Racial equity report on housing and opportunity

Project name: Science Park and Research Campus (SPARC) Kips Bay

Contact: Amy Jin, New York City Economic Development Corporation; ajin@edc.nyc

Prepared by: Michael Karasik, VHB Date: 6/12/2024

Note: Racial equity reports are prepared prior to the certification of the subject application by the City Planning Commission (CPC). A description of the final adopted application is available in the associated CPC report.

APPLICATION TYPE

Applications that meet one or more of the following criteria are subject to the racial equity report requirement. Please select all relevant criteria:

☐ Text amendment to the zoning resolution affecting 5 or more community districts

☐ Historic district designation affecting 4 or more city blocks

☐ Seeking a change to the use regulations or permitted floor area for any use in a manufacturing district where a building in the project contains at least 100,000 square feet of floor area

Applications submitted pursuant to subdivision a of section 197-c of the charter that seek approval for:

☑ Acquisition or disposition of land to facilitate a non-residential project containing at least 50,000 square feet of floor area

☐ Acquisition or disposition of land to facilitate a residential project, other than a residential project consisting of a building to be preserved, provided that such equity report shall only be required related to a building in such project containing at least 50,000 square feet of floor area

☐ An increase in permitted residential floor area of at least 50,000 square feet

☑ An increase in permitted non-residential floor area of at least 200,000 square feet

☐ A decrease in permitted floor area or number of housing units on at least four contiguous city blocks

If the application meets the above criteria but the proposed development does not, please explain the difference between the proposed development and the application.

Section 1: Executive summary

Provide a short, plain-language summary of the subsequent sections of the racial equity report, including major project elements and key neighborhood and demographic conditions.

See discussion on the following page.

Section 1: Executive Summary

The Applicants are proposing a mixed Life Sciences, academic, and healthcare project at 425 East 25th Street (Block 962, p/o Lot 100), the Development Site, located in the Kips Bay area of Manhattan Community District 6, which also includes the neighborhoods of Murray Hill, Gramercy, and Stuyvesant Town. The Development Site currently occupied by the CUNY Hunter College Brookdale Campus, is comprised of a total of approximately 538,464 gross square feet (gsf). Since 1954, this campus has housed the Hunter College-Bellevue School of Nursing, dormitories for students, and other medical-related facilities. The campus consists of three main buildings that create a C-shape formation surrounding a courtyard accessible via a single entry from East 25th Street. While the courtyard fronts the street, it remains physically and visually disconnected from it.

Programmatically, the Proposed Project would construct multiple new buildings.[1] Two buildings would be located between First Avenue to the west and approximately 430 feet east of First Avenue, East 25th Street to the south, and former East 26th Street to the north—on a portion of the site known as the Western Parcel. One building would be located on the Eastern Parcel, located approximately 370 feet west of FDR Drive between East 25th Street and former East 26th Street. The Proposed Project would consist of approximately 605,163 gsf for the CUNY Hunter College programs, CUNY Graduate School of Public Health & Health Policy, and Borough of Manhattan Community College health care programs; approximately 100,000 gsf for CUNY Research Labs; approximately 193,358 gsf for a NYC Public School focused on sciences and health care professions; approximately 156,270 gsf for the OCME Manhattan Forensic Pathology Center; approximately 185,010 gsf for the H+H Ambulatory & Simulation Training Center; approximately 15,000 gsf of local retail; and approximately 1 million gsf for Life Sciences use. SPARC Square, a new publicly accessible open space containing 23,500 sf (at minimum) would anchor the campus and engage with active and transparent ground-level programs in each of the buildings. Additionally, a total of approximately 225 parking spaces would be provided at the cellar level as a result of the Proposed Actions.

The Development Site is located in the Kips Bay Science District and First Avenue Health and Life Sciences Corridor, a long-established cluster of medical facilities, academic institutions, and healthcare and Life Sciences businesses. The Corridor has been identified as an opportune location to fulfill the goals of the City's LifeSci NYC initiative, a $1 billion investment and is expected to create nearly 40,000 new jobs by 2026—many accessible to New Yorkers without advanced degrees. One of the goals of the LifeSci NYC initiative is to build a pipeline for talent and workforce to support Life Sciences companies and create economic opportunities and access to employment locally.

The neighborhood in which the Development Site is located is predominantly White (65% of the total population in the PUMA in 2020) and is in the lowest displacement risk category, with constituent factors like population vulnerability, housing conditions, and market pressure in the lowest or intermediate categories. Between 2010 and 2020, population increased across all race categories except White, which experienced a decrease of 3%. Asian and Hispanic populations experienced the greatest gains since 2010 at an increase of 36% and 28%, respectively. Based on the 2017-2021 American Community Survey (ACS), the median household income ($136,127) was higher in the PUMA compared to Manhattan ($94,539) and New York City ($70,643). The largest share of households (48%) falls in the high-income category (166% or higher Area Median Income (AMI)) while the lowest share of households (7%) falls in the very low-income (31-50% AMI) and low-income (51-80% AMI) categories. A larger share of White and Asian populations are high-income earners at approximately 51% and 48%, respectively, than Hispanic populations at 33%. Note that the data for Black households is not

[1] As design progresses for the Proposed Project, it is likely that the building on the eastern portion of the Development Site would be designed as two buildings with independent utility systems to accommodate separation between the public school and CUNY facilities.

statistically reliable. Approximately 84% of the population in the PUMA is employed, which is higher than in Manhattan and New York City. Jobs are predominantly in the office sector, at 60%, with all other sectors at or below 16% (16% Institutional, 15% Local Services, and 8% Industrial). Educational attainment is high with 82% of the overall population above the age of 25 holding a bachelor's degree. 45% of the population is rent-burdened and 24% of the population is severely rent-burdened, both of which are lower than in Manhattan and New York City. 95% of residents have access to transit, higher than in Manhattan and in New York City overall.

The Proposed Project furthers Goal 6 of *Where We Live (WWL NYC)*, which aims to promote equitable access to opportunity through new jobs for New Yorkers.

Section 2: Project specific information

Before completing Section 2, please review the racial equity report submission guide.

2.1 Description of residential space and affordability

2.1.1 Reporting residential floor area

Total residential zoning square feet: N/A

2.1.2 Profile of anticipated residential affordability

Report the number of anticipated housing units. Describe the expected rents or prices for all proposed housing units.

Income Restriction	Units		Anticipated Affordability				
			AMI Band	Rent (year)*		Eligible Income (year) **	
	#	%		Studio	2-bedroom	1-person HH	4-person HH
		0%					
		0%					
		0%					
		0%					
Total	0	0%					

*Rents are based on unit size. Rents shown are illustrative (based on [year] AMI, rounded to the nearest $10) and will change. Final rents will be determined based on the HUD Income Limits in place at time of project construction.

**Qualifying incomes are based on household size. Incomes shown are illustrative (based on [year] AMI, rounded to the nearest $100) and will change. Final qualifying incomes will be determined by the HUD Income Limits in place at time of project marketing.

Provide additional details below as needed. If applicable, report the proposed Mandatory Inclusionary Housing option. If applicable, describe any affordable housing financing programs.

The Proposed Project would not include a residential component, and no additional housing would result due to the Proposed Project; however, because of the proposed rezoning action, MIH will be mapped across the entire rezoning area.

(2.1.2 continued)

2.2 Description of non-residential space and jobs

Report building area and job sector details for specific non-residential uses. Specific non-residential uses are those where a space is being built for the use of a specific tenant or business. This might be an anchor tenant that is only occupying a portion of the proposed space, or it might be that the applicant is seeking the proposed action to build for their own use.

If the proposal includes non-residential space but no specific tenants or businesses, do not complete this section. General non-residential space can be discussed in Section 4.

