09-Hiralkumar Patel.11:42 AM:- spoke with Mr. Alpert at Spartan petroleum. Mr. Alpert mentioned that site owned by Spartan, but was leased to BP from 1989 to July 31, 2009. Spartan took over property on 08/01/09. BP tested tanks before giving site back to Spartan and tanks were tight. Spartan petroleum owns site and tanks now and as per Mr. Alpert, site will be used as gas station at least for next five years. as per Mr. Alpert, BP took responsibility of spill.Atlantic Richfield Company **BP - previous tank owners**1 West Pennsylvania Avenue, Suite 440Towson, MD 21204-0527Attn.: Kevin EndrissPh. (410) 825-7853Fax (410) 825-8675email: kevin.endriss@bp.comDavid GreffeniusDelta Consultants **BP's consultant**Ph. (914) 495-9929 (O) (914) 522-6344 (C)email: dgreffenius@deltaenv.com 1:00 PM:- sent letter to Mr. Endriss and Mr. Alpert requiring Phase I, soil and groundwater delineation and scaled site plan including location of current/former tank systems. letter

CON EDISON (Continued) **S109943571**

emailed to Mr. Endriss and David. letter faxed to Mr. Alpert.12/23/09-Hiralkumar Patel.10:55 AM:- received call from David. David mentioned that they already submitted some information for Phase I requirement and only need to do sanborn map review. will submit addendum with review of sanborn map. will submit work plan next week for additional soil/gw investigation.01/05/10-Hiralkumar Patel. received email from David (at 4:59 PM on 01/04/10) with work plan. David proposed to install three soil borings along southern side of site along Atlantic AVe (in area little north of previous borings SB-3 and SB-4) and three permanent wells. three wells MW-1, MW-2 and MW-3 will be placed at former boring locations SB-1, SB-2 and SB-5, respectively. soil sample from soil/water interface and the interval exhibiting highest PID readings above and/or below water interface will be collected for analysis. soil borings (for wells also) will be advanced a minimum of 5 ft belwo soil/water interface or 3 ft beyond the depth interval identifying the higest PID readings. David proposed to submit investigation report within 90 days of the department's approval.the proposed work plan is not acceptable, as it doesn't include complete soil delineation.11:55 AM:- spoke with David. asked him to submit revised work plan including complete delineation of soil contamination (including borings on sidewalk along Atlantic ave and Monaco place and also borings west of SB-5 towards dispenser island). informed him that proposed three wells are acceptable but the department requires complete delineation of groundwater contamination once groundwater flow direction is defined. also aksed David to include information about sanborn maps review. David will submit revised map.1:00 PM:- left message for Mr. Endriss requiring to submit revised work plan.01/11/10-Hiralkumar Patel. received email from David (1:49 PM on 01/08/10) with addendum to work plan dated 12/31/09. David proposed to install three wells and six soil borings.01/19/10-Hiralkumar Patel.1:43 PM:- sent work plan approval letter to Mr. Endriss and Mr. Alpert. letter emailed to Mr. Endriss and David. also sent sidewalk permit request letter to David. investigation report is due on 04/19/10.04/16/10-Hiralkumar Patel.1:33 PM:- received message from David. he is preparing report and will submit on 04/19/10.04/21/10-Hiralkumar Patel. received email from David (at 10:23 PM on 04/20/10) including investigation report. abstract:- sensitive receptor survey was conducted- public school 155 is located northeast of the subject site within 1/4 mile radius- several of the adjoining and surrounding residential and commercial buildings have basements- installed six soil borings (SB-6 to SB-11) and three permanent 2 inch monitoring wells (MW-1 to MW-3)- soil borings were advanced to a depth of 20 ft bg except boring SB-10 which was advanced to depth of 25 ft bg- monitoring wells were installed to a depth of 17 ft bg except well MW-2 which was installed to 17.5 ft depth- all wells were installed with 10 ft of screen (7-17 ft or 7.5-17.5 ft)- groundwater was encountered during drilling at depths between 10 and 12.5 ft bg less than -------- PID readings ranged from 0 to 2,000 ppm- total of 12 soil samples collected during installation of soil borings and wells- collected groundwater samples from geoprobe borings SB-6, SB-8, SB-9, SB-10 and SB-11- during gauging event, groundwater was measured at depths 5.82 ft in MW-1, 7.70 ft in MW-2 and 5.37 ft in MW-3, but well screen in wells MW-1 and MW-3 starts at 7 ft bg (below water table) and well screen in MW-2 starts at 7.5 ft (almost at water table) less than --------- LNAPL was not detected in wells- groundwater flows in southwest

CON EDISON (Continued) **S109943571**

---100MTBE----------140----------110--------240----12,000Isopropylbenzene----------99-------130----------140n-Propylbenzene----------140-------520----------150after reviewing the report, found following improper:- based on well gauging data, well screen in wells MW-1 and MW-3 are below water table and screen in well MW-2 starts at water table less than ---------- from boring SB-9, one soil sample was collected at 11.5-12 ft where 1,410 ppm found and another soil sample collected at 14-14.5 ft where 154 ppm found. but highest PID of 2,000 ppm was recorded at 12-14 ft depth and no soil sample collected at that depth- from boring SB-11, one soil sample was collected at 9-9.5 ft where 0 ppm found and another soil sample was collected at 13.5-14 ft where 1,259 ppm found. but highest PID of 2,000 ppm was recorded at 10-13 ft depth and no soil sample collected at that depth. also found 317 ppm at 18.5-20 ft depth where boring terminated. no soil sample collected at 20 ft depth and no further vertical delineation occured11:17 AM:- sent email to David and asked to submit revised boring logs with depth markings and sanborn map review.04/26/10-Hiralkumar Patel.1:13 PM:- left message for David.2:01 PM:- sent stipulation letter to Mr. Onufrak (new project manager at BP) and Mr. Alpert (at Spartan). letter emailed to Mr. Onufrak, Mr. Alpert and David.Nicholas OnufrakAtlantic Richfield Company1 West Pennsylvania Avenue, Suite 440Towson, MD 21204-0527Ph. (410) 825-8213Fax (410) 825-8675email: nicholas.onufrak@bp.com3:43

CON EDISON (Continued) **S109943571**

PM:- received fax from Richard Hofflich, attorney representing Spartan Petroleum. Mr. Hofflich sent copy of agreement between Spartan petroleum and BP about spill clenaup responsibility.04/27/10-Hiralkumar Patel.10:53 AM:- received call from David. asked him to submit sanborn map review by end of 05/10/10. also informed him that existing wells have screen starts either at water table or below water table which is not acceptable. so these wells must be replaced during next investigation.05/12/10-Hiralkumar Patel.1:53 PM:- received email from David with sanborn map summary report.- from 1888 to 1908, site was undeveloped- as per 1932 map, site was improved with a filling station and garage, with six gasoline tanks in southeast portion of the site less than ---------- (same from 1932 to 1980)- 1982 sanborn map shows site was vacant- 1987 map indicates the site was again improved with filling station (same from 1987 to 2007)05/18/10-Hiralkumar Patel. received email from David (at 5:03 PM on 05/17/10) with proposed revision to CAP. David proposed to double timeline to submit each documents.11:33 AM:- left message to David and informed him that proposed revision to CAP is not acceptable and there will be no change in CAP sent with STIP.11:34 AM:- sent email to David informing above and reminding that signed STIP is due on 05/21/10. email copied to Mr. Onufrak.05/21/10-Hiralkumar Patel.3:32 PM:- received signed STIP from Mr. Onufrak.STIP forwarded for regional director's signature.5/25/10-Vought-DEC Patel on vacation. Vought received signed STIP from DEC Mattei implemented on 5/24/10. Vought e-doc'd STIP and sent to Mr. Onufrak, Mr. Alpert and David.06/01/10-Hiralkumar Patel. after discussing with DEC Austin, case transferred to DEC Vadim.**existing wells needs to be replaced as wrong screen depth.**DEC requires: 1) complete delineation of soil contamination above and below water table, 2) complete delineation of groundwater contamination, 3) re-installation of wells (as previous wells have screen below water table) within 25 ft distance from each other, 4) site specific groundwater flow direction, 5) scaled site plan including current/former tank systems (including piping)6/21/2010 - project assigned to Feng. 7/9/2010 - reviewed Drilling Work Plan, dated 6/18/2010, by Delta. Delta proposes to install 2 wells and 3 soil borings. Comments to Delta. 1) reason why former SB-7 was not sampled for groundwater and a well in that location; 2) well next to SB-8; 3) when to GPR survey. Revised work plan within 30 days, by 8/2010.8/6/10 Spill case temporarily transferred from June Feng to J.A. Maisonave. - JAM4/11/2011 - Spill transferred back to JFeng.6/1/2011 - received 1Q2011. eDoc. JFreviewed the report, dated April 25, 2011, by Anteagroup. The monitoring well network was sampled on Februray 10, 2011. 3 wells were sampled. No flow is contoured. Max BTEX 6,210 ug/L and MTBE 2,000 ug/L (MW-3). 7/6/2011 - 2Q2011, dated 6/28/2011, by Anteagroup. The monitoring well network was sampled on April 1, 2011. 3 wells were sampled. Flows to southwest. Max BTEX 4,930 ug/L and MTBE 4,300 ug/L (MW-3). JF3/1/2012 - reviewed Drilling Work Plan, dated 10/18/2011, by Antea Group. Antea proposed to install 2 monitoring wells MW-4 and MW-5, 3 soil boring SB-12 through SB-14, and a GPR survey. Approved work plan with comments. 1) put additional wells in the vicinity of former SB-8 location, 2) delineation to the north of the pump islands, 3) identify the source of contamination found in MW-1 and MW-2, 4) reinstall MW-1 through MW-3, 5) install wells if contamination is identified during the installation of SB-12 to SB-14. Report due 5/2012. Required 5 days notice of field work.

CON EDISON (Continued) **S109943571**

8/2/2012 - 1Q2012, 4/27/2012, by Antea Group. Groundwater was sampled on 1/7/2012. MW-2, 4.7 benzene, 33 MTBE. MW-3, 5,020 BTEX, 600 MTBE. The next sampling is in 3/2012. 2Q2012, 6/29/2012, by Antea. Groundwater was sampled on 4/26/2012. The next sampling will be in 7/2012. MW-2, 3.7 benzene, 27 MTBE. MW-3, 6,210 BTEX, 390 MTBE. Email Chris Meyer of Antea for the status of the investigation. 11/30/2012 - 3Q2012, 9/27/2012, by Antea Group. The groundwater was sampled on July 30, 2012. The next sampling will be in October 2012. MW-1, 16 MTBE. MW-2, 37 MTBE. MW-3, 4,950 BTEX, 190 MTBE. MW-5, 357 BTEX, 14 MTBE. MW-6, 54,600 BTEX, 630 MTBE. MW-7, 3,468 BTEX, 110 MTBE. MW-8, 25 MTBE. 12/7/2012 - reviewed Subsurface Investigation Report, dated 9/27/2012. They did GPR survey and found 3 areas of anomalies, one is reinforced concrete, one area might be the 6 USTs appear in the SanBorn maps, and one is unknown. 7 soil borings were installed and 5 of these soil borings were converted to monitoring wells. Very high level of VOCs found in soil and moderate high VOCs found in groundwater. Antea proposes to install 4 more soil borings to delineate the contamination. email to BP/Antea. 1) what are the plans to deal with the identified anomalies? 2) additional delineation shall be in the area between SB-12 and SB-9. Response by mid December 2012. 12/17/2012 - email from Chris Meyer of Antea Group "As we are still in the process of delineating this site, a remedial strategy that may or may not involve the removal of any former tanks has not been selected. However, it will be a consideration as we approach that phase of this particular project. I will add that one of the three anomalies, specifically the one to the southeast, was determined to be reinforced concrete. We will also be verifying the status of the smaller anomaly to north of the canopy during this next event. As to your second comment, the location of the proposed soil borings/monitoring wells have been modified to fill the perceived gap between MW-6 and MW-4, as well as the area downgradient of the previous refusal surfaces, and the zone of reinforced concrete. An updated map showing locations for SB-15 through SB-18 is attached.We'll notify you upon completion of these activities."8/13/2013 - 1Q2013, 3/29/2013, by Antea Group. The monitoring was done on 1/14/2013. MW-2, 120 MTBE. MW-3, 4,809 BTEX, 120 MTBE. MW-5, 91.4 BTEX. MW-6, 0.02' LNAPL. MW-7, 915 BTEX, 82 MTBE.2Q2013, 6/28/2013, by Antea Group. The monitoring was done on 5/1/2013. MW-6 has been on a weekly basis gauging to determine if LNAPL is present. NAPL was observed since 12/17/2012. Total of 1.05 gallons of NAPL was removed. Antea will continue to gauged MW-6 on a quarterly basis. MW-1, 652 BTEX, 53 MTBE. MW-2, 0.82 BTEX, 49 MTBE. MW-3, 4,620 BTEX, 120 MTBE. MW-5, 400 BTEX, 16 MTBE. MW-6, 0.01' LNAPL. MW-9, 17.6 BTEX, 160 MTBE. MW-10 and MW-11 were dry.

