

15 PENN PLAZA

Draft Environmental Impact Statement

CEQR No.: 09DCP019M

Lead Agency:
City Planning Commission, City of New York
Amanda M. Burden, FAICP, Chair

Prepared by:
AKRF, Inc.
Stantec

February 2010

DRAFT ENVIRONMENTAL IMPACT STATEMENT
For
15 PENN PLAZA
February 5, 2010

CEQR No.: 09DCP019M
ULURP Nos.: 100047ZMM
N100048ZRM
100049ZSM
100050ZSM
100237PQM

LEAD AGENCY:

City Planning Commission
City of New York
Amanda M. Burden, FAICP, Chair

LEAD AGENCY CONTACT:

Robert Dobruskin, AICP, Director
Environmental Assessment and Review Division
New York City Department of City Planning
22 Reade Street, Room 4E
New York, NY 10007
(212) 720-3423

PREPARED FOR THE LEAD AGENCY BY:

AKRF, Inc.
Stantec

A public hearing on the Draft Environmental Impact Statement (DEIS) will be held at a later date to be announced. Advance notice will be given of the time and place of the hearing. Written comments on the DEIS are requested and will be received and considered by the Lead Agency until the 10th calendar day following the close of the public hearing.

Table of Contents

Executive Summary **S-1**

1: Project Description **1-1**
A. Introduction 1-1
B. Development and Project Sites 1-1
C. Project Program and Design 1-2
Single-Tenant Office Scenario 1-2
Multi-Tenant Office Scenario 1-4
Mass Transit Improvements 1-4
Sustainable Design 1-5
D. Proposed Actions 1-6
Zoning Map Amendment (ULURP No. 100047ZMM) 1-6
Zoning Text Amendments (ULURP No. N100048ZRM) 1-6
Special Permits (ULURP No. 100049ZSM and 100050ZSM) 1-7
Easements (ULURP No. 100237PQM) 1-8
Other Approvals 1-8
E. Purpose and Need 1-8
Need for the Proposed Project 1-8
Need for the Proposed Actions 1-9
F. Restrictive Declaration 1-10

2: Procedural and Analytical Framework **2-1**
A. Introduction 2-1
B. Environmental Review Process 2-1
Coordination With Other Review Processes 2-2
C. Framework for Environmental Analyses 2-4
Scope of Environmental Analyses 2-4
Analysis Year 2-5
Definition of Study Areas 2-5
Defining Baseline Conditions 2-5
Defining the Action for Environmental Analysis 2-6
Mitigation 2-9
Alternatives 2-10

3: Land Use, Zoning, and Public Policy **3-1**
A. Introduction 3-1
B. Methodology 3-1
C. Existing Conditions 3-2
Land Use 3-2
Zoning 3-6

Public Policy 3-13
D. The Future Without the Proposed Project 3-15
Land Use 3-15
Zoning and Public Policy 3-17
E. Probable Impacts of the Proposed Project 3-17
Land Use 3-17
Zoning and Public Policy 3-18

4: Socioeconomic Conditions 4-1
A. Introduction 4-1
B. Methodology 4-1
CEQR Overview 4-1
Determining Whether A Socioeconomic Assessment Is Appropriate 4-2
Analysis Format and Data Sources 4-3
C. Preliminary Assessment 4-4
Direct Residential Displacement 4-5
Direct Business and Institutional Displacement 4-5
Indirect Residential Displacement 4-5
Indirect Business and Institutional Displacement 4-7
Potential Effects On Specific Industries 4-19
D. Conclusions 4-20
Direct Residential Displacement 4-20
Direct Business and Institutional Displacement 4-20
Indirect Residential Displacement 4-20
Indirect Business and Institutional Displacement 4-21
Potential Effects On Specific Industries 4-21

5: Community Facilities 5-1
A. Introduction 5-1
B. Police and Fire Protection Services 5-1
Police Services 5-1
Fire Department Services 5-2

6: Open Space 6-1
A. Introduction 6-1
Principal Conclusions 6-1
B. Methodology 6-2
Direct Effects Analysis 6-2
Indirect Effects Analysis 6-3
C. Existing Conditions 6-5
Study Area Population 6-5
Study Area Open Spaces 6-5
Adequacy of Open Spaces 6-7
D. The Future Without the Proposed Project 6-8
Study Area Population 6-8
Study Area Open Spaces 6-9
Adequacy of Open Spaces 6-9