2.2.1 Reporting non-residential floor area

Total non-residential zoning square feet: 1,781,000

Non-residential zoning square feet to be occupied by unknown tenants: 846,860

Non-residential zoning square feet to be occupied by known tenants: 934,075

2.2.2 Profile of anticipated new jobs for non-residential space with a known tenant

If the application proposes specific non-residential uses, report the projected number of permanent jobs in each sector. Specific non-residential uses are those where there is a known tenant for the space.

In cases where there is not a known tenant, do not report the projected number of jobs or the characteristics of the potential sectors. Without a specific tenant/business, future industry sectors cannot be known and therefore all wage and workforce reporting would be speculative.

Sector (name and NAICS code)	Job count
611 - Educational services (CUNY, NYCPS)	927
622 - Hospitals (H+H, OCME)	510
Total	1,437

For each sector, use most recent available data to describe the educational attainment and racial/ethnic composition of the workforce and median wages for those sectors in New York City.

The number of jobs was provided by the Applicant. Approximately 1,437 jobs would be accommodated on-site. CUNY and NYCPS, two known tenants, would create approximately 927 jobs in the educational services industry. Moreover, H+H and OCME are two additional tenants that are expected to create approximately 510 jobs in the hospital (medical) industry.

(2.2.2 continued)

According to the 2017-2021 American Community Survey, approximately 368,831 people are employed in the educational services industry and approximately 71% earned a Bachelor's degree or higher. The racial/ethnic composition of this industry is predominantly White at approximately 45%, while the other racial/ethnic categories are comprised of 10% Asian, 19% Black, and 21% Hispanic. The median wage is $55,357.

In the hospitals industry, approximately 218,598 people are employed in the educational services industry and approximately 59% earned a Bachelor's degree or higher. The racial/ethnic composition of this industry is predominantly Black at approximately 31%, while the other racial/ethnic categories are comprised of 18% Asian, 20% Hispanic, and 27% White. The median wage is $66,209.

2.3 Estimating construction jobs

Report anticipated construction jobs in both person-years and average yearly workers for each development site.

Development site	Person-years	Average yearly workers
425 East 25th Street	1,445	289
Totals	1,445	289

Section 3: Community Profile Summary

The community profile summary provides a graphic snapshot of household, housing, and neighborhood indicators from the Equitable Development Data Explorer for the relevant Community District[1]. Data tables and sources can be found in the full community profile (Section 5 of this report.)