Remarks: Soil and groundwater contaiminated due to old tanks came back in lab results above the NYSDEC clean up criteria.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	156272A. FRESCA REPORTS FINDING APPROX 1/2 GAL OF UNKNOWN OIL ON APPROX 40 GAL OF WATER IN M67396. NO SEWERS, WATERWAYS. THE SOURCE OF THE SPILL APPEARS TO BE COMING FROM A VACANT DUCT WHICH MAY HAVE A CUT CABLE INSIDE OF IT, AND THERE ARE SIGNS OF OIL RUNNING DOWN THE WALL AT THE DUCT EDGE. THE EXISTANCE OF ANY SEWER CONNECTIONS OR SUMPS COULD NOT BE VERIFIED AT THIS TIME. THERE WERE NO SUBSTANTIAL CRACKS IN THE STRUCTURE AND THE STANDING WATER HAD NO MOVEMENT. ENV STOP TAG# 44509 WAS PLACED AND ONE LIQUID SAMPLE TAKEN. CLEAN UP IS PENDING LAB RESULTS. Lab Sequence Number: 04-09562-001 TOTAL PCB: 74 ppm(1) drum of debris was removed, and 175 gallons of liquid was taken out by a > 50ppm tanker. The "Environmental Stop Tag" was left in place pending the removal of the obstructed cable in the duct and possible post cleanup.The following employees A. Glodowski, P. Rosado, and J. Iocco were assigned to wash a remove liquid from the structure. Due to prior cleaning of this structure on the present incident; there was no debris to be removed. This incident became open due to cable that was obstructed up the duct West of manhole 67396. The cable was ID and removed from the structure to a trench 50 -75 feet West of the manhole. The structure was double washed with Safe Wash solution and all liquids; 50 gallons were removed by an > 50ppm tanker. The job is complete 100% and the "Stop Tag" was removed at 0200hrs.
Remarks:	ON 40 GALLONS OF WATER: COMING THRU ELECTRIC DUCT: CONED # 156272: COMING OFF TO THE 24 HOUR CLOCK: NO TO 5 QUESTIONS

DEC Memo:	07/12/07-Vought-Daytime duty desk officer. Vought spoke to Elizabeth Alvarez and she noticed water in basement that had black substance on surface. As per Elizabeth odors of sewage and mold are in basement and in above residence. She notified DEP two weeks ago and they performed site visit and as per Alvarez did not enter the basement but stated that is was oil. DEC Rahman to peform site visit.07/13/07-Vought-Site visit by Rahman who inspected basement and confirmed that black substance was not oil and basement was flooded and odor of sewage. DEC Rahman suggested that owners hire plumber. Spill closed by Vought.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	10/29/14: Mahat T/C: DEC Mahat contacted Mr. Mosses Guluzian (Notifier: DEP @ 917.612.5299) inquiring more information about the spill and its nature. DEP responded to the site after several complaints from neighbors. DEP also mentioned that the there are several oil stain on the sidewalk and oil was travelling on curve over a period of time. DEP mentioned that the facility has major housekeeping issue including residual stain (Passible soil contamination). DEP requested DEC to make a site assessment.11/5/14: Mahat Spill case has been assigned to DLE for an site visit. Spill respose team is waiting on DLE notification.12/08/14: Mahat DEC Mahat contacted DLE office to get any inforamtion on the DLE repsonse. Another site visit is scheduled in near futute when the weather is favorable.12/16/14: Mahat DEC Mahat received an email from Leagal inquiring abouth the spill and its report.12/17/14: Mahat A clean up confirmation (picture/video/ msds/ invoice) was forarded to the Deparmtment. Power wash was performed on the sidewalk and abosorbent pads were used to contained any sheen from the washwater. Based on the supplied documnets, the spill department does not need any further investigation. No other resources were impacted. Hence, the spill case will be closed on the database. **** Spill C1053 *****
Remarks:	DEP has received several complaints of oil on the sidewalk coming from the above business. Upon investigation, DEP noticed numerous spills soaking into the concrete, soil, and around the property. The company claims the oil is leaking from their trucks.

DEC Memo:	3/8/06, Dyber: No response from Dominik. Referred back to region 2. Next Step: Perform state-funded investigation.2/2/06, Dyber: Sent letter to Dominik asking for more information on UST removal. Gave March 3 deadline.1/3/06, Dyber: Inspected the site. There was a small oil spill on the concrete floor of the garage. The spill was immediately cleaned up. Concrete had some petroleum stains, but no other liquid spills. An old gasoline dispenser was observed. Dominick said that the associated UST was about 350 gallons and was removed in the 1950's.12/20/05, Dyber: Dominick Garone called. He said that spill was cleaned up but has no documentation. I said that I would call him to arrange an inspection after the transit strike is over. He would then have to write a letter stating the facts of the spill and cleanup.7/27/05, Dyber: Spoke with the property owner, Bonita Garone, at home (See file for phone). She does not know about spill and said that the building on the property was vacant at the time. She said to call her husband, Dominik, after 8/1/05 after 6 pm.7/26/05, Dyber: Left message for Cyril Parris. Spiller's phone number has been disconnected.3/31/09 - Austin - Transferred from Needs Reassignment to Rahman for further work to remeidate and close - end06/29/10 Reviewing the spill report, it seems that the spill was minor and it was cleaned up.Case closed.(sr)

2618 ATLANTIC AVE **US AIRS N/A**
BROOKLYN, NY 11207

FINDS:

Registry ID: 110056294380

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"CONED E2MIS REPORT 5-15-01Approx. 3qts. of cable oil leaked from a blown joint(3C)in MH67400. No sewer connection, no sump. PCB sample taken on a "E" priority.2200hrs.Cleanup to be done as 50-499ppm0055hrsFound earthen sump. Removed incident from 24hr. deminimus program.0245Cleaned structure using Bio Gen 760, earthen sump was sampled for VOC and SVOC and sealed with cement tag left in place pending removal of Blown Joint.1020hrs.Splicers removed blown joint Cleanup completed 100%.
Remarks:	Joint on cable failed depositing 3 qts of material into manhole. Cleanup is completed, but an earthen sump was found beneath spill, which means some material has gone into soil at site. #137100 **update88 @0125 cleanup is not complete.

DEC Memo:	Sangesland spoke to Phil at Tanknology - He said there is a single 40,000 gal #6 oil UST at the site. Tank Test Failure Letter sent to

ATLANTIC PLAZA TOWERS (Continued) **U001834159**

Contact:Adam Nadel (917-559-2703)Nelson Management249 Hopkinson AveBrooklyn, NY 11233 Property is being sold and owner wants the issue cleared up quickly if possible.Sangesland suggested that the fastest way to determine if there is a large or small problem at the site was to run a series of GeoProbes around the tank in the courtyard and see if there is any contamination. If there is contamination there could be a major job to clean it up. If there is no contamination then the problem may be solved with fixing/replacing the lines.First TTF letter was returnedSecond letter sent to new contact:Kevin Raferty Atlantic Plaza Towers249 Thomas S. Boyland StBrooklyn, NY 1123310/17/05 - Austin - Spoke with Daniel of Hydrotech (631-462-5866). He indicated that the the Horner test done on this tank was invalid, due to the tank being larger than what such a test can tecnically measure in terms of leaks. He wil send his documentation on this to me, plus the results of geo-probes being placed around the tank in question, to close out this spill event in our records. I faxed him acopy of the spill report. - end11/28/05 - Austin - Received report from Hydrotech - spill transferred to Piper for review - end11/28/05- DEC Piper reviewed report. As per analytical results, no elevated levels above Rec'd Soil Cleanup Obj. found at 7 locations 5' from tank. No adverse impact to environment.

Remarks: Tank Test Failure on 40,000 gal - #6 oil - UST

Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:

Date form received by agency: 01/01/2006
Site name: SUNOCO SERVICE STATION
Classification: Not a generator, verified

Date form received by agency: 07/08/1999
Site name: SUNOCO SERVICE STATION
Classification: Not a generator, verified

Date form received by agency: 08/18/1980
Site name: SUNOCO SERVICE STATION
Classification: Large Quantity Generator

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Registry ID: 110004331740

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

LAND HOME IMPROVEMENT (Continued) **1016708230**

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: 01/27/06-Hiralkumar Patel. Left message for Chris at DEP (10:08AM)01/30/06 Sharif// Sharif visited the site on 01/27/06 afternoon.This is a building construction site.About half of the lot have been laid down with foundation stone and another half has piled up soil on it. The contractor found oil tank underground and spilled the oil while pulling out the oil tank with an excavator. This happened sometime in last week , but the contractor didn't call in a spill. DEC heard about the spill on 01/27/06 from NYC DEP and inspected the site.The whole area is actually going to be excavated down for construction of a new building. Needs to send contaminated soil letter toGDY Properties Inc87-20 139th StreetJamaica, NY 11435(718)206-0550Attn: Paul Ido01/30/06-Hiralkumar Patel. Talked with Mr. Mark (Cell: 917-559-5519)at Petroleum Tank. he is going on site and will call me back once he reach at site with more information.FAX of Petroleum Tank: (718) 858-4268Left message for Paul at GDY at 1:45PM.Received call from Paul, i have asked him to stop working on site until the investigation is done. he will send me some results he has, soon. FAX of Paul Ido: (718) 228-7406From Property Shark, when I tried 586, Liberty ave in Brooklyn, I got report for 584 Liberty Ave. and based on that data, i have found following data from PBS records.Total number of tanks on site: 7 all contined gasoline and closed and removed on Aug. 1st, 20014 tanks with capacity of 550 gal.3 tanks with capacity of 4000 gal.CSL has sent out to Paul. Faxed to Paul at GDY and Anthony at Petroleum.talked with Mark, as per him it was around 20-25 gal gasoline and its all cleaned up. the tank had capacity of 550 gal. there are 3 more tanks of same capacity in ground filed with gasoline. Petroleum tank will going to empty out those tank probably tomorrow. somebody else will take out those tanks. this property were in use as Gas station in past.spoke with Paul, and a person named Tarek Khouri from Langan will call me tomorrow regarding cleanup. Langan is the company who did phase I and phase II investigation on this site.01/31/06-Hiralkumar Patel. Received call from Tarek Khouri (212-479-5450) from Langan. as Tarek visited this site, he found four more tanks capacity of 550 gal and all five tanks exceeding 1100 gal limit. so Tarek has suggest Owner to get these tanks registered if not and submit application for closure. During phase-I and phase-II investigation, Langan has took five soil and five water samples and they have not found any contamination of VOC, SVOC or PCB except some metals in one soil and one groundwater sample. Today langan has dug out the area where the spill happened and piled in site. 5 more samples have taken out (4 from pile and 1 near to the part of site where construction is going on) and they will get report by Monday 6th Feb. Based on sample report, they will do further excavation of spill site. they going to take end point samples from excavation. Petroleum tank cleaners going to clean the remaining tanks. As they have not found any contamination where the construction is going on, i asked him to tell owner that they can do further construction, but if the sample next to that construction find any contamination, they have to stop where they are. Tarek will submit all the required documents and reports once he finished work. he also going to include the previous lab results of samples.Tarek at LanganFAX: (212) 479-5444Off. PH.: (212) 479-5450Cell: (201) 913-4325waiting to get call from Tarek regarding sample results (apprx. 6th Feb.)02/07/06-Hiralkumar Patel. left message for Tarek about lab results. got message from Tarek. as per him, he will receive results