E. Probable Impacts of the Proposed Project 6-10
Direct Effects Analysis 6-10
Indirect Effects Analysis 6-10

7: Shadows 7-1
A. Introduction 7-1
B. Daily and Seasonal Variations in Shadows 7-1
C. Methodology 7-1
Analysis Framework 7-2
Analysis Tools and Data Sources 7-3
Determination of Impact Significance 7-3
D. Screening Analysis 7-3
E. Detailed Shadows Analysis 7-4
Penn South Houses 7-7
Chelsea, Elliot, and Chelsea Addition Houses 7-7
Chelsea Park 7-7
Two Penn Plaza 7-8
Probable Impacts On Historic Resources 7-10

8: Historic Resources 8-1
A. Introduction 8-1
B. Background History 8-2
C. Existing Conditions 8-3
Project Site 8-3
Study Area 8-5
D. The Future Without the Proposed Project 8-8
No Action Building 8-8
Other Future Projects 8-9
E. Probable Impacts of the Proposed Project 8-9
Project Site 8-9
Study Area 8-10

9: Urban Design and Visual Resources 9-1
A. Introduction 9-1
B. Existing Conditions 9-3
Development Site 9-3
Project Site and Study Area 9-4
C. The Future Without the Proposed Project 9-7
Development Site 9-7
Project Site 9-8
Study Area 9-8
Other Future Projects 9-8
D. Probable Impacts of the Proposed Project 9-8
Development Site 9-9
Project Site 9-11
Study Area 9-11

10: Neighborhood Character 10-1
A. Introduction 10-1

Neighborhood Character Components....10-1
B. Existing Conditions....10-2
Development Site....10-2
Study Area....10-3
C. The Future Without the Proposed Project....10-5
Development Site....10-5
Study Area....10-5
D. Probable Impacts of the Proposed Project....10-6
Development Site....10-6
Study Area....10-6

11: Natural Resources....11-1
A. Introduction....11-1
B. Methodology....11-1
Study Area....11-1
Assessment of Existing and No Action Conditions....11-1
Assessment of Impacts On Natural Resources....11-2
C. Existing Conditions....11-2
Flora and Fauna....11-2
D. The Future Without the Proposed Project....11-3
E. Probable Impacts of the Proposed Project....11-4
Bird Impacts....11-4
Stormwater and Sanitary Sewage Impacts....11-7
F. Conclusions....11-8
Bird Impacts....11-8
Stormwater and Sanitary Sewage Impacts....11-8
G. Literature Cited....11-8

12: Hazardous Materials....12-1

13: Infrastructure....13-1
A. Introduction....13-1
B. Methodology....13-1
C. Existing Conditions....13-2
Water Supply....13-2
Sanitary Sewage....13-2
Stormwater....13-4
D. The Future Without the Proposed Project....13-4
E. Probable Impacts of the Proposed Project....13-5
Sustainable Design Measures and PlaNYC....13-5
Water Supply....13-6
Sanitary Sewage....13-6
Stormwater....13-7
F. Conclusion....13-7
Water Supply....13-7
Sanitary Sewage....13-7
Stormwater....13-8

14: Solid Waste and Sanitation Services 14-1
A. Introduction 14-1
B. Existing Conditions 14-1
Solid Waste Services 14-1
Solid Waste Generation 14-2
C. The Future Without the Proposed Project 14-2
D. Probable Impacts of the Proposed Project 14-3

15: Energy 15-1
A. Introduction 15-1
B. Existing Conditions 15-1
Energy Supply 15-1
Energy Demand 15-2
C. The Future Without the Proposed Project 15-2
D. Probable Impacts of the Proposed Project 15-3

16: Traffic and Parking 16-1
A. Introduction 16-1
Principal Conclusions 16-1
B. Methodology 16-2
Overview 16-2
Study Area 16-3
Peak Hours for Analysis 16-3
Operational Analysis Methodology 16-5
Tranportation Planning Factors 16-6
Existing Conditions 16-11
Roadway Characteristics 16-11
Study Area Roadways and Peak Hour Traffic Volumes 16-12
Level of Service Analysis 16-24
Parking 16-28
Study Area Accident Patterns 16-29
C. No Action 16-37
Roadway Modifications 16-37
Peak Hour Traffic Volumes 16-38
Level of Service Analysis 16-47
Parking 16-48
D. Future With the Proposed Project 16-49
Peak Hour Traffic Volumes 16-50
Level of Service Analysis 16-50
Significant Adverse Traffic Impacts 16-68
Parking 16-77
Traffic Safety 16-78