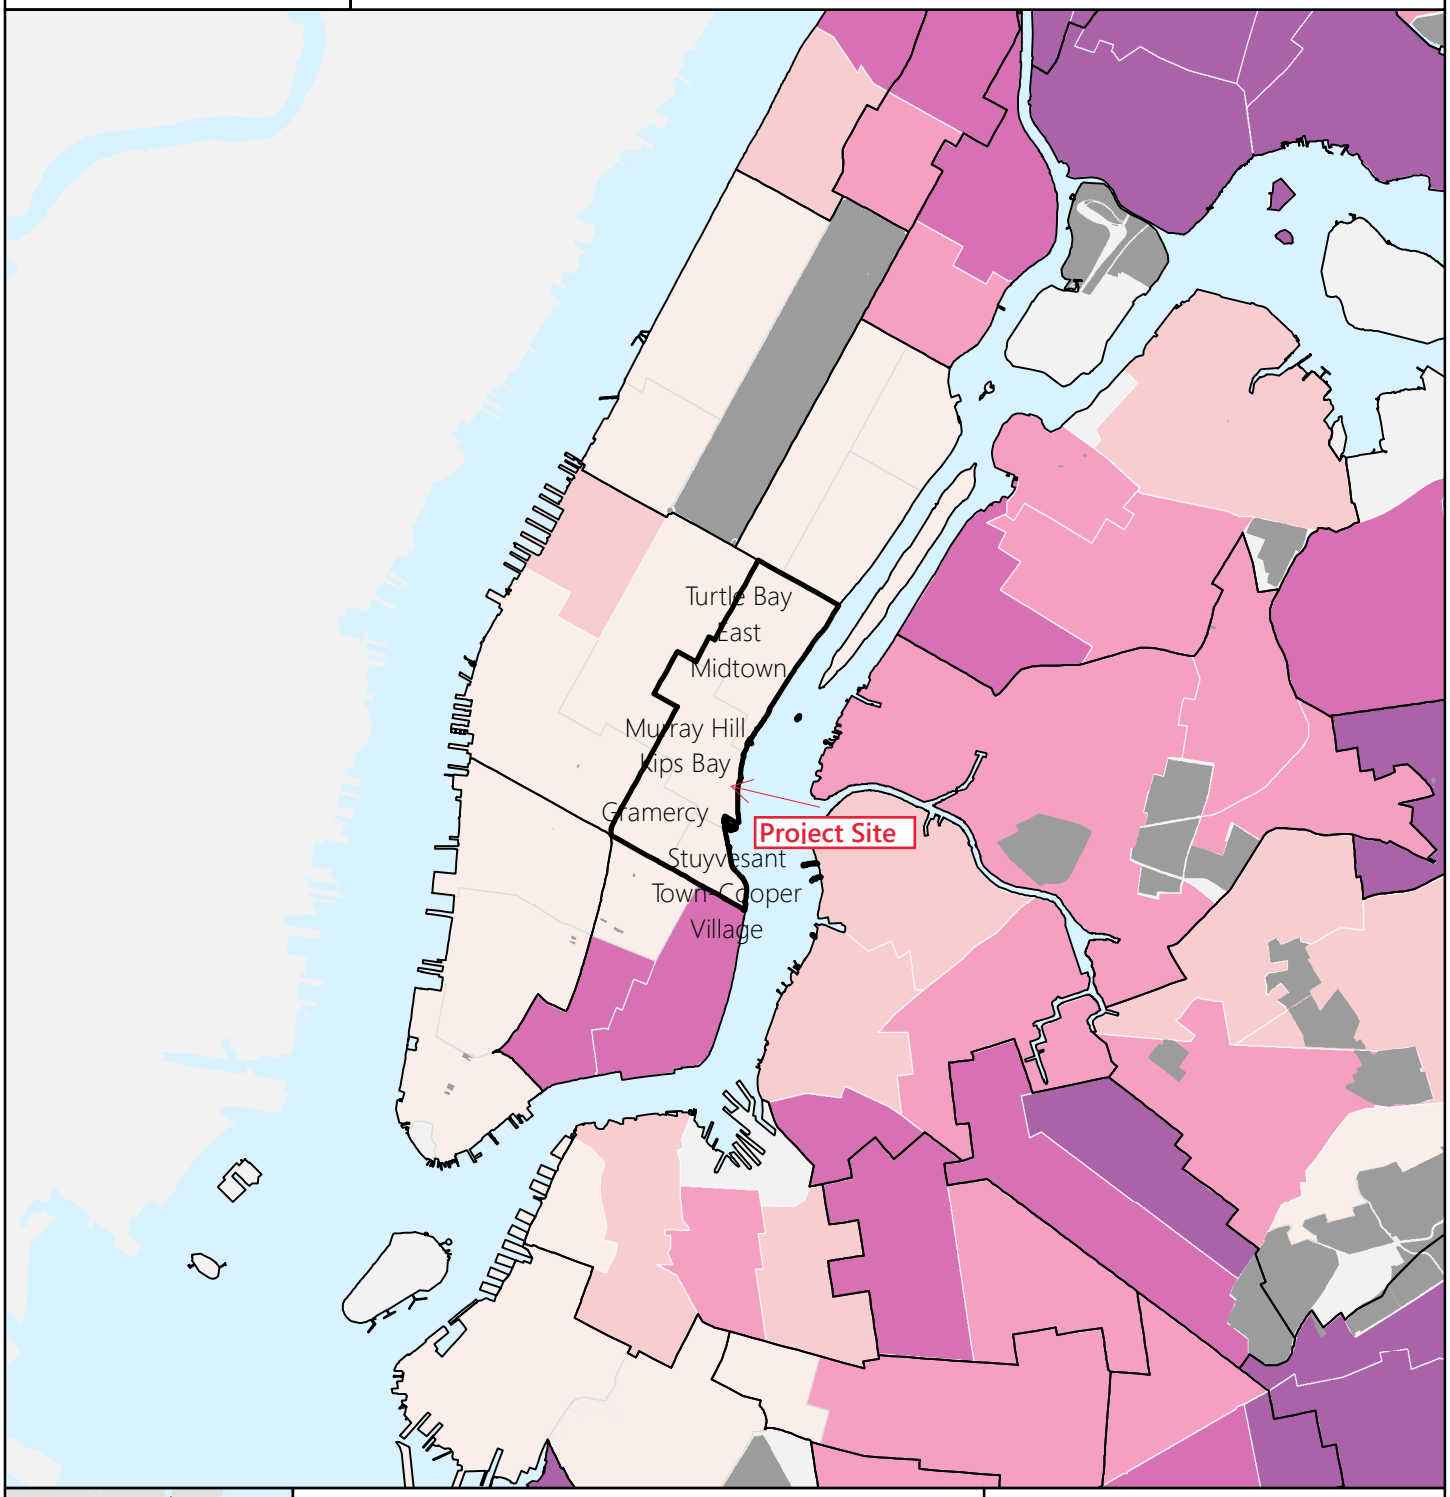

[1] The EDDE reports data by Public Use Microdata Areas (PUMA), statistical areas defined by the U.S. Census. PUMAs in New York City generally approximate Community Districts. Displaying the data at the PUMA scale enables data reporting broken down by race and ethnicity.

Murray Hill, Gramercy & Stuyvesant Town

PUMA 3808

The city's Displacement Risk Index (DRI) estimates comparative levels of residential displacement risk for New York City's neighborhoods. The DRI ranks neighborhoods from lowest to highest risk based on recent population characteristics, housing conditions, and market pressures.

There are five ranks with equal numbers of neighborhoods. For example, neighborhoods ranked "lowest" are among the 20% of NYC neighborhoods with the least intense displacement risk factors while neighborhoods ranked "highest" are among the 20% of neighborhoods with most intense displacement risk factors.

Displacement Risk

Demographic Conditions

Figure 1: Race & Ethnicity, 2020

Shows the share of area population by mutually exclusive race and Hispanic ethnicity. Compares the local area to the borough and city.

"In 2020, [percent] of the population in [area] identified as [race/ethnicity]."

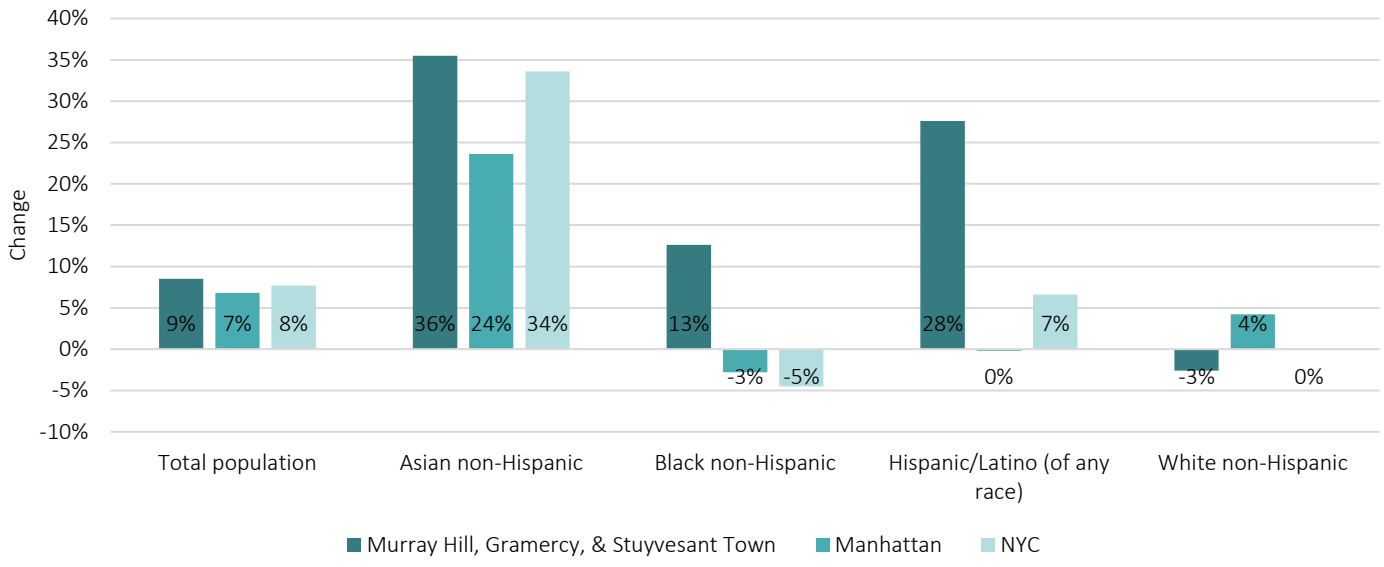

Source: Census 2020; Community Profile Table 1.01

Figure 2: Percent Change in Race & Ethnicity, 2010 to 2020

Shows the percent change of the area population by mutually exclusive race and Hispanic ethnicity. Compares the local area to the borough and city.

"From 2010 to 2020, the [race/ethnicity] population in [area] increased/decreased by [percent]."

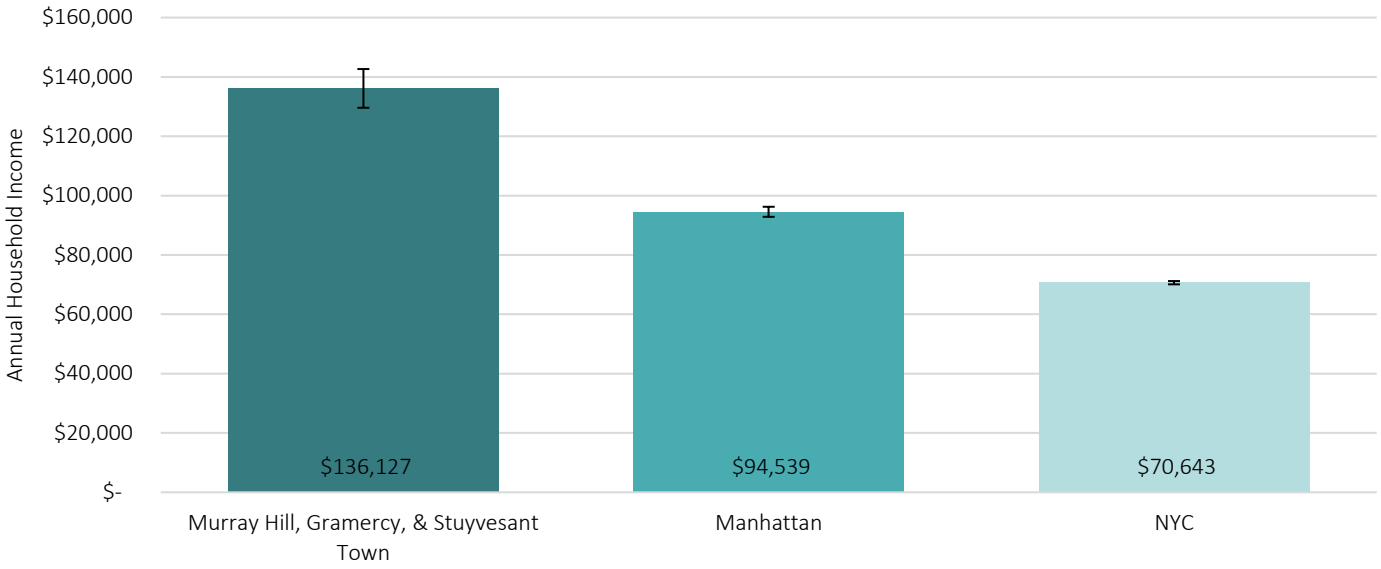

Source: Census 2010, 2020; Community Profile Table 1.01

Household Economic Security – Income

Figure 3: Median Household Income, 2017-2021 (Five-Year Estimate)

Shows the estimated median household income (in 2021 dollars) for the local area, borough, and city. Median means half of all households in the area make more than this amount and half make less. Compares the local area to the borough and city.

