in the affected area and begin soil removal. PTC was hired through fuel oil co. to perform cleanup. 3/11/05. CSL has been sent via fax to Sandra Greer MGNT. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. 10/8/10 - Austin - Reassigned from Tang to Spills staff - end 8/26/19 - Spill reassigned to Kim as per Obligado."
Remarks:	"Caller works for Dr. Lemchen. She says there was an oil spill in the basement of 163 East 74th St which is now impacting the basement of 165 East 74th St which is where Dr. Lemchen lives."

Spiller Name:	LIMA PALMER
Spiller Company:	RSEIDENCE
Spiller Address:	165 EAST 64TH ST.
Spiller Company:	001
Contact Name:	LIMA PALMER
DEC Memo:	"Original call came in from Mina Palmer, secretary to Dr. Kenneth Lynch. Dr. Lynch owns a 1 family house at 163 East 74th St. His wife smells oil in their basement and thinks it's coming from next door at 165 East 74th St. Sangesland looked up the address and found 165 East 74th St is a 2 family house owned by Marjorie Reed (212-535-6280). A message was left on Ms. Reed's machine asking her to investigate her basement area for an oil spill. Sangesland's desk phone number and the hotline phone numbers were both left for contacts. 1/5/06 - Raphael Ketani. I made contact with Ms. Mina Palmer, Dr. Laub's secretary, at the doctor's office (212) 755-2333 [home (212) 288-6391]. She said the doctor will get back to me. 08/14/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. called to Lima Palmer she is not there today. Talked to Ms. Meridith she said she will convey my message to her regarding spill. -QA 08/21/06: Called Ms. Meridith At (212)755-2333 To remind about the closing confirmation letter of the spill She that said she will remind to Ms. Lina Palmer (office Manager) to fax the letter. -QA 09/25/06: Called at(212)755-2333 and talk to Ms. Leesa she said spill is at next door. She didn't give phone number. -QA 07/10/07: Called at doctor's

LYNCH ODS (Continued) **S106866838**

residence to set the time for field inspection they said somebody will be in touch with you regarding inspection of the basement. -QA 08/29/07: Called at (212)288-6391 and left message to call me back regarding inspection of site. -QA 08/30/07; Called at (212)288-6391 and left message again regarding inspection of basement and to call me back to fix the time for inspection. -QA 09/11/07; Called at doctor's resident (212)288-6391 and talked to Mrs Lemchen she fixed time for inspection of basement on September 24 (Monday) at 11 O'Clock. -QA 07/03/08 Spill case transferred from Q. Abidi to J.A. Maisonave - JAM 12/14/11: This spill case transferred from J. Maisonave to J. Kolleeny. - JK 01/16/20: I called Dr. Lynch's office at 212-755-2333, spoke with Marisel (receptionist, marisel@smilenycity.com), who said she will speak with Dr. Lynch and/or his wife to see if they still have a problem with petroleum odors in their home/basement. I then called neighbor, Marjorie Reed's residence at 212-535-6280, spoke with Marjorie's husband, Mr. Gordon, told him there had been a complaint in 2005 from a neighbor who suspected oil odors were coming from their basement. Mr. Gordon said his building has not had an oil tank for 35 years. He also stated that his address is 165 East 64th Street, not East 74th Street, so unlikely Dr. Lynch's wife's odor complaint had anything to do with their (Gordon/Reed) residence. Based on age of spill report, fact that no additional complaints appear to have been called in, and discrepancy regarding address of suspected source, I am closing this spill case. - J. Kolleeny"

Remarks: "Resident smelt oil in the basement and they investigated the smell and the tank is leaking. Unkown amount or why the tnak is leaking. has not been cleaned up"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"PTC conducting cleanup of spill, oil impacted soil near sidewalk, estimated two drums of contaminated debris to be removed, paperwork to follow 08/10/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. 08/16/06: # 2 fuel oil spill reported by owner of the apartment building on February 7, 2005 due to broken fill line. Petroleum Tank Cleaner Company exposed the side walk portion of the fill line and found small contamination. This contaminated dirt was placed in to one drum and legally disposed of off site. The broken fill line was replaced and two soil samples were taken. All analytes were found below detection limit. -QA 08/21/06: According to the letter of Mr. Mark Salamack and based on the information available Staff closed this spill. -QA"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
I04 - Overfill - Product Level Gauge (A/G)
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	06/11/1958
Capacity Gallons:	2000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	MFLEONAR
Last Modified:	07/19/2017
Material Name:	#2 fuel oil (on-site consumption)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

CON EDISON SERVICE BOX: 13777 (Continued) **1016677489**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE 2/3/00 TIBBE VISITED SITE. CALLER REPORTED AN ODOR AND A HAZE IN STORE WHICH CAUSED BURNING EYES AND ITCHY THROAT. INSPECTED THE BASEMENT AND FOUND A SMALL SPILL OR DRIP FROM SUPPLY LINE. SPEEDI-DRI AND A SWEETNER POWDER HAD BEEN APPLIED. THERE WAS NO STANDING PRODUCT OR CONTINUED LEAK AND NO ODOR. THE SYMPTOMS AND THE HAZE IN THE STORE

SPILL NUMBER 9912582 (Continued) **S104650249**

DIRECTLY ABOVE THE FURNACE COULD INDICATE A CARBON MONOXIDE PROBLEM. THE CALLER WAS DIRECTED TO CALL NYC DOH TO HAVE THIS POSSIBILITY PERSUED."

Remarks: "caller states there was an oil spill next door that was cleaned up - caller still is getting oil and a chemical smell when the heat runs - caller is unk if it the same spill or if there is a new leak/spill "

DEC Memo:	"158723. 5-23-05 @ 09:48 H Anderson # 14143 reports that while pulling cable at the nec e 75 st & madison av, J Bauer # 03431 discovered 10 gallons of hydraulic fluid had leaked from a broken hose on truck # 60749 onto the asphalt street. There was or is no smoke or fire involved. No sewer or waterway affected. No injuries and weather had no affect. The hydraliic fluid mixed with 5 gallons of water that was standing on the street. Account # 13768 is being used for this incident. Source of spill is the vehicle and the cause is a broken hose. No private property affected. No samples need to be taken. Pads and speedy dry are being used to perform the cleanup. H Anderson # 14143 stated that the cleanup will take more than 2 hours. Cleanup start time is 09:43. Transportation has been called to respond to the location to make repairs to the hose. J Moran # 01182 CIG L Costa # 13880 notified @ 10:21 J Moran # 01182 5/23/05 13:05 H.

CONED VEHICLE #60749 (Continued) **S106971185**

Anderson # 14143 of cable called to report that the cleanup was completed at 13:05. Absorbant pads as well as granuals were used in the cleanup. There was 6 bags of debris generated as a results of this spill. The debris will be brought into W. 28 St yard for disposal. Transportation came to the location & stopped the leak. The truck will be brought into W. 28 St for repairs. The cleanup crew was: J. Bauer # 03431, M. pelusio # 87327, M. Chacon # 19531. R. Bruns # 21106 Closed. "

Remarks: "leaked to asphalt, and mixed with about 5 gallons of water (standing): in process of cleaning up: all contained: coned # 158723"

DEC Memo:	"Large aboveground tank in a large basement tank room. Tank started to leak through a crack. PTC sent a crew to pump out the tank (now squeegied cleaned) crew is now cleaning up the floor of the tank room. Probably about 300 gal spilled to the tank room floor before the tank was drained. PTC does not think there were any cracks or drains, but they will need to inspect the floor after the cleanup is complete. 02/09/09- Ray from PTC called saying for the surface cleanup is done. The tank has to be romeved and take endpoint samples. He said call Control combustion(718) 367-9800 ext. 204 and ask Jerry who is going to continue with the job. 06/02/09-Miller Environmental Group Inc. sent the report dated May,1 2009. The report stated The subject property is a residential building located at 175 East 70th Street in manhattan NY.It was discovered that on December 29th 2008 a fuel oil tank has leaked approximately 50 gallons of fuel oil into a basement area. As a result of this spill. the fuel oil tank and system was taken out of service and will be raplaced. As per Jerry Williams from CC Controled Combustion Petrolem Tank Cleaners did the initial cleanedup then Cardinal Tank Corp. removed the tank. Miller Environmental completed the cleanup after tank removed. on April 29 2009, Miller Environmeantal responded. Eight bags of speedy dry and one absorvent mat roll were used to soak up all ramaining fuel oil left from the spill. All waste materials were collected in plastic bags and taken to Jamica Recycling for proper Environmental disposal. Portland cement was then utilized to refinish a few areas of the basement. A per Jerry Williams the tank was sitting in concrete saddles instead metals saddles. They removed the concrete saddles to clean underneath the tank. The floor under the trank was a concrete solid floor in good shape with no cracks. Spill closed. "
Remarks:	"Caller is reporting the building superintendent has an 8000 gallon tank in the apartment building; the super estimates spill @50 gallons."

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"02/11/14-Hiralkumar Patel. alternate address: none no PBS or other spill found. Supreme Company I LLC. **property owner** c/o Manocherian Brothers 150 East 58th Street, Suite 2801 New York, NY 10155 Attn: Lori Scigel **property manager** PH. (212) 355-4900 11:30 AM:- received call from Jenny from Dr. Putter's office (Lenox Hill Veterinarians). she mentioned that they noted unknown chemical odors in building sometime last year. at that time, NYC DEP, NYC DOH and FDNY responded, but source was not found. they noted odors again yesterday evening and is still present. 11:33 AM:- spoke with Lori Fougere at NYC DEP. she responded to chemical odor complaint sometime in Mar./Apr. of 2013, but could not find source. they (DEP/DOH/FDNY) checked building basement and found some household chemical storage, which were removed lateron. they suspected odors from sewer trap. Lori Fougere NYC DEP DERTA ph. (917) 682-2373 11:48 AM:- spoke with Ms. Cuellar, assistant property manager. informed her about odor compalint. she will have someone from management office check the building. asked her to call back with update by end of today. Jasmine Cuellar Ass. Property Manager PH. (212) 355-4900 12:25 PM:- received call from Ms. Scigel, property manager. informed her about odor complaint. she will send someone to check. 02/21/14-Hiralkumar Patel. 12:53 PM:- spoke with Ms. Scigel. she mentioned that plumber found sewer line clogged with baby wipes. Ms. Scigel suspects these wipes were used, by on-site veterinarian, to clean animals. she confirmed no more odors noted after clearing the sewer line. 12:58 PM:- spoke with Dr. Putter. he confirmed no more odors in building after clearing the sewer line. case closed."
Remarks:	"fumes from basement area extend thru out facility, DEP and DOH have been involved with investigation...no chemicals are stored in basement"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Name:	RITEWAY TANK
DEC Memo:	"9/1/16 TJD Teleconference with Pete at Riteway Tank. They were hired as a subcontractor to replace a curb fill box. Upon inspection the fill box was found to be not tight with evidence of a minor piping leak on fill piping. Excavation was then expanded to expose contaminated soils prompting notification of spill to hotline. Crew is onsite now excavating soils in preparation for installation of new fill pipe and remote fill box. The basement extends under the sidewalk below this spill area and soils will be excavated to the concrete - no endpoint samples will be necessary. DeMeo requested photographs of excavation and required a system test be performed following the completion of the piping replacement at this site. 10/26/18 - Austin - Spill transferred from Tim DeMeo to Prat Lakhani - end 08/06/19 - Lakhani - Spill being transferred to Sekhon."
Remarks:	"spill to sidewalk fill box/clean up underway"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"9/23/11 - Raphael Ketani. The spill took place yesterday. The spill consisted of #2 oil coming through the wall of the tank and into the boiler room at the building. The amount of the spill was about 10 gals. I tried to contact Dave Vega at A.L. Eastmond & Sons (718) 378-3000 in order to find out more information about the spill, but I could only leave a message. According to Property Shark, the site is a townhouse at block and lot 1491 and 27. There is only one main address: 59-61 East 79 Street, NY, 10075. ACRIS lists the deed date