17: Transit and Pedestrians 17-1
A. Introduction 17-1
Principal Conclusions 17-1
B. Methodology 17-3
Overview 17-3
Transit Study Area 17-4

Pedestrian Study Area....17-7
Analysis Hours....17-7
Operational Analysis Methodology....17-7
Trip Generation....17-10
C. Existing Conditions....17-13
Transit Service....17-13
Study Area Subway Station Access & Circulation....17-18
Transit Elements....17-20
Subway Station Operations....17-20
Pedestrian Elements....17-21
Pedestrian Operations....17-21
Bicycle Facilities....17-29
D. No Action....17-29
Conditions for Analysis....17-29
Subway Station Operations....17-30
Pedestrian Operations....17-32
E. Future With the Proposed Project....17-39
Conditions for Analysis....17-39
Single-Tenant Office Scenario....17-41
Multi-Tenant Office Scenario....17-50

18: Air Quality and Greenhouse Gas Emissions....18-1
A. Air Quality....18-1
Introduction....18-1
Principal Conclusions....18-1
Pollutants for Analysis....18-2
Air Quality Regulations, Standards, and Benchmarks....18-4
Methodology for Predicting Pollutant Concentrations....18-8
Existing Conditions....18-13
Future Without the Proposed Project....18-14
Stationary Source Analysis....18-15
Probable Impacts of the Proposed Project....18-15
B. Greenhouse Gas Emissions....18-17
Introduction....18-17
Analysis Approach....18-18
Pollutants of Concern....18-19
Policy, Regulations, Standards, and Benchmarks....18-20
Methodology....18-22
Probable Emissions from the Proposed Project....18-27
Project Elements That Would Reduce GHG Emissions....18-29
Conclusion....18-31

19: Noise....19-1
A. Introduction....19-1
B. Noise Fundamentals....19-1
"A"-Weighted Sound Level (dBA)....19-1
Ability to Perceive Changes in Noise Levels....19-1
C. Noise Standards and Criteria....19-3
New York City Noise Control Code....19-3

New York CEQR Noise Criteria 19-3
D. Im pact Definition 19-4
E. Noise Prediction Methodology 19-5
Analysis Procedure 19-5
F. Existing Conditions 19-6
Site Description 19-6
Selection of Noise Receptor Locations 19-6
Noise Monitoring 19-6
Equipment Used During Noise Monitoring 19-6
Results of Baseline Measurements 19-6
G. The Future Without the Proposed Project 19-7
H. Probable Impacts of the Proposed Project 19-8
I. Noise Attenuation Measures 19-8

20: Construction Impacts 20-1
A. Introduction 20-1
Principal Conclusions 20-2
B. Overview of Construction Activities 20-5
General Construction Practices 20-5
Construction Methods and Activities 20-8
Conceptual Construction Phasing and Schedule 20-11
C. The Future Without the Proposed Project 20-12
Development Site and Project Site 20-12
Surrounding Area 20-14
D. Probable Impacts of the Proposed Project 20-14
Land Use and Neighborhood Character 20-14
Socioeconomic Conditions 20-15
Community Facilities 20-15
Open Space 20-15
Historic Resources 20-16
Traffic and Parking 20-16
Transit and Pedestrians 20-19
Air Quality 20-20
Noise 20-23
Vibration 20-27
Cumulative Effects 20-29

21: Public Health 21-1

22: Mitigation 22-1
A. Introduction 22-1
B. Open Space 22-1
C. Traffic 22-1
Effects of Proposed Traffic Mitigation Measures On Air Quality and Noise 22-19
D. Transit and Pedestrians 22-19
Subway Stations 22-20
Pedestrian Elements 22-20
E. Construction-Period Noise 22-33

23: Unavoidable Adverse Impacts 23-1
A. Introduction 23-1
B. Open Space 23-1
C. Transit and Pedestrians 23-1