"For 2017-2021, the estimated median household income in [area] was [$]."

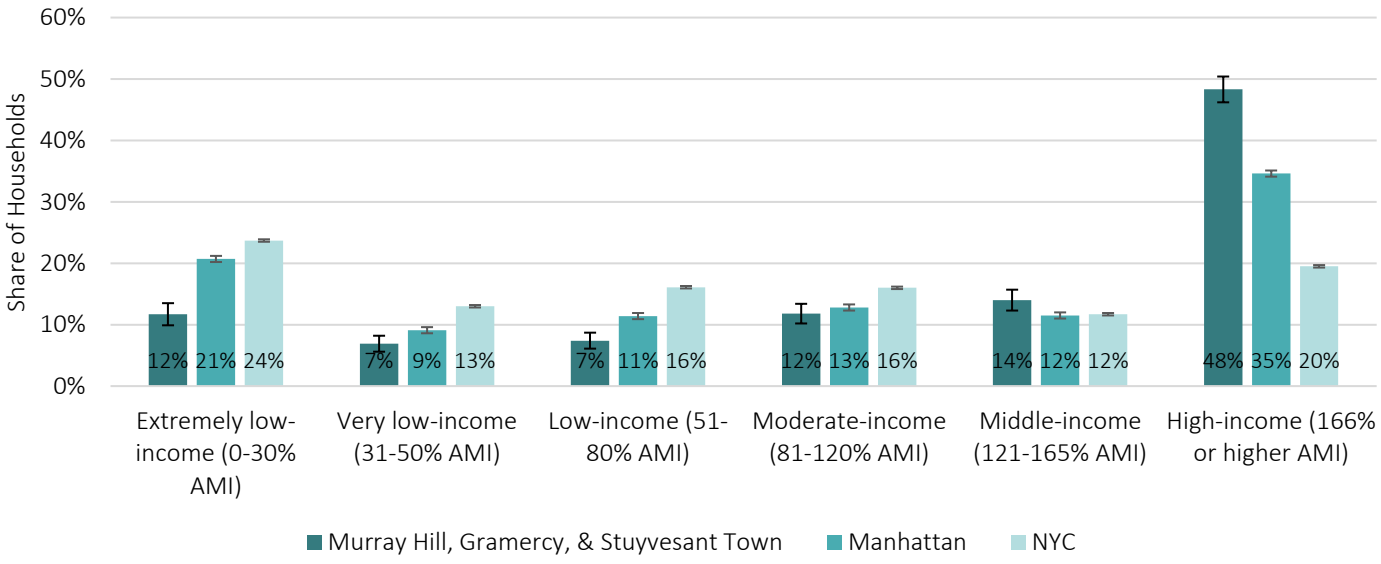

Source: American Community Survey 2017-2021; Community Profile Table 2.02

Figure 4: Share of Households in Each HUD AMI Band, 2017-2021 (Five-Year Estimate)

Shows the share of households within each 2019 U.S. Housing and Urban Development (HUD) Area Median Income (AMI) band. Compares the local area to the borough and city. U.S. Housing and Urban Development (HUD) Area Median Income (AMI) is based on rental prices.

"For 2017-2021, an estimated [percent] of households in [area] were in [HUD AMI band]."

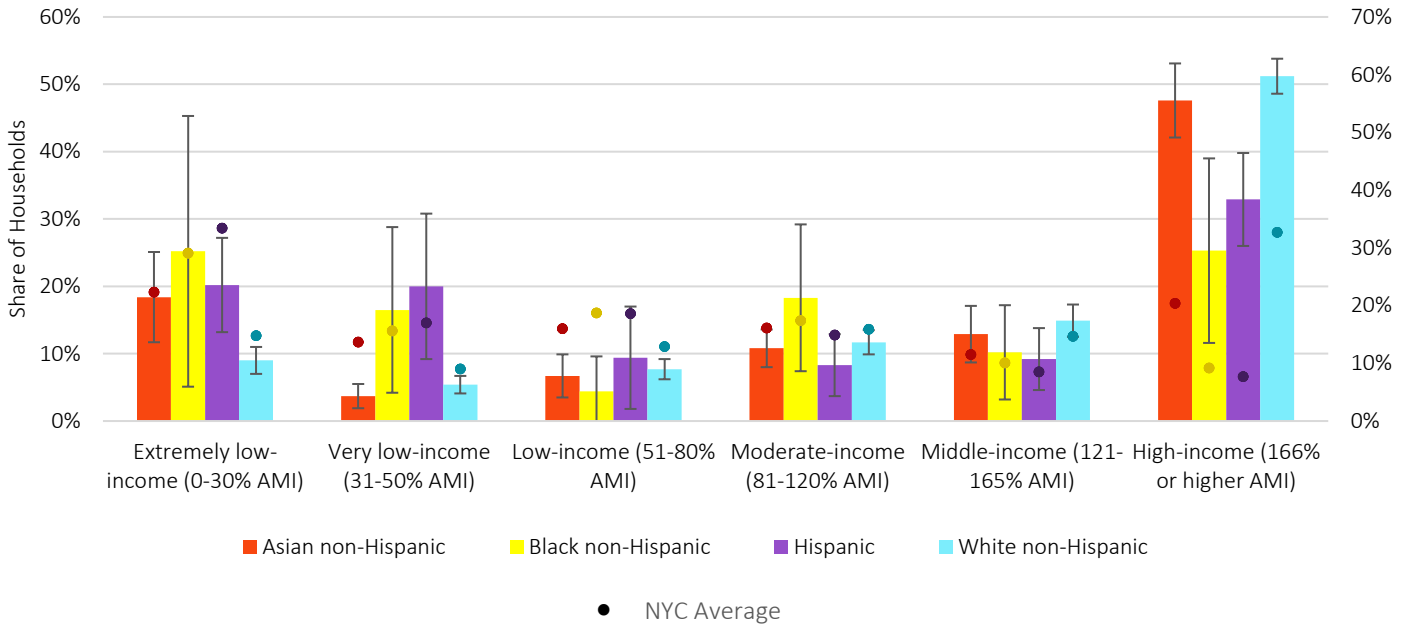

Source: American Community Survey 2017-2021; Community Profile Table 2.03

Figure 5: Share of Households in Each HUD AMI Band by Race & Ethnicity, 2017-2021 (Five-Year Estimate)

Shows the share of PUMA households within each 2019 U.S. Housing and Urban Development (HUD) Area Median Income (AMI) band, by mutually exclusive race & Hispanic ethnicity of householder. HUD AMI bands are used to determine eligibility for income-restricted housing.

"In the local area, an estimated [percent] of [race/ethnicity] households were in [HUD AMI band] in 2017-2021."