TOWNHOUSE APARTMENT BLDG (Continued) **S111239175**

as 11/20/96. The property was bought by the Soufer Family, LLC, 1015 Madison Avenue, Manhattan, 10021. I checked the Spills database, but did not find other spill cases. I checked the PBS database, but I did not find a registration for 59 East 79 Street, Manhattan. A contaminated soil letter was sent to the Soufer Family, LLC. Mr. Vega called me back. He said that the Eastmond crew was on their way there right now. He said that they will investigate the spill further. They will break open the vault surrounding the tank. I asked him whether the oil that had seeped out had been cleaned up. He said that they had cleaned it up. I asked him how bad the vapors were in the building. He said he was told that you can only sense vapors in the boiler room. I asked him how large the tank was. He said that it was 2500 gals. I asked Mr. Vega whether the vault was right in the boiler room. He said that he hadn't been there. So he couldn't tell me. I made an unannounced site visit some hours later. I met the head of maintenance and he pointed me to the door leading down to the tank room. There were no oil odors at the basement level. The room containing the electric meters had a little absorbent sand next to the common wall separating it from the tank room. A little oil had seeped through. I looked into the sump well and didn't see any oil. The oil odors were very light and the PID meter indicated that there were very low concentrations of vapors. I entered the tank room and saw the 2500 gal. tank in its vault. There was a crack through the vault and a little oil next to the crack. Speedi Dri had been put down. The odors were light and the PID meter readings were well below 500 ppb total VOCs. Seeing that the surficial oil spill was small and that the odors were light, I left the site. 10/20/11 - Raphael Ketani. I tried to contact Mr. Vega (718) 378-3000 (Dave), but I could only leave a message regarding progress at the site. 10/21/11 - Raphael Ketani. Mr. Vega left me a message that Eastmond still has not received authorization to remove the tank. However, the tank has been pumped out. 10/24/11 - Raphael Ketani. As the deadline for receipt of a work plan or cleanup report has passed and as there has been no contact from a representative of the owner or the management company, I sent a followup letter to the CSL with a deadline of November 28, 2011 for receipt of the remediation report. 11/1/11 - Raphael Ketani. Today I received the green return card for the follow up letter that I had sent out. It was signed on 10/28/11 by Shay. 4/5/13 - Raphael Ketani. As there has been no response to the followup letter which was sent months ago, I sent the Soufer Family, LLC a Stipulation Agreement with a deadline of May 3, 2013 for the submission of the signed document. 5/13/13 - Raphael Ketani. To date, there has been no response from anyone belonging to or representing the Soufer Family, LLC. I contacted Mr. Vega (718) 378-3000 (Dave) of A.L. Eastmond & Sons regarding the spill. He said that he didn't remember it, but he will look into his records. 5/14/13 - Raphael Ketani. I tried to contact Mr. Vega, but could only leave a voice message. Mr. Vega called me back. He still could not find any records regarding the property. However, he said that the manager for the Soufer Family, LLC property was Rosita Shay at (212) 628-3225. I spoke to Ms. Shay. She said that many years back Eastern Consolidated Oil came and broke open the vault. They saw that the tank had failed because it was completely corroded. So they removed the vault and the tank and discovered oil contaminated soil that was below the tank. They removed some soil and took end point samples. The results were too high. So they removed more soil and took more end points. After this, the soil was clean enough to leave. Temporary oil tanks were

TOWNHOUSE APARTMENT BLDG (Continued) **S111239175**

installed, but the property is now being converted to gas. I asked Ms. Shay whether she had received the Stipulation Agreement. She said that she never had. I told her that I had sent it to 1015 Madison Avenue. She said that this was the right address, but she never saw the document. I asked Ms. Shay to send me the documentation she had for the remediation of the spill. She said that she had to scan the material first, but it will be sent. I gave her my e-mail address. 5/15/13 - Raphael Ketani. Ms. Shay sent me four documents. These were the 9/22/11 Eastmond & Sons Proposal #1 for opening up the vault, cleaning out the tank and repairing the tank, the 11/2/11 Eastmond & Sons Proposal #2 for opening cleaning and removing the tank and removing the contaminated soil and waste, the 11/30/11 York Analytical Labs Technical Report for the soil sample Floor Beneath Concrete #1, #2, #3, and the 12/23/11 Eastmond & Sons Tank Removal/Abandonment Affidavit. I reviewed all of the documents. The two proposals and the affidavit were found to be acceptable. However, according to the York analytical report, Eastmond had composited the three soil samples and had the composite sample analyzed. This was not proper practice. Each sample should have been analyzed separately. However, given that Ms. Shay said that they went back a second time to remove more contaminated soil, I will assume that they did a reasonable job of removing any threat to the residents of the building. I sent Ms. Shay an e-mail stating that, in the future, soil samples should not be combined for analysis. Later, Ms. Shay called me to say that the York 11/30/11 report was for the first set of soil samples. Right now, they are looking for the second later analytical report so that they can show me that all of the contaminated soil had been removed. I told her to send the report as soon as possible. 5/24/13 - Raphael Ketani. Mr. Vega sent me a package of documents regarding the site cleanup. The package consisted of a 5/24/13 cover letter requesting closure, a map showing where the 3 soil samples had been taken in the former AST area, the 12/23/11 tank removal affidavit, the 11/30/11 York Lab report and 4 site photos. As the sample location map and the photos were the only new information, I reviewed only these items. However, I had no comments. 7/9/13 - Raphael Ketani. I spoke to Mr. Vega (718) 378-3000 and his assistant today about the soil removal that took place and the soil sampling. He said that, initially, his crew jarred some soil from the initial excavation. However, when Mr. Vega looked at the soil and sensed it, he realized that the soil still in the excavation was too dirty to leave. So he had his crew go back to the site, dig out more soil and take new samples. Mr. Vega said that the second set of samples seemed clean as far as the odors were concerned. So, he had them sent to the lab. However, these were the only samples sent to the lab. When I asked Mr. Vega what his men saw when they opened up the floor below where the AST used to be, he said that they saw soil. I asked him why all 3 samples were composited. He said that the lab wanted a lot of soil to test and Eastmond didn't have any large jars. So, they combined the samples. 7/24/13 - Raphael Ketani. I spoke to Mr. Vega today and told him that the DEC was closing the spill case effective today. I also told him that, in the future, enough soil must be collected the each location at a site and the samples must never be composited. Mr. Vega said that he understood. Based upon the information in the case file whereby there were low total VOC vapor readings on my PID meter, that the reported spill amount was only 10 gals. and I saw that very little oil had been released, that there was no groundwater within or below the spill location, and based upon

TOWNHOUSE APARTMENT BLDG (Continued) **S111239175**

the fact that the VOC soil results for the soil remaining in the excavation were mostly below the unrestricted residential standards, I determined that the residual contamination was not a threat to the public or the environment. Therefore, I closed the spill case effective today. 8/6/13 - Raphael Ketani. Leigh Burroughs of Soufer Family, LLC sent me pictures of the present conditions in the basement of the site. 6/21/16 - Raphael Ketani. Rosita Shay, the property manager for Soufer Family, LLC called me today from (212) 628-3225. She said that I had left her a message this morning regarding an AST which used to be onsite. She added that she had been told by Yvonne of EBC (Environmental Business Consultants) that the issue was a failure to register the former AST. I told her that I had not called her and that somehow she had a confused message. I told her that she needed to speak to the staff at the PBS Unit in order to resolve the tank registration. She said that she thought since the tank was no longer at the site, she didn't need to register it. I told her that all tanks, whether existing or having once existed needed to be registered. With this said, Ms. Shay stated that she will call the PBS Unit in order to resolve the matter. After this, the conversation ended. "

Remarks: "Leaking through wall of tank."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Name:	STUART KNOOP
DEC Memo:	"1/19/10-Vought-Received call from and spoke to Jason Hayes and Stuart Knoop (Langan Ph:212-479-5427) and site is 100' x 8' at corner of 3rd ave and east 79th Street. Site will be developed with retail and residential mixed use. Groundwater analyticals show up to 353ppb PCE and 109ppb TCE. Some DCE and VC detected as well. Depth to groundwater is 16-18' and proposed foundation will be going below groundwater. Waterproofing vapor barrier membrane being incorporated into design. No NYCDEP involvement to date. No onsite sources of chlorinated but they will examine sanborn maps. Site has not broken ground to date and Vought provided email and Hayes to email preliminary data. Vought to discuss data with RHWRE upon reception. 1/20/10-Vought-Received email form Knoop that As discussed during yesterday s phone conversation, we have encountered concentrations of chlorinated VOCs in groundwater during sampling at the 200 East 79th Street development site in Manhattan. The proposed development consists of an 18-story residential building that will include a full cellar level and a partial sub-cellar level. The site is currently vacant, and commencement of foundation excavation is pending. Chlorinated VOCs (e.g., PCE, TCE, vinyl chloride, etc.) were first detected at elevated concentrations during collection of a waste characterization sample for a NYCDEP sewer discharge permit. Subsequent groundwater sampling identified chlorinated VOCs in three other wells at the site. Elevated VOC concentrations were not detected in a well installed on the southeastern portion of the site. Detected PCE and TCE concentrations ranged from 27.2 ug/l to 353 ug/l and from 16.8 ug/l to 109 ug/l, respectively. Evidence of soil contamination was not identified during soil sampling at the site; as such, the source of the groundwater impacts has not been determined. The following remediation/mitigation measures will be incorporated during site development: The entire site will be excavated to a depth at or below groundwater, thereby removing any potential on-site contaminant sources. The soil has been characterized and will be transported and disposed at appropriate facilities; The entire site will be capped with a structure, thereby eliminating any direct exposure to potentially impacted media; A water/vapor proofing membrane system (i.e., Grace Preprufe and Grace Bituthene) will be installed underneath and around the sub-grade portions of the structure, thereby mitigating potential soil vapor infiltration into the cellar/sub-cellar areas; and Contaminated groundwater will be treated and discharged into the DEP combined sewer in accordance with an NYCDEP dewatering permit. In addition, Langan will conduct a review of historical fire insurance maps and other resources to evaluate potential off-site sources of chlorinated contaminants. Following completion of the above activities, we will provide the NYSDEC with a Spill Closure Report that documents implementation of the remediation/mitigation measures. Copies of the Waste

CONSTRUCTION SITE/PLUME TRACKDOWN (Continued) **S110751702**

Characterization Report and Groundwater Monitoring Report have been posted at the link below. Please feel free to contact me with any questions regarding the information contained herein.
3/3/11-Vought-Spoke to RHWRE and she noted that Langan should send in all prior reports to RHWRE and she will assign project manager once received. Vought called and left message of same and sent email as well to Knoop including address and name of RHWRE.
5/13/11-Vought-RHWRE spoke to PM and also called Langan (Jason Hayes) and asked him to return call to her so they could discuss applicable programs (Spills or Section A which would require signing of SCCO).
5/17/11-Vought-Spoke with RHWRE who spoke with DEC Cozzy about site and Vought to send inquiry to Langan with submission of site history (eg.Phase I) to documenting the presence/absence of on-site sources of chlorinated solvents. If no on-site sources after DEC review, P-Site package for Plume Trackdown will be issued and case will be transferred back to Spills Unit (for possible DOH review of vapor mitigaiton plan) as Section A has no applicable program. Vought called Langan (Jason Hayes) and he noted that building was not constructed to date and that he would submit site history with presence/absence of chlorinated solvents. Hayes also noted that he would sumbit small section on letter regarding vapor mitigation which in this site would most likely be a non-issue as building foot foundation will extend into water table. 7/18/11-Vought-Received Spill Closure Justification from Lanagan dated 7/14/01. Justification to be reviewed by PM. 8/22/11-Vought-Inquiry by Langan (Hayes) on status of spill closure. 9/26/11-Vought-Inquiry by Langan (Hayes) on status of spill closure and Hayes noted that the excavation is nearing completion (for construction of high rise building). Vought spoke with RHWRE who noted that since no onsite sources of chlorinated solvents and installation of vapor barrier and SSDS and noted that Spill Closure Letter could be sent to Hayes and then followup with Section A on possible Plume Trackdown.
10/13/11-Vought-Spill reassigned from DEC Vought to DEC Ahmed and DEC Ahmed to send out spill closure letter as per Vought.
12/1/11-Vought-DEC Ahmed requested that due to heavy workload that Vought sent out Spill Closure Letter and Vought agreed to request.
1/31/12-Vought-RHWRE received inquiry from Knoop on status of Spill Closure Letter. Vought also received message on cell phone from Knoop inquiring as to same. Vought drafted Spill Closure Letter for review by RHWRE and set up meeting to confirm spill closure and Plume Trackdown applicability. Met with RHWRE and DEC Ahmed and RHWRE approved sending out Spill Closure Letter and noted DEC Ahmed to process site for Plume Trackdown. Spill closed by Vought. Vought added file to e-docs, transferred hard file to DEC Ahmed and sent out SCL via email (to Knoop) and letter to: 200 East 79th Street Construction, LLC. 13-15 West 54th Street 2nd Floor New York, NY 10019 "

Remarks: "ELEVATED CONCENTRATIONS OF CHLORINATED VOC'S, CLEANUP PENDING."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT e2mis 121489 If this is a Con Edison manhole it contains electrical cable and splices. Many manholes have a sealed sump in the