24: Alternatives.....24-1
A. Introduction 24-1
Overview 24-1
Principal Conclusions 24-2
B. No Action Alternative 24-3
Description 24-3
No Action Alternative Compared With the Proposed Project 24-3
Conclusion 24-9
C. Hotel-Residential Alternative 24-10
Description of the Alternative 24-10
Hotel-Residential Alternative Compared With the Proposed Project.....24-11
Conclusion 24-19
D. Cogeneration Energy Supply Alternative 24-19
Introduction 24-19
Feasibility Analysis Summary 24-20
Cogeneration Energy Supply Alternative Compared With the Proposed Project 24-21
Conclusion 24-25
E. No Unmitigated Significant Impacts Alternative 24-25
Open Space 24-25
Transit and Pedestrians 24-26

25: Growth-Inducing Aspects of the Proposed Project.....25-1

26: Irreversible and Irretrievable Commitment of Resources.....26-1

27: Conceptual Analysis of the Proposed Zoning Text Amendments.....27-1
A. Introduction 27-1
B. Description of the Proposed Text Amendments 27-1
Introduction 27-1
Proposed Text Amendment Text 27-2
Purpose and Need for the Proposed Text Amendments 27-5
Areas of Applicability.....27-7
C. Assessment of the Potential Effects of the Proposed Text Amendments 27-9
Methodology 27-9
Future Applicability.....27-10
Environmental Effects 27-10

LIST OF APPENDICES

Appendix A: Zoning Text

Appendix B: Historic Resources

Appendix C: Transportation Technical Memos and Analyses
- C.1 Transportation Planning Assumptions
- C.2 Traffic Volumes
- C.3 Traffic Level of Service Tables
- C.4 Transit Analyses
- C.5 Pedestrian Analyses

Appendix D: Air Quality and Greenhouse Gas Emissions
- D.1 JBB Memorandum
- D.2 Baseline Electricity and Steam

Appendix E: Noise
- E.1 Noise Monitoring Results
- E.2 Noise Analysis Results
- E.3 Results at Receptors

List of Tables

1-1 Proposed Building Program—Single-Tenant Office and Multi-Tenant Office Scenarios 1-3

2-1 Projects Under Construction or Expected to Be Complete By 2014 (¼- and ½-Mile Study Areas)....2-7

2-2 Projects Under Construction or Expected to Be Complete By 2014 (Transportation Study Area) 2-8

3-1 Development and Project Site Zoning Districts 3-7

3-2 Zoning Districts Located in the Primary Study Area 3-8

3-3 Zoning Districts Located in the Secondary Study Area 3-11

4-1 2000 and 2008 Private Sector Employment in the Study Area 4-9

5-1 Police Protection Services 5-2

5-2 Fire Protection Services 5-3

6-1 Existing Residential and Non-Residential Populations–2009 Estimate 6-5

6-2 Existing Conditions Open Space Inventory 6-6

6-3 Existing Conditions: Commercial Study Area Open Space Guidelines and Ratios for Combined Residential and Worker Populations....6-7

6-4 2014 No Action Condition: Commercial Study Area Open Space Guidelines and Ratios for Combined Residential and Worker Populations 6-9

6-5 2014 Future With the Proposed Project: Commercial Study Area Open Space Guidelines and Ratios for Combined Residential and Worker Populations....6-11

6-6 Open Space Ratio Summary 6-12

13-1 Monthly Average Actual Flows to the North River WPCP 13-3

13-2 Projected Water Use and Sewage Generation: No Action Building 13-4

13-3 Projected Water Use and Sewage Generation: Single-Tenant Office Scenario 13-6

13-4 Projected Water Use and Sewage Generation: Multi-Tenant Office Scenario 13-6