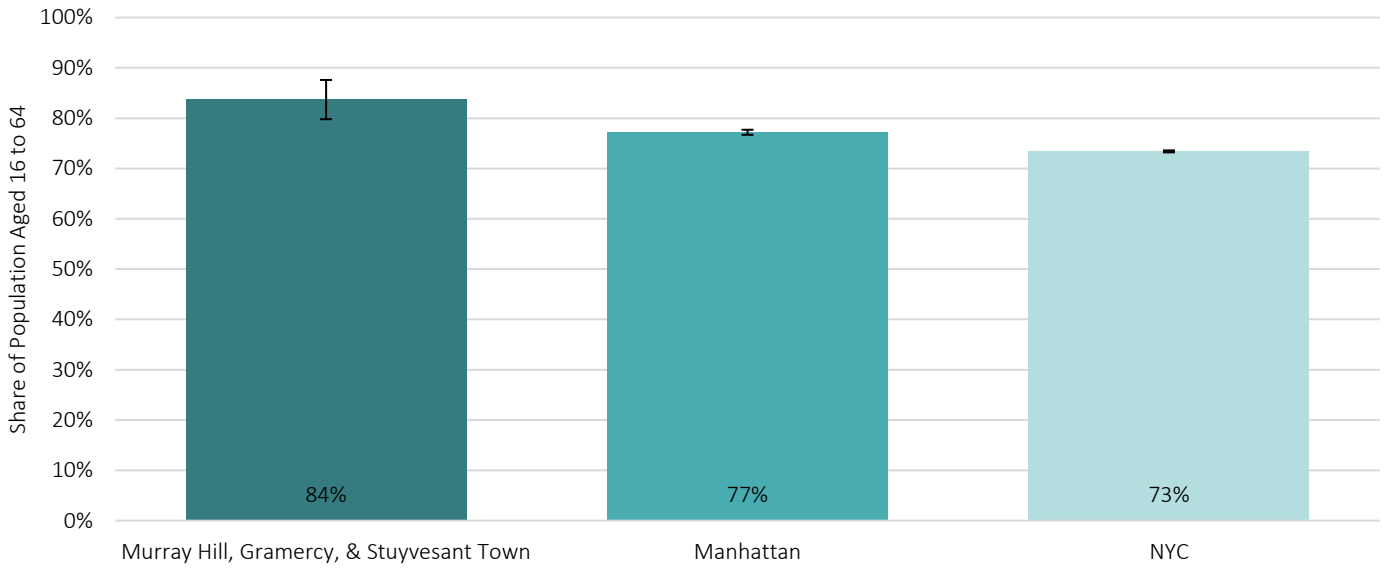

Source: American Community Survey 2017-2021; Community Profile Table 2.03

Household Economic Security – Jobs

Figure 6: Labor Force Participation, 2017-2021 (Five-Year Estimate)

Shows the share of the total population aged 16-64 who is employed or seeking work. Compares the local area to the borough and city.

"In 2017-2021, an estimated [percent] in [area] were employed or seeking work."

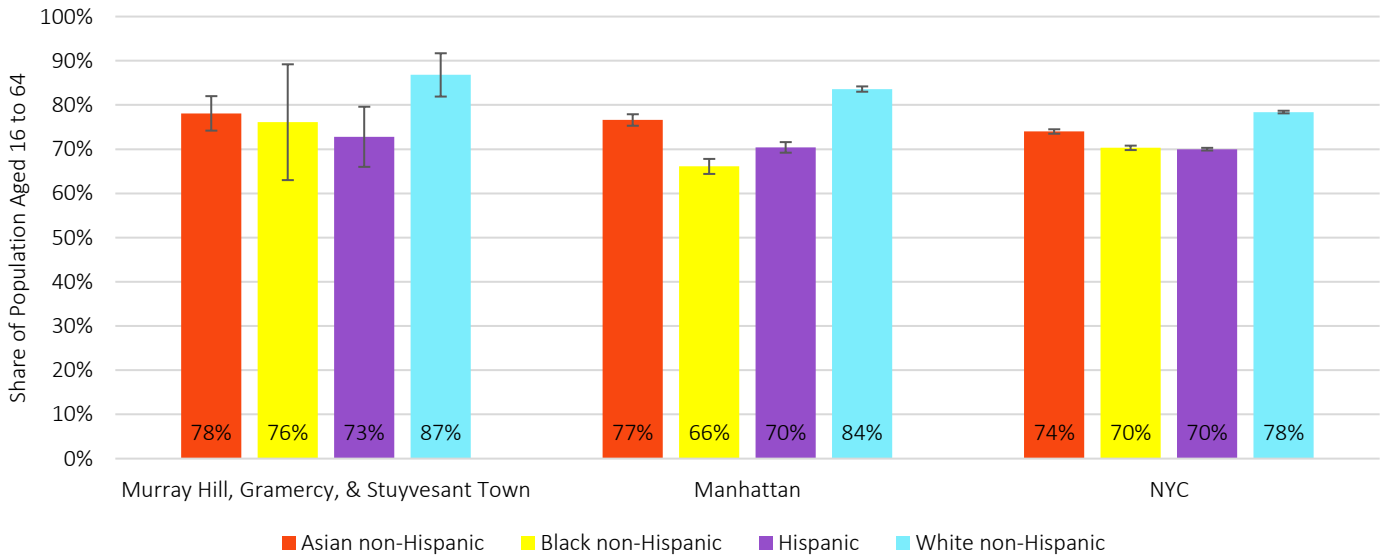

Source: American Community Survey 2017-2021; Community Profile Table 2.04

Figure 7: Labor Force Participation by Race & Ethnicity, 2017-2021 (Five-Year Estimate)

Shows the share of the total population aged 16-64 who is employed or seeking work, by mutually exclusive race & Hispanic ethnicity. Compares the local area to the borough and city.

"In 2017-2021, an estimated [percent] of [race/ethnicity] group in [area] were employed or seeking work."

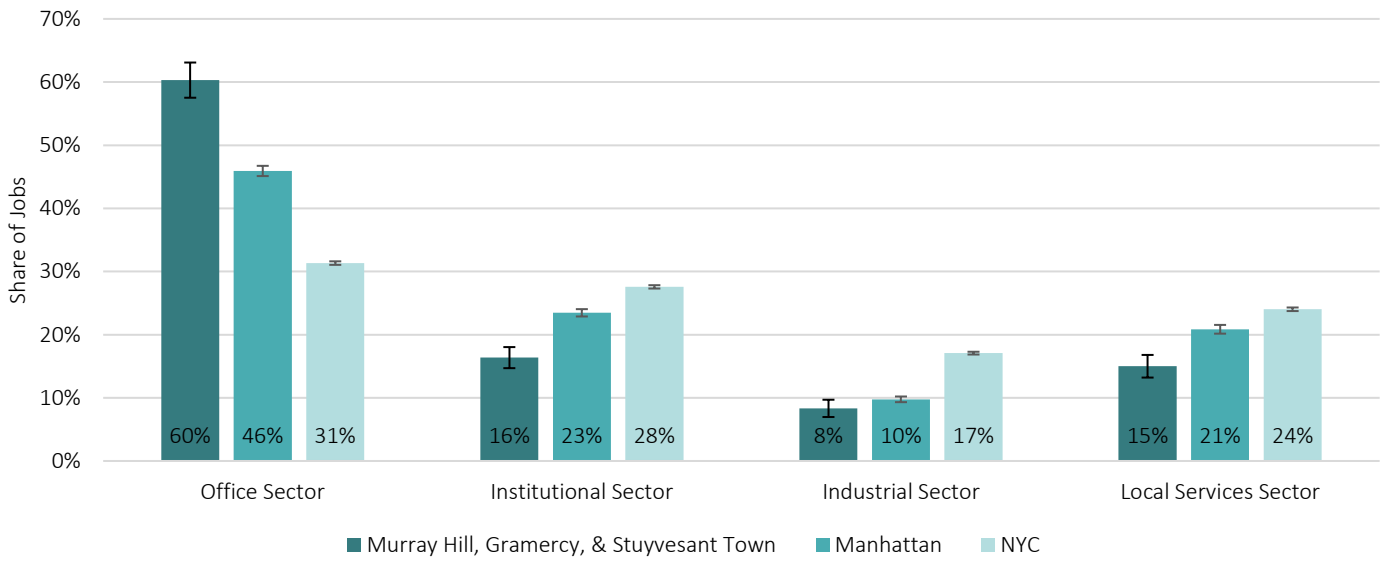

Source: American Community Survey 2017-2021; Community Profile Table 2.04

Figure 8: Share of Employed Residents by Business Sector[1], 2017-2021 (Five-Year Estimate)

Shows the share of workers who live in an area by the business sector in which they work. Compares the local area to the borough and city.