UNKNOWN (Continued) **S107522439**

by end of day or tomorrow. as he went on site yesterday, he has taken end point samples from excavation pit of old tank and sent out for testing. waiting to get results.Left message for Tarek for lab results.Spoke with Tarek. as he get sample results he will send me. i have asked him to take samples from the location of remaining three tanks that needs to be taken out. Tarek will send me lab results as he get it and at end of process he will submit full report. First set of result will be mailed by end of tomorrow (8th Feb).02/10/06-Hiralkumar Patel. Received lab results for the samples there were taken out from excavated soil during tank removal. abstract of report:- samples shows exceedances for metals, VOCs and SVOCs.- USTs will be cleaned, content disposed of and the tanks removed offsite- end point samples has taken on 6th FEb.- no visual impacts, odors or PID readings in excavated area- final report consisting all disposal manifests, lab results, scrap metal tickets etc. will be submitted.----------Sample#1-----Sample#2------Sample#3 (ppb)Metals:Mercury----------0.336---------0.234--------0.328 (limit: 0.1)VOCs:4-Methyl-2-Pentanone----------624----------576 (limit: 100)Acetone----------1250---------1150 (limit: 200)Methylene Chloride----------624----------576 (limit: 100)SVOCs:Benzo (a) anthracene-----396---------1370----------953 (limit: 224)Benzo (a) pyrene---------346---------1090----------759 (limit: 61)Benzo (b) fluoranthene---344---------1260----------968 (limit: 220)Chrysene----------1340----------830 (limit: 400)Dibenzo (a,h) anthracene-40.6---------144----------79.6 (limit: 14)Received call from Tarek from Langan. He got end point sample results and will email me. as per him, owner is building condominium at site. because of some contamination of SVOCs, they will put vapor barrier. on top of barrier it will be 6 inch concrete and then a 6-8 ft. basement. condo will start at street level. I have asked Tarek to submit this plan in writing. he will send by Tuesday 14th Feb. as he hasn't found any contamination next to the building which is under construction, they are continuing their work.Received email from Tarek.----------Dear Kumar,I want to thank you for taking the time to discuss with me the 586Liberty Ave job and for your prompt response to our correspondences.As we discussed, we sent you on 9 Feb 2006 a letter report describingthe actions we took to date in response to the 27 January 2006 spill. Asummary of the letter report is as follows:*Spill Response: Soil samples were collected from thearea where the USTs had been located, and the samples were tested forTAGM VOCs, TAGM SVOCs, total metals, PCBs as well as for RCRAcharacteristics and TCLP RCRA metals. None of the samples identified anyhazardous characteristics nor exceeded TAGM for PCBs. The samples;however, identified some slight exceedances above TAGM for metals, VOCsand SVOCs. The laboratory results are now used to identify anappropriate solid waste disposal facility. Currently, the spill impactedsoil is stockpiled (about 300 cubic yards) at the Site awaitingarrangements with a permitted disposal facility. Once an approveddisposal facility is selected, Langan will oversee the excavation andloading of the impacted material for proper disposal. Langan will alsocomplete and signoff on the non-hazardous waste manifests on behalf ofGDY.*UST Closure: The five USTs are being cleaned, contentdisposed of and the tanks removed offsite per

UNKNOWN (Continued) **S107522439**

applicable NYSDEC and FDNYregulations. A copy of the waste manifests, scrap metal tickets and anaffidavit certifying that the closure was completed per applicableregulations will be submitted in the closure report. The soil where theUSTs were stored for cleaning will also be shipped offsite for disposalat permitted facilities.*End Point Sampling: The foundation contractor hascompleted the excavation (to a depth of 12-15 ft bgs) in the area wherethe USTs have been removed. On 6 February 2006, Langan re-visited theSite and collected end point samples from the walls (EP-LIB1, EP-LIB2,EP-LIB3) and bottom (EP-LIB4) of the excavation area. The samples weretested for TAGM VOCs, TAGM SVOCs, total metals, PCBs, and STARS VOCS andSVOCs. Langan also screened the excavated area visually and with aphoto-ionization detector (PID). No visual impacts, odors or PIDreadings were identified. The soil appeared to be virgin sandy material.As you can see from the attached data, none of the samples exceeded TAGMRSCOs for PCBs and VOCs. The bottom endpoint sample had no TAGM RSCOsexceedances at all. The other three endpoint samples had minimal TAGMRSCOs exceedances only for metals and PAHs. Based on the detectedlevels, it appears that the exceedances are due to background siteconditions and not related to the spill itself.*Foundation Work: Langan conducted a Limited Phase IISite Investigation at this Site in September 2005. The soil borings thatwere conducted for the Phase II, and a sample taken from the virginsandy material next to the existing foundation on 31 January 2006(WC-LIB1-013106), indicate that the native soil onsite meets TAGMcriteria for VOCs, SVOCs, metals and PCBs. Water samples taken duringthe Phase II exhibited some metals exceedances, which were attributed tothe turbidity of the samples. The bottom end point sample discussedabove also supports the fact the native soil meets TAGM RSCOs.*The client intends to construct seven three-story condounits. The cellar level will be used for storage and as a boiler room,and will not be an occupied space. The first floor (street level) andthe remaining two other floors will be livable space. The foundationwork will be to excavate 12-15 ft below ground surface all the way tothe native sandy material (tested and confirmed to be clean), install an8 mil water/vapor barrier and a 6" concrete slab.The source of the spill and contaminated material surrounding the USTshave been removed. The foundation will be water/vapor proof and builton native sandy soil (meets TAGM). The GW, previously tested, had noTOGS exceedances for VOCs, SVOCs, or PCBs. The soil remaining aroundthe excavation area did not exhibit indications of contamination (i.e.,staining, odor, and/or elevated PID readings), and the minor PAHsexceedances are more likely related to historic urban fill, typical ofconstruction sites in New York City. As such, the risk of humanexposure is minimal or non existent and the existing conditions do notrepresent an imminent threat to human health or the environment.As discussed, we will continue with the foundation and constructionwork, and will keep you updated of the work progress. Once the impactedmaterial is removed and the tank closure documents are received, we willsend you a spill closure report to close the spill.In the meantime, please call with any questions.Thank you again.Tarek <<586 Libery Ave - End Point Samples - Summary Tables Feb 06. pdf.pdf>> <<sa40432final1.pdf>>
----------Received end point sample result. samples shows little excedence from limit in SVOCs.As talked with Tarek, they have installed vapor barrier in foundation where the construction is going on. he will include its detail in final report. and the area where the tanks are, it will be

UNKNOWN (Continued) **S107522439**

used for parking or storage. there will be no residential building.**Tarek will send me final report.(check detail of vapor barrier in foundation where the construction is) **03/13/06-Hiralkumar Patel. Spoke with Tarek. they are preparing final report and will complete it by next Monday Mar. 20.03/20/06-Hiralkumar Patel. Received UST closure report from Langan. this report also contains Limited Phase II Environmental Site Investigation Report. abstract of report:- the celler level of the building will be used for storage and as a boiler room, and will not be an occupied space. the first floor (street level) and the remaining two other floors will be livable space. - foundation work involves excavation 12-15 ft below ground surface reaching native sandy mateial, installation of an 8 mil water/vapor barrier and a 6" concrete slab.- five 550 gal USTs were discorved on the western portion of the site during excavation for the development.- subsurface soil samples taken during the Phase II ESI exhibited no exceedence for PCBs, VOCs or SVOCs. one subsurface soil sample exhibited slight exceedances for metals that were attributed to naturally occuring conditions or background characteritics.- no VOCs, SVOCs or PCBs were present in groundwater. all groundwater samples had metals exceedances. it is likely that the elevated metal levels in the groundwater are related tothe high turbidity of the samples and the nature of the groundwater itself.- all five USTs appeared to be intact and in good condition.- the excavation pit appeared to be virgin sandy material. no staining, odors or elevated PID readings were observed.- impacted soil was stockpiled at site. Langan later samples for lab analysis for proper waste characterization. no PID readings were identified.- after stockpiled contaminated soil was removed fromt the site, ground surface samples were taken from where the stockpile had been located. samples shows little exceedence for metals.- groundwater encountered between 24 ft to 32 ft.as report shows only little exceedance for some SVOCs and some metals including mercury and that is because of historic urban fill and groundwater has some metals and that because of high turbidity and installation of vapor barrier, case is closed.NFA sent out to GDY Properties. faxed to GDY properties and Langan.

Remarks: THIS CAME INTO DEP ANNY. UNSURE WHAT EXACTLEY IS GOING ON, GAS TANKS HAVE BEEN IN GROUND FOR OVER 50 YEARS AND THEY ARE BEING REMOVED:01/28/06 10:23 - CALL FROM ANTHONY CHARLES FROM PETROLEUM TANK CLEANERS 718-624-4842 REPORTING APPROX 25 GALLONS OF #2 FUEL OIL WAS SPILLED. CLEAN UP IS IN PROGRESS.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

CONNECTION DRY CLEANERS (Continued) **1008200464**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	10/21/13 - Obligado (DDO) - I contacted BOB IRVIN # (631) 321-4670 at ProTest. According to Mr. Irvin, the tank is a 1080 gallon AST in the apt basement. They believe it was a dry leak caused by the vent line - they noticed corrosion on the vent line. They said no oil was spilled. They gave Mr. Ted Hugh a proposal for a retest.I contacted Ted Hugh (646) 431-6147. TTF letter sent to Ted HughP.O. Box 250748NY, NY 1002511/1/13 - Obligado - I returned Ted Hughes voicemail message. He was inquiring about what to do about the failed test. However from the time of the original voice mail message, he had spoken with the tank test company and he said he will investigate and fix the cause of the tank failure and retest. He said he will keep me updated.11/12/13-Hiralkumar Patel.alternate address: 2732-2736 Pitkin Aveno PBS or other spills found.3:49 PM:- left message for Mr. Hughes.11/26/13-Hiralkumar Patel. received message from Mr. Hughes. he mentioned that tank system failed the test due to corroded vent pipe.12/02/13-Hiralkumar Patel. received report from Elite Environmental. Elite Env. disconnected the corroded vent line and tested remaining tank system which was found tight. after testing, they reconnected the corroded vent line. the tank test result dated 11/14/13 is missing calculation page.12/05/13-Hiralkumar Patel.12:55 PM:- received call from Mr. Hugh inquiring about case closure. informed him that the department requires repair/replacement of leaking vent line and submission of document confirming such work.DJW Mgmt, LLC. **property owner**532 West 111th Street, # 83New York, NY 10025DJW Mgmt, LLC. **property owner**c/o Ted HughP.O. Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: X001
Waste name: WASTE OILS

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	02/24/2009-HRAHMED-Spoke to the property owner Warren Brown (718 808 2334). DEC Ahmed told Warren that since its in his property, he has to hire a contractor to dispose the oil and drum and send disposal manifest to DEC. A CSL was sent to :Warren Brown338 Warwick StBrooklyn, NY 11207 3/10/09-HRAHMED-Spoke to Warren. Told him to dispose off the drum as per regulations and send disposal manifest by next week.04/13/09-HRAHMED-Spoke to Warren. As per him he hired somebody to take the drum away. When the guy came to take the drum the drum was not there. Somebody took the drum from his backyard and he has no idea who took it.This case is closed.
Remarks:	CALLER STATES THAT THERE IS A FULL 55 GALLON DRUM OF UNK PETROLEUM IN THE BACK YARD OF THE ABOVE LOCATION.

DER Facility ID:	210936
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"1/26/04. J.Krimgold responded to the site. During fuel delivery to a 275 gal AST located in the basement of a two family house, was over-pressurized and split-open its side wall. About 250 gal of #2 oil was released onto the basement concrete floor. Trucking USA made a delivery ordered by Empire Fuel. Trucking USA contacted its insurance co. AIG to report a spill. Trade-Winds was hired to clean up.Currently oil is contained and due to a good floor condition can be picked up by vacuum truck.20:15 Trade-Winds crew arrived and began the cleanup. Doug Schrimp is a project manager.2/2/04. Krimgold/Embrose/phone. Investigation revealed that tank was over-pressurize due to a completely clogged vent line. Some oil went through the cracs in the concrete. These aras will be excavated to remove contaminated soil. 2/10/04. J. Krimgold spoke to Clif Embrose (Embrose Envir. 888-556-4734) a consultant for AIG Insurance. He stated that a cleanup has been completed and will request Trade-Winds to submit a closure report to DEC.Also, spoke to David Perez- house owner. He conferred that a cleanup and restoration has been completed.Closure pending report from Trade-Winds.3/04/04. J.Krimgold reviewed a closure letter report prepared by Trade-Winds and dated February 26, 2004. Soil analytical results show no residual contamination inside the house but exceedance over TAGM criteria around exterior drain, where excavation was stopped at 5’ due to the construction constraints. BIO-Solution has been applied at this area and then backfilled and cemented. NFA.
Remarks:	asbout 250 gallons spilled due to tank overfill they are in the process of cleaning it up

DEC Memo:	1/6/11-Vought-Primary off hours responder. Vought called FLS (Mohammed Ahmed 212-675-3225) and left message to return call to DEC Vought. As per PBS #2-237973 tank has 5000-gallon #2 fuel oil UST and site is owned by:Our Lady Of Loreto Church124 Sackman StreetBrooklyn, NY 11233Ph: (718)387-3740Vought spoke to RSE and spill assigned to DEC Ahmed as secondary off-hours responder. Vought to send out CSL with possible additional requirements upon callback from FLS Ahmed. Vought received callback from and spoke to FLS Ahmed who noted that he was hired by property developer (Reese & Sons) and that the property was to be developed for affordable housing units. They were onsite to remove an abandoned 4,800-gallon fuel oil UST (See PBS #2-237973) and noted contaminated soil around "and below" the tank. Vought noted that DEC Ahmed was the project manager and that CSL would be drafted by Vought and signed by Ahmed. Vought drafted CSL with one month due date and the following requirements:1)delineation of soil and groundwater (if applicable) contamination2)collection of endpoint samples3)strong recommendation for installation of SSDS and VB4)Updating PBS Registration 2-237973 to reflect current closed status of UST (as per DEC Falvey this was required, PBS registration also expired as of 7/20/92).5)cc to FLS Ahmed6)advisement that site should not be developed until RAP approved by DEC.Vought sent letter with above requirements to address provided by FLS Ahmed:Our Lady of Loreto Catholic Churchc/o Progress of Peoples Development Corporation191 Joralemon StreetBrooklyn, NY 11201Attention: Claire

