SUMMARY

The Conceptual proposal was found generally successful and appropriate for the site, and members commended the minimal, elegant massing of the bridge. When submitting for Preliminary review, please (1) continue to develop the material detailing and (2) clarify (a) why the artist selection process is scheduled to begin no sooner than Q3 of 2027, rather than being done concurrent with the architectural design process and (b) what considerations the team is taking to ensure the future ease of integration of an artwork.