SPILL NUMBER 9810736 (Continued) **S104648221**

floor which is used to allow runoff when pumping the structure. A hose is place in this sump and water on the floor will flow into the sump allowing the floor to be cleaned. If cleaned prior to analysis of the fluid, the structure will be cleaned as >50 PPM and all liquid and waste will be manifested accordingly. The structure will be double washed with a degreaser, i.e. Slix. All cleaning material and PPE will also be treated as >50. If any sludge is found within a manhole it is treated as lead contaminated and manifested accordingly. The spill identification tag will remain secured to the structure until the analysis is completed and if <500 PPM the signage will be removed. If the analysis is >499 PPM, a grid will be prepared for wipe testing the area. Until the analysis of the wipes are proven to be <10ugs/100cme2 all additional waste produced from the structure will be treated as the original analysis. If this spill occurred in a transformer vault containing a sump pump and there was a possible release, the drainpipe trap will be dismantled to determine if oil was released. Sludge found in a vault, through historical analysis, has been determined not to contain lead. 11/24/98 12:30 -- VEH60470 -- NWC E 79ST & MADISON AV B.VELOCE 15739,MANH-CABLE DIVISION REPORTS FOUND SPILL APPROX 35-OZ HYDRAULIC FLUID RESULTING FROM SPLIT HOSE....SPILL WENT ONTO STREET...SPILL WAS CONTAINED WITH PIGS & DIAPERS....NO IMPACT TO WATERWAY OR SEWER....SPILL OCCURRED WHILE PULLING SECTION OF CABLE.....TRANSPORTATION EN-ROUTE TO REPAIR..... Contact Name:	BRIAN GOCHENAUR
DEC Memo:	"07/29/19-Zhune called Brian Gochenaur from Langan Engineering. I coul not get him. Left a message. 9/18/19-Brian Gochenaur emailed the following email: As discussed over the phone earlier this week, while completing a Phase II Environmental Site Investigation (ESI) at the above referenced site, evidence of petroleum impacts including odors, staining, and PID readings above background were observed in soil. In addition, the Phase I ESA and geophysical survey identified evidence of three USTs at the site. Laboratory data identified petroleum-related VOCs in soil at concentrations above Unrestricted Use SCOs, but below the applicable Commercial Use SCOs in only one soil sample. VOCs were not detected at concentrations above the NYSDEC TOGS SGVs in the groundwater sample collected. Following receipt of the analytical data, a spill was reported to the NYSDEC on July 27, 2019, and Spill No. 1904377 was assigned. The future developer of the property is currently seeking a Variance from the New York City Board of Standards and Appeals (BSA) to facilitate the development of the property as a synagogue. To facilitate approval of the Variance, the BSA in conjunction with the NYC Department of Environmental Protection DEP requested that the developer prepare a Remedial Action Work Plan and Construction Health and Safety Plan (CHASP). The Draft RAP, which was submitted to the BSA and DEP last week for review includes provisions for the removal of all petroleum impacted soil and collection of endpoint samples to confirm that impacted soil has been removed. Copies of the Phase II ESI and Draft RAP can be downloaded at the link below: https://clients.langan.com/Sharing/filesharing/ViewPosted?transactionHash=1636449989 4/21/20- Zhune called Brian could not get him. left a message . 11/2/20-Brian Gochenaur email-As requested Below is a link to download the Phase Is, Phase II and DEP-approved RAP and CHASP for this site. Phase I ------- Langan'

COMMERCIAL (Continued) **S124519255**

July 12,2017 and May 21, 2018 Phase I ESAs for lots 31 and 30 respectively. identified the following RECs: REC-1 Presence of an underground Storage tank(500-gallon UST)on lot 32 REC-2 Current and Historical Use of adjoining and surrounding Properties. Phase II ========== Geophysical Survey A geophysical anomaly indicative of up two UST's was identified on the southwest part of lot 31. Additional two vent pipes were identified the lot 31 building on East 73rs Street Soil Sample results ========== Soil boring SBO1 through SBO7 were advance by Eastern Environmental Solutions VOCs: The following VOCs were detected above the UU SCOs: . 1,2,4 -Trimethylbenzene-63 mg/kg in SB07_9-10 UU:3.6 mg/kg . 1,3,3 Trimethylbenzene-18 mg/kg in SB)7_9-10(UU SCO: 1 mg/kg . Ethylbenzene-6.8mg/kg in SB7_9-10 (UU SCO: 1 mg/kg) . n-prophylbenzene-9.7 mg/kg in SBO7_9-10 (UU SCO:3.6 mg/kg) . Total Xylenes -5.2mg/kg in SB07_9-10 (UU SCO:0.26 mg/kg) Pesticides The following pesticides were detected above the UU SCOs ========== . 4,4'-DDE-0.0038 mg/kg in SBO4_0-2 (UU SCO:0.0033mg/kg . 4,4'-DDT-0.00575 mg/kg in 1-2-2to 0.00103 mg/kg in SBO4_0-2(UU SCO:0.0033mg/kg Metals- The following pesticides were detected above the UU SCOs ---------- .Trivalent Chromium-35 mg/kg in SBO7_9-10 to 77 mg/kg in SBO4_0-2(UU SCO:30 mg/kg) . Copper-62.2mg/kg in SB07_9-10(UU SCO:50 mg/kg . Nickel -32.5 mg/kg in SBO5_5-6 to 55.2 mg/kg in SBO6_8-10 (UU SCO:30 mg/kg) . Zinc -262 mg/kg in SB01_1-2 (UU SCO:109 mg/kg) SVOCs and PCBs ---------- SVOCs and PCB's were not detected a concentrations above UU SCOs. "

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P030
Waste Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U213
Waste Description: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Waste Code: X001
Waste Description: Not Defined

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"157449. 03-03-05 09:49 @ 09:35 T. Haynes 82326 received a call from I&A Supervisor S. Asfour 49908, at 09:15 he discovered about 8 gallon of dielectric fliud mixed in dirt/debris. Inside V5224, located at 200 E 74 St. No smoke/fire involved. Sewer/water affected. No injuries related to spill. Weather does not contribute to the spill. Crew was inspecting structure when spill was discovered. feeder 24m93 acct. f3246. Source of spill; Transformer. Cause of spill; Maybe a bottom leak. It was also indicated that the sump pump was not running ,and unpluged but had to be running at one time, for traces to be found in the check value. We are assuming oil entered the sewer/waterways. Environmental tag #41831 Chain of custody #dd13611 Two samples taken both for pcb 1 from unit and one from floor. No water in structure. Sewer connection,yes. No private property affected. Logger: T. Haynes CIG: Marcinek 87549 10:05 03-03-05. I&A Supervisor S. Asfour verified at 10:01 that oil entered the check value. Reported to CIG at 10:05. T. Haynes. Update: 3/3/05 @ 12:50 hrs. Anthony Drummings, Manh. EH&S, reported at 12:04 hrs. that a NYCDEP representative just left this location. He had arrived approx. 15 minutes earlier at about 11:45 hrs. He wanted an updated copy of the e2MIS report. ERT, Tony Delgado, who was also on location, indicated that the ERT will forward the updated copy of the e2MIS report to the DEP. Mr. Drummings stated that another NYCDEP rep., Kieth Williams had just arrived on location at 12:10 hrs. R. Pellegrino #38620 Update: 3/3/05 @ 13:08 hrs. Joe Campanile, I&A North Planner, reported at 12:57 hrs. that the transformer is below min. They are presently waiting for Engineering to indicate when the feeder can be removed from service in order to isolate this transformer. A partial cleanup will be performed when the feeder is de-energized and the transformer is isolated and grounded. R. Pellegrino #38620. Update: 3/3/05 @ 13:51. Initial on-site NYCDEP representative was Mahendra Ramnarine and associate.....A. Drummings #84163 Update 3-3-05 @ 17:02. Aroclor 1242 < 1.0 ppm EPA

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	CHERELLE MAYFIELD
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/15/2002-VOUGHT-Site visit by Vought on 1/28/2002. Spill caused by overfill (spiller stated petrometer was not working). Spiller was Amerada Hess (Nick Pascal 201-489-5100) who had super sign statement (copy provided) acknowledging the current amount of fuel and the amount to be delivered. Building manager (Lorraine Rende 212-288-7500) hired Eastmond and Sons (718-378-7000) to clean up spill. Spill was overflow out of vent pipe which flowed into an adjacent sidewalk grate and spillage out the manway and down the sides of the tank. The grate covered a cement box with a drain which abutted the spill address. DEP was notified of spill in drain. Eastmond pressure washed the grate pit, pumped out the drain, washed and wiped the tank and pumped 150 gallons of contaminated water (invoice provided). Leardon Boiler Works (212-734-2050) installed a new petrometer and blew out gauge line. Called building manager on 3/15/2002 and she is satisfied with cleanup. Spill closed by Vought."
Remarks:	"caller states that spill due to a problem with a pipe - clean up will occurr soon by the landlord"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

APARTMENT BUILDING (Continued) **S110750719**

Contact Name: MARIO SCIACCA
DEC Memo: "Etna is a cement company, Mario works there and is managing the project. Building owner called Mario to say there was a leak of oil into the building from the front of the building when the oil was delivered. Problem with oil fill line. ProTest doing the cleanup 631-321-4670 Bob Fred Smith Plumb 212-457-0967 Phil Krous DOT notified (inside city construction holiday moritorium area) Thursday open sidewalk Friday Protest will dig out Friday Plumber will replace fill line Saturday they will repour cement 11/30/10-Hiralkumar Patel. 4:34 PM:- spoke with Bob at Protest. protest has been hired by Etna constructing. Bob mentioned that oil found seeping into building at location where fill line enters into building. Etna will open sidewalk on 12/02/10 and Bob will visit site at that time. based on observations during site visit, Protest will do soil excavation on 12/03/10. will collect endpoint samples, if gets to clean soil. asked Bob to call after site visit. alternate address: 1009-1017 Lexington Ave no other spills found. PBS #: 2-113271. as per PBS record, site has one 5,000 gal #2 oil AST on legs. tank installed in Jan. 1965. 150 East 73 Street Corporation **property owner** c/o Brown Harris Stevens **management company** 770 Lexington Ave, 5th Floor New York, NY 10065 Attn.: Elizabeth Graham **property manager** Ph. (212) 508-7309 email: egraham@bhsusa.com 12/01/10-Hiralkumar Patel. 3:53 PM:- spoke with James Quinn (212-288-5670), building super. asked him to seal the fill port to prevent more deliveries until the fill line is fixed. 3:59 PM:- spoke with Ms. Graham and asked her to seal the fill port. 12/02/10-Hiralkumar Patel. 4:31 PM:- left message for Tom at Protest. 4:34 PM:- left message for Mario at Etna. 4:40 PM:- received call from Mario. they opened sidewalk today and found that fill line was running to empty coal chute. Mairo mentioned that fill line goes vertical down in ground and then make 45 degree turn and runs in slope of coal chute. Mario also mentioned that the coal chute is completely empty and no dirt or any garbage found in it. they will change fill line and install new fill line in secondary containment. Peter Etna Contracting Ph. (917) 731-8334 (C) 12/03/10-Hiralkumar Patel. 1:00 PM:- visited site. met crew from Protest and a plumber. found coal chute underneath the sidewalk curbline. as per protest technician, a fill line entered into ground vertically and then turned 45 degree and ran into coal chute. no contamination found in area under the sidewalk. site has one 5,000 gal AST on saddles. inspected coal chute from inside the building. found heavy contamination in lower end of coal chute towards the basement. inspected old fill line. found two holes in fill line. one of the hole was about 2 inches wide. protest is removing contaminated material from inside the coal chute. found heavy stain on foundation wall and floor in tank room. due to age of coal chute, no possibility of cleaning up by going into chute. asked crew to cleanup area from outside the chute and inspect a floor of the coal chute. also asked to powerwash the area inside the tank room. during inspection, found oil on side of the tank, in area where supply/return are connected to the tank. 1:50 PM:- left message for Bob at Protest. 1:53 PM:- spoke with Ms. Graham. asked her to call back once coal chute is cleaned for further inspection. also asked her to fix leaking supply or return line. Ms. Graham mentioned that cleanup will be done on 12/06/10. 12/06/10-Hiralkumar Patel. 10:30 AM:- spoke with Tony (631-827-7783), technician from Protest on-site. they are currently cleaning up coal chute and will call for inspection, once cleanup in chute is done. 12/07/10-Hiralkumar Patel. 2:15 PM:- visited site. met

APARTMENT BUILDING (Continued) **S110750719**

building super. inspected spill area. spill has been cleaned up.
found speedy dry in entire coal chute. solid floor found in rear end
of coal chute where leak started. solid floor found in tank room.
2:30 PM:- spoke with Tony at Protest. they cleaned entire chute and
put speedy dry to soak any left over oil. he confirmed that they
found solid concrete surface at the bottom of entire coal chute.
based on observations during site visits, case closed."

Remarks: "LEAK NOTICED COMING INTO THE BUILDING SOME TIME AFTER TANK WAS FILLED. OIL COMPANY CONTACTED FOR CLERANUP."

DEC Memo:	"Patel made a site visit while Rockaway Oil cleanup team was on site. Required them to dig out oil contaminated soil from around tree at curb. 10/29/07-Hiralkumar Patel. visited site. found oil on street and on sidewalk. oil came out from vent pipe on sidewalk and ran along street curb for about 40-50 ft. Rockway oil was doing cleanup. requires soil excavation around tree in front of building near vent pipe. other than tree area, no soil impact. met Edison Cevallos (212-628-2132, cell: 917-837-4746), building super. no oil found in tank or boiler room. spoke with Larry at Rockway oil. as per Larry, cleanup crew is on-site digging soil around tree. asked Larry to call with detailed information about area dug and observations. received call from Dominick. they dug about 20 inch in soil area. asked him to take soil sample. left message for Mr. Cevallos. 11/19/07-Hiralkumar Patel. spoke with Mr. Cevallos. he mentioned that rockaway fuel has excavated about 20 inches in tree area and has more contamination.