14-1 Existing Solid Waste Generation 14-2

14-2 No Action Building: Estimated Solid Waste Generation 14-2

14-3 Single-Tenant Office Scenario: Estimated Solid Waste Generation 14-3

14-4 Multi-Tenant Office Scenario: Estimated Solid Waste Generation 14-3

15-1 Existing Energy Consumption: Development Site....15-2

15-2 Projected Energy Consumption:No Action Project 15-2
15-3 Projected Energy Consumption Single-Tenant Office Scenario..... 15-3
16-1 LOS Criteria for Signalized Intersections 16-5
16-2 Proposed Building Program—Single-Tenant Office and Multi-Tenant Office Scenarios .16-7
16-3 Transportation Planning Assumptions.....16-8
16-4 Incremental Vehicle Trips Generated—Single-Tenant Office Scenario 16-9
16-5 Incremental Vehicle Trips Generated—Multi-Tenant Office Scenario.....16-10
16-6 Existing Conditions: Number of Intersection Approach Movements at Mid-LOS D, LOS E, or LOS F 16-24
16-7 Existing Conditions: Intersection Approach Movements Operating at Mid-LOS D, LOS E, or LOS F 16-28
16-8 Existing Off-Street Parking Utilization 16-31
16-9 On-Street Parking Regulations 16-35
16-10 2006 to 2008 Accident History.....16-36
16-11 No Action: Number of Intersection Approach Movements at Mid-LOS D, LOS E, or LOS F 16-47
16-12 No Action: Intersection Approach Movements Operating at Mid-LOS D, LOS E, or LOS F 16-48
16-13 No Action Off-Street Parking Utilization: Weekday Midday 16-49
16-14 No Action Off-Street Parking Utilization: Weekday Overnight.....16-49
16-15 Future with the Proposed Project: Number of Intersection Approach Movements at Mid-LOS D, LOS E, or LOS F 16-51
16-16 Future with the Proposed Project: Number of Significantly Impacted Approach Movements.....16-68
16-17 Future with the Proposed Project: Weekday AM Peak Hour Intersection Approach Movements at Mid-LOS D, LOS E, or LOS F 16-73
16-18 Future with the Proposed Project: Weekday Midday Peak Hour Intersection Approach Movements at Mid-LOS D, LOS E, or LOS F.....16-74
16-19 Future with the Proposed Project: Weekday PM Peak Hour Intersection Approach Movements at Mid-LOS D, LOS E, or LOS F 16-75
16-20 Future with the Proposed Project: Saturday Midday Peak Hour Intersection Approach Movements at Mid-LOS D, LOS E, or LOS F 16-76
16-21 Future with the Proposed Project: Off-Street Parking Utilization 16-77
17-1 Level of Service Criteria for Subway Station Elements 17-8
17-2 Level of Service Criteria for Pedestrian Elements.....17-9

17-3 Single-Tenant Office Scenario
Incremental Peak Hour Person Trips Generated by Mode 17-10

17-4 Multi-Tenant Office Scenario
Incremental Peak Hour Person Trips Generated by Mode 17-11

17-5 Proposed Project, Single-Tenant Office Scenario
Incremental Peak Hour Person Trips Generated by Route 17-12

17-6 Multi-Tenant Office Scenario
Incremental Peak Hour Person Trips Generated by Route 17-13

17-7 Study Area Subway Service 17-14

17-8 Study Area Bus Service 17-14

17-9 2008 Existing Conditions—Subway Station Control Area
Elements Operating Near or Above Capacity 17-20

17-10 2008 Existing Conditions—Subway Station
Stairways at LOS D, E, or F 17-21

17-11 2008 Existing Conditions Summary of Pedestrian Element LOS 17-22

17-12 2008 Existing Conditions Pedestrian Elements at LOS D, E, or F 17-27

17-13 No Action Condition—
Trips Assigned by Subway Line 17-31

17-14 No Action Condition—Subway Control Area
Elements Operating Above Capacity 17-31

17-15 No Action Condition Subway Station Stairways at LOS D, E, or F 17-32

17-16 No Action Condition Summary of Pedestrian Element LOS 17-33

17-17 No Action Condition
Pedestrian Elements at LOS D, E, or F 17-38

17-18 Single-Tenant Office Scenario
Trips Assigned by Subway Line 17-41

17-19 Single-Tenant Office Scenario
Subway Control Area Elements Near or Above Capacity 17-41

17-20 Single-Tenant Office Scenario Affected Subway Station Stairways 17-42

17-21 Single Tenant Office Scenario
Summary of Pedestrian Elements LOS 17-43

17-22 Single-Tenant Office Scenario
Pedestrian Elements at LOS D, E, or F 17-48

17-23 Single-Tenant Office Scenario
Pedestrian Elements with Significant Adverse Impacts 17-50

17-24 Multi-Tenant Office Scenario
Trips Assigned by Subway Line 17-51

17-25 Multi-Tenant Office Scenario
Subway Control Area Elements Near or Above Capacity 17-51

17-26 Multi-Tenant Office Scenario
Affected Subway Station Stairways 17-51

17-27 Multi-Tenant Office Scenario
Summary of Pedestrian Elements LOS 17-52

17-28 Multi-Tenant Office Scenario
Pedestrian Elements at LOS D, E, or F 17-57

17-29 Multi-Tenant Office Scenario
Pedestrian Elements with Significant Adverse Impacts 17-59