"In 2017-2021, an estimated [percent] of employed people in [area] worked in [business sector]."

Source: American Community Survey 2017-2021; Community Profile Table 2.06

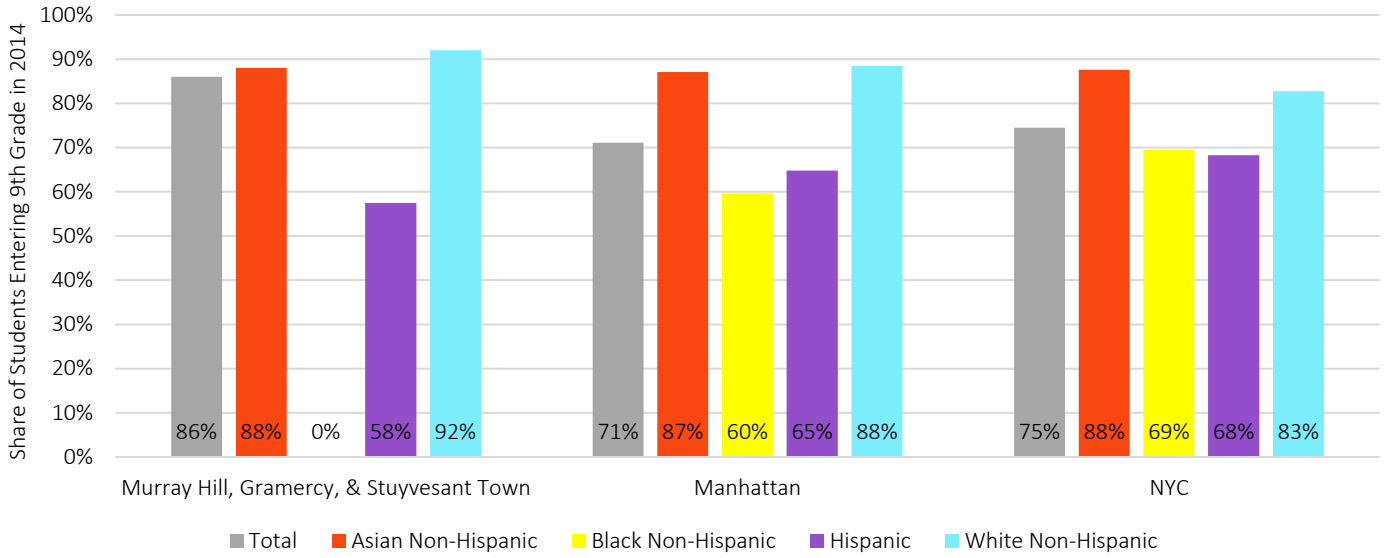

[1] Business sectors are shown as macro-sectors as defined by NYC Department of City Planning. Office sector includes professional, management, finance businesses, and others; institutional sector includes educational services and health care and social assistance; industrial sector includes construction, manufacturing, warehousing businesses, and others; local services sector includes retail, arts and entertainment, food service businesses, among others.

Education & Access to Transit

Figure 9: High School Graduation Rate, 2018

Shows the rate of students who entered 9th grade in 2014 and graduated by 2018. Shows the share of total students and share of students by mutually exclusive race and ethnicity groups. Compares the local area to the borough and city.

"The 2018 graduation rate for [race/ethnicity] group in [area] was [percent]."

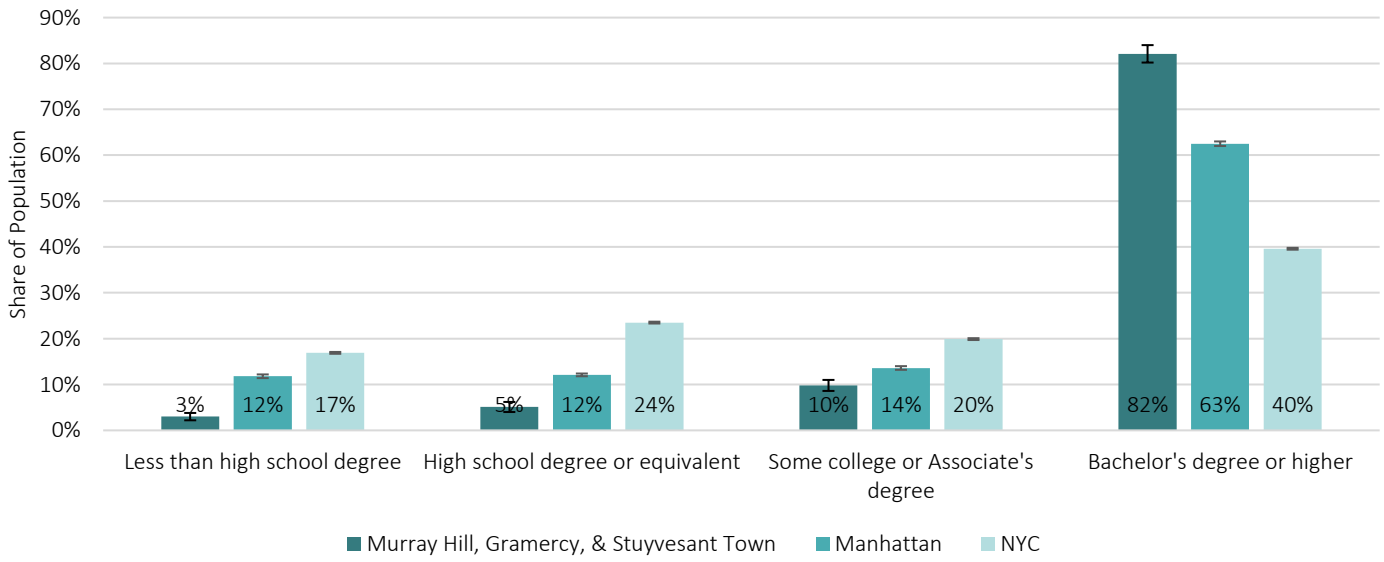

Source: NYC Department of Education 2018; Community Profile Table 5.13

Figure 10: Educational Attainment, 2017-2021 (Five-Year Estimate)

Shows the share of the population 25 years and over, by highest level of educational attainment. Compares the local area to the borough and city.

"In 2017-2021, an estimated [percent] of the population 25 years and over in [area] had [educational attainment]."