APART (Continued) **S108956107**

oil company will remove tree and remaining contamiantion. spoke with Dominick at Rockaway fuel. they took soil sample on 11/16/07 and waiting for results. will send results once available. they area removing tree as co-op board is asking for such. 11/26/07-Hiralkumar Patel. received message from Anthony J. Lara from PTC. spoke with Anthony. he mentioned that NYC Parks department is not allowing to remove tree for further soil excavation. they did borings on three side of tree to depth of 4 ft and found no PID values. only area left is under tree. asked Anthony analyze soil prior to any further excavation, to know level of contamination. 01/02/08-Hiralkumar Patel. spoke with Anthony S. Lara at PTC. he couldn't found any record. spoke with Dominick at Rockaway fuel. he mentioned that Anthony took samples. asked Dominick to contact Anthony and to provide analytical results for review. 01/31/08-Hiralkumar Patel. spoke with Dominick at Rockaway fuel. he will call PTC again. 02/05/08-Hiralkumar Patel. received sample analyticals and site map from PTC. they took two composite samples. no contamination found in composite samples. left message for Dominick at Rockway fuel and to Bob Lamirata at PTC. received fax from Bob. they took composite samples from 0 to 3 ft depth. spoke with Bob. asked him to find out date of sampling. if samples taken 14 days prior to analysis, then submitted results are not acceptable and need resampling. 02/06/08-Hiralkumar Patel. received message from Bob. spoke with Bob. they took second set of samples on 01/07/08 after long discussion with parks department regarding tree on sidewalk. based on submitted sample results, case closed."

DEC Memo:	"01/10/07-Hiralkumar Patel. visited site. site has 5000 gal #6 oil tank buried in ground. only tank top is visible. PBS #: 2-321249 spoke with Ramos Koljenovic, building super. as per Ramos, he noticed little oil leaking under wall on 01/08/07, then observed more oil yesterday. he notify his management immediately and they contacted their oil company, Hess oil. as per super, person from Hess was at site and did inspection. nobody reported this oil spill to DEC until Mark from PTC called in to check spill # on this case. Mark was contacted by super and Eric from Hess oil regarding cleanup. after finding oil leak through wall, super dug hole close to tank and hole filled with free product. no odors anywhere in building. there is elevator pit behind tank room wall. no oil stains or odors found in elevator pit. they are installing new elevator in this pit, so asked super to check thoroughly inside elevator pit for any oil leak, as pit is open. as per super, last oil delivery was on 01/02/07 for 3000 gal. measured about 4000 gal in tank during site visit. (use of 1000 gal #6 oil in one week). there are 32 units in building. based on oil deilvery tickets, site using about 3000 gal oil each month. Eastmond was working on scene. they were removing oil from tank. Ramos Koljenovic, building super Ph. (212) 734-7111 Neil Levin Century Operating Corp. 7 Penn Plaza, Suite 1400 New York, NY 10001 PH. (212) 560-6400 Fax (212) 560-6420 email: nlevin@centuryny.com sent CSL to Mr. Levin requiring endpoint samples and vapor barrier installation. suggest Mr. Levin to remove existing tank as it might have leak, based on field observations. letter faxed to Mr. Levin and to Rene at Eastmond. 02/21/07-Hiralkumar Patel. visited site on 02/20/07. met Isaac and super at site. tank has been removed from site. tank was sitting on solid concrete floor. but front part of tank room, at tank room entrance, doesn't have concrete and this is where oil discovered originally. Isaac mentioned that they have dug out some soil from unconcreted area to about one foot depth. asked Isaac to take

APARTMENT (Continued) **S108299276**

endpoint sample from this area. found oil stain on all side walls upto 6 inches. asked Isaac to powerwash this stain. asked Isaac to secure unconcreted area while powerwashing walls on other side of tank room which has solid concrete floor. this tank room is about 1 ft deep than boiler room and owner has planned to level tank room to boiler room, before putting new tank at same location. Eastmond will use some of concrete blocks that have stacked in opposite corner of tank room entrance for leveling and will investigate under these blocks area as it is next to unconcreted area. asked Isaac to open floor in boiler room at entrace of tank room as oil was discovered there first and travelled across wall. 05/07/07-Hiralkumar Patel. left message for Isaac. 05/17/07-Hiralkumar Patel. spoke with Mr. Levin. he will ask Isaac to call. 06/04/07-Hiralkumar Patel. spoke with Mr. Levin. asked him to submit report. 06/06/07-Hiralkumar Patel. received call from Isaac from Eastmond, yesterday. he will send report soon. 07/24/07-Hiralkumar Patel. sent email to Ms. Cynthia (callan@centuaryny.com), Mr. Levin's secretary. asked her to submit spill closure report. spoke with Issac. he is preparing report and will submit end of next week (Aug. 3rd, 2007) 08/17/07-Hiralkumar Patel. received closure report from Issac. abstract: - cleanup spill at east end of removed tank - removed 55.5 drums of contaminated material - break trench opposite lower end of boiler room - found second layer of concrete on floor, no contamination found - pressure wash tank room floor and walls - took two soil sample and found no contamination. this report doesn't include scaled map and sampling depth. left message for Isaac to submit scaled map with sampling locations and depth. 08/21/07-Hiralkumar Patel. received message from Isaac. he will send missing information after Aug. 27th, 2007. 08/28/07-Hiralkumar Patel. received fax from Isaac with site map. site map is not scaled and it shows only one sample location. spoke with Isaac about another sample location. asked Isaac to send scaled site map for area near tank including sample locations, depth and area of trench in boiler room. 10/11/07-Hiralkumar Patel. left message for Isaac. 10/31/07-Hiralkumar Patel. spoke with Mr. Levin and asked to submit site map. he spoke with Isaac and Isaac will submit it within a week. 11/06/07-Hiralkumar Patel. received site map (not scaled) from Isaac with sampling locations and depth. based on submitted documents, case closed. NFA sent to Mr. Levin. letter emailed to Mr. Levin and Isaac."

CON EDISON SERVICE BOX: 54258 (Continued) **1016677222**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"10/21/13-Vought-Spoke to DEC Demeo who spoke to DEC Patel who noted that he was responding to this spill. Spill asssigned to Patel (also runner for day). 10/21/13-Hiralkumar Patel. alternate address: 211-221 East 78th Street no other spills found. PBS #: 2-094900. as per PBS record, the site has one 8,000 gal #6 oil AST in contact with soil. the tank was installed in Jan. 1949. 9:30 AM:- visited site. the site has six story apartment building with basement. there are total 54 apartment units in the building. site has one 8,000 gal #6 oil AST in contact with floor, located inside a secondary vault with access. the tank vault is right across the elevator. the tank vault is located in southcentral portion of the site, more towards the east. there is about 4 ft wide passage between the tank room and the boiler room. the boiler room is located in northeast corner of the building. the boiler is located in a pit, which is about 10 ft deeper than boiler room floor. the boiler pit is the lowest point inside the building. met Antonio Braga, building super. he mentioned that around 8 AM on 10/20/13, building members noted petroleum odors inside the building. Mr. Braga checked tank room as well as boiler room, but no sign of spill noted. Mr. Braga checked boiler room again around 8 PM

#6 FUEL OIL SPILL TO BASEMENT (Continued) **S114560865**

on 10/20/13, due to ongoing vapor issue inside the building. at that time, Mr. Braga noted oil seeping into boiler pit, from a passage wall towards the tank room. he contacted their oil company, Hess, immediately. All Boro responded around 1 AM on 10/21/13. All Boro pumped loose oil from tank room, boiler pit floor and boiler pit sump. All Boro also pumped oil from tank. due to tight space in tank vault, could not inspect area around the tank. inspected boiler pit. found oil seeping through passage wall, into the boiler pit. oil seepage found at two locations: first where a pipe (which turns out to be a steam pipe) penetrates the boiler pit wall (almost at the top of the pit) and second close to boiler pit sump. found oil on boiler pit floor and inside the sump. the sump was disconnected. Mr. Braga mentioned that they get water inside the boiler pit only during heavy rain. during inspection, noted concrete patch in passage, at the eastern end of the tank room. Mr. Braga mentioned that there is a steam line runs under the passage and enters into the boiler pit, where oil seepage was noted. Mr. Braga mentioned that they use oil and steam heating system. part of steam line was replaced in Mar./Apr. 2013, but no sign of contamination noted at that time. during site visit, no oil product or odors noted inside the elevator pit and no petroleum odors noted in main lobby. there is an open backyard, with access from both east and west side of the building. remote fill port is located at the curb. asked Mr. Braga to secure the fill port to prevent any misdelivery. 221 East 78th Tenants Corp. **property owner** c/o Gerard J. Picaso, Inc. **property management** 1133 Broadway, 4th Floor New York, NY 10010 Attn.: Gerard Picaso **property manager** Ph. (212) 807-6969 (O) (917) 846-6810 (C) email: gpicaso@gjpicaso.com Antonio Braga **building super** Ph. (212) 717-1953 email: braga221@yahoo.com 10/23/13-Hiralkumar Patel. 1:19 PM:- received call from Chris. he mentinoed that after tank cleaning, they found about 2 inch by 4 inch hole in tank bottom. Chris is going to site for further inspection and will submit work plan for remediation. 11/08/13-Hiralkumar Patel. 12:27 PM:- received call from Chris. they removed about 80% of tank. during removal, hole was found in tank bottom. he also observed oil seeping into excavation from soil underneath. asked Chris to call once tank and tank room floor are removed. 11/14/13-Hiralkumar Patel. 2:19 PM:- received call from Chris. scheduled a site inspection at 3 PM tomorrow. 11/15/13-Hiralkumar Patel. 2:50 PM:- visited site. met Chris and Mr. Braga. the oil tank is removed and basement passage towards the side of the building, covering tank and boiler rooms, is sealed with plastic. found petroleum odors inside the tank room area. found oil puddles in soil, in the tank room. also noted steam line, where oil seepage noted initially in boiler room, running inside the tank room. no more oil seepage noted in boiler room. due to location of tank room under the main lobby, petroleum odors were noted in main lobby only. no odors noted in elevator. Mr. Braga confirmed no odor complaints from any tenant. Chris mentioned that due to oil puddle beneath the tank, there was a flash fire during tank cutting on 11/08/13. FDNY responded. two 275 gal #2 oil temporary tanks installed outside, along side of the building. based on information provided and observations during site visit, informed Mr. Braga that the department requires the following: - immediate installation of a venting system in tank room, with exhaust outside the building (above roof level, if needed) - delineation of soil contamination, prior to further excavation, due to safety issues 11/18/13-Hiralkumar Patel. received email from Chris (at 1:57 PM on 11/16/13). an air scrubber,

#6 FUEL OIL SPILL TO BASEMENT (Continued) **S114560865**

with carbon filter, installed in the tank room ventilating to the courtyard area. Chris mentioned that ventilation exhaust will be extended to roof top, if any complaints received. 11:59 AM:- sent letter to Mr. Picaso requiring submission of PBS application, soil delineation and endpoint samples. asked him to submit report by the end of 01/31/14. letter emailed to Mr. Picaso, Chris and Mr. Braga. 12/09/13-Hiralkumar Patel. 12:50 PM:- spoke with Chris. they removed about 100 drums of contaminated soil. 12/17/13-Hiralkumar Patel. scheduled a site inspection tomorrow at 10:30 AM. 12/18/13-Hiralkumar Patel. 10:30 AM:- visited site. met Chris and Mr. Braga. inspected tank room excavation. crew removed another 2-3 ft of soil from most of the tank room, and probably 6 ft of soil from northeast corner (where steam line goes to boiler room) of the tank room. found clean soil in excavation bottom in entire tank room. concrete walls, with deeper foundation, in north, south and east of the tank room. oil stain noted on wall in northeast corner where steam line located. super's office on west side of tank room. there is a partition wall (probably cinder blocks) between the tank room and the super's office. found about 6 inch wide layer of contamination, with some free phase product, underneath the partition wall on west side of tank room. found no impact in soil, beyond six inch layer. inspected super's office. no signs of oil seepage noted on floor. no petroleum odors in super's office. inspected boiler room. no more oil seepage noted through boiler room wall where steam line enters into boiler room. no oil noted in boiler room sump. based on obsevations during the site visit, asked Chris to conduct further delineation towards the west of the tank room: via either horizontal borings from tank room or vertical borings through super's office floor. informed Chris that there is no need for endpoint samples from remaining tank room. 02/10/14-Hiralkumar Patel. 2:28 PM:- sent email to Chris inquiring updates. 02/18/14-Hiralkumar Patel. 3:55 PM:- received call from Chris. he is waiting for response from insurance company regarding soil delineation underneath the super's office. Chris will call back by end of this week with update. 4:12 PM:- received call from Stephannie Ciantro and Bob Mackoul from Mackoul Associates, commercial insurance provider for the site. they inquired about spill status. informed them the department requires delineation of soil contamination observed underneath super's room in basement. they requested more time to submit final cleanup report. based on available information, approved their request and asked to submit report by the end of 03/14/14. Stephannie Ciantro / Bob Mackoul Mackoul Associates **commerical insurance provider for the building** Ph. (516) 279-1244 email: sciantro@mackoul.com remackoul@mackoul.com claim #: JY13J0542091 4:30 PM:- sent email to Mr. Mackoul and Ms. Ciantro at Mackoul Assoc. asked them to submit cleanup report by the end of 03/14/14. email copied to Chris and Mr. Picaso. 03/10/14-Hiralkumar Patel. 10:31 AM:- received message from Mr. Picaso. 03/11/14-Hiralkumar Patel. 12:53 PM:- left message for Mr. Picaso. 3:10 PM:- received message from Mr. Picaso. 03/12/14-Hiralkumar Patel. 10:48 AM:- spoke with Mr. Picaso. he requested another week extension for report submission. approved his request and asked to submit report by 03/21/14. 1:18 PM:- received call from Chris. he is at site for investigation under the super's office floor. he mentioned that building managment has backfilled with tank excavation area. as tank excavation is already backfilled and based on observations during previous site visit, no need for endpoint samples from tank excavation area. 2:48 PM:- received email