OUR LADY OF LORETO CHURCH (Continued) **U000402330**

Hilger11/7/11-Fu-Intern Fu completed summary of reports:SUMMARY UST CLOSURE REPORT & REMEDIAL ACTION PLAN (Fleming Lee Shue)- 08/17/11. On Jan 05 2011, at request of L Riso & Sons, Fleming-Lee Shue performed an UST field investigation in order to remove the tank but end in finding approximately 30 by 30 feet in size and extending approximately 16-37 feet below grade petroleum-impacted area. Then a spill was reported. Between June and July 2011, the UST removal activities was observed, including the removal of the decommissioning material, consisting of cement slurry, and the removal of the tank and associated piping. A 3' section was required to remain in the excavation due to structural and shoring concerns. Excavation and removal of 1249 tons of petroleum-impacted soil (to depth approximately 32ft-bgs) were conducted. On July 8 2011, 8 soil samples were collected per NYSDEC's request. 3 VOCs, Ethylbenzene, Xylene, and Isopropylbenzene, were detected above standard at EP-BE; Ethylbenzene was detected above SCO at EP-BW. One MW will be installed at the site. After installation, the MW will be sampled. If the gw is not found to be contaminated, Closure Report will be submitted; if the gw is contaminated, two additional MWs will be installed downgradient. SUMMARY SPILL CLOSURE REPORT (Tenen Environmental)-Sept 2011. Based on the removal of all structurally-accessible soil, documentation that gw has not been impacted, the incorporation of vapor barrier and SSDS and composite cover system over the area of UST, Tenen requests that this spill be closed. The subsurface investigation dated January 2011 consisted of: 1)Excavation of the soil in the area of the UST, visual and olfactory observations, and PID measurements of organic vapors; and 2) Installation of five (5) soil borings adjacent to the UST and sampling and analysis of soil. The results of the investigation, which are detailed in FLS' letter dated January 20, 2011, identify a petroleum-impacted area approximately 30 by 30 feet in size and extending to approximately 16 to 37 feet bgs. Based on the results of the January 2011 subsurface investigation, FLS prepared a January 21, 2011 Remedial Action Work Plan (RAWP). The RAWP described the following remedial actions: installation of sheeting and shoring, excavation of non-impacted soil, tank removal, excavation and disposal of petroleum-impacted soil, post excavation soil sampling, installation of a vapor barrier and SSDS, and preparation of a closure report. June-July 2011 Tank Closure / Interim Remedial MeasuresOn August 17, 2011, FLS submitted an Underground Storage Tank Closure and Remedial Action Report. July-August 2011 Supplemental Remedial Investigation: MW-1, in the center of the excavation was installed on July 29, 2011. The soil boring was advanced using a Sonic drill rig with continuous samples collected starting at a depth of 30 feet bgs and continuing to the groundwater table. 9 samples were collected and analyzed. The analytical results indicate the presence of several petroleum-related VOCs in seven (7) of the nine (9) soil samples collected. All detected VOCs were below the Part 375 Unrestricted Use and Protection of Groundwater SCOs and CP-51 Fuel Oil SCLs except ethylbenzene, isopropylbenzene and xylenes in samples collected from 43-45 and 48-50 feet bgs. The analytical results detected several SVOCs in eight (8) of the nine (9) soil samples collected. SVOCs detected in the soil samples primarily included polycyclic aromatic hydrocarbons (PAHs). All VOCs in MW-1 were detected at concentrations below the Class GA Standards except chloroform, which was detected at 21.9 parts per billion (ppb), above the Class GA Standard of 7 ppb. No SVOCs were detected above the

OUR LADY OF LORETO CHURCH (Continued) **U000402330**

NYSDEC Class GA Standards except phenol. The proposed redevelopment of site includes construction of 4 buildings of 8 dwellings each for a total of 32 dwelling units, designed as the Pacific St Cluster. The area directly above the impacted soil will be redeveloped as a paved parking area. The following potential exposure routes have been indentified: direct contact & inhalation of VOCs from soil and inhalation of VOC from soil vapor. A vapor barrier and SSDS (73' wide *52' deep) will be incorporated into the two buildings closest to the church. The principal components of the SSDS are a layer of gravel beneath the basement slab, a suction pit within the gravel layer, solid-construction piping from the suction pit to an exterior suction fan on the roof and monitoring points through the basement slab. The system has been designed in general accordance with NYSDOH's Guidance for Evaluating Soil Vapor Intrusion in the State of New York, October 2006 (NYSDOH Soil Vapor Guidance), including Section 4.2.2, System-specific recommendations.Several types of composite cover systems will be employed to prevent direct contact with and mitigate inhalation of residual petroleum constituents.

Remarks: Contaminated soil found at construction site. Cleanup pending assessment and pre-plan.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

CLASSIC IRON DESIGN (Continued) **1016123473**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: U002
Waste name: ACETONE (I)

Waste code: U031
Waste name: 1-BUTANOL (I)

Waste code: U107
Waste name: 1,2-BENZENEDICARBOXYLIC ACID, DIOCTYL ESTER

Waste code: U112
Waste name: ACETIC ACID ETHYL ESTER (I)

Waste code: U140
Waste name: ISOBUTYL ALCOHOL (I,T)

Waste code: U154
Waste name: METHANOL (I)

Waste code: U159
Waste name: 2-BUTANONE (I,T)

Waste code: U161

INDUSTRIAL FINISHING PROD INC (Continued) **1000428069**

Waste name: METHYL ISOBUTYL KETONE (I)

Waste code: U220
Waste name: BENZENE, METHYL-

Waste code: U239
Waste name: BENZENE, DIMETHYL- (I,T)

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

OSHA ESTABLISHMENT

FIS (New York - Facility Information System) is New York's Department

INDUSTRIAL FINISHING PROD INC (Continued) **1000428069**

of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	06/30/08-Zhune spoke to Mr. Anthony from NYC DEP Hazmat (646) 584-4925. He said the roof from a Wood and Metal finishing company located at 465 Logan Ave, Brooklyn NY. collapse. The water pipes broke. There are a shine of oil on the surface of the water and strong petroleum odors outside the building. I responded to this site. I could not get inside the building. The owner Mr. Gus Cristodero (917) 270-3425 told me odors came from lacquer thinner that they use to manufacture products for wood. The oil tanks are underground tanks and nothing happened in that area.As per Randy this spill is closed and refered to DEP Hazmat07/08/08-Zhune spoke to Sandy from Industrial Finishing Products Inc. (718) 277-3333. She said spill was cleaned up by staff from the company. She will send papers.07/24/08 Industrial Finishing Products, Inc. sent the report 07/8/08.Due to a roofing collapse on june 30th and substantial exposure of materials we carry, we were charged with the task of either cleaning up the hazardous fluids ourselves or outsourcing it to a cleanup company.We took the initiative in cleaning up ourselves and have successfully completed the undertaking. To date, we have pumped out all of the hazardous fluids, containerized them and had them transported and disposed of by a hazardous waste disposal company, Action Environmental Group.We have secured the building by repairing the roof and creating a scaffold around its entirety thereby ensuring the safety of pedestrians as well as our employes.Spill Closed
Remarks:	roof collapseProducts outside are wood finishing products, also stored inside. All crews are un scene.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FILTA CLEAN CO INC THE (Continued) **1010566214**

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

BROOKLYN, NY 11233

FINDS:

Registry ID: 110019099544

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

AIRS (AFS):

DEC Memo:	12/18/06 - Raphael Ketani. Contaminated soil was found on 12/8/06 after the property was sold. The seller, Linda Calabrese (718) 241-9134, was forced to clean up the site. The site is an auto repair shop. There is no PBS case. I received the phase II report on 12/15/06. The report was generated by Vertex Environmental Services, Inc. (781) 952-6000. The report states that the site has been used as an auto repair shop since the 1940s. The 15 borings drilled encountered historical waste just below the concrete floor of the site which consisted of wire, railroad ties, gravel, asphalt, rubber, and brick. The site sits at approximately 65 feet above sea level, according to the Site Locus Map, Figure 1. Groundwater should be at about 10 feet above sea level in this area, according to published reports from the U.S. Geological Survey. However, the site is about 55 feet above the water table. Strong petroleum odors with PID readings of 75 to 487 ppm were encountered in the field at borings B-2, B-5, B-9, B-12, and B-14, with lesser odors at B-13. There were VOCs in the soil samples from B-5 (6) and B-13 (7), but they were well below the TAGM RSCO standards. Soil samples from borings B-3, B-9, B-13, and B-14 had many PAH hits ranging from several thousand PPB to a high of 41000 ppb. Most of these hits are the benzo series of PAHs, with anthracene, chrysene, flouranthene,

AUTO REPAIR SHOP (Continued) **S108296635**

indeno(1,2,3-c,d)pyrene, phenanthrene, and pyrene. The great majority of the PAH hits exceeded the TAGM standards. My analysis of the phase II investigation report is that the analytical environmental impact of car repair work that has taken place at the site is minimal and does not require remediation. The rubber, wire, railroad ties, brick, and asphalt are historical fill that is similar to historical fill that has been buried over the past century in many parts of NYC. During the 1940s, the former owners may have buried junked car parts and debris on site. The site may not have always been paved as it is now. They probably spilled some oil and gas on the ground at that time. Hence the odors from some of the soil samples. However, the water table is 55 feet below the site. Soil samples from sites nearby have indicated that this auto repair shop probably sits atop a thick layer of boulder glacial till. The till consists principally of a mixture of sand, silt, and clay, with some cobbles and boulders. This would explain the drillers hitting refusal at depths of from 3.5 feet to 8.5 feet. The thick glacial till also has good a absorbtive capacity for oil and other contaminants, and so the groundwater is probably not affected by the spillage at this site. Lastly, the high PAH hits at four of the boring sites are probably from buried incinerator ash or coal combustion ash, as most of the analytes are of the benzo series with chrysene and pyrene - all are combustion products. The boring logs B-9 to B-14 even describe blackish soils, which is suggestive of the presence of ash. In summation, the phase II report was found to be adequate for describing the investigation and for serving as a report of the site conditions. The only problem is that the waste oil tank is unregistered. I called up Ms. Calabrese (718) 241-9134 and told her she had to get the tank registered. She asked me to send her the form. I sent the form out today. 1/5/07 - Raphael Ketani. Ms. Calabrese called to ask whether the waste oil tank registration had gone through. I looked it up in the PBS database and found registration #2-610441 for a 275 gal. waste oil tank at the site. I told her the tank registration was in-place.Based upon the phase II investigation report generated by Vertex Environmental Services and the PBS registration, I am closing the spill case.1/23/07 - Raphael Ketani. I received a call from Diego Pinzon of HSBC Bank (718) 297-4169. He said that the bank was holding money in escrow for Ms. Calabrese and wont release it unless they receive a letter from the Department stating that the site has been cleaned up. I told Mr. Pinzon that I will send an NFA letter. He said that his address was HSBC Bank, 147-02 Hillside Avenue, Jamaica, 11435. Linda Calabrese's address is 2220 E. 71 Street, Brooklyn, 11234. I sent the NFA letter.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIPPLE"100 GAL TANK, HPD SITEMILLLER ASSOCIATES DOING WORK FAX# 845-265-4418SENT PBS INFO8/28/2002 This is the site of an old gas station. Ten UST's were removed. As per the submittal, during the course of excavation one 150 gal. waste oil tank was damaged. The photos included in the "closure report' submitted July 22,2002 reveal shots of the excavation prior to the removal of the concrete enclosed tanks. There are no photos of the soil from under the tanks.The lab results indicate slightly elevated SVOC's in two of the thirteen samples collected. DEC requested one groundwater sample to be analyzed prior to issuing a no further action letter for this site. A submittal dated August 7,2002 included 6 boring logs dated January

2131 BERGEN ST (Continued) **S106002952**

2002. These borings are of minimal use due to the lack of any corresponding lab data or even any PID readings.Mr. Jon Dahlgren does not seem to think a additional work is necessary. I explained to him at least twice that it was necessary. MT12/27/2002 IMPACT ENVIRONMENTAL REMOVED THE REMAINDER OF THE PETROLEUM IMPACTED SOILS , SAMPLED, SUBMITTED PHOTO DOCUMENTATION, ALL SAMPLES TESTED BELOW TAGM 4046 CRITERIA. A NO FURTHER ACTION LETTER WAS ISSUED.

Remarks: CALLER DOING SITE WORK UNCOVERED TANK. CONTAMINATED SOIL.