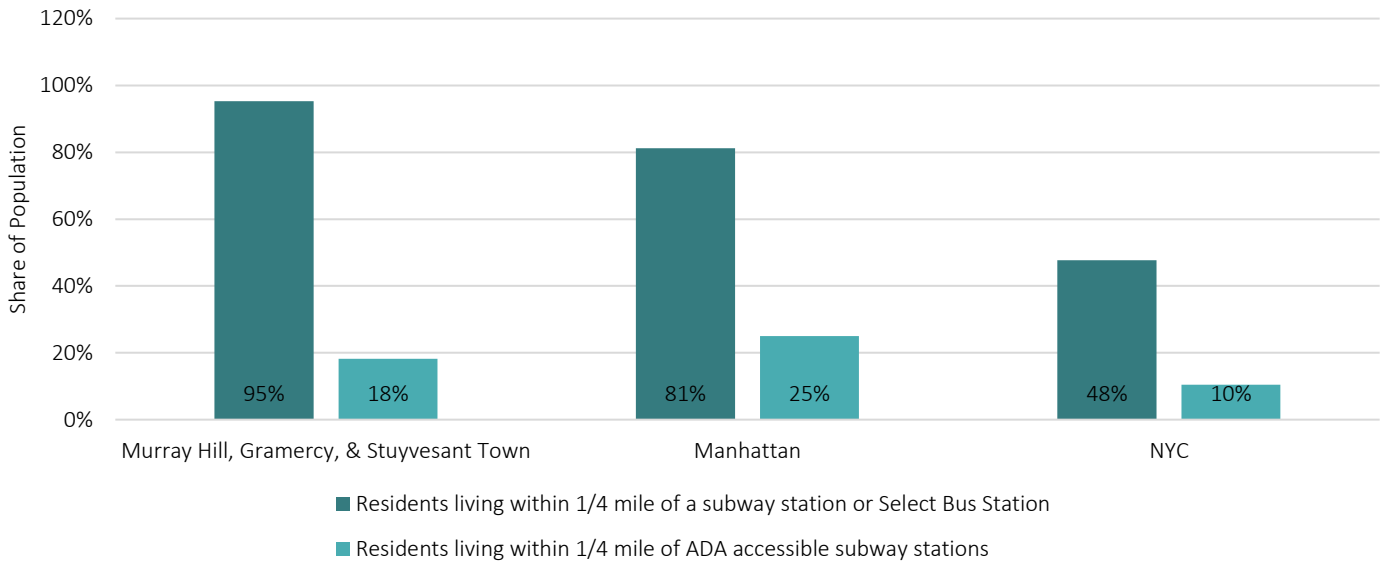

Source: American Community Survey 2017-2021; Community Profile Table 2.01

Figure 11: Access to Transit, 2021

Shows the share of population that lives within ¼ mile of a subway station or select bus service stop; and share of population that lives ¼ mile of an ADA accessible subway station. Compares the local area to the borough and city.

"In 2021, about [percent] of residents in [area] lived near an ADA accessible subway station."

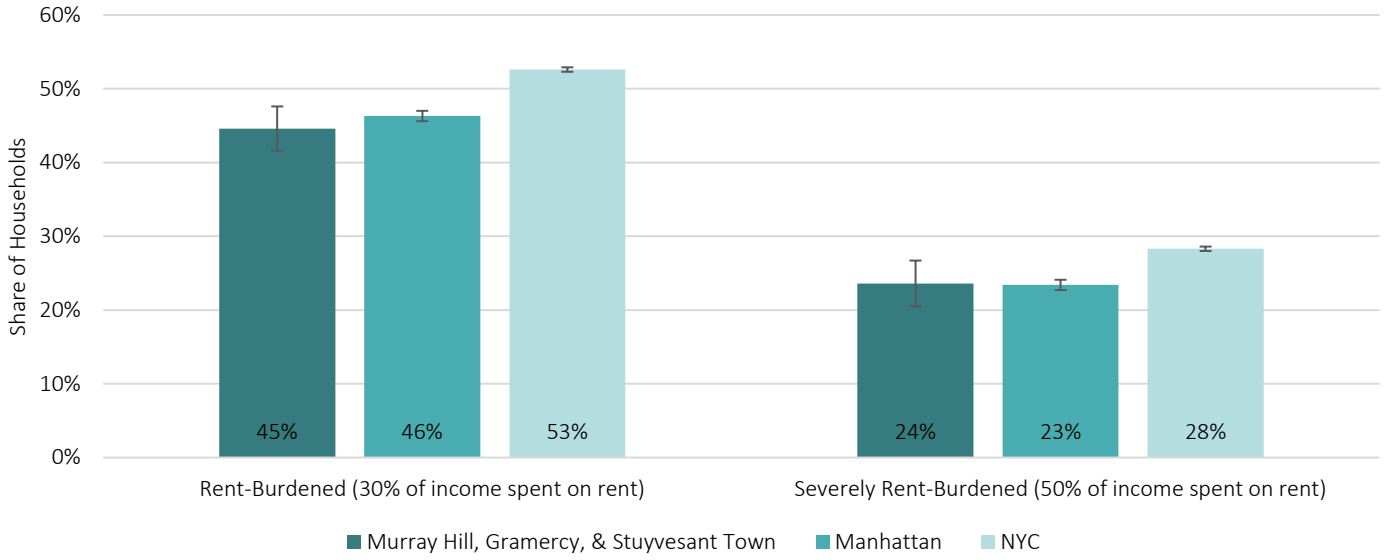

Source: Department of City Planning 2021; Community Profile Table 5.09

Housing Security, Affordability, and Quality

Figure 12: Rent-Burdened & Severely Rent-Burdened Households, 2017-2021 (Five-Year Estimate)

Shows the percent of households who spent 30% or more of their income on rent (rent-burdened) and the percent who spent 50% or more of their income on rent (severely rent-burdened). Compares the local area to the borough and city.

"In 2017-2021, an estimated [percent] of households in [area] were severely rent-burdened."

Source: American Community Survey 2017-2021; Community Profile Table 3.04

Figure 13: Median Gross Rent, 2017-2021 (Five-Year Estimate)

Shows the median rent for occupied units paying rent. Median means half of all units have rental costs higher than this amount and half have rents lower than this amount. Compares the local area to the borough and city.

"In 2017-2021, the estimated median price of rental units in [area] was [$]."