#6 FUEL OIL SPILL TO BASEMENT (Continued) **S114560865**

from Chris including site pics. 2:49 PM:- received call from Chris. he mentioned that he installed two borings: first boring in tank room corner where steam line goes to boiler room and another boring in super's office. the boring in tank room corner was installed to 8 ft depth and found 0.2 ppm on PID. Chris mentioned that super's office floor was 5 inch thick. they drilled through office floor and found big rock about 6 inches below the concrete layer. 0.2 ppm recorded on PID in boring in super's office. as petroleum contaminated soils were observed at around 1.5 ft below tank room floor, asked Chris to try another boring to deeper soil. 3:33 PM:- received email from Chris. he installed second boring in super's office, to a depth of 18 inches and found 59.9 ppm on PID. 3:36 PM:- spoke with Chris and asked to submit sample, from second boring in super's office, for analysis. 03/14/14-Hiralkumar Patel. 2:17 PM:- received email from Chris including report for work done to date. 03/18/14-Hiralkumar Patel. 3:34 PM:- received email from Francine from All-Boro including result of soil sample. based on available information, case closed. 4:14 PM:- sent spill closure letter to Mr. Picaso. letter emailed to Mr. Picaso and Chris."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Address:	3RD EAST 76TH ST
Spiller Company:	001
Contact Name:	SARAH TANG
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE WANTS CALL BACK. 07/15/2005: Call to Sarina Tang (previous building owner) at 212-242-9001, left message, no response. M. Brand NYSDEC DER Albany. 11/01/2005: Sent letter to owners requesting information. Current Owners (since 2002): New York City Industrial Development Agency 110 William Street NY, NY 10038 The Hewitt School 45 East 75th Street NY, NY 10021-2736 M. Brand NYSDEC DER Albany. 11/04/2005: Conversation with Louis Uliano, Director of Community Relations and School Safety (212-994-2616), The Hewitt School, regarding open spill. He was unaware of spill until receipt of letter. School no longer uses oil, was converted to natural gas/steam heat, no apparent problems in furnace area. Entire bulding was renovated in 2002, no apparent environmental problems noted during that work or inspections. M.Brand NYSDEC DER Albany. 11/04/2005: Conversation with Sarina Tang, former owner of building (212-242-9001). Small amount of fuel oil spilled on concrete floor during replacement of oil burner (during conversion to natural gas) in 1998. Concrete floor was stained. Tang hired someone recommended by oil company to take up the concrete floor and remove any contaminated material/stained flooring. Approximately 6 inches of concrete was removed in area (more than necessary, Tang indicated they wanted to level floor anyway and took more out). Area was inspected several times during property transfer in 2002, no apparent environmental problems were noted. Spill closed 11/04/2005 due to small quantity of material spilled (<25 gallons), removal of stained concrete and fuel oil, and lack of environmental problems noted during property transfer inspections and continued/current use of the area. M.Brand NYSDEC DER Albany."
Remarks:	"WHILE REMOVING A BOILER FUEL OIL WAS SPILLED ONTO CONCRETE FLOOR UNK

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Name:	JAMES DANIELS
Spiller Company:	COMMERCIAL BUILDING
Spiller Address:	1045 MADISON AVE
Spiller Company:	999
Contact Name:	JAMES DANIELS
DEC Memo:	"12/28/07-Hiralkumar Patel. spoke with Dan at Atlas fuel. they got odor complaint from owner. found oil leaking into building from fill line and oil found on foundation wall. site has 550 gal tank enclosed in vault. fill line runs underground under sidewalk from fill box before enters into building. could be more contamination under sidewalk. spoke with Mr. Daniels. asked him to investigate under sidewalk to repair/replace leaking fill line and to remove associated contamination. James Daniels 392 Long Hill Drive Short Hills, NJ 07078 Ph. (973) 376-0615 Fax (973) 921-2070 email: jimdaniels@comcast.net sent letter to Mr. Daniels requiring soil delineation and endpoint samples. copy of letter emailed to Mr. Daniels. 01/15/08-Hiralkumar Patel. received call from Atlas fuel. they tested fill line and found fill line tight, but found leak in vent which runs through wall. they will expose hidden part of vent and see any overfill accumulation. 1/17/08 - Raphael Ketani. I tried to reach Dan Sylvesterol of Atlas Fuels (718) 893-4400, but could only leave a message. Mr. Sylvesterol had called me yesterday stating that the problem was with the vent pipe, not the fill line. He said they were going to break up the ceiling to see how bad things were.

COMMERCIAL BUILDING (Continued) **S108981531**

1/23/08 - Raphael Ketani. Mr. Sylvesterol called to say that they have exposed the vent pipe in the ceiling and have discovered staining in the ceiling, as well as the wall where the oil ran down. He said that Action Environmental had been called and they will handle the cleanup. I asked him how much had spilled. He said that only some wetness was seen where the oil had run down the wall. He said he will keep me informed. 2/6/08 - Raphael Ketani. I received a call from Steve Bouton of Action Environmental. The oil company had done an initial cleanup, but there were still residual odors in the store above the spill. He said that Tri State Environmental (888) 938-2658 was contacted on 1/21/08 and had cleaned up the spill. He said that the oil came from the vent pipe. The vent pipe had a hole in it at a point before it left the building. So the oil drained out of the pipe, into the ceiling and down the wall. He said that there were bad vapors in the store just above the spill. He said that the store owners had built a vent through the floor to get the warm air from the boiler room. However, they also picked up the free oil vapors. Tri State put in fans to blow out the vapors. They also cleaned up the free oil in a little depression in the floor. When they did a boring at the location of the depression, they discovered oil contaminated soil. So they dug this up, too, and drummed it. I asked Mr. Bouton for pictures, a manifest and a closure report. He said he will send it. 3/28/08 - Raphael Ketani. Today I received the Site Investigation Report dated 3/28/08 by e-mail from Mr. Bouton. 3/31/08 - Raphael Ketani. I reviewed the Site Investigation Report. It contained a number of waste disposal manifests and a description of the contaminated soil removal below the low spot in the floor. It also mentioned the abatement of odors in the basement and the clothing store. Based upon the information in the SIR, I am closing the spill case."

Remarks: "was stained on basement floor; clean up is in progress; believes its was from the fill pipe"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Spoke with Mike at Conklin Services.No tank on site.The building is under renovation.They discovered strong petroleum odor in the building.Air sample was taken.Copy will be available to Mike.They believe the source is the next door property @ 9 east 74th street. No PBS records found for both the properties.Need site visit. (sr) 11:45 AM:- spoke with Mike at Conklin Services. asked him to submit results of air sample for review. Mike mentioned that there is only one area in the basement where they noticed some odors and collected PID and air sample. right underneath this area there is approx. 6 ft by 8 ft vault which host utility pipes. as per Mike, there was no tank at 11 E 74th street, but there is approx. 1,000 gal heating oil tank (in dyke) in the basement of 9 E 74th street and this tank area is right across the wall from odor area at 11 E 74th street. Michael Staiti Conklin Services & Construction, Inc. Ph. (845) 561-1512 Ext. 217 (845) 857-7313 (C) Fax (845) 561-1257 email: mstaiti@conklinservices.com owner of 11 E 74th Street: Valentine 11, LLC. 220 Banyan Road Palm Beach, FL 33480 owner of 9 E 74th Street: Emmanuel Family Limited Partnership Betty Emmanuel Nicholas Emmanuel Marjorie (Jill) Emmanuel 9 E 74th street New York, NY 12:16 PM:-

SHELL BUILDERS (Continued) **S110540614**

received message from John Scandurra from Conklin Services. 12:37 PM:- spoke with John. he mentioned that two air samples were collected. one sample was collected from basment air and second canister was placed in existing hole (for former pipe) in foundation wall (between two properties) and hole was sealed for 24 hours. 12:38 PM:- received email from Mike including air sample results. air sample results (values in ug/m3):
----------Room--------Wall
Ethanol----------950---------760
Acetone----------300---------260
Toluene----------310---------230
Ethylbenzene----------31----------29
Xylene----------105---------163
1,2,4-Trimethylbenzene------9---------180
1,3,5-Trimethylbenzene------2----------52 12:54 PM:- left message for Alvin (917-576-6259). 09/28/10-Hiralkumar Patel. 9:30 AM:- visited site. inspected basement at building 11. found oil stain on foundation wall between building 11 and building 9. petroleum odors detected in close proximity of the stain. no odors in other part of basement. right next to this stain area, there is an underground vault hosting sewer lines. no stains or odors found from vault. no access to basement of building 9. during inspection, found fill port under metal plate for building 9. could not find vent pipe. one of the worker at building 11 confirmed that the building 9 has oil tank. also observed concrete patch in front of building 11 and an abandoned pipe on foundation wall along E 74th street in building 11 which could be part of old tank system. 09/29/10-Hiralkumar Patel. 11:40 AM:- left message for Ron Parlato, representative of owner for building 11. Ron Parlato **representative of owner for building 11.** PO Box 566 Scarsdale, NY 10583 Ph. (914) 490-1656 email: roncoi@aol.com 09/30/10-Hiralkumar Patel. 4:21 PM:- received call from Ron. Ron mentioned that the current owner of building 11 baught this property in Apr. 2009 with gas heating system. Ron asked to contact Nicholas Emmanuel, who owns buildng 9. Nicholas Emmanuel **one of the owner for building 9.** 9 East 74th Street New York, NY 10021 Ph. (212) 737-1884 (H) (212) 284-2042 (O) 4:34 PM:- left message for Nick Emmanuel (on both numbers). 10/01/10-Hiralkumar Patel. 11:22 AM:- received call from Nick Emmanuel. he will call back on 10/04/10 to schedule a site visit. 10/04/10-Hiralkumar Patel. 11:33 AM:- received call from Nick. scheduled a site visit at 4:00 PM on 10/06/10. 10/06/10-Hiralkumar Patel. 3:45 AM:- visited site. met Nick. inspected tank at building 9. building 9 has one 1,080 gal #2 oil AST wrapped in concrete with weep holes. due to petroleum stain on foundation wall next door, Nick removed concrete on tank top to inspect his tank. inspected area between foundation wall and tank, but no sign of any leak found from the tank. some stains found in area between tank end and foundation wall along 74th street. Nick mentioned that they were using coal in past and that was the area for coal pile. as per Nick, tank is sitting on saddles. all lines runs aboveground, except part of fill and tell-tale line under the sidewalk. no sign of any leak from fill line. asked Nick to send documentation confirming that tank is on saddles and not touching the floor. Nick will contact Ray Lara at PTC. 10/08/10-Hiralkumar Patel. 10:10 AM:- spoke with Ron. informed him that no sign of leak found from active tank at building 9. so asked to powerwash the stain and close the wall. Ron mentioned that they did powerwashed and stain came back in 48 hours. he also mentioned that the basement floor at