Hazardous Waste Summary:
Waste code: NONE
Waste name: None

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE

NARVAEZ CLEANERS (Continued) **1000429305**

MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	No CSL was sent to this owner. The consultant has already done most of the work necessary and they said they would send in the results when the end point sample results come back from the lab.03/06/06 Sharif Rahman- I tried to call Nelson Abramas,(908)947-0274 and left messege to his voice mail to follow up about the status of the vacant lot.04/06/06 Sharif Rahman- CSL was sent via mail and facsimile toNYC Economic Development Corp.110 William StreetNew York, NY 10038Attn: Kay Zias, Fax:(212)312-3989.04/25/06 Sharif Rahman- Rec'd tank closure report from Metcalf & Eddy of New York,Inc. One 550 gallon #2 UST was removed from the site. Approx. 12 tons of petroleum contaminated soil was removed from the site.No VOC was detected above TAGM limit in the post excavation end point samples.Minor exceedances of SVOC are similiar to the fill material observed during the Phase II site assesment.NFA required.
Remarks:	While removing an underground tank found holes in the tank. The contaminated was stock piled and samples have been taken. More clean up will be done depending on the test results. Excavation was lined

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	06/22/05- SR// Sharif spoke with Stephen Genovise of Consolidated Bus Comp.They hired Energy Tank & Environmental services, Mark Turoff (718-257-8470) to clean up the spill. They will send manifest to DEC.10.05.05 SR// Sharif received and reviewed the closure report.The impacted sidewalk and street were pressure washed using surfactant.The area along the fence, which is approximately 3 feet from fence to the asphalt pavement was dug out. Six end point samples were taken. Results show minor excedence above TAGM. NFA required at this point.
Remarks:	ECO - saturated ground - oil spilled from turned over 55 gal drum containers flowing into sidewalk and into street.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"PERFORMED INSPECTION ON 11/26/01 WITH TIBBE. RESIDENTIAL NEIGHBORHOOD. VACANT LOT USED AS MAINTENANCE YARD. TWO OIL TANK TRUCKS AND ONE BUS. IMPROPER STORAGE OF WASTE OIL AND SPILLS. IMPROPER DISPOSAL OF SOLID WASTE. SUBMITT REPORT TO ECO FOR LEGAL ACTION.1/24/02 Tibbe and ECO Sean Dezalt revisited site. File information added: Result, 4 tickets were issued, failure to report spill, illigal disposal of lead acid batteries, failure to provide and maintain proper used oil retention, unlawful disposal of oil.6/27/02 Reassigned from Rossan to Rommel6/28/02 Department visited site again, apparent that DEC's requirements have been ignored.8/8/02 Return receipt letter sent to James Schula, J&S Fuel, deadline of 8/31/02 to submit documentation of work performed.Letter returned to sender(DEC).12/8/05 Checked file against property owner/resident list. Found James Shuler to reside at 543 Pine Street Brooklyn. Resend new letter to James Shuler with deadline of 12/31/05 for submittal. Shuler phone numbers (718) 827-6672 and (718) 647-2315. DE03/29/06 No repsonse to letter with deadline (letter was sent certified and delivered). Site should be referred for legal action. DEAustin - 9/30/09 - Spill project assignment transferred from Albany staff(Eaton) to Ketani, for further review and action. - end 10/7/09 - Raphael Ketani. Presently, there are no E-docs.The spill took place on 11/20/01 and consisted of the illegal disposal of auto batteries on the vacant lot next door to J&S Fuel Co. Also, the lot was being used as a maintenance yard. Several vehicles were on the lot - 2 trucks and 2 buses. There were also two drums and garbage. Oil was also handled in an improper manner, which resulted in spillage onto the vacant lot.The site needs to be visited and people at the site need to be contacted.12/3/09 - Raphael Ketani. I attempted a site visit. I found 214 Crystal Street, but could not locate the vacant lot where the spill had taken place. The address, and the other houses in the neighborhood, are older private homes which appear to have been built in the 1920s or the 1930s. There was no vacant lot nearby. I drove around the neighborhood, but could not locate a vacant lot, nor a lot which had been fairly recently built on. I could not locate the J&S Fuel Co., or anything that looked like an industrial/commercial site that may have contained an oil

J&S FUEL CO. (Continued) **S105234927**

distribution company. 12/4/09 - Raphael Ketani. I spoke to Mark Tibbe, Geological Techinician III of Unit B, regarding the site. He said that when he visited the property, it was a corner vacant lot. He said that was all he could recall. He had no records for the spill case.I asked Lieutenant Richards of the ECOs whether he could look up any information for me regarding the case and the tickets. He checked the computer records, but told me that they only go back to 2004.I e-mailed ECO Shawn Dussault in Region 7 and asked him whether he had any records and could tell me where the exact location of the site is.12/8/09 - Raphael Ketani. To date, I have not received any phone calls, nor e-mails from ECO Dussault. I tried calling Beatrice and Luis Gaston (718) 277-4886, but I kept getting a busy signal.I checked the New York State corporation database for J&S Fuel Oil Corp. It is listed as existing at 543 Pine Street, which is the home of Mr. Shuler. I called up the address on Google Earth, and viewed the satellite photo they had for the area. There were no empty lots at the corner. It is possible that the library at the corner of Crystal Street is at the former empty lot site. However, when I saw the building during my site visit, it didn't look fairly new. So I don't know where this lot is. I contacted James Shuler (718) 827-6672 and asked him about the site and J&S Fuel Co. He said that his brother, George, had rented a lot in the area, but he passed away. He said that he knew nothing about what his brother did on the lot, nor the location of the lot, and he said that he had no connection to it. Even though the earlier case notes suggest that Mr. Shuler is related to the case and may be one of the owners of the oil company, he was not forthcoming with additional information. Therefore, I do not have enough location data in order to find the site of the spill, and no one is able to supply me with documentation or additional information regarding the spill site. Therefore, I am closing the spill case.

Remarks: CALLER REPORTING THAT BUSINESS NEXT TO ABOVE LISTED VACANT LOTARE ALLOWING VEHICLES TO LEAK MATERIAL ONTO PROPERTY. NOTIFIERIS REQUESTING TO SPEAK TO REGIONAL OFFICE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Sangesland spoke to Petro office. Tank is leaking and homeowner has patched it with silicone gel. Tank is still leaking. Homeowner does NOT want pump out, temp tank or new tank installed. Petro thinks a DEC visit is needed. - 03/18/1110/31/11-Hiralkumar Patel. case transferred from DEC Hasan to DEC Patel.11/04/11-Hiralkumar Patel.1:34 PM:- spoke with property owner (347-327-3833). she mentioned that there was no spill from the tank. site has one 275 gal AST on legs and no oil found on floor underneath the tank. no odors in building. due to financial issue, tank is currently empty and she is using electric heater.based on available information, case closed.
Remarks:	homeowner told tech (mike fillumero) that he didn't want to do repair - ongoing leak - no cleanup or repair to be done - homeowner put silicone and oil based paint and still bubbling up at silicone

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Registry ID: 110004355821

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Phone: (631) 234-4280
DEC Memo: 06/16/06-Hiralkumar Patel. Left message for matt.06/19/06-Hiralkumar Patel. Left message for matt.from property shark, owner of property is:Talassazan, Abraham401 Barbey StBrooklyn NY 11207-3703received call from John Schretzmayu from Associated Environmental. they have submitted samples to lab for analysis and will get results probably by end of this week. Matt is currently on vacation and will be back on Mon. June 26, 2006. once they have lab results, will forward to the Department.06/20/06-Hiralkumar Patel. Received message from Matt. he is on vacation. he has took samples and will send results once he has it.07/13/06-Hiralkumar Patel. Received tank closure report from Matt. abstract:- removed two 550 gal USTs, one single piston underground hydraulic lift and repair bay area- groundwater was not encountered during tank closure activities- tanks were filled with gasoline contaminated water at time of removal- total of approx. 1100 gal of gasoline contaminated water removed from tanks- no evidence of detterioration such as holes or pitting noted in any of the USTs.- no evidence of contamination noted in soil surrounding the two USTs.- there were suspect petroleum odors noted in teh soil below hydraulic lift as well as repair bay area.- approx. 15 cubic yards of contaminated soil had been excavated- no VOCs found in any samples- little high SVOCs found in samples from Tank no. 1 area.- site is to be excavated as part of redevelopment activities, any residual contamination would most likely be removed during the excavation of the basement for new building.report doesn't include waste disposal manifest as contaminated soil removed on 07/11/06 after this report made.spoke with Matt. soil samples were taken at about 15 ft depth (10 ft in tank area). he will send disposal manifestts as he gets it. asked Matt for owner's contact information as site has little high SVOCs and site will be redeveloped. the department requires to install vapor barrier during redevelopment and owner/consultant has to submit letter about installation of vapor barrier before this case could be closed.SEE E-DOCS.07/14/06-Hiralkumar Patel. recieved call from Frank Tehrani (Ph.: 917-406-0073, FAX: 516-482-2269), owner of property. he will send letter to the department stating that he will install vapor barrier when he builds new building.07/18/06-Hiralkumar Patel. REceived letter from Mr. Tehrani. they will install vapor barrier during redevlopment and will remove all contaminated soil.based on available information, case closed.07/20/06-Hiralkumar Patel. REceived call from Mr. Tehrani. he requested NFA letter.07/21/06-Hiralkumar Patel. received message from Eial Grrtz (Ph.: 718-268-9193, FAX: 718-268-9194), attorney of purchaser. he requested NFA letter.NFA letter sent to Mr. Tehrani at following address. letter faxed to Mr. Tehrani, Mr. Grrtz and Matt.Frank Tehrani172-13 Hillside AveJamaica, NY 11432
Remarks: While in process of removing two tanks encased in concrete ... no holes or signs deterioration... caller discovered a single piston hydraulic lift and an underground repair area buried in the soil. Release was not caused by the tanks but the other items found underground. 15 yds. of contaminated soil were removerd and stock piled and covered with a tarp. Samples were taken and will be sent to the lab tomorrow.

Tank Info:

Tank Number:	001
Tank Id:	34734
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G02 - Tank Secondary Containment - Vault (w/access)
J02 - Dispenser - Suction Dispenser
B01 - Tank External Protection - Painted/Asphalt Coating
I04 - Overfill - Product Level Gauge (A/G)
C03 - Pipe Location - Aboveground/Underground Combination
E00 - Piping Secondary Containment - None

P.S. 332 (Continued) **U003394312**

F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
L00 - Piping Leak Detection - None

Tank Location:	3
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	02/02/1967
Capacity Gallons:	10000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported

Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Contact Phone: (908) 604-2291
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"Contaminated Soil Letter sent to consultant.1/28/2003-Vought-Spoke to David Schentov (landlord not owner-718-376-5400). Owner contact info is Sutter Avenue LLC 1946 Coney Island Avenue, Brooklyn NY 11223.2/4/04-Vought-Received message from Patricia Badding (908-604-2291). Vought returned call and left message to call DEC.See spill #0304092, tank test failure. Rommel10/18/04-Vought-Reviewed Underground Storage Tank Closure Report (Environmental Management)dated May 14, 2004. Site currently occupied by a automobile repair facility, car wash and detail shop. "Two new 8000-gallon gasoline USTs were installed subsequent to tank removal".1/25/06 - Obligado - Reviewed UST closure report. 10 550 gallon USTs, 1 4000 gallon UST removed. tanks and dispenser islands excavated, totatl of 375 tons of contaminated soil removed. 15 soil samples collected and 1 gw sample. Ground water at 16 ft bgs. Soil had impacts at 2 locations: S14 sidewall north of 550s had 1500 benzene, 6600 toluene, 9400 ethylbenzene, 62000 xylenese, 4000 MTBE and at S10 at base with 80 ppb benzene. S15 had metal hits of 11.8 chromium and 0.61 Mercury. Ground water sample collected east of S14 showed ND. Requests NFA based on clean ground water sample. GW sample was northeast of tankfield, according to DER10, gw sample should be in or downgradient (south) of tankfield. Sent letter requiring downgradient sample. 2/3/06 - Obligado - Received returned letter - no such number, unable to forward. 2/23/06 - Obligado - Spoke with Patricia Badding, (Environmental Management) 908-604-2291. Told her the Department is requiring sample downgradient of the tank field - south. Said she will inform client.10/25/06 - Obligado - Sent another letter to different address. Due date for 12/29/06.1/3/07 - Obligado - Left message for Zekria Manely (718) 827-8622. Told to call DEC. Zekria Manely called me back. I told him they needed to do additional investigation due to contaminated soil that was found. I told him I would send him a letter and he would have 90 days to complete the investigation.1/8/07 - Obligado - Delivery confirmation. Due date is April 8, 2007.4/13/07 - Obligado - Investigation report is overdue. Called Zekria Manely, left message to call DEC. 4/13/07 - Obligado - Received phone call from Zekria Manely. He has not performed any work, said he was trying to put the money together. He said he would contact his contractor and he would call me back on Monday to tell me when I could receive the report.4/16/07 - Obligado - Phone call from Zekria Manely. He was not able to get in touch with his environmental contractor yet. He said he will try again to get in touch this week and call me back in the next few days.11/16/07 - Obligado - Spoke with Patricia Badding. I forwarded the letter requiring the subsurface investigation. 2/15/08 - Obligado - Email from Patty. The investigation is scheduled for 2/18/08. She sent a map with proposed boring locations. 5 borings are proposed in the vicinity of the former tanks and dispensers. I sent email saying the locations were fine and advising markout of subsurface utilites/structures prior to drilling.9/15/08 - Obligado - Reviewed Subsurface Investigation Report, dated 7/15/08. 6 geoprobe soil borings. Soil and gw samples collected, and contamination in excess of TOGS groundwater standards and Soil Cleanup Objectives was found in several borings. Will send Stipulation Agreement.9/29/08 - Obligado - Sent STIPULATION agreement to Euclid Enterprises. Deadline of 30 days for signature10/2/08 - Obligado - Delivery confirmation on 9/30/08. - Due date is 10/30/08.12/12/08 - Obligado - Called Mr. Zekria Manely, regarding