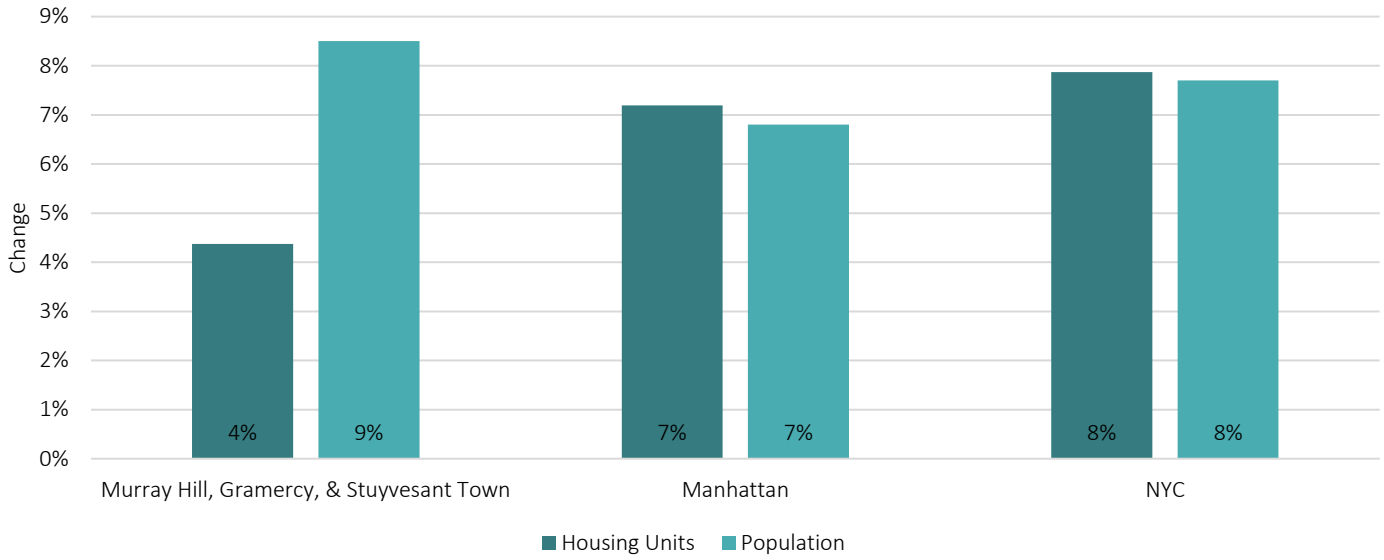

Source: American Community Survey 2017-2021; Community Profile Table 3.03

Housing Production

Figure 14: Percent Change in Housing Supply and Population, 2010 to 2022

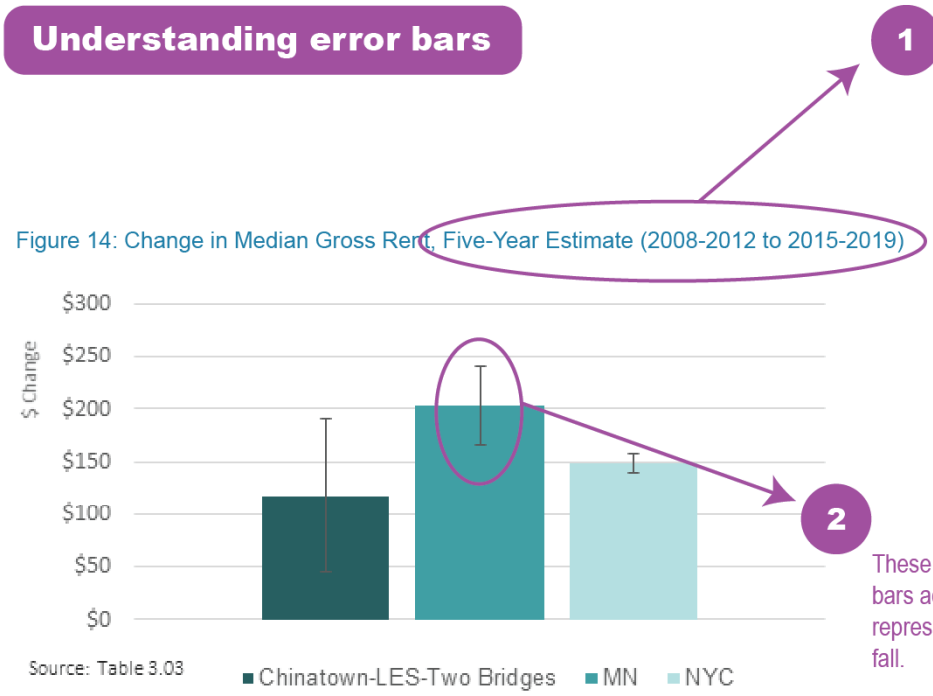

Shows the percent change in the number of housings units and population. Compares the local area to the borough and city.

"From 2010 to 2022, housing units in [area] increased/decreased by [percent] and population increased/decreased by [percent]."

Source: NYC Department of City Planning Housing Database 2022 Q2 and Census 2010, 2020; Community Profile Tables 4.01 and 1.01

Understanding error bars

Five-year estimates refer to data from the American Community Survey (ACS). The ACS is a monthly survey sent to a sample of households throughout the country. To have a large enough sample to create estimates of characteristics for small areas, the ACS "rolls-up" the sample for five-year periods.

Because the ACS data are from a sample, the estimates comes with some uncertainty, which is shown in the chart as ***errror bars.***

These "I" figures are called ***error bars***. Error bars account for uncertainty in ***sample data*** by representing the range in which the data could fall.

In this example, the ***error bars*** tell us that the change in rent in Manhattan is somewhere between about $160 and $245.

Data drawn from a larger sample are more accurate and have a smaller ***error bar***, which is why the size of the ***error bar*** gets smaller as the geography increases in size.

Correct intrepretation of this chart:

"Rents in Chinatown increased between about $50 and $190."

Based on the ***error bar*** for Chinatown, this is correct.

Incorrect intrepretation of this chart:

"Changes in rents in Manhattan were larger than those in Chinatown."

Because the ***error bars*** for Chinatown and Manhattan overlap, we cannot say for certain whether changes were higher or lower. In other words, the range of rent changes in Manhattan ($160-$245) overlap with the range in Chinatown ($45-$195).

Section 4: Affirmatively furthering fair housing and promoting equitable access to opportunity

Provide a narrative statement describing how the project relates to New York City's goals and strategies to affirmatively further fair housing and promote equitable access to opportunity. These goals and strategies are described in the city's fair housing plan, Where We Live NYC.

Where We Live (WWL NYC) details fair housing challenges rooted in historic laws and policies that created persistent disparities in NYC. As stated in WWL NYC, "a holistic approach to advancing fair housing requires substantial investments and policy changes to address the structural disadvantages that neighborhoods and their residents experience. Such commitments are meant to ensure that no one is deprived of access to fundamental resources because of their race, ethnicity, disability, religion, or other protected characteristic, and that residents of all neighborhoods can thrive." WWL NYC further states that although the City has marshaled financial resources and governmental expertise to support structurally disadvantaged neighborhoods and created a $1 billion Neighborhood Development Fund (NDF), much more work is required to address the compounded disadvantages that centuries of discrimination and segregation have produced.

WWL NYC sets forth different strategies and actions to address the neighborhood-based factors that perpetuate disparate outcomes. Of the various goals, the Proposed Project furthers Goal 6 of WWL NYC: "Make equitable investments to address the neighborhood-based legacy of discrimination, segregation, and concentrated poverty". The Proposed Project would stimulate the growth of Life Science companies and organizations which together would employ approximately 1,437 individuals, ranging in skill and education level. NYCEDC identified the Brookdale Campus within the Kips Bay Science District and First Avenue Health and Sciences Corridor as an opportune location to advance many of the goals of the City's LifeSci NYC initiative, a $1 billion initiative expected to create nearly 40,000 new jobs by 2026—many accessible to New Yorkers without advanced degrees—and establish NYC as a global leader in Life Sciences. The LifeSci program is geared towards the following goals:

› Connecting existing researchers and institutions to the resources needed to advance programs to commercialization;

› Unlocking space for Life Sciences companies to grow within the city; and

› Building a pipeline for the talent and workforce needed to support these companies across the five boroughs.

Approximately 1,437 jobs would be accommodated on-site, including approximately 927 jobs in the educational services industry and approximately 510 jobs in the hospital (medical) industry. In addition to the jobs introduced at the Development Site, the Proposed Project would transform the existing block into a connected series of buildings arranged to allow for a major public open space at grade. The Proposed Project also includes a number of community improvements that would be undertaken outside of the SPARC campus to improve public access, pedestrian safety, and resiliency.

(Section 4 continued)

Section 5: Community profile

The community profile provides data tables for all indicators from the Equitable Development Data Explorer (EDDE) for the relevant Community District[2]. Includes approximately 50 indicators across five categories:

- *demographic;*
- *household economic security;*
- *housing affordability, quality, and security;*
- *housing production; and*
- *quality of life and access to opportunity.*

Where possible, these indicators are broken down by mutually exclusive race/ethnicity and show change over time.

All community profiles can be downloaded from the Equitable Development Data Explorer.

[2] The EDDE reports data by Public Use Microdata Areas (PUMA), statistical areas defined by the U.S. Census. PUMAs in New York City generally approximate Community Districts. Displaying the data at the PUMA scale enables data reporting broken down by race and ethnicity.