18a-1 National Ambient Air Quality Standards (NAAQS) 18-5

18a-2 Mobile Source Analysis Intersection Locations 18-10

18a-3 Representativ e Monitored Ambient Air Quality Data 18-14

18a-4 Maximum Predicted Existing 8-Hour Average CO Concentrations for 2009 18-14

18a-5 Maximum Predicted Future (2014) 8-Hour Average CO No Action Concentrations 18-14

18a-6 Maximum Predicted Future (2014) 8-Hour Average No Action and Future With the Proposed Project Co Concentrations 18-15

18a-7 Existing Buildings Analyzed in the HVAC Assessment 18-16

18a-8 Maximum Predicted Impacts from Industrial Sources 18-17

18b-1 Global Warming Potential (GWP) for Major GHGs 18-23

18b-2 GHG Emissions from Construction Activity and Material Use 2010-2014 18-28

18b-3 Summary of Annual GHG Emissions Single-Tenant Office Scenario 18-28

18b-4 Summary of Annual GHG Emissions Multi-Tenant Office Scenario 18-29

19-1 Common Noise Levels 19-2

19-2 Average Ability to Perceive Changes in Noise Levels 19-2

19-3 Noise Exposure Guidelines for Use in City Environmental Impact Review 19-3

19-4 Required Attenuation Values to Achieve Acceptable Interior Noise Levels 19-4

19-5 Noise Receptor Locations 19-6

19-6 Measured Existing Noise Levels (in dBA) 19-7

19-7 No Action Noise Levels (in dBA) 19-7

19-8 Future With the Proposed Project Noise Levels (in dBA) 19-8

20-1 Quarterly Peak Numbers of Daily Construction Workers and Delivery Trucks: Proposed Action (Single-Tenant Office Scenario With Subway Improvements) 20-12

20-2 Quarterly Peak Numbers of Daily Construction Workers and Delivery Trucks: No Action Development (Without Subway Improvements) 20-13

20-3 Peak Construction Vehicle Trip Projections 20-18

20-4 Typical Construction Equipment Noise Emission Levels (dBA)....20-26

22-1 Traffic Impact Mitigation Summary 22-2

22-2 Future With the Proposed Project: Weekday AM Peak Hour Intersection Approach Movements With and Without Proposed Mitigation 22-7

22-3 Future With the Proposed Project: Weekday MD Peak Hour Intersection Approach Movements With and Without Proposed Mitigation 22-9

22-4 Future With the Proposed Project: Weekday PM Peak Hour Intersection Approach Movements With and Without Proposed Mitigation 22-11

22-5 Future With the Proposed Project: Saturday MD Peak Hour Intersection Approach Movements With and Without Proposed Mitigation 22-13

22-6 Future With the Proposed Project: Weekday AM Peak Hour Proposed Mitigation Measures....22-15

22-7 Future With the Proposed Project: Weekday MD Peak Hour Proposed Mitigation Measures....22-16

22-8 Future With the Proposed Project: Weekday PM Peak Hour Proposed Mitigation Measures....22-17

22-9 Future With the Proposed Project: Saturday MD Peak Hour Proposed Mitigation Measures....22-18

22-10 2014 Maximum Predicted 8-Hour Average No Action and Future With the Proposed Project CO Concentrations (With Traffic Mitigation) 22-19

22-11 Single-Tenant Office Scenario Locations with Significant Adverse Impacts with Mitigation 22-23

22-12 Multi-Tenant Office Scenario Locations With Significant Adverse Impacts with Mitigation 22-24

24-1 No Action and Future With the Proposed Project Number of Intersection Approach Movements at Mid-LOS D, LOS E, or LOS F 24-7

24-2 No Action Off-Street Parking Utilization 24-8

24-3 No Action and Future With the Proposed Project Number of Unmitigated Significant Adverse Impacts 24-8

24-4 Vehicle Trip Generation Comparison Hotel-Residential Alternative vs. The Proposed Project 24-17

24-5 Off-Street Parking Utilization Future With the Proposed Project vs. Hotel-Residential Alternative....24-17

24-6 Person Trip Generation Comparison Hotel-Residential Alternative vs. The Proposed Project 24-18

24-7 Boiler Stack Parameters and Emission Rates....24-22

24-8` Maximum Pollutant Concentrations With the Cogeneration Energy Supply Alternative ($\mu g/m^3$) 24-24

24-9 Maximum Predicted $PM_{2.5}$ Concentration Increments 24-24