SHELL BUILDERS (Continued) **S110540614**

building 11 is lower than in building 9 and Ron suspects an old underground tank underneath the existing tank at building 9. Ron also mentioned that he proposed to do horizontal boring from his side, but Nick refused that. asked Ron to powerwash the stain again and if stain cames back, then need to investigate further. asked him to hire environmental contractor for powerwash (as last powerwash was done by paint guy). 10:14 AM:- spoke with Nick. Nick mentioned that he has no old underground tank. he also mentioned that the oil tank in his building is empty since Jun, 2010, since next door people saw stain on wall and he is using 55 gal drum since then. Approved oil is delivering oil at his building. Nick mentioned that tank was emptied and cleaned. asked Nick to provide documents about tank cleaning. 10:31 AM:- spoke with operator at Approved oil (718-238-1050) regarding delivery record since Jan. 2010. delivery record for building 9 (since Jan. 2010): date-------gal 01/07/10 - 300 01/19/10 - 325.2 02/01/10 - 325 02/11/10 - 325.3 02/23/10 - 350.3 03/11/10 - 325 04/27/10 - 150.2 06/02/10 - 50 06/16/10 - 50 07/07/10 - 20 07/13/10 - 15 07/14/10 - 40 08/04/10 - 40 09/07/10 - 30 09/21/10 - 35 10/04/10 - 30 10:37 AM:- spoke with Ray Lara at PTC. he mentioned that someone else did the tank cleaning at building 9. 10/25/10-Hiralkumar Patel. received letter from Nick (at 9:22 AM on 10/22/10) including pics. pics shows tank bottom is touching the basement floor. received email from Ron (at 8:01 AM on 10/23/10) including copy of email from Tony Piscionere from Everett. Tony mentioned that Everett pressure washed the affected area with a biodegradable cleaning agent. after drying, the previously stained area was sealed and a parge coat of mortar applied. Tony Piscionere Everett PH. (914) 777-1863 (O) (914) 391-0387 (C) email: apiscionere@everettinc.net discussed with DEC Austin. as stain reappeared on foundation wall in building 11 and tank at building 9 is sitting on floor, Austin required for tank tightness test and soil sampling near tank at building 9. 9:58 AM:- left message for Tony Piscionere at Everett. 10:08 AM:- spoke with Nick. informed him that based on available information, the department requires tank test and soil investigation in building 9. 12:41 PM:- spoke with Tony at Everett. he mentioned that stain was found on wall in the same area and they washed it properly. as per Tony, no stains were found on basement floor in building 11 near the foundation wall stain. 10/26/10-Hiralkumar Patel. 9:08 AM:- sent letter to Nick requiring tank test of 1,080 gal tank at building 9 and soil delineation in area between the tank and foundation wall where stain observed in building 11. informed Nick that tank test is due on 11/12/10 and soil investigation report is due on 11/30/10. letter emailed to Ron and Ray Lara (PTC). 11/10/10-Hiralkumar Patel. received email from Ron (at 5:06 PM on 11/03/10). Ron mentioned that his plumber noticed a fairly large oil stain on the sidewalk close to the adjoining wall of both buildings. 9:01 AM:- sent email to Ron and asked him to send color pic of the stain outside of building. 11/12/10-Hiralkumar Patel. received email from Ron (at 5:01 PM on 11/11/10) including pics of sidewalk area, close to building foundation wall, where a stain found. this stain is in line from fill box at the curb line. but no pipe in stain area. also, during inspection on 10/06/10, no stains found on foundation wall, inside building, where fill line enters into building. 1:28 PM:- received call from Ray Lara from PTC. they tested tank system and it passed. Ray will send tank test result on 11/15/10. Ray also collected soil sample and sent to lab. waiting for lab result. 2:00 PM:- spoke with Ron. informed him that the tank

SHELL BUILDERS (Continued) **S110540614**

at building 9 has passed the tank test. also, there was no sign of leak found inside building on foundation wall where fill line enters into building 9, so stain on sidewalk could not be petroleum. also informed him that a tale-tell line runs along fill line which is connected to vent line on tank. 12/14/10-Hiralkumar Patel. 1:06 PM:- left message for Nick. 1:07 PM:- spoke with Ray about report. he will send report today. 12/15/10-Hiralkumar Patel. 1:29 PM:- left message for Ray. 1:33 PM:- spoke with Nick and asked him to submit investigation report. Nick will talk to Ray. 01/04/11-Hiralkumar Patel. 3:52 PM:- left message for Ray. 3:54 PM:- left message for Nick to submit report by the end of 01/07/11. 01/05/11-Hiralkumar Patel. 9:19 AM:- spoke with Ray. asked him to submit report. 9:38 AM:- received fax from Ray including lab result of one soil sample and a hand drawn site map. documents doesn't include any information about floor thickness and soil description. 10:41 AM:- spoke with Ray. they drilled in area between the tank at building 9 and wall between buildings 9 and 11. he found about 1 inch thick concrete floor and no stained soil or odors in soil. Ray collected soil sample at 3 ft depth below basement floor. asked Ray to send this description on paper. also asked him to submit tank test result. 01/10/10-Hiralkumar Patel. received report from Ray including result of tank only test and soil sample. as tank found tight and no contamination in soil sample, case closed. 04/29/11-Hiralkumar Patel. DEC Steve received message from John Scandora from Conklin Services & Construction, Inc. 3:42 PM:- spoke with John. he mentioned that petroleum odors got strong in basement of 11 E 74th Street. they drilled small hole in wall (not corssing the wall) and found 100 ppm on PID. he mentioned that oil stain by the foundation wall of building 9 (in line of fill port) also got bigger. asked John to submit pics of sidewalk stain. 4:16 PM:- received email from Mike including pics showing stain on sidewalk along the foundation wall of building 9 and PID reading 125 ppm in the stain area in basement of building 11. reviewed this pics with pics sent by Mike in Nov. 2010 and stain size looks the same. 4:20 PM:- spoke with Mike. informed him that based on location of oil stain and tank location, only tank (not entire system) test was required and as per tank test result dated 11/01/10, tank was tight. Mike mentioned that they collected PID reading around 4 inches in the wall and not from the other side of the wall. also they did not collected any PID reading by the stain area on sidewalk, but PID was included in pic just for comparison. he also mentioed that stain on foundation wall in basement is the same size as last year and no wet prodct on wall (which indicate no current release). as tank was found tight, no contamination found in soil sample and no change in stain size, case will stay close. asked Mike to clean and seal the wall to prevent any odors. 5/16/2011 - Austin - I received call from John Scandura of Conklin Services who indicated that he felt that this site needed further remediation to abate the problem. I told him I would speak with Kumar about the site, and get back to him. - end 05/17/11-Hiralkumar Patel. discussed with DEC Austin. Austin and I spoke with John. based on available information, Austin informed John that no further investigation is required and case will not be re-opened. Austin suggested John to powerwash and epoxy seal the wall. "

Remarks: "odor has been evident for months, air samples show levels present. Unknown source- may be due to an adjacent 9 east 74th st but they have not been allowed to investigate site. No spill has been seen but there is a strong indication that loss of product has occurred. They

Spiller Company: 999
Contact Name: NICK EMMANUEL
DEC Memo: "DEC Mahat spoke with Joanna Fiore, resident at building 11 E 74th Street. she mentioned about petroleum odors in her building since Aug. 2013. DEC Mahat spoke with Ron Parlato who represents property owner for building 11 E 74th Street. Mr. Parlato mentioned about petroleum spill in building 9 E 74th Street and referenced old spill case # 1006830. 03/14/14-Hiralkumar Patel. alternate address: none no PBS record. site has one 1,080 gal #2 oil AST. other spill # 1006830 was reported on 09/24/10 due to petroleum odors in building 11 E 74th Street. during investigation, the 1,080 gal tank at building 9 was tested tight and no contamination was found in soil sample, at 3 ft bg in area between the tank and common wall between building 9 and 11. during site inspection, observed concrete patch in front of building 11 and an abandoned pipe on foundation wall along E 74th street in building 11 which could be part of old tank system. upon investigation, case was closed. 11:25 AM:- received call from Ms. Fiore. she moved in building 11 in Aug. 2013. she claimed petroleum odors in building 11 since she moved in. she spoke with Mr. Parlato who mentioned about oil spill in building 9. informed Ms. Fiore about investigation conducted during previous odor complaint in 2010. 11:32 AM:- spoke with Mr. Emmanuel. informed him about odor complaint from building 11. he is aware of this situation and has contracted PTC to perform some tank work. PTC has scheduled work on 03/17/14. Mr. Emmanuel confirmed that since last investigation in 2011, he has not noticed any spill from tank system in building 9. 11:40 AM:- spoke with Mark at PTC. to eliminate any possible petroleum vapor release from pipe joints on tank, they have planned to disconnect all piping, redope it and reconnect to the tank. informed Mark that the department may requires tank system test after pipe redoping. 11:47 AM:- spoke with Ms. Fiore and informed her about planned activities on 03/17/14. 12:50 PM:- left message for Mr. Parlato. Joanna Fiore **tenant in building 11** PH. (646) 756-5448 email: jfioreny123@gmail.com Valentine 11, LLC. **owner of building 11 E 74th Street** c/o Ronald Parlato PO Box 566 Scarsdale, NY 10583 Ph. (914) 490-1656 email: roncoi@aol.com Emmanuel Familty LLC. **owner of 9 E 74th Street** c/o Nicholas Emmanuel 9 East 74th Street New York, NY 10021 Ph. (212) 737-1884 (H) (212) 284-2042 (O) (917) 421-1985 (C) email: nemmanuel@jefferies.com 3:15 PM:- visited building 11. no odors noted in building. met Ms. Fiore. she occupies the entire building 11. she mentioned that they noted strong petroleum odors in laundry room, which is in southwest corner of the builing. this laundry room is located close to area where a 1,080 gal tank is located in building 9. during previous investigation in 2010, a stain was observed on wall which is now part of laundry room. during the site visit today, no petroleum odors noted. Ms. Fiore also agreed that no odors were present at the time of site inspection, but claimed that it is because of an open window in northern end of the basement. when I got down in basement, the laundry room door was closed and no ventilation fan was found in the laundry room with exhaust towards the northern side of the basement. Ms. Fiore has office in northern end of the basement and she has never experienced odors in her office. she also mentioned that odors are strong during oil deliveries. found 1.1 ppm on PID meter in laundry room. based on observations during site visit, suggested Ms. Fiore to perform following work in building 11: - check sewer trap to make sure it is working properly. sewer line runs in pit, located under the laundry

PETROLEUM VAPORS IN BASEMENT (Continued) **S116553504**

room. - conduct a PID survey in entire building. the building is an office building and is closed on weekends. PID survey could be done on monday morning as soon as the office opens. 03/17/14-Hiralkumar Patel. 9:12 AM:- received call from Ray. due to St. Patrick's Day parade on 5th Ave, he could not get to the site. 9:45 AM:- visited site. met Mr. Emmanuel. inspected building 9. no petroleum odors noted inside building, including basement. inspected tank room. no odors in tank room either. inspected area between building's common foundation wall with building 11 and on-site tank. no signs of active leaks found from the tank. found stains on tank top, at both ends, where pipes are connected to the tank, but stains appeared to be on tank top only. building 9 is a five story building with basement. Mr. Emmanuel lives on first floor, his sister lives on 5th floor and there are other six apartment units in the building. Mr. Emmanuel mentioned that noone in his building has ever complained about any petroleum odors in building 9. discussed with DEC Austin. after reviewing available information, he asked to check both buildings during next oil delivery. 1:00 PM:- spoke with Mr. Emmanuel. informed him about a site inspection needed during next oil delivery, after pipe redoping done. 1:05 PM:- spoke with Ray. informed him about observations during the site visit. Ray is planning to perform redope work tomorrow. 2:18 PM:- received call from Ms. Fiore. informed her about observations during site visit this morning. 2:33 PM:- received call from Mr. Emmanuel. he mentioned that PTC will do piper redoping tomorrow morning. he will try to have oil delivery on 03/19/14. 03/18/14-Hiralkumar Patel. 2:43 PM:- spoke with Mr. Emmanuel. he mentioned that oil delivery will occur tomorrow between 7:30 AM and 9:30 AM. 2:46 PM:- left message for Ms. Fiore. 3:19 PM:- received call from Ms. Fiore. informed her about shceduled oil delivery for tomorrow morning. informed her that the department would like to inspect building 11 during oil delivery at building 9. 03/19/14-Hiralkumar Patel. 8:07 AM:- received email from Mike Hughes of NYS DOH, including copy of email that he received from Todd Crawford of NYS DOH, at 4:46 PM on 03/18/14. DOH Crawford received call from Ms. Fiore complaining about oil odors coming from the building 9. 8:45 AM:- visited site. met with Ms. Fiore's employee who provided access in building 11. no petroleum odors noted in building 11. the laundry room door was closed. noted detergent smell in the laundry room. the employee mentioned that last laundry was yesterday afternoon and they use laundry everyday. measured 1.8 ppm on PID in laundry room, with laundry room door closed. opened metal door of underground pit in laundry room. this pit has sewer line in it. noted musty odors in the pit, with 4.5 ppm on PID meter. 9:04 AM:- spoke with Mike at DOH and informed him about investigation in 2010/2011 and now. he will discuss with Ms. Fiore and NYC DOH. 9:15 AM:- visited building 9, during oil delivery by Approved Oil. no petroleum odors noted in building 9. found deodorizing powder on tank. Mr. Emmanuel mentioned that the powder was used during pipe redoping work. recorded 4.5 ppm on PID meter in tank room, during delivery. the tale-tell line was cut and capped. inspected basement laundry room in building 11, during oil delivery. noted 1.3 ppm on PID at this time. at this time, Ms. Fiore was present. informed her about observations in building 9. also informed her about musty smell noted in underground pit, in laundry room. Ms. Fiore claimed strong petroleum odors at other times, but not during site visit. suggested her to check sewer line in building 11 and also conduct an independent air sampling according to NYS DOH guidance. she disagreed