GAS STATION (Continued) **S103941028**

the Stipulation Agreement. He said he did not recall the letter. He said he will find the letter and speak to Ms. Badding (consultant) and call me back by next Friday - 12/19/09.12/22/08 - Obligado - Spoke with Mr. Zekria Manely. He said he did not receive the letter. It may have been received by one of the businesses operating at the 1249 address. I told him I would resend a Stipulation Agreement. I would also fax to him as well.12/29/08 - Obligado - Resent letter and stipulation to Mr. Manely. Faxed letter to (718) 235 - 2178. 12/31/08 - Obligado - Delivery Confirmation. Signed STIPULATION due 2/2/092/5/09 - Obligado - Called Mr. Manely regarding the Stipulation. He said he will sign and fax the Stipulation Agreement immediately. I told him he needs to send the original as well and he said he would.2/13/09 - Obligado - Called Mr. Manely. I told him I have not received the Stipulation yet. He said he faxed it. I told him I did not receive it. I gave him my fax number again and told him to mail the original by 2/20/09. He said he will fax the copy tomorrow and he call to confirm on Tuesday that I received it. 3/3/09 - Obligado - Received the signed Stipulation.3/3/09 - Obligado - STIPULATION executed by Mattei3/5/09 - Obligado - Fazed the dually signed agreement to Mr. Manely. 4/7/09 - Obligado - Workplan received.5/18/09 - Obligado - Reviewed workplan proposing 6 monitoring wells. Called Patricia to discuss boring locations. She wills submit a revised workplan.5/20/09 - Obligado - Received revised workplan. Sent approval letter to Mr. Manely. CC to Patricia Badding.11/23/09 - Obligado- Called Patricia Badding about the overdue report. She said she could get it to me next week. 1/15/10 - Obligado - Reviewed Remedial Investigation Report submitted by EMS. 6 additional wells installed. 2 of the 6 wells had elevated VOCs in excess of Standards. Report recommends additional delineation. I sent a letter to Mr. Manely requiring submission of work plan for installation of 4 additional wells to complete delineation. CC to EMS Badding via email.1/25/10 - Obligado - Received delivery confirmation receipt. Letter was received by Mr. Manely on 1/22/10. 4/21/10 - Obligado - I reviewed the IWP for addtiional 4 wells. 3 wells were proposed across Sutter Avenue. 1 upgradient well also proposed. I sent approval for the work plan to Mr. Manely, with a cc to Patty Badding.4/6/11 - Obligado - I emailed Patricia to inquire about the progres at this site. 4/7/11 - Obligado - According to Patricia, the report is completed, except for maps. She should have the report to me early next week.3/26/13 - Obligado - I reviewed the investigation report. 4 wells were intalled, 1 upgradient, 3 downgradient. One downgradient well MW8 had exceedences of 70 ug/L benzene and 120 ug/L total VOCs. No soil impacts were detected off-site. MW2 had 2046 ug/L BTEX and MW6 had 896 ug/L BTEX. 2011 ground water results were significantly reduced from initial groundwater sampling in 2009, with 5200 ug/L BTEX in MW2 and 3800 ug/L in MW6. I sent a letter to Mr. Manely approving the investigation and requiring a quarterly groundwater monitroing program to monitor gw trends and to ensure the plume is not migrating further. The next QMR is due within 90 days.7/16/13 - Obligado - I received the groundwater monitoring report. Total BTEX in MW2 was 570 ug/L, which is a dramatic decrease from the initial 5,200 ug/L in 2009. That is a 90% reduction. MW6 was 408 ug/L BTEX, which is down from 3200 ug/L in 2009. Also a 90% reduction. BTEX concentrations in MW8 offiste reduced to 2.6 ug/L. This indicates the plume is shrinking. Following UST source removal the plume appears to be naturally attenuating and rather quickly. I anticipate this plume to continue to attenuate therefore additional

GAS STATION (Continued) **S103941028**

remediation is not warranted. I notified Patricia Badding that additional monitoring is not required. I sent a Spill Closure letter to Mr. Manely.

Remarks: caller uncovered tanks and found contaminted soil

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Site name: MTA NYCT - VAN SICLEN AVENUE STATION
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 09/24/1998
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: EPA

Updated By: BXANDERS
Site Description: Location:The site is specifically known as 1199-1221 Sutter Avenue in a mixed residential / commercial area of Brooklyn. Site Features: The site occupies about half of a city block on the north side of Sutter Avenue. Approximately one-half of the site is occupied by a one-story building divided into five separate units used for commercial and office purposes. A dry cleaner establishment formerly occupied the eastern-most unit. The former location of the dry cleaner is presently occupied by a self-service laundromat. The laundromat unit is underlain with a basement segmented with utilities, storage and several rooms. The other units also have basements. The adjacent unit is a grocery store that uses their basement as a warehouse.Current Zoning/Use: The site is within an R5 (residential) zoned area. The site is zoned C1-2 (commercial) as are the properties along the north side of a seven-block stretch of Sutter Avenue.Historic Uses:The structures on the site were constructed in 1957 and were the original development on the property. A dry cleaning facility had operated on the site for many years.Site Geology and Hydrogeology:The property is located within the Pavement and Buildings-Flatbush-Riverhead Series Soil Map Unit, which is described as anthropogenic urban fill overlying glacial out wash deposits and characterized as a sandy loam. The groundwater table is approximately 13 feet below grade and is characterized as Class GA indicating it as a potential source of potable water. Groundwater flows south. Groundwater is not utilized as a source of potable water at site.
Env Problem: Nature and Extent of Contamination:A limited Phase II conducted in 2009 found the dry cleaning solvent tetrachloroethene (PCE) and its daughter products trichloroethene (TCE) and cis-1,2-dichloroethene (DCE) at elevated concentrations in groundwater. Permanent monitoring wells were constructed in 2009 and sampled before (August 2009) and after (November 2009) a remedial action consisting of potassium permanganate injections into on-site groundwater. The data are inconclusive as to the effectiveness of the injections.A site characterization investigation was conducted by Associated Environmental Services under NYSDEC oversight in July 2011. PCE and its daughter products remain above groundwater standards in the preexisting monitoring wells constructed during the Phase II investigation. PCE concentrations ranged from below its standard of 5 ppb to a maximum concentration of 470 ppb in MW-4. MW-4 is located in the basement of the former location of the dry cleaner. TCE and DCE were present in some wells and non-detect in others. The new down-gradient monitoring well (MW-5) located across Sutter Avenue had PCE, TCE and DCE at respective concentrations of 98 ppb, 5.2 ppb and 9.8 ppb.The investigation found tetrachloroethene (PCE) and trichloroethene (TCE) in indoor air in the basement of the laundromat (former dry cleaner). Elevated concentrations of PCE, TCE,

1199 SUTTER AVENUE (Continued) **S109583525**

cis-1,2-dichloroethene (DCE) and vinyl chloride were observed in sub-slab vapor. The indoor air sample had PCE and TCE at 68.5 micrograms per cubic meter (ug/M3) and 1.27 ug/M3 respectively. Respective sub-slab concentrations of PCE, TCE, DCE and vinyl chloride were 428,000 ug/M3, 9,730 ug/M3, 4,220 ug/M3 and 795 ug/M3. The elevated concentrations of these chlorinated VOCs in soil vapor present a significant threat to human health and indicate the presence of an on-site source. Also present in the sub-slab vapor were chloroform, dichloroethene, ethylbenzene, freon 113, styrene and toluene.The highest concentrations of contaminants in groundwater were found in a well constructed in the laundromat. PCE, TCE and DCE were dtected at the the respective concentrations of 470 parts per billion (ppm), 14 ppb and 4.3 ppb.Soil data are limited, but two soil borings behind the laundromat had PCE and TCE above their respective unrestricted soil cleanup objectives (USCOs) parts per million (ppm). DCE was also detected above its USCO in one boring. However, all were well below the commercial SCOs More soil data are needed for an accurate analysis of soil contamination at the site.Significant Threat:

DEC Memo:	6/17/2009 Sangesland reviewed Phase 2 report (see e-Docs) - Summary below.Krimgold reviewed these notes and agrees with Phase 2 report Recommendation plan.Report Summary:Boring B7 contained 5100ppb of Tetrachloroethene, over the RSCO of 1400ppb.Several GW samples were above limits for VOCs, PCE, Methylene Chloride, Trichloroethene and cis-1,2-Dichloroethene - see report for detailsReport Recommendations:...it is recommended that an injection program utilizing Potassium Permanganate...be implemented... In addition shallow and deep monitoring wells should be installed in several strategic locations to monitor the effectiveness of the injection event.6/17/2009 - Krimgold gave approval for Sangesland to give direction to Associated Environmental to go forward with the Recommended Plan.4/21/10 (JOC) - re-assigned to Joe O'Connell;- System is prompting for 17-1743 notification determination: This event was not reported pursuant to 17-1743, nor does it qualify for it. "No" was selected in the system to resolve the prompt;- P-site memo was distributed March 24, 2010; no responses to date; proceeding with P-site owner letter.7/15/10 - the circumstances that were being evaluated under this spill number will be further evaluated under SSF as site #224141. No further tracking of activities will occur under this spill number. Administratively closed. See site #224141 for further information. (JOC)
Remarks:	CALLER STATES THAT THEY GOT TEST RESULTS BACK SHOWING CONTAMINATED GROUND WATER AND SOIL. CLEAN UP PENDING.

Update By:	JAMORAS
Site Description:	Location:The site is specifically known as 1199-1221 Sutter Avenue in a mixed residential / commercial area of Brooklyn. The site is bounded by Sutter Ave. to the south, Chestnut St. to the east, residential to the north and Crystal St. to the west.Site Features: The site occupies about half of a city block on the north side of Sutter Avenue. An asphalt parking lot covers the northern portion of the site and a single-story building is located along the southern portion of the site. The building is underlain with a basement segmented for each retail/office unit with utilities, storage and service rooms. Current Zoning/Use: The site is within an R5 (residential) zoned area. The site is zoned C1-2 (commercial) as are the properties along the north side of a seven-block stretch of Sutter Avenue.Historic Uses:The structures on the site were constructed in 1957 and were the original development on the property. Spanish American Dry Cleaners occupied the eastern-most unit from September 1988 to May 1995. The former location of the dry cleaner is presently occupied by a self-service laundromat. Site Geology and Hydrogeology:The property is located within the Pavement and Buildings-Flatbush-Riverhead Series Soil Map Unit, which is described as anthropogenic urban fill overlying glacial out wash deposits and characterized as a sandy loam. The groundwater table is approximately 13 feet below grade and is characterized as Class GA

1199 SUTTER AVENUE (Continued) **S109583525**

indicating it as a potential source of potable water. Groundwater flows south. Groundwater is not utilized as a source of potable water at site.6/12/13- DEC signed the Brownfield Cleanup Agreement for this site.

Env Problem: Nature and Extent of Contamination:A limited Phase II conducted in 2009 found the dry cleaning solvent tetrachloroethene (PCE) and its daughter products trichloroethene (TCE) and cis-1,2-dichloroethene (DCE) at elevated concentrations in groundwater. Permanent monitoring wells were constructed in 2009 and sampled before (August 2009) and after (November 2009) a remedial action consisting of potassium permanganate injections into on-site groundwater. The data are inconclusive as to the effectiveness of the injections.A Site Characterization investigation was conducted by Associated Environmental Services under NYSDEC oversight in July 2011. PCE and its daughter products remain above groundwater standards in the preexisting monitoring wells constructed during the Phase II investigation. PCE concentrations ranged from below its standard of 5 ppb to a maximum concentration of 470 ppb in MW-4. MW-4 is located in the basement of the former location of the dry cleaner. TCE and DCE were present in some wells (up to 14 ppb and 5.8 ppb respectively) and non-detect in others. The new down-gradient monitoring well (MW-5) located across Sutter Avenue had PCE, TCE and DCE at respective concentrations of 98 ppb, 5.2 ppb and 9.8 ppb.The Site Characterization found tetrachloroethene (PCE) and trichloroethene (TCE) in indoor air in the basement of the laundromat (former dry cleaner). Elevated concentrations of PCE, TCE, cis-1,2-dichloroethene (DCE) and vinyl chloride were observed in sub-slab vapor. The indoor air sample had PCE and TCE at 68.5 micrograms per cubic meter (ug/M3) and 1.27 ug/M3 respectively. Respective sub-slab concentrations of PCE, TCE, DCE and vinyl chloride were 428,000 ug/M3, 9,730 ug/M3, 4,220 ug/M3 and 795 ug/M3. The elevated concentrations of these chlorinated VOCs in soil vapor indicate the presence of an on-site source. Also present in the sub-slab vapor were chloroform, dichloroethene, ethylbenzene, freon 113, styrene and toluene.Soil data are limited, but two soil borings behind (to the north of) the laundromat had PCE and TCE above their respective unrestricted soil cleanup objectives (USCOs). DCE was also detected above its USCO in one boring. However, all were well below the commercial SCOs More soil data are needed for an accurate analysis of soil contamination at the site.