PETROLEUM VAPORS IN BASEMENT (Continued) **S116553504**

with these recommendations and insisted that the department should ask for system test for tank in building 9. informed her that based on observations in building 9, now and also during previous investigation, tank system test is not needed. also informed her about discussion with NYS DOH. 9:32 AM:- spoke with Mike at DOH and informed him about observations during oil delivery. he has spoken with NYC DOH and city health inspector will visit the sites. discussed with DEC Austin. as no evidence found of any active leak from the tank or petroleum odors in any building, the department does not require tank system test. Austin asked to follow-up with NYS DOH. 12:15 PM:- sent email to DOH Mike including copy of spill reports 1006830 and 1311649. email copied to DEC Austin. 3/26/14-Vought-Site visit performed by Vought and DEC Patel as per RSE to meet NYCDOH for indoor air survey of 11 East 74th Street. After site visit, Vought changed spill information (orignally only reported as 9 East 74th Street) and added 11 East 74th Street as a potentially impacted party. Vought and DEC Patel met NYCDOH Compton Tucker on site at approximately 8:30am as well as: Joanna Fiore Assistant to Iris Cantor jfioreny123@gmail.com 11 East 74th Street New York, NY 10021 Ph: 646-756-5448 Fax:646-756-5443 Ron Parlato (Our contractor) roncoi@aol.com 914-490-1656 (cell) Vought, Patel, DOH Tucker, Fiore and Parlato sat down for meeting prior to survey so that all could hear background information, discuss interpretation and potential actions a result of the air survey. The meeting and inspection of the impacted property was held prior to inspection of the reported source so that olfactory senses had no potential impact and saturation. Parlato who is contractor for owner working on numerous projects for the building provided history of vapor complaints. Parlato noted that during date of initial spill (closed spill 1006830) in April 2009 he arrived to basement of building and the smell caused his eyes to burn in laundry room. Parlato noted that building was newly refinished and completed at that time. Parlato also noted that he was the former owner of a heating oil company and had much experience with tanks and spills. Parlato also noted that the impacted site was a private residential home that contained both offices and living quarters for a philanthropist was also an elderly person as well (possible increased sensitivity) who was not at home and was currently in Florida. Vought received email information above after site visit and home owned by Iris Cantor. Parlato that when he removed hatch to sewer cleanout space under laundry room floor that it smelled like oil and that when asked about frequency of impact he noted that odors would come and go . Parlato also noted that he hired a contractor to collect SUMMA samples which were collected under the prior spill number and Patel noted that the results were not sent to NYSDOH Hughes for review to date. Parlato noted that one of the samples was collected from the laundry room and the report did note a petroleum impact. Parlato noted that he spoke to property owner of 9 East 74th Street (Nick Emmanuel) and Nick told him that he always had a problem with leakage . It was also noted during meeting that pipes were disconnected and redoped as per spill notes from 3/17/14 above, however tank was not retested after reconnection. Parlato also noted that he noted big smell during a delivery to 9 East 74th Street in October however Joanne noted (in accordance with notes by DEC Patel) that during a delivery with PID survey by DEC Patel on 3/19 that she did not observe any odors. Parlato also noted that the windows to the ground floor were sealed so there was no possible way vapors could be coming from the rear vent pipe through the windows into the building

PETROLEUM VAPORS IN BASEMENT (Continued) **S116553504**

(and he noted vapors, when present, were always in laundry room which has no windows). Joanne noted petroleum vapors were noted by other building employees and that she was at some points nauseous, dizzy and noted weightloss and was considering a blood test for determination of potential impact. Vought noted that she could call and discuss same with NYSDOH Hughes and that all the information from visit would also be sent to NYSDOH by DEC as well. All parties began PID survey which began in back of building on ground floor (finished offices) and ended in front of room at laundry room. DOH PID readings were all under 5ppm during survey of 11 East 74th Street. Floor of laundry room contains steel trap door that is access to a small subgrade room for sewer cleanout that can be entered with ladder and is approximate 6' wide x 10' long x 8' deep. Sides of room are cobble or cinderblock with paint and floor was dirt with no solid bottom. When trap door was opened, PID readings were up to 3.8ppm and Vought noted ammonia type smell possibly associated with long standing moisture in space. Parlato also noted olfactory detections of vapors prior to the door being opened by DEC Patel and Vought only noted olfactory evidence of detergent. Vought recommended epoxy sealing of sump walls and floor (which may included concrete placement) and Parlato noted that he would perform this work. Vought, DOH Tucker and Patel performed site visit to 9 East 74th Street and met owner (Nicholas Emmanuel) and as soon as first floor lobby of building was entered, olfactory petroleum odors were noted by ALL three parties and DOH readings were approximately 7ppm. Nick took parties to basement and tank and 1080-gallon tank had concrete cinder block wall on two sides, one side was common wall to 11 East 74th and fourth side was to sidewalk. DOH Tucker noted PID readings up to approximately 26ppm in tank room and vapors were strong via olfactory senses and were also strongest in tank room. Weep holes present in tank room floor showed no sign of spill however epoxy on floor appeared fresh. Holes still present in floor from previous soil borings (as per Nick) but soil borings showed no impact as also as per Nick and Patel. Unable to see underneath all sides of tank as tank very close to cinderblock wall and some spaces filled with concrete debris however it is possible that a historical spill (of unknown size and timing) seeped down tank sides and is present under tank which necessitates removal or access into secondary containment wall so that system and floor can be inspected in entirety and cleaning performed. All parties opened door to the outside which immediately reduced PID readings in hallway outside tank room as an INTERIM remedial measure. Manuel noted his limited financial ability to do work and also noted that he should not have to do any work in his building has he had not received any complaints from his residents. Vought noted that work would most likely be required due to petroleum vapors noted by DEC and DOH pending approval by RSE. DOH Tucker called his supervisors and they noted that since the complaint was not called in from 9 East 74th Street, that they could not issue any Orders to mitigate vapors (despite elevated PIDs and olfactory evidence of petroleum). Vought noted to Nick that DEC would most likely issue requirements pending supervisory approval. Vought requested from Tucker a report of his findings for the survey at 11 East 74th and was also told that no report would be issued as per his supervisors. Vought stressed the necessity of that report to document no impact which would also assist in the comfort of Parlato and Fiore. Parlato on hearing that DOH could not provide Order, told them that he would be contacting politicians and press. Vought then noted

PETROLEUM VAPORS IN BASEMENT (Continued) **S116553504**

to Parlato that DEC would most likely be using it's regulatory authority (pending discussion with RSE) to resolve the issue. END OF NOTES 3/26/14-Vought-Spoke with RSE and he approved removal of secondary containment and/or installation of coupons to inspect bottom of containment as well as clean the source of odors. Tank test will be performed upon inspection of tank and whether tank is visible in entirety along the bottom. RSE also approved sending vapor intrusion results and summary email to NYSDOH and NYCDOH and recommendation of sealing pit in laundry room floor at 11 East 74th Street and installation of ventilation at 9 East 74th Street. DEC Requires: 1)tightness testing of UST if exposure of tank bottom notes that tank bottom in contact with floor. 2)RECOMMENDATION to Parluto that he seal sump walls and floor to prevent any potential vapor intrusion via this pathway. 3)Immediate removal of secondary containment or accss into to inspect enitre floor condition under tank as well as remove any major or minor historical spills evidenced by high PIDs and olfactory in tank room of 9 East 74th Street. 4)Immediate installation of basement ventilation in 9 east 74th Street. 3/27/14-Vought-Sent email to Mike Hughes with cc to all parties that Mike, I am sending you this email as I have been working with Kumar Patel on a vapor complaint that you and Todd Crawford may be familiar. You sent an previous email that facilitated a DEC/DOH air survey and inspection that was performed yesterday and Todd spoke with Joanne Fiore (cc'd above) regarding the reported vapor issues. First and foremost thanks for your and Todd's assistance as well as DOH Compton Tucker who performed the site inspection and to those copied above. The purposes of this email are: 1) to update you on the results of the survey as NYCDOH noted during the site visit that no report would be provided. 2) to send you historical SUMMA sample results from approximately two years ago that showed a petroleum impact as per Mr. Parluto. 3) to provide a written record to those cc'd above including: contacts for 11 East 74th Street where reported impacts are (Joanne Fiore-Assistant to Iris Cantor, and Ron Parlato-Contractor) and Nicholas Emmanuel (owner of 9 East 74th Street where the source of the vapors are). The property is owned however by Valentine 11 LLc. The Department will be sending a requirement letter to Mr Emmanuel in a and I will copy all in subsequent email that I hope to get out by tomorrow. NYCDOH had noted during their site visit that they were unable to provide any orders for mitigation to 9 East 74th Street as no complaints were received from that site and they also noted that they would be unable to provide a written record to the Joanne and Ron from 11 East 74th Street. 4) to ask for further guidance, if necessary. My notes from results are the DEC/DOH survey performed on 3/26 are as follows:Vought, Patel, DOH Tucker, Fiore and Parlato sat down for meeting prior to survey so that all could hear background information, discuss interpretation and potential actions a result of the air survey. The meeting and inspection of the impacted property was held prior to inspection of the reported source so that olfactory senses had no potential impact and saturation. Parlato who is contractor for owner working on numerous projects for the building provided history of vapor complaints. Parlato noted that during date of initial spill (closed spill 1006830) in April 2009 he arrived to basement of building and the smell caused his eyes to burn in laundry room. Parlato noted that building was newly refinished and completed at that time. Parlato also noted that he was the former owner of a heating oil company and had much experience with tanks and spills.

PETROLEUM VAPORS IN BASEMENT (Continued) **S116553504**

Parlato also noted that the impacted site was a private residential home that contained both offices and living quarters for a philanthropist who was not at home and was currently in Florida. Vought received email information above after site visit and home owned by Iris Cantor. Parlato that when he removed hatch to sewer cleanout space under laundry room floor that it smelled like oil and that when asked about frequency of impact he noted that odors would come and go . Parlato also noted that he hired a contractor to collect SUMMA samples which were collected under the prior spill number and Patel noted that the results were not sent to NYSDOH Hughes for review to date. Parlato noted that one of the samples was collected from the laundry room and the report did note a petroleum impact. Parlato noted that he spoke to property owner of 9 East 74th Street (Nick Emmanuel) and Nick told him that he always had a problem with leakage . It was also noted during meeting that pipes were disconnected and redoped as per spill notes from 3/17/14 above, however tank was not retested after reconnection. Parlato also noted that he noted big smell during a delivery to 9 East 74th Street in October however Joanne noted (in accordance with notes by DEC Patel) that during a delivery with PID survey by DEC Patel on 3/19 that she did not observe any odors. Parlato also noted that the windows to the ground floor were sealed so there was no possible way vapors could be coming from the rear vent pipe through the windows into the building (and he noted vapors, when present, were always in laundry room which has no windows). Joanne noted petroleum vapors were noted by other building employees and that she was at some points nauseous, dizzy and noted weightloss and was considering a blood test for determination of potential impact. Vought noted that she could call and discuss same with NYSDOH Hughes and that all the information from visit would also be sent to NYSDOH by DEC as well. All parties began PID survey which began in back of building on ground floor (finished offices) and ended in front of room at laundry room. DOH PID readings were all under 5ppm during survey of 11 East 74th Street. Floor of laundry room contains steel trap door that is access to a small subgrade room for sewer cleanout that can be entered with ladder and is approximate 6’ wide x 10’ long x 8’ deep. Sides of room are cobble or cinderblock with paint and floor was dirt with no solid bottom. When trap door was opened, PID readings were up to 3.8ppm and Vought noted ammonia type smell possibly associated with long standing moisture in space. Parlato also noted olfactory detections of vapors prior to the door being opened by DEC Patel and Vought only noted olfactory evidence of detergent. Vought recommended epoxy sealing of sump walls and floor (which may included concrete placement) and Parlato noted that he would perform this work. Vought, DOH Tucker and Patel performed site visit to 9 East 74th Street and met owner (Nicholas Emmanuel) and as soon as first floor lobby of building was entered, olfactory petroleum odors were noted by ALL three parties and DOH readings were approximately 7ppm. Nick took parties to basement and tank and 1080-gallon tank had concrete cinder block wall on two sides, one side was common wall to 11 East 74th and fourth side was to sidewalk. DOH Tucker noted PID readings up to approximately 26ppm in tank room and vapors were strong via olfactory senses and were also strongest in tank room. Weep holes present in tank room floor showed no sign of spill however epoxy on floor appeared fresh. Holes still present in floor from previous soil borings (as per Nick) but soil borings showed no impact as also as per Nick and Patel. Unable to see underneath all sides of tank as

PETROLEUM VAPORS IN BASEMENT (Continued) **S116553504**

tank very close to cinderblock wall and some spaces filled with concrete debris however it is possible that a historical spill (of unknown size and timing) seeped down tank sides and is present under tank which necessitates removal or access into secondary containment wall so that system and floor can be inspected in entirety and cleaning performed. All parties opened door to the outside which immediately reduced PID readings in hallway outside tank room as an INTERIM remedial measure. Manuel noted his limited financial ability to do work and also noted that he should not have to do any work in his building has he had not received any complaints from his residents. Vought noted that work would most likely be required due to petroleum vapors noted by DEC and DOH pending approval by RSE. DOH Tucker called his supervisors and they noted that since the complaint was not called in from 9 East 74th Street, that they could not issue any Orders to mitigate vapors (despite elevated PIDs and olfactory evidence of petroleum). Vought noted to Nick that DEC would most likely issue requirements pending supervisory approval. Vought requested from Tucker a report of his findings for the survey at 11 East 74th and was also told that no report would be issued as per his supervisors. Vought stressed the necessity of that report to document no impact which would also assist in the comfort of Parlato and Fiore. Parlato on hearing that DOH could not provide Order, told them that he would be contacting politicians and press. Vought then noted to Parlato that DEC would most likely be using it's regulatory authority (pending discussion with RSE) to resolve the issue. END OF NOTES. Mike, attached below you will find the SUMMA results collected in August 2010 under closed spill #1006830 for your review. I noted to Fiore and Parlato that these results may not be useful as no outdoor air and no sub-slab was collected as well as their age but you were the expert on it's possible usefulness. I will begin preparation of the Department's requirement letter to Nicholas Emmanuel and send it to you and all those above by tomorrow. Please also note that Kumar will remain Project Manager on the site and will be continue to be supervised by Tim Demeo (under Randy Austin). As always we seek your concurrence, comments and guidance and I am hoping that this email may also serve as a format for all parties to communicate effectively. Thanks again. 3/27/14-Vought-Recevied call from Nick and he received Vought's email and noted that he was meeting PTC today at 4pm to discuss potential mitigation efforts. DEC Demeo noted that DEC Patel to send out requirement letter with above requirements. 3/28/14-Vought-Fiore sent email to Vought that Hi,Thank you very much for all of your help. All the best. Joanna . Vought repled with cc to RSE, Demeo and Patel that Joanne, You're quite welcome and after further discussion with Tim Demeo, Kumar will be sending out the requirement letter with a cc to all today with requirements as per the below email. Thanks again for your patience, Jeff. Fiore replied with cc to all that Hi, That is great-thank you. Best Joanna . 4/2/14 TJD Spill reassigned Patel to DeMeo 4/7/14 TJD Site inspection - DEC staff were onsite at the above location to witness removal of the secondary containment structure associated with a 1,080 gallon AST located at 9 E74th Street. The environmental contractor working for the owner of the tank being investigated removed the containment structure to facilitate a visual inspection of the tank and all associated piping. Investigation findings reveal historical piping leaks had saturated the interior masonry walls of the containment structure and debris/solids which were inside vault structure. The contaminated materials were drummed and transported

PETROLEUM VAPORS IN BASEMENT (Continued) **S116553504**

off-site for proper disposal by the contractor. Additionally, a isolation test was performed on the remote fill line (buried) which failed the test. Owner is working through his contractor to obtain the necessary permits to remove sidewalk, replace fill pipe and excavate any contaminated soils. A new spill has been reported at this site (1400235) associated with the failed isolation test. DEC staff will inspect the excavation during the fill pipe replacement project. Awaiting notification from contractor of scheduled fill pipe replacement work. 11/2/15 TJD File review. All work has been completed. Odor condition affecting neighboring residence has resolved. Contractor (PTC) has not provided closure documentation. PTC has contaminated soil improperly stockpiled at their facility pending disposal. Improper disposal violations addressed under consent order R2-20140623. No further investigatory or remedial action required. An estimated 5 cu yds of petroleum impacted soils wSpill administratively closed due to lack of documentation."

Remarks: "odor in the air and caller can smell this. he did tell contractor (talk to caller) in regards to this because the contractor was told by Nick that he does have a leak"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"e2mis no 154517 Prazan discovered in V-8310 approx 1 gallon of Transformer oil mixed with dirt and debris. The substance seems to be transfromer fluid from a possible Bottom leak condition. The spill is on the concrete and no cracks observed. The sump and piping was taken apart and was dry. Two samples were taken for PCB and ID. No initial cleanup action to be taken. Unit pressure tested. Lab Sequence Number: 04-05848-001: TOTAL PCB 3 ppm Lab Sequence Number: 04-05849-001: Analysis indicates the presence of a substance similar to a dielectric fluid 08/28/04 06:00 E.Hulser#39723 of cable notified the control center on 08/28/04 at 04:00hrs. that the cleanup in V8310 was completed. This was a final cleanup. There was dirt and debris removed via vactor truck from V8310. There were no barrels or drums used in this cleanup. The method used to clean was double washed with slix. The yellow environmental tag #31532 was removed from V8310. The cleanup personnel were: E.Hulser#39723 the cleanup supervisor, G.Rosario#11464 and C.Gonce#20148 were the cleanup crew. The leaking transformer in V8310 was removed and a new transformer was installed in V8310. The cleanup was completed on 08/28/04 at 03:15hrs."
Remarks:	"COULD BE FROM A BOTTOM LEAK ON TRANSFORMER, WILL DO A TEST TO CONFRIM AND FROM THERE CLEAN UP: CONED# 154517, NO TO 4 QUESTIONS"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT Called Ed. Dunphy, who happen to be working for Fenley & Nicol at this location. This site is located at 545 East 73rd Street, It is owned and operated by NYC Dept. of Sanitation. Garage ID # is Manhattan 5/8/8A. PBS # 2-455792 Called Garage Supervisor, at 212 628-7962, who confirmed that diesel spill occured on concrete (garage floor) and no soil or water was impacted. Oil was cleaned up by the Dept. of Sanitation. The Garage Supersiver confirms that no further action is required. Discussed with Jeff, who recommends closure. E.R."
	Not reported
Remarks:	"caller states that the oil company overfilled the tank in the ground and it shot up through another opening and is all over the ground - approx 50+ gallons - spill is being contained"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Tenant - name? number? (Sangesland forgot to take it) Management: Mrs Lavanant - Brittany Mgt 212-535-2748 (she's managed building for 20 years) Oil Company - Super Fuel, Bronx 718-993-4747 they didn't actually deliver the fuel that day, they sub contracted the delivery to someone else - who??? DECPiper responded to site. Upon arrival, fuel oil vapors were detected around vent. A small overfill occured and was cleaned. <5 gal and cleaned within 2 hrs. Tank system was ok. Reccomended to Tim Bunyon of superfuel to have MB fuel transport (sub) to wipe down again with pads while area is wet from snow/water. The buiiling is painted and has no staining. This is a residual matter that will evaporate shortly. Spill closed. 2/9/11- DEC Piper revisited site with NYCDOH as there was conflicting notes as to the source of the odors. Inpectioon revealed no fuel oil vapors and case will be closed by DOH."
Remarks:	"Tenant complained of smell for several days in her basement apartment. Management company says there was an oil spill on Monday 1/24 which they reported to Super Fuel on Tuesday (Super Fuel never reported the spill to DEC)"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	MIKE VIZZINI
DEC Memo:	"DEC Piper spoke with Mike at Milro. They received call that fill line is leaking. They are responded and cleaned floor. They will provide estimate for repairs and additional remediation. Assigned to DEC Zhune for follow up and closure. Milro group, LLC was contacted to respond to a #2 fuel oil spill at 115E 81st St, New Yrok, NY. The oil spill was caused by a 2 line located inside the basement of the residence. During a delivery oil migrated out of the rotted fill line impacting the finished basement. A reported 3 gallons of #2 fuel oil migraged out of the fill pipe impacting the basement floor. AS part of the cleanup, Milro removed 2 yards of oil impacted debris within the basement. the concrete floor was inspected for cracks. Using a 2 core core drill and hand auger Milro collected soil borings within the spill area. Oil impacted soil was observed. Floor drains were not observed within the spill area. Milro washed and degreased the concrete floor for residual odors. Milro removed two yards oil impacted concrete within the spill area. Six yards of oil, impacted soil was hand excavated to a structural endpoint. The bottom of the excavation was soild stone. A soil sample could not be collected. Milro collected (4)sidewalk samples within the excavation. Endpoint

RESIDENCE (Continued) **S125868508**

soil samples were submitted to York Analytical Laboratories, Inc. located at 120 Research Drive, Stratford, CT, and analyzed for volatile organics (EPA 8260)and semi-volatile organics (EPA 8270)in accordance with CP-51 guilines. Volatile organics and semi-volatile organics were detected above CP-51 guidelines on the east foundation wall. Additional soil removal was not removed because it would undermine the foundation footing. A bentonite clay barrier was installed within the excavation and polyethylene sheeting was installed prior to backfilling. The excavation was backfilled with clean fill and a 4 concrete slab was installed. As a final vapor barrier Milro installed a two part epoxy paint over the new concrete slab. Residual odors do no remain and all air equipment has been removed. Spill Closed. "

Remarks: "cleanup in progress"

DEC Region:	2
DER Facility ID:	70263
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 10/7/2002 - Sangesland sent Tank Test Failure Form Letter to: Maria Armempariz 1418 Third Ave New York, NY 10028 7/20/05:Placed a call to the facility, the owner claims that the tank was replaced and she is only will to comunicate with me in writing. A written request was sent to her address. (Akwa) 8/11/05: I had not received any written response so, I placed another phone call to the owner of the facility but she was not avilable.(akwa) 8/29/05: Another phone call to the owner of the facility but she was not avilable and I was unable to leave a massage.(akwa) Called the the consultant, crown leak detection (Tank test company) and left a massage requesting information on this spill, that Phone call was not returned.(akwa) 07/16/13 - Spill Case is transferred from Leszek Zielinski (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 02/14/2014 - Reviewed this Tank Test Failure Spill Case. No documents exists in the Department's records or from tanks tester which would indicate and/or confirm that product has actually been released. PBS records do not indicate any violations

MULTI DWELLING (Continued) **S105996939**

Remarks:	which are outstanding. This TTF spill case is 11 years old. No credible information has ever been received indicating actual product release. This is 4 floor residential building with an eatery esteblishment on the first floor. No public complaints of petroleum odor has been received from this facility or address. There appears to be no environmental or human health threats associated with this TTF spill case. The Department determined that it is appropriate to close this spill case at this time. Spill Case is closed effective 02/14/2014. No spill case closure letter is sent. Vadim Brevdo." "customer became irate and did not believe tank failed and might ruture. square tank and rusty on back side. looking for a call back on this spill."

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"11/09/16-Hiralkumar Patel. alternate address: 113-115 E 72nd St no other spills found. PBS #: 2-268100, 2-600873 as per PBS #: 2-268100, site had one (1) 3,500 gal #6 oil AST which was converted to non-regulated use. as per PBS #: 2-600873, site has one (1) 3,000 gal #6 oil AST in contact with soil, in-service, installed in Feb. 1990. 6:28 AM:- spoke with Joe at Riteway. he mentioned that approx. 10 gal spilled onto sidewalk due to overfill. he will call back with updates after talking to crew who responded for cleanup. 7:34 AM:- spoke with Joe Zubin. he confirmed that minor oil came out of manhole, but only onto tank wall. asked him to provide building owner/super's contact info. 8:51 AM:- received call from Rob from Riteway. he confirmed minor discharge from tank's manhole. they cleaned up oil from sidewalk and will return to wash the impacted areas. 11/10/16-Hiralkumar Patel. tried calling phone numbers listed on PBS record, but those are not in service. 2:23 PM:- spoke with Rob at Riteway. Riteway crew went back to site yesterday and powerwashed the impacted areas. they also sealed the loose manhole and cleaned up oil on tank wall. Rob will submit cleanup documents. 2:30 PM:- spoke with Jack (347-608-5176), building super. he confirmed that spill was

SIDEWALK (Continued) **S118953338**

outside on concrete sidewalk and has been cleaned up. he also confirmed no odors inside the building. 2:38 PM:- left message for Carmen at Empire Management. 2:45 PM:- spoke with Ryan Elazari at Empire Management. informed him about incorrect information on PBS record. Savoy Realty Associates, Inc. c/o Empire Management Attn.: Ryan Elazari PH. (212) 686-5252 email: empiremanagement16@gmail.com 2:59 PM:- sent email to Mr. Elazari including PBS application. asked him to submit application with correct information. email copied to DEC Leszek. 11/14/16-Hiralkumar Patel. 9:01 AM:- spoke with Rob and asked him to submit cleanup summary and site pics. 2:12 PM:- sent email to Rob and asked to submit cleanup documents. email copied to Joe. 11/16/16-Hiralkumar Patel. 1:53 PM:- sent email to Rob and asked to submit cleanup documents. email copied to Joe. 11/22/16-Hiralkumar Patel. 9:28 AM:- sent email to Rob and asked to submit cleanup documents. email copied to Joe. 12/02/16-Hiralkumar Patel. 2:59 PM:- spoke with Joe and reminded him to submit cleanup documents. 3:21 PM:- received email from Joe including cause of release, cleanup summary and site pics. case closed based on available information."

Remarks: "rightway en route for cleanup. on sidewalk and curb only"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO Fill line failure. CA Rich Consultants retained to investigate and remediate. Excavation revealed contaminated soil and improperly abandonned 10,000 gallon fuel tank. Approximately 50 tons of contaminated soils were removed from excavation. Due to structural concerns tank could not be removed. Not all contaminated soils were able to be removed due to the close proximity of the abandonned tank to a Con Edison steam line. Closure report and analytical results in file."
Remarks:	"caller reports line broken underground. spill stopped. cleanup not started yet."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