Health Problem: Direct contact with contaminants that may be present in the soil is unlikely because the site is covered with building foundations and concrete pavement. Contaminated groundwater at the site is not used from drinking or other purposes and the site is served by a public water supply that obtains water from a source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn my move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Soil vapor intrusion sampling has indicated that mitigation is warranted for the on-site Laundromat. However, indoor air levels of contaminants of concern in the Laundromat are not above guidance values. There is also a potential for vapor intrusion into commercial spaces adjacent to the drycleaner. Additional investigation is warranted to evaluate the potential for off-site vapor intrusion and subsequent exposures in nearby structures.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Date form received by agency: 07/31/2001
Site name: NYCHA - HOWARD HOUSES
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KOLLEENY"11/04/05: This spill transferred from J.Kolleeny to S.Kraszewski.12/23/05: Two spills for this site. Tanks is still in place and being used. Appears that a MW was installed, not sure when. No MW data is available. - SK07/07/06: NYCHA summary report states a tank test failure caused by a man way gasket leak occured. Summary states no recovery system or MWs on-site and soil/GW conditions are unknown. No mention of any investigative work performed, but yet NYCHA still recommends closure based on nothing, apparently. - SK02/06/07 - J.Kann - site reassigned from S. Kraszewski to J.Kann.3/10/11: J.Kann - Investigative work plan submitted on 3/3/11.8/25/14: J.Kann - Reviewed file. Tank installed in 1971. Failed TTT in 1997. Leak around tank lid and petrometer bung hole. Tank repaired, retested and passed. Tank failed again in 2002. Manway gasket repaired. Tank passed in 2003, passed in 2007 and passed in 2012. Given this information, NFA and spill closed.
Remarks:	isolate repair retest

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: U134
Waste name: HYDROFLUORIC ACID (C,T)

Violation Status: No violations found

FINDS:

Registry ID: 110001590029

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: NONE
Waste name: None

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Registry ID: 110001574332

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department

JUNIOR CLEANERS (Continued) **1004570738**

of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Date form received by agency: 04/23/1982
Site name: LEGION LIGHTING CO INC
Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 04/23/1987
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

FINDS:

Registry ID: 110001602169

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

LEGION LIGHTING CO (Continued) **1000259298**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

OSHA ESTABLISHMENT

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	Old Gas station site has a long history of spills, but all are closed out as of 2013. Tanks are being pulled and contaminated soil was found.DEC will work with consultant to follow up on tank removal and soil cleanup.6/7/13- William Simmons (Senior Project Manager /Geolist) from ECS sent the UST Closure Summary Report dated June 4, 2013.On April 15, through May 20, 2013 Avebtura removed the entire UST system from the southeastern portion of the site that consisted of five (5) 4000-gallon double-wall fiberglass gasoline USTs, and all associated piping, vent lines, product dispensers, dispensers islands, a concrete tank pad mat, canopy footing, and a car wash structure.ECS collected seven(7) post-excavation sidewalls samples from the excavation around the perimeter of the UST grave at 10-12 fbg and fifteen (10) post excavation base samples from 14-15 fbg. The soil analiytical results of the seventeen samples indicated no VOCs above the acceptable limit.Seven (7) post-excavation soil samples were collected from the final depths of the dispenser/canopy excavations. The soil analtytical results of the seven samples indicated no VOCs above the acceptable limit.ECS collected soil samples every 10 linear feet along the entire piping tranches. Based on no evidence of any release associated with the former product piping or vent lines, no samples were selected for laboratoy analysis.Two concrete holding pits 7 feet wide, 10’ in lenght and 7’ deep, constructed end to end and use to contain water from the former carwash system were removed. Six (6) post-excavation soil samples were collected from 8-9 fbg from directly beneath the former holding pits. The soil analytical result of the six samples indicated no VOCs above the acceptable limit.Groundwater was not encountered at the maximum excavation depth of 14-15 fbg in the tank grave. According to previuos investigation at the site, depth to grounwater is at approximately 30-35 fbg. No groundwater sample required as part of the tank closure. Spill Closed
Remarks:	Tank removal has uncovered impact gravel. Cleaunp will begin after remaining tanks are removed.

DEC Memo: 10/8/09 - Raphael Ketani (duty desk officer). The spill was discovered on 10/7/09 and called in on 10/8/09. Yesterday, staff from Tanknology (C.J. Schultz (800) 666-1215) discovered an interstitial leak and a ullage leak. In both instances, a vacuum could not be maintained. Mr. Schultz told me that they will come back today and do helium testing to try and pin point the location of the failure.The PBS is #2-217980. The corporate address is: Cumberland Farms, Inc., 100 Crossing Blvd., Framingham, MA, 01702, Attn: Angela Pimental. Cumberland's phone is: (800) 225-9702, ext 4494.A TTF letter was sent to Cumberland.11/20/09. J.Krimgold reviewed the letter report submitted by ECS and dated 11/17/09. Based on the report subsequent tests were performed on the tank indicating the ullage and interstitial failure. The contents of thank was evacuated and tank is scheduled for in-place closure at the end of November 2009. Gaging of tank pad wells and groundwater monitoring wells throughout the site shows no change in the tank surrounding subsurface. Case closed.

DEC Memo:	Site relates to an Exxon gasoline station. Initial spill report was a gasoline spill. 3/16/2005 Sangesland received a report from Environemtnal Compliance Services, most of the report deals with MTBE levels.3/16/2005 Koon Tang found that the same spill has been tracked under 9211872. Refer to 9211872 for additional details. - KST
Remarks:	While Tyree was replacing the fill buckets on tanks - soil around the old buckets was contaminated

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

DEC Memo:	01/10/08 - ZielinskiSent a TTF letter to: Property ManagerEast NY Diagnostic and Treatment Center2094 Pitkin AvenueBrooklyn, NY 112078/15/08 received call from Zack of HRP Associates {ph:(518)899-3011; fax: (518)899-8129} requesting a NFA letter. Spill not closed yet. DEC recveived request for closure letter on possibly August 1, 2008. Letter is stamped that it was received 7/32/08. Letter from HRP is dated 7/30/08. Letter states that fill pipe was excavatyed and replaced. No contamination. Tank was retested and passed. However, pressure calculated is more than pressure applied (2.36 psi calculated and 1.7 psi applied). Called Zack back and told him about this. He will look into it. bf8/22/08 On 8/21/08, received letter from Jesse Zahn of HRP Associates. Fill pipe was replaced. No indication of petroleum contamination found. Passing tightness test on 7/21/08. NFA. Sent nfa letter to Jesse Zahn. bf
Remarks:	dry portion leak

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

DER Facility ID:	299826
DEC Memo:	This case stays with Jie Zhao until excavation work is complete and report showing clean endpoints is submitted. If the report shows additional contamination, THEN the case is transferred to the DEC Remediation group (Koon Tang)2/8/2006 - JZ: As per Randy's direction, the spill is transferred to Mr. Patel to follow up.02/14/06-Hiralkumar Patel. Received report from HydroTech Environmental Corp. Abstract of report:- HTE excavated, removed and disposed of four 550-gal and two 275-gal UST.- original scope of work involved the removal of three 1000-gal UST; upon teh commencement of field work it was discovered the tanks acutally included four 550-gal and two 275-gal UST.- upon removal of top concrete layer, each tank and all exposed piping was found to contain oily water.- total of 3,900 gal. of liquid was removed from tanks and disposed of.- olfactory evidence of petroleum contamination and elevated PID readings (>250 ppm) were encountered on top of the tanks.- contaminated soil was placed on top of polyethylene sheeting in the eastern portion of site.- final excavation was approximately 30 feet long, 25 feet wide and ranged in depth from 8 to 10 feet.- no evidence of groundwater was observed to enter the excavation.- end point samples taken and analysed for method 8021 & 8270.- results shows, the compounds m&p-Xylene and 1,3,5-trimethylbeneze were detected in the bottom sample (PE-6) at concentrations exceeding limit.- no VOCs and SVOCs were identified in the remaining samples (EP-1 to EP-5) at concentrations exceeding their respective TAGM#4046 standard.- due to results of EP-6, more excavation done until no visual/no olfactory evidence of petroleum was noted and no organic vapors were detected.- final depth of excavation was 15 feet.End point samples EP-7 & EP-8 did not showed any VOCs and SVOCs.Report consists waste disposal manifest, metal disposal tickets, lab results from York Analytical Laboratories, Inc.Because end point sample are clean, no further action required. case closed.
Remarks:	4 Tank removals, Tank sizes 550 gallons, sampling also shows contamination

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: B007
Waste name: B007

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

NYCSCA I.S. 292 K292 (Continued) **1000833392**

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: P028
Waste name: BENZENE, (CHLOROMETHYL)-

Waste code: P030
Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste code: P092
Waste name: MERCURY, (ACETATO-O)PHENYL-

NYCSCA I.S. 292 K292 (Continued) **1000833392**

Waste code: P098
Waste name: POTASSIUM CYANIDE

Waste code: P106
Waste name: SODIUM CYANIDE

Waste code: U032
Waste name: CALCIUM CHROMATE

Waste code: U103
Waste name: DIMETHYL SULFATE

DEC Memo:	09/06/06-Vought-Off hours spill responder. Vought called Jon Saia and left message to return call to DEC.09/11/06-Vought-Received call from and spoke to John Saia (Gemstar) and spill was called in due to elevated levels of SVOCs. Soil analyticals show exceedences in PAH's. Analyticals show no elevated napthalene. Tank was being replaced and samples were taken from under building. PID readings show non-detect and spill closed by Vought.
Remarks:	soil sample tested for diesel fuel

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

DEC Memo:	Sangesland left a voice message with Steve Frank providing a contact number for Ryan Piper. Soil testing has already been done. Liro needs to discuss the cleanup options. LiRodocumented the removal of one 4,000-gallon unleaded gasoline undergroundstorage tank (UST) at the 73rd police precinct. The removal wasconducted by R.J.I. Mechanical Inc. of Plainview, NY. The Site islocated at 1470 East New York Avenue in Brooklyn, New York. The tankwas being replaced as part of an ongoing New York City Department ofDesign and Construction UST management and upgrade program. The tank was located between a diesel UST and a waste oil UST. Previousrecords indicate the diesel UST and waste oil UST were installed withpermanent tight vertical steel

73RD POLICE PRECINCT (Continued) **S109374647**

sheeting. The gasoline tank was ofsingle wall steel construction with cathodic protection. The pipingconsisted of double-wall fiberglass piping. The tank system had a spillcontainment fill manhole and electronic level control. The tank wasreported out-of-service due to water entering the tank. Based on aprevious subsurface investigation completed at a nearby site, bedrock atthe Site is likely deeper than 45 feet below grade. Depth togroundwater is expected to be approximately 55 feet below grade. Basedon these conditions LiRo infers that any water infiltration into thetank was attributable to surface water infiltration. During the excavation of the tank, the top of the tank was encounteredat approximately 3 feet below the concrete top slab and a concretebottom slab was encountered at approximately 10 feet below groundsurface. Upon inspection, the interior coating of the tank was chippedand the exterior sides of the tank had surficial rust. However, theinterior and exterior of the UST were free of any visual damage such asholes, pitting or degradation. The bottom slab was removed and fourexcavation bottom samples were collected at a depth of 12 feet bgs alongthe centerline of the excavation (see attached figure). The laboratory results (also attached) showed VOC concentrations thatwere below TAGM 4046 criteria. SVOC concentrations for several PAHsexceeded TAGM 4046 criteria and therefore a spill was called in.No water was observed in the excavation. LiRo is preparing a USTClosure report that will be submitted to NYSDEC.DECPiper reviewed data, based on work ot date, this spill is closed.

Remarks: Caller states analytical results showed impacted soil.

GERSHOW RECYCLING CENTER - BROOLYN FACILITY (Continued) **A100294175**

Modified By: BKFALVEY
Date Last Modified: 1/30/2013

Tank Info:

Tank Number: 0002
Tank Id: 209777
Material Code: 0009
Common Name of Substance: Gasoline

Equipment Records:

A00 - Tank Internal Protection - None
D11 - Pipe Type - Flexible Piping
G01 - Tank Secondary Containment - Diking (Aboveground)
J02 - Dispenser - Suction Dispenser
B01 - Tank External Protection - Painted/Asphalt Coating
F00 - Pipe External Protection - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
I00 - Overfill - None
L00 - Piping Leak Detection - None
C01 - Pipe Location - Aboveground
E07 - Piping Secondary Containment - Trench Liner
K00 - Spill Prevention - None

Tank Location: 2
Tank Type: Stainless Steel Alloy
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/2001
Capacity Gallons: 500
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Point of contact: HydroTech,Riachel Ataman 631.241.7401.05/13/08 Rec'd RAP without site plan.Need Phase II report.(sr)07/02/08 Rec'd closure report from HydroTech.Contaminated soil was removed by excavation as per RAP previously submitted to DEC.The excavation was 60'long x 15' wide x 8'-12' deep.192 tons of contaminated soil was disposed of. Two 275 gallon UST were discovered during the excavation. HydroTeck took five end point samples,four from four side walls and one from the bottom.As per HydroTech, no VOC/SVOCs were detected along the sidewalls of the four walls but bottom samples which are within TAGM range.In the Phase II investigation, no vocs were identified above TAGM 4046.HydroTech inspected the excavation for visual and olfactory evidence of contamination before taking the end point samples.PID read 0.0(zero) ppm on all the samples.Report in edocs included photographs, waste disposal manifest.NFA required.(sr)

DEC Memo:	2/22/12-Vought-Duty desk officer. Called and spoke to FDNY Hazmat Naglieri (Ph:(212)360-4485). See also closed spill. Captain of FDNY does not feel spill is cleaned and he will contact Captain of Engine House and return call to DEC Patel and Vought of office.02/28/12 Responded to the site on 02/22/12 evening.Capt Calamari and Capt Higgins showed me the tank and spilled area in the cellar. There are few cracks on the floor and diesel contamination evident in those areas.PID meter showed reading of 10,000 -15,000 ppb, when I held the PID probe close to the cracked area. Riteway has been retained to do the clean up.A proposal is in edocs.(sr)05/08/12 Rec'd a report from CORE Environmental on the subsurface investigation performed in the basement.Five soil samples were taken from under the floor slab.PID reading "0" ppm in all samples.No Vocs were detected above CP-51 in any of the samples.The spill does not appear to have impacted the subsurface soil beneath the basement floor. Case closed.(sr)
Remarks:	Fuel delivery overfilled tank in basement. No call by FD at the time in error. Cleanup is claimed to be complete by Castle Fuel and FD officials feel it is not. Request callback ASAP.

DEC Memo:	11/22/05: This spill transferred from J.Kolleeny to S.Kraszewski.01/04/06: ISRP from June 1997 mentions 8 soil borings and 3 MWs installed, in addition to one MW perviously installed in 1995. Borings ranged from 12.5 to 20 fbg and GW encountered at 11 fbg. Four of the eight borings noted oil impacts and so did two of the four MWs. Some free product detected in the MWs 3 and 4 is #2 fuel oil. ISRP proposed 3 additional MWs to maintain delineation of the spill and also to speed the recovery of product from the GW. Passive sorbents will be used to collect free product. Also, continued monitoring would commence. No recent data from MWs. ONly an invoice dated October 1997 from Environmental Testing Laboratories gives results from two MWs out of a total of 7. The results show no VOC or SVOC contamination. The two wells tested weren't the two previous MWs from the ISRP which contained free product. Must have GW samples from MWs to check on status of site. - SK01/30/06: This spill transferred from S.Kraszewaski to Q.Abidi.04/03/06: This spill transferred from Q. Abidi to Koon Tang.03/16/10: J.Kann - spill reassigned to J.kann. Possible off-site perc contamination - be sure to sample for perc when work plan is prepared.07/25/12: J.Kann - Sutter Avenue site (C224141) is the possible off-site concern. 07/30/12: J.Kann - sent email to NYCHA approving work plan with minor modifications (email edoced)5/27/14: J.Kann - RIR received on 11/12/13. Reviewed RIR for Cypress Hill Houses. Minor VOCs detected in gw in one well. In addition, some free product was detected in MW2. Sent an email to NYCHA concuring with report recommendations. In addition, Yelena Tkach had mentioned in May 2014 that investigation work may be performed by another contractor on the site for delineation of a spill upgradient of the site.
Remarks:	comtaminated soil found during a tank removal - unk size tank, underground - contractor will be handling the clean up

- Site name: NYCHA - PROSPECT PLAZA
- Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:
- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

NYCHA - PROSPECT PLAZA (Continued) **1004762088**

Waste Code:	D001 - NON-LISTED IGNITABLE WASTES
Quantity:	00055
Units:	G - Gallons (liquids only)* (8.3 pounds)
Number of Containers:	001
Container Type:	DM - Metal drums, barrels
Handling Method:	B Incineration, heat recovery, burning.
Specific Gravity:	01.00
Year:	2001

Spiller Company:	001
Contact Name:	FIREFIGHTER KEARNEY
Contact Phone:	(347) 203-6886
DEC Memo:	Sangesland spoke to Firefighter Kearney. He said the fire was now out, none of the containers opened and a ph and "flash" test of the water in front of the containers showed everything was neutral. Fire Marshalls are inspecting the site because the fire appeared "suspisious" and DEP was also notified.Per Randy Austin, No DEC investigation is required.
Remarks:	CASno: NO CHEMICALS RELEASED BUT THERE WAS A FIRE IN THE CLOSET AND WANTED DEC TO AWARE OF IT: CLEANING UP AT THIS TIME

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

BELMONT METALS INC (Continued) **1001119280**

redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

OSHA ESTABLISHMENT

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

AIRS (AFS):

Airs Minor Details:

EPA plant ID:	110000323301
Plant name:	BELMONT METALS INC-330 BELMONT AVE
Plant address:	330 BELMONT AVENUE BROOKLYN, NY 11207
County:	KINGS
Region code:	02
Dunn & Bradst #:	001306877
Air quality cntrl region:	043
Sic code:	3331
Sic code desc:	PRIMARY COPPER
North Am. industrial classf:	331411
NAIC code description:	Primary Smelting and Refining of Copper
Default compliance status:	IN COMPLIANCE WITH PROCEDURAL REQUIREMENTS
Default classification:	POTENTIAL UNCONTROLLED EMISSIONS < 100 TONS/YEAR

BELMONT METALS INC (Continued) **1001119280**

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

CON EDISON - BROWNSVILLE SUBSTATION (Continued) **1001969004**

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: X002
Waste name: POLYCHLORINATED BIPHENOLS (PCBs)

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2006
Site name: DUTCH CLEANERS
Classification: Conditionally Exempt Small Quantity Generator

Date form received by agency: 07/14/1999
Site name: DUTCH CLEANERS
Classification: Small Quantity Generator

Date form received by agency: 10/05/1984
Site name: DUTCH CLEANERS
Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

DUTCH CLEANERS (Continued) **1000169298**

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	9/15/05 - Raphael Ketani. A spill report came in for a tank test failure. This was the first test of the underground tank at this site (PBS #2-604452). I spoke to Mr. Malchick at Pro Test and he said that the test had been done as a routine 5 year test. However, the test failed. He said it was a wet failure, and he believes that it was the petrometer. He's waiting for the owner to call back and tell him what she wants to do. A test failure letter was sent to Martha Smith (RP).9/21/2005 Sangesland spoke to Mrs. Smith. She said the building is a 2 family house and the tank is 1500 gal buried next to her house. The tank company repaired "something?" and now the tank test passed. She will send in a copy of all the repair and retest paperwork.10/5/05 - Raphael Ketani. I received a FAXed copy of a passing tank tightness test report for the property's tank. The tank passed the test. I will close this case.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIPPLE"5/19/03 - ROSSAN, DDO - Tank test failure letter was prepared andsent to: Mr. Robert Levy Bimbashe holding Co. Inc. 4 Brower Avenue Box 385 Woodmere, NY 115985/27/2003 - Sangesland, DDO - Mr Robert Levy called to say the building was sold 18 months ago. New TTF letter sent to new owner/manager4/23/2004 Sangesland : Case was still open and no new PBS had been filed, so the case was forwarded to DEC PBS Sigona for action.4/30/2004 SS sent new TTF ltr to Mr. Levy5/17/2004 Sangesland received a letter from Pitkin Properties stating that the site was sold to Renaissance Realty at 1950 Coney Island Ave, Brooklyn NY 11223 - New TTF letter sent to that address 05/19/06: This spill is transferred from Mr. Koon Tang to Q.Abidi.Talked to john Leddy at (516)374-7754. He faxed me tank test failure report. No further work is done after that. -QA Mr. Maurice Levy Pitkin Properties LLC c/o MRMD Management 10 East 39th St - 4th Flr New York, NY 1001606/23/06: Talked to John Leddy he said that he will find information about spill and he will fax me. Also contacted to Dabby (Secretary) she said that she will do research and will send information to me. -QA06/30/06: Called Dabby regarding spill She told she will call ABC Company to find out about clean up of spill and call me back. -QA07/05/06: Called to Mr. Tom at (631)321-4670 and left message to call me back. -QA09/13/06: Called Mr. Tom hewas not

1650 PITKIN LLC (Continued) **U000416549**

available, talk to Mr. Bob Urban (office Manager) Protest Tank Company he said he will find out about spill and he will call me back. MKr. Bob called me back he said he did only Protest of the Tank and it is failed afterwards they didn't do any work at the site. Sent certified letter to New owner in attention of Mr. Zimmerman (Building Manager) Alas Estate Corporation regarding outstanding violation/Tank Test Failure (TTF letter). -QA11/06/06: Called to Mr. Zimmerman at (718)834-6311 and talked to Ms. Reah she said she will convey my message to Zimmerman to call me back regarding spill. -QA05/16/07: Called to new owner (718)376-5400 and talked to Mr. Kevin regarding spill he said that he will convey my message to building manager and he will call me back. -QA07/03/08 Spill case transferred from Q. Abidi to J.A. Maisonave. - JAM10/30/09 Spoke to Eddie Setton (prospective buyer) from Shamco Management (Phone: (718)856-4900, Address: 919 Coney Island Avenue, Brooklyn, NY 10230). The current owner is Alaf Estates, LLC (he did not have their contact info). He wants to know what needs to be done to close out this spill. The heating oil tank for this apartment building failed a tightness test once in 2003, but subsequent tests have been performed where the tank passed. I told him that borings would need to be advanced around the tank to collect soil and groundwater samples. He asked if the spill could be closed if information from the tank test showed that there was no release of oil? He will submit this info and I will evaluate. - JAM11/25/09 Spoke to Abraham Lowy (phone: (917)468-0102). The tank passed latest tightness test and he submitted the results today to PBS. - JAM2/2/10 Received a call from Abraham Lowy. He faxed me a copy of the Tank Test Report (test performed by A-1 Crown Corp.) where the 5,000-gallon #2 oil UST passed a system tightness test. He asked what more needs to be done to close the spill. I told him that I need information from when the tank failed the tightness test in 2003 (i.e. was their a leak?, were repairs necessary?, tightness retest?, etc.) He said he contacted the previous property owner to locate any reports or useful documents. I told him if he cannot find this information then an investigation should be performed to prove that the tank did not release any oil. I am awaiting Mr. Lowy's response. - JAM2/22/10 Received a tank test report via email from Abraham Lowy on February 3, 2010. Pro Test Environmental performed a tightness test on May 16, 2003 and the tank system failed in the "wet" portion of the tank, below the product level. No other information was available.I issued an email to Abraham Lowy today requiring a limited soil and goundwater investigation be performed. One soil boring should be advanced in the area between the tank and the fill port, as close as possible to the tank. Soil and groundwater samples should be collected and analyzed for VOCs and a summary report should be submitted. I asked Mr. Lowy to notify me of the schedule for this work by March 18, 2010. Four tank test reports and emails with Abe Lowy are uploaded to eDocs. - JAM3/17/10 Received a call from Donna Vieni at ABC Tank Cleaners (phone: 718-272-2800). They will be performing the soil boring and will notify me when the fieldwork is scheduled. - JAM4/12/10 The driller contacted the DEC on 4/9/10 while they were performing the soil boring. The driller reached a depth of 31 feet with a small geoprobe and was worried he would lose the drill rods before reaching water. They reported that no contamination was encountered and no PID readings were observed down to 31 feet. They requested to terminate the drilling without obtaining a water sample. The DEC agreed. A summary report will be submitted. - JAM5/6/10 Received a Subsurface Investigation Report

1650 PITKIN LLC (Continued) **U000416549**

from Gallinger Environmental Management Corp. (GEM) dated April 30, 2010. GEM advanced one soil boring near the tankto a depth of 32 feet on April 9, 2010. The highest PID readings were 9.6ppm and 3.6ppm at 9 feet and 21 feet below grade. Soil samples were collected from 9 feet, 21 feet and 32 feet below grade. No Vocs or SVOCs were detected in any of the soil samples. Groundwater was not encountered.GEM recommends spill closure. This spill case was closed today. A copy of the closed spill report was emailed to Abraham Lowy. The report is uploaded to eDocs. - JAM
